Now fellow-broadcasters, the most dangerous epochs in history are those in which mind out-distances spirit. We are confronted with such an epoch right now—a time when the whole world is concentrating on the making of machinery and equipment for destroying the human race. Vital as is this important technological effort, at the same time more consideration can also be given to what are usually termed the higher consecrations. We can be better Americans in so doing. We can turn out more equipment for the war effort at the same time. In fact, in the new America which is being born in this hour of travail, if we are to know the glorious freedoms which have made life here so vital, ours must indeed be the interests and the loyalties of a citizenship at its best.

The quality of that citizenship depends on four sets of reactions, as I see it. The first set embraces,

The way we deal with things.

It has now dawned on us that no matter what their form, things have almost a sacred character, these very things the radio has made us want so utterly. Already our attitude toward them is appreciably changed. We are beginning to realize what things represent in energy and material expenditure. A loaf of bread, a fountain pen, a transmitter tube, some copper wire, a suit of clothing, a radio set, and most certainly an automobile tire.

The way we deal with these and other things will indicate, in part, the quality of our Americanism. The care we give our automobile is a part of us; the way I treat a book or read a newspaper; the manner in which I keep my desk, pay my bills, tune my radio, care for my lawn, drive my car, is an extension of my personality. It is a mark of my Americanism.

Now, in the days ahead, waste and extravagance will be a mark of disloyalty because there will be the greatest dearth of, and hunger for things that the human race has ever known. Millions will need and want, but at least, at first, there will be little available to meet those needs and those wants.

The second set of traits that will function vitally in building the American of tomorrow is:

The way we deal with people.

That is our social sense. With seven million men in our armed forces and a hundred million backing them up on the industrial front, every home in America will be touched.

Although our folk are resolute and courageous, they are also sensitive. Our children have not been reared to become cannon fodder. They know the love of family life and the joys of the American home. There will be much sensitivity in our great land. We must respect it. That is one of the reasons for the great precautions we are taking in our handling of radio news. When we see a man on the street, we don't know the burden he is carrying. Last Monday on entering the Salt Lake City Chamber of Commerce, I ran onto the president of the National Ski Tournament. Noticing that he looked depressed, I inquired how he was. He reluctantly responded by saying he had just received word that his father had been shot by the Gestapo in Norway and that his brother was lost on a Norwegian freighter off the coast of Florida. Yet, I doubt he would ever have told me had I not borne down. We just don't know the burden men are carrying.

Mr. President, we must also be careful in our own businesses. For instance, ponder for a moment the cost American industry pays needlessly because, too often, it carelessly puts uneasiness and worry into the hearts of people. One sociologist has suggested such unnecessary failings on the part of all of us as:

1. Brusque assertiveness.
2. Not giving people enough time to present a point.
3. Making people feel guilty.
4. Judging people by externals.
5. Sanctifying prejudices.
6. Choosing the wrong moment to mention something.
7. Finding fault with half expressed ideas.
8. Shouting to convince, and a hundred others.

Yes, my friends, if the race survives, a lot of high-handedness and selfish covetousness, both in the capital and labor groups, will have to disappear. Hard-boiled, unfair dicta from self-seeking pressure groups can spell finis to the United States, that we have known.

What will it take to teach us that the most deep-seated of human needs is the need to collaborate with other men?

When our chief engineer, with whom I have been associated for the past fifteen years, on leaving for the United States army service a short time ago, reached out his hand to me and said tearfully, "I like you not only for what you are, but also for what I am when I am with you. I like you not only for what you have made of yourself, but also for what you have made of me," he helped me to know the real humility. I did not realize he felt that way.

Such are, indeed, the lasting compensations. Some day, possibly, we shall learn that in the long run, we keep only what we share. In the words of the ancient epitaph: "What I spent, I had; what I kept, I lost; what I shared, I have."

Leadership in the new America will know the power of this concept. It will exemplify that bit of sentiment in the phrase: "When I met him, I was looking down; when I left him, I was looking up."

The third set of traits that will characterize the new American will have to do with:

The way we deal with ideas.

That is our intelligence. It is generally recognized that the most potent thing in the world is an idea whose time has come. At this moment, we are in the center of the greatest technological era in history. A magnificent new day is emerging and with it the crystallizing of a hundred thousand new concepts. The radio industry, I declare, is one of the most provocative influences in it all. Today's rationing, with all of its heartaches and headaches, is really a tremendous motivating power. It reaches out a daring challenge to American skill, resourcefulness and ingenuity. The future of the United States is still ahead of us, regardless of what the skeptics, cynics, defeatists and agnostics declare.

We of radio are anchored to an industry so new and so freighted with possibilities that it fits perfectly into the millennium of achievement toward which we are heading.

Leadership need not be afraid of enthusiasm. There will always be enough apathy on the part of the people to apply such brakes as are necessary. Remember, as we have been so frequently reminded, people won't take the initiative if they can avoid doing so. People won't act unless prodded. People won't give up their prejudices without a struggle. People won't concentrate unless sternly disciplined. People won't work without continually renewed incentives. People won't readily forsake the old for the untried. People will fight for freedom, but too often they won't vote to sustain it. There is always inertia to overcome.

Now, the fourth and the last set of traits covers:

The way that we deal with ourselves.

This reaction makes up our character. To fit times like these, we must be hard of body, hard of mind and hard of purpose. We must be adaptable or we perish.

The relevations of the Selective Service indicate that if we are to survive as a nation, we must face a severe physical challenge. The vaunted American citrus fruits, vitamins, bathtubs, and air-conditioning for some reason are not achieving what they should. We should show far more respect than we do for the American physical machine. If you question that, try in your neighborhood to find one hundred men who can pass the examination of a battery of army doctors.

The mental American, in large part, is a product of our schools. He must show predominantly those qualities that have built our great leadership. Radio, too, has helped him tremendously. Here are these mental qualities that will prove so necessary in the years ahead: enthusiasm, observation, initiative, tact, courtesy, perseverance, concentration, decision, judgment and purpose.

The spiritual American will function mightily as the great new era comes rolling in. His must be a galaxy of positive spiritual qualities such as courage, truthfulness, confidence, loyalty, faith and honesty.

So then, my friends, the way we deal with things, people, ideas and ourselves, will indicate the character of our worth to humanity. America needs much of us. America expects much of us. We must not let her down.

It is my humble thesis that the miracle of radio broadcasting in its varied enthusiasms and exaltations will help men to set for themselves the great renewing ideals so vital in the interesting world in which we are to live.

Our first assignment is to exert every foot-ton of energy the radio industry can develop to win the war. Our second assignment is to call upon every resource we possess in helping our beloved America, and right thinking men the world over, to win the peace.

I thank you.

Listener Activities

The recently organized Louisville (Ky.) Radio Council has promulgated some tips on how to listen to war news. They follow:

1. Select intelligently your daily listenings.
2. Listen accurately to war news commentators.
3. Listen consistently until news is completed.
4. Do not let your emotions affect your better judgment.
5. Learn to separate news from possible propaganda.
6. Listen cautiously to foreign broadcasts from Germany, Italy and Japan.
7. Refrain from circulating rumors.
8. Listen calmly to bad news.
9. Keep faith in our government and fighting forces.
10. Retain undying belief in our spiritual heritage and Victory.

DOROTHY LEWIS TO ORGANIZE WOMEN DIRECTORS

Under the department of Coordinator of Listener Activities, during the 1942 NAB Convention in Cleveland, a meeting was held for Directors of Women's Activities. During 1940-41 several extensive tours of stations, Dorothy Lewis discovered that these women directors were entirely out of touch with one another. They are, however, carrying considerable responsibility particularly in wartime. This first conference demonstrated clearly a need for closer cooperation and collaboration. It was voted to form an "Association of Radio Directors of Women's Activities." Membership will be developed on a NAB district basis with a district chairman for each area. It is hoped that in this way, balance of power will not shift to any one center and that at least one meeting a year can be held. Dues will be nominal.

It was further voted to develop a monthly news letter to be distributed to all women directors at first, later perhaps to members only. This plan will acquaint the group as a whole with success stories, pertinent wartime information and defense propaganda, etc. Miss Jane Weaver of WTAM, Cleveland, and Miss Eleanor Hanson of WHK, Cleveland, agreed to act as temporary editors for one year, acting in cooperation with Dorothy Lewis, NAB Coordinator of Listener Activity.

While we have names of about 300 women directors, we know that there are constant changes in personnel. Therefore will you forward to Dorothy Lewis, NAB, the correct names and titles of women of your station, who are doing the work of director of women's activity or carrying a sponsored or sustaining women's hour. Upon receiving such information we will then submit to them the list of all such women in their districts.

To expedite organization and operation, Mrs. Lewis is appointing temporary chairman and officers to carry on until other regional and national meetings are held, when elections can be held in due order.

Let us hear from you at an early date, giving names of women on your staff.

RADIO IN CLASSROOM

Resolution passed by the National Society of New England Women in convention, Cleveland, May 17, 1942.

Whereas, education of youth of our nation has always been of paramount importance to the peoples of New England, and is now of even greater significance,

Resolved, that the National Society of New England Women recommends to the Federal Office of Education and all State Boards of Education that the use of radio in the classroom be recognized and made an integral part of the school curricula under a plan which will place control in the hands of the class room teacher to the end that children may be properly guided in respect to their listening habits, and that the selection of programs for class room use be made with a view to bringing to the children an understanding of all phases of radio broadcasting, including its educational, cultural, social, news and entertainment contributions.

JOHN R. ("DOC") BRINKLEY

John R. Brinkley, 56, died of heart trouble this week in San Antonio.

FEDERAL COMMUNICATIONS COMMISSION

FLY DISCUSSES APPLICATIONS

FCC Chairman, James Lawrence Fly, at a press conference on Monday discussed pending broadcast applications for construction permits.

He stated that many applicants for permits either directly or indirectly were continuing to press for action by the Commission for construction and use of materials. Mr. Fly called attention to the fact that of course it was a natural tendency on the part of each applicant to stress his own case as being particularly "meritorious" because, for example, the materials for most of them were available and also because various procedural steps had already been taken.

"Needless to say," the Chairman stated, "the Commission would like very much to recognize these very cases and make the grants and get the stations going. But we are faced with the requirements of the WPB and with actual rules that have been adopted to meet the war time situation. We simply cannot operate under the rules by starting a line of deviations. Those rules are deemed essential for war purposes. Be that as it may, so long as those are the rules in both the Commission and the industry, there is no alternative but to live up to them. We expect to make no exceptions except those that are clearly indicated on the face of the rule itself. I would strongly advise applicants faced with this war time problem not to waste their time and energies, and money of themselves or the Government in endeavoring to pursue the applications which run counter to the rules. The best we can hope to do in the broadcasting field is to consolidate our position and to endeavor to keep the present broadcasting structure on a firm and successful and enduring foundation for the period of the war. In that effort, of course, the industry will have the complete cooperation of the Commission and all the assistance it can render consistently with the requirements for active war work."

Mr. Fly stated in answer to a question regarding the relaxation of operators' licenses for low-powered stations that the Commission has this under consideration. He called attention to the fact that the Commission has already relaxed the standards and taken substantial steps to alleviate that situation. However, he stated that the Commission has been impressed recently with the needs of the low-powered stations and "we are giving that further attention."

NEW FCC APPOINTMENTS

E. M. Webster, Assistant Chief Engineer and Chief of the Safety and Special Services Division of the Engineering Department of the FCC, has been called to active service as Chief of Communications of the United States Coast Guard. To fill this important post while Mr. Webster is on duty with the armed forces, the Commission today appointed Mr. William N. Krebs to be in charge as Chief of the Safety and Special Services Division.

Because of the vital importance of the work of the National Defense Operations Section of the Field Division of the Engineering Department and the increased responsibilities recently assigned in connection with the war effort, the Commission today raised the status of this section to that of a division. The new division will be known as the "Radio Intelligence Division" of the Engineering Department. Mr. George E. Sterling, who formerly served as Chief of the National Defense Operations Section, was appointed Assistant Chief Engineer and Chief of the Radio Intelligence Division.

These changes will become effective on June 1, 1942 and continue for the duration of the war.

924 STATIONS

During the month of April, 1942, the Federal Communications Commission issued operating licenses to two stations. No permits were granted for the construction of new stations. A comparative table by month follows:

	May 1	June 1	July 1	Aug. 1	Sept. 1	Oct. 1	Nov. 1	Dec. 1	Jan. 1	Feb. 1	Mar. 1	Apr. 1	May 1

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, June 1. They are subject to change.

Monday, June 1

WEEU—Berks Broadcasting Company, Reading, Penna.—C. P., **850 kc.,** 5 KW, unlimited, DA-night.

Tuesday, June 2

NEW—Lake Shore Broadcasting Corporation, Cleveland, Ohio.—C. P., **1300 kc.,** 5 KW, unlimited, DA-night & day.

Wednesday, June 3

NEW—William L. Klein, Oak Park, Ill.—C. P., **1490 kc.,** 250 watts, unlimited.

Consolidated Hearing

KGGM—New Mexico Broadcasting Co., Albuquerque, N. M.—C. P., **590 kc.,** 5 KW day, 1 KW night, unlimited, DA-night.

KVSF—New Mexico Broadcasting Co., Santa Fe, N. M.—C. P., **1260 kc.,** 1 KW, unlimited.

Other Participants

Springfield Broadcasting Co. (KGBX), Springfield, Mo.

Thursday, June 4

WIBC—Indiana Broadcasting Corporation, Indianapolis, Ind.—C. P., **1070 kc.,** 5 KW night, 10 KW day, unlimited, DA-night.

KALB—Alexandria Broadcasting Co., Inc., Alexandria, La.—C. P., **580 kc.,** 1 KW, DA-night, unlimited.

Friday, June 5

NEW—Ralph W. S. Bonnett, Sandusky, Ohio.—C. P., **1450 kc.,** 250 watts, unlimited.

Further Hearing

NEW—Granite District Radio Broadcasting Co., Murray, Utah.—C. P., **1490 kc.,** 250 watts, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATION GRANTED

WKAQ—Radio Corp. of Porto Rico, San Juan, Puerto Rico.—Granted construction permit (B-P-3489) for move of transmitter and studio location.

DESIGNATED FOR HEARING

WKBW—Buffalo Broadcasting Corp., Buffalo, N. Y.—Designated for hearing application for renewal of license (B1-R-222), and temporary license granted pending determination upon renewal application.

WGR—Buffalo Broadcasting Corp., Buffalo, N. Y.—Designated for hearing application for renewal of license (B1-R-223), and temporary license granted pending determination upon renewal application.

W9XZY—Pulitzer Publishing Co., St. Louis, Mo.—Designated for hearing application for renewal of facsimile broadcast station license (B4-RFB-5).

LICENSE RENEWALS

The following stations were granted renewal of licenses for the period ending October 1, 1942:

KDYL and auxiliary, Salt Lake City, Utah; WASH, Grand Rapids, Mich.

WKAQ—Radio Corp. of Porto Rico, San Juan, P. R.—Granted renewal of license for main and auxiliary for the period ending June 1, 1944.

WHA—State of Wisconsin, University of Wisconsin, Madison, Wis.—Present license extended upon a temporary basis only, pending determination upon application for renewal, for the period ending August 1, 1942.

WHBI—May Radio Broadcast Corp., Newark, N. J.—Present license extended upon a temporary basis only, pending determination upon application for renewal, for the period ending August 1, 1942.

WMUR—The Radio Voice of New Hampshire, Inc., Manchester, N. H.—Present license extended upon a temporary basis only, pending determination upon application for renewal, for the period ending August 1, 1942.

WSGN—The Birmingham News Co., Birmingham, Ala.—Present license extended upon a temporary basis only, pending determination upon application for renewal, for the period ending August 1, 1942.

WNBZ—Upstate Broadcasting Corp., Saranac Lake, N. Y.—Present license extended upon a temporary basis only, pending determination upon application for renewal, for the period ending August 1, 1942.

Licenses for the following stations were further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending July 1, 1942:

KBST, Big Springs, Texas; KCMC, Texarkana, Texas; KFJB, Marshalltown, Ia.; KGGF, Coffeyville, Kans.; KGIW, Alamosa, Colo.; KGKL, San Angelo, Texas; KMTR, Los Angeles; KPLT, Paris, Texas; KVAK, Atchison, Kans.; KVGB, Great Bend, Kans.; KWLK, Longview, Wash.; KXL, Portland, Ore.; WBRB, Red Bank, N. J.; KRBC, Abilene, Texas; KWKH, Shreveport, La.; WCAZ, Carthage, Ill.; WCBT, Roanoke Rapids, N. C.; WCOC, Meridian, Miss.; WFMD, Frederick, Md.; WFPG, Atlantic City, N. J.; WGRM, Greenwood, Miss.; WMFJ, Daytona Beach, Fla.; WMIS, Natchez, Miss.; WORK, York, Pa.; WSPB, Sarasota, Fla., and WKBW auxiliary, Buffalo, N. Y.

Licenses for the following were extended upon a temporary basis only, pending determination upon application for renewal of license, for the period ending July 1, 1942:

KGVO, Missoula, Mont.; KMBC and auxiliary, Kansas City, Mo.; KTBC, Austin, Tex.; KTFI, Twin Falls, Idaho; KUOA, Siloam Springs, Ark.; WBRC, Birmingham, Ala.; WCAE and auxiliary, Pittsburgh, Pa.; WCAX, Burlington, Vt.; WCOP, Boston, Mass.; WDSU, New Orleans; WHLD, Niagara Falls, N. Y.; WAAT auxiliary, Jersey City, N. J.; WAPO, Chattanooga, Tenn.; WGR auxiliary, Buffalo, N. Y.; WMRO, Aurora, Ill.; WOOD, Grand Rapids, Mich.; WOV and auxiliary, New York City; WSPR, Springfield, Mass.

W9XLA—KLZ Broadcasting Co., Denver, Colo.—Present license further extended upon a temporary basis to July 1, 1942, pending determination upon application for renewal.

W8XUM—WBNS, Inc., Columbus, Ohio.—Present license further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending July 1, 1942.

W3XDD—Bell Tel. Laboratories, Inc., Whippany, N. J.—Present license further extended upon a temporary basis to July 1, 1942, pending determination upon application for renewal.

W3XPY—Bell Tel. Laboratories, Inc., Whippany, N. J.—Present license further extended upon a temporary basis to July 1, 1942, pending determination upon application for renewal.

W8XO—The Crosley Corp., Mason, Ohio.—Present license further extended upon a temporary basis to July 1, 1942, pending determination upon application for renewal.

W9XER—Midland Broadcasting Corp., Kansas City, Mo.—Present license further extended upon a temporary basis to July 1, 1942, pending determination upon application for renewal.

W5XAU—WKY Radiophone Company, Oklahoma City, Okla.—Present license further extended upon a temporary basis only to July 1, 1942, pending determination upon renewal.

WELI—City Broadcasting Corp., New Haven, Conn.—Granted renewal of license for the period ending August 1, 1944.

WFLA—The Tribune Co., Tampa, Fla.—Granted renewal of license for the period ending August 1, 1944.

WAAT—Bremer Broadcasting Corp., Jersey City, N. J.—Granted renewal of license for the period ending August 1, 1944.

WAPO—W. A. Patterson, Chattanooga, Tenn.—Granted renewal of license for the period ending August 1, 1944.

MISCELLANEOUS

WMMN—Monongahela Valley Broadcasting Co., Fairmont, W. Va.—Granted modification of construction permit as modified, which authorized changes in directional antenna system and increase in power, for extension of completion date from April 20, 1942 to October 31, 1942 (B2-MP-1550).

WDLS—Hobart Stephenson, Milton Edge, and Edgar J. Korsmeyer, d/b as Stephenson, Edge and Korsmeyer, Jacksonville, Ill.—Granted license to cover construction permit as modified for new station (B4-L-1575); granted authority to determine operating power by direct measurement of antenna power (B4-Z-1315).

KTUC—Tucson Broadcasting Co., Tucson, Ariz.—Granted license to cover construction permit which authorized installation of new transmitter and antenna and move of transmitter and studio location (B5-L-1626); granted authority to determine operating power by direct measurement of antenna power (B5-Z-1357).

KVCV—Golden Empire Broadcasting Co., Redding, Calif.—Granted authority to determine operating power by direct measurement of antenna power (B5-Z-1389).

WTAR—WTAR Radio Corp., Norfolk, Va.—Granted authority to determine operating power by direct measurement of antenna power (B2-Z-1391).

WJW—WJW, Inc., Akron, Ohio.—Granted modification of construction permit which authorized installation of new transmitter and directional antenna for day and night use, increase power, change of frequency, and move of transmitter, for change in proposed transmitter location, changes in directional antenna for day and night use, and extend commencement and completion dates from March 20, 1942, and September 20, 1942, to 60 days after grant and 180 days thereafter respectively (B2-MP-1563).

W47P—Walker and Downing Radio Corp., Pittsburgh, Pa.—Granted license to cover construction permit as modified and which authorized new high frequency broadcast station (B2-LH-5).

KVOD—Colorado Radio Corp., Denver, Colo.—Granted modification of construction permit as modified for increase in power, install new transmitter and changes in directional antenna, for extension of completion date from May 29 to June 29, 1942 (B5-MP-1565).

WSAN—The Yankee Network, Inc., Providence, R. I.—Granted modification of construction permit which reinstated construction permit B1-P-2037, as modified for changes in directional antenna and increase in power, for extension of completion date from May 9 to July 8, 1942 (B1-MP-1562).

WHIT—Coastal Broadcasting Co., New Bern, N. C.—Granted license to cover construction permit as modified for new station (B3-L-1658); granted authority to determine operating power by direct measurement of antenna power (B3-Z-1390).

WLOL—Independent Merchants Broadcasting Co., Minneapolis, Minn.—Granted petition for leave to dismiss without prejudice application for construction permit to operate on **630 kc.**, 5 KW day, 1 KW night (Docket 6196).

WMIN—WMIN Broadcasting Co., St. Paul, Minn.—Granted petition for leave to dismiss without prejudice application for construction permit to operate on **630 kc.**, 5 KW day, 1 KW night (Docket 6197).

WMBG—Havens and Martin, Inc., Richmond, Va.—Granted license to cover construction permit as modified, which authorized changes in directional antenna (B2-L-1661); granted authority to determine operating power by direct measurement of antenna power (B2-Z-1393). Granted authority to determine operating power by direct measurement of antenna power, for auxiliary transmitter (B2-Z-1394).

KYCA—Southwest Broadcasting Co., Prescott, Ariz.—Denied petition to reconsider and grant application (B5-TC-276) for transfer of control of station KYCA.

KMP—Eddie Erlbacher, Cape Girardeau, Mo.—Granted petition for continuance of hearing now set for May 29 to June 30, 1942.

WIBC—Indiana Broadcasting Corp., Indianapolis, Ind.—Granted motion for leave to amend application so as to request night power of 5 KW, change in DA for nighttime; denied as to removal from hearing docket. The Commission on its own motion continued the hearing now set for June 4 to July 7.

Utica Observer Dispatch, Inc., Utica, N. Y.—Petition to hold record in abeyance, or in the alternative, dismiss application of applicant and that of Midstate Radio Corp. without prejudice, was withdrawn.

Herman Radner, Dearborn, Mich.—Denied motion to extend time to file petition to grant application for new station; granted for continuance of hearing now set for June 17 to July 15, 1942.

Western Union Telegraph Co.—Continued hearing now scheduled for May 2 to June 18, in the matter of charges, regulations, and practices of Western Union with respect to delivery of domestic telegrams to closed office points.

WFAS—Westchester Broadcasting Corp., White Plains, N. Y.—The Commission on its own motion amended the issues in Docket 6216 and ordered retention of the present hearing date, June 23, 1942.

WSOY—Commodore Broadcasting, Inc., Decatur, Ill.—Granted written request to dismiss application (B4-P-3028). Applicant does not desire to prosecute.

J. C. Horton, Santa Ana, Cal.—Granted petition for dismissal without prejudice of application for new station (B5-P-3441).

General Broadcasting, Inc., Miami, Fla.—Granted petition to dismiss without prejudice application (B3-P-2749) for new station.

Park Cities Broadcasting Corp., Dallas, Texas.—Granted petition to dismiss without prejudice application (B3-P-2860) for new station.

WEEU—Berks Broadcasting Co., Reading, Pa.—Granted petition to dismiss without prejudice application (B2-P-3048).

The McKeesport Broadcasting Co., Inc., McKeesport, Pa.—Granted petition to dismiss without prejudice application for new station (B2-P-3324).

Donald Flamm, New York City.—Granted petition to dismiss without prejudice application for new station (B1-P-3400).

Ralph W. S. Bonnett, Sandusky, Ohio.—Granted petition to dismiss without prejudice application for new station (B2-P-3362).

APPLICATIONS FILED AT FCC

680 Kilocycles

KFEQ—KFEQ, Inc., St. Joseph, Mo.—Modification of construction permit (B4-P-2477, as modified, for increase in power, install new transmitter and directional antenna for day and night use, move transmitter and increase hours of operation) for extension of completion date from 5-30-42 to 7-30-42.

770 Kilocycles

KXA—American Radio Telephone Co., Seattle, Wash.—Authority to determine operating power by direct measurement of antenna power.

940 Kilocycles

WMAZ—Southeastern Broadcasting Co., Inc., Macon, Ga.—Modification of construction permit (B3-P-3043, as modified, which authorized change in frequency, increase in power, install directional antenna for day and night use, and move transmitter) for extension of completion date from 7-6-42 to 10-6-42.

1110 Kilocycles

KPAS—Pacific Coast Broadcasting Co., Pasadena, Calif.—Modification of construction permit (B5-P-3261, as modified, for new station) for extension of commencement and completion dates from 1-13-42 and 7-13-42 to 7-13-42 and 9-13-42, respectively.

1250 Kilocycles

WTMA—Atlantic Coast Broadcasting Co.—License to cover construction permit (B3-P-2985) as modified, to install new transmitter, directional antenna for night use, change frequency, increase power and move transmitter.

WTMA—Atlantic Coast Broadcasting Co.—Authority to determine operating power by direct measurement.

1310 Kilocycles

WISH—Capitol Broadcasting Corp.—Construction permit to increase power from 1 KW night, 5 KW day to 5 KW day and night and make changes in directional antenna for night use only.

1340 Kilocycles

WEBR—WEBR, Incorporated, Buffalo, N. Y.—Transfer of control through sale of 1400 shares preferred and 100 shares of common stock (100%) by Edw. H. Butler, individual, Marjorie Mitchell Baird, individual, and Edw. H. Butler, individual, and as trustee under the last Will and Testament of Edw. H. Butler, deceased, d/b as Buffalo Evening News to Buffalo Courier-Express, Inc. (75%) and Paul E. Fitzpatrick (25%).

1380 Kilocycles

WAWZ—Pillar of Fire, Zarephath, N. J.—Modification of construction permit (B1-P-3200 as modified, for increase in power, install new transmitter and changes in antenna system) for extension of completion date from 5-23-42 to 6-23-42.

1390 Kilocycles

WGES—Oak Leaves Broadcasting Station, Inc., Chicago, Ill.—License to cover construction permit (B4-P-3063) as modified, for new transmitter, install directional antenna for day and night use, increase power, change hours of operation, and move transmitter.

WGES—Oak Leaves Broadcasting Station, Inc., Chicago, Ill.—Authority to determine operating power by direct measurement.

1400 Kilocycles

WELL—Federated Publications, Inc., Battle Creek, Mich.—Authority to determine operating power by direct measurement of antenna power.

1490 Kilocycles

WWSW—Walker & Downing Radio Corp., Pittsburgh, Pa.—License to cover construction permit (B2-P-3410), which authorized changes in auxiliary transmitter.

MISCELLANEOUS APPLICATIONS

WNKF—National Broadcasting Company, Inc., area of Chicago, Ill.—Modification of license to show use of station with applicant's standard broadcast station WMAQ, Chicago, Ill., only, and to delete use with station WENR.

WEJV—National Broadcasting Company, Inc., area of Chicago, Ill.—Modification of license to show use of station with applicant's standard broadcast station WMAQ, Chicago, Ill., only, and to delete use with station WENR.

W79C—Oak Park Realty & Amusement Co., Chicago, Ill.—Modification of C. P. (B4-PH-117, which authorized new H. F. B. station) for extension of commencement and completion dates only, from 12-28-41 and 6-28-42 to 6-28-42 and 12-28-42, respectively.

NEW—Blue Network Co., Inc., area of San Francisco, Cal.—License for new relay broadcast station using already licensed equipment (using equipment licensed to NBC relay station KEJP). Frequencies, **31220, 35620, 37020, 39260 kcs.**; power, 25 watts; emission A1, A2, A3; location, Portable-Mobile, area of San Francisco, Calif.

NEW—Blue Network Co., Inc., area of San Francisco, Calif.—License for new relay broadcast station using already licensed equipment (licensed to KEJH). Frequencies, **31220, 35620, 37020, 39260 kcs.**; power, 2 watts; emission, A3; location, Portable-Mobile, area of San Francisco, Calif.

NEW—Blue Network Co., Inc., area of San Francisco, Calif.—License for new relay broadcast station using already licensed equipment (licensed to station KEJB). Frequencies, **31220, 35620, 37020, 39260 kc.**; power, 0.25 watts; emission, A3; location, Portable-Mobile, area of San Francisco, Calif.

NEW—Blue Network Co., Inc., area of San Francisco, Calif.—License for new relay broadcast station using already licensed equipment (licensed to KEJL). Power, 25 watts; emission, A3; frequencies, **31220, 35620, 37020, 39260 kcs.**; location, Portable-Mobile, area of San Francisco, Calif.

NEW—Blue Network Co., Inc., area of San Francisco, Calif.—License for new relay broadcast station using already licensed equipment (licensed to KEJC). Power, 2 watts; emission, A3; frequencies, **31220, 35620, 37020, 39260 kcs.**; location, Portable-Mobile, area of San Francisco, Calif.

KEJP—National Broadcasting Company, Inc., area of San Francisco, Calif.—Modification of license to show use of station with applicant's standard broadcast station KPO, San Francisco, Calif., only, and to delete use with station KGO.

KEJH—National Broadcasting Co., Inc., area of San Francisco, Calif.—Modification of license to show use of station with applicant's standard broadcast station KPO, San Francisco, Calif., only, and to delete use with station KGO.

KEJB—National Broadcasting Company, Inc., area of San Francisco, Calif.—Modification of license to show use of station with applicant's standard broadcast station KPO, San Francisco, Calif., only, and to delete use with station KGO.

KEJL—National Broadcasting Co., Inc., area of San Francisco, Calif.—Modification of license to show use of station with applicant's standard broadcast station KPO, San Francisco, Calif., only, and to delete use with station KGO.

KEJC—National Broadcasting Company, Inc., area of Denver, Colo.—Modification of license for change in area normally served by station from Denver, to San Francisco, and change in standard station with which it is to be used, from KOA, Denver, to KPO, San Francisco.

NEW—Blue Network Co., Inc., area of San Francisco, Calif.—License for new relay broadcast station using already licensed equipment (licensed to KHCM). Frequencies, **1606, 2074, 2102, 2758 kcs.**; power, 25 watts; emission, A1, A2, A3; location, Portable-Mobile, area of San Francisco, Calif.

NEW—National Broadcasting Co., Inc., area of Hollywood, Calif.—Modification of license to show use of station with applicant's standard station KPO, San Francisco, only, and delete use with station KGO.

NEW—Blue Network Co., Inc., Portable-Mobile, area of Chicago, Ill.—License for new relay broadcast station using already licensed equipment (using equipment licensed to NBC under call letters "WEJK") on **31220, 35620, 37020, 39260 kcs.**, 2 watts, emission, A3.

NEW—Blue Network Co., Inc., Chicago, Ill.—License for new relay broadcast station using already licensed equipment (using equipment licensed to NBC under call letters "WEJH") on **31220, 35620, 37020, 39260 kcs.**, 100 watts, emission, A1, A2, A3.

NEW—Blue Network Co., Inc., Portable-Mobile, area of Chicago, Ill.—License for new relay broadcast station using already licensed equipment (equipment licensed to NBC under call letters "WNEP") on **31220, 35620, 37020, 39260 kcs.**, 25 watts, emission, A1, A2, A3.

NEW—Blue Network Co., Inc., Portable-Mobile, area of Chicago, Ill.—License for new relay broadcast station using already licensed equipment (equipment licensed to NBC under call letters "WIEX"), **1606, 2074, 2102, 2758 kcs.**, 50 watts, emission, A3.

NEW—Blue Network Co., Inc., Chicago Ill.—License for new relay broadcast station using already licensed equipment (equipment licensed to NBC under call letters "WMFS") on **1606, 2074, 2102, 2758 kcs.**, 2 KW, emission, A3.

NEW—Blue Network Co., Inc., Portable-Mobile, area of Chicago, Ill.—License for new relay broadcast station using already licensed equipment (equipment licensed to NBC under call letters "WEJM") on **31220, 35620, 37020, 39260 kcs.**, 25 watts, emission, A3.

WBEZ—Board of Education, City of Chicago, Chicago, Ill.—Modification of construction permit (B4-PED-22, as modified, which authorized new non-commercial educational broadcast station) for changes in transmitter location from 228 N. LaSalle St., Chicago, Ill., to 79 W. Madison St., Chicago, Ill., changes in antenna system, and extension of completion date from 7-1-42 to 9-1-42. Amended to extend commencement and completion date from 9-29-41 and 7-1-42 to date of grant and 180 days thereafter, respectively.

NEW—Blue Network Co., Inc., Portable-Mobile, area of Chicago, Ill.—License for new relay broadcast station using already licensed equipment (equipment licensed to NBC under call letters "WNBE") on **1606, 2074, 2102, 2758 kcs.**, 25 watts, emission, A3.

WEJH—National Broadcasting Co., Inc., Chicago, Ill.—Modification of license to show use of station with applicant's standard broadcast station WMAQ, Chicago, Ill., and to delete use with Station WENR.

WEJK—National Broadcasting Co., Inc., Portable-Mobile, area of Chicago, Ill.—Modification of license to show use of station with applicant's standard broadcast station WMAQ, Chicago, Ill., and to delete use with Station WENR.

WNEP—National Broadcasting Co., Inc., Portable-Mobile, area of Chicago, Ill.—Modification of license to show use of station with applicant's standard broadcast station WMAQ, Chicago, Ill., and to delete use with Station WENR.

WIEX—National Broadcasting Co., Inc., Portable-Mobile, area of Chicago, Ill.—Modification of license to show use of station with applicant's standard broadcast station WMAQ, Chicago, Ill., and to delete use with Station WENR.

WMFS—National Broadcasting Co., Inc., Chicago, Ill.—Modification of license to show use of station with applicant's standard broadcast station WMAQ, Chicago, Ill., and to delete use with Station WENR.

WNBE—National Broadcasting Co., Inc., Portable-Mobile, area of Chicago, Ill.—Modification of license to show use of station with applicant's standard broadcast station WMAQ, Chicago, Ill., and to delete use with Station WENR.

WEJX—National Broadcasting Co., Inc., Portable-Mobile, area of Chicago, Ill.—Modification of license to show use of station with applicant's standard broadcast station WMAQ, Chicago, Ill., and to delete use with Station WENR.

KEGB—Don Lee Broadcasting System, Portable-Mobile, area of San Francisco, Calif.—License to cover construction permit (B5-PRY-264) for a new relay broadcast station.

NEW—Blue Network Co., Inc., area of Chicago, Ill.—License for new relay broadcast station using already licensed equipment (licensed to NBC relay station WNKF). Frequencies, **31220, 35620, 37020, 39260 kcs.**; 2 watts power; emission, A3; location, Portable-Mobile, area of Chicago, Ill.

NEW—Blue Network Co., Inc., area of Chicago, Ill.—License for new relay broadcast station using already licensed equipment (licensed to WEJV). Frequencies, **31220, 35620, 37020, 39260 kcs.**; power, 0.25 watts; emission, A3; location, Portable-Mobile, area of Chicago, Ill.

WEJM—National Broadcasting Co., Inc., Portable-Mobile, area of Chicago, Ill.—Modification of license to show use with standard station WMAQ, Chicago, Ill., only, and to delete use with station WENR.

NEW—Blue Network Co., Inc., Portable-Mobile, area of New York, N. Y.—License for new relay broadcast station using already licensed equipment (using equipment licensed to NBC under call letters "WMEF") on **1606, 2074, 2102, 2758 kcs.**, 100 watts; emission, A1, A2, A3.

WMEF—National Broadcasting Co., Inc., area of New York, N. Y.—Modification of license to show use of station with broadcast station WEAF, New York, N. Y., only, to delete use with Station WJZ, and to change from portable-mobile to portable or portable-mobile.

WCAH—Board of Education, City of Buffalo, Buffalo, N. Y.—Modification of construction permit (B1-PED-24, which authorized new non-commercial educational station) for extension of commencement and completion date from 3-27-42 and 9-27-43 to 3-27-43 and 9-27-43 respectively.

NEW—Blue Network Co., Inc., area of Chicago, Ill., Portable-Mobile.—License for new relay broadcast station using already licensed equipment (using equipment licensed to NBC under call letters WEJX) on **31220, 35620, 37020, 39260 kcs.**, 0.25 watts, emission, A3.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Chicago Wholesale Co., Sidney B. Koller and Bernice Feitler, 230 West Monroe St., Chicago, is charged in a complaint with misrepresentation in the sale of jewelry, silverware, luggage, giftware and other merchandise to consumers who buy for their own use and not for retailing and to dealers who order specific articles selected by customers from the respondents' catalogs. (4762)

Savoy Mfg. Company—A complaint has been issued charging Charles and Jack Deer, trading as Savoy Manufacturing Co., 12 West 23rd St., New York, with the use of lottery methods and misrepresentation in the sale of electrical appliances, tableware, luggage, house furnishings and other merchandise. (4763)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

James MacDonald Ltd., et al.—Five Scottish producers of Harris Tweed fabrics and their sales representatives in the United States have been ordered to cease and desist from engaging in any price-fixing agreement or conspiracy which restrains and monopolizes the sale of their products in trade between Great Britain and the United States, and between the States.

The respondent producers are James MacDonald, Ltd., Kenneth MacKenzie, Ltd., S. A. Newall and Sons, Ltd., W. A. Smith, John Smith and A. P. C. Lawrence, trading as Thomas Smith & Co., all of Stornoway, Scotland, and Kenneth MacLeod, Ltd., Shawbost, Scotland. (4618)

Model Home Supply Co., 34 East 12th St., New York, has been ordered to cease and desist selling or otherwise disposing of merchandise by means of a lottery scheme. The respondents deal in jewelry, cosmetics, clothing and electrical and household articles. (3507)

Sterling Products, 170 Varick St., New York, and Vita-Ray Corp., 176 Middle Ave., Lowell, Mass., a subsidiary of Sterling Products, have been ordered to cease misleading representations in the sale of cosmetics. (4197)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Garfield Tea Co., Inc., 313 Forty-first St., Brooklyn, stipulated to discontinue certain representations in the advertisement and sale of its preparation known as "Garfield Headache Powders." (02983)

Plee-Zing, Inc., 176 West Adams St., Chicago, entered into a stipulation to cease and desist from representing that the product it sells under the name "Plee-Zing Bowl Cleaner" will eliminate odors from toilet bowls. (02984)

Supreme Court Raps FCC "Monopoly" Procedure

The Supreme Court rapped the knuckles of the FCC this week for trying to grab power without even giving the courts a look-in.

The Court held that the Commission's so-called "monopoly" rules should be subjected to judicial review before they were put into effect.

The Commission had contended that the "monopoly" rules amounted to nothing more than a statement of policy, and that broadcasters had no right to contest these rules in court until they were actually hurt by them.

In other words, some network affiliate would have had to put his license in jeopardy before the rules could have been tested.

But the Supreme Court said, no.

"Such regulations have the force of law before their sanctions are invoked as well as after. When as here they are promulgated by order of the Commission and the expected conformity to them causes injury cognizable by a court of equity, they are appropriately the subject of attack (*in the courts*)."

The case now goes back to a three-judge federal court in New York, for trial "on the merits."

Did the FCC have the power to make such rules under the Federal Communications Act of 1934? If so, are those sections of the Act which gave the Commission such powers constitutional?

Those are the questions now to be decided.

Undoubtedly, these issues will go to the Supreme Court before the case is finally decided.

The Court divided 5 to 3 on the case. Chief Justice Stone read the majority opinion, while Mr. Justice Frankfurter expressed the minority view. Mr. Justice Black, whose wife is the sister of Commissioner Durr's wife, took no part in the case.

The text of the opinions are printed on page 300.

Sanders Bill Hearings

Leading off for MBS at the hearings on the Sanders Bill on Wednesday, Alfred J. McCosker, Chairman of the MBS Board, declared that Mutual's primary interest is in having the FCC's network regulations go into effect. "It opposes any legislation that would cause further delay," he said, "and that would deprive the Commission of its power to adopt such regulations, or that would cast any doubt on that power." Three of the proposed amendments, namely, Sections 6 and 7 of the Sanders Bill, and the NAB proposal to amend Section 326 of the Communications Act by incorporating language of the Supreme Court in the Sanders Brothers case, apparently come within this description, he declared.

"The first and most important of these is Section 7," Mr. McCosker stated, "While it is innocent enough in appearance and purports merely to require the Commission to study certain proposals and to report its recommendations to Congress, together with its reasons, it is very cleverly worded and, by implication, actually would take away such powers as the Commission now has over the subject-matter of the network regulations. This is done by clauses 1, 3, and 4." Closely questioned by Representatives Sanders and Hinshaw as to whether by this he implied any impropriety in Congress as the representatives of the people seeking information from the Commission and thereafter declaring policy, Mr. McCosker conceded that Congress should make the decision.

Representative Sanders said he was "intrigued" by Mr. McCosker's statement that he was very much worried "about what happened before the Senate Committee, and seems to be happening again here, is that such proceedings will undermine the Commission and deprive it of the willingness and the courage again to deal constructively with important and controversial issues." In this connection Mr. Sanders remarked, "Is it your

SANDERS BILL HEARINGS

(Continued from page 297)

thought that every time Congress makes an investigation it will undermine the Commission? You take Congress to task, and that is a serious charge."

The witness' objection to Section 6 was that it cut down the Commission's powers over transfers of licenses and deprives it of one of its important legal points in the proceedings now pending in court over the network regulations. "The present law requires the Commission's written consent not only for the transfer of any license but also for the transfer of any *rights* under a license," Mr. McCosker declared, "This has been in the law ever since 1927 and is clearly necessary if the Commission is really to exercise control over transfers and is to determine who shall and who shall not have the right to operate radio stations." Asked by Representative Hinshaw what he meant by "determine who shall and who shall not have the right to operate radio stations," the witness replied that he referred to arrangements whereby the licensee turned the actual operation of a station over to others, thereby circumventing the Commission's control.

A further objection to Section 6, Mr. McCosker said, is that it would deprive the Commission of any power to disapprove a transfer on the ground that the transferee already has enough or too many stations, either in the country as a whole or in any one city.

Objecting to NAB's proposal to insert in Section 326 of the Communications Act,—the section which denies the Commission the power of censorship over radio,—language which would deny the Commission any "control of the business management of the station or control of the policies of the station or the station licensee," Mr. McCosker stated, "The purpose is to deprive the Commission of such power as it has exercised in adopting the network regulations." The language was "lifted" from the Sanders Case, he said, without the context showing what the Supreme Court really meant.

Reverting to the proposals in Section 7 that the Commission should study and report on to Congress, Mr. McCosker stated, "If there are to be any recommendations as to legislation, it seems to me that they should come from the persons and the groups that urge it. They should not hide behind vague proposals for further study and further reports when, as they well know, the principal consequence will be long additional delays and expense." On being questioned by Representative Sanders, the witness stated that by "they" he meant NBC and CBS. Mr. Sanders remarked that Section 7 was his own section, the others being the recommendations of the Federal Communications Bar Association, and that he believed it proper that Congress consider the subject-matter of Section 7. He appeared to resent the accusation that the proposals were "vague."

Fred Weber, MBS General Manager, on Thursday introduced exhibits on the subject of Mutual's competitive position in the industry, and started to discuss the network regulations when he was met with a barrage of questions by numerous members of the committee. Representative McGranery (D-Penna.) got into the record figures showing Mutual's growth in gross billings. He asked the witness if the network regulations didn't work to the advantage of Mutual and to the disadvantage of the other networks, to which Mr. Weber replied that they provide equal opportunity for all networks. Mr. Weber had not completed his statement when the hearings recessed; it is understood he will resume on Monday.

Louis G. Caldwell, MBS general counsel, will testify Friday, following which Paul Spearman, NAI counsel will take the stand. Present indications are that Chairman Fly will appear Tuesday, to be followed by Commissioner Craven.

Sales

STANDARD CONTRACT FORMS APPROVED

As announced at the NAB convention in Cleveland, the new AAAA-NAB standard contract forms for spot radio have been approved after months of negotiations, and copies were placed in the mails last week for all stations. Additional copies are available upon request.

Approval of the forms has climaxed nearly a year of work by the radio and agency committees. Previous attempts to negotiate a standard contract failed to result in complete agreement by both associations, with the result that the NAB issued recommended forms for radio stations in January and March of 1941, while a modified form was generally used by agency members of the AAAA. Those forms have now been superseded by the new contracts, and all agencies and stations are invited to make the change to bring about uniformity in all quarters.

Recognizing that not all advertising agencies are members of the AAAA, and that not all stations belong to the NAB, committees were appointed in 1941 to represent both members and non-members. Serving on the radio committee were Eugene Carr, WGAR, chairman of the Sales Managers Executive Committee, and Robert Dunville, WLW, as NAB members, and Herbert L. Pettey, WHN, representing non-NAB members. On the agency committee were A. K. Spencer of J. Walter Thompson and Leonard Bush of Compton, representing AAAA members, and M. J. Kleinfeld, of Franklin Bruck, representing non-AAAA agencies. Thus it is hoped that the new standard forms will be acceptable to all stations and all agencies.

Besides the form suitable for spot business placed through agencies, an "advertiser" form was also issued to handle local business and national spot business placed direct. The two forms are identical except that the "advertiser" form carries no mention of agency or agency commission.

Mats have been prepared and mailed to stations covering the "standard conditions" on the reverse side of the contracts, for convenience and economy in local printing.

The forms, of course, may be modified by stations in any way desired, although it is hoped they will be adopted as they stand, or with a minimum of changes, so that the industry may be spared the difficulties and annoyances that arise when a multiplicity of contract forms are in use.

In acknowledging the committee's completion of its work, NAB President Neville Miller complimented its members "on this satisfactory solution to a most difficult assignment. Thanks to your hard work and unselfish application over a long period, you have made a substantial contribution to the business of broadcasting and have earned the sincere gratitude of all your industry associates."

NEW DEPARTMENT STORE TABLE

A new "summary table" on department store use of radio has been prepared from reports submitted by stations to "The Broadcast Advertising Record." Copies are available on request.

RETAILERS PLAN BOND DRIVE

Here is a telegram received from Benjamin H. Namm, chairman, retail advisory committee to the U. S. Treasury:

"At a joint meeting of the Treasury's Retail Advisory Committee and Treasury officials it has just been decided to hold an intensive 'Retailers for Victory' campaign during the entire month of July. This will take the place of the one week's campaign usually held in September. G. Ray Schaeffer of the Marshall Field organization of Chicago has been named national chairman of the campaign. The undersigned will serve as honorary chairman. Our slogan will be 'A Million Retailers Unite for War Savings—The Commandos of Main Street.' Our goal will be to double and redouble the present sales of war savings stamps and bonds by retail stores. Our purpose will be to help the U. S. Treasury department attain its huge billion dollar quota for the month of July. Would greatly appreciate your passing this information on to the members of your association. Incidentally we have just received the following reply from General MacArthur in Australia in response to a cable of cooperation sent by me in the name of our eight million retail employers and employees as follows: 'Your message is one of victory. Signed MacArthur.'"

Undoubtedly many retail stores will use some paid promotion in connection with this campaign. Although radio stations are giving freely of their facilities to the Treasury in promoting the sale of war bonds and stamps, they also have been equipped by the Treasury Department with a kit of suggested announcements and programs, suitable for sale to local sponsors including retailers. To get ready for the July retailers' campaign, stations may wish to prepare an additional supply of announcements and programs suitable for sponsorship in connection with this drive.

CONVENTION CRACKS DOWN ON CHISELERS

Because of continued pressure from commercial firms seeking free radio exploitation or per-inquiry deals, the NAB delegates at the Cleveland convention passed the following resolution:

"Maintenance of a sound broadcasting industry, particularly vital to the nation in these times of war, is predicated on the observance of good business practices and high standards of ethics, both on the part of broadcasters and of those who would use broadcasting facilities. In cooperation with our government the broadcasting industry is doing its utmost in the promotion of the war program by generous, unselfish all-out contributions of time and talent.

"However, some organizations and movements outside the government are seeking their commercial advancement or the promotion of special aims through the free use of broadcasting facilities, sometimes even under the guise of participation in the war program. All such efforts are regarded by the National Association of Broadcasters as unwarranted, unsound, and contrary to the best interests of the industry and the nation.

"Similarly, efforts by commercial enterprises to purchase radio facilities on a contingent, guaranteed-return, or per-inquiry basis, again sometimes even under the guise of patriotism, or, more reprehensibly, on the basis that the war emergency should persuade broadcasters to relax their standards of ethics, are declared by this Association to lead to unfair and discriminatory practices, to an undermining of the entire structure of commercial radio, and to the deterioration of an industry vital to its government and to the advancement of the American economic system.

"Such efforts are, therefore, condemned as unethical, as contrary to the best interests of the industry, and if carried to their logical conclusion as contrary also to the best interests of advertising in general and of the clients served by radio.

"It is the will of this Association, therefore, that all such requests should be denied by its members, and discouraged by every other means at their disposal."

This resolution furnishes an ideal answer for stations to give to would-be chiselers. It has been suggested that stations print or mimeograph copies of this resolution, and that unwarranted proposals *be returned to the senders* with a copy of this resolution attached. Such action by many stations, it is believed, will do much to check the growing pressure for free time and P-I deals.

Among those reported to the NAB since the last tabulation are:

George Fisher, Allston, Mass., seeking P-I deals for Photo-Stamps.

Equity Advertising Agency, New York, seeking P-I deals for **American School.**

Mail Photo Service, Inc., Louisville, Ky., seeking P-I deals on its snapshot service.

Comic Book Club, New York, seeking P-I deals for its comic books.

Federal Life & Benefit Assn., Wilmington, Del., while not seeking outright P-I deals for its hospitalization insurance plan, nevertheless invites guaranteed-returns and free plugging by specifying a required per-inquiry cost and asking "Will you cooperate to bring about a reasonable inquiry cost in the event the initial results are not within reason?"

W. T. Otto Stamp Co., Brooklyn, seeks P-I deals for its stamps and collector's supplies.

Universal Photo Service, La Crosse, Wis., wants P-I deals for snapshot finishing.

Hannon Medicines, Inc., Brookhaven, Miss., seeks P-I deals for its medical products, citing a couple of small southeastern stations which have handled the business on that basis.

Joe Bonomo, New York, wants to sell his booklets on "health, beauty, charm, physical development, etc," to stations, either as premiums or a direct-selling item.

The Remnant Shop, Sesser, Ill., wants P-I deals for its "quilt roll."

Free radio time of one sort or another, generally requested *through the conductors of women's programs,* is being sought by **Nestle's Chocolate;** by the **Bureau of Fashion Trends,** June Hamilton Rhodes, director, for the **Jewelry Industry Publicity Board;** by the **Lawrence H. Selz Organization** on behalf of carbonated beverages; by the **Milk Industry Foundation;** by **W. Earl Bothwell** Advertising Agency for **Duff's Gingerbread Mix;** by **Children's Play Mate Magazine** (asking free advertising and a mailing list in return for samples to listeners), and by **The Greeting Card Industry.**

We repeat: in the face of this continued barrage of chisel attempts, the resolution printed above was passed unanimously at Cleveland. Its use by stations when returning unwanted material would be effective, and would also aid the war program by persuading many agencies and firms to save a lot of paper.

WAR SERVICE SUGGESTION

Walter B. Haase, WDRC, Hartford, Conn., makes the following suggestion which the NAB commends:

Here in Hartford, the four stations have had good luck using a system which WDRC suggested in connection with the Hartford County Blood Plasma Bank and the War Bond Pledge Campaign. Instead of using a different address for each agency, we ask listeners to telephone the station. So for Red Cross blood donors, it's "Telephone WDRC right now. We'll do the rest. The number is 7-1188." For recruitment of nurses, our announcements read "For full information, telephone WDRC and leave your name. We'll do the rest. The number is 7-1188!"

We then take the names and telephone them to the proper agency. By using this tactic, we are able to give interested persons a number to call immediately, whether it's 7:00 in the morning or 11:00 at night. Most of these agencies observe regular office hours. It also gives us a nice check on how well our spots and programs are pulling.

"WORKING FOR RADIO"

"Working for Radio" is going like hot cakes. A great many stations are having their call letters imprinted on the booklets and accompanying envelopes. The price to member stations is five cents each, to cover the cost of printing. The FREC SERVICE BULLETIN printed the following review:

"Working for Radio" is the title of a new publication just released by the National Association of Broadcasters and edited by their Director of Labor Relations, Joseph L. Miller. The list of contributors reads like a Who's Who in Radio, for it includes Cecil B. DeMille on the subject of "Acting for Radio," Edward G. Robinson, on "Radio Play Writing," Bing Crosby, on

"Singing for Radio," George A. Mooney on "Writing for Radio," John Benson on "Advertising Agency Work," and a half dozen others equally well qualified to write on such subjects as "Staging a Radio Show," "Radio Announcing," "Musicians in Radio," "Radio Operators and Technicians," and "Selling Radio Advertising."

To the person interested in making a career of radio, this publication should be intensely interesting. While it makes no claim to be all-inclusive, it does cover a variety of radio phases—the ones most frequently asked about.

In his foreword, Neville Miller, President of the NAB, urges readers to be sure to read the article on working for the smaller stations, for it is there, he states, that the average boy or girl looking for a career in radio has his best chance to get started.

WAGE AND HOUR LAW

The Supreme Court held this week that employees of buildings tenanted by firms engaged in interstate commerce were subject to the Wage and Hour Law.

FIRST NAB PRESIDENT WRITES NEW BOOK

If you didn't know it, the first president of the National Association of Broadcasters was Commander E. F. McDonald, Jr., now president of Zenith Radio Corporation, Chicago.

A few years ago he became interested in gliders to such an extent that the products of his pen comprise a large share of the current literature on gliding.

"Youth Must Fly" ($2.50—Harper Bros.) is one of the Commander's recent contributions to gliding.

The recent announcements on gliding, which have appeared in the weekly Army folio, are evidence that the United States of America is going to have gliders. Prior to the evidence of Army use of the glider, the Commander necessarily had to point out that soaring was the ideal connecting link between model-building and flying power, and that it possessed outstanding safety that would appeal to parents and to youth organizations interested in promoting clean safe sport.

Recent Army announcements for radio would indicate that the Army has gone all the way out for the glider. Its conception of the glider is an airplane with remote power.

KTUL BOND SALE

Radio Station KTUL and the First National Bank & Trust Company, Tulsa, have made history with their broadcast from the bank lobby, "The Greatest Sale In History".

Four hundred civic leaders and eight organizations put punch in the broadcast to sell $1,521,913.25 worth of War Bonds in fourteen broadcasts.

Thirty-one thousand five hundred copies of a brochure on the promotion, prepared by the bank, have been ordered by the Treasury for distribution according to John Esau, National Sales & Promotion Manager.

TEN PER CENT PLAN

The Treasury Department has prepared a mimeographed fact sheet on the "Ten Per Cent War Bond Promotion" which begins June 14 and continues through July 5. Buttons and red, white and blue stickers are a part of the tie-up which the Treasury has arranged, according to Charles J. Gilchrist, Chief Radio Section.

SUMMER RADIO COURSES

One or more courses in radio for teachers will be offered during summer sessions this year by 104 out of 435 colleges and universities. This is according to the finding of a survey just completed by the Federal Radio Education Committee in the U. S. Office of Education.

This is an increase of 30% in institutions over a year ago when only 80 colleges and universities were reported as offering summer courses in radio for teachers.

KFAR SCHEDULE

The University of Alaska, through Radio Station KFAR, Fairbanks, has just completed (May 8) an important and enlarged broadcast schedule which began early last Fall.

The data provided by Everett R. Erickson, Director of radio broadcasts, lists a total of 61 programs.

STATE LEGISLATION

LOUISIANA:

H. 657 (MADDEN) MUSIC TAX—Imposes a license tax on printed and recorded music. Referred to Committee on Ways and Means.

FEDERAL LEGISLATION

H. R. 7173 (SACKS, D-Penna.) COPYRIGHTS—To amend the Act entitled "An Act to amend and consolidate the Acts respecting copyright", approved March 4, 1909, as amended. Referred to Committee on Patents.

SUPREME COURT OF THE UNITED STATES

No. 1026—October Term, 1941

Columbia Broadcasting System, Inc., Appellant,
vs.
The United States of America, Federal Communications Commission and Mutual Broadcasting System, Inc.

Appeal from the District Court of the United States for the Southern District of New York.

June 1, 1942

Mr. Chief Justice Stone delivered the opinion of the Court.

The Federal Communications Commission, by its order of May 2, 1941, as amended by its order of October 11, 1941, promulgated regulations which purport to require the Commission to refuse to grant a license to any broadcasting station which enters into certain defined types of contract with any broadcasting network organization. These regulations, it is alleged, affect adversely appellant's contractual relations with broadcasting stations and impair its ability to carry on its business in maintaining and operating its nationwide broadcasting network. The regulations as amended on October 11, 1941, together with a supplemental "minute" promulgated by the Commission on October 31, 1941, are set forth at the end of this opinion. The question for our decision is whether appellant is entitled to secure a judicial review of the order by a suit brought under sec. 402(a) of the Communications Act of 1934, 48 Stat. 1093, 47 U.S.C. sec. 402(a), and the Urgent Deficiencies Act, 38 Stat. 219, 28 U.S.C. sec. 47.

Pursuant to sec. 402(a) appellant brought the present suit against the United States in the Southern District of New York, to enjoin enforcement of the Commission's order as contrary to the public interest and beyond the Commission's statutory authority, and on the further ground, if the order be deemed within that authority, that the statute is an unconstitutional delegation of legislative power by Congress in violation of Article I, sec. 1 of the Constitution, and operates to deprive appellant of property without due process of law in violation of the Fifth Amendment. The case was heard by a court of three judges, which permitted the Commission and the Mutual Broadcasting Company to intervene as defendants. It granted appellees' motion to dismiss the complaint for want of jurisdiction, ——F. Supp.——, and stayed the operation of the Commission's order pending direct appeal to this Court.

In 1938 the Communications Commission authorized an investigation "to determine what special regulations applicable to radio stations engaged in chain or other broadcasting are required in the public interest, convenience, or necessity." Extensive hearings were held by a committee consisting of three members of the Commission, at whose request the national networks, including appellant, intervened. In June, 1940, the committee made a report, on the basis of which briefs were filed and oral argument was presented before the full Commission by the three national networks and other interested parties. In May, 1941, the Commission issued its "Report on Chain Broadcasting" and ordered the adoption of the regulations which, in their amended form, are the subject of the present controversy.

The relevant facts stated in the bill of complaint are as follows: Appellant or its predecessor has been engaged in the business of nationwide network or chain broadcasting since 1927. It has a large amount of physical property used in the business and has built up a valuable goodwill. For its broadcasts it maintains a staff of employees and expends large amounts for musicians and broadcasting performers. It has commitments by long-term contracts aggregating more than $4,000,000 for broadcasting expenditures, including those for the use of land and buildings and for the furnishing of news and broadcasting programs in the next few years. Appellant's total property devoted to its broadcasting business exceeds $18,000,000 in value; its earnings from the network exceeded $3,000,000 in both 1939 and 1940.

Chain broadcasting is the means by which radio programs are made available to all or a large part of the nationwide radio audience. It is defined by the Communications Act, 47 U.S.C. sec. 153(p), as the "simultaneous broadcasting of an identical program by two or more connected stations." The chain broadcaster prepares radio programs, for which it engages performers in advance, and simultaneously broadcasts them over a large number of radio stations to which the programs are transmitted from some central point of origination by wire telephone lines leased by the broadcaster, here the appellant. The programs, which are prepared well in advance of the broadcast and given by persons employed for the purpose by appellant, are of two classes—commercial programs sponsored and paid for by advertisers, and sustaining programs furnished by appellant and not paid for by any advertiser.

Appellant's network comprises 123 stations in 122 cities in the United States. It is so operated as to enable ninety per cent of the radio audience of the United States to listen simultaneously to programs provided by appellant and broadcasted over these stations. Appellant owns and operates seven of the stations and leases an eighth, all licensed by the Commission. With the remaining 115 stations it enters into individual contracts usually for periods of five years, terminable in some instances by appellant on twelve months' notice. By these contracts appellant undertakes to furnish each station with an average of at least sixty hours per week of network sustaining and sponsored programs. The sustaining programs are furnished without charge, the station being free to use them or not as it chooses. Appellant undertakes to furnish the station with all commercial programs which the sponsor requests the station to broadcast and to pay the station a specified hourly rate for the use of its facilities in broadcasting such programs. Appellant agrees not to furnish its programs to other stations in the same city; the affiliated station, with exceptions not now material, agrees not to broadcast the program of any other network. Of critical importance in the present litigation is the stipulation of the affiliated station that it will, upon not less than twenty-eight days' notice from appellant, broadcast the sponsored or commercial program furnished to it by appellant for at least fifty "converted" hours (averaging seventy-nine regular clock hours) per week.

These provisions of appellant's contracts are alleged to be indispensable to the maintenance and efficient operation of its network and to the existence of a strong and efficient network broadcasting system, and necessary to enable appellant to compete with other advertising media. On May 2, 1941, the Commission issued its order which, as amended by its order of October 11, 1941, promulgated the "Chain Broadcasting Regulations" of which appellant complains, and which the Commission characterized in its Report as "the expression of the general policy we will follow in exercising our licensing power."[1] The regulations provide that no license shall be granted to a broadcast station having contracts with a network organization, containing any of several provisions which are characteristic of appellant's contracts with its affiliates. These include provisions by which the station is prevented from broadcasting the programs of any other network organization (3.101); or which prevent another station serving substantially the same area from broadcasting the network programs not taken by the station applying for license, or prevent another station serving a substantially different area from broadcasting any program of the network organization (3.102); or by which the station contracts for affiliation with the network for a period longer than two years (3.103); or by which the station "options for network programs any time subject to call on less than 56 days' notice or more time than a total of three hours" within each of four specified segments of the broadcast day, the regulation declaring "such options may not be exclusive as against other network organizations and may not prevent or hinder the station from optioning or selling any or all of the time covered by the option, or other time, to other network organizations" (3.104); or which prevent the station (a) from rejecting network programs which the station reasonably believes to be unsatisfactory or unsuitable or (b) from substituting for the network program a program of outstanding local or national importance (3.105).

After making its order of May 2, 1941, the Commission deferred its effective date until further order. By its order of October 11, 1941, the Commission fixed the effective date as November 15, 1941, and directed "that the effective date of Regulation 3.106 with respect to any station may be extended from time to time in order to permit the orderly disposition of properties," and "that the effective date of Regulation 3.107 shall be suspended indefinitely and any further order of the Commission placing said Regulation 3.107 in effect shall provide for not less than six months' notice and for further extension of the effective date from time to time in order to permit the orderly disposition of properties."

The bill of complaint also alleges that the purpose and effect of the regulations are to prohibit station licensees from having agreements of the kind which appellant has with its affiliates; that prior to the order of May 2, 1941, it was the practice of the Commission to renew the licenses of stations annually and that the licensed stations have had a reasonable expectancy of the annual renewal of their licenses; that 115 licensed stations have such contracts with appellant expiring at various times between the original effective date of the regulations and December 31, 1947. It is alleged that when their current licenses expire, at the latest, and perhaps earlier through the revocation of existing licenses, such stations face the loss of their licenses if they perform or continue in force or renew any existing contracts containing the described provisions.

The bill alleges that since the stations fear the loss of their licenses, as a result of the regulations, they will not negotiate for or renew affiliation contracts containing such provisions. And because they fear the loss of their licenses the stations have threatened to cancel and repudiate their affiliation contracts, and many have notified appellant that they will not be bound by their contracts after the regulations become effective. As a consequence appellant's ability to conduct its business and maintain its public broadcasting service is seriously impaired and the regulations will make the operation of appellant's business more costly, reduce its earnings and render its property and business less valuable.

The bill of complaint was filed October 30, 1941. The following day the Commission promulgated a supplemental "minute" setting up a procedure by which the validity of the regulations might be tested upon application for a license by an individual licensee. The minute declared that if a station wished to challenge the regulations the Commission would grant a temporary extension of its license until there had been a final court determination of the issues. In the event of such litigation, and if the validity of the regulations were sustained, "the Commission will nevertheless grant a regular license to the licensee, otherwise entitled thereto, who has unsuccessfully litigated that issue, if the licensee thereupon conforms to the decision."

---

[1] The Commission in its Report says, p. 85:

"We believe that the announcement of the principles we intend to apply in exercising our licensing power will expedite business and further the ends of justice.

"Announcements of policy may take the form of regulations or of general public statements. In either case, the applicant's right to a hearing on the question whether he does in fact propose to operate in the public interest is fully preserved. The regulations we are adopting are nothing more than the expression of the general policy we will follow in exercising our licensing power. The formulation of a regulation in general terms is an important aid to consistency and predictability and does not prejudice any rights of the applicant. Good administrative practice would seem to demand that such a statement of policy or rules and regulations be promulgated wherever sufficient information is available upon which they may be based."

An affidavit subsequently submitted by appellant in support of its motion for a temporary injunction states that since the Commission's minute of October 31st, appellant has continued to receive indications that its affiliates will cancel and repudiate their contracts and refuse to renew them, and has received no indication that the minute has or will have the effect of inducing stations to assume the burden of testing the validity of the regulations. Attached to the affidavit are letters from five affiliates, written after October 31st, indicating their intention not to be bound by the contracts. The affidavit also states appellant's belief that it would have received more such letters had it not been for its circulation of information concerning the pendency of this suit.

Accepting the allegations of the complaint as true, as for present purposes we must; it is evident that application by the Commission of its regulations in accordance with their terms would disrupt appellant's broadcasting system and seriously disorganize its business. As the bill alleges, stations licenses have been renewable by the Commission annually,[1] whereas appellant's contracts are for five year periods and many of them will survive the expiration of the existing licenses to the affiliated stations. Under Regulations 3.101, 3.102, 3.103 and 3.104, each affiliate must repudiate his contract or be denied the renewal of his license. In either case this would deprive appellant of the station's participation in its network, for which its contracts call.

Regulation 3.104 not only requires all options by appellant to be exercised on 56 days' rather than 28 days' notice as at present, but provides that no option time is exclusive of other networks, and thus allows to appellant no option time within which it can command the use of affiliated stations for any program for broadcasting on a national scale. These sections together thus operate to break down the network enterprise in which appellant and its affiliates are by their contracts cooperating, and to substitute a system in which every station is available to every network on a "first come first served basis".

The Commission concedes by its brief that as provided by sec. 312(a) "Any station license may be revoked . . . because of conditions revealed by such statements of fact as may be required [of a licensee] from time to time which would warrant the Commission in refusing to grant a license on an original application". Consequently the regulations by their terms, read in conjunction with sec. 312(a), expose licensees, who renew their affiliation contracts, to revocation proceedings by the Commission whenever upon a statement which the Commission may require it appears that the licensee has entered into an affiliation contract which the regulations proscribe.

A proceeding to set aside an order of the Commission under sec. 402(a) and the Urgent Deficiencies Act is a plenary suit in equity. Hence the questions raised by the motion to dismiss are whether the Commission's order is an "order", review of which is authorized by sec. 402(a) of the Act, and if so whether the bill states a cause of action in equity. The suit cannot be maintained unless both questions are answered in the affirmative.

Section 402(a) makes applicable the provisions of the Urgent Deficiencies Act to "suits to enforce, enjoin, set aside, annul, or suspend any order of the Commission" except orders "granting or refusing an application for a construction permit for a radio station, or for a radio station license, or for renewal of an existing radio station license, or for modification of an existing radio station license, or suspending a radio operator's license". Review of the orders excepted from sec. 402(a) is by appeal to the Court of Appeals of the District of Columbia under the provisions of sec. 402(b). See *Scripps-Howard Radio, Inc.* v. *Federal Communications Comm'n,* 315 U. S. —. Since the Commission's order neither grants, denies nor modifies any license, any review in advance or independently of an application for a station license must be under sec. 402(a), and then only if the Commission's order promulgating the regulations is an "order" within the meaning of this section. The particular label placed upon it by the Commission is not necessarily conclusive, for it is the substance of what the Commission has purported to do and has done which is decisive. *Powell* v. *United States,* 300 U. S. 276, 284-85; *A. F. of L.* v. *Labor Board,* 308 U. S. 401, 408.

The Commission's investigation of the contractual relation between the networks and the stations, which resulted in the order now under attack, was for the stated purpose of prescribing regulations of such relationships. The order authorizing the investigation recited that the proceeding was taken under sec. 303(i) of the Act, which gives the Commission "authority to make special regulations applicable to radio stations engaged in chain broadcasting". Since the Commission is not in terms given authority to regulate contractual relations between the stations and the networks, regulation of them could be accomplished only by regulating licensed radio stations which participate in chain broadcasting. It was by regulations in terms applicable to such stations that the Commission sought to control their contractual relationships with the networks.

The order is thus in its genesis and on its face, and in its practical operation, an order promulgating regulations which operate to control such contractual relationships, and it was adopted by the Commission in the avowed exercise of its rule-making power. Such regulations which affect or determine rights generally, even though not directed to any particular person or corporation, when lawfully promulgated by the Interstate Commerce Commission, have the force of law and are orders reviewable under the Urgent Deficiencies Act. *Assigned Car Cases,* 274 U. S. 564; *United States* v. *B. & O. R. Co.,* 293 U. S. 454. And regulations of like character, by which the Communications Commission has prescribed generally the records and accounts to be kept by telephone companies subject to its jurisdiction, are similarly reviewable under sec. 402(a). *A. T. & T. Co.* v. *United States,* 299 U. S. 232.

The regulations here prescribe rules which govern the contractual relationships between the stations and the networks. If the applicant for a license has entered into an affiliation contract, the regulations require the Commission to reject his application. If a licensee renews his contract, the regulations, with the sanction of sec. 312(a), authorize the Commission to cancel his license. In a proceeding for revocation or cancellation of a license, the decisive question is whether the station, by entering into a contract, has forfeited its right to a license as the regulations prescribe. It is the signing of the contract which, by virtue of the regulations alone, has legal consequences to the stations and to appellant. The regulations are not any the less reviewable because their promulgation did not operate of their own force to deny or cancel a license. It is enough that failure to comply with them penalizes licensees, and appellant, with whom they contract. If an administrative order has that effect it is reviewable and it does not cease to be so merely because it is not certain whether the Commission will enforce the penalty incurred under its regulations for non-compliance. *Assigned Car Cases, supra; A. T. & T. Co.* v. *United States, supra.*

The regulations are rules which in proceedings before the Commission require it to reject and authorize it to cancel licenses on the grounds specified in the regulations without more. If the regulations are valid they alter the status of appellant's contracts and thus determine their validity in advance of such proceedings. By striking them down by a determination proclaimed in advance that licenses shall be cancelled or refused because of a previous failure to comply with the regulations, they impose a penalty and sanction for non-compliance far more drastic than the fines customarily inflicted for breach of reviewable administrative orders.

---

[1] On October 11, 1941, the Commission amended Regulation 3.34 to make the normal license period two years.

Most rules of conduct having the force of law are not self-executing but require judicial or administrative action to impose their sanctions with respect to particular individuals. Unlike an administrative order or a court judgment adjudicating the rights of individuals, which is binding only on the parties to the particular proceeding, a valid exercise of the rule-making power is addressed to and sets a standard of conduct for all to whom its terms apply. It operates as such in advance of the imposition of sanctions upon any particular individual. It is common experience that men conform their conduct to regulations by governmental authority so as to avoid the unpleasant legal consequences which failure to conform entails. And in this case it is alleged without contradiction that numerous affiliated stations have conformed to the regulations to avoid loss of their licenses with consequent injury to appellant.

Such regulations have the force of law before their sanctions are invoked as well as after. When as here they are promulgated by order of the Commission and the expected conformity to them causes injury cognizable by a court of equity, they are appropriately the subject of attack under the provisions of sec. 402(a) and the Urgent Deficiencies Act. *A. T. & T. Co.* v. *United States, supra; Rochester Tel. Corp.* v. *United States,* 307 U. S. 125; *Interstate Commerce Commission* v. *Goodrich Transit Co.,* 224 U. S. 194; *Kansas City So. Ry.* v. *United States,* 231 U. S. 423; *Assigned Car Cases, supra; Chicago R. I. & P. Ry. Co.* v. *United States,* 284 U. S. 80; *United States* v. *B. & O. R. Co., supra.*

It is no answer to say that the regulations are addressed only to the Commission and merely prohibit it from granting—and authorize it to cancel—licenses in the case of all stations entering into such contracts, and that accordingly all stations are left free to enter into contracts or not as they choose. They are free only in the sense that all those who do not choose to conform to regulations which may be determined to be lawful are free by their own choice to accept the legal consequences of their acts. Failure to comply with the regulations entails such consequences to the station owner and to appellant. These are the loss of the affiliated stations' licenses if they adhere to their contracts, and disruption of appellant's network through the declared unlawfulness of the contracts, if the regulations are valid.

The purposes sought to be accomplished by sec. 402(a) and the Urgent Deficiencies Act would be defeated if a suitor were unable to resort to them to avoid reasonably anticipated irreparable injury resulting from such legal consequences of the Commission's order, merely because the Commission as yet has neither refused to renew a license, as the regulations require, nor cancelled a license, as the regulations permit. Such an argument addressed to the form rather than the substance of the order was rejected in *Powell* v. *United States, supra;* cf. *A. F. of L.* v. *Labor Board, supra,* 408. The *Powell* case likewise repudiates the suggestion that merely because the order is not in terms addressed to those whose rights are affected, they cannot seek its review. See also *Western Pacific* v. *South. Pac. Co.,* 284 U. S. 47; *Claiborne-Annapolis Ferry Co.* v. *United States,* 285 U. S. 382.

The order here is not one, as the Government argues and as the court below seemed to think, where the complainant's rights are affected only on the contingency of future administrative action as in *United States* v. *Los Angeles R.R.,* 273 U.S. 299; cf. *Rochester Telephone Corp.* v. *United States, supra,* 130. As the Court declared in the *Los Angeles* case, 309, 310, reviewable orders are "an exercise either of the quasi-judicial function of determining controversies or of the delegated function of rate making and rule making." And the Court pointed out that the "so-called order" in that case did not "determine any right or obligation" or change the plaintiff's "existing or future status or condition," and that it was "merely the formal record of conclusions reached after a study of data collected in the course of extensive research conducted by the Commission" and "is the exercise solely of the function of investigation."

Here the Commission exercised its rule-making power by adopting regulations whose operation is not made subject to future administrative determinations, save only as the Commission may be called on to decide in any given case whether a station's contract with a network is within the regulations. The regulations' applicability to all who are within their terms does not depend upon future administrative action. Instead they operate to control such action and to determine in advance the rights of others affected by it. The Commission gave its own recognition that such is their operation by its successive postponements of the effective date of the order for a period now expired, and by its suspension of Regulations 3.106 and 3.107, in order to enable the networks to dispose of their properties.

Of course the Commission was at liberty to follow a wholly different procedure. Instead of proclaiming general regulations applicable to all licenses, in advance of any specific contest over a license, it might have awaited such a contest to declare that the policy which these regulations embody represents its concept of the public interest. As a matter of sound administrative practice, both the rule-making proceeding and the specific license proceeding undoubtedly have much to commend them. But they are by no means the same, nor do they necessarily give rise to the same kind of judicial review. Having adopted this order under its rule-making power, the Commission cannot insist that the appellant be relegated to that judicial review which would be exclusive if the rule-making power had never been exercised and consequently had never subjected appellant to the threatened irreparable injury.

The court below assumed that if appellant had any equitable cause of action, it must be prosecuted in an ordinary suit and not under the provisions of the Urgent Deficiencies Act. But we think this mistakes both the nature of the regulations and the purpose of suits under that Act, as incorporated in sec. 402(a). Such a cause of action obviously can arise only because of the operation of the regulations. The regulations are the effective implement by which the injury complained of is wrought, and hence must be the object of the attack. It is because they are an exercise of the rule-making power, and because they presently determine rights on the basis of which the Commission is required to withhold licenses and authorized to cancel them, that there is an order within the meaning of sec. 402(a) and the Urgent Deficiencies Act.

The Commission argues that since its Report characterized the regulations as announcements of policy, the order promulgating them is no more subject to review than a press release similarly announcing its policy. Undoubtedly regulations adopted in the exercise of the administrative rule-making power, like laws enacted by legislatures, embody announcements of policy. But they may be something more. When, as here, the regulations are avowedly adopted in the exercise of that power, couched in terms of command and accompanied by an announcement of the Commission that the policy is one "which we will follow in exercising our licensing power," they must be taken by those entitled to rely upon them as what they purport to be—an exercise of the delegated legislative power—which, until amended, are controlling alike upon the Commission and all others whose rights may be affected by the Commission's execution of them. The Commission's contention that the regulations are no more reviewable than a press release is hardly reconcilable with its own recognition that the regulations afford legal basis for cancellation of the license of a station if it renews its contract with appellant.

Appellant's standing to maintain the present suit in equity is unaffected by the fact that the regulations are not directed to appellant and do not in terms compel action by it or impose penalties upon it because of its action or failure to act. It is enough that, by setting the controlling standards for the Commission's action, the regulations purport to operate to alter and effect adversely appellant's contractual rights and business relations with station owners whose applications for licenses the regulations will cause to be rejected and whose licenses the regulations may cause to be revoked. *Chicago Junction Case,* 264 U.S. 258, 266-68; *Western Pacific* v. *South. Pac. Co., supra; Claiborne-Annapolis Ferry Co.* v. *United States, supra;* compare, in the case of an attack upon the validity of a statute, *Truax* v. *Raich,* 239 U.S. 33, 38-39; *Pierce* v. *Society of Sisters,* 268 U.S. 510.

What we have said of the allegations of the complaint, and of the effect of the Commission's order if those allegations are sustained upon the trial, is enough to establish the threat of irreparable injury to appellant's business and to show also that the injury can not be avoided, as the Commission suggests, by appellant's intervention in proceedings upon application for renewal of licenses by its affiliates or in proceedings to cancel their licenses, if and when such proceedings are instituted. Appellant has sufficiently alleged that the affiliates are cancelling or threatening to cancel their contracts in order to conform to the regulations. It is to avoid the irreparable injury which would result from such wholesale cancellations of its contracts, induced by the force of the regulations, that appellant makes its attack on them now rather than in later proceedings on the individual applications for licenses in those cases, if any, in which the stations are willing to seek licenses without complying with the prerequisites laid down by the regulations.

The issues in such a proceeding are not necessarily the same as the issues here. Intervention in it would afford appellant no assurance either of an adjudication of appellant's contentions or that the action of other stations would be governed by it. Moreover, if the Commission's order is as we hold a reviewable order, appellant is free to seek review under sec. 402(a). It is not thereby, as the court below seemed to think, improperly substituting a different procedure and court for that which Congress has prescribed for the trial of like issues so far as they may be raised on review of an order denying a license. Such issues may likewise be involved in a proceeding, upon the Commission's own motion, for modification or cancellation of a license, which concededly is reviewable under sec. 402(a). See *Scripps-Howard Radio, Inc.* v. *Federal Communications Commission, supra.* But review of the order by a licensee in such a proceeding affords no adequate remedy. If ever instituted, which is uncertain, it would come too late to save appellant from the injury wrought by the outlawry of its contracts.

Nor does the Commission's minute, filed after the present suit was brought, afford an adequate basis for requiring appellant to seek relief by intervention in a proceeding on application for a license reviewable under sec. 402(b). In that event the minute would not operate to broaden the issues involved in the renewal application. Nor would it afford a basis for restraining enforcement of the regulations as to other affiliated stations, pending adjudication of the validity of the regulations. Without full exploration of the subject, such as can be had only at the trial, we cannot say that the minute will afford a sufficient inducement to persuade the affiliated stations to cease cancellations and assume the initiative in litigating the validity of the regulations and of the contracts which they undertake to condemn. The affidavit filed in the court below on the application for a stay is to the contrary. And in any case we are of the opinion that there are no equitable principles by which the right of appellant, upon the showing made by its complaint and affidavit, to test the order under sec. 402(a) can justly be suspended to await action which the station owners may or may not take in assuming the burden of challenging the regulations.

We need not stop to discuss here the great variety of administrative rulings which, unlike this one, are not reviewable—either because they do not adjudicate rights or declare them legislatively, or because there are adequate administrative remedies which must be pursued before resorting to judicial remedies, or because there is no occasion to resort to equitable remedies. But we should not for that reason fail to discriminate between them and this case in which, because of its peculiar circumstances, all the elements prerequisite to judicial review are present. The ultimate test of reviewability is not to be found in an overrefined technique, but in the need of the review to protect from the irreparable injury threatened in the exceptional case by administrative rulings which attach legal consequences to action taken in advance of other hearings and adjudications that may follow, the results of which the regulations purport to control.

We conclude that the Commission's promulgation of the regulations is an order reviewable under sec. 402(a) of the Act, and that the bill of complaint states a cause of action in equity. The stay now in effect will be continued, on terms to be settled by the court below.

Reversed.

Mr. Justice Black took no part in the consideration or decision of this case.

SUPREME COURT OF THE UNITED STATES

No. 1026—October Term, 1941

Columbia Broadcasting System, Inc., Appellant,
vs.
The United States of America, Federal Communications Commission and Mutual Broadcasting System, Inc.

Appeal from the District Court of the United States for the Southern District of New York.

June 1, 1942

Mr. Justice Frankfurter dissenting.

The criteria governing judicial review of "orders" under the Urgent Deficiencies Act were defined by a unanimous Court in *United States* v. *Los Angeles R. R.,* 273 U. S. 299, 309-10: "The so-called order here complained of is one which does not command the carrier to do, or to refrain from doing, any thing; which does not grant or withhold any authority, privilege or license; which does not extend or abridge any power or facility; which does not subject the carrier to any liability, civil or criminal; which does not change the carrier's existing or future status or condition; which does not determine any right or obligation." If "broadcasting company" were substituted for "carrier", this analysis of the legal consequences of the action of the Interstate Commerce Commission in the *Los Angeles* case would fit perfectly the legal consequences of the action of the Federal Communications Commission in making public the challenged regulations.

The fact that an action of an administrative agency occasions even irreparable loss does not in itself afford sufficient grounds for judicial review. Even if the Commission committed a wrong, the question of judicial reviewability still remains that put in the *Los Angeles* case, 273 U. S. at 313, to wit, is it "a wrong for which Congress provides a remedy under the Urgent Deficiencies Act" of October 22, 1913, 38 Stat. 208, 219, as incorporated in §402 (a) of the Communications Act of 1934?

For Congress has not authorized resort to the federal courts merely because someone feels aggrieved, however deeply, by an action of the Federal Communications Commission. A District Court of the United States can take a case only when Congress has authorized that type of case to be taken. Congress did not leave opportunity for reviewing damaging action by the Federal Communications Commission to the general equity powers of the district courts. It circumscribed the power of the courts in relation to the Commission in the most detailed way. Its incorporation by reference, in the Communications Act of 1934, of the scope of review allowed in reviewing an "order" of the Interstate Commerce Commission gave all the precise, definite, and technical boundaries which the concept of a reviewable "order" had acquired through the decisions of this Court prior to the enactment of the Communications Act. The precise requirements of an "order" of the Commission for purposes of judicial review are therefore as inflexible as though they were written into the Act itself.

Our problem, then, is this: Does the issuance of the chain broadcasting regulations constitute an "order" reviewable in a proceeding brought under § 402(a) of the Communications Act, in the light of the settled rules for determining what such an "order" is when a determination of the Interstate Commerce Commission is made the basis of judicial review. It is therefore necessary to put out of mind what this case is not. It is not the invocation of equity jurisdiction in order to avoid threatened irreparable harm resulting from the criminal enforcement of an unconstitutional statute, as in *Pierce* v. *Society of Sisters,* 268 U. S. 510. Nor do we have here a resort to equity because it is essential for the protection of asserted rights that criminal prosecutions unauthorized by law be restrained, as in *Shields* v. *Utah Idaho R. Co.,* 305 U. S. 177, 183.

In promulgating these regulations the Communications Commission merely announced its conception of one aspect of the public interest, namely, the relationship of certain provisions in network-affiliation contracts to the obligation of a station licensee to render the most effective service to the listening public. The regulations themselves determine no rights. They alter the status of neither the networks nor licensees. As such they require nobody—neither the networks, the licensees, nor the Commission—to do anything. They are merely an announcement to the public of what the Commission intends to do in passing upon future applications for station licenses. No action of the stations or the networks can violate the regulations, for there is nothing the regulations require them to do or refrain from doing.

Announcements of general policies intended to be followed by administrative agencies customarily take any one of various forms. Sometimes they are noted in the agency's annual report to Congress, sometimes in a public announcement or press release, and sometimes, as was the case here, they are published as "rules" or "regulations". See Final Report of the Attorney General's Committee on Administrative Procedure (1941), pp. 26-27. But whatever form such announcements may take, their nature and effect is the same. The reason why the Commission formulated its chain broadcasting policy in the form of a "regulation" is given in its report: "We believe that the announcement of the principles we intend to apply in exercising our licensing power will expedite business and further the ends of justice. . . . Good administrative practice would seem to demand that such a statement of policy or rules and regulations be promulgated wherever sufficient information is available upon which they may be based." Report on Chain Broadcasting, Federal Communications Commission, Order No. 37, Docket No. 5060, p. 85.

With respect to its jurisdiction over matters relating to radio broadcasting, the Communications Commission is essentially a licensing agency. Its regulatory power over the industry is derived, for the most part, from its authority to grant and withhold station licenses. Under § 309 of the Communications Act of 1934 the Commission is required to examine each application for a station license and to determine in each case whether a grant would serve public interest, convenience, or necessity. As was noted in *Federal Communications Commission* v. *Pottsville Broadcasting Co.*, 309 U. S. 134, 138, the Act "expresses a desire on the part of Congress to maintain, through appropriate administrative control, a grip on the dynamic aspects of radio transmission." To that end Congress established an administrative procedure under which the Commission must make a specific determination in each case whether the public interest would be served by granting the particular application before it. No announcement of general licensing policy can relieve the Commission of its statutory obligation to examine each application for a license and determine whether a grant or denial is required by the public interest.

The Commission recognized this fact in issuing these regulations. It explicitly stated that a determination of the requirements of the public interest will, in spite of the regulations, still have to be made in passing upon particular applications: "Announcements of policy may take the form of regulations or of general public statements. In either case, the applicant's right to a hearing on the question whether he does in fact propose to operate in the public interest is fully preserved. The regulations we are adopting are nothing more than the expression of the general policy we will follow in exercising our licensing power. The formulation of a regulation in general terms is an important aid to consistency and predictability and does not prejudice any rights of the applicant." Report on Chain Broadcasting, *supra*, p. 85.

Subsequent to the promulgation of the regulations, the Commission found that substantial modifications were necessary. In its supplemental report on these amendments the Commission gave further evidence of the flexible nature of the regulations: "The Commission stands ready at all times to amend and modify its regulations upon the petition of any network, national or regional, or any station or group of stations if it can be shown that those regulations prevent profitable network operations, or unduly disturb any aspect of broadcasting, or that because of special or changed circumstances the chain broadcasting regulations should not be applicable to any particular situation." Moreover, in its Minute of October 31, 1941, designed primarily to protect the interests of station licensees who contest the validity of the regulations, the Commission again made it abundantly clear that the regulations were not final: "If a station wishes to contest the validity of the Chain Broadcasting Regulations . . . , or the reasonableness of their application to the particular station, its license will be set for hearing."

The regulations do not, therefore, commit the Commission to any definitive course of action in passing upon applications for licenses. Consistently with the regulations (and, parenthetically, consistently with the authority of the Commission to depart from general regulations where such departure is in the public interest, see *Radio Commission* v. *Nelson Bros. Co.*, 289 U. S. 266, 285), the Commission is free to dilute them with amendments and exceptions. The construction of the regulations and their application to particular situations is still in the hands of the Commission. Administrative adjudication is still open. Before its completion it is not ripe for judicial review.

The characteristics of the administrative determinations in all the cases on which the Court's opinion relies were wholly different. In each one the force of the law either through criminal prosecution or injunction or fine or some other judicial remedy could immediately be brought to bear to enforce the command of the administrative agency. In none of the cases was an administrative action held reviewable which in itself entailed no immediate legal consequences.

Thus, in the *Assigned Car Cases*, 274 U. S. 564, suit was brought under the Urgent Deficiencies Act to annul an order of the Interstate Commerce Commission prescribing for all railroads within its jurisdiction a rule governing distribution of cars for the transportation of bituminous coal. Under § 402 of the Transportation Act of 1920, 41 Stat. 456, 476, 49 U. S. C. § 1 (12) (14), the carriers were required "to make just and reasonable distribution of cars," and the Commission was authorized to "establish reasonable rules, regulations, and practices with respect to car service by carriers by railroad." Failure of a carrier to comply with such regulations issued by the Commission was declared unlawful, subjecting the carrier to a fine of $100 for each offense. Since the order of the Commission commanded carriers to take specified actions, and since the failure to comply with the order would bring immediate legal sanctions, the order was held reviewable.

Similarly, in *United States* v. *B. & O. R. Co.*, 293 U. S. 454, the Interstate Commerce Commission required railroads subject to its jurisdiction to equip locomotives with a suitable type of power-operated reverse gear. The Boiler Inspection Act, 36 Stat. 913, 916, expressly provided that violation by a carrier of any rule or regulation issued by the Commission under the Act was punishable by a fine recoverable in a civil action. A suit under the Urgent Deficiencies Act to set aside the Commission's order was therefore entertained.

A. T. & T. Co. v. *United States*, 299 U. S. 232, was a suit under § 402(a) of the Communications Act of 1934, the same provision upon which jurisdiction of the present litigation is based, to set aside an order of the Federal Communications Commission prescribing a uniform system of accounts for telephone companies within the Act. Section 220(a) authorized the Commission to prescribe such forms of accounts, and § 220(d) made the failure or refusal of a company to keep accounts in the manner prescribed by the Commission unlawful, punishable by a $500 forfeiture for each day of the continuance of the offense. Because of the legal sanctions immediately attaching upon its violation, the order was held reviewable.

In *Interstate Commerce Commission* v. *Goodrich Transit Co.*, 224 U. S. 194, the Commission, under the authority vested in it by § 20 of the Interstate Commerce Act, issued orders prescribing forms of accounts, records, and memoranda and calling for annual reports of carriers by water. Section 20(7) made it unlawful for such carriers to keep any accounts other than those prescribed by the Commission. A suit to set aside the orders was therefore entertained. Similarly, in *Kansas City So. Ry.* v. *United States*, 231 U. S. 423, suit was brought to annul regulations of the Interstate Commerce Commission prescribing a uniform bookkeeping and accounting system for interstate railway carriers. Since carriers who failed to keep accounts as ordered by the regulations were subject to penalties under § 20(7) of the Act, jurisdiction was taken. And in *Chicago, R. I. & P. Ry. Co.* v. *United States,* 284 U. S. 80, the Interstate Commerce Commission prescribed car-hire settlement rules governing use by common carriers of each other's cars. Violation of such rules by carriers was declared unlawful and subject to fines. Consequently, a suit to set aside the rules was entertained.

Of course, the mere fact that an administrative order determines a status does not mean that it is not reviewable. If an administrative determination of status has the effect of subjecting a person to legal obligations, whether embodied in statute or previously formulated administrative commands, or otherwise affecting legal rights, such a determination possesses the elements of a reviewable order. Thus, in *Rochester Tel. Corp.* v. *United States,* 307 U. S. 125, the Federal Communications Commission had issued orders requiring all telephone carriers subject to the Communications Act of 1934 to file schedules of their charges, copies of contracts with other carriers, etc. Section 203(e) of the Act provides that a carrier which fails or refuses to comply with such rules of the Commission shall forfeit $500 for each offense, and $25 for each day of its continuance. After investigation and hearing, the Commission determined that the Rochester Telephone Corporation was a telephone carrier subject to the Act and therefore subject to the previously promulgated general orders directed to carriers within the Commission's jurisdiction. "The order of the Communications Commission in this case was therefore reviewable. It was not a mere abstract declaration of status of the Rochester under the Communications Act, nor was it a stage in an incomplete process of administrative adjudication. The contested order determining the status of the Rochester necessarily and immediately carried direction of obedience to previously formulated mandatory orders addressed generally to all carriers amenable to the Commission's authority. Into this class of carriers the order under dispute covered the Rochester, and by that fact, in conjunction with the other orders, made determination of the status of the Rochester a reviewable order of the Commission." *Rochester Tel. Corp.* v. *United States,* 307 U. S. at 143-44. Compare *A. F. of L.* v. *Labor Board,* 308 U. S. 401, 408. Unlike the action taken by the Federal Communications Commission in the *Rochester* case, its action here carried no directions of obedience of any kind to anyone.

It is said that the regulations derive legal effect through § 312(a) giving the Commission authority to revoke licenses, and that "by virtue of the regulations alone", the networks and their affiliates are now subjected to legal detriment. But this is merely another way of phrasing the main contention that the regulations at once and without further action by the Commission release legal sanctions. But the regulations have no such effect. To be sure, the Commission can revoke a station license "because of conditions revealed by such statements of fact as may be required from time to time which would warrant the Commission in refusing to grant a license on an original application". But the Commission may never require a licensee to file a statement of fact under § 312(a); its provisions may therefore never come into operation. In any event, the regulations as such do not subject licensees to any sanctions. A license can be revoked under § 312(a) because of the licensee's failure to operate its station in the public interest, as required by the statute. The regulations adopted by the Commission cannot operate to revoke any licenses. It is only after a proceeding has been started (in which the licensee is entitled to a hearing during which the revocation order is suspended) and adversely concluded against a party that legal sanctions come into play—the Commission can bring proceedings to enforce its order of revocation and, correspondingly, the licensee can bring suit under § 402(a) challenging the validity of the Commission's termination of the license.

Section 502 of the Communications Act provides that the violation of "any rule, regulation, restriction, or condition made or imposed by the Commission under authority of this Act" shall be a criminal offense. Would the renewal by a licensee of its network-affiliation contract subject it to the criminal penalties imposed by § 502? Obviously not, for the regulations do not forbid a licensee from taking that or any other action. And, for the same reason, a license could not be revoked under the provision of § 312(a) which authorizes revocation "for violation of or failure to observe . . . any regulation of the Commission authorized by this Act. . . ." If the Commission had issued regulations which ordered licensees to do or refrain from doing something, the problem would be entirely different. Violation by a licensee of such a regulation would be grounds for revocation of its license, under § 312(a), and for the imposition of criminal penalties, under § 502. And, the other requisites being present, such a regulation could be reviewed as a final administrative determination.

This leaves only the suggestion that since the action taken by the Commission, although not the completion of its adjudicatory process, nevertheless drastically affects substantial business interests, it is proper for the courts to intercede at this stage. Even if this argument were to be considered as if it had never before been made to and rejected by this Court, its infirmities are obvious. As a practical matter, the impact upon the business operations of the networks and their affiliated stations would probably be as disturbing as if the policies formulated in the regulation had been expressed through a press release, or if only the report, which is not only the foundation of the regulations but also embodies them, had been published without the regulations which are only the summary of the report, or if Congress itself had incorporated these regulations into the text of the Communications Act. It will hardly be argued that any of these steps could be the subject of judicial review before the Commission acted upon particular applications. But assume that the greater formality given to the announcement of the Commission's statement of policy through the regulations intensified the practical business consequences. Congress has not conferred upon the district courts jurisdiction over "practical business consequences". They can review action of administrative agencies only when there is an "order", and when Congress in § 402(a) made only an "order" of the Communications Commission reviewable, it incorporated the settled doctrine established by an unbroken series of decisions in this Court that the courts could review only a final determination by an agency whereby its process has been concluded.

This is not the first time that the federal courts have been urged to sit in judgment upon "practical business consequences" where the action to be reviewed did not represent the final stage of administrative adjudication. The arguments made in this case have been made in the past but heretofore have always been rejected by this Court. The classic formulation and application of the doctrine of finality as to orders under the Urgent Deficiencies Act was contained in *United States* v. *Los Angeles R. R.,* 273 U. S. 299. In view of the thoroughness of the argument at the bar, and the weightiness of the opinion, that case has ever since been regarded as furnishing the guideposts in this field of law. It should govern here.

Suit was brought there to annul and enjoin an order of the Interstate Commerce Commission determining the final valuation for rate-making purposes of the Los Angeles & Salt Lake Railroad Company which operated a thousand miles of railroad lines. The valuation fixed by the Commission was $45,200,000; the carrier claimed that if the Commission had employed proper standards of valuation, the figure would be $70,000,000, a difference of $24,800,000. At the time suit was brought approximately 250,000 miles of railroad lines throughout the country were undergoing valuation. The validity of the criteria employed by the Commission in the case of the Los Angeles & Salt Lake Railroad Company was therefore of enormous national significance. In the words of Commissioner Eastman, "This case deals with an issue of greater moment to the country than any that we have ever determined." 75 I. C. C. 523. These issues involving practically every phase of valuation law, were canvassed in an adversary proceeding before the Commission lasting nearly a year and a half, resulting in a report of one hundred and forty pages, and expressed in a formal "order" of ten pages. Counsel for the railroad company there, as do counsel for the broadcasting company here, relied upon the practical finality of the order as a basis for review: "As a practical matter, the Commission in any and all proceedings in which it has occasion to use this valuation will give it not *prima facie* but conclusive effect. In the valuation proceeding before the Commission which resulted in this order petitioner introduced its evidence of the value of the properties and the proceeding resulted in a valuation greatly at variance with the evidence and contentions of petitioner. No greater effect will be given to evidence which petitioner may introduce in some future proceeding before the Commission in an attempt to overcome the *prima facie* effect accorded by the Act to this valuation order. Therefore, unless and until set aside and annulled, this valuation will stand as a continuing menace against petitioner, and may be repeatedly used to petitioner's prejudice in rate, division, consolidation, security-issue and recapture proceedings." Brief for Appellee, pp. 64, 65.

The Court specifically referred to this argument of counsel: "One [argument in support of jurisdiction] is that since the Commission has by reason of errors of law and of judgment grossly undervalued the property, its report will, unless suppressed, injure the credit of the carrier with the public." Finding, however, that the order did not finally determine any legal rights, the Court refused review: "Its [the Commission's] conclusions, if erroneous in law, may be disregarded. But neither its utterances, nor its processes of reasoning, as distinguished from its acts, are a subject for injunction." 273 U. S. at 314-15.[1]

To argue that irreparable injury implies reviewability is in effect to contend that there must be a remedy because the plaintiff claims serious damage. But in these situations—in reviewing "orders" under the Urgent Deficiencies Act—federal courts can give a remedy only to enforce a legal right, and a legal right cannot be derived merely by concluding that a particular claim of hardship should afford a remedy. While formally we may appear to be dealing with technicalities, behind these considerations lie deep issues of policy in the division of authority as between administrative agencies and courts in carrying out the constitutional will of Congress. The source of the misconception underlying the claim for equitable relief in this case is the assumption that this is merely an ordinary invocation of equity, as though it were a controversy between two litigants of which only the courts are or can be seized. What we are here concerned with is due regard for the proper distribution made by Congress of legal authority as between two law-enforcing agencies of government, the administrative and the judicial. See *United States* v. *Morgan,* 307 U. S. 183, 190-91; *Federal Communications Commission* v. *Pottsville Broadcasting Co.,* 309 U. S. 134.

This case illustrates anew the influence of a particular instance of felt hardship in derailing legal principles from customary tracks. But this is not an isolated case. If threatened damage through general pronouncement of policy for future administrative action, to equitable review apart from the rule that judicial review is premature because of want of administrative finality, the same basis of irreparable harm which is here equated to jurisdiction will bear rich litigious fruit in the case of "regulations" issued by the Securities and Exchange Commission which are damaging in their immediate repercussions to stock exchange and holding companies, or regulations announced by the Treasury for the guidance of taxpayers but which adversely affect business interests, or regulations by the Federal Power Commission, etc. Suppose, for example, that the Commissioner of Internal Revenue issues a ruling that profits derived by radio stations from their network operations are subject to a tax deemed by them onerous and illegal. Could a network successfully bring a suit in equity prior to the imposition of such taxes to invalidate the ruling on the ground that its practical consequence was the cancellation of or refusal to renew network affiliations? One had supposed that the answer was clearly no. But surely in principle the problem is essentially that of the cases before us.

A final consideration remains. We are not dealing with the reviewability of administrative orders *in vacuo*. The reviewability of an order of the Federal Communications Commission depends upon the statutory scheme of judicial review embodied in § 402 of the Communications Act of 1934. Therefore, even if the regulations could be deemed to possess the essential attributes of a reviewable order. it would not inevitably follow that the order is reviewable in the manner provided for by § 402(a) of the Act. The scope and historical background of the provisions for judicial review contained in the Communications Act of 1934 have too recently been canvassed, see *Scripps-Howard Radio, Inc.* v. *Federal Communications Commission,* —— U. S. ——; *Federal Communications Commission* v. *Columbia Broadcasting System,* 311 U. S. 132; *Federal Communications Commission* v. *Pottsville Broadcasting Co.,* 309 U. S. 134, to require detailed consideration here. Briefly, the Act created two avenues by which orders of the Federal Communications Commission were open to review by the federal courts. Under § 402(a), incorporating the provisions of the Urgent Deficiencies Act of October 22, 1913, 38 Stat. 208, 219, relating to judicial review of orders of the Interstate Commerce Commission, a suit to enforce, set aside, annul, or suspend an order of the Federal Communications Commission may be brought in a specially constituted district court, with a right of direct appeal to this Court, only if the order does not fall within the exceptions enumerated by § 402(b), namely, orders granting or denying applications for station licenses or construction permits and for renewal or modification of licenses. Review of the orders comprehended within § 402(b) is available only through an appeal to the Court of Appeals for the District of Columbia, with no right of direct appeal to this Court.

If the regulations do constitute an order, what kind of an order can it be? It must be in the nature of a blanket denial, operating *in futuro,* to be sure, of applications for renewal of station licenses. But the Act expressly precludes judicial review of orders denying renewal applications of licensees in any manner other than that prescribed by § 402(b), to wit, by an appeal to the Court of Appeals for the District of Columbia. As the court below held, the effect of taking jurisdiction in these cases is to substitute a different court and a different procedure for those specified by Congress. This Court has not in the past displayed such an indifference to the particularities of legislation defining the jurisdiction of the lower federal courts. On the contrary, only last Term did the Court insist upon strict compliance with the statutory scheme for judicial review established by the Communications Act of 1934. See *Federal Communications Commission* v. *Columbia Broadcasting System,* 311 U. S. 132.

Even if we were free to disregard the scheme for judicial review which Congress has established, I could not agree that an appeal under § 402(b) would not be an adequate means for testing the claims made in the present litigation. There is essentially only one issue on the merits in this proceeding, namely, whether the adoption by the Commission of the policies expressed in the regulations transgresses its statutory and constitutional authority. But this issue could be raised and fully determined in an appeal under § 402(b) from an order denying a renewal application. Indeed, in its Minute of October 31, 1941, the Commission explicitly stated that the validity of the regulations could be put in issue in a renewal proceeding. If anything, therefore, the issues in an appeal under § 402(b) would be broader and not narrower than the issues here. Moreover, since the reasonableness of the application of the regulations to the particular situation would also be in issue in the renewal proceeding, the reviewing court would have before it a record containing elements of concreteness and particularity not present in the record now before us.

The Commission's Minute enables a licensee to contest the validity of the regulations, or the reasonableness of applying them to the particular case, without fear of losing its license. "In order to insure that the station may remain on the air and be in no way injured by any such Commission proceeding [contesting the validity of the regulations] and appeal to court from a decision in such proceeding, the Commission will grant such licensee a temporary extension of its license, with renewals from time to time until there has been a final determination of the issues raised at such hearing. In the event of such litigation, and if the validity of the application of the Chain Broadcasting Regulations to such licensee is sustained by the courts, the Commission will nevertheless grant a regular license to the licensee, otherwise entitled thereto, who has unsuccessfully litigated that issue, if the licensee thereupon conforms to the decision."

---

[1] To the same effect is United States v. Illinois Cent. R. R. Co., 244 U. S. 82. There the Interstate Commerce Commission issued an order fixing the time and place for hearing complaints made by various coal companies seeking damages against railroads for failing to supply a sufficient number of coal cars for their shipping needs. The railroads brought suit under the Urgent Deficiencies Act to annul this order, alleging that unless the hearing were restrained, the railroads would be put to enormous expense and inconvenience. The Court held that the notice of hearing "had no characteristics of an order affirmative or negative", and since it "was a mere incident in the proceeding", the suit could not be entertained. 244 U. S. at 89.

Plainly, therefore, a licensee is under no compulsion to cancel or modify its affiliation contract. Licensees who regard the regulations as invalid are free to continue their existing contracts and at the same time challenge the regulations in the orderly manner provided by the Act—and without any danger of losing their right to continue broadcasting. Similarly, the interests of the networks may be protected through intervention in renewal proceedings. Under the Commission's procedure, Rule 1.102 of the Rules of Practice and Procedure, where a renewal application is designated for hearing because of the licensee's contractual arrangements with others, the latter are customarily permitted to intervene. See, for example, Application of E. J. Regan and F. Arthur Bostwick, Docket No. 5788; Application of John H. Stenger, Jr., Docket No. 5430; Application of Ocala Broadcasting Co., Docket No. 6000; Application of Panama City Broadcasting Co., Docket No. 6001.

We need go no farther than this litigation to perceive the unfortunate effects of premature judicial review. The chain broadcasting regulations were issued on May 2, 1941, more than a year ago. They were adopted by the Commission as a consequence of its finding, after an investigation lasting more than three years, that certain features of network-affiliation contracts prevented licensees from effectively discharging their obligation to render the fullest service to the listening public. The policy formulated by the Commission may or may not be wise—that is not our concern. But we cannot blink the fact that this litigation has for more than a year prevented the Commission from testing by experience the practical wisdom of a policy found by it to be required by the public interest. The commencement of a proceeding under § 402(b) would not have presented the jurisdictional problems present in this proceeding. Surely those desirous of a speedy adjudication of the issue of the validity of the regulations were aware that the commencement of a proceeding under § 402(a) would not produce a prompt adjudication on the merits, but that it would instead result in postponing for a considerable period the effective date of the regulations, with all the contingent advantages afforded by such postponement.

Hardship there may well come through action of an administrative agency. But to slide from recognition of a hardship to assertion of jurisdiction is once more to assume that only the courts are the guardians of the rights and liberties of the people. In denying that it had power to review the action of the Federal Communications Commission because that body had not yet determined a legal right, the court below, as Judge Learned Hand's opinion abundantly proves, was not respecting a rule of etiquette. On the contrary, it merely recognized that the federal courts are entrusted with the correction of administrative errors or wrongdoing only to the extent of Congressional authorization. To say that the courts should reject the doctrine of administrative finality and take jurisdiction whenever action of an administrative agency may seriously affect substantial business interests, regardless of how intermediate or incomplete the action may be, is, in effect, to imply that the protection of legal interests is entrusted solely to the courts. The unbroken current of this Court's decisions in construing the scope of judicial review under the Urgent Deficiencies Act, and which is the only warrant for jurisdiction in this case, repels such a contention. The decision should therefore be affirmed.

Mr. Justice Reed and Mr. Justice Douglas join in this dissent.

NORTH DAKOTA

Estimated Radio Homes, 1940

Number of Occupied Dwelling Units as reported by U. S. Bureau of the Census in advance release, Series H-7. Percent radio-equipped calculated from Series H-7 Bulletin following the Census Bureau practice. Number of radio units, or radio homes, estimated by applying percent ownership to those units not answering radio question and adding such to those reporting radio.

FEDERAL COMMUNICATIONS COMMISSION

FOREIGN LANGUAGE "TIME BROKERS"

The FCC has directed its staff to ascertain the activities of "time brokers" in foreign language broadcasts over domestic radio stations. A letter requesting full information in this respect is to be addressed to licensees using their facilities for broadcast programs in foreign tongues.

Approximately 210 standard broadcast stations in this country have foreign language programs, and it is estimated that nearly half of these sell time to "brokers". These "brokers" are not station employees, but rather are independent contractors, apparently independent of any one station for their livelihood. In general, they obtain blocks of time over a given station and arrange their foreign language programs, selling on their own account spot announcements for use during their allotted time. Many act as their own announcers and seem to enjoy large followings among foreign-born listeners.

The FCC seeks to learn which "brokers" operate over which stations; the precise relationship existing between the "brokers" and their respective stations; the titles of the programs aired; the nature of the programs; and whether in the opinion of the licensee there are objections to, or useful functions for, the broker system. Copies of contracts and agreements concerning the operations of the brokers and stations in connection with the foreign language programs are to be filed with the Commission.

NEW ASSISTANT TO CHAIRMAN

Peter Shuebruk entered upon his duties today as the new Assistant to the Chairman, succeeding Robert G. Seaks (now a Lt., j. g., U. S. N.).

Son of Walter and Alice (Linnell) Shuebruk, he was born at Hull, Mass., on June 24, 1912. He attended Cohasset High School for four years and Phillips Exeter for one year. In 1933 he graduated summa cum laude from Harvard College and then went to England for a year's study at Oxford, under the Julia Henry Fellowship. He received his LL.B. degree in 1937 from Harvard Law School, magna cum laude, where he was an editor of the Harvard Law Review.

Since graduation he has been associated with the Boston law firm of Ropes, Gray, Best, Collidge and Rugg. He married Eileen Edwards of Cohasset, Mass, in 1935. They have one daughter, Susan L., aged three years.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, June 8. They are subject to change.

Monday, June 8

NEW—Mosby's Incorporated, Anaconda, Mont.—C. P., **1230 kc.,** 250 watts, unlimited.

Consolidated Hearing

NEW—The Constitution Broadcasting Co., Atlanta, Ga.—C. P., **550 kc.,** 1 KW night, 5 KW day, DA-night, unlimited.

NEW—Bob Jones College, Inc., Cleveland, Tenn.—C. P., **550 kc.,** 1 KW night, 5 KW day, DA-night, unlimited.

Tuesday, June 9

NEW—Chambersburg Broadcasting Company, Chambersburg, Pa.—C. P., **1340 kc.,** 250 watts, unlimited.

Wednesday, June 10

WRAL—Capitol Broadcasting Co., Inc., Raleigh, N. C.—C. P., **850 kc.,** 1 KW night, 5 KW day, DA-night, unlimited.

Further Consolidated Hearing

WICA—WICA, Incorporated, Ashtabula, Ohio—C. P., **970 kc.,** 1 KW night, 5 KW day, unlimited, DA-night.

WWSW—Walker & Downing Radio Corporation, Pittsburgh, Pa. —C. P., **970 kc.,** 5 KW, unlimited, DA-day and night.

WPRP—Julio M. Conesa, Ponce, Puerto Rico—C. P., **1480 kc.,** 1 KW night, 5 KW day, unlimited.

WPRP—Julio M. Conesa, Ponce, Puerto Rico—Modification of Construction Permit, **1520 kc.,** 1 KW night, 5 KW day, unlimited.

WPRP—Julio M. Conesa, Ponce, Puerto, Rico—Renewal of License, **1420 kc.,** 250 watts, unlimited.

Thursday, June 11

WRUF—University of Florida, Gainesville, Fla.—C. P., **850 kc.,** 5 KW, DA-night, unlimited.

WSOO—Hiawathaland Broadcasting Co., Sault Ste. Marie, Mich. —Renewal of License, **1230 kc.,** 100 watts night, 250 watts day, unlimited.

Friday, June 12

Further Hearing

NEW—A. M. Burton, Nashville, Tenn.—C. P., **1410 kc.,** 1 KW, DA-day and night, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WALL—Community Broadcasting Corp., Middletown, N. Y.—Granted modification (B1-MP-1537) of construction permit for new station to operate on **1340 kc.,** 250 watts, unlimited time, for approval of transmitter and studio sites, approval of antenna and change type of transmitter.

WHK-WHKC-WCLE—The Plain Dealer Publishing Co. (Transferor); The Forest City Publishing Co. (Transferee); United Broadcasting Co. (Licensee), Cleveland, Ohio; Columbus, Ohio; Cleveland, Ohio—Granted consent (B2-TC-289) to transfer control of United Broadcasting Company from the Plain Dealer Publishing Co. to the Forest City Publishing Co., on condition that no authority contained herein shall be construed as a finding with respect to, or as an approval of any future transfer of control of the licensee arising out of changes in the stockholdings of Forest City Publishing Co. or otherwise.

WJZM—William D. Hudson and Violet Hutton Hudson (Assignors); Roland Hughes (Assignee), Clarksville, Tenn.—Granted voluntary assignment of license (B3-AL-343) for station WJZM, from William D. and Violet Hutton Hudson, to Roland Hughes, for a total consideration of $26,500.

Western Evergreen Broadcasting Association, Seattle, Wash.—Granted authority (B5-FP-97) to transmit to and exchange with, the Canadian Broadcasting Corporation programs for rebroadcasting.

Blue Network Company, Inc., New York City—Granted authority (B1-FP-98) to transmit programs to Canadian Stations CFCF and CBL and to such other stations in Canada as the Canadian Broadcasting Corp. desires.

The Plain Dealer Publishing Co. (Transferor); The Forest City Publishing Co. (Transferee); United Broadcasting Co. (Licensee), Area of Cleveland, Ohio—Granted consent to transfer control of United Broadcasting Co., licensee of relay stations WEHX, WEHU, WEHV, WRPM, from the Plain Dealer Publishing Co. to The Forest City Publishing

Co., on condition that no authority contained herein shall be construed as a finding with respect to, or as an approval of any future transfer of control of the licensee arising out of changes in the stockholdings of Forest City Publishing Co. or otherwise.

W6XLA—Television Productions, Inc., Los Angeles, Cal.—Granted construction permit (B5-PVB-87) for new television relay station (in lieu of B5-MPVB-46, which expired Oct. 15, 1941) to operate on frequencies **204,000-216,000 kc.**, (Channels 11 and 12), 800 watts peak visual power only, A-5 emission and time of operation in accordance with Sec. 4.4(a).

MISCELLANEOUS

WGES—Oak Leaves Broadcasting Station, Inc., Chicago, Ill.—Granted license (B4-L-1667) to cover construction permit (B4-P-3063) for new transmitter, install directional antenna for day and night use, increase power to 5 kilowatts, change in hours of operation to unlimited and move transmitter); also authority to determine operating power by direct measurement of antenna power (B4-Z-1400).

WTTM—Trent Broadcast Corp., Trent, N. J.—Granted license (B1-L-1630) to cover construction permit (B1-P-2861, for a new station to operate on **920 kc.**, 1 kilowatt, unlimited time). Also authority to determine operating power by direct measurement of antenna power (B1-Z-1383).

WASK—WFAN, Inc., Lafayette, Ind.—Granted license (B4-L-1622) to cover construction permit (B4-P-3146, for new station to operate on **1450 kc.**, 250 watts, unlimited time, subject to condition that permittee shall satisfy legitimate complaints of blanketing within the 250 m/v contour, including external and cross modulation). Also authority to determine operating power by direct measurement of antenna input (B4-Z-1359).

WASK—WFAN, Inc., Lafayette, Ind.—Granted modification of license (B4-ML-1117) to move studio to 4th and Perry St. Wallace Building, Lafayette, Ind.

KTTS—Independent Broadcasting Co., Springfield, Mo.—Granted license (B4-L-1665) to cover construction permit (B4-P-3156 for new station to operate on **1400 kc.**, 250 watts, unlimited time). Also authority to determine operating power by direct measurement of antenna power (B4-Z-1398).

KRMC—Jamestown Broadcasting Co., Inc., Jamestown, No. Dak. —Granted authority to determine operating power by direct measurement of antenna power (B4-Z-1395).

KEGB—Don Lee Broadcasting System, Portable-Mobile, Area of San Francisco.—Granted license (B5-LRY-272) to cover construction permit (B5-PRY-264) authorizing new relay broadcast station to be used with standard station KFRC; frequencies **1646, 2090, 2190, 2830 kc.**, 100 watts power.

KOB—Albuquerque Broadcasting Co., Albuquerque, New Mexico.—Granted modification of construction permit authorizing new equipment and increase in power, for extension of completion date to August 1, 1942 (B5-MP-1561).

KHSL—Golden Empire Broadcasting Co., Chico, Cal.—Granted modification (B5-MP-1569) of construction permit authorizing increase in power and installation of DA for day and night, for extension of completion date to July 16, 1942.

KOL—Seattle Broadcasting Co., Seattle, Wash.—Granted modification (B5-MP-1567) of construction permit (B5-P-3030) authorizing increase in power and installation of directional antenna, for extension of completion date to Sept. 1, 1942.

WBTM—Piedmont Broadcasting Corp., Danville, Va.—Granted license (B2-L-1657) to cover construction permit (B2-P-3217, which authorized increase in night power, installation of new antenna and move of transmitter); also authority to determine operating power by direct measurement (B2-Z-1388).

KPMC—Pioneer Mercantile Co., Bakersfield, Cal.—Granted license (B5-L-1663) to cover construction permit (B5-P-3118, which authorized change in frequency to **1560 kc.**); also authority to determine operating power by direct measurement (B5-Z-1397).

WMSL—Tenn. Valley Broadcasting Co., Inc., Decatur, Ala.—Granted license (B3-L-1663) to cover construction permit (B3-P-3464 for installation of new transmitter).

WFTM—Fort Myers Broadcasting Co., Fort Myers, Fla.—Granted license (B3-L-1662) to cover construction permit (B3-P-3432, which authorized move of transmitter).

KPO—National Broadcasting Co., Inc., San Francisco, Cal.—Granted license (B5-L-1640) to cover construction permit (B5-P-3251, which authorized changes in equipment).

Scripps-Howard Radio, Inc., Texas Star Broadcasting Co., Greater Houston Brdcstg. Co., Inc., Houston, Texas.—Granted motion of applicants to dismiss without prejudice their applications for a new saation in Houston (Dockets 6088, 6089 and 6096).

KITE—First National Television, Inc., Kansas City, Mo.—Granted motion to accept delayed entry of appearance in re hearing on application for renewal of license. Dismissed application for continuance of hearing.

WROL—S. E. Adcock, d/b as Stuart Broadcasting Co., Knoxville, Tenn.—Granted petition for leave to amend application for construction permit to eliminate request for construction and to request only 1 kilowatt power unlimited; denied as to removal from docket and for cancellation of hearing now scheduled for June 17.

Andrew L. Todd, Murfreesboro, Tenn.—Granted petition to dismiss without prejudice application for new station.

WOAI—Southland Industries, Inc., San Antonio, Texas.—Granted petition to dismiss without prejudice application for construction permit to operate on **1200 kc.**

WGST—Georgia School of Technology, Atlanta, Ga.—Granted in part petition for extension of time in which to file proposed findings now due June 3, and extended time to June 8.

APPLICATIONS FILED AT FCC

640 Kilocycles

WHKC—United Broadcasting Co., Columbus, Ohio.—License to cover construction permit (B2-P-3255) for new vertical antenna system and move of transmitter.

WHKC—United Broadcasting Co., Columbus, Ohio.—Authority to determine operating power by direct measurement.

850 Kilocycles

WHDH—Matheson Radio Co., Inc., Boston, Mass.—Authority to determine operating power by direct measurement of antenna power for auxiliary transmitter.

1130 Kilocycles

WDGY—George W. Young, Minneapolis, Minn.—Special service authorization to change hours of operation from limited time to unlimited time, using power of 5 kilowatts day, 500 watts night except winter months when power will be reduced to 250 watts after sunset at Albuquerque, New Mexico.

1230 Kilocycles

KWG—McClatchy Broadcasting Co., Stockton, Calif.—Construction permit to make changes in transmitter and antenna and increase power from 100 watts to 250 watts.

1240 Kilocycles

KROY—Royal Miller, Sacramento, Calif.—Construction permit to install new transmitter and increase power from 100 watts to 250 watts.

KICD—Iowa Great Lakes Broadcasting Co., Spencer, Iowa.—Modification of construction permit (B4-P-3178, which authorized a new broadcast station) for change in type of transmitter proposed.

1290 Kilocycles

WTOC—Savannah Broadcasting Co., Savannah, Ga.—Modification of construction permit (B3-P-2944 as modified, which authorized increase in power, installation of directional antenna for night use) for extension of completion date from 6-15-42 to 8-15-42.

1340 Kilocycles

WCLS—WCLS, Incorporated, Joliet, Illinois.—License to cover construction permit (B4-P-3455) for move of transmitter.

1380 Kilocycles

WAWZ—Pillar of Fire, Zarephath, N. J.—License to cover construction permit (B1-P-3200) as modified, for increase in power, install new transmitter and changes in directional antenna system.

WAWZ—Pillar of Fire, Zarephath, N. J.—Authority to determine operating power by direct measurement.

1400 Kilocycles

WJZM—William D. Hudson and Violet Hutton Hudson, Clarksville, Tenn.—Voluntary assignment of license from William D. Hudson and Violet Hutton Hudson to Roland Hughes.

1450 Kilocycles

KMYC—Marysville-Yuba City Broadcasters, Inc., Marysville, Calif.—Construction permit to move transmitter and studio from Riverside Ave. and Island Road, 2 mile S. E. of Marysville, Calif. to Ellis Lake, facing 14th St., Marysville, Calif. Amended to request change in proposed transmitter and studio location to N. W. Corner of East half of Block 1, Laurellan Tract, on county road in Reclamation District No. 10, N. W. of Marysville, Calif.

1490 Kilocycles

WMRN—The Marion Broadcasting Co., Marion, Ohio—Transfer of control through sale of 130 shares (65%) of stock by Frank E. Mason and Ellen Mason to Howard F. Guthery and Florence Guthery.

1500 Kilocycles

WHIP—Hammond-Calumet Broadcasting Corp., Hammond, Ind.—Modification of construction permit (B4-P-2399, as modified, which authorized change in hours of operation and directional antenna system) for extension of completion date from 5-30-42 to 7-30-42.

1510 Kilocycles

WLAC—J. T. Ward, trading as WLAC Broadcasting Service, Nashville, Tenn.—Modification of construction permit (B3-P-1250, as modified, which authorized new transmitter and directional antenna for night use, increase in power, and move transmitter) for extension of completion date from 6-1-42 to 8-1-42.

1550 Kilocycles

WHAT—Independence Broadcasting Co., Philadelphia, Pa.—Modification of license to change frequency from **1340** to **1550 kc.**, and change hours of operation from Shares-WTEL to unlimited time.

1590 Kilocycles

WAKR—Summit Radio Corp., Akron, Ohio—Extension of special service authorization to operate with 5 KW power daytime (non-directional) using 5 KW transmitter specified under construction permit B2-P-3038 for period of one year.

FM APPLICATIONS

W39NY—City of New York, Municipal Broadcasting System, New York, N. Y.—Modification of construction permit (B1-PH-83, which authorized new high frequency broadcast station) for extension of completion date from 6-14-42 to 11-14-42.

K45LA—Don Lee Broadcasting System, Los Angeles, Cal.—Modification of construction permit (B5-PH-26, as modified, which authorized a new high frequency broadcast station) for extension of commencement and completion dates from 2-14-42 and 8-13-42 to 8-13-42 and 1-9-43, respectively.

W71SB—South Bend Tribune, South Bend, Ind.—Modification of construction permit (B4-PH-54, as modified, which authorized a new high frequency broadcast station) for extension of completion date from 6-25-42 to 12-25-42.

MISCELLANEOUS APPLICATIONS

KEJA—National Broadcasting Co., Inc., Portable-Mobile, Area of San Francisco, Cal.—Modification of license to show use of station with Standard Station KPO San Francisco, Calif. only, and delete use with Station KGO.

NEW—Blue Network Co., Inc., Portable-Mobile, Area of San Francisco, Cal.—License for new relay broadcast station using already licensed equipment (equipment KEJA) on **31220, 35620, 37020, 39260 kc.,** 0.25 watts, A3 emission.

KEJK—National Broadcasting Co., Inc., Portable-Mobile, Area of San Francisco, Cal.—Modification of license to show use of station with Standard Station KPO, San Francisco, Calif. only, and delete use with Station KGO.

NEW—Blue Network Co., Inc., Portable-Mobile, Area of San Francisco, Cal.—License for new relay broadcast station using already licensed equipment (equipment KEJK) on **31220, 35620, 37020, 39260 kc.,** 25 watts, A3 emission.

KEJI—National Broadcasting Co., Inc., Portable-Mobile, Area of San Francisco, Cal.—Modification of license to show use of station with Standard Station KPO, San Francisco, Calif. only, and delete use with Station KGO.

NEW—Blue Network Co., Inc., Portable-Mobile, Area of San Francisco, Cal.—License for new relay broadcast station using already licensed equipment (equipment KEJI) on **31220, 35620, 37020, 39260 kc.,** 2 watts, A3 emission.

NEW—Blue Network Co., Inc., Portable-Mobile, Area of San Francisco, Cal.—License for new relay broadcast station using already licensed equipment (equipment KEJG) on **31220, 35620, 37020, 39260 kc.,** 0.25 watts, A3 emission.

NEW—Blue Network Co., Inc., Portable-Mobile, Area of San Francisco, Cal.—License for new relay broadcast station using already licensed equipment (equipment licensed to WEJO) on **31220, 35620, 37020, 39260 kc.,** 2 watts, A3 emission.

KWID—The Associated Broadcasters, Inc., San Francisco, Cal.—License to cover construction permit (B5-PIB-34) as modified, for a new international broadcast station.

WNYD—City of New York, Municipal Broadcasting System, Portable-Mobile, Area of New York, N. Y.—Reinstatement of construction permit (B1-PRY-238) for a new relay broadcast station to be operated on **1622, 2058, 2150, 2790 kc.,** 50 watts, A3 emission.

WNYG—City of New York, Municipal Broadcasting System, Portable-Mobile, Area of New York, N. Y.—Reinstatement of construction permit (B1-PRY-238) for a new relay broadcast station to be operated on **1622, 2058, 2150, 2790 kc.,** 50 watts, A3 emission.

NEW—Blue Network Co., Inc., Portable-Mobile, Area of San Francisco, Cal.—License for a new relay broadcast station using already licensed equipment (Licensed to WNJC) on **31220, 35620, 37020, 39260 kc.,** 0.25 watts, A3 emission.

WNJC—National Broadcasting Co., Inc., Portable-Mobile—Modification of license for change in area normally served by station from Chicago, Ill., to San Francisco, Calif., and change in station with which used from WENR and WMAQ, Chicago, Ill. to KPO, San Francisco, Calif.

NEW—Blue Network Co., Inc., Portable-Mobile, Area of San Francisco, Cal.—License for new relay broadcast station using already licensed equipment (Licensed to WIEO) on **1606, 2074, 2102, 2758 kc.,** 50 watts, A1, A2, A3 emission.

WIEO—National Broadcasting Co., Inc., Portable-Mobile—Modification of license for change in area normally served by station from New York, N. Y. to San Francisco, Calif., and change in station with which to be used from WEAF and WJZ, New York, N. Y. to KPO, San Francisco, Calif.

NEW—Blue Network Co., Inc., Portable-Mobile, Area of San Francisco, Cal.—Construction permit for a new relay broadcast station to be operated on **31220, 35620, 37020, 39260 kc.,** 25 watts, A3 emission.

NEW—National Broadcasting Co., KNBC Inc., Portable-Mobile, Area of San Francisco, Cal.—Modification of license to show use of station with Standard Station KPO San Francisco, Calif. only, and to delete use with Station KGO.

NEW—Blue Network Co., Inc., Portable-Mobile, Area of San Francisco, Cal.—License for new relay broadcast station using already licensed equipment (equipment licensed to KNBC) on **1606, 2074, 2102, 2758 kc.,** 100 watts, A3 emission.

KSFM—National Broadcasting Co., Portable-Mobile, Area of San Francisco, Cal.—Modification of license to show use with Standard Station KPO, San Francisco, Calif. only, and delete use with Station KGO.

NEW—Blue Network Co., Inc., Portable-Mobile, Area of San Francisco, Cal.—License for new relay broadcast station using already licensed equipment (equipment KSFM) on **1606, 2074, 2102, 2758 kc.,** 100 watts, A1, A2, A3 emission.

NEW—W. A. Patterson, Portable-Mobile, Area of Chattanooga, Tenn.—Construction permit for a new relay broadcast station to be operated on **1622, 2058, 2150, 2790 kc.**, 35 watts, A-3 emission.

KWFR—Wichita Broadcasting Co., Portable-Mobile, Area of Wichita Falls, Texas.—License to cover construction permit (B3-PRY-273) which authorized a new relay broadcast station.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Jung Arch Brace Co., 109 West Central Parkway, Cincinnati, is charged, in a complaint, with misrepresentation in the sale of appliances, devices, and medicinal preparations advertised for use in treating ailments of the feet. (4767)

En-Ex Company—A complaint charging misrepresentation in the sale of a medicinal preparation designated "En-Ex" has been issued against Phillip Bartell, trading as The En-Ex Co. and The En-Ex Distributing Co., 614 Society for Savings Building, Cleveland. (4766)

Georgia Marble Finishing Works, Canton, Ga., is charged in a complaint with misrepresenting the enduring qualities of tombstones and monuments it manufactures. (4764)

La Vida Bottling Company, Inc.—Alleging misrepresentation in the sale of a mineral water advertised for medicinal use, a complaint has been issued against La Vida Bottling Co., Inc., Carbon Canyon, Placentia, Calif., and Paul G. Hausman, William N. Miller, and Alfred D. Mitchell, officers of the corporation. (4768)

Merchandise Company, Inc.—Misrepresentation in connection with the sale of tooth brushes is alleged in a complaint issued against New York Merchandise Co., Inc., 32 West 23rd St., New York. (4765)

New York Merchandise Co., Inc.—Misrepresentation in connection with the sale of tooth brushes is alleged in a complaint issued against New York Merchandise Co., Inc., 32 West 23rd St., New York. (4765)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Bigelow-Sanford Carpet Co., Inc., 140 Madison Ave., New York, has been ordered to cease misleading representations in the sale of rugs. (4207)

S. Reiffe & Sons, Inc., trading as Fairmount Merchandise Co. and Crown Mail Order Co., 160 Monroe St., New York, have been ordered to cease misrepresentations in the sale by mail order of clothing for men and women. According to Commission findings, most of the respondent's products are old, worn and previously used, although it sells some new clothing.

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Ar-Jay Laboratories, Inc., 304 East Sixth St., Ontario, Calif., stipulated that it will discontinue disseminating any advertisement of a coal tar hair dye designated "Ar-Jay Liquid Color Rinse" which does not reveal the material fact that there is potential danger in the use of the product by certain individuals. (02985)

Germo Mfg. Company—Germo Manufacturing Co., 112 South Main St., St. Louis, has entered into a stipulation to cease advertising that its drug preparation "Cholerine" promotes the health or vitality of poultry; normalizes the appetite of baby chicks; assures increased weight, more eggs or better profits; or improves the functioning of digestive organs of chicks by removal of mucus. The respondent also agrees to cease representing that Cholerine is a tonic and that it is indicated or is an effective treatment for such conditions or symptoms as lifeless or dull appearance of young chickens. (02986)

Miami Advertising Agency—Stipulations to cease certain representations in the sale of "Old Mohawk," a pharmaceutical preparation, have been accepted from Edgar S. Gebhart, trading as the Miami Advertising Agency, 1048 Redfern St., Dayton, Ohio, (3484); and from J. W. Daugherty, trading as Mohawk Medicine Co., and The Quaker Herb Co., trading as The Quaker Medicine Co., 220 George St., Cincinnati. (3485)

Joseph H. Trindl, Inc., and Trindl Products, Ltd., also trading as Dynamic Welder Co., and as Electro-Torch Co., 2227 Calumet Ave., Chicago, entered into a stipulation to cease and desist from certain representations in the sale of electric welding products designated "Dynamic Super-Charged Welder" and "3 in 1 Electric Torch." (3483)

FTC CASE CLOSED

The Federal Trade Commission closed the case growing out of its complaint charging James Bell Co., Inc., 36 Green St., Newark, N. J., with violation of the Federal Trade Commission Act in the sale and distribution of aluminum ware, enamel ware, radios and other merchandise. The Commission closed the case without prejudice to its right to resume proceedings, should future facts so warrant.

Sanders Hearings

Louis G. Caldwell, MBS counsel, appeared before the House Committee on Foreign and Interstate Commerce in connection with the hearings on the Sanders Bill (H. R. 5497). "The Communications Act does, in my opinion, have certain defects which call for amendment, both on the procedural and the substantive side," said Mr. Caldwell.

"* * * As for H. R. 5497, in my opinion, the bill proposes some changes in the law that are sound and should be eventually adopted. It contains others which, while too broad or too drastic in their present form, can probably be rephrased so as to be unobjectionable and perhaps desirable. It contains still others which I believe are either unnecessary or wholly unsound."

In conclusion he said:

"To summarize, while H. R. 5497 has several commendable features it goes too far in the direction of procedural red tape and unnecessary obstacles to the efficient and expeditious administration of the Act. It also ties this Commission down rigidly to one pattern of procedure when it may not only be not the best but may be substantially different from what you may decide to require of all federal administrative agencies."

The witness then proposed some additional amendments as follows:

"There are four suggestions I should like to add to the several proposals which have been made to you for amendment of the Communications Act.

"The list would be larger if we were not in a state of war. For example, I have always felt that Section 606 of the Act goes too far, at least in emergencies *short* of war, in permitting the shutting down or taking over of broadcasting stations for reasons not directly connected with imperative military need. I am afraid that someday it will prove to be the entering wedge for governmental operation of broadcasting stations. Yet, I realize it would be futile, and might be misunderstood, if any such proposal were urged at this time.

"*Amendment to Section 326.* My first, and by all odds most important proposal, is that Section 326, forbidding the Commission to exercise censorship of radio, be amended so as to carry out the original intent of Congress. There is no difficulty in ascertaining what that intent was, by reference to the debates in both the House and the Senate, including explicit explanations by Mr. White and Mr. Dill.

"For example, even before the section was inserted in the bill which became the Radio Act of 1927, Mr. White stated:

> 'The pending bill gives the Secretary no power of interfering with freedom of speech in any degree.'

"Thereupon ensued the following colloquy:

> 'Mr. LaGuardia. It is the belief of the gentleman and the intent of Congress in passing this bill not to give the Secretary any power whatever in that respect in considering a license or the revocation of a license.
>
> 'Mr. White of Maine. No power at all.'

"In the Senate, after a member of that body had suggested that the Commission might exercise censorship, Mr. Dill stated:

> 'I want to correct a statement which the Senator has made. . . . The bill does not give to the Commission the power to censor programs, but instead there is a provision in the bill which specifically prohibits the Commission from censoring programs in any way.'

Other references might be cited, but I think the foregoing are enough.

"By what to me is one of the strangest paradoxes in my legal experience, the statutory standard 'public interest, convenience or necessity' has turned out to be the Achilles' heel of the Act on the subject of freedom of speech and censorship of programs. Back in 1930 and 1931 the Commission began to assert rather regularly the power to refuse to grant a renewal of license if, in its opinion, the programs broadcast by the station in the past did not meet the standard 'public interest, convenience or necessity.' Stations were put off the air solely on this basis. Appeals were taken to the District Court of Appeals, where the Commission's power was confirmed, and the Supreme Court refused certiorari.

"Bear in mind that these cases did not involve programs violating any specific prohibition in the Act, such as obscene language or lottery information. They did involve rather vigorous, perhaps scurrilous speeches by the broadcaster against men in public office. To show how far the Commission thought it was entitled to go, it was said in one case, involving one Norman Baker of Iowa:

> 'Many of his utterances are vulgar, if not indeed indecent. Assuredly they are not uplifting or entertaining.
>
> 'Though we may not censor, it is our duty to see that broadcasting licenses do not afford mere personal organs, and also to see that a standard of refinement fitting our day and generation is maintained.'

"It is true that only in very few instances were stations actually closed down. In a number of others, they were spanked publicly in written decisions but were given renewals on assurances of future good behavior. The important thing, however, is not whether these particular individuals survived or were banished from the ether.

"The important thing is the effect on the whole industry, and on broadcasting as a means of mass communication. From the time when the Commission's power was confirmed by the courts, its pronouncements of views and policies on program matters had a magical effect. All it had to do was put out a release, even a speech by an individual commissioner, disapproving of a particular type of program, and most or all the stations henceforth avoided that type of program.

"The matter was carried a step further through the method by which complaints were handled. Large numbers of complaints against programs have poured into the Commission from listeners, crack-pots as well as others. In most cases, all the Commission had to do was to notify the station that a particular program had been the subject of complaint and demand that the station send in a transcript of the program and an explanation and the station saw the error of its ways. If this did not suffice, further conferences with the law department usually did. The threat of hearing and publicity was enough punishment to cause broadcasters to obey the views of the Commission (or just as frequently its law department) on what constitutes good programming.

"Matters progressed from one step to another until we arrived at an era where the Commission was just about to promulgate a set of standards on programs. Then occurred a series of dramatic incidents, such as the Mae West program, the action of the Commission in setting a large number of renewal applications for hearing because of the broadcasting of a network program 'Beyond the Horizon,' and the use of the word 'Flash' in the famous attack on New Jersey and other areas by the Men from Mars.

SANDERS HEARINGS

(Continued from page 315)

There was also the matter of the International Broadcasting Regulations.

"This again is a subject on which I have written frequently and I must not yield to the temptation to try to tell you in too much detail. I will say that during the past two or three years the tendencies in this direction have diminished and at present seem almost non-existent, but the power is there. It should not exist, if the First Amendment is to mean anything in radio.

"This *ex post facto* censorship is about the most effective that can be devised by government. There are no rules or standards to which broadcasters can conform. Consequently, they must stay clear of the doubtful zone by a safe margin. It is not possible that this method of regulation be exercised uniformly or fairly as between stations, unless the Commission is to maintain a large staff doing nothing also but snooping on programs and copying down what they hear. Otherwise, disciplinary action is going to result only when an interested party, such as a competitor, brings the matter to a head.

"I therefore suggest that Section 326 of the Act be amended by adding thereto the following:

> 'No construction permit or station license shall be revoked, modified, or otherwise adversely affected by any action of the Commission, and no application for construction permit, station license, renewal, or modification of station license, or other instrument of authorization required or authorized by the Act shall be refused in whole or in part, because of the character or contents of any program or other communication transmitted or proposed to be transmitted by a radio station, unless such program or other communication contains matter expressly forbidden by specific provision of this Act or by regulation of the Commission authorized by this Act and then only after the licensee has been finally adjudged guilty by a Federal court of one or more violations of such provision or provisions and the offense is of so serious or repeated a nature as to show clearly that the licensee or applicant is not qualified in character to operate or to continue to operate a radio station.'

"The foregoing is taken from H. R. 8509, 76th Congress, 3rd Session, the bill introduced early in 1940 by Representative Ditter and the corresponding bill introduced by Senator Bailey.

"*Considerations on Renewal of Licenses.* I suggest that there be deleted from Section 307(d) of the Act the following language:

> 'but action of the Commission with reference to the granting of such application for the renewal of a license shall be limited to and governed by the same considerations and practice which affect the granting of original applications.'

"This sentence was not in the Radio Act of 1927, as originally enacted. It was inserted in the Communications Act of 1934 for no good reason. The idea of its sponsor apparently was that any new applicant for a radio station should stand upon exactly the same footing as a licensee who had been in the business for years and, in fact, the newcomer was almost to be preferred because he was a newcomer. This idea is so shocking to natural equity, I am sure it will find no defender. Its pernicious possibilities have not yet been explored, but some day they will be.

"The sentence has the further bad feature of forcing the Commission to be more drastic, and to bring about greater hardship, than it otherwise would on particular problems. Under the sentence, if the Commission is going to lay down a rule applicable to new stations, it must apply the same rule to applicants for renewal of licenses of existing stations. Suppose it should decide that henceforth it will not grant any person a second station in the same city. If it could restrict itself to future stations of this sort, I think no one would seriously complain. Indeed, I doubt whether anyone seriously questions the Commission's power to make such a rule, provided it is not retroactive. This sentence in Section 307(d), however, stands in the way.

"The same may prove true on the question of newspaper ownership of stations. I do not think the Commission has power to make newspaper owners ineligible for licenses. I hope I am right in this, but a lawyer must be reckless indeed to prophesy what the Supreme Court will hold these days. I know that if it develops that the Commission has the power, it would be far more just to make it applicable simply to future instances rather than to have it retroactive.

"*Term of Licenses.* Section 307(d) limits broadcasting licenses to three years and other radio licenses to five years. Until last fall, broadcasting licenses were limited by Commission regulation to one year. By its order of October 11, 1941, the period was increased to two years.

"In my judgment, there is no reason whatsoever for any time limitation on licenses any more than there is on certificates of convenience and necessity on railroad lines and extensions, or extensions of telephone or telegraph lines. The rights of the public are fully protected through the Commission's power to revoke licenses under Section 312(a), or to compel a modification of license under Section 312(b).

"The fixing of a maximum license period has had extremely unfortunate consequences, both as a matter of procedure and as a matter of substantive law. Back in 1928 and 1929 the license period was limited to three months, due to what I think was over-hasty legislation by Congress. In any event, the Commission never used the revocation procedure which was intended to cover all cases of discipline. Instead, it used the procedure attendant upon an application for renewal of license, in which the burden was at least partly upon the applicant, and the Commission was relieved, in part at least, of the necessity of charging and proving any offense. After some years of experience in this field, I feel confident in saying there is no procedure more susceptible to abuse, evasion of due process, and arbitrary and capricious conduct than that which accompanies hearing on applications for renewal of license. Traditional processes of law are turned into reverse gear.

"If you want a suggestion which, more than any other that can be made, will tend to eliminate arbitrary and capricious decisions, you will take whatever steps that are necessary to require that the Commission assume the burden of alleging and proving guilt, and relieve the licensee of the burden of proving innocence.

"This is really not a radical proposal when you compare it with the methods of regulation regularly employed by almost all administrative agencies. If, however, you are not willing to go this far, then I suggest at least a license period of very substantial duration, such as from 10 to 20 years, corresponding to many public utility franchises.

"*Revocation Procedure.* The present section on revocation of license, after providing that 'any license may be revoked' for certain causes, goes on to provide:

> '*Provided, however,* That no such order of revocation shall take effect until fifteen days' notice in writing thereof, stating the cause for the proposed revocation, has been given to the licensee. Such licensee may make written application to the Commission at any time within said fifteen days for a hearing upon such order, and upon the filing of such written application said order of revocation shall stand suspended until the conclusion of the hearing conducted under such rules as the Commission may prescribe. Upon the conclusion of said hearing the Commission may affirm, modify, or revoke said order of revocation.'

"This is a curiously worded provision. The Commission revokes first and hears afterwards. Thus, the respondent gets adverse publicity giving the impression that he has already been found guilty instead of being merely charged with guilt. Also, the provision is susceptible of the interpretation that the burden of proof is on the respondent.

"This may sound like a small thing and perhaps it is. It has had no great practical importance, since the Commission has so rarely used the revocation procedure and has usually employed proceedings based on applications for renewal of license for disciplinary purposes. Still I have heard it said that one reason the Commission has not employed the revocation method is that it is unduly harsh because of this very feature. Consequently, I recommend an amendment, to be worded somewhat as follows:

> 'Sec. 312. (a) Any station license may be revoked for false statements either in the application or in the statement of fact which may be required by section 308 hereof, or because of conditions revealed by such statements of fact as may be required from time to time which would warrant the Commission in refusing to grant a license on an original application, or for failure to operate substantially as set forth in the license, or for violation of or failure to observe any of the restrictions and conditions of this Act or of any regulation of the Commission authorized by this Act or by a treaty ratified by the United States; *Provided, however,* That no such order of revocation shall be entered unless the Commission shall first have given the licensee written notice stating clearly and definitely the charges against the licensee and fixing a time and place for a hearing thereon, and shall have given the licensee an opportunity for hearing. Such hearing shall be held not less than fifteen days after service of such notice on the licensee, and the Commission shall sustain the burden of proving the truth of the charges.'

The foregoing is, like my proposed amendment of Section 326, taken from the bill introduced by Mr. Ditter early in 1940.

Conclusion

"I have been intrigued by a thought suggested by counsel for Columbia earlier in these hearings. In answer to a question from a member of the Committee, he stated that the relationship between a broadcasting station and a network was exactly like that between a newspaper and a press association, such as Associated Press.

"Let us examine that thought. At present the *Washington Post* has an Associated Press franchise. It also receives the United Press service, the *New York Times* service, and perhaps others. There is nothing in its arrangements with any of them preventing it from taking the service of another service, or which requires it to use any news furnished by any one of them, or to assign any particularly important space in the newspaper to its material.

"Then let us apply an analogy drawn from the situation in broadcasting. I suggest it would be something like this: At the top of the front page would be 'The Associated Press' in large type, and underneath, in small type, would be '*The Washington Post*.' No other news from any other agency would be permitted. All but one or one-and-a-half columns on the front page would have to be devoted to the Associated Press material, with 'Associated Press' printed in large type over and over again, and the better positions in the rest of the paper would have to be treated likewise. In addition, the Associated Press would secure most of the national advertising using the *Washington Post* and insist that the advertising be placed immediately adjacent to its news.

"Of course, the analogy can be carried to the point of being absurd, and I do not mean to do so. The real point is that, instead of some 1800 or 1900 vigorous independent and competitive newspapers of this country, you would have three organizations in New York, controlling all of them and, through them, controlling most of what the public reads. They would have the power to kill off a competitor at birth. The economic prosperity or failure of every newspaper in the country would be for them to determine. Every advertiser would be at their mercy.

"Fortunately, as shown by the Commission's regulations, we can still meet the technical needs of network broadcasting for a reasonable amount of clearance against local obstacles without yielding to the importunity of those who would control it all. The way has been shown by the Commission's regulations. If you nullify these regulations you will be putting the Congressional seal of approval on one of the clearest possible cases of unreasonable restraint of trade, a restraint of trade that is vastly more harmful to the public interest than most restraints because it has to do with an agency of the mass-communication of intelligence."

Paul D. P. Spearman appeared before the Committee in behalf of Network Affiliates, Inc. Following are his conclusions:

"Summarized, we take the positions that:

"1. Class I-A stations should not be allowed through the use of more and more power to attempt to overcome the great distances from the listeners in whom they claim to be so deeply interested while maintaining their locations in the most densely populated metropolitan areas of the country, and far away from such listeners, while they take the cream of the business which advertisers do by radio;

"2. Class I-A stations should not be put in position to dominate the radio advertising business as these few would be able to do if their ambitions on the power question should be realized;

"3. Regional and local stations are too important, much too important, to the cities and areas they serve, and serve so well, to be sacrificed on the altar of super power;

"4. No small group of stations should be put in the powerful position the members of the Clear Channel Group would be in or be given the power they could wield in influencing public opinion or controlling public thought if permitted to operate with 500 kw. power or more, and they should not be placed in such position even if it should be admitted that this little group of nineteen licensees were not disposed to take advantage of it, human nature being what it is;

"5. Nothing should be done to disturb the present satisfactory service being rendered by local and regional stations, which means the Clear Channel Group should not be placed in position to take their network and spot advertising business or any appreciable part of it from them as the Class I-A stations surely would do to many of them if all of them are permitted to operate with 500 kw. power or more;

"6. Instead of permitting any stations to operate with 500 kw. power on the claim that they want to and would serve rural and remote listeners, they ought to be relocated as contemplated by Section 307 (b) of the Communications Act of 1934, as amended, so that the 'fair, efficient, and equitable distribution' referred to in that Section may first be tried out. In this connection, and without undertaking to defend the Commission, which would be presumptuous for me to undertake, it is but fair to say that applications to bring about this distribution must first be filed as the Commission is powerless to act in the absence of applications.

"7. The Congress should include in any new Act or amendment to existing law a specific limitation of 50 kw. as the maximum power with which any station would be permitted to operate. This would accomplish two things: First, it would settle the argument about power and super power, which, like Banquo's ghost, will not down, and Secondly, it would put the good faith of the Clear Channel Group to the test as those who were sincerely desirous of serving the rural and remote listeners could move and do so, and those who merely used the farmer and the other remote listeners as excuses in trying to secure authority to operate with more and more power could settle down to the business of serving their highly populous metropolitan areas, just as most of them do now."

FCC Chairman James Lawrence Fly was on the stand briefly Thursday morning and gave a general outline of the work of the Commission. It was his opinion that broadcasting should remain in status quo for the duration with everyone digging in with the materials on hand to do the best job possible to win the war. He stated that the most significant work being done today was that of policing the industry which required the energies of approximately one-half of the FCC staff and one-half of its appropriation to care for the activities of approximately 100 monitoring stations. He explained at length the operation of a typical monitoring station.

The Committee recessed to meet on Friday morning after which it will adjourn until Wednesday, June 17.

Petrillo Threatens Recordings

James C. Petrillo, president of the American Federation of Musicians, notified his convention in Dallas this week that A. F. of M. members would be ordered to stop making records and transcriptions, except for home consumption, on August 1.

"The next move is up to the record and transcription companies," Mr. Petrillo told the NAB after disclaiming that he was directing the move primarily against the entire broadcasting industry.

Juke-boxes and broadcasting stations which employ no musicians, he indicated, were his primary concern.

HAGGERTY AGAIN ACTIVE

John B. Haggerty, President of the International Allied Printing Trades Association, a consistent proponent of a punitive tax on radio has again become active. Mr. Haggerty has sent the following letter to all members of Congress and to various union organizations asking them to use their influence upon Congress:

"The pending Revenue Bill, as reported in the press, indicates that many millions of wage workers and small business persons, those least able to pay, will be forced to accept substantial reductions in their living standards in order to help pay for our winning of the war. These conditions will be accepted by all true Americans, without much complaint, so long as those who are known to be well able to pay are taxed proportionately.

"Surely, something is wrong when we find a small group, well able to pay, exempt, so far, from taxes which the House of Representatives, upon recommendations of the Ways and Means Committee, voted last year. The same is true when we find that the Treasury Department has, as yet, failed to propose this year taxes of many millions of dollars, which were proposed last year, on those which the Treasury Department, after a study, had reported 'possess unusual tax-paying ability which, in view of the Government's present requirements, could properly be subject to special taxation.'

"The Treasury Department report to the Ways and Means Committee, further stated: 'The case for a special tax on radio broadcasting distinct from a tax on advertising, one medium of which is radio, is supported by several considerations. * * * a franchise to operate a broadcasting station in any particular area carries with it a measure of monopolistic privilege and the opportunity for an extremely profitable investment. The principal operators in commercial broadcasting earn high rates of return on relatively small investments. They possess unusual tax-paying ability which, in view of the Government's present requirements, could properly be subject to special taxation. Radio broadcasting requires public regulation. Such regulation is provided at public expense, with great benefits to the industry, but without any special costs to that industry.'

"The undersigned, on behalf of some 200,000 highly skilled and organized workers, respectfully asks your consideration of the facts and your insistence that those who, as the Treasury Department report stated, 'possess unusual tax-paying ability, could properly be subject to special taxation', pay their proportionate share of the taxes to be imposed.

"We trust we will have your support and we will be able to report to our members in your District your favorable attitude toward our request."

Mr. Haggerty accompanies this letter with an exhibit showing the consolidated CBS income statement of May 1942. He then observes:

"The statement portrays the current radio networks net profits and merely illustrates the need for levying of substantial excise or franchise taxes, on these holders of governmental licenses free of any Government tax, if taxes are to be levied on ability to pay.

"This report indicates a net profit after payment of all taxes of some 684% on actual invested capital."

He concludes as follows:

"Reports of the Federal Communications Commission reveal that of the total net broadcasting revenues of the entire industry, in 1939, not less than 93% was received by the 154 stations which had a gross income of more than $150,000.

"Radio broadcasters secure entry into American homes through their dissemination of entertainment. All other purveyors of amusement are taxed on gross income. Radio broadcasters should not be exempt. Otherwise one disseminator of entertainment on a national scale unfairly escapes the payment of taxes payable by its competitors."

"Reports of the Federal Communications Commission show that the net profits of the two major networks, namely, National Broadcasting Company and the Columbia Broadcasting System amounted to $59,509,349 for the years 1931-1940 inclusive. These figures are taken from the Federal Communications Commission Monopoly Investigating Committee's report, Volume 1 and 2, and reports of the Federal Communications Commission for the years 1939 and 1940. These net profits of $59,509,349 for the ten year period yielded an average annual net profit for these two companies alone of $5,950,934. The total combined investment in these two companies, on which these unusual earnings were made, was $4,614,694. The average annual net profits, after deduction of all operating costs, payment of Federal income and all other taxes, and including depreciation of $10,182,021, were therefore some 129 percent.

"It should be added that the net profits for the years of 1936-1940 inclusive were much greater than those for the years of 1931-1935 inclusive. National Broadcasting Company and Columbia combined net profits increased from a total of $19,017,613 in the first half of the ten year period to $40,491,736 during the second half of the ten year period, an increase for the years 1936-1940 of 213 percent over the profits for the five year period 1931-1935 inclusive."

Supreme Court Rules On Overtime Pay

The Supreme Court ruled Monday that the Wage and Hour Act requirement of time-and-a-half payment for overtime beyond 40 hours a week meant 150% of an employee's regular pay rate, not 150% of the Act's minimum pay provisions.

In another case the court, in a 5-4 decision, upheld a system by which an employer contracted to pay his employees a fixed sum each week, the amount being designed to cover overtime at the statutory time-and-a-half rate but the fixed sum would be paid for either a regular or an overtime week. Mr. Justice Byrnes wrote the majority opinion.

The court ruled on the meaning of "regular rate of pay". The weekly wage divided by hours equals regular rate. Time-and-half regular rate for hours employed beyond statutory maximum equals compensation for overtime hours. This formula applies to those salaried employees who work a regular number of hours each week and to those whose work week varies each week.

The decisions, interpreting the law's overtime pay provisions for the first time, were made in two cases which may be summarized as follows:

1. The Overnight Motor Transportation Co. of Baltimore employed William H. Missel at $27.50 a week. His hours were variable but he averaged 65 a week and sometimes worked 80. The law then fixed 25 cents an hour as the minimum wage and Missel got nothing extra for overtime because the company contended it already was paying him more than required, figuring 40 hours at 25 cents, or $10, plus 40 more at 37½ cents, or $15, totaling $25.

Under the court's ruling, however, Missel's regular pay was $27.50 for 40 hours. Since this came to about 68 cents an hour, he would be entitled to pay at the rate of $1.02 an hour for hours beyond 40. The court upheld Missel's right to claim damages equal to the overtime pay even though the employer acted in good faith.

2. The A. H. Belo Corporation, publisher of the Dallas (Tex.) Morning News and owner of radio station WFAA, contracted with its employees when the wage-hour law took effect to continue paying them their existing salaries for their existing hours. The contracts stipulated an hourly rate, obtained in most cases by dividing the guaranteed weekly salary by 60.

Thus if a man's salary was $60 a week his regular hourly rate would be $1 and his overtime rate $1.50. If he worked 40 hours he would get the full $60 but he might be required to work up to 53 hours for the same pay, since 40 hours at $1 and 13 at $1.50 would come to only $59.50. But if he worked 54 hours or more he would get more than $60.

The type of contract ruled upon, illustrated with the above figures, would read as follows:

In order to conform our employment arrangements to the scheme of the Wage and Hour Act without reducing the amount of money which you receive each week, we advise that from and after —, 1942, your basic rate of pay will be $1.00 per hour for the first 40 hours each week, and that for time over 40 hours each week you will receive for each hour of work not less than time-and-a-half time such basic rate above-mentioned, with a guaranty on our part that you shall receive weekly, for regular time and such overtime as the necessities of the business may demand, a sum not less than $60. We print the opinions in full below:

No. 622.—October Term, 1941.

L. Metcalfe Walling, Administrator of the Wage and Hour Division, United States Department of Labor, Petitioner,
vs.
A. H. Belo Corporation.

On Writ of Certiorari to The United States Circuit Court of Appeals for the Fifth Circuit.

[June 8, 1942.]

Mr. Justice Byrnes delivered the opinion of the Court.

This is a proceeding by the Administrator of the Wage and Hour Division of the Department of Labor to restrain the respondent corporation from alleged violation of the Fair Labor Standards Act.[1] The Administrator sought to prevent the use by respondent under certain contracts with its employees of wage agreements deemed by the Administrator violative of the time and a half for overtime provisions of section 7(a)[2] as implemented by section 15(a)(1) and (2).[3]

The respondent, a Texas corporation, is the publisher of the Dallas *Morning News* and other periodicals, and the owner and operator of radio station WFAA. It has some 600 employees. Those in the mechanical departments work under a collective bargaining agreement and are not affected by the Fair Labor Standards Act. The others, and particularly those in the newspaper business, work irregular hours. Prior to the effective date of the Act, October 24, 1938, respondent had been paying all but two or three of these employees more than the minimum wage required by the Act. They received vacations of approximately two weeks each year at full pay; special bonuses at the end of the year amounting to approximately one week's earnings; and full pay during periods of illness, sometimes continuing for weeks and sometimes for months. At the time of the trial 28 superannuated employees were carried on the payroll at full rates of pay. Employees were permitted absences to attend to personal affairs without deductions from pay. When they were required to work long hours in any week, they were given compensating time off in succeeding weeks. Life insurance was carried for them at respondent's expense.

After the enactment of the Fair Labor Standards Act but before its effective date, respondent endeavored to adjust its compensation system to meet the requirements of the Act by negotiating a contract with each of its employees except those in the mechanical departments. These contracts were in the form of letters stating terms which were agreed to by the employees. The following is a typical letter:

> "The Fair Labor Standards Act which goes into effect on October 24, 1938, provides for the following minimum wages and maximum hours of employment:
>
> "First year—25¢ per hour minimum
> 44 hours maximum per week
> "Second year—30¢ per hour minimum
> 42 hours maximum per week
> "Third year—40¢ per hour minimum[4]
> 40 hours maximum per week
>
> except that employees may work more than the number of hours specified above, provided that overtime rates shall be a minimum of one and one-half times the basic rate.
>
> "In order to conform our employment arrangements to the scheme of the Act without reducing the amount of money which you receive each week, we advise that from and after October 24, 1938, your basic rate of pay will be . . . 67 . . . cents per hour for the first forty-four hours each week, and that for time over forty-four hours each week you will receive for each hour of work not less than one and one-half time such basic rate above mentioned, with a guaranty on our part that you shall receive weekly, for regular time and for such overtime as the necessities of the business may demand, a sum not less than . . . $40 . . . ."

In most cases, as in this example, the specified hourly rate was fixed at 1/60th of the guaranteed weekly wage. The result was that during the first year under the Act when the statutory maximum of regular hours was 44, the employee was required to work 54½ hours before he became entitled to any pay in addition to the weekly guaranty.[5] When the employee worked enough hours at the contract rate to earn more than the guaranty, the surplus time was paid for at the rate of 150% of the hourly contract wage. If the employee received an increase in pay, the hourly rate and weekly rate were readjusted.

For eighteen months the system embodied in these contracts was followed to the apparent satisfaction of employer and employees. Respondent was then advised that the arrangement was in violation of the Act and that it was liable to its employees in an amount of from 30 to 60 thousand dollars. It was informed by the regional director in Dallas and by an official in the Administrator's office in Washington that an employee's complaint had precipitated the investigation. These officials declined to give the name of the employee.

Respondent thereupon brought suit for a declaratory judgment in the District Court for the Northern District of Texas joining the regional director and three of its employees as defendants. The defendant employees answered that they and all the other employees affected by the system approved of it. The regional director moved to dismiss on two grounds, one of which was that he represented none of the employees. The motion to dismiss was denied. 35 F. Supp. 430. In the meantime petitioner instituted this suit to enjoin respondent from continuing to operate the wage system based upon its contracts with its employees. The two suits were consolidated and tried together. The District Court entered a declaratory judgment for the respondent and dismissed the bill for an injunction. 36 F. Supp. 907.

Petitioner appealed to the Circuit Court of Appeals from the dismissal of its complaint. That Court affirmed the judgment of the District Court. 121 F. 2d 207. It found that the contracts were "actual bona fide contracts of employment" and that "they were intended to, and did, really fix the regular rates at which each employee was employed." We granted certiorari because of the importance of the question in the administration of the Act. — U. S. —.

It is no doubt true, as petitioner contends, that the purpose of respondent's arrangement with its employees was to permit as far as possible the payment of the same total weekly wage after the Act as before. But nothing in the Act bars an employer from contracting with his employees to pay them the same wages that they received previously, so long as the new rate equals or exceeds the minimum required by the Act.[6]

---

[1] Enforcement of the requirements of the Act by injunction is authorized by section 17. "The district courts of the United States and the United States courts of the Territories and possessions shall have jurisdiction, for cause shown, and subject to the provisions of section 20 (relating to notice to opposite party) of the Act entitled 'An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes,' approved October 15, 1914, as amended (U. S. C., 1934 edition, title 28, sec. 381), to restrain violations of section 15." 52 Stat. 1069; 29 U. S. C. § 217.

[2] "Sec. 7. (a) No employer shall, except as otherwise provided in this section, employ any of his employees who is engaged in commerce or in the production of goods for commerce—

(1) for a workweek longer than forty-four hours during the first year from the effective date of this section,

(2) for a workweek longer than forty-two hours the second year from such date, or

(3) for a workweek longer than forty hours after the expiration of the second year from such date,

unless such employee receives compensation for his employment in excess of the hours specified at a rate not less than one and one-half times the regular rate at which he is employed." 52 Stat. 1063; 29 U. S. C. § 207.

[3] "Sec. 15. (a) After the expiration of one hundred and twenty days from the date of enactment of this Act, it shall be unlawful for any person—

(1) to transport, offer for transportation, ship, deliver, or sell in commerce, or to ship, deliver, or sell with knowledge that shipment or delivery or sale thereof in commerce is intended, any goods in the production of which any employee was employed in violation of section 6 or section 7, or in violation of any regulation or order of the Administrator issued under section 14 except that no provision of this Act shall impose any liability upon any common carrier for the transportation in commerce in the regular course of its business of any goods not produced by such common carrier, and no provision of this Act shall excuse any common carrier from its obligation to accept any goods for transportation;

(2) to violate any of the provisions of section 6 or section 7, or any of the provisions of any regulation or order of the Administrator issued under section 14; . . . ." 52 Stat. 1068; 29 U. S. C. § 215.

[4] In later letters this misstatement, immaterial here, was corrected. The minimum wage for the first 40 hours remains 30 cents until October 24, 1945. See § 6 of the Act.

[5] 44 hours at 67 cents equals $29.48; 10⅔ hours at the statutory minimum overtime rate of $1.00 (150% × $.67) equals $10.67; $29.48 plus $10.67 equals $40.15.

The Act requires that for each hour of work beyond the statutory maximum the employees must be paid "not less than one and one-half times the regular rate at which he is employed." This case turns upon the meaning of the words "the regular rate at which he is employed." Respondent contends that the regular rate under the illustrative contract, which is set out above and to which we shall refer throughout, is 67 cents an hour. Petitioner argues, however, that the 67 cents hourly rate mentioned in the contract is meaningless and that the agreement is in effect for a weekly salary of $40 without regard to fluctuations in the number of hours worked each week. Treating the contract as one for a fixed weekly salary, he urges that the regular hourly rate for any single week is the quotient of the $40 guaranty divided by the number of hours actually worked in that week.[7] Under this formula the employee is entitled to the regular hourly rate thus determined for the first 44 hours[8] each week and to not less than one and one-half times that rate for each hour thereafter.

In its initial stage the question to which this dispute gives rise is a question of law, a question of interpretation of the statutory term "regular rate". But it is agreed that as a matter of law employer and employee may establish the "regular rate" by contract. In the case before us such an effort has been made, and in the example given the regular rate has been specified as 67 cents an hour. The difficulty arises from the inclusion of the $40 guaranty. The problem is whether the intention of the parties to set 67 cents an hour as the regular rate squares with their intention to guarantee a weekly income of $40. The Administrator's position is that these two objectives are inherently inconsistent and that the intention to fix the regular hourly rate at 67 cents is overridden by the intention to guarantee the $40 per week.

We cannot agree. In the first place, when an employee works more than 54½ hours in a single week, he is admittedly entitled to more than the $40 guarantee. The record shows that in such a case, the employee is paid at the rate of $1.00 an hour (150% × $.67) for each hour of overtime. In this situation, then, it is clearly the guaranty that becomes inoperative and the 67 cent hourly rate fixed by the contract that is controlling.

In the second place, although it is perfectly true that when the employee works less than 54½ hours during the week his pay is determined by the $40 guaranty, it does not dispose of the problem simply to say this. The question remains whether the $40 contemplates compensation for overtime as well as basic pay. The contract says that the employee is to receive 67 cents an hour for the first 44 hours and "*not less than* one and one-half time such basic rate" for each hour over 44. (Consequently, if an employee works 50 hours in a given week, it might reasonably be said that his $40 wage consists of $29.48 for the first 44 hours (44 × $.67) plus $10.52 for the remaining six hours (6 × $1.753). To be sure, $1.753 is more than 150% of $.67 But the Act does not prohibit paying more; it requires only that the overtime rate be "not less than" 150% of the basic rate. It is also true that under this formula the overtime rate per hour may vary from week to week. But nothing in the Act forbids such fluctuation.

The gist of the Administrator's objection to this interpretation is that both the basic rate and the overtime rate are so "artificial" that the parties to the contract cannot fairly be supposed to have intended that it be so construed. It cannot be denied that the flexibility of the overtime rate is considerable, but this flexibility may well have been intended if it was the only means of securing uniformity in weekly income. Moreover, under the Administrator's interpretation, the regular rate in the example given is $40 divided by the number of hours worked each week. Since the number of hours worked fluctuates so drastically from week to week, this "regular" rate is certainly "irregular" in a mathematical sense. And inasmuch as it cannot be calculated until after the work week has been completed, it is difficult to say that it is "regular" in the sense that either employer or employee knows what it is or can plan on the basis of it.

The artificiality of the method urged by the Administrator is accentuated by the nature of his counter-proposal of two plans by which the weekly wage of an employee whose hours vary from week to week may be stabilized. One of these officially approved plans is known as the "time-off plan" and is explained in Interpretative Bulletin No. 4. Under this plan the employment must be placed upon an hourly rate basis with no mention of a guaranty. The pay days must be spaced at intervals of two weeks or longer. If the pay period is set at two weeks and the employee is required to work overtime during the first week, he is given sufficient time off during the second week to keep his paycheck at a constant level. In our view this counter-proposal far exceeds in technicality the plan adopted by respondent. Moreover its operation is to provide a ceiling but not a floor for the wage. Since the pay is by the hour and there is no guaranty, in a pay period in which an employee works few hours, his wage may fall far below the level aimed at.

The other officially approved arrangement is known as the "prepayment plan", and is also explained in Bulletin No. 4. Under this plan virtually the same arrangement as that which we have been using as an example can stand. That is to say, an employee may be promised 67 cents an hour for the first 44 hours, $1.00 for each hour over 44,[9] with a guaranty of $40 a week. However, in any week in which the employee's earnings at the stated hourly rates do not equal the $40 guaranty, the balance necessary to fulfill the guaranty must be treated as a loan to him. If in any succeeding week his earnings at the stated hourly rates exceed the guaranty, the excess is withheld by the employer as a repayment of the loan. But if his earnings do not exceed the guaranty in any succeeding week, and after receiving his pay check he does not return to work, the employer is presumed to make an effort to collect the excess amount paid to the employee in a previous week. If the employer does not recover this excess amount, then for all practical purposes the plan operates just as does the plan, followed by the respondent in this case. About the only difference is that one is called a "guaranty plan" while the other is called a "pre-payment plan". In the opinion of the Administrator, the "pre-payment plan" is lawful; the "guaranty plan" is unlawful.

But the guaranty contract in this case carries out the intention of the Congress. It specifies a basic hourly rate of pay and not less than time and a half that rate for every hour of overtime work beyond the maximum hours fixed by the Act. It is entirely unlike the *Missel* case, decided this day. In the contract in that case there is no stated hourly wage and no provision for overtime. Under the decision in that case an employer who engages a worker for a fixed weekly wage of $40 for irregular hours and works him 65 hours (in a year when the maximum workweek is 44 hours), owes the employee $46.38. See *Missel* case. For the same hours under the Belo contract, at the hourly contract rate of 67 cents, the worker would receive $50.48. There is a difference in compensation, but that is the agreement of the parties and it is within the letter and the intention of the law.

The problem presented by this case is difficult—difficult because we are asked to provide a rigid definition of "regular rate" when Congress has failed to provide one. Presumably Congress refrained from attempting such a definition because the employment relationships to which the Act would apply were so various and unpredictable. And that which it was unwise for Congress to do, this Court should not do. When employer and employees have agreed upon an arrangement which has proven mutually satisfactory, we should not upset it and approve an inflexible and artificial interpretation of the Act which finds no support in its text and which as a practical matter eliminates the possibility of steady income to employees with irregular hours. Where the question is as close as this one, it is well to follow the Congressional lead and to afford the fullest possible scope to agreements among the individuals who are actually affected. This policy is based upon a common sense recognition of the special problems confronting employer and employee in businesses where the work hours fluctuate from week to week and from day to day. Many such employees value the security of a regular weekly income. They want to operate on a family budget, to make commitments for payments on homes and automobiles and insurance. Congress has said nothing to prevent this desirable objective. This Court should not.

---

[6] Section 19 provides: "No provision of this Act shall justify any employer in reducing a wage paid by him which is in excess of the applicable minimum wage under this Act, or justify any employer in increasing hours of employment maintained by him which are shorter than the maximum hours applicable under this Act." Whatever the legal effect of this language, it is certainly not a prohibition and the Administrator does not rely upon it. The finding of the Circuit Court of Appeals that respondent's effort to maintain the weekly incomes of its employees at their pre-Act level was in good faith gains support from the circumstance that at the very time when respondent was formulating its new wage policy the Wage and Hour Administrator declared:

"Clerical forces, we all feel, are included in the Act. But I cannot see where there is going to be any practical difficulty there because your clerical force in any plant of any consequence certainly is earning on a basis of more than 25 cents an hour weekly wages divided by the hours they work. If they are well above 25 cents an hour, it seems to me that there would not be much question about time and a half for overtime, because you could figure in that weekly wage that time and a half over the 44 hours had been given consideration as remuneration for their full week's pay."

Speech before the Southern States Industrial Council at Birmingham, Alabama, on September 29, 1938. 3 Wage and Hour Reporter 228.

[7] This has been the Administrator's interpretation of the Act, as set forth in Interpretative Bulletin No. 4, issued October 21, 1938, and revised in November, 1940.

[8] For the first year after passage of the Act; now 40 hours.

[9] It should be noted that respondent's contract, set out above, does not fix $1.00 as the hourly rate for overtime. Instead it provides that the overtime rate shall be "not less than one and one-half" times 67 cents.

Affirmed.

Mr. Justice Reed, *dissenting.*

The Court holds, "When employer and employees have agreed upon an arrangement which has proven mutually satisfactory, we should not upset it and approve an inflexible and artificial interpretation of the Act which finds no support in its text and which as a practical matter eliminates the possibility of steady income to employees with irregular hours." Yet it is recognized by the Court that the validity of the contract "turns upon the meaning of the words 'the regular rate at which he is employed,'" the phrase left undefined by Congress, which it is said the courts also should leave undefined and flexible. Not only does the Court's conclusion assume that the typical Belo contract conforms to the Fair Labor Standards Act by the provision for hourly wages and time and a half for overtime, but in the opinion just announced, the Court approves this type contract for hiring "so long as the new rate equals or exceeds the minimum required by the Act." In so deciding the Court gives the phrase "regular rate" an interpretation as inflexible and artificial as that which it condemns.

The Court's interpretation that, in the absence of bad faith, any form of contract which assures the payment of the minimum wage and the required overtime complies with the Act may be assumed to be correct. But since the overtime hours must be compensated "at a rate not less than one and one-half times the regular rate at which he is employed" (Sec. 7(a)(3)), the regular rate cannot be left without "definition", "flexible" or unfound for this case. And once so found, it must be applied to the circumstances of this litigation. No all inclusive definition will be attempted. The possibilities of variation in contracts are too great. Certainly, however, the Court does not mean to say that the employer and employee may capriciously select a certain figure, unrelated to the wages paid, and say "That is the regular rate of employment." Every contract of employment is assumed, by the statute, to contain a "regular rate," and for each contract it is a legal, not a factual, conclusion. What that rate is here is the object of our inquiry. Once determined for this case, that conclusion becomes a precedent for other similar contracts and so in one sense, whether we wish it or not, a definition to be applied in the administration of the Act.

This Court accepts the view that the Fair Labor Standards Act was intended not only to put a floor under wages but also a ceiling over hours. The limitation of hours in turn had two purposes—the spreading of work and extra compensation for overtime, no matter how high the regular wage may be. *Overnight Motor Transportation Co.* v. *Missel,* No. 939, October Term 1941, decided June 8, 1942, slip opinion page 4. Since overtime pay must at least equal time and a half the regular rate, as section 7(a) specifies, employers and employees may not be permitted to contract in avoidance of the statutory requirement. Contracts for a regular rate per hour conform easily to the requirements but contracts for compensation in other forms compel an analysis of their terms to find the regular rate. Fixed salaries, as this Court agrees today in *Missel's* case, are to be reduced to hourly rates on the basis of a week as the unit of time. Belo's contract contains elements both of hourly wage and fixed weekly wage contracts. We come then to this point Are the contracts here involved for weekly wages with variable hours or for hourly rates with time and a half of such rates for overtime? If the latter, respondent contends the Act has left him free to contract with his employees at such hourly regular rates as may be agreed upon, limited only by the minimum wage requirements. As a court, we must appraise the nature of these contracts and in my judgment they are agreements for weekly wages for variable hours, with a provision for additional compensation per hour contingent upon work in excess of an ascertainable number of hours—the number of hours of work required for the wages earned under the hourly wage terms of the contract to equal the guaranty.[1] Until these hours are exceeded, the stipulated wage per hour has no demonstrable effect.

The contracts stated they were drawn to comply with the "scheme of the Act without reducing" weekly wages. The hourly rate was customarily written as one-sixtieth of the weekly wages. The overtime above the maximum hours was set at 150% of the hourly wage or one-fortieth of the weekly. This was then followed by a guaranty that the employee should "receive weekly," for regular and overtime, the former weekly wage. This guaranty was the dominating feature of the contract. Without the guaranty, the adoption of a low hourly rate would encounter the full weight of employee bargaining power. The guaranty avoids this conflict by fixing the minimum weekly wage. This guaranty controls the weekly wage up to 54½ hours of work, the number of hours contracted for by Belo without paying more than the fixed weekly wage. In a 54½ hour week or less the regular rate should be the guaranty divided by the hours actually worked.

It seems obvious that the guaranty was the heart of the arrangement. The effect of the contract in the illustrative case is to pay 73 cents an hour for work up to 54½ hours and $1.00 (expressed in the circumlocution of time and a half 67 cents) for overtime beyond those hours, with a guaranty that there will be $40 worth of work each week. The "basic" hourly rate, the hours contracted for at the basic rate and the stated percentage paid for overtime may be varied without effect on earnings provided the guaranty and real overtime rate are kept fixed.[2]

The employee willing, the number of hours which must be worked to earn the guaranty can be increased by suitable adjustment of the contract figures of hourly rate, hours contracted and overtime percentages. By such a verbal device, astute management may avoid many of the disadvantages of ordinary overtime, chief of which is a definite increase in the cost of labor as soon as the hours worked exceed the statutory workweek. If the intention of Congress is to require at least time and a half for overtime work beyond a fixed maximum number of hours (40, 42 or 44 hours), that intention is frustrated by today's holding. Under *Missel's* case, an employer who engages a worker for a fixed weekly wage of $40 for irregular hours and works him 54½ hours a week in a year with a 44 hour maximum, owes $43.86. Under the Belo contract, the worker would receive $40. Because there is no increase of labor cost between the statutory maximum and the hours contracted for (54½), the employer has a financial inducement to require hours beyond the statutory maximum.

As pointed out above, this contract is not only an agreement to pay a fixed wage, $40.00, for variable hours up to 54½, but there is a provision for additional compensation for the hours over the contract maximum. Where the hours worked exceed the number necessary to entitle the employee to hourly pay under the contract, equal in the aggregate to the guaranty, the employee is entitled to receive his regular rate for the statutory maximum hours and 150% of that rate for all overtime. The contracts in most instances fixed the basic rate at one-sixtieth of the guaranty, but the effect of the guaranty, in our view, is to make the regular rate of employment for the precise number of hours necessary under the contract to earn the guaranty, the quotient of the guaranty divided by the hours.[3] For the surplus hours over 54½ the same regular rate continues to be applicable.[4]

---

[1] Cf. Carleton Screw Products Co. *v.* Fleming, 126 F. 2d 537.

[2] An example will illustrate the lack of significance of the other numbers in the contract. Varying rates, hours and overtime percentages are substituted for those in the Belo contract quoted in the Court's opinion. "In order to conform our employment arrangements to the scheme of the Act without reducing the amount of money which you receive each week, we advise that from and after October 24, 1938, your basic rate of pay will be [50] cents per hour for the first [29] hours each week, and that for time over [29] hours each week you will receive for each hour of work not less than [double] time such basic rate above mentioned, with a guaranty on our part that you shall receive weekly, for regular time and for such overtime as the necessities of the business may demand, a sum not less than $40.00."

> 29 hours × $.50 = $14.50. 54.5 hours — 29 hours = 25.5 hours at $1.00 per hour = $25.50. Time plus overtime = $40.00. Thereafter the employee receives $1.00 per hour.

The same is true of a basic rate of $.60 for 36¼ hours and time and two-thirds thereafter, with a guaranty of $40.

It is the guaranty which gives character to these contracts, which determines the amount to be received by the employee under its terms, except in the instances of work beyond 54½ hours. It is only work beyond the 54½ hours which calls for extra pay from the employer. Consequently it seems proper to find the regular rate of employment by using the guarantee as the dividend and the maximum hours possible without increased contract pay as the divisor. The objection that this permits statutory overtime pay to be computed on contract overtime pay springs from the wording of the contract making the guarantee cover overtime up to the 54½ hours. This objection loses its force with the determination that the guaranty fixes the quality of the contract, rather than the so-called basic or hourly rate of pay.

The judgment of the Circuit Court of Appeals should be reversed and this action remanded to the District Court for further proceedings.

Mr. Justice Black, Mr. Justice Douglas and Mr. Justice Murphy join in this dissent.

No. 939—October Term, 1941

Overnight Motor Transportation Company, Inc., Petitioner,
vs.
William H. Missel.

On Writ of Certiorari to the United States Circuit Court of Appeals for the Fourth Circuit.

[June 8, 1942.]

Mr. Justice Reed delivered the opinion of the Court.

This case involves the application of the overtime section of the Fair Labor Standards Act of 1938 [2] to an employee working irregular hours for a fixed weekly wage.

Respondent, Missel, was an employee of the petitioner, Overnight Motor Transportation Company, a corporation engaged in interstate motor transportation as a common carrier. He acted as rate clerk and performed other incidental duties, none of which were connected with safety of operation. The work for which he was employed involved wide fluctuations in the time required to complete his duties. The employment of respondent began before the effective date of the Fair Labor Standards Act, October 24, 1938, and terminated October 19, 1940. Until November 1, 1938, his salary was $25.50 per week and thereafter $27.50. Time records are available for only a third of the critical period, and these show an average work week of 65 hours, with a maximum of 80 for each of two weeks in the first year of the Act's operation and a maximum of 75 hours in each of three weeks in the second year. Nothing above the weekly wage was paid, because these maximum workweeks, computed at the statutory minimum rates with time and a half for overtime for the years in question, would not require an addition to the weekly wage.

Respondent brought a statutory action to recover alleged unpaid overtime compensation in such sum as might be found due him, an additional equal amount as liquidated damages, and counsel fee.[2] The trial court, refusing to hear evidence on the precise amount claimed, decided in favor of the petitioner on the ground that an agreement for a fixed weekly wage for irregular hours satisfied the requirements of the Act. Under such circumstances the court was of the view that pay would be adequate which amounted to the required minimum for the regular hours and time and a half the minimum for overtime. 40 F. Supp. 174. The Circuit Court of Appeals reversed with directions to enter judgment for the plaintiff in accordance with its opinion, an order which we interpret as authorizing a hearing in the trial court as to the amounts due. 126 F. 2d 98. As the questions involved were important in the administration of the Fair Labor Standards Act, we granted certiorari. — U. S. —.

Petitioner renews here its contentions that the private right to contract for a fixed weekly wage with employees in commerce is restricted only by the requirement that the wages paid should comply with the minimum wage schedule of the Fair Labor Standards Act, section 6, with overtime pay at time and a half that minimum, that in any event the Act does not preclude lump sum salaries in excess of the minimum, and that a contrary interpretation of the statute would render it unconstitutional.

It is plain that the respondent as a transportation worker was engaged in commerce within the meaning of the Act,[3] and unless specifically exempted was entitled to whatever benefits the overtime provisions conferred.

While now conceding that *United States* v. *Darby,* 312 U. S. 100, settles the constitutional power of Congress to legislate against labor conditions detrimental to a minimum standard of living required for the general well-being of workers, petitioner argues that there is no power under the Constitution to regulate the hours or wages of workers whose pay, in every instance, at least equals the minimum and whose hours are not injurious to health. Freedom of contract between employer and employee, it is urged, is destroyed by such an interpretation.[4] But hours or wages not patently burdensome to health may yet be subject to regulation to achieve other purposes. We assume here the statutory objectives discussed later, i. e., that the act is aimed at hours as well as wages. The commerce power is plenary,[5] may deal with activities in connection with production for commerce [6] and as said in the *Darby case,* may extend "to those activities intrastate which so affect interstate commerce or the exercise of the power of Congress over it as to make regulation of them appropriate means to the attainment of a legitimate end, the exercise of the granted power of Congress to regulate interstate commerce." P. 118. Long hours may impede the free interstate flow of commodities by creating friction between production areas with different length workweeks, by offering opportunities for unfair competition through undue extension of hours, and by inducing labor discontent apt to lead to interference with commerce through interruption of work. Overtime pay probably will not solve all problems of overtime work, but Congress may properly use it to lessen

---

[3] Weekly guaranty—$40. Hours worked—54⅔. Straight hourly contract wage—$40÷60=$.66⅔. Straight contract hours—44. 44×$.66⅔=$29.33⅓. Overtime hourly contract wage—$1.00. Overtime contract hours—10⅔. 10⅔×$1=$10.66⅔. Total contract wage paid—$40. Statutory regular rate—40÷54⅔=$.732 per hour. Statutory maximum hours—44. 44×$.732=$32.20. Statutory overtime rate—$1.098. Statutory overtime hours=10⅔. 10⅔×$1.098=$11.71. Total required compensation—$43.91.

[4] Hours worked—60. Statutory maximum hours—44. Regular rate—$.732. 44×$.732=$32.20. Statutory overtime hours—16. Overtime rate—$1.098. 16×$1.098=$17.57. Total required compensation—$49.77.

---

[1] "Sec. 7. (a) No employer shall, except as otherwise provided in this section, employ any of his employees who is engaged in commerce or in the production of goods for commerce—

(1) for a workweek longer than forty-four hours during the first year from the effective date of this section.

(2) for a workweek longer than forty-two hours during the second year from such date, or

(3) for a workweek longer than forty hours after the expiration of the second year from such date,

unless such employee receives compensation for his employment in excess of the hours above specified at a rate not less than one and one-half times the regular rate at which he is employed." 52 Stat. 1063; 29 U. S. C. § 207.

[2] "Sec. 16. . . .

"(b) Any employer who violates the provisions of section 6 or section 7 of this Act shall be liable to the employee or employees affected in the amount of their unpaid minimum wages, or their unpaid overtime compensation, as the case may be, and in an additional equal amount as liquidated damages. Action to recover such liability may be maintained in any court of competent jurisdiction by any one or more employees for and in behalf of himself or themselves and other employees similarly situated, or such employee or employees may designate an agent or representative to maintain such action for and in behalf of all employees similarly situated. The court in such action shall, in addition to any judgment awarded to the plaintiff or plaintiffs, allow a reasonable attorney's fee to be paid by the defendant, and costs of the action." 52 Stat. 1069, 29 U. S. C. § 216.

[3] "Sec. 3. As used in this Act—

. . . .

(b) 'Commerce' means trade, commerce, transportation, transmission, or communication among the several States or from any State to any place outside thereof." 52 Stat. 1060, 29 U. S. C. § 203.

[4] "It is Petitioner's contention that though the constitutionality is clearly settled as to the question of correcting 'sub-standard labor conditions', a construction of the Act which has no relationship whatsoever to 'sub-standard labor conditions' would nonetheless be unconstitutional, for the potentiality of such a construction is to destroy freedom of contract between employer and employee."

[5] Labor Board *v.* Jones & Laughlin Steel Corp., 301 U. S. 1, 37.

[6] Santa Cruz Co. *v.* Labor Board, 303 U. S. 453, 464.

the irritations. Substandard labor conditions were deemed by Congress to be "injurious to the commerce and to the states from and to which the commerce flows." *United States* v. *Darby,* 312 U. S. 100, 115. To protect that commerce from the consequences of production of goods under substandard conditions, it may choose means reasonably adapted to those ends, including regulation of intrastate activities, p. 121, by minimum wage and maximum hour requirements, p. 123. Compare *Santa Cruz Co.* v. *Labor Board,* 303 U. S. 453, 466. If overtime pay may have this effect upon commerce, private contracts made before or after the passage of legislation regulating overtime cannot take the overtime transactions "from the reach of dominant constitutional power." *Norman* v. *B. & O. R. Co.,* 294 U. S. 240, 306-311. If in the judgment of Congress time and a half for overtime has a substantial effect on these conditions it lies with Congress' power to use it to promote the employees' well-being.

Statutory Construction. The petitioner attacks the basic conceptions upon which the Circuit Court of Appeals determined that the compensation paid by the respondent violated section 7(a) of the act.[7] That court felt that "one of the fundamental purposes of the Act was to induce work-sharing and relieve unemployment by reducing hours of work." We agree that the purpose of the act was not limited to a scheme to raise substandard wages first by a minimum wage and then by increased pay for overtime work. Of course, this was one effect of the time and a half provision, but another and an intended effect was to require extra pay for overtime work by those covered by the act even though their hourly wages exceeded the statutory minimum. The provision of section 7(a) requiring this extra pay for overtime is clear and unambiguous. It calls for 150% of the regular, not the minimum, wage. By this requirement, although overtime was not flatly prohibited, financial pressure was applied to spread employment to avoid the extra wage and workers were assured additional pay to compensate them for the burden of a workweek beyond the hours fixed in the act. In a period of widespread unemployment and small profits, the economy inherent in avoiding extra pay was expected to have an appreciable effect in the distribution of available work. Reduction of hours was a part of the plan from the beginning. "A fair day's pay for a fair day's work" was the objective stated in the Presidential message which initiated the legislation.[8] That message referred to a "general maximum working week", "longer hours on the payment of time and a half for overtime" and the evil of "overwork" as well as "underpay." The message of November 15, 1937, calling for the enactment of this type of legislation referred again to protection from excessive hours.[9] Senate Report No. 884 just cited, page 4, the companion House Report [10] and the Conference report [11] all spoke of maximum hours as a separately desirable object. Indeed, the form of the act itself in setting up two sections of standards, Section 6 for wages and Section 7 for hours, emphasizes the duality of the Congressional purpose. The existence of such a purpose is no less certain because Congress chose to use a less drastic form of limitation than outright prohibition of overtime. We conclude that the act was designed to require payment for overtime at time and a half the regular pay, where that pay is above the minimum, as well as where the regular pay is at the minimum.[12]

We now come to the determination of the meaning of the words "the regular rate at which he is employed." Since we have previously determined in this opinion, in the discussion of petitioner's objection to the application of the Act on the ground of unconstitutionality, that the scope of the commerce power is broad enough to support federal regulation of hours, we are concerned at this point only with the method of finding the regular rate under the contract with respondent. Congress might have sought its objective of clearing the channel of commerce of the obstacles of burdensome labor disputes by minimum wage legislation only. We have seen that it added overtime pay. The wages for minimum pay are expressed in terms of so much an hour. Sec. 6(a) (1)— "Not less than 25 cents an hour" with raises for succeding years or by order of the Administrator under Sec. 8. Cf. *Opp. Cotton Mills* v. *Administrator,* 312 U. S. 126. Neither the wage, the hour nor the overtime provisions of sections 6 and 7 on their passage spoke specifically of any other method of paying wages except by hourly rate.[13] But we have no doubt that pay by the week, to be reduced by some method of computation to hourly rates, was also covered by the act.[14] It is likewise abundantly clear from the words of section 7 that the unit of time under that section within which to distinguish regular from overtime is the week. "No employer shall . . . employ any of his employees . . . (1) for a workweek longer than forty-four hours . . . " Sec. 7(a) (1).[15]

No problem is presented in assimilating the computation of overtime for employees under contract for a fixed weekly wage for regular contract hours which are the actual hours worked,[16] to similar computations for employees on hourly rates. Where the employment contract is for a weekly wage with variable or fluctuating hours the same method of computation produces the regular rate for each week. As that rate is on an hourly basis, it is regular in the statutory sense inasmuch as the rate per hour does not vary for the entire week, though week by week the regular rate varies with the number of hours worked. It is true that the longer the hours the less the rate and the pay per hour. This is not an argument, however, against this method of determining the regular rate of employment for the week in question. Apart from the Act if there is a fixed weekly wage regardless of the length of the workweek, the longer the hours the less are the earnings per hour. This method of computation has been approved by each circuit court of appeals which has considered such problems. See *Warren Bradshaw Drilling Co.* v. *Hall,* 124 F. 2d 42, 44; *Bumpus* v. *Continental Baking Co.,* 124 F. 2d 549, 552, cf. *Carleton Screw Products Co* v. *Fleming,* 126 F. 2d 537, 541. It is this quotient which is the "regular rate at which an employee is employed" under contracts of the types described and applied in this paragraph for fixed weekly compensation for hours, certain or variable.[17]

Petitioner invokes the presumption that contracting parties contemplate compliance with law and contends that accordingly there is no warrant for construing the contract as paying the employee only his base pay or "regular rate," regardless of hours worked. It is true that the wage paid was sufficiently large to cover both base pay and fifty per cent additional for the hours actually worked over the statutory maximum without violating section six. But there was no contractual limit upon the hours which petitioner could have required respondent to work for the agreed wage, had he seen fit to do so, and no provision for additional pay in the event the hours worked required minimum compensation greater than the fixed wage. Implication cannot mend a contract so deficient in complying with the law. This contract differs from the one in *Walling* v. *Belo,* decided today, where the contract specified an hourly rate and not less than time and a half for overtime, with a guaranty of a fixed weekly sum, and required the employer to pay more than the weekly guaranty where the hours worked at the contract rate exceeded that sum.

[9] 82 Cong. Rec. 11, 75th Cong., 2d Sess.

[10] House Rep. 1452, 75th Cong., 1st Sess., pp. 14, 15.

[11] 83 Cong. Rec. 9246, 9254.

[12] Cf. Bumpus *v.* Continental Baking Co., 124 F. 2d 549, 551: Carleton Screw Products Co. *v.* Fleming, 126 F. 2d 537, 539; Tidewater Optical Co. *v.* Wittkamp, 179 Va. 545, 551, 19 S. E. 2d 897, 899; McMillan *v.* Wilson & Co., 2 N. W. 2d 838, 839 (Minn. Sup. Ct.); see United States *v.* Darby, 312 U. S. 100, 125.

[13] Sec. 3(m) defined wage to include board, lodging or other facility customarily furnished employees. The Joint Resolution of June 26, 1940, for work relief and relief for the fiscal year 1941, Sec. 3(f) deals with piece work in Puerto Rico or the Virgin Islands. 54 Stat. 611, 616.

[14] Any other interpretation would render almost useless the exemptions from the act of employees in "executive, administrative, professional or local retailing capacity, or in the capacity of outside salesmen." Sec. 13(a)(1). Such employees are rarely paid by the hour.

[15] The legislative history of the Fair Labor Standards Act is inconclusive as to the intended meaning of the words "the regular rate at which he is employed." The committee reports do not discuss them. The bill which came out of the Conference and was adopted changed "regular hourly rate" of previous bills (S. 2475, introduced May 24, 1937; H. R. 7200, introduced May 24, 1937; and S. 2475 in the Senate, April 20, Calendar Day May 25, 1938) to "regular rate." Conference Report, 83 Cong. Rec. 9247, 75th Cong., 3rd Sess. "Hourly" may have been omitted as not descriptive of piecework or salary payments.

[16] Wage divided by hours equals regular rate. Time and a half regular rate for hours employed beyond statutory maximum equals compensation for overtime hours.

[17] This has been the Administrator's interpretation of the Act. Interpretative Bulletin No. 4 issued October 21, 1938, revised November, 1940. While the interpretative bulletins are not issued as regulations under statutory authority, they do carry persuasiveness as an expression of the view of those experienced in the administration of the Act and acting with the advice of a staff specializing in its interpretation and application. Cf. United States *v.* American Trucking Associations, 310 U. S. 534, 549; United States *v.* Darby, 312 U. S. 100, 118, n. 2; Graves *v.* Armstrong Creamery Co., 154 Kansas 365, 370, 118 P. 2d 613, 616. Even negative construction may be significant. Trade Comm'n *v.* Bunte Bros., 312 U. S. 349, 351, 352.

Regulations on records issued pursuant to section 11(a) have since September 15, 1941, referred to Interpretative Bulletin 4 for the method of computation. 6 Fed. Reg. 4695, n. 9.

In the Circuit Court of Appeals[18] it was held that the liquidated damages provision, section 16(b) of the Act, 52 Stat. 1069, was mandatory on the courts, regardless of the good faith of the employer or the reasonableness of his attitude. Petitioner attacks this conclusion as a denial of due process because if the damage provision is mandatory, the employer is "without opportunity to test the issues before the courts," citing *Ex parte Young,* 209 U. S. 123, *Wadley Southern Ry.* v. *Georgia,* 235 U. S. 651, and other similar cases. Petitioner points out that if there was a failure to pay the statutory overtime, it resulted from an inability to determine whether the employee was covered by the Act.

Section 13 (b) (1)[19] exempts from section 7 employees for whom the Interstate Commerce Commission has power to establish maximum hours of service. This exemption was derived from the Motor Carrier Act of 1935, 49 Stat. 543, which authorized the Commission to regulate "maximum hours of service of employees." A definitive order leaving employees with the duties of respondent subject to the Fair Labor Standards Act was not passed by the Commission until March 4, 1941,[20] after respondent's employment ended. This conclusion, however, was foreshadowed by the ruling of the Commission, December 29, 1937[21] that it would limit regulations concerning maximum hours to employees whose functions affected the safety of operations. Other orders, bulletins and opinions pointing to the final conclusion intervened.[22] These various determinations now make it clear that respondent was subject at all times since the effective date of the Fair Labor Standards Act to its provisions. The Interstate Commerce Commission never had the power to regulate his hours.

Perplexing as petitioner's problem may have been, the difficulty does not warrant shifting the burden to the employee. The wages were specified for him by the statute,[23] and he was no more at fault than the employer. The liquidated damages for failure to pay the minimum wages under sections 6(a) and 7(a) are compensation, not a penalty or punishment by the Government.[24] Cf. *Huntington* v. *Attrill,* 146 U. S. 657, 667, 668, 674, 681; *Cox* v. *Lykes Brothers,* 237 N. Y. 376, 143 N. E. 226. The retention of a workman's pay may well result in damages too obscure and difficult of proof for estimate other than by liquidated damages. *Atchison, etc. Ry.* v. *Nichols,* 264 U. S. 348, 351; *James-Dickinson Co.* v. *Harry,* 273 U. S. 119. Nor can it be said that the exaction is violative of due process. It is not a threat of criminal proceedings or prohibitive fines, such as have been held beyond legislative power by the authorities cited by petitioner. Even double damages treated as penalties have been upheld as within constitutional power.[25]

Affirmed.

The Chief Justice concurs in the result. Mr. Justice Roberts dissents.

J. NINIAN BEALL and JOHN R. NORRIS for petitioner; GEORGE A. MAHONE (W. HAMILTON WHITEFORD and WILLIAM O. TYDINGS with him on the brief) for respondent; CHARLES FAHY, Solicitor General, ARNOLD RAUM, WARNER W. GARDNER, Solicitor, United States Department of Labor, MORTIMER B. WOLF, Assistant Solicitor, and JACOB D. HYMAN filed brief on behalf of the Administrator of the Wage and Hour Division, United States Department of Labor, as amicus curiae; J. NINIAN BEALL filed brief on behalf of American Trucking Associations, Inc., as amicus curiae.

Sales

NO CAUSE FOR JITTERS

Because concern over so-called "threats to advertising" by government officials is being felt in some quarters, by broadcasters and other media men, repeated statements have been issued by high authorities disclaiming any intention to curtail or eliminate advertising.

It is true that the War and Navy Departments have issued statements governing advertising deductions to determine costs of manufacture on contracts for government supplies. It should be emphasized, however, that these rulings are limited in their scope and application, applying chiefly to prime or sub-contractors.

On the broader field of consumer or institutional advertising, several reassuring statements have been issued by such authorities as Leon Henderson, OPA head; Assistant Attorney General Thurman Arnold; Donald Montgomery, AAA Consumers' Council head, and others.

Among the more recent of these are statements reported in the *New York Times* May 30 and in various trade journals last week. Said *Advertising Age* on June 1:

"Mr. Henderson reiterated the statements he made at the joint meeting of the AAAA and ANA last November, and asserted that his attitude toward advertising has in no wise changed since then; and Mr. Arnold declared again that he is not interested in advertising per se, but only in the use of advertising and other business tools in a monopolistic manner.

"Mr. Montgomery, whose views have not been so frequently stated as those of the other two, asserted that shortages of goods may lead to curtailment of product advertising, but continued:

" 'But there will still be a great need, in my opinion, for a whole lot of national advertising. It is time advertising people started advertising the United States and particularly the big job it has to do at the moment . . . In my opinion if the private advertiser has vision—as some have shown they have—he will fulfill this new function *while the war is on.* In other words, although the opportunity for specific commodity advertising is undoubtedly going to be curtailed, *the need for advertising as a whole will not be curtailed* if advertisers have enough vision.'."

It has been pointed out that misunderstandings exist among some manufacturers and retailers regarding the true attitude of high government officials, and that in some cases these misunderstandings have been fostered by minor officials or field men. Broadcasters are urged to clear up these erroneous notions wherever they are found to exist.

AFA CONVENTION JUNE 21-24

Radio will present its case before delegates to the annual convention of the Advertising Federation of America, to be held at

Hotel Commodore, New York City, June 21-24. The radio meeting will be held Wednesday morning, June 24, from 9:30 A.M. until noon, and will conform to the general wartime theme of the convention.

Under the auspices of the NAB Department of Broadcasting Advertising, three talks on radio will comprise the program. Speakers will be Samuel R. Rosenbaum, president of WFIL, speaking on "Radio's Greatest Challenge;" John M. Outler, commercial manager, WSB, on "Radio as an Advertising Medium in Wartime," and Lieut. Col. Edward M. Kirby, chief of the War Department's radio branch, on "Radio Goes to War."

Attending from the NAB staff will be Arthur C. Stringer and Frank E. Pellegrin, who also will have charge of a radio exhibit at the convention's Advertising Exposition.

Complimentary tickets to the Exposition are enclosed with this issue of REPORTS, and all NAB members are cordially invited to attend and to bring their clients and friends. Additional complimentary tickets may be obtained by writing the NAB.

OUTLER APPOINTMENT

Appointment of John M. Outler, Jr., commercial manager of WSB, Atlanta, Ga., as chairman of the Sales Managers Executive Committee of the National Association of Broadcasters, was announced today by NAB President Neville Miller.

Outler served last year as a member of the committee, representing large stations. As chairman he succeeds Eugene Carr, now with the Office of Censorship in Washington.

A 49-year-old native of Georgia, Outler was graduated from Emory University in 1914, and served in the army from 1917 to 1919, including 16 months with the A. E. F. as First Lieutenant in the Field Artillery.

He began his advertising career in 1914 as an ad solicitor for the Augusta Herald, and joined the Atlanta Journal in 1915. After the war he returned to that paper as automobile editor from 1919 to 1926 and manager of the rotogravure advertising department from 1926 to 1931.

In 1931 he joined WSB as commercial manager and has held that position since. He is married, has two girls and a boy, and is a member of the Atlanta Advertising Club, the Atlanta Athletic Club and the Executives' Association of Atlanta.

Long active in NAB sales managers affairs, Outler was a member of the original steering committee in 1936 which set up the plans for the sales managers division of the NAB, which has since become the Department of Broadcast Advertising, headed by Frank E. Pellegrin. Besides serving on the executive committee last year, Outler also, for the past two years, was sales managers chairman of the Fifth District, comprising Alabama, Georgia and Florida. He is also widely known in the industry as a forceful speaker on sales topics and as a humorist and raconteur.

Appointment of other members of the committee will be announced as soon as acceptances are received, Mr. Miller said.

CBS Revises Rates

The Columbia Broadcasting System on June 8 released the announcement of revision of discounts applying to their current rate card. These revisions will be effective July 15, 1942, on all new contracts, and effective July 15, 1943, or any time prior thereto on existing contracts. Two changes mark this discount revision. The first is a reduction in their weekly "station hour" discounts. The new schedule is as follows:

Less than 25 station-hours per week............	Net
25 or more but less than 45 station-hours per week	2½%
45 or more but less than 70 station-hours per week	5 %
70 or more station-hours per week	7½%
Annual discount	12½%

The second revision is completely new, granting a 15% discount to all users of the full network of 115 CBS stations.

In addition to the above, CBS notes in its announcement that it has acceded to the requests of the 4 A's and the ANA in the matter of cash discount by considering the first 2% of each discount as a cash discount and labelled only as such.

By this revision, CBS is offering incentive to the full network user purchasing maximum time. The implications are important to the industry, and it is suggested that stations study the four-page announcement.

WPB ELECTRIC POWER CURTAILMENT ORDER EXPLAINED

Early in May the Power Branch of WPB issued an order (Limitation Order L-94), titled "To provide for the Curtailment of Electric Power in the United States." In listing the power consumers exempt from the mandatory curtailment provisions of the order, radio communication (not including commercial broadcasting) was listed.

Inquiry was immediately made by NAB to ascertain the source of this order and the significance thereof, and a protest against the non-inclusion of commercial radio broadcasting as an exempt industry was filed. The following communication from Mr. J. A. Krug, Chief, Power Branch of WPB, will serve to clarify the matter:

"This is in response to your letter of May 9 protesting in behalf of the National Association of Broadcasters, against the non-inclusion of commercial radio broadcasting in the exempt uses listed in Exhibit 'B' of Limitation Order L-94.

"It is the purpose of Limitation Order L-94 to effectuate emergency curtailments of non-essential uses of electric power so that deliveries of power to vital war industries will not be interrupted. It is our intention that the administration of Order L-94 shall interfere as little as possible with essential activities. The curtailment provisions of the Order will not be put into effect until all other means for meeting the war demand for power have been exhausted. At the time that a particular area is declared to be a power shortage area, users of power in the area will be examined for the purpose of ascertaining whether or not it is essential that their uses of power continue uninterrupted.

"The Order does not contemplate that power deliveries to non-exempt consumers will be completely eliminated during shortages. In cases of capacity shortage, curtailment of non-exempt consumers may be limited to a reduction in demand during hours of system peak. In areas in which an energy shortage is found to exist, total consumption will probably be reduced by a certain percentage, which could ordinarily be achieved by decreasing the hours of radio station operation.

"Your letter points out that traffic control and signal systems are included within the exempt category in Limitation Order L-94. This is because such systems are vital to the continuance of essential civilian activities. To the extent that radio broadcasting forms an integral part of the war effort or essential civilian activities, our regional curtailment schedules will permit continued deliveries of power to radio stations. Where, however, the broadcasting is of a non-essential nature, there seems no less reason to curtail such broadcasting than to curtail the activities of other information and advertising media. When curtailment appears necessary in any particular area we would expect to consult with the War Production Board Communications Branch and other agencies concerned with radio as well as with the stations themselves as to any special problems which should be taken into account with regard to broadcasting in the affected section.

"Complete public cooperation is necessary to assure the success of any curtailment program and the radio industry can be of the greatest usefulness in gaining popular support for power conservation programs in shortage areas. We trust that we will be able to count on the assistance of broadcasters in helping to make the maximum supply of power available for the use of war producers."

UTAH

Estimated Radio Homes, 1940

Number of Occupied Dwelling Units as reported by U. S. Bureau of the Census in advance release, Series H-7. Percent radio-equipped calculated from Series H-7 Bulletin following the Census Bureau practice. Number of radio units, or radio homes, estimated by applying percent ownership to those units not answering radio question and adding such to those reporting radio.

NAB Research Department

June 3, 1942

RUBBER SHORTAGE

Four leading war agency officials recently joined in a statement designed to clarify the facts about the severe rubber shortage.

Issued because many confusing and conflicting stories have been circulated about rubber, the statement points out that the shortage is extremely serious, reports to the contrary notwithstanding, and that no rubber of any kind can be spared for purposes not directly connected with the war effort.

Donald M. Nelson, chairman of the War Production Board; Arthur B. Newhall, Rubber Coordinator; Joseph B. Eastman, director of the Office of Defense Transportation, and Leon Henderson, Administrator of the Office of Price Administration and director of the WPB division of Civilian Supply, all joined in the statement, which follows:

There has been a great deal of confusion about the rubber situation, much of it caused by optimistic stories about the availability of synthetic rubber at an early date, or the large amount of scrap rubber which can be re-processed.

But there is little real basis for such optimism. Our rubber shortage is one of the worst materials shortages we face. We can spare no rubber of any kind for non-essential uses. Statements to the contrary are misleading, and do the country a great disservice, for the facts as we see them are grim, and we need one hundred per cent cooperation in conservation measures by the general public and by industry.

Before Pearl Harbor, it appeared that this country had an adequate supply of rubber, in the light of the situation as it then existed. We had stockpiled substantial tonnages in anticipation of interruption in shipments from the Far East, and steps had already been taken to regulate civilian consumption.

Events following Pearl Harbor, however, created a wholly new series of problems. The President announced a new military program on January 6. This very greatly increased our military requirements for rubber. Then, our major sources of rubber supply were lost. In addition, our Allies were forced to look to the United States as a source of military rubber.

Thus, despite precautionary steps taken in 1941, it has become necessary to develop a rationing program for rubber which eliminates all but the most necessary uses.

War Production Board figures show three facts:

1—We cannot spare any rubber to make new tires for ordinary passenger cars; the tires we do have must be strictly rationed to essential uses.

2—All the synthetic rubber we get must go to the war effort.

3—The most optimistic estimates for this year and next indicate no rubber for anything but the most essential uses.

Actually, the rubber shortage is far worse than most people seem to realize; the enemy controls 90 per cent of the world's rubber-producing areas, and every ounce of our stockpile is needed desperately for the armed forces.

Worst of all, the optimistic stories may keep us from recognizing what we are up against until too late. Our biggest stockpile of rubber is on our cars; these tires must be preserved. Autos shelved for the duration for lack of tires put more burden on already overcrowded buses and trolleys.

Every citizen can and must adopt a five-point conservation program:

1. Stop driving your car except when necessary; make it last.
2. Drive under 40 miles an hour.
3. Shift tires from wheel to wheel and inflate them properly.
4. If you drive to work, drive your friends and neighbors; car-pooling is essential.
5. Remember that rubber is precious; save it; every car is now a vital part of the nation's transportation system.

Needless driving today is unpatriotic. Deliberate waste of rubber helps the enemy. We call on Americans to ration themselves strictly.

Restrictions Relaxed

Restrictions on inventories in the radio and wire communications industries have been modified so that material for specific Army, Navy and other war projects may be stocked without interference with normal operating inventories.

This action was taken in interpretations of Preference Rating Order P-129.

Order P-129 makes an A-3 rating available to an operator or his supplier for deliveries of materials essential for maintenance, and repair and protection of service in connection with radio and wire communication operations.

P-129 prohibits operators from accepting deliveries of materials, whether rated or not, until the dollar value of their inventory has been reduced to a practicable working minimum interpreted as 27½ per cent of the dollar value of materials used by them for all purposes during 1940.

WPB's Communications Branch has found that these inventory restrictions have worked a hardship on some operators, who have been forced to acquire large inventories of material for specific projects authorized by the Director of Industry Operations. The restrictions have prevented these operators from acquiring normal inventory for current operations.

Inventory of material as defined in the interpretations does not include material intended for use in special projects authorized by WPB, or any equipment of an outmoded type reserved by an operator for re-use as a practical conservation measure to meet probable future operations.

At the same time, the interpretations state that operators must include in their inventories of material all items of salvaged material and supplies, whether held for re-use or for sale as junk. Such items must be counted in inventories until they have been physically incorporated into maintenance, repair operating construction or other projects.

(Editor's note: It is still necessary to use Form PD-1A for items that cannot be secured with the industry A-3 rating.)

SWAP PLAN WILL HELP

This interpretation suggests an extra incentive for participating in the swapping of materials. This was discussed last week in "Swap Bulletin" No. 1 mailed to all stations.

When stations take their inventory, which they must do before ordering materials, in order to avoid the possibility of running afoul of the law, they will probably find they are long on some items and short on others. The immediate job then is to get this stock in balance. Perhaps you can do this by sending in your "wanted" items and your "for sale" items. See "Swap Bulletin" of June 5 for details.

The second issue of the Swap Bulletin will be published just as soon as station engineers make known the items they have for sale and the items they want to buy. Insufficient time has elapsed for us to receive much copy. However, we did hear from two stations. While their wants are published in NAB Reports today, they will be republished in the "Swap Bulletin" later.

For Sale—Make Offer

For Sale by E. K. Cargill, president, WMAZ, Macon, Ga.

One Blaw-Knox self-supporting 244-foot Vertical Radiator complete with Insulators, etc. This tower will be available approximately Sept. 1 and purchaser must dismantle and remove from property. Tower outfitted with regulation 100-watt lamps at one-third and two-third level with 300 mm. flashing code beacon at top. This is a good buy for some licensee to complete his construction permit.

Wanted to Buy

Wanted to Buy by H. G. Cole, chief engineer, WSBT, South Bend, Ind.

Two 827R Radio tubes
Two 889R Radio tubes

GASOLINE RATIONING PLAN

"X" cards, providing for unrestricted purchases of gasoline, are eliminated in the new coupon plan for rationing gasoline which the Office of Price Administration will put into effect in the East Coast area next month, Price Administrator Henderson announced June 4. This plan will supplant the emergency plan now in operation. No motorist under the new plan will receive gasoline in excess of what he needs to carry on his work, except that all motorists will have a basic ration to provide for household and other necessary family driving.

Slips to Be Torn Out and Returned

Coupon books will take the place of the "meal ticket" type cards, Mr. Henderson said. In fact, the new plan will require coupons for all gasoline purchases. Coupons, issued to car owners in several types of books, will be torn out by the dealer when gasoline purchases are made. The dealer in turn must turn in these coupons when getting new stocks from his supplier. This "flow back" of coupons, it was explained, will provide an audit control of every gallon of gasoline distributed under rationing.

Under the new plan there will be 6 types of books for highway uses. The A book, containing 48 coupons, will provide the basic ration to which every passenger car owner is entitled. These 48 coupons will be good for 1 year. B and C books will provide supplementary rations for passenger cars for vocational, governmental, and war purposes in addition to that provided by the A book.

The D book will provide a basic ration for motorcycles, and "S-1" and "S-2" books will be issued to trucks, buses, and similar vehicles.

Extra Forms for Extra Gas

OPA announced that only A and D books will be issued at the time of registration. The dates and places for registration will be announced later. Upon filling out a simple form and presenting his registration card, any automobile owner may receive the basic ration book.

To obtain additional rations, through either a B or a C book, the car owner must fill out a much more detailed application and present it to a local rationing board for action. The application forms for these higher rating books will be available at the registration place.

In order to satisfy a local board that he should have a supplementary book of coupons, a car owner will have to prove that an A book will not provide him with enough gasoline to carry on his occupation or other work. On his application he will have to prove (1) that he has formed a club of four members who plan to "double up" or rotate use of their cars, or (2) that alternative means of transportation are inadequate. He will also have to establish the minimum amount of driving that he must do.

Books to Be "Tailored" to Need

All B books will contain 16 coupons, which must last persons to whom they are issued a minimum of 3 months, according to the mileage need he has proved. If the B book will meet the needs of the user for a period longer than 3 months, the board will "tailor" the book by fixing an expiration date which will allow the exact mileage required. The expiration date will be determined by the local board, and the date will be stamped on the book cover at time it is issued. It will be impossible, save in exceptional cases, for the holder to receive another B card before that expiration date.

C books, containing a maximum of 96 coupons, will be issued to drivers who prove that neither an A book, nor an A book plus a B book, will supply them with sufficient gasoline to carry on work related to the war effort or to the maintenance of essential public or civilian services. Such drivers will receive gasoline only for driving in connection with specified work or services of this type. Among the services for which such rations will be issued are medical care, maintenance of public utilities, carrying farm labor, giving religious comfort or assistance, and making official trips on Government business.

Only journeys authorized by any Federal, State, local, or foreign government for their employees or officials will be considered official trips.

Each C book, it was explained, will be tailored to fit the needs of the person receiving it. While all C books will contain 96 coupons, coupons will be removed to provide the exact mileage required.

S books will be issued for trucks, buses, and taxis, and will provide sufficient gasoline for the needs of such vehicles for a 4-month period.

OPA emphasized that while all applicants for rations for trucks, buses and similar vehicles must show how much gasoline they will need, there is no intention at the present time to curtail the operations of such vehicles except as the Office of Defense Transportation may provide in its rules and regulations.

In addition to the various coupon books for highway users, there will be E and R books for nonhighway users, including boats.

ENEMY PATENTS SEIZED

An additional 600 enemy owned patents have been taken over by Leo T. Crowley, Alien Property Custodian. With the exception of five patents of Hungarian origin, all were formerly the property of German corporations.

Among the patents seized were included more than 200 owned Telefunken relating primarily to radio and television equipment.

FEDERAL COMMUNICATIONS COMMISSION

REGISTRATION OF RADIO TRANSMITTERS NOT LICENSED

The FCC has ordered every one in possession of a radio transmitter, who does not hold a radio station license for its operation, to apply for registration not later than June 28, 1942.

Previously, the Defense Communications Board had issued an order in which it determined that the national security and defense and the successful conduct of the war demand that the Government have knowledge of all persons who possess apparatus equipped for the transmission of radio frequency energy.

By its requirement that all unlicensed radio transmitters be registered, the FCC has taken the necessary steps to ascertain the exact locations and amounts of all equipment of this kind in the country. Consequently, the Government will be in a position to take measures to prevent use of the equipment by enemy interests, and to determine its availability for our own war needs.

The Commission requires that a separate application must be made for each transmitter and that each application must be sent to the Secretary of the Commission in Washington, D. C. Application forms will be supplied by the Commission in Washington or by any of the Commission's thirty field offices throughout the country.

924 STATIONS

During the month of May, 1942, the Federal Communications Commission issued operating licenses to seven stations. No permits were granted for the construction of new stations. A comparative table by month follows:

	June 1	July 1	Aug. 1	Sept. 1	Oct. 1	Nov. 1	Dec. 1	Jan. 1	Feb. 1	Mar. 1	Apr. 1	May 1	June 1

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, June 15. They are subject to change.

Monday, June 15

NEW—Dyke Collum & Harry R. England, a copartners, d/b as Radio Company of Annapolis, Annapolis, Md.—C. P., **1040 kc.,** 250 watts, limited time.

Further Hearing

NEW—Camden Broadcasting Company, Camden, N. J.—C. P., **800 kc.,** 500 watts, daytime.

Tuesday, June 16

NEW—Minor E. Bragg & Robert C. Lipscomb, d/b as Murfreesboro Broadcasting Co., Murfreesboro, Tenn.—C. P., **1450 kc.,** 250 watts, unlimited.

Wednesday, June 17

Further Hearing

NEW—Portsmouth Radio Corporation, Portsmouth, Va.—C. P., **1490 kc.,** 250 watts, unlimited.

Thursday, June 18

Further Consolidated Hearing

NEW—Herald Publishing Company, Klamath Falls, Oregon—C. P., **1400 kc.,** 250 watts, unlimited.

NEW—Dorman Schaeffer, Klamath Falls, Oregon—C. P., **1400 kc.,** 250 watts, unlimited.

Friday, June 19

WROL—S. E. Adcock, d/b as Stuart Broadcasting Company, Knoxville, Tenn.—C. P., **620 kc.,** 1 KW, unlimited, DA-night.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WWDC—Stanley H. Horner, Edwin M. Spence and Dyke Collum (Transferors); Joseph Katz, G. Bennett Larson and Charles M. Harrison (Transferees); Capital Broadcasting Co. (Licensee), Washington, D. C.—Granted consent to transfer control (B1-TC-302) of Capital Broadcasting Company, licensee of broadcast station WWDC, from Stanley H. Horner, Dyke Collum and Edwin M. Spence to Joseph Katz, G. Bennett Larson and Charles M. Harrison, for a consideration of $110,000.

KEVR—Evergreen Broadcasting Corp., Seattle, Wash.—Granted license (B5-L-1646) to cover Special Service authorization which authorized operation on **1090 kc.**, 250 watts, unlimited time at present site, using equipment authorized under (B5-P-2023). This authorization is granted upon definite assurance heretofore given that licensee will apply for authority to increase station's power to 5 KW as soon as practicable to do so; and licensee should surrender its present license to operate on **1400 kc.**

KBWD—Brown County Broadcasting Co., Brownwood, Texas—Granted modification of license (B3-ML-1123) for increase in power from 500 watts unlimited time, to 500 watts night, 1 KW local sunset, unlimited time.

WSNY—Western Gateway Broadcasting Corp., Schenectady, N. Y.—Granted modification (B1-MP-1548) of construction permit (B1-P-2690) to move transmitter, approval of studio site, change in type of transmitter proposed, change in antenna system and extension of commencement and completion dates.

WEGO—Wayne M. Nelson, Concord, N. C.—Granted modification (B3-MP-1516) of construction permit (B3-P-3007) requesting approval of transmitter and studio location, approval of antenna system and authority to install new frequency monitor, providing applicant submit proof of performance showing a minimum effective field of 175 mv/m for antenna system.

Balaban & Katz Corp., Chicago, Ill.—Granted construction permit (B4-PCT-14) for new commercial television broadcast station to operate on Channel No. 3 **(66,000-72,000 kc.)** ESR:796, with completion date of August 15, 1942.

WGKV—William A. Carroll (Transferor), Kanawha Valley Broadcasting Co. (Licensee), Worth Kramer (Transferee), Charleston, W. Va.—Granted consent to transfer or control (B2-TC-298) of Kanawha Valley Broadcasting Company, station WGKV, from William A. Carroll to Worth Kramer, for a consideration of $10,500, representing transfer of 128 shares of outstanding capital stock.

WEVD—Debs Memorial Fund, New York City.—Granted petition of WEVD for grant of application for construction permit to move the former main transmitter from the station's old location in Brooklyn to its new location in New York City, for use as an auxiliary transmitter.

WPRP—Julio M. Conesa, Ponce, Puerto Rico.—Granted petition of applicant to take his testimony by deposition in re application for construction permit, for modification of construction permit and renewal of license of WPRP; also authorized the taking of depositions, on behalf of the Commission, of the present and the former Inspectors of the Commission at San Juan, as well as other witnesses in that city and in Ponce.

Portsmouth Radio Corporation, Portsmouth, Va.—Granted petition for grant of application for construction permit (B2-P-3097) for a new station to operate on **1490 kc.**, 250 watts, unlimited time, and cancelled hearing now scheduled for June 17, 1942.

HEARING DESIGNATED

WJAX—City of Jacksonville, Jacksonville, Fla.—Designated for hearing application for construction permit (B3-P-3012) to increase nighttime power to 5 kilowatts and install directional antenna for nighttime use.

LICENSE RENEWALS

The following stations were granted renewal of licenses for the period ending October 1, 1942:

WHLD, Niagara Falls, N. Y.; KGVO, Missoula, Mont.; KFOX, Long Beach, Calif.; KGGM, Albuquerque, N. Mex.; KGLO, Mason City, Iowa; WATR, Waterbury, Conn.; WFVA, Fredericksburg, Va.; WOOD, Grand Rapids, Mich.; WORK, York, Pa.

WMAL—The Evening Star Broadcasting Co., Washington, D. C.—Granted renewal of license for the period ending June 1, 1944.

WMFJ—W. Wright Esch, Daytona Beach, Fla.—Granted renewal of license for the period ending October 1, 1943.

The following stations were granted renewal of licenses for the period ending August 1, 1944:

KMBC and auxiliary, Kansas City, Mo.; WAAT auxiliary, Jersey City, N. J.; WAPO auxiliary, Chattanooga, Tenn.; WBRC, Birmingham, Ala.; WDAY, Fargo, N. Dak.; WKPA, New Kensington, Pa.; WSBT and auxiliary, South Bend, Ind.

MISCELLANEOUS

KFEQ—KFEQ, Inc., St. Joseph, Mo.—Granted modification (B4-MP-1573) of construction permit which authorized increase in power, etc. (B4-P-2477), for extension of completion date to July 30, 1942.

WJAS—Pittsburgh Radio Supply House, Pittsburgh, Pa.—Granted modification (B2-MP-1566) of construction permit, which authorized increase in power and installation of directional antenna for night use, for extension of completion date to September 27, 1942.

WMAZ—Southeastern Broadcasting Co., Inc., Macon, Ga.—Granted modification (B3-MP-1572) of construction permit (B3-P-3043) for extension of completion date to October 6, 1942.

WNRB—The National Life and Accident Insurance Co., Nashville, Tenn.—Granted license to cover construction permit (B3-PRE-422) for new relay broadcast station to be used with applicant's standard station WSM; frequencies: **156750, 158400, 159300, 161100 kc.;** 40 watts (B3-LRE-381).

W9XPR—Balaban & Katz Corp., Chicago, Ill.—Granted modification (B4-MPVD) of construction permit (B4-PVB-79) authorizing experimental television broadcast station, for extension of completion date to 90 days from May 25.

W9XBB—Balaban & Katz Corp., Chicago, Ill., Area of Chicago—Granted modification (B4-MPVB-78) of construction permit (B4-PVB-78), authorizing new experimental television broadcast station, for extension of completion date to 90 days from May 25.

WHIP—George F. Courrier (Transferor), John W. Clarke (Transferee), Hammond-Calumet Broadcasting Corp., Hammond, Ind.—Designated for hearing applications for consent to transfer control of Hammond-Calumet Broadcasting Corporation, licensee of station WHIP, from George F. Courrier to John W. Clarke (B4-TC-303).

WJWA—Birney Imes, Portable-Mobile, Area of Columbus, Miss.—Granted license (B3-LRY-263) to cover construction permit (B3-PRY-258) which authorized a new relay broadcast station to be used with applicant's standard station WCBI; frequencies **1622, 2058, 2150, 2790 kc.**, 50 watts.

WMWB—Port Huron Broadcasting Co., Portable-Mobile, Area of Port Huron, Mich.—Granted license (B2-LRY-265) to cover construction permit (B2-PRY-255) which authorized a new relay broadcast station to be used with applicant's standard station WHLS; frequencies **1622, 2058, 2150, 2790 kc.**, 15 watts.

KBSF—The Associated Broadcasters, Inc., Portable-Mobile, Area of San Francisco.—Granted license (B5-LRY-266) to cover construction permit (B5-PRY-267) authorizing a new relay broadcast station to be used with applicant's standard station KSFO; frequencies **1622, 2058, 2150, 2790 kc.**, 50 watts.

KXA—American Radio Telephone Co., Seattle, Wash.—Granted authority to determine operating power by direct measurement of antenna power (B5-Z-1402).

WNBF—Wylie B. Jones Advertising Co., Binghamton, N. Y.—Granted modification (B1-MP-1551) of construction permit (B1-P-3185) for extension of completion date to August 3, 1942.

WHIP—Hammond-Calumet Broadcasting Corp., Hammond, Ind.—

Granted modification (B4-MP-1576) of construction permit (B4-P-2599 which authorized change in hours of operation and changes in directional antenna system) for extension of completion date to July 30, 1942, subject to condition that objectionable interference will not be caused to station TGW, Guatemala City.

KALB—Alexandria Broadcasting Co., Inc., Alexandria, La.—Granted motion for continuance of hearing on construction permit now scheduled for June 4, and continued same to July 8.

KLRA—Arkansas Broadcasting Co., Little Rock, Ark.—Granted special service authorization to use frequency, power and transmitter authorized under construction permit (B3-P-3049) as modified (**1010 kc.**, 5 KW night, 10 KW, local sunset, DA-N, unlimited time) at present transmitter site north of Little Rock, with modified present directional antenna. This special service authorization is granted upon the express condition that it may be terminated by the Commission at any time without advance notice or hearing if in its discretion the need for such action arises. Nothing contained herein shall be construed as a finding by the Commission that the authority herein granted is or will be in the public interest beyond the express terms hereof.

WDOD—WDOD Broadcasting Corp., Chattanooga, Tenn.—Granted modification (B3-MP-1583) of construction permit (B3-P-2641, which authorized increase in power, move of transmitter and installation of DA for night use) for change in type of transmitter.

WKPT—Kingsport Broadcasting Co., Inc., Kingsport, Tenn.—Denied petition requesting that application for construction permit to operate on **790 kc.**, 1 KW, unlimited time, directional antenna night, be granted.

Kennebec Broadcasting Co., Augusta, Maine.—Granted petition to dismiss without prejudice application for new station (B1-P-3274).

WCAU—WCAU Broadcasting Co., Philadelphia, Pa.—Granted petition for intervention in the hearing on applications of WGAR, Cleveland, WHBC, Canton and WADC, Tallmadge, Ohio.

Butler Broadcasting Corp., Hamilton, Ohio.—Granted in part request for additional time to file petition pursuant to Memo. Opinion of April 27; extended time to June 24.

Butler Radio, Inc., Tyler, Texas.—Granted petition to dismiss without prejudice application for new station (B3-P-2896).

APPLICATIONS FILED AT FCC

550 Kilocycles

KOAC—Oregon State Agricultural College, Ore.—Modification of construction permit (B5-P-2422, as modified, which authorized new transmitter, installation of directional antenna, increase in power, and move of transmitter) for extension of completion date from 6-1-42 to 7-1-42.

NEW—Bob Jones College, Inc., Cleveland, Tenn.—Construction permit for a new station to be operated on **550 kc.**, 1 KW night, 5 KW day, unlimited time, directional antenna night. Amended: to make changes in directional antenna for night use, and change transmitter location from County Farm Road, Route No. 2, Cleveland, Tenn., to Route 11-64, Cleveland, Tenn.

560 Kilocycles

KFDM—Beaumont Broadcasting Corp., Beaumont, Texas.—Construction permit to install new transmitter, directional antenna for day and night use, increase power from 1 to 5 KW and move transmitter. Amended: to change type of transmitter, changes in directional antenna for night use only and change proposed transmitter location.

570 Kilocycles

WKBN—WKBN Broadcasting Corp., Youngstown, Ohio.—Modification of construction permit (B2-P-2547, as modified, which authorized new transmitter, increase in power, installation of directional antenna for night use, and change in hours of operation) for extension of completion date from 6-30-42 to 12-31-42.

640 Kilocycles

WHKC—United Broadcasting Co., Columbus, Ohio.—License to cover construction permit (B2-P-3255) for a new vertical antenna system and move of transmitter.

WHKC—United Broadcasting Co., Columbus, Ohio.—Authority to determine operating power by direct measurement.

940 Kilocycles

KTKC—J. E. Richmond, Percy W. Whiteside, Homer W. Wood and Visalia Publishing Co., d/b as Tulare-Kings Counties Radio Associates, Visalia, Calif.—License to cover construction permit (B5-P-3159) as modified to change frequency, increase power, install new transmitter and changes in directional antenna for day and night use and move transmitter.

KTKC—J. E. Richmond, Percy W. Whiteside, Homer W. Wood and Visalia Publishing Co., d/b as Tulare-Kings Counties Radio Associates, Visalia, Calif.—Authority to determine operating power by direct measurement.

1070 Kilocycles

WIBC—Indiana Broadcasting Corp., Indianapolis, Ind.—Construction permit to increase power from 1 KW night, 5 KW day to 5 KW night, 10 KW day, make changes in directional antenna for night use, and changes in transmitting equipment. Amended: to omit request for increase in day power and changes in transmitting equipment.

1130 Kilocycles

KGDM—E. F. Peffer, Stockton, Calif.—Modification of construction permit (B5-P-3199) for change in frequency, hours, increase in power, directional antenna for night use and new transmitter, requesting change in type of transmitter.

1230 Kilocycles

KXO—Valradio, Inc., El Centro, Calif.—Construction permit to change frequency from **1490** to **1230 kc.**, increase in power from 100 to 250 watts, install new transmitter and antenna system and move studio and transmitter. Amended: to request modification of license instead of construction permit by omitting request for increase in power, new transmitter and move of studio and transmitter.

NEW—Raymond C. Hammett, Talladega, Ala.—Construction permit for a new broadcast station to be operated on **1230 kc.**, 250 watts, unlimited time. Amended: re changes in antenna.

WJOB—O. E. Richardson, Fred L. Adair and Robert C. Adair, d/b as Radio Station WJOB, Hammond, Ind.—Construction permit to increase power from 100 to 250 watts and make changes in transmitter. Amended: re change in type of transmitter.

1250 Kilocycles

WREN—The WREN Broadcasting Co., Lawrence, Kans.—Authority to determine operating power by direct measurement.

1260 Kilocycles

KYA—Hearst Radio, Inc., San Francisco, Calif.—Assignment of license from Hearst Radio, Inc. to Palo Alto Radio Station, Inc.

KYA—Palo Alto Radio Station, Inc., Palo Alto, Calif.—Modification of license to move studio from San Francisco to Palo Alto, California.

1310 Kilocycles

WDOD—WDOD Broadcasting Corp., Chattanooga, Tenn.—Modification of construction permit (B3-P-2641) as modified for increase in power, move transmitter and install directional antenna for night use, requesting change in type of transmitter.

1490 Kilocycles

WWSW—Walker & Downing Radio Corp., Pittsburgh, Pa.—License to cover construction permit (B2-P-3410) for changes in auxiliary transmitting equipment.

FM APPLICATIONS

W73I—Associated Broadcasters, Indianapolis, Ind.—Modification of construction permit (B4-PH-122, which authorized a new high frequency broadcast station) for approval of transmitter location at 445 N. Pennsylvania St., Indianapolis, Ind., and approval antenna system.

W55M—The Journal Company (The Milwaukee Journal), Milwaukee, Wis.—Modification of construction permit (B4-PH-6, as modified, which authorized a new high frequency broadcast station) for change in type of transmitter only.

W55M—The Journal Company (The Milwaukee Journal), Milwaukee, Wis.—License to cover construction permit (B4-PH-6) as modified for a new high frequency broadcast station. Amended change in type of transmitter.

W65PH—Seaboard Radio Broadcasting Corp., Philadelphia, Pa.—Modification of construction permit (B2-PH-81) as modified for a new high frequency broadcast station, requesting change in transmitter location and studio, change type of transmitter and antenna system, decrease coverage from 9,300 to 5,465 square miles on a temporary basis and change population from 3,900,000 to 3,399,000.

W71NY—Bamberger Broadcasting Service, Inc., New York, N. Y.—Modification of construction permit (B1-PH-46) as modified for a new high frequency broadcast station, requesting decrease in coverage from 8,500 to 5,730 square miles, changes in antenna system and change in population from 11,900,000 to 10,943,000.

W55NY—William G. H. Finch, New York, N. Y.—Modification of construction permit (B1-PH-42) as modified for a new high frequency broadcast station, requesting extension of commencement and completion dates from 4-10-42 and 6-24-42 to 6-24-42 and 12-24-42, respectively.

W75NY—Metropolitan Television, Inc., New York, N. Y.—Modification of construction permit (P1-PH-52) as modified for a new high frequency broadcast station, requesting extension of completion date from 6-30-42 to 12-30-42.

W49PH—Pennsylvania Broadcasting Co., Philadelphia, Pa.—Modification of construction permit (B2-PH-69) as modified for a new high frequency broadcast station, requesting extension of completion date from 7-22-42 to 7-22-43.

W39B—The Yankee Network, Inc., Boston, Mass.—License to cover construction permit (B1-PH-13) as modified, for a new high frequency broadcast station.

TELEVISION APPLICATION

W2XMT—The Yankee Network, Inc., Boston, Mass.—Modification of construction permit (B1-PVB-40) as modified for a new television broadcast station, requesting extension of commencement and completion dates from 1-1-42 and 7-1-42 to 7-1-42 and 1-1-43, respectively.

MISCELLANEOUS APPLICATIONS

WIUC—University of Illinois, Urbana, Ill.—Modification of construction permit (B4-PED-21, as modified, which authorized new non-commercial educational broadcast station) for change in transmitter location from South of Champaign, Ill. to 1010 S. Wright St., Urbana, Ill., changes in antenna system, and extension of commencement and completion dates from 9-16-41 and 7-16-42 to 10 days after grant and 60 days thereafter, respectively.

KEHB—Topeka Broadcasting Assn., Inc., Mobile—License to cover construction permit (B4-PRE-408) for changes in equipment and increase in power.

WJSM—United Broadcasting Co., Cleveland, Ohio—License to cover construction permit (B2-PRE-420) for a new relay broadcast station.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

J. & J. Candy Company—A complaint has been issued charging Vinton T. James and George E. James, trading as J. & J. Candy Co., 1507 West Trade St., Charlotte, N. C., with the use of lottery schemes in connection with the sale of candy to ultimate purchasers. (4769)

William R. Warner & Co., Inc., 113 West 18th St., New York, in a complaint is charged with false advertisement of "Agarol," a medicinal preparation. (4770)

STIPULATIONS

During the past week the Commission announced the following stipulations:

Babson Bros. Co., 2845 West 19th St., Chicago, have entered a stipulation to cease representing in the sale of "Surge Fencers" for confining livestock, that the "Surge Hi-Line Fencer" is the only safe electric fence controller; that the mercury switch in the respondent's controller permits an accuracy of timing not approached by any other kind of timing or impulse measuring device; and that there are no competitive alternating-current type electric fence controllers which comply with the Wisconsin Code for electric fence controllers and which are satisfactory. (02989)

Chippewa Springs Corp., 177 Colfax Ave., North, Minneapolis, Vince B. Nyhan, trading as Chippewa Spring Water Company of Chicago, 1318 South Canal St., Chicago, and Hutchinson Advertising Co., 1000 Hodgson Building, Minneapolis, stipulated to cease certain representations in the sale of "Chippewa Natural Spring Water." (02987)

Rex Remedy Co., 315 South Morgan St., Shelby, N. C., has entered into a stipulation to cease certain representations in the sale of "Rex-Lex," advertised as a headache remedy. According to the stipulation, the preparation contains acetanilid and potassium bromide. (02990)

Joseph Triner Corp., 1333 South Ashland Ave., Chicago, stipulated to cease representing that "Triner's Bitter Wine" will clean the stomach, prevent colds, and relieve insomnia, headaches, irritability or nerve disease; and that "Triner's Wine Tonic" will clear the system of accumulated poisons, restore appetite and digestions, assure sleep and maintain good health. The respondent also agrees to cease representing by use of the word "Tonic" in the designation of "Triner's Wine Tonic" that the preparation is a general tonic. (02988)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Gibson-Thomsen Co., Inc., New York, tooth brush manufacturer, and S. H. Kress & Co., chain store owners, with headquarters in New York, have been ordered to cease misrepresentations in the sale of tooth brushes. (3714)

Houston's Mineral Well, Newmarket, Tenn., has been ordered to cease misrepresentations in the sale of "Houston's Mineral Water." (4567)

Radio Wire Television, Inc., 100 Sixth Ave., New York, distributor of radio receiving sets and accessories, has been ordered to cease and desist from representing that a radio receiving set designated as a "One-tube battery operated all-wave set" has the power or capacity to "tune in the world" or that that set or any other receiving set is capable of receiving broadcast programs in excess of its actual power and capacity for such reception. (4491)

Seamless Rubber Co., New Haven, Conn., manufacturer of electrical heating pads for use in treating disease, has been ordered to cease misrepresentations in the sale of its products. (4509)

Thomas Management Corp., the Paul A. Thomas Trust, and 6 individuals of Chicago, distributors of cosmetics and medicinal preparations for the treatment of the hair and scalp, through hair treatment offices operated in various cities from coast to coast, have been ordered to cease and desist from misrepresentations in the sale of their products. (4422)

NAB Reports
THE NATIONAL ASSOCIATION OF BROADCASTERS
1626 K STREET, N. W. WASHINGTON, D. C. Vol. 10, No. 24, June 19, 1942

A. F. OF M. SITUATION

So far, James C. Petrillo, president of the American Federation of Musicians, has not translated into action his threat to stop his members from making recordings for radio, juke-boxes, and public consumption in general after August 1.

If and when he does, the NAB will not be caught napping.

Sanders Bill Hearings

MR. FLY TESTIFIES

With the resumption of the hearings on the Sanders Bill Wednesday and Thursday, Chairman Fly was queried at length by numerous Representatives when he got down to the Sanders Bill itself, after having spent about an hour discussing the general activities of the Commission.

Chairman Fly objected to dividing the Commission into two divisions; to what he alleged was the proposed repeal of the Commission's authority to delegate routine functions, to the proposal requiring hearings on applications; to changing the Commission's intervention rule; to requirements of an intermediate report by an examiner; to the provision that filing a protest or petition for rehearing would operate to stay Commission action; to the language alleged to curtail the Commission's issue of special authorizations; and to amendment of the transfer section which he alleged would permit of management contracts.

We quote from the unrevised transcript of the testimony:

"Commissioner Fly. I should like to take up now these specific provisions. Now, the thing I have tried to do thus far, gentlemen, is to give you a picture of the work of the Commission. Perhaps I ought to explain that while the vast amount of Commission's work does not pertain to this broadcasting licensing end of the thing, we have had here the situation where the only support for this bill has come from two or three special interests in the broadcasting field.

"No one has come in here from these communications companies and has said, 'You are not giving the communications companies enough attention.'

"The only suggestion that we are not giving telephone and telegraph and cable enough attention has come from the broadcasters, who apparently want less attention, and I think it is of considerable significance to the bill to effect a basic reorganization of the Commission and in the main to accomplish the purported objectives of giving attention to the common carriers has not been supported by a single common carrier.

"Mr. McGranery. Is there anything in this bill that is designed to in any way interfere with the common carriers?

"Commissioner Fly. Pardon me.

"Mr. McGranery. Is this bill designed in any way to interfere with the common carriers?

"Commissioner Fly. I think that it may impede the work with the common carriers somewhat, sir. I will discuss that more in detail a bit later.

"Mr. McGranery. Right at that point, do you not think it might be fair to say that inasmuch as it does not affect them, that they have no interest in it?

"Commissioner Fly. Well, I think it comes with ill grace on the part of two or three broadcasting interests to make the point that that part of the service should be improved and that more attention should be given to it.

"Now, the thing that the broadcasters, those who have complained, or complaining about, is not too little attention. You know that, Mr. Congressman. They are complaining about too much attention.

"Mr. Sanders. Mr. Chairman.

"The Chairman. Mr. Sanders.

"Mr. Sanders. I might clarify that situation there, as author of the bill. With the exception of paragraph 7 of the bill, the balance of the bill was a recommendation of the Federal Communications Bar Association, which reached my desk, and I presume reached the desk of the other members of the committee.

"I was told by the members of the executive committee who discussed the matter with me that included in the Bar Association were members of the common carrier industry as well as the broadcasters.

"Now, the opinion of the witnesses who have appeared before the committee, of course, had been made known to the committee; but the recommendations of procedure and appeal largely, it seems to me, are technical matters that would come more to the attention of the attorneys involved than that of the lay witness.

"I merely mention that, because that was the genesis of this particular bill.

"Commissioner Fly. I think that I ought to make it clear, sir, that the Association is dominated by the broadcasters and the people who appeared here are primarily interested in broadcasting, and no communications company has appeared either directly or indirectly, in so far as I know.

"Mr. Chapman. Mr. Chairman.

"The Chairman. Mr. Chapman.

"Mr. Patrick. I want to ask Mr. Fly a question there.

"Mr. Chapman. Very well.

"Mr. Patrick. I do not understand him. As I understood, you said that the Bar Association is largely dominated by the people who are interested in broadcasting, and that that is the force, and particularly a certain special force in broadcasting, that has come forward here, and no representative of a communications company as distinguished from broadcasting, either directly or indirectly, or a representative of such company, has appeared here in support of the bill.

"Mr. Chapman. Mr. Fly, will you name those two or three special interests which you just referred to so they may go into the record?

"Commissioner Fly. Why, I should think perhaps the leader is Columbia Broadcasting System. I think that the bill also has the support of the National Broadcasting Company, and of the related organizations and the National Association of Broadcasters.

"Mr. McGranery. Mr. Chairman.

"The Chairman. Mr. McGranery.

"Mr. McGranery. There is nothing very feeble, Mr. Fly, about the telephone company or the Western Union. If they felt that this bill was designed to affect them in any way, I do not think they need either you or I to tell them to come in here and make a statement.

"Commissioner Fly. No, sir; but it ill behooves the broadcasters to put on a false front and come in here and make the statement on behalf of the communications companies. As you say, the telephone and telegraph companies are able to take care of themselves. I agree with you.

"Mr. McGranery. But, this has been spread around on all sides, as far as I can hear.

"Commissioner Fly. Now, to show the relative importance of this thing, since this subject has come up, you have got the Bell

SANDERS HEARINGS

(Continued from page 333)

System here in this field. There must be a plant valuation in that field running into the billions of dollars—about five billion dollars, as I understand it. Now, the entire plant investment in the broadcasting industry is not over 40 million. You can take the gold dust that is involved here, in the broadcasting industry, and blow it into the eye of the American Telephone and Telegraph Company, and it would never squint.

"Now, these fellows blow a big wind, and they make a big noise, but so far as their genuine importance in the field of regulation and in the field of communications is concerned, they do not compare.

"Mr. McGranery. You say 'these fellows come in and blow.' Who do you mean by 'these fellows'?

"Commissioner Fly. I have named them.

"Mr. McGranery. Well again, I mean, I would like to keep the record straight.

"Commissioner Fly. Well, you have seen them appear here. I do not know if I can name all of them that I would put in that classification, but certainly the three groups, who do blow the big wind, make the big noise and exert a strong political pressure are the Columbia Broadcasting System, the National Broadcasting Company, and the so-called National Association of Broadcasters.

"Mr. Kennedy. Mr. Chairman.

"The Chairman. Mr. Kennedy.

"Mr. Kennedy. Well, I take it from your statement, that you see no need for this bill whatsoever.

"Commissioner Fly. Well, I should rather give you a more orderly discussion of it, Mr. Kennedy. I will be glad to do that.

"Mr. Kennedy. I mean, you are so descriptive, and so emphatic a moment ago, that I do not know why you should require more than one word to sum it up, and is that 'no.'

"Commissioner Fly. I thought perhaps if the committee is going to take my word at all, they would want a rational explanation of what is in my mind. I do not know, though, whether you will take my word, but I doubt whether you would take it just on my say so, and if I cannot give you a logical line of reasoning here and convince you why, I still will not have succeeded with you.

"Mr. Kennedy. I know that the committee has unlimited time, but still I do think it would prefer a direct answer.

"Commissioner Fly. And, what is your question, sir?

"Mr. Kennedy. I think I asked you—at least I expressed the opinion after listening to your description of the proponents of this measure, that you can see no need for the proposed legislation.

"Commissioner Fly. I think there might be the need for some specific legislation; but not legislation that follows the basic philosophy of this legislation and this is bound to be a controversial piece of legislation. It has already consumed a vast amount of time of an agency that is devoting itself to war work, 24 hours a day, and not eight hours a day, and I do not think that this is the time to disrupt a war agency and put it through that sort of an extended controversy and affect the basic reorganization of the thing at this juncture.

"Mr. Chapman. Mr. Chairman.

"The Chairman. Mr. Chapman.

"Mr. Chapman. Mr. Fly, have you recommended, or do you intend to recommend, any remedial legislation?

"Commissioner Fly. I could, sir; but frankly, I think that apart from getting certain specific things like Major Bulwinkle suggested here the other day, that will enable us to do a better job on the war, the best thing to do is to leave this problem along, because whatever I suggest, these other gentlemen are not going to agree to, and I just do not think that the Congress and the agency ought to devote their time to that in a period of stress.

"I could make specific suggestions, if the committee were in a mood to go ahead with controversial legislation, and I would do that.

"Mr. Sanders. Mr. Chairman.

"The Chairman. Mr. Sanders.

"Mr. Sanders. Did I understand you to include the Mutual in the very edifying classification of the networks, or do you exclude them from that classification?

"Commissioner Fly. All of the big broadcasting companies, of course, make a big noise and blow the big wind.

"Now, I do not exclude any of the big broadcasting interests from that.

"Now, let me explain there: You all know how close broadcasting is to public opinion. Here we have, for the first time, the only practical mechanism for what has been to this point a more or less—I say more or less—theoretical right of free speech. But now we finally have gotten away to the employment of free speech and to exert an influence upon the local public opinion, and upon national opinion.

"Now, the man who has his hand around the throat of that transmitter and can control speeches across this country, can exert a mighty big influence, far beyond that of any other industry with a comparable investment or comparable physical operation.

"Now, as I understand the Mutual people did not support the bill, but in the main, it is not merely a theory of mine. It is an obvious fact that these people come in there and on special interest exert an influence far beyond their normal size, and they get that influence, gentlemen, from the grants which you and we give them; and I do not think you want them to come back and control the government through that grant of power.

"Mr. McGranery. Mr. Chairman.

"Mr. Sanders. Mr. Chairman, I have not finished.

"Mr. McGranery. Excuse me.

"Mr. Sanders. I gather then from your remarks—of course we all agree as to the power of the radio—but I gather from your remarks that your failure to include the Mutual in naming the broadcasting companies, when you were classifying them so illuminatingly a moment ago, was purely inadvertent and you would include them in the same classification?

"Commissioner Fly. No, sir; I include them in the same general description. Let us make that clear. All of the general description applies, in proportion to size. It applies just as much to Mutual as it does to the other networks. The reason why I did not name Mutual in support of this bill when Mr. McGranery asked me that question is because I understand that they have not supported the bill.

"Mr. Chapman. Mr. Chairman.

"The Chairman. Mr. Chapman.

"Mr. Chapman. Mr. Fly, you referred to these gentlemen—

"Commissioner Fly (continuing). I just want you to understand, gentlemen, that I have no brief for Mutual here. Mutual will disagree with me tomorrow, and they will be in here demanding a change in the law. That is the history of this industry. Every time one of these big broadcasters runs into something he does not like—this has been true up to this point—they run to Congress and start investigations, and what not. I spend half of my time before Congressional committees—not half, but a tremendous lot of my time, gentlemen.

"Mr. Chapman. Mr. Fly, you referred to the great power in the hands of these broadcasting companies through their ability to influence public opinion, and you referred to them as having their hands about the throat of this broadcasting. Do you not think also that a commission having control and virtually the power of life and death over these broadcasting companies, exerts a power and has a strangle hold far beyond any power that was ever intended to be granted here by Congress in creating the Commission?

"Commissioner Fly. If this Congress ever granted such a power to the Commission, I would say, 'yes,' and I think that sort of power over a mechanism of free speech, that sort of power would be just as vicious in the hands of the Government as it would be in the hands of two or three monopolists, and private industry. I draw no distinction there. I think you are entirely right.

"If this Commission ever endeavored to exercise those controls over the contents of what goes out over these various networks, then I think there would be strong grounds for complaint, and I think this committee ought to do something about it.

"Mr. Patrick. Mr. Chairman.

"The Chairman. Mr. Patrick.

"Mr. Patrick. I do not know just how far you intend to extend the meaning of your statement as to these broadcasting companies controlling public voice. That is—

"Commissioner Fly (interposing). I will develop that in some detail, sir.

"Mr. Patrick. My observation has been—I had the idea—I may be away behind the moving herd—but I had the idea that broadcasting companies have been most liberal in lending their services to the public interest; allowing public questions to be discussed. I just never have gotten the idea that the broadcasting companies —I am not speaking for any one of them—but as a whole, had been trying to subvert or change the course of speech in the Nation. I have felt that any matter of public opinion—you can hear any of them and they will be giving considerable time to public service and to matters of public interest, and to helping to get matters before the public now during this war. I have been impressed by how much service they have rendered in allowing all these matters, without any cost to anybody but them, to be brought to the people. Any man in any remote section of this country knows what Uncle Sam is calling upon him for; knows where volunteers are needed; knows things that are being brought forth.

"It seems to me their service has been so fine that we ought to forget that whenever we are going into things of this kind.

"Commissioner Fly. I think that is true, sir. I think on the whole that the broadcasting industry has done a very good job. I think they have done a good job in terms of bringing in the news; bringing it in from remote international points, for example, and in terms of delivering the news and the information—now, omitting entertainment and that sort of thing to the people. I think that they have entered into this war in the same spirit that all the rest of us have entered into it and that they have made great contributions to it, and I think that you will find the rarest of instances where any of the broadcasters have been other than generous in terms of giving those facilities for war purposes.

"Mr. Patrick. But, have they been trying to control public speech?

"Commissioner Fly. Well, it is—let me put it this way, sir. As the scheme is presently operated, they must control it. They do control it.

"Mr. Patrick. Of course they have to sell the time that they do sell. They have to sell enough time to exist and yet have control over their own commodity, sufficiently to be able to make it work, but other than that—I just do not want to get into the place where we are forgetful. They must have a method for living. All of us have to have that.

"Commissioner Fly. Yes, but you asked me about control and I say yes, the control is necessarily there, and the only issue we have on control comes down to the very simple point. Now, the control must be in the hands of the broadcasters and it cannot be elsewhere. You are entirely right on that. And, the only issue is whether all of the control shall be on strings pulled from New York, or whether there will be certain freedoms of control left to the individual station operators, who operate the 900 stations, and owners and operators throughout the country. Now, that is really the main problem.

"Mr. Simpson. Mr. Chairman.

"The Chairman. Mr. Simpson.

"Mr. Simpson. Mr. Fly, do you find a connection in your judgment between the opposition, apparent opposition to the Commission on the part of the broadcasters; do you find any connection between the issuance of certain regulations of the Commission in the past year and that opposition?

"Commissioner Fly. Oh, yes, I think their support here is motivated by the objections to those regulations and those regulations have been up before the committees of Congress on a number of occasions, and we have had very extensive hearings on them. The promoted investigations before the Senate Interstate Commerce Committee on that specific subject. We have had very extensive hearings on it before the Senate committee.

"Mr. Simpson. And those regulations, as I understand it, are not in effect today?

"Commissioner Fly. No, those regulations are not in effect today. They are in litigation. They are pending, after a recent decision, in which the Supreme Court held that that court had jurisdiction, they are pending now before a special Three Judge Court in New York, and I imagine will be adjudicated in the Supreme Court during the next term. So, so far as that problem is concerned, and as I say, that is the thing that has brought those people here, now, so far as that problem is concerned, as to whether or not it is within the scope of the law; whether or not they are outside the bounds of reason and ration, and that sort of thing, will be finally decided in the course of months by the courts.

"Mr. Simpson. I have concluded, perhaps erroneously, that you are pretty much of the opinion that this legislation should not be considered today, and in general, that the status quo should be continued for the duration.

"It occurs to me, and I merely observe, that perhaps the withdrawing of those regulations will lessen considerably the agitation for legislation which I recognize might not be desirable at this time.

"Commissioner Fly. That would lessen half of the agitation—that is perhaps the biggest cause for the agitation. But I believe, perhaps, a simpler and a more wholesome method of settling it would be if those two networks were to set down and write a one-paragraph letter to their affiliated stations stating that their affiliation contracts are to be construed in accordance with the rules and regulations of the Commission, and that would settle the whole business. It would take about one minute to get that letter off.

"Mr. Simpson. Of course, that is giving you the whole cake and not oppose the regulations.

"Commissioner Fly. I understand that you are suggesting that we throw the cake the other way. I want to make it plain——

"Mr. Simpson. I understand, Mr. Fly, your suggestion is that for the duration of the war the matter be left more or less in status quo.

"Commissioner Fly. Let me make this clear sir. These rules were issued more than a year ago and before this war started. The investigation—I did not originate this investigation—had its origin in Congress, on the floor of the House and on the floor of the Senate, and that investigation started four or five years ago, and hearings were extended over many months, and before a committee of Commissioners, and reports were made, those representing the networks appeared there and testified, over thousands of pages of record, and the proceedings went through various stages, various arguments, filing of briefs, and that sort of thing, and the final rules of the Commission were issued on May 2nd of last year, which was long before the war started, and the Commission has been ready to put an end to the problem from that day on; but these other gentlemen wanted to try it on a number of grounds. They tried it before two or three committees, including the Senate Interstate Commerce Committee and then they came here to try it again, and in the meanwhile they are trying it in the courts also.

"Mr. Kennedy. Mr. Chairman.

"The Chairman. Mr. Kennedy.

"Mr. Kennedy. Mr. Fly, you referred to New York about the question of whether or not the control would rest in New York or with the 950 stations, or whatever number you give. What did you mean by that? Will you amplify that statement?

"Commissioner Fly. I want to give the balance of this problem later, if the Committee is interested in it; but I will answer that question, sir. The New York corporations, particularly the two, the Columbia and the NBC, have exclusive contracts with all of their affiliated stations and they control all, or all of the desirable time of the stations by exclusive options and in that way——

"Mr. Kennedy. Can you answer the question?

"Commissioner Fly. I want to answer it.

"Mr. Kennedy. It seems to me that you can answer that with one word.

"Commissioner Fly. And in that way, that is what New York has to do with it. They have control over what goes out over those local stations.

"Mr. Kennedy. Then, the point that you are referring to in connection with New York is the fact that the main offices of these companies are located in New York.

"Commissioner Fly. That is where they are run from, sir.

"Mr. Kennedy. All right. Is it not a fact that one of the greatest forces in controlling public opinion is the voice of the commentator who speaks many times a day, and so forth?

"Commissioner Fly. I think he is an important factor; yes, sir.

"Mr. Kennedy. Well, is it not your opinion that those men speak freely and express the views of the press and the reports of the hour rather than the views of any individual group or station owners?

"Commissioner Fly. Oh, I think in the main that those are responsible, independent commentators.

"Mr. Kennedy. So there should not be any fear of public opinion being throttled when you have commentators such as we have, who have been getting out the news.

"Commissioner Fly. Well, that is one pocket of this whole problem, and, of course, if you are going to have a dictatorship, it is not an entire answer that for the moment, if you could make the answer, and there are some arguments on that, if you could make the answer that you have a benevolent dictatorship. You still have not justified it because I do not think that this great essential in our democracy, this system of free speech, should hang by such a narrow threat as the continuance of benevolence from New York.

"Mr. Kennedy. I do not get your point. If we have these outstanding commentators addressing the public day in and day out, what effect would New York have upon that, upon their view? Do you not believe that they are free to express their own views on current events?

"Commissioner Fly. Well, there are instances, I am sure, where they have not been free. Some of the commentators have been taken off of the air by the networks.

"I think on the whole they have done a very good job and a very wholesome job.

"Mr. Kennedy. I think that the President of the United States paid them a great compliment the other day and that that would be a complete answer to your question, the very fact that he picked out a commentator to place at the head of this division down here it would indicate that the President has confidence in that type of person.

"Commissioner Fly. It would indicate that the President had confidence in Elmer Davis, and so do I.

"Mr. McGranery. He is not owned by the networks?

"Commissioner Fly. He is not owned by Columbia, if I know Elmer Davis.

"Mr. Sanders. Have you finished?

"Mr. Kennedy. Yes.

"The Chairman. Mr. Sanders.

"Commissioner Fly. Even I practiced law for a while on Wall Street.

"Mr. Sanders. You do not want us to gather from your remarks, where you said a while ago that people are running down here to Congress, that you think that there is anything wrong with the public requesting Congress to investigate the necessity for remedial legislation?

"Commissioner Fly. Oh, I would think this, sir, that you are dealing there with an awfully important right of individual citizens to petition Congress, and I think you would certainly be very slow in cutting down on that right to do that. I would think this, that realistically, when the vice president of one of these big networks comes in and talks to you, that he is not talking with you in a personal capacity simply. He is wielding a much greater influence than he is as John Doe, who originated in Iowa, or in North Dakota, or Brooklyn, and you know that.

"Mr. McGranery. You mean that he might deny you some time on his network if you made application for it; is that it?

"Commissioner Fly. I mean that he speaks with a great deal of authority, far beyond his personal abilities and fancies.

"Mr. McGranery. Well, I should think, Mr. Fly, that the integrity of the men I have met in Congress would not justify your remarks.

"Commissioner Fly. They are a fine bunch of people. They are a very smooth and effective bunch of operators. I admire them. They are really very good men.

"Mr. Kennedy. Are you referring to the Congressmen or the broadcasters?

"Mr. Sanders. Pursuing that same inquiry further, Mr. Fly, you do not mean for us to gather from your remarks that you believe Congress should consider legislation only which is initiated by the Federal Communications Commission or the other bureaus, would you?

"Commissioner Fly. Oh no; I hardly think that I would go that far, to that extreme. I should think that it ought to consider suggestions for legislation from all sources, but when you come to appraise the sources, I think you ought to be realistic.

"Mr. Wolverton. Mr. Chairman.

"The Chairman. Mr. Wolverton.

"Mr. Wolverton. May I ask a question right there?

"Commissioner Fly. Yes, Mr. Wolverton.

"Mr. Wolverton. You have just stated that we should give due consideration to the sources that make the recommendations. Any one who has served on a Congressional committee is conscious of the fact that those who have special interests to serve appear before the committee, and I do not take it that that is derogatory.

"Commissioner Fly. No, I do not think so, sir.

"Mr. Wolverton. I think that is truely American.

"Commissioner Fly. I think so, too.

"Mr. Wolverton. The only point for the committee to consider is whether their recommendation is right or wrong, taking into further consideration the interest of the person who made the suggestion.

"Commissioner Fly. I entirely agree with you, sir.

"Mr. Wolverton. In other words, that is merely weighing the problem. On the other hand, I hope I will not be misunderstood in what I am about to say. The amount of credit that you give to an individual expressing opinion depends somewhat upon the background of experience of the person who makes the recommendation or the suggestion. I have been very much impressed with the character of the witnesses who have appeared in behalf of this bill, from the standpoint of their ability to express opinions. The legal questions that have been raised have been well presented to this committee by Judge Burns. He represented Columbia, I believe.

"Mr. McGranery. Columbia, yes.

"Commissioner Fly. He is a good lawyer.

"Mr. Wolverton. And by Mr. Caldwell, who spoke on behalf of the Mutual.

"Each of those who have appeared on behalf of the companies, either from a practical or administrative standpoint, as well as those who have appeared from a legal standpoint, have seemed to have a background of experience that entitled them to express opinions and have a right to expect the committee to give some consideration to them.

"Now in order that we may have the picture just as complete as is possible, in order that this committee may be able to weigh the different suggestions for and against, would it be possible for you to give us a description of the background of the Federal Communications Commission, with particular reference to the individuals who hold the position of Commissioners, so that we might judge that when they oppose a suggestion or make a suggestion of their own, that we may know just how much importance to attach to it.

"Commissioner Fly. Yes, I think we could do that, sir, and I should be interested in developing that.

"While we are dealing with this one particular problem, I want to say—

"Mr. Wolverton. Pardon me for just a minute. How would you do that? Could you give us that information?

"Commissioner Fly. I will give you a biography.

"Mr. Wolverton. What?

"Commissioner Fly. I will give you a biography.

"Mr. Wolverton. Yes, that is what I had in mind.

"I would like to know, when a commission has power to exercise authority that has to do with freedom of speech, which is a very serious matter, whether that power is exercised by a commission or whether it is exercised by a broadcasting company, I would just like to know what the background and experience of the Commission has been so that we may appraise its standing; so that we may put its views, so to speak, over against the views of the others who have testified.

"Commissioner Fly. I think also, sir, you would be interested in the fact which, of course, is true, in all these commissions, and that is that the backbone of the technical, the expert work, is done by the staff.

"We have in the many hundreds of employees virtually no one—that is, apart from the clerical staff and so on—virtually no one except competent technicians—a department headed by the chief engineer; a department headed by a chief accountant; a department headed by a chief lawyer, and on down throughout those staffs, are men who are experts in those fields. And, of course, those are the people upon whom the Commission must rely for constant consultation; for conferences and reports and studies, and for assistance in hearings and that sort of thing, and I might say that in this particular instance, Mr. Wolverton, that the Commissioners as a whole have literally spent years of time studying, having these experts from the various sources, and particularly from these network sources, come before it and testify, and the process has been carried on through the years, and a huge record has been built up of that expert and informed testimony, and in addition to the work of the staff, in cooperation with the Commissioners in giving that personal attention, we had the assistance; the advice; the arguments, the briefing of counsel and of everybody for the networks.

"Now, this is not something you see that comes out over night that some one suggested. And, as I say, this was going on for years before I got there. In no instance did anyone move in there with the assumption that he knew all about it.

"What they did was move in there with a committee of Commissioners; with a staff of expert technicians, and study this problem from the ground up, and take their information, their advice and their arguments from those people who know the subject best, and finally, after years of that process came forth the report.

"Mr. Kennedy. Mr. Chairman, just one question.

"The Chairman. Mr. Kennedy.

"Mr. Kennedy. Can you tell what percentage of the work of the Commission is devoted to radio and broadcasting?

"Commissioner Fly. Is devoted to broadcasting?

"Mr. Kennedy. What part of your whole set-up; would say five per cent, ten per cent, twenty per cent, or what?

"Commissioner Fly. Well, in view of the war work—

"Mr. Kennedy. Well, forget the war work and let us go back before the war. I mean in times of normal operation.

"Commissioner Fly. Oh, normally I would say that the broadcasting problem enveloped 60 per cent of the work; maybe more.

"Mr. McGranery. Mr. Chairman.

"Mr. South. Mr. Chairman.

"The Chairman. Mr. McGranery.

"Mr. McGranery. Mr. Fly, while we are talking about the right of free speech, do you have any specific instance where that right was transcended, where there was any violation?

"Commissioner Fly. Well, we have so many complaints on that score, Mr. McGranery.

"Mr. McGranery. I mean, after—

"Commissioner Fly (interposing). I got a complaint from a Senator just the other day. And sometimes those complaints have real merit and sometimes they do not.

"Now, I would be reluctant to take those and to spread them out. I could prepare a statement for you, if you wanted it, of instances that have raised that question seriously.

"Mr. McGranery. Well, of course, I would not be interested any more than you would be in the right of complaint; but the investigations, and the reports, or the conclusions after you followed them up. Is there any specific case where that complaint has been justified?

"Commissioner Fly. You mean in connection with this network investigation?

"Mr. McGranery. Yes.

"Commissioner Fly. That was not—that rather had its origin in terms of the monopolistic control that was exercised by the two dominant companies. That was what the Congress drew attention to and what the Senators drew attention to, and this is what it urged the Commission to look into.

"Now, as to your relation to free speech, that comes in terms of the controls exercised broadly across the country by the limited number of people. Now, we have had numerous complaints, Mr. McGranery—some good and some very bad. I would not like to air them. We have had complaints. Take the sort of a case that must arise: We had a complaint from the Communist organization during the last campaign and beginning with that, we got numerous complaints of a less startling character.

"Mr. McGranery. But, is there any, after you complete your investigation of the complaints, is there anything that would indicate to the Commission that some of the networks had violated the right of free speech?

"Commissioner Fly. Well, the Commission arrived at no judication of that point and it was not essential to the Commission's report that it do so. As a matter of fact, the essential thing is that those controls are unnecessarily concentrated and lodged in single hands, and it has never been the policy of the Congress to support enterprises so concentrated and controlled, except where by legislation you have granted the monopoly for good reasons."

In a colloquy between Chairman Fly and Congressman Brown the Chairman said:

"In this field of radio . . . the experts are pretty much all, let us say, run of the mill 'experts' who are mighty good men, but you take the vice presidents of these national networks, they would not, they really would not know a relay circuit or a certain type of transmitter, if they met it in the street."

Representative Hinshaw sought to bring out the differences between the regulation of public utilities and broadcasting.

"Mr. Hinshaw. I see no similarity in the business or management of the two different systems, one being a public utility and the other a private industry

"Commissioner Fly. I know, but the point I am making, sir, is these decisions are not based to any exclusive degree and particularly not to any predominant degree, upon the business aspects of the thing.

"Mr. Hinshaw. You are not interested in that?

"Commissioner Fly. You are going to use a frequency, for example, for relays for broadcasting, and it is not a business question. That is an engineering question.

"Mr. Hinshaw. I am not discussing the engineering aspect of it.

"Commissioner Fly. But, we have to live with it and that is what the decision is based upon.

"Mr. Hinshaw. Well, decisions apparently are being based upon other things than engineering questions, upon business practices.

"Commissioner Fly. Of course, we try to consider all factors; but in the main, on this great sweep of the problems, including broadcasting, the main considerations are engineering in character.

"Mr. Hinshaw. The main considerations, so far as the broadcasting angle and broadcasting is concerned, yes; but so far as these regulations which have been proposed are concerned, that has nothing to do with the technical aspect of it.

"Commissioner Fly. Well, the networks case is something quite apart.

"As I say, I have tried that case before in two or three Congressional committees already and it is being tried in the courts today and——

"Mr. Hinshaw. Well, do you think that the Commission should be concerned with the business aspects of the broadcasting systems?

"Commissioner Fly. Well, I would want you to define 'business'; but if you are suggesting, sir, that the Commission should have nothing to do with any of the business of broadcasting systems, I should say that would be a very, very unfortunate thing.

"Mr. Hinshaw. But what part of the business of the broadcasting system do you think that the Commission should be concerned with?

"Commissioner Fly. Well, let us take one angle. Have you read that monopoly report, sir?

"Mr. Hinshaw. Have you? No, I have not read it at all.

"Commissioner Fly. I suggest that it is good reading.

"Mr. Hinshaw. It is good reading. I understand that there are 17,000 pages in it.

"Commissioner Fly. No, the report is not that long.

"Mr. Hinshaw. You mean the report that you made?

"Commissioner Fly. Yes, sir.

"Mr. Hinshaw. Yes; I have read a part of it.

"Commissioner Fly. There is something I think very essential to be done in the public interest. I do not think we can promote through the licensing process the monopolistic conditions in the industry and in response to your question, I would say that a thing like that must be done; either the Commission must do it, or somebody else must do it.

"Mr. Hinshaw. Who else might do it, besides the Commission?

"Commissioner Fly. The Department of Justice has moved since the Commission moved under the anti-trust laws.

"Mr. Hinshaw. Do you not think that it might be a proper place for it?

"Commissioner Fly. I think that is the proper place for it, sir.

"Mr. Hinshaw. Do you not think it is also the province of the Commission to——

"Commissioner Fly. Pardon.

"Mr. Hinshaw. Do you think it also the province of the Commission to enter into that as a trust case?

"Commissioner Fly. I think the mandate of the statute is clear, sir. If you read the monopoly provision of the statute, I think you will find that function was laid down upon the shoulders of the Commission.

"There was great fear of monopoly of this field from the very outset and when you gentlemen wrote the legislation here you took extraordinary steps to avoid that.

"That is in the Communications Act as distinguished from the anti-trust laws.

"Mr. Sanders. Mr. Chairman——

"The Chairman. Mr. Sanders.

"Mr. Sanders. That raises an interesting question there, Mr. Fly. Would you not have a great deal of confusion if in some particular case, if your Commission decided one way and the Department of Justice decided another? Do you not think that as a matter of practice, it would be better to leave the monopoly question, we will say, in the hands of one department?

"Commissioner Fly. I do not think, sir, that we ought to be left where we are required to build up the monopolies just in order to throw the duty upon the Department of Justice to tear them down, and I do not think the licensing function of the Commission should be utilized except in terms of public policy—and quite apart from the provisions you have written into the statute, I do not think this licensing provision should be utilized to build up monopolies which are unlawful, and I think that if the Commission used that licensing power to build up those monopolies, then something ought to be done about the Commission.

"Mr. Sanders. I would take it for granted, of course, that your Commission would follow the rulings of the Department of Justice. You certainly would obey the law.

"Commissioner Fly. The Department of Justice does not issue rules, sir. The Department of Justice tries cases, and I must say that the mills of the gods grind awfully slowly in elucidating the various specific problems in the various industries, and I should think it is conceivable that you might wait a long time for detailed clarifications in that field.

"This measure has some of the benefits of the Federal Trade Commission Act, and that is the very reason that the Trade Commission Act passed, so that some degree of definitions could be brought into the field of unfair trade practices, and that sort of thing.

"Mr. Sanders. I thank you for your information about the Department of Justice not issuing rules. Of course I said nothing about the Department of Justice issuing rules. I said that we could take it for granted that your bureau and the other departments would follow the rulings of the Department of Justice, which of course are disclosed in the policies that they enunciate in the trial of these cases.

"Commissioner Fly. That is just what we have done, sir.

"Mr. Sanders. I gather from your remarks, that the Department of Justice took action after you had. I thought that you said after you moved, the Department of Justice moved.

"Commissioner Fly. Yes, sir; but I have reason to believe; I had no opinion from the Attorney General, but I had reason to believe that these provisions were violations of the anti-trust laws, and apparently the Anti-trust Division thought so.

"Mr. Sanders. But, you moved first.

"Commissioner Fly. Pardon me.

"Mr. Sanders. You moved first?

"Commissioner Fly. We have somewhat different fields."

"Mr. Wolverton. I am inclined to think sometimes, Mr. Fly, after reading some of the decisions that have been made, or policies formulated by some of the bodies that have been created by acts of Congress, after hearings by this committee, that it might be helpful sometimes if the members of those Commissions spent more time with the committees of Congress than they do. They might understand some of the intentions we have.

"Commissioner Fly. I think that is a good idea, sir, and I must say that I have enjoyed every minute before these committees. I have no complaints to make."

Labor

KMOX STRIKE

A "wildcat" strike by I. B. E. W. members took Station KMOX, St. Louis, off the air from 3 p. m. until 8 p. m. on Tuesday. The strike resulted from the refusal of the I. B. E. W. members to permit a woman to learn monitoring, although CBS and the I. B. E. W. have a contract which permits the training of a specified number of women. The strike also violated the arbitration clause of the station contract. The dispute is now in arbitration.

SUPREME COURT DECISIONS

The significance of the opinions of the Supreme Court in two recent decisions was pointed out in a statement issued by L. Metcalfe Walling, Administrator of the Wage and Hour and Public Contracts Divisions of the United States Department of Labor in response to inquiries.

"In *Overnight Motor Transportation Company* v. *Missel,* the Supreme Court made it abundantly clear that the overtime benefits of the Fair Labor Standards Act are limited neither to that marginal group of workers who are paid wages at or near the minimum rates prescribed in the Act, nor to employees who happen to be compensated on an hourly basis. The Court held that salaried workers who are employed in interstate commerce or in the production of goods for interstate commerce must be compensated for weekly hours in excess of 40 at not less than one and one-half times their regular rate of pay, and that the regular rate for this purpose is to be computed through dividing the weekly wage by the number of hours worked in the particular week, where the employment contract is for a fluctuating work-week. This is the method of computation which has heretofore been approved by the Wage and Hour Division.

"However, in *Walling* v. *A. H. Belo Corporation,* the Supreme Court ruled by a 5 to 4 decision that the 'regular rate' on which overtime must be paid could be fixed by a contract between the Dallas Morning News and its employees.

"It is expected that a considerable amount of litigation will be necessary before the contours of the Belo decision are fixed, since the Court stated that it could not 'provide a rigid definition of *regular rate* when Congress has failed to provide one.'

"I believe it only fair to warn that the Court in the Belo decision was passing on the particular state of facts before it and that generally the Division will continue to be guided by the broader interpretation contained in *Overnight Motor Transportation Company* v. *Missel.*"

The Solicitor of Labor and his staff have begun a legal analysis of the decisions with a view to guiding the Division in its formulation of an appropriate administrative policy insofar as this may involve a deviation from the advice heretofore given by the Administrator through interpretative bulletins.

In this connection, the NAB Labor Relations Department has started work on a revision of the pamphlet *The Wage and Hour Act: How It Affects a Broadcasting Station.* The third edition will be ready sometime this summer. The section on "guaranteed overtime" on page 8 of the second edition is now out-dated, as a result of the *Belo* decision.

The third edition also will contain a section on "Travel Time" and a clarification of the "Talent Fee" situation.

TRAVEL TIME

A great many stations still have some question about the computation of "travel time" under the Wage and Hour Act.

In brief, this is how it is done.

1. If an employee is sent out on a *one-day* assignment, his working hours start when he leaves and stop when he returns.

2. If an employee is sent out on an assignment of *more than one day,* he is to be paid a *normal day's pay* for each day he is away. If that normal day constitutes overtime, he must be paid time and one half.

Here is the text of the Wage and Hour Division's bulletin on this subject:

9. The problem of travel time, in relation to hours worked, arises in a great variety of situations and no precise mathematical formula will provide the answer in every case. The question is often one of degree; if the time spent by an employee in traveling is reasonably to be described as "all in a day's work," such time should be considered hours worked under the act.

10. As a general rule it may be stated that an employer should treat time spent by an employee during regular working hours in traveling pursuant to the employer's instructions as hours worked. If an employer requests his employee to do a job during regular working hours which requires the employee to leave the place of business, the traveling time of the employee should be included in hours worked, and this is true whether or not the particular job is within the employee's regular duties.

11. In many cases travel time outside of regular working hours is considered "part of the day's work" and, accordingly, should be treated as hours worked. Thus, an employee whose normal working day extends from 8 a. m. to 5 p. m. may be requested by his employer at 5 p. m. to make one more outside call which involves 2 hours of traveling time (to get to the place where the work is to be performed and report back to the office) and active labor of 1 hour. In such case the employer may not disregard the travel time in computing the number of hours worked by the particular employee; the employee's working day would extend from 8 a. m. to 8 p. m. In this case the employee engages in active labor for his employer after the close of his regular working day and prior to the commencement of his next regular working day, and his activities between 5 p. m. and 8 p. m. are, under the circumstances, reasonably to be considered as a con-

tinuation or extension of his normal working day. The same results, of course, would be reached if the employer requested his employee to report for work 2 hours earlier in the morning in order to make the one extra call.

12. If a crew of workers is required to report for work at a designated place at a specified hour and all the employees are then driven to the place where they are to perform work, the time spent in riding to such place should be considered hours worked. Similarly, the time spent returning from the place at the close of the day's work should be considered hours worked. In some cases, however, the employer requests his employees to report for work at a specified hour at the place where the work is to be performed instead of at the employer's place of business. In these cases the employee's working time may be considered to begin at the time he reports for work, unless the traveling time required in order to reach the place where the productive work is to be performed is unreasonably disproportionate to the normal traveling time required in reporting for work at the headquarters of the employer. No precise formula will solve this type of situation. What is unreasonably disproportionate depends upon the facts in the particular case and reasonable standards agreed upon between the employer and employee will be accepted for purposes of the act.

13. In some cases an employee is required to travel continuously for more than a full working day during which time the employee is not engaged in actual productive work for his employer. For example, an employee whose regular working hours extend from 8 a. m. to 5 p. m. may be required to spend 2 or 3 days and nights of continuous travel to reach a place where he is to perform assigned work. In such case, as indicated generally in paragraph 10, time spent traveling during the regular working hours should be considered hours worked. Travel time outside of regular working hours need not ordinarily be considered hours worked. If, however, the employee is required to travel on Saturdays, Sundays, and holidays, he should be considered as working on those days for the number of traveling hours between his established starting and stopping time on other days of the week. In determining whether the foregoing is applicable, factors such as the length of time required to reach the place where the assigned work is to be performed, whether the employee is given adequate time for sleeping and relaxation, the time that the employee is required to report for actual productive labor, etc., are very important.

14. Inquiries have been received with respect to employees who are required to travel continuously for several days and who perform active labor while traveling. Thus, for example, when cattle or poultry, etc., are sent to market by rail, an employee of the shipper is required to travel on the train in order to water and feed the stock en route. In other cases an employer who ships machinery by train to a distant customer requires an employee to oil the machinery en route and otherwise to see that it arrives in perfect condition. The employee generally rides in the caboose with the train crew. In each of the foregoing cases, the employees are subject to call for 24 hours a day, but time required for active work by such employees would ordinarily be much less. The employee generally has a substantial amount of time for sleeping, eating, relaxation, etc. No precise formula will decide this type of case and any reasonable agreement entered into between the parties or established by custom and usage which takes into account the amount of time required for active labor by the employee and the fact that the employee is subject to call for 24 hours a day, will be respected by this Division in its enforcement policy.

ENGINEERS "PROFESSIONALS"?

A federal district judge in Puerto Rico has held that a licensed radio engineer was a professional employee and, hence, not subject to the overtime provisions of the Wage and Hour Act. (Schmidtke vs. Conesa, May 15, 1942.) In making his decision, Judge Cooper pointed out that he was unable to find any precedent in point.

The Wage and Hour Division has advised the NAB that it believes radio engineers, as a group, clearly are *not* professionals. Whether the Puerto Rico case will be appealed has not been determined.

COST OF LIVING

After 19 months of steady increase, the cost of living dropped slightly between May 15 and June 1.

The Labor Department reports that the cost of living on June 1 was 10.8 per cent higher than it was June 15, 1941, and 15.9 per cent higher than its 1935-39 average.

Sales

SALES MANAGERS EXECUTIVE COMMITTEE APPOINTED

In addition to John M. Outler, WSB, whose appointment as chairman of the NAB Sales Managers Executive Committee was announced last week, the following have been named to serve on the committee for the coming year by President Neville Miller:

Frank R. Bowes, WBZ, Boston, representing large stations; William Malo, WDRC, Hartford, representing medium stations; Dietrich Dirks, KTRI, Sioux City, Ia., representing small stations, and Don Davis, WHB, Kansas City, representing Mutual-affiliated stations. Representatives of the other networks have not yet been named.

Bowes succeeds Outler as the large station representative, and Malo replaces E. Y. Flanigan of WSPD, Toledo, for medium stations. Dirks, who served part of last year's term as the small-station representative, was reappointed for a full term. Davis replaces Linus Travers of WAAB, Boston, as the Mutual-affiliate choice. As announced last week, Outler replaces Eugene Carr, WGAR, Cleveland, as committee chairman.

Thanking the retiring members, President Miller pointed out that a large part of last year's work was devoted to setting up and shaping the activities of the Sales Managers Division. "I want to express my appreciation to those who helped make our last year's activities so successful," he said. "I know they must get some pleasure out of seeing the success, as they were among the 'pioneers' in this work and we certainly appreciate all they have done to help us in every way."

Although the date for the first committee meeting has not yet been set, Outler indicated that the committee would be called together soon with Frank E. Pellegrin, Director of the NAB Department of Broadcast Advertising, to draw up plans for the coming year's activities. Sales managers throughout the industry are invited to offer their suggestions for the year's program.

DEPT. STORE BUYS RADIO RIGHT

Following the historic Department Store Seminar at the NAB convention in Cleveland, industry sales opinion has crystallized on the major premise that department stores can be sold on radio advertising, provided a solid framework is built upon a thorough mutual understanding of each other's problems and possibilities on the part of the radio station and the department store.

The transcript of that Cleveland session is now at the printer's, and will be distributed to all member stations in about ten days.

In substantiation of the major premise, a letter was received June 16 by Frank E. Pellegrin from Walter E. Anderson, publicity director of J. N. Adam & Co., department store in Buffalo, N. Y. The account is given here because it may illustrate to many sales managers how the job *can be done*.

The story began at the NRDGA convention in New York City in January, 1942, when the NAB Sales Managers Executive Committee presented a round-table discussion on "Radio Advertising for Department Stores." Among the more articulate questioners during the question-and-answer session was Anderson, who listed numerous points on which he wanted specific radio information. Unable to answer all questions during the brief session, Pellegrin later wrote Anderson at length and also wrote the NAB members in Buffalo, suggesting they follow up along the lines indicated and that they review with Anderson the "Manual of Radio Advertising," which contained many of the basic radio facts on which Anderson had expressed doubt and interest.

The rest of the story can best be told by quoting Anderson's letter:

". . . Very honestly, I think the 'Manual of Radio Advertising' is a great job and it does contain the answers to many of the questions I raised at the NRDGA convention last winter.

"I'm sure you realize just as much as I do that it is one of the things the NAB should have done a long time ago. I know I wish I had had the opportunity of having more of this kind of information when we first started planning our radio programs. But it is going to be helpful to many newcomers to the radio advertising field, and I think the book will more than pay its way in the better understanding it will bring about between advertisers—and of course I am only talking about department stores—and stations.

"You will be happy to know that we have gone a long way toward solving our radio problem. We have a contract that calls for twenty-six dramatic programs, with full cast and orchestra, written and directed by the station according to our promotion and merchandise requirements and suggestions. We also have a fifteen minute program in the morning, Monday through Saturday; five-minute-afternoon program, Monday through Friday, and 1,040 spot announcements.

"Our fifteen-minute dramatic jobs have all been as fine as can be produced and have great institutional value for us. I think you know something about our war bond program and if I am not mistaken, either Mr. Meybohm or Mr. McCarthy said you heard it. This is a perfect example of what Herb Rice has been turning out for us consistently. On this particular program I just got the idea of building a program for selling War Stamps and Bonds, sketched out a few simple ideas for Rice, told him what we were going to do to promote the program, and he went to work. He certainly deserves a lot of credit.

"The morning and afternoon programs still aren't right, but they are considerably improved. We are now working on a change for our morning program; in fact have a sample program written, with a man commentator, 'J. N. Adam's Home Companion' and his secretary to act as kind of stooge. (Why do department stores continue to use women when they have been proved wrong in the national field?)

"Before we put this on the air, we are going to do everything we can to pre-test it scientifically; we have chosen a list of 200 names, carefully selected from our charge accounts; have invited them to an audition this Friday, and will have them fill out questionnaires we have worked out very carefully with the Buffalo office of B. B. D. & O. I think we are on the right track, if we get the right response to the questionnaire, in testing the program in this manner, because I don't think there is a man living who can sit down, listen to a program and say 'That program is going to be successful.' . . .

"I am sending you several ads from some of our recent fifteen-minute programs that will show you the kind of promotion job we have been doing on them. I am also sending two ads on the Father's Day program that we put on the air at 7:15 last evening. No one can say we don't back up radio with all we've got.

"I would be very happy to get your reactions to all of this and any suggestions you might have to help us do a better job. . . ."

We think that the moral in this story pretty well writes itself. Here is a store, long groping for radio knowledge, which finally seems to be working its way solidly into radio with intelligent cooperation from local radio men *in whom it has confidence*.

This store's radio budget, compared with newspaper, is still probably small and there is no doubt room for much expansion, but the store is unquestionably moving in the right direction. The store's advertising manager is apparently now well grounded in radio and serious about it, and seems to be devoting the kind of attention and effort to radio that the medium deserves, and needs if it is to be used successfully.

Significant is his statement that "our morning and afternoon programs still aren't right." Complacency with radio, as with any other medium, is generally fatal.

Also significant is Anderson's plan to use a male commentator, and to "pre-test" the program as scientifically as he can with the aid of a good advertising agency. (This point was discussed at the Cleveland convention.)

Accompanying Anderson's letter was a sheaf of newspaper ads devoted to promotion of the radio programs, further emphasizing the point made at Cleveland that radio advertising, to be successful, should be backed up with all other possible forms of promotion, both internal and external, and carefully integrated into the store's complete advertising and publicity plans.

But please bear in mind that this is not a "success story" (although we have plenty such available on request). This store has not yet disclosed any unusual successes it may have had with radio. Rather, the story may serve other stations as a road-map to department store business, and certainly it gives weight to the pleas of the speakers at Cleveland, that if you want to sell department stores properly, first make sure that they are thoroughly grounded in the basic story of radio as an advertising medium, and that your station personnel has an accurate and intimate knowledge of the problems and aims of each individual store you wish to cultivate.

Then, instead of trying to sell a "ride on a vehicle" (quoting Barclay Newell), or "a lot of blue sky" (J. W. Petty), or "knocking competitors" (Edgar Rice), or "on a pay-as-you-go basis" (R. G. Meybohm), you will have a chance, as advocated by Meybohm and Bill Gillespie of KTUL, of establishing radio as a *basic advertising medium*, fulfilling only *its own proper function* in the store's *over-all promotion program*, and not subject to the variable whims of buyers and executives at the first sign of non-performance or failure to work constant miracles, and not with its neck stretched out for the axe as the first victim of retrenchment.

Resolutions Available on Per-Inquiry and Free Time

Per-Inquiry and Free Time requests, although apparently abating somewhat, still feed on the gullibility of some station managers, program directors, news editors, and conductors of homemakers' programs, as well as of some sales managers who still accept P-I, contingent, or guaranteed-return deals.

A strong resolution on this subject was adopted at the NAB convention in Cleveland. Copies of this resolution have been printed by the NAB Department of Broadcast Advertising, and are available to members free upon request. It has been suggested that member stations return to the senders these P-I and Free Time requests, accompanied by a copy of this resolution and a form letter from the station expressing its stand.

Among those reported this week were **The B-L Co.**, Atlanta, Ga., seeking per-inquiry deals for its medical products; **Guenther Bradford & Co.**, Chicago agency, seeking per-inquiry deals for its "Charm-Kurl" home permanent wave kits, and **Diener & Dorskind**, New York agency, with a variety of P-I offerings. The NAB has invited them to use radio on the basis of established rates.

War News

FOREIGN LANGUAGE CONTROL

On Friday, June 12, a meeting was held to discuss the project of the Foreign Language Radio Wartime Control Committee. The following were present:

Representing the Foreign Language Committee: Arthur Simon, WPEN, Philadelphia; Joseph Lang, WHOM, Jersey City; and, Harry Henshel, WOV, New York City. Representing the Office of Censorship: Harold Ryan and Stanley Richardson. Representing the NAB: Neville Miller, Paul Peter and C. E. Arney, Jr.

A thorough discussion of the activity leading up to the organization of the Committee was had. It was stated that in the form in which the Code was now written neither the NAB nor the Office of Censorship could wholeheartedly support it since it contained certain restrictive provisions and gave the Committee final determination of station policy.

As a result of the collective thinking the Code was revised. Arthur Simon, Chairman of the Foreign Language Radio Wartime Control Committee, has transmitted the Code to all stations carrying foreign language broadcasts and in his transmitting letter appeals for the unanimous support of all stations.

The Code follows:

Voluntary Code of Wartime Practices for American Broadcasters Presenting Programs in Foreign Langauges

Whereas the foreign language broadcasters of America have a unique opportunity and responsibility to make this channel of communication a positive force in the Victory Program of the United States of America and the United Nations; and

Whereas to achieve this goal it is recommended that the following voluntary code of wartime practices for American Broadcasters Presenting Programs in Foreign Languages be adopted;

1. The broadcaster will faithfully observe the spirit and letter of the Code of Wartime Practices for American Broadcasters issued by the Office of Censorship.

2. The broadcaster will continue to assume complete responsibility for the selection, content and presentation of all foreign language programs.

3. The broadcaster will carefully monitor and check all foreign language programs. A complete script will be obtained and approved in advance, and any deviation from the script will result in the program being cut and appropriate action taken. He will also give particular attention to remote broadcasts.

4. The broadcaster will examine carefully the background of all persons connected in any way with the preparation or presentation of foreign language programs. A questionnaire shall be filled in by all such personnel. All such personnel shall be fingerprinted. One original and copy of the questionnaire, fingerprints, and other pertinent information shall be forwarded to the Foreign Language Radio Wartime Control Committee for transmission to appropriate Government agencies.

5. No person will be employed whose record indicates he may not faithfully cooperate with the war effort.

6. Any broadcaster discharging an employee for failure or refusal to abide by this Code shall immediately notify the Committee.

7. The broadcaster will cooperate wholeheartedly with interested public and private agencies, and particularly with pre-democratic groups, in the selection of program material.

8. The broadcaster pledges adherence to the letter and spirit of this Code and will report violations thereof to the Committee as well as to the appropriate authorities.

9. The broadcaster will give particular attention to those programs known as "Block Time Sales."

10. All foreign language programs will continue to contribute to the war effort.

RADIO GOES TO WAR

In his presentation before the House Interstate and Foreign Commerce Committee, Neville Miller gave four illustrations of how radio stations had rendered unusual public service in connection with the war. We are quite sure there are many such incidents, and that accounts of them would be of interest to the entire industry.

Therefore, we are carrying in the Reports this week one of the illustrations given by Mr. Miller and will carry one in the Reports for the next three weeks. We hope you will read these and send in to the NAB an account regarding similar services rendered by your station.

RADIO ASSISTS IN WAR EFFORT

Daily the program managers of the stations and the networks are building into their program structure by various ways and means programs assisting the government agencies in the war effort. An incident in Iowa is typical. The local station set up a prize consisting of a $25 Defense Bond to be given to the child who collected or supervised the collection of the greatest amount of scrap metal for defense purposes. Between them all, the children collected enough scrap to build 57 light tanks. It was a great local event, and indeed a clever and sound promotion scheme on the part of the broadcasting station. A result produced by keen competition for the local audience.

To headlight the cooperation of radio with the armed forces, consider the episode which the United States Navy has gratefully recorded. When a squadron of its planes was trapped by fog off San Diego and unable to land, a radio announcer interrupted a program to ask all motorists in the vicinity to drive to the airport and surround the field with headlights on. Within 20 minutes the field was ringed with light, and the squadron came in. It was an immediate, commendable and spontaneous reaction on the people's part, and thanks went to them, as well as to the effectiveness of the local broadcast.

Radio has also cooperated with the Government agencies carrying on the war production program. In early January you perhaps recall that suddenly a severe cold spell gripped the Eastern and the Central states in which are located many war production plants using gas for fuel. Late in the afternoon word was received by OPM in Washington that due to the tremendous increase in gas consumption for domestic use, many of the war production plants would be compelled to close down that night for lack of gas. The need was urgent and at 4:00 PM that afternoon the OPM appealed to the National Association of Broadcasters for help. Immediately, telegrams were sent to all stations in the given area containing announcements urging that domestic consumption be curtailed so war production could go on. Announcements were carried on all stations at supper time, consumption immediately dropped, the cold weather continued, but thanks to radio and the cooperation of the people, there was ample supply of gas and the plants remained in operation.

And as a final typical example of radio's services to a community in time of emergency, consider this recent incident in Iowa. In Burlington there is a large ordnance plant employing 13,000 workers. In the last six months there have been two bad explosions. The first one five months ago occurred at 1 o'clock in the afternoon and the people were frantic. The first impulse in such a case is for everyone to start telephoning in an attempt to secure news of the safety of the members of his family. The telephone switchboard became useless, and in a desperate hope, the manager of the telephone company appealed for assistance to the local radio station, WBUR. The manager of WBUR immediately interrupted the program on the air and made a five minute talk, explaining the desperate need for telephone service for doctors, nurses and long distance calls and further promised to have his staff cover the accident and to give as rapidly as possible complete details of the accident. The telephone manager states that almost as if by magic, the calls ceased and within a few minutes the service was back to normal and the urgent calls in connection with relief went through.

A plea for nurses was also made over the radio, and within a short time the hospital called back to say that the response had been so immediate and so plentiful that there were adequate nurses available to take care of all needs.

Just six weeks ago, the second explosion took place. Again Station WBUR responded and again panic was averted. telephone facilities were made available for needed calls, nurses were secured and the work of rescue was carried on in a most efficient manner.

TREASURY ACCELERATES BOND DRIVE

Through the presidents of the American Trade Association Executives, the Manufacturing Trade Associations Group, and the United States Chamber of Commerce, Secretary of the Treasury Morgenthau has appealed to all trade association executives for further assistance in stimulating the purchase of Savings Stamps and Bonds.

The ultimate objective of the campaign is to achieve a goal of $1,000,000,000 a month. A two front offensive is planned. First, to increase the percentage of employees now participating in the payroll plan from the present 45 per cent to at least 90 per cent; and, second, to increase the monthly allotment from the now average $8.00 per capita to approximately $20.00 per capita.

The $12,000,000,000 annual goal represents 10 per cent of our estimated national income, and the payroll savings plan is the most effective method promoting systematic purchase of the Savings Bonds.

There are now, according to their statement, over 86,000 firms employing a total of over 22,000,000 people which have made such plans available to their employees. The record shows, however, only 57 per cent of the employees are participating and they, only to the extent of a fraction more than 5 per cent of the gross payrolls of the plants. There are, of course many plants which are not participating at all. This, says the Committee, is a far cry from the gross 10 per cent payroll of all plants.

Many radio stations are among those "plants" making the payroll savings plan available to employees. NAB desires to render every possible assistance to the Treasury Department in the promotion of this plan. To that end we request station managers to advise what steps have been taken along the lines indicated. We desire this information for two purposes: first, that we may give proper recognition to those stations participating and, also that we may advise the Secretary of the manner in which the radio industry is cooperating.

CENSOR COMMENDS RADIO

Byron Price, Director of Censorship, today issued the following statement:

"The newspapers and broadcasters of the country in general have performed magnificently in withholding information about the visit to this country of V. M. Molotov, the Soviet Foreign Minister.

"The facts about this visit were known to hundreds of newspapermen and broadcasters. It was news of very high importance. But the voluntary wartime Codes issued by the Office of Censorship had requested that news of all such events be withheld from publication or broadcast for reasons of safety until official announcement was made.

"The result was that, so far as we have been able to learn, no premature mention of the visit was made on any broadcast or in any newspaper of the United States except one. This is a performance which reflects great credit upon the patriotic self-discipline of the publishing and radio industries.

"The one newspaper in which the story was published was the Philadelphia Daily News. The publisher of the Daily News has assured us that the Code was not violated intentionally, but so far he has made no satisfactory explanation of the manner in which the error occurred."

WTIC HELPS MARINES

As a part of Flag Week observance, Station WTIC, Hartford, made arrangements with the Marine Corps to send a copy of the Marine booklet on the use of the flag to interested listeners. Four announcements brought 1,120 requests, stimulating interest in both the flag and the Marine Corps.

CHARLES CALEY TO AIR CORPS

Charles C. Caley, assistant manager of WMBD, Peoria, has been commissioned a Lieutenant in the Army Air Corps, reporting to Officers' Training School at Miami Beach, Fla.

Mr. Caley was active in the national sales field, and for five years served as member of the Sales Managers' Committee of NAB.

CHINA AND RUSSIAN RELIEF

A note from Alvin M. Josephy, Jr., of the Office of Facts and Figures, asks us to relate the reason China Relief and Russian War Relief are not included in the network allocation plan.

OFF handles Government programs only. China Relief and Russian War Relief are not Government programs.

Nevertheless, OFF "would like stations to know that we think that both Russian and China Relief are doing a splendid job and hope that stations will give cooperation."

"WE'VE GOT TO STICK TOGETHER"

"We've Got to Stick Together," which was mentioned recently, is the official song for the War Bond and Stamp Rally in Baltimore. According to H. Lee Hoffman, Baltimore advertising man, who with his wife, composed the words and music, the song is being well received. It's BMI.

RUBBER SALVAGE DRIVE

The intensive Rubber Salvage Drive is in full force throughout the United States. Stations everywhere are doing an outstanding job to bring scrap rubber to receiving stations.

It is suggested that stations continue their own rubber conservation efforts. No matter how successful this drive, there still will not be enough rubber. Every fraction of a pound of rubber that can be saved is an aid to winning the War.

BOUQUET FROM THE AIR CORPS

Captain J. Elroy McCaw who is now attached to the Headquarters of the Army Air Forces in Washington has tossed a bouquet our way. Captain McCaw, incidentally, in private life operates radio station KELA at Centralia, Washington, and has other radio interests in the Pacific northwest. He writes Neville Miller as follows:

"Recently we have had several occasions to request the assistance of the National Association of Broadcasters in expediting communications training.

"As a result of the intelligent and wholehearted cooperation extended by Mr. Arthur Stringer and other members of your staff, it has been possible for us to accomplish our purposes much more quickly and effectively than would otherwise have been possible. You, in the National Association of Broadcasters, have shown an understanding of our problem and have demonstrated your desire to be of assistance in this emergency.

"We wish to extend our appreciation to you for your courtesy and assistance. We look forward to a continuation of this pleasant and helpful relationship."

NEW CUBAN RULES

Radio broadcasters in Cuba are forbidden to use expressions such as "flash," "important," "last minute" and similar terms in commercial announcements according to the Department of Commerce.

Station licensees are required to file with the communications control commission certain personal information, about their personnel including fingerprints and photographs.

The general public is not permitted to take part in broadcast programs. Programs must be prepared at least 24 hours in advance so copy may be available to Government inspectors.

CENSORSHIP NOT UNDER DAVIS

The status of the Office of Censorship is not affected in any way by the order of President Roosevelt creating the Office of War Information with Elmer Davis as director. The only reference to censorship in the executive order signed by the President on June 13 follows: "The Director of the Office of War Information and the Director of Censorship shall collaborate in the performance of their respective functions for the purpose of facilitating the prompt and full dissemination of all available information which will not give aid to the enemy."

The various bureaus that are brought under the direct control of Mr. Davis are the Office of Facts and Figures, headed by Archibald MacLeish; Office of Government Reports, headed by Lowell Mellett; Division of Information, headed by Robert W. Horton, in the Office of Emergency Management, which has controlled the press relations of such agencies as WPB, OPA and the War Labor Board; and the Foreign Information Service of the Office of Co-ordinator of Information. Colonel William J. Donovan, who has been Co-ordinator of Information, has been transferred to the Office of Strategic Services under the Joint Chiefs of Staff.

Listener Activities

RADIO COUNCIL OF MIDDLE TENNESSEE

The Radio Council of Middle Tennessee observed its first birthday June 9, with an open meeting, an interesting program, and the election of officers. The following officers will serve for 1942-43:

President, Mrs. Arch Trawick; First Vice President, Mrs. Roland C. Wolfe; Second Vice President, Mrs. Donald M. Maynard; Recording Secretary, Mrs. Manuel Eskind; Treasurer, Dr. M. L. Shane.

Mrs. Paul Capps, who has served as secretary since the pre-organization meetings, gave a short history of the Council, its organization, objectives, and undertakings. Tribute was paid to Dorothy Lewis. Reports of the NAB Convention in Cleveland were made by F. C. Sowell of WLAC, E. S. Tanner of WSIX, and Jack Stapp of WSM. The highlights were vividly presented by these experienced executives, and the interested listeners got glimpses of different phases of the tremendous, complex world of radio.

The major project of the year, the study of listeners' habits, hobbies, and favorite programs were discussed by Miss Mary Sneed Jones, chairman of the committee, and by Mrs. Roland C. Wolfe, in charge of questionnaires for adults. Miss Jones gave a brief summary of the 4,000 questionnaires sent to city and county elementary and high schools, and outlined the plans for completing the study, with the hope of making it available to a few hundred interested students of education by radio.

Mrs. Wolfe emphasized the cooperation of different organized groups who took part in the survey of adult listeners, and gave many of the intelligent and constructive suggestions from urban and rural groups.

Mrs. Trawick read "The Role of the Listener" which she gave before the Listeners' Section of the NAB Convention in Cleveland.

A spirited discussion of trends in radio followed with an exchange of opinions, questions, and answers, on the possibilities in the ever-growing field of entertainment and education via *Radio*. A statement of goals for the next year was the closing number on the program.

MRS. ROOSEVELT WANTS FREE RADIO

In a recent issue of the Ladies Home Journal in her column "You Ask Me" by Mrs. Eleanor Roosevelt, she received the following question:

> "Since sponsors of radio programs for children seem indifferent to the protests of individual parents concerning gangster and horror stories on the air, is it possible to have legislation passed prohibiting them?"

Her reply is encouraging to informed mothers and broadcasters alike:

> "I think it would be a pity to pass legislation which would be censorship legislation, either for the press or the radio or the movies. All these distributors of news and entertainment, of necessity, are anxious to please the public; and once you get the public educated so that they are really determined that their children shall not listen to certain programs on the air, you will have no difficulty getting them off the air."

The women of the country are learning that they have editorial work to do with this new medium of radio as with newspaper and movie. Mrs. Roosevelt confirms the fact that the listeners must be articulate. The broadcasters desire to give the radio audience what it wants to hear.

IRVING BERLIN MUSIC

THIS IS THE ARMY, INC. is producing a stage show in a New York theater, the net proceeds of which will be donated to army emergency relief. The score of this show is written by Irving Berlin and will be published by THIS IS THE ARMY, INC. The Directors of This Is the Army, Inc. have decided that all broadcasting stations should be free to perform this music without the payment of any compensation whatsoever. For this purpose they have instructed and authorized ASCAP to license the score free of charge to all broadcasting stations. We feel that all broadcasters should recognize this patriotic gesture by availing themselves of the opportunity of performing an Irving Berlin score without charge, and, at the same time, helping the Army in its efforts to raise funds for army emergency relief. The compositions written by Mr. Berlin which are included in this free license are as follows:

This is the Army, Mr. Jones
With My Head in the Clouds
I Left My Heart at the Stage Door Canteen
My Sergeant and I Are Buddies
The Army's Made a Man Out of Me
How About a Cheer for the Navy
American Eagles
That Russian Winter
I'm Getting Tired So I Can Sleep

The show will also include some Irving Berlin numbers written at the time of the last war but these are the property of individual publishers and are not included in the free license.

PRIORITY ORDER

Preference Rating Order P-129 (see NAB REPORTS, May 1, p. 244) was amended June 3 by inserting before the first word (Except) of paragraph (g)(1) the words "On and after September 1, 1942 * * *." The effect of the amendment is that the 27½% limitations on inventory do not apply until September 1.

DCB MATERIAL RECOMMENDATION

The DCB recommended, June 11, to the War Production Board and the Federal Communications Commission that, with regard to the construction of certain radio facilities, there be immediately placed into effect the following policy:

1) No future authorizations involving the use of any materials shall be issued by the Federal Communications Commission nor shall further materials be allocated by the War Production Board, to construct or to change the transmitting facilities of any amateur or Class 3 experimental Station.

2) No future authorizations involving the use of any materials shall be issued by the Federal Communications Commission nor shall further materials be allocated by the War Production Board, to construct or to change the transmitting facilities of any Aeronautical Fixed (domestic) Station, Itinerant Aircraft Station, Flying School Station, or station operating in the Emergency and Miscellaneous Radio Services; provided, however, that upon a proper showing that any such station serves an essential military need or a vital public need, which cannot otherwise be met, the Commission and the War Production Board will take action commensurate with the importance of the particular facility in question.

The foregoing applies to the following classes of stations which are defined in the Rules and Regulations of the Federal Communications Commission:

1) Amateur stations.
2) Class 3 experimental stations.
3) Emergency Radio Service.
    a) State Police Stations.
    b) Municipal Police Stations.
    c) Zone Police Stations.
    d) Interzone Police Stations.
    e) Special Emergency Stations.
    f) Forestry Stations.
    g) Marine Fire Stations.
4) Aviation Radio Service.
    a) Aeronautical Fixed (domestic) Stations.
    b) Itinerant Aircraft Stations.
    c) Flying School Stations.
5) Miscellaneous Radio Service.
    a) Provisional Stations.
    b) Motion Picture Stations.
    c) Relay Press Stations.
    d) Geological Stations.

MISSISSIPPI

Estimated Radio Homes, 1940

Number of Occupied Dwelling Units as reported by U. S. Bureau of the Census in advance release, Series H-7. Percent radio-equipped calculated from Series H-7 Bulletin following the Census Bureau practice. Number of radio units, or radio homes, estimated by applying percent ownership to those units not answering radio question and adding such to those reporting radio.

FEDERAL COMMUNICATIONS COMMISSION

FLY FOR ENGINEER DEFERMENT

Discussing the personnel troubles of broadcast stations at the present time because of the war situation, James Lawrence Fly, FCC chairman, at a press conference on Monday of this week said that he hoped that engineers and technicians would think well before making any moves which would leave the stations and the public in the lurch.

Speaking of this problem of personnel help at the stations Mr. Fly said in part:

"The problem of our employees in the broadcast industry—I am referring, of course, to engineers and technical experts—is rapidly getting no better. Naturally there has been a great strain on the personnel in the broadcasting industry due to opening up of other technical jobs and to a certain extent due to the desire to get into something which seemingly was more active in terms of war work.

"As you know the DCB has given this matter considerable attention and the Commission in particular has lowered its requirements for skilled personnel on two or three different occasions in order to get the greatest assurance of continuity of service from what we thought was the minimum requirements from the standpoint of technical skill and qualifications. We were hopeful that that would assist the small stations in particular. I find the small stations throughout the country are harder hit than the big stations. . . .

"It will be too bad if we have a shortage in the industry and not at all fortunate that the little stations are going to be the ones hit worse. Particularly since the big stations are tending to draw those people from the little ones. I think the little stations are less in position to protect themselves in this situation than the big ones are. I hope to see that process of movement from one station to another slowed down if it can consistently be done. I think in the back of the whole thing may be an assumption that the broadcast industry is not essential in time of war—those of us at this end of the line and the industry feel that it is very essential in time of war. Something that affects the people in terms of mass communication, in terms of information, and perhaps fully as importunately in terms of existing morale.

"It can hardly be over emphasized and I think it is clear that anyone that stays with broadcasting stations and does a real job toward keeping the station on the air is doing something affirmatively to aid in the war effort. I certainly don't want to discourage anyone moving toward an active part in fighting the war but this business of trying to nudge seemingly closer to the war I think may be based upon the superficial assumption that the broadcasting industry is not doing a real job in the war. I think it is doing a real substantial job and is bound to continue to do a real substantial job. We have all got to keep it going for that reason and the knowledge of the significance of broadcasting is a real reason why we have done all we could to keep it going—so it would keep going without any lowering of standards and without any lessening of service for the full duration, and I am hopeful that skilled personnel will think twice before leaving the industry and people in the lurch here.

"Anything we can do here on the problem we are going to do. We are going to make some special studies along with the War Manpower Commission and Selective Service people—try to make some surveys of the situation and assist in any way we can to see that the man power we have got available will do the best job possible for all concerned. I don't know whether Selective Service will want to establish any policy of deferments or not but I should think that in any balancing of the interest of different activities that broadcasting ought to stand pretty high in the list."

FLY NOMINATED AGAIN

President Roosevelt on Monday of this week renominated James Lawrence Fly as chairman of the Federal Communications Commission. Mr. Fly was sworn in as chairman of the FCC on September 1, 1939, succeeding the former chairman, Frank McNinch. The Fly nomination is for a period of 7 years from July 1, 1942.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, June 22. They are subject to change.

Tuesday, June 23

Further Hearing

WFAS—Westchester Broadcasting Corp., White Plains, N. Y.—Modification of license, **1230 kc.**, 250 watts, unlimited.

Wednesday, June 24

Further Hearing

NEW—South Florida Broadcasting, Inc., Miami, Fla.—C. P., **1450 kc.**, 250 watts, unlimited.

Thursday, June 25

WMAN—Richland, Inc., Mansfield, Ohio.—Renewal of license, **1400 kc.**, 250 watts, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WEAN—The Yankee Network, Inc., Providence, R. I.—Granted modification of construction permit (B1-MP-1564) for changes in directional antenna and extension of commencement and completion dates; granted subject to further order of the Commission to require appropriate readjustment when conditions make it feasible.

WNAC—The Yankee Network, Inc., Boston, Mass.—Granted Special Service Authorization to expire November 10, 1942, to make changes in directional antenna for night use; granted with provision specifying that no operation under this Special Service Authorization will be permitted during the broadcast day until equipment tests have been made and proof of performance submitted and approved to show that the operation of the directional antenna system complies with the engineering data submitted with the application.

WEMP—Milwaukee Broadcasting Co., Milwaukee, Wisc.—Granted construction permit (B4-P-3473) to install new RCA 250-K transmitter.

WNBC—State Broadcasting Corp., New Britain, Conn.—Granted modification of license (B1-ML-1125) to move studio from New Britain to Hartford, Conn.

WGTM—Penn Thomas Watson, Wilson, N. C.—Granted authority to install new automatic frequency control (B3-F-247).

KTHS—Hot Springs Chamber of Commerce (Assignor), Radio Broadcasting, Inc. (Assignee), Hot Springs, Ark.—Granted consent to assignment of license (B3-AL-340) of Station KTHS, Hot Springs, Ark., from Hot Springs Chamber of Commerce to Radio Broadcasting, Inc.

WMRN—Frank E. Mason and Ellen Mason (Transferors), Howard F. Guthery and Florence Guthery (Transferees), Marion, Ohio.—Granted consent to voluntary transfer of control of The Marion Broadcasting Co., from Frank E. Mason and Ellen Mason to Howard F. Guthery and Florence Guthery, for a total consideration of $13,000, representing 130 shares of outstanding capital stock.

HEARINGS DESIGNATED

WOPI—Radiophone Broadcasting Station WOPI, Inc., Bristol, Tenn.—Designated for hearing application (B3-P-3438) for construction permit to operate on **550 kc.**, 100 watts night, 250 watts local sunset, unlimited time.

WDSU—WDSU, Inc., New Orleans, La.—Designated for consolidated hearing with applications for renewal of licenses of WMIS and WGRM, listed below, the application of WDSU for renewal of license (B3-R-449), and construction permit (B3-P-3424) to reinstate (B3-P-2929, as modified), for new transmitter, move of transmitter locally, increase in power and installation of directional antenna for day and night use.

WMIS—Natchez Broadcasting Co., Natchez, Miss.—Designated for hearing application for renewal of license (B3-R-1127) to be consolidated with WDSU hearing.

WGRM—P. K. Ewing, Greenwood, Miss.—Designated for hearing application for renewal of license (B3-R-847) to be consolidated with WDSU hearing.

CASES DISMISSED WITHOUT PREJUDICE

In its Memorandum Opinion of April 27, the Commission stated its policy, among other things, not to grant applications involving the use of materials for construction of new standard and FM broadcast stations. The Commission, in view of this policy, dismissed without prejudice the applications for new standard broadcast stations of the following:

Confederate Broadcasting Co., Marietta, Ga. (B3-P-3486); Walter H. Nelson, Cadillac, Mich. (B2-P-3485); Harold L. Sudbury, May McCutchen and O. W. McCutchen, d/b as Sikeston Broadcasting Co., Sikeston, Mo. (B4-P-3431); J. A. Eisele, Ft. Worth, Tex. (B3-P-3425); Green Mountain Broadcasting Corp., Inc., Brattleboro, Vt. (B1-P-3422); W. J. Harpole and J. C. Rothwell, a partnership, Plainview, Tex. (B3-P-3420); L. J. Duncan, Leila A. Duncan, Josephine A. Keith, and Effie H. Allen, d/b as Valley Broadcasting Co., Columbus, Ga. (B3-P-3415); Portland Broadcasting Co., Portland, Ore. (B5-P-3386); Etowah Broadcasting Co., Gadsden, Ala. (B3-P-3361); Walter S. Dunn, Gilmore N. Nunn, J. Lindsay Nunn and Sanford Holt, a partnership, d/b as Danville Broadcasting Co., Danville, Ky. (B2-P-3356); WJPS, Inc., Evansville, Ind. (B4-P-3293); KTOP, Inc., Topeka, Kans. (B4-P-3456); Sikeston Community Broadcasting Co., Sikeston, Mo. (B4-P-3447); B. Loring Schmidt, Salem, Ore. (B5-P-3443); William Price, Burlington, N. C. (B3-P-3163); Burlington Broadcasting Co. (R. B. Terry, D. A. Rawley, Stanley A. Cook, Rudy Fonville, d/b as Burlington, N. C. (B3-P-2490); Radio Corporation of Orlando, Orlando, Fla. (B3-P-2806); Contra Costa Broadcasting Co., Richmond, Calif. (B5-P-2964); Birney Imes, Tupelo, Miss. (B3-P-3148); J. I. Sims, Orangeburg, S. C. (B3-P-3169); Howard R. Imboden, Pulaski, Va. (B2-P-3346); R. B. Terry, D. A. Rawley, C. M. Waynick and H. A. Cecil, d/b as High Point Broadcasting Co., High Point, N. C. (B3-P-2491).

Like action was taken on the applications for new FM broadcast stations of the following:

Star-Times Publishing Co., St. Louis, Mo. (B4-PH-2); The A. S. Abell Co., Baltimore, Md. (B1-PH-27); Ashland Broadcasting Co., Ashland, Ky. (B2-PH-39); The Pulitzer Publishing Co., St. Louis, Mo. (B4-PH-30); The Gazette Co., Cedar Rapids, Iowa (B4-PH-77); Courier-Journal and Louisville Times Co., Louisville, Ky. (B2-PH-88); Gibraltar Service Corp., Philadelphia, Pa. (B2-PH-92); E. Anthony and Sons, Inc., New Bedford, Mass. (B1-PH-98); United Broadcasting Co., Cleveland, Ohio (B2-PH-99); Indianapolis Broadcasting, Inc., Indianapolis, Ind. (B4-PH-103); The Evening Star Broadcasting Co., Washington, D. C. (B1-PH-108); Globe-Democrat Publishing Co., St. Louis, Mo. (B4-PH-110); Tribune Building Co., Oakland, Calif. (B5-PH-113); The Sun Co. of San Bernardino, San Bernardino, Calif. (B5-PH-114); The Outlet Co., Providence, R. I. (B1-PH-22); Cherry & Webb Broadcasting Co., Providence, R. I. (B1-PH-84); Boston Edison Co., Boston, Mass. (B1-PH-100).

Like action was taken on applications for 500 kilowatts of the following:

WJZ, National Broadcasting Co., Inc., New York, N. Y. (Docket 3963).
WGN, WGN, Inc., Chicago, Ill. (Docket 3985).
KFI, Earl C. Anthony & Co., Los Angeles, Calif. (Docket 4095).
WJR, The Goodwill Station, Detroit, Mich. (Docket 4091).
WSM, The National Life & Accident Insurance Co., Nashville, Tenn. (Docket 4092).
WOR, Bamberger Broadcasting Service, Inc., Newark, N. J. (Docket 4110).
WGY, General Electric Co., Schenectady, N. Y. (Docket 4230).
WSB, Atlanta Journal Co., Atlanta, Ga. (Docket 4419).
WHO, Central Broadcasting Co., Des Moines, Iowa (Docket 5322).

MISCELLANEOUS

WTOC—Savannah Broadcasting Co., Savannah, Ga.—Granted modification (B3-MT-1577) of construction permit (B3-P-2944) for extension of completion date from June 15 to August 15, 1942.

WCLS—WCLS, Inc., Joliet, Ill.—Granted license (B4-L-1669) to cover construction permit (B4-P-3455) which authorized move of transmitter.

WBNY—Roy L. Albertson, Buffalo, N. Y.—Granted authority to determine operating power by direct measurement of antenna power (B1-Z-1396).

WCAH—Board of Education, City of Buffalo, Buffalo, N. Y.—Granted modification (B1-MPED-12) of construction permit (B1-PED-24) for new non-commercial educational broadcast station, for extension of commencement and completion dates to March 27 and September 27, 1943, respectively.

WBEZ—Board of Education, City of Chicago.—Granted modification (B4-MPED-11) of construction permit (B4-PED-22, for new non-educational broadcast station), for change in transmitter location to 79 West Madison St., Chicago, for changes in antenna system, and extension of commencement and completion dates from 9-29-41 and 7-1-42, to date of grant hereof and 180 days thereafter, respectively.

W65H—WDRC, Inc., Hartford, Conn.—Granted modification (B1-MPH-90) of construction permit (B1-PH-35) for new FM station, for extension of completion date to 12-14-42.

KOAC—Oregon State Agricultural College, Corvallis, Ore.—Granted modification (B3-MP-1581) of construction permit (B5-P-2422) for extension of completion date from June 1 to July 1, 1942.

WLAC—J. T. Ward, tr/as WLAC Broadcasting Service, Nashville, Tenn.—Granted modification (B3-MP-1578) of construction permit (B3-P-1250) for extension of completion date from June 1 to August 1, 1942.

Chambersburg Broadcasting Co., Chambersburg, Pa.—Granted petition of applicant to dismiss without prejudice their application for a new station (Docket 6272), and ordered such application dismissed accordingly.

Mosby's, Inc., Anaconda, Mont.—Granted motion for continuance of hearing now scheduled for June 8 to July 8, in re application for a new station.

WHIP—George F. Courrier, Transferor; John W. Clarke, Transferee; Hammond-Calumet Broadcasting Corp., Licensee, Hammond, Ind.—Granted petition for reconsideration of application for consent to the transfer of control of Hammond-Calumet Broadcasting Corp., licensee of Station WHIP, from George F. Courrier to John W. Clarke; cancelled hearing heretofore scheduled, and granted application upon condition that nothing contained herein shall be construed as a finding upon or with respect to an approval of any future transfers (including relinquishments) of control of the licensee which might arise out of further stock transfers, the exercise of voting privileges thereon, or otherwise, or the future exercise of control over the station by anyone other than the licensee.

WKAL, Inc., Kalamazoo, Mich.—Denied petition for grant of application for a new station to operate on **1230 kc.**, 250 watts, unlimited time, and on its own motion the Commission amended the notice of hearing heretofore released on the application substituting an issue referring to the Commission's Memorandum Opinion of April 27, 1942.

WGRC—Northside Broadcasting Corp., New Albany, Ind.—Granted motion for leave to amend petitioner's application to request **790 kc.**, 1 KW, unlimited, using DA, and on its own motion the Commission continued hearing now set for June 22 on this application and that of Kingsport Broadcasting Co., Kingsport, Tenn., Docket 6249, until July 22, 1942.

WROL—S. E. Adcock, d/b as Stuart Broadcasting Co., Knoxville, Tenn.—Granted motion for continuance of hearing now set for June 19 to July 21, on application for construction permit (B3-ML-1130).

WMAN—Richland, Inc., Mansfield, Ohio.—Granted motion for continuance of hearing now set for June 25 to July 27 on application for renewal of license.

WFAS—Westchester Broadcasting Corp., White Plains, N. Y.—Granted motion for continuance of hearing now set for June 23 to July 23, on application for modification of license.

KRKO—Lee E. Mudgett, Everett, Wash.—Granted petition for leave to amend its application for construction permit to substitute "The Everett Broadcasting Co., Inc.," as the applicant and to change the application to a "modification of license" instead of a construction permit.

Minor E. Bragg and Robert C. Lipscomb, d/b as Murfreesboro Broadcasting Co., Murfreesboro, Tenn.—Granted petition to dismiss without prejudice application for construction permit (B3-P-3426).

WCLE—United Broadcasting Co., Cleveland, Ohio.—Denied motion for leave to intervene in the hearing on the applications of WGAR, Cleveland, and WADC, Tallmadge, Ohio, for construction permits to operate on **1220 kc.**; exceptions noted by counsel for petitioner.

APPLICATIONS FILED AT FCC

600 Kilocycles

KSJB—Jamestown Broadcasting Co., Inc., Jamestown, N. Dak.—Authority to determine operating power by direct measurement of antenna power.

620 Kilocycles

WROL—S. E. Adcock, d/b as Stuart Broadcasting Co., Knoxville, Tenn.—Construction permit to install new transmitter, changes in directional antenna for day and night use and increase in power from 500 watts night, 1 KW day to 5 KW. Amended: to request modification of license for increase in power from 500 watts night, 1 KW day to 1 KW, using directional antenna night.

630 Kilocycles

KVOD—Colorado Radio Corp., Denver, Colo.—License to cover construction permit (B5-P-2663) as modified, for increase in power, install new transmitter, and make changes in directional antenna.

KVOD—Colorado Radio Corp., Denver, Colo.—Authority to determine operating power by direct measurement of antenna power.

640 Kilocycles

WJLS—Joe L. Smith, Jr., Beckley, W. Va.—Construction permit to install new transmitter and directional antenna from sunset at Beckley, W. Va., to sunset at Los Angeles, Calif., change frequency from **1240 kc.** to **640 kc.**, increase power from 250 watts to 1 KW, and change hours of operation from unlimited time to limited time. Facilities of WHKC contingent on WHKC going to new frequency. Amended: to omit request of new transmitter, directional antenna, and facilities of WHKC, and to request **560 kc.**, 100 watts night, 250 watts day, unlimited time.

1110 Kilocycles

KPAS—Pacific Coast Broadcasting Co., Pasadena, Calif.—Modification of construction permit (B5-P-3261, as modified, for a new station) for extension of commencement and completion dates from 1-13-42 and 7-13-42 to 7-13-42 and 9-13-42 respectively. Amended: to request extension of completion date to 1-13-43.

1300 Kilocycles

WOOD—King Trendle Broadcasting Corp., Grand Rapids, Mich. —Modification of construction permit (B2-P-2874, which authorized increase in power, installation of new transmitting equipment and directional antenna for night use, and move of transmitter and studio) for changes in type of transmitting equipment and changes in directional antenna.

1310 Kilocycles

WDOD—WDOD Broadcasting Corp., Chattanooga, Tenn.—License to cover construction permit (B3-P-2641) as modified, for increase in power, installation of directional antenna for night use, and move of transmitter.

WDOD—WDOD Broadcasting Corp., Chattanooga, Tenn.—Authority to determine operating power by direct measurement of antenna power.

1330 Kilocycles

KFAC—Los Angeles Broadcasting Co., Inc., Los Angeles, Calif.—Construction permit to increase power from 1 to 5 KW, install new transmitter, install directional antenna for night use and move transmitter.

1400 Kilocycles

WGBR—Eastern Carolina Broadcasting Co., Goldsboro, N. C.—License to cover construction permit (B3-P-3488) for rebuilding station destroyed by fire and move studio.

WGBR—Eastern Carolina Broadcasting Co., Goldsboro, N. C.—Authority to determine operating power by direct measurement.

1490 Kilocycles

KOVC—KOVC, Inc., Valley City, N. Dak.—Modification of license to cover changes in vertical antenna affected by storm.

TELEVISION APPLICATION

W2XCB—Columbia Broadcasting System, Inc., Portable-Mobile. —Modification of construction permit (B1-PVB-46) as modified for a new television relay station, requesting extension of completion date from 7-7-42 to 1-7-43.

MISCELLANEOUS APPLICATIONS

WEJO—National Broadcasting Co., Inc., Portable-Mobile (Area of Cleveland, Ohio).—Modification of license for change in area normally served by station from Cleveland, Ohio, to San Francisco, Calif., and change in standard station with which it is to be used from WTAM, Cleveland, Ohio, to KPO, San Francisco, Calif.

KEJG—National Broadcasting Co., Inc., Portable-Mobile (Area of Denver, Colo.).—Modification of license for change in area normally served by station Denver, Colo., to San Francisco, Calif., and change in standard station with which it is to be used from KOA, Denver, Colo., to KPO, San Francisco, Calif.

KVOS—KVOS, Inc., Bellingham, Wash.—Modification of construction permit (B5-P-3237) for installation of new transmitter, install directional antenna for day and night, change in frequency, increase in power and move transmitter, requesting extension of completion date from 6-28-42 to 12-28-42.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

California Brewing Association—An amended and supplemental complaint charging misrepresentation in the sale of Acme Beer has been issued against Acme Breweries, trading as California Brewing Association, 762 Fulton St., San Francisco, and Acme Brewing Co., 2080 East 49th St., and Bohemian Distributing Co., Ltd., 2060 East 49th St., Los Angeles. (2888)

Roebling Luggage Corp., 121 Liberty St., New York, in a complaint is charged with misrepresentation in the sale of trunks, luggage, leather goods, sporting goods and novelties. (4771)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Maurice L. Myers, trading as Charles B. Joyce Co., 2425 North Halstead St., Chicago, has been ordered to cease and desist from selling or otherwise disposing of merchandise by means of a game of chance, gift enterprise or lottery scheme. Commission findings are that the respondent, dealing in radios, clocks, flashlights and other novelty merchandise, sold assortments of articles so packed and assembled as to involve the use of a lottery scheme when the merchandise was distributed to consumers. One assortment, according to findings, consisted of a radio together with a punch board device. (4476)

Segal Lock & Hardware Co., Inc., its subsidiary, Norwalk Lock Co., and Louis Segal, president of both corporations, all of 261 Broadway, New York, has been ordered to cease and desist from misrepresentation in the sale of a lock cylinder designated the "Segal Pick-Proof," and from unfairly disparaging competing products. (3896)

Shepherd's Tailoring Co., Inc., and Walter H. Hahn and William Trignani, officers and directors of the corporation, 1102 Walnut St., Philadelphia, have been ordered to discontinue lottery methods and misrepresentation in the sale of men's suits or other garments. (4716)

A. E. Staley Mfg. Company—Prohibiting price discriminations in connection with the sale of glucose, in violation of the Robinson-Patman Act, a cease and desist order has been issued against A. E. Staley Manufacturing Co. and The Staley Sales Corp., Decatur, Ill. (3803)

Ultra-Violet Products, Inc., 5205 Santa Monica Blvd., Los Angeles, has been ordered to cease and desist from misrepresenting the therapeutic value of a lamp designated "Life Lite," which radiates ultra-violet rays and is intended for use in the treatment of various ailments and diseases. (4407)

Webster Electric Co., Racine, Wis., has been ordered to cease and desist from misrepresentation in the sale of fuel units for oil burners. According to Commission findings, the respondent formerly advertised that its fuel unit was the only device of its kind which had the outboard bearing outside of the seal, and that its unit had the largest capacity of any unit on the market, when such were not the facts. The Commission's order directs the respondent to discontinue these representations. (4456)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Carleton Woolen Mills, Inc.—A stipulation to cease and desist from branding a wool product known as "collar cloth" in a manner contrary to the provisions of the Wool Products Labeling Act of 1939 has been entered into by Carleton Woolen Mills, Inc., Rochdale, Mass., and Edward P. Leveen, Sr., and Anna M. Leveen, co-partners trading as Edward P. Leveen & Co., 19 Union Square, West, New York. The product, used as a reinforcement for the under side of coat collars, is manufactured by the Carleton Company and sold and distributed to the trade by the Leveen co-partnership. (3489)

Coffelt Chemical Co., Inc., 700 Elton Ave., New York, have entered into a stipulation to cease and desist from representing that the preparation designated "Coffelt's Never Failing Hair Coloring" nourishes or rejuvenates the hair, or, through use of the word "restores" or by any other means, that it restores the original or natural color of the hair. (02992)

Electric Household Utilities Corp., trading as Hurley Machine Division of Electric Household Utilities Corp., 54th Ave. and Cermak Road, Chicago, in the sale of washing machines, stipulated to cease advertising that "Thor Washers" are guaranteed or warranted, without plainly disclosing the exact terms and conditions of such guaranty or warranty. (02991)

General Foods Corp., 250 Park Ave., New York, stipulated it will cease representing that in cake baking its product designated "Swans Down Cake Flour" is preferred to any other flour by "three times as many women," or that three times as many home bakers use "Swans Down" as any other cake flour, without plainly excluding from such comparison all-purpose flour. (02993)

Gloucester Fish Pier Fillet Co., Inc., Gloucester, Mass., entered into a stipulation to cease and desist from use of the word "perch" to describe rosefish, and the word "perch," either alone or with the words "sea" or "ocean," in referring to rosefish, to imply that the fish so designated is perch or yellow perch. The stipulation provides that when the words "sea perch" or "ocean perch" are used to refer to rosefish, they shall be accompanied by the word "rosefish." (3491)

Gordon Brothers, 654 Grand St., Brooklyn, engaged in the sale of a portable Turkish bath cabinet designated "Perspir-ator," entered into a stipulation to discontinue representing that use of the device is a cure or remedy for excess weight, or that it will keep the pores open, cure colds, help replace sallow sluggish skin with a healthy youthful glow and help to eliminate blackheads, or the cause of skin blemishes. (02994)

Mahdeen Co., Nacogdoches, Tex., has entered into a stipulation to cease representing that the preparation designated "Mahdeen" is a competent treatment or an effective remedy for dandruff, itching scalp or falling hair; that millions of users have found that Mahdeen produces or maintains perfect scalp health and revitalizes hair health; that Mahdeen has the capacity to eradicate dandruff or accomplish more than removal of the exfoliated scales of dandruff; and that the preparation promotes the growth of hair and is a competent remedy for the treatment of exematic scalp trouble or any similar affliction. (3487)

Pompeian Company, Inc.—An amended and substitute stipulation to discontinue certain representations in the sale of a cleansing agent for the skin designated "Pompeian Milk Massage Cream" has been entered into by The Pompeian Co., Inc., 4201 Philadelphia Ave., Baltimore, and The Joseph Katz Co., 16 East Mount Vernon Place, Baltimore, an agency which disseminated advertisements for the Pompeian Company. (02736)

J. L. Prescott Co., 27 Eighth St., Passaic, N. J., stipulated to cease and desist from representing that its washing and bleaching solution designated "Oxol" is a sterilizer which kills all germs in dish water within three minutes after being added; that it removes grease stains and removes all stains from tile and porcelain; that Oxol is kind to the hands; and that it has been tested on the viri of common colds and measles and has been found to destroy them. The stipulation is supplemental to Stipulation No. 01239, accepted by the Commission in 1936. (01239)

Raven Mills, Inc., and Lee Earl Simpson and Theodore S. Simpson, Jr., trading as Raven Sales Co., 1215 Broadway, Council Bluffs, Iowa, stipulated that in the sale of a livestock remedy designated Raven "Stopzit" they will discontinue making any representation, the effect of which causes purchasers to believe that the product constitutes an adequate treatment for white scours or scours in sheep, swine or cattle, or that the condition known as white scours is caused by changes in the weather. (3490)

Velva Supply Co.—A stipulation to discontinue certain representations in the sale of permanent wave pads designated "Patriot Croco Pads" has been accepted from Herbert, Sidney R. and Elmer Lipman, trading as Velva Supply Co., Velva Beauty Products and Evans-Crowder Co., 4145 Cass Ave., Detroit. (3488)

FTC CASES DISMISSED

Allegations of unfair competition in violation of the Federal Trade Commission Act, contained in five complaints against cosmetic distributors, have been dismissed by the Federal Trade Commission. The complaints, however, retain the allegations that the respondent distributors have violated the Robinson-Patman Antidiscrimination Act.

The complaints originally alleged that the respondents violated both acts in furnishing the services of demonstrators of cosmetics to the respondents' merchant customers.

The respondents are Richard Hudnut, Hudnut Sales Co., Inc., and William R. Warner & Co., Inc., all of New York (2973); Elmo, Inc., and Elmo Sales Corp., Philadelphia (2974); Charles of the Ritz, Inc., and Charles of the Ritz Distributors Corp., New York (3017); Primrose House, Inc., New York (3039); and Elizabeth Arden, Inc., Elizabeth Arden Sales Corp., and Florence N. Lewis, principal stockholder, all of New York (3133).

The remaining counts of the complaints allege violation of the Robinson-Patman Act through the respondents' practice of furnishing to some customers the services of demonstrators which are not granted to other competing customers on proportionally equal terms.

The complaints against the Richard Hudnut and Elizabeth Arden organizations also retain charges of price discrimination in violation of the Robinson-Patman Act.

1626 K STREET, N. W. WASHINGTON, D. C. Vol. 10, No. 25, June 26, 1942

Sanders Bill Hearings

On Thursday of this week Mr. Fly continued with his criticism of the Bar Association's and NAB's proposals. Under questioning he conceded that the Act could appropriately be amended by adoption of the NAB proposal for declaratory rulings provided they rest in the discretion of the Commission and are not mandatory.

Representative Bulwinkle strongly expressed the feeling that the two-year term of licenses is much too short considering the investment licensees must make, making a comparison with railroads. Under vigorous questioning on this point, Mr. Fly agreed to get together with him to consider appropriate amendments.

Likening the Network Regulations to the Holding Companies Act, Mr. Sanders commented on the fact that with about a line and one-half of authority in the Communications Act, and without further declaration of policy by Congress, the Commission came out with the Network Regulations dissolving the networks in 90 days, whereas the public utilities had 10 years to dissolve. To which Mr. Fly retorted that that regulation (dual network) is now removed from the books. Replying to a question by Mr. Halleck, Mr. Fly stated that removal of it from the books was not an admission that the Commission was wrong in putting it on the books. Mr. Sanders inquired if the requirement of frequent renewals didn't have something to do with the acceptance of some of the regulations by NBC. Mr. Fly replied in the negative.

The hearings will resume Tuesday, June 30, at 10 a. m.

Last Friday, Mr. McGranery asked Mr. Fly about the "mackerel in the moonlight" episode at the St. Louis Convention. We quote from the unrevised transcript:

"Mr. McGranery. Mr. Fly, speaking of the public interest, can you tell us something now about how you feel with respect to the public interest in your program service with the broadcasting stations, and your operations; operations in the program service?

"Commissioner Fly. You are asking me as to whether it is generally satisfactory, and the answer is—

"Mr. McGranery. I would like to have a complete picture of what you feel or how you feel with respect to the operation of the program service under present-day conditions.

"Commissioner Fly. Well, of course, you gentlemen understand—

"Mr. McGranery. In other words, I think that this committee is entitled to some definite and specific knowledge as to what you consider in the public interest, so that we will have some fixed policy.

"Commissioner Fly. Now, you gentlemen have placed upon us a certain fundamental line of duty. You have delineated our functions and, of course, we have got to pass judgment on the question as to who will render the best public service and——

"Mr. McGranery. I am not speaking about that now. Mr. Fly.

"Commissioner Fly. Well, I want to make this clear, and then we have to form a judgment upon that generally in advance and then at some later time we may have to review the conduct of a broadcaster as a whole; review the general quality of the broadcasting as a whole, in reviewing his application say on renewal proceedings.

"But, I am going to come back, Mr. McGranery, to your question.

"I want to get this problem delineated, but you have said that we do not have any power of censorship. Therefore, I have not taken upon myself at any time—and incidentally, there has been a lot of talk here about censorship—I might say that during my time at the Commission there has been no proceedings started on the basis of the quality of the program conduct of a station. All of this talk about censorship is just bringing in a bugaboo, because it has not existed.

"I think that Mr. Miller of the National Association of Broadcasters said that some broadcasters might make some little technical slip and then he would go off of the air; his life was at stake.

"Many of them have made many slips, and many of them have done a bad job of broadcasting. I do not make that charge in general. But, the point that I make is that not only has no station been taken off of the air for that sort of thing, during the time that I have been there. There have been no proceedings of that sort of thing instituted and that sort of a suggestion I think is wholly unwarranted, and I believe is brought in for some other purpose that is not so readily obvious.

"Now getting back to Mr. McGranery's question: I do not know whether this committee would want me to comment generally upon the program conduct of the radio stations or not. I will say that there are some things that are mighty good in that radio service.

"Mr. McGranery. That is not my question, Mr. Fly. I am sorry, but my question was, what is your idea of the public service with respect to the operation of the broadcasting services now——

"Commissioner Fly (interposing). Well, I would say now, sir——

"Mr. McGranery (continuing). With respect to their programs?

"Commissioner Fly. I would say now that the problem of information is perhaps the one which is predominant, and also information; news; commentary; the forum, the equal opportunity of candidates to go on the air; the debate of controversial issues, always bearing in mind the necessity for absolutely fair treatment, where one side of the controversial issue is presented, then, equal facilities be given for presentation of the other side. That whole process of information, of news, of fair comment, of public debate upon vital public issues—I think that probably he is today the most significant feature of the service.

"I think the educational features are important.

"I do not think that by and large, the entertainment feature is in times of peace not only important, but in times of peace the entertainment features may be, and maybe it is predominant, because in the long run, the audience is attracted and held by means of entertainment, and that provides a useful and helpful diversion for the citizens generally and will tend to hold the audiences for more serious operations that come along when you move into your debates on public issues and that sort of thing.

"I believe now that the general field of views; comment; debate; and education; entertainment—I believe those roughly are predominant.

"Mr. McGranery. Has the Commission ever discussed utilizing its licensing power to control communication of facts and opinion?

"Commissioner Fly. No; I do not think that the Commission has ever discussed that. It has always been an obvious fact that the Commission could not utilize its licensing power to that end and the Commission has not utilized it to that end, and the Commission has stayed so far away from that, that I think the answer is, no, we just have not discussed it.

"Mr. McGranery. It is true, or I have been certainly badly misinformed, that your law department recommended it.

"Commissioner Fly. No.

"Mr. McGranery. Your law department did not?

"Commissioner Fly. No.

SANDERS HEARINGS

(Continued from page 355)

"Mr. McGranery. No one in connection with your law department recommended that?

"Commissioner Fly (interposing). Let me say—

"Mr. McGranery. Just let me finish my question. That you utilize your licensing power to control the communication of facts and opinion?

"Commissioner Fly. Oh, no; no; that has never been suggested.

"Mr. McGranery. What about the question of the foreign language broadcasters?

"Commissioner Fly. Would you ask a more specific question, sir? That is a big subject and I can talk an hour on it, and I do not want to take your time.

"Mr. McGranery. I realize that; but have you at any time indicated to the foreign language broadcasting people what they should do and what they should not do?

"Commissioner Fly. I do not think I have ever talked to the foreign language people generally. I have been very sympathetic with the position of the foreign language broadcasters. I met with them, I think about 20 of them, a couple of years ago, and we discussed the problems of mutual interest, and in recent months I have met with some representatives, committees of foreign broadcasters.

"You see what is happening there, you have here oh, as many as 200 stations, that are broadcasting in foreign languages, including German and Italian, in particular. Well, that has led to a flood of complaints, and it has led to a very substantial fear that material of a subversive character might be fed out over the broadcasting stations in those foreign languages, and I must say that they have operated under some handicap in view of the fact that they have been in the foreign language field, and there has been a pretty serious effort on the part of the industry, and it has had the cooperation of the Government generally, to try to see that there is nothing subversive in the character of the material that is put out over those stations.

"We are prepared to cooperate with the industry on that and with the committee which they have set up. For example, if they want the station monitored, want a complete record of the output of the station, why, we would furnish it to them, and in general we would help them in dealing with their own problems in any way that we can.

"I also say that there have been no proceedings before the Commission; no question on renewal of license, or on revocation of license, that has been raised because of the operations in that field; but it is a pretty difficult situation due to the questions that have naturally arisen when people generally hear the foreign languages, and particularly the language of our enemies going out over the air.

"At the same time, I think I ought to make it clear that I have clung to the thought from the outset that since these stations are owned by American citizens who are cognizant of their duties to the United States and to the cause for which we are fighting, I have felt there that those stations were really a great asset to the country; that with a great number of people, that is the only way to get across the facts as to what this country is about and what this country represents in terms of the international situation, and really to keep the United States viewpoint in there.

"If that were not done, then people who cannot speak the English language would be driven to sources exclusively in their own languages and to sources that are much less responsible than the American citizen who is broadcasting.

"Mr. McGranery. Did you ever discuss with them the National Association of Broadcasters, or their association with the National Association of Broadcasters?

"Commissioner Fly. Yes, we had some discussions.

"Mr. McGranery. Did you tell them that you would have nothing to do with them if they associated themselves with the National Association of Broadcasters?

"Commissioner Fly. Well, hardly that. What I did do was this: You see, there were competing organizations in this industry, that is, trade associations, and certain preliminary efforts had been made to join the group in their work with one association or the other, then at the time this subject came up, there was a move to shift over from cooperation with a competing association to this other association and I told them I did not think that so far as we were concerned we could take any hand in that and if we were to cooperate in the work it would have to be free of any of those competing groups.

"Mr. McGranery. I do not follow you on that. You said that, as I understand, you told them that you did not want them to associate with the National Association of Broadcasters at all.

"Commissioner Fly. Well, the same is true of the other competing groups, with the conflicts there of the Government with regard to cooperation, it could not move in and pick out one association to move along with when there was a conflict and a movement away from another association.

"Mr. McGranery. Well, what do you have against the National Association of Broadcasters?

"Commissioner Fly. Well, the case there simply is that it is dominated by the two big networks.

"Mr. McGranery. I mean where, in the law, do you find the authority to justify your telling any group that they must belong to a certain association or they cannot belong to it?

"Commissioner Fly. I never told them any such thing. I have always told these broadcasters, so far as we were concerned, that they can belong to any association that they want to. I have never suggested to them that they cannot belong to any association and as a matter of fact, the holders of these licenses are going in every day as members of these different associations.

"Mr. McGranery. But your feelings against the National Association of Broadcasters is rather strong, is it not?

"Commissioner Fly. No; no; my feeling against the National Association of Broadcasters is not strong; but the National Association of Broadcasters has moved in on this network fight, purporting, as you see, to represent the individual stations throughout the country; but in fact representing the two big networks, as against the other network and as against the views of a great number of the stations throughout the country, and doing that without consultation with the stations throughout the country, and naturally when that happens, and when there are other evidences that an association like that is under the domination of the two big networks, they have got to be recognized for what they are.

"Now, so far as dealing with them is concerned, we will deal with all of them, any and all of the time, on the basis of what they are.

"Mr. McGranery. Now, Mutual has withdrawn from the National Association of Broadcasters, have they not?

"Commissioner Fly. I do not think Mutual has any membership in it, sir. Mutual does not own any stations. And, I do not think the networks, as such, have membership.

"Mr. McGranery. Did you attend the convention in St. Louis?

"Commissioner Fly. I certainly did.

"Mr. McGranery. And——

"Commissioner Fly. And, I will give the complete record on that, if you want it.

"Mr. McGranery. And, you withdrew from that convention?

"Commissioner Fly. Pardon me.

"Mr. McGranery. You withdrew from that convention?

"Commissioner Fly. Well, I stayed at St. Louis for a considerable time, perhaps too long. I would not say that I withdrew from the convention.

"Mr. McGranery. Did I get you correctly, where you said that you had no feeling particularly against the National Association of Broadcasters?

"Commissioner Fly. That is right.

"Mr. McGranery. Just a moment.

"Commissioner Fly (interposing). I think, by and large——

"Mr. McGranery. Now, just a moment.

"Commissioner Fly (interposing). The National Association of Broadcasters——

"Mr. McGranery. Just a moment.

"Commissioner Fly. I want to make that point clear.

"Mr. McGranery. Just a moment; let me complete my question.

"Did you say that you had no feeling against the National Association of Broadcasters?

"Commissioner Fly. I did.

"Mr. McGranery. I have a direct quotation here in which it is reported that you said that 'The National Association of Broadcasters is like a dead mackerel in the moonlight. It shines and stinks.'

"Commissioner Fly. That is my choice phrase, sir. And, would you read the entire quote? I don't say the National Association, I believe, even though it has been two years. I think you will find you omitted a few words there.

"Mr. McGranery. Well 'It is like a dead mackerel in the moonlight. It shines and stinks.'

"Commissioner Fly. Would you read all of the words there? I think it referred to the management, did it not?

"Mr. McGranery. You go ahead and tell us now.

"Commissioner Fly. Well, you have the speech there.

"Mr. McGranery. That is right.

"Commissioner Fly. I cannot give the speech again.

"Mr. McGranery. I am not asking you to. The only thing that I am asking you to do is reconcile your first statement that you had no feeling against the National Association of Broadcasters——

"Commissioner Fly. You will find the key to the answer if you will give the full quote. As I recall the quote, it referred to the management and that is your answer. It was quite explicit at the time.

"I have never expressed any ill will toward that gathering of broadcasters. They are a fine lot. They are somewhat misled.

"Mr. Crosser. Are you through, Mr. McGranery?

"Mr. McGranery. No, sir; I am not.

"You opposed the admission of the networks to the National Association of Broadcasters, did you not?

"Commissioner Fly. I did not.

"Mr. McGranery. Did not?

"Commissioner Fly. No, sir. My position on the entire thing is that whatever the Association is in fact, and whatever it represents, we will meet with it and deal with it on that basis.

"Mr. Crosser. Have you concluded, Mr. McGranery?

"Mr. McGranery. No. I have just this one other question, Mr. Chairman.

"Has the Commission ever made a comparative valuation of the program service between the N. B. C., the C. B. S. and the Mutual?

"Commissioner Fly. No, sir. The only thing we did do, at the request of the Senate Interstate Commerce Committee is we made a little survey of the public discussions. That applied to all of the broadcasters, generally. I do not think there has ever been anything though that could be deemed a comparative study of program service with one group as against the other.

"Mr. McGranery. That is all, Mr. Chairman.

"Mr. Crosser. Mr. Sanders.

"Mr. Sanders. You say that your reference to the National Association of Broadcasters as a dead mackerel and it shines and stinks in the moonlight, is intended to refer to the management and not to the Association.

"Commissioner Fly. Let me say——

"Mr. Sanders. Let me finish my question. Is that the differentiation you make?

"Commissioner Fly. Well, sir, have you got the statements that were made there at St. Louis?

"Mr. Sanders. No, sir; the first I ever heard of it was just this colloquy between you and Mr. McGranery.

"Commissioner Fly. If you would read those two speeches—and I will be glad to get them for the record—that would give you the whole story, and give you precisely what was said at the convention; what was said about the Government and about me and the Commission, and what I said about the management of the Association. It is very good reading, and I shall be happy to put them both in this record for you gentlemen.

"Mr. McGranery. In other words, there is a very happy relationship existing between the Chairman of the Commission and the National Association of Broadcasters.

"Mr. Sanders. I am very serious about this. We are engaged in a serious controversy or rather serious investigation which is controversial, and if one of the Federal commissions or Commissioners has such a strong feeling toward a group of individuals who have a very vital interest at stake before that Commission, it seems to me that we should get to the bottom of it, and I understood you to say—I never heard of this before—maybe I do not read the papers as much as I should, but I read all I can anyway, but—

"Commissioner Fly. You understand—

"Mr. Sanders. Let me finish my question.

"Mr. Crosser. Let him complete his question.

"Mr. Sanders. As I understand your reference to the dead mackerel stinking in the moonlight, was to the management and not to the Association?

"Commissioner Fly. Yes, sir; and that was on a particular occasion two years ago, and I think, sir, if you are going into that, you had better have the full record on it. Let me submit it.

"Mr. Sanders. I have no objection.

"Commissioner Fly. I would be happy to read the whole statement, if you want it.

"Mr. Sanders. Well, I think that is up to you. You can submit anything that you want to. I am sure that the Committee will be pleased to let you insert in your remarks anything that is relevant and material.

"But, the question I had in mind is how can you differentiate between the management and the network; the management and the Association; the management, presumably representing the major control of the network Association—and from a reading of the newspapers, I understand that the present management has been recently re-elected.

"Commissioner Fly. I was distinguishing between the management group of the Association and the hundreds of members, broadcasters, and that incidentally is a distinction that is traditional—

"Mr. Sanders (interposing). Well, but you try—

"Commissioner Fly. In many, many cases. To take an outstanding case, I assume that all of you gentlemen disapprove of Mussolini. I doubt if any of you disapprove generally of the great bulk of Italian people.

"Mr. Sanders. Well, we are trying specifically to get the Italian people to oust Mussolini and put in another group. Are you trying to get the National Association of Broadcasters to oust the present management and put in somebody else?

"Commissioner Fly. I am doing nothing, but if you want my suggestion, I will tell you, I think it would be a good idea.

"Mr. Sanders. Do you believe—

"Commissioner Fly (interposing). I really think it is high time that these stations—and this goes basically in this network fight—and that is all you are talking about—into this network fight, as to whether a limited number of individuals, two or three in New York, are going to dominate all of the local broadcast stations throughout this land.

"Now, that is your question.

"Now, if you license the people, or authorize us to license them in their localities, and you intended that we should tell them that they owe no duty to their localities; pay no attention to the local public needs; pay no attention to the duty of selection of programs from the best sources of available material, whatever they may be, and that they must be dominated from New York, why then I think that the law ought to be written up in that way and hand this thing over to those people. And, that is the same thing that you have got when you talk about these hundreds of broadcasters who are brought in there and that they are brought under the domination of the two big networks—and, don't you think, sir, that they do not have an influence, when a network with that contract, with that affiliation contract and with all of the big juicy advertising that goes with it; when that network holds the life and death power over those stations throughout the country, do not think that they do not have an influence over those stations through that fact alone. In addition to that they are in control through the exclusive option contracts of all of the choice hours of the stations throughout the land, and you can see there that they have complete control of them, and if you want to see whether that is true or not, move in on your local station and try to speak to your home people on a local public issue of paramount importance; try to move in sometime when NBC and Columbia have got a program scheduled and see where you land.

"Mr. Sanders. I have one advantage over you in that I think I have not any particular emotion or passion or prejudice regarding these various people.

"Commissioner Fly. I want to say something on that, sir.

"Mr. Sanders. I wish you would.

"Commissioner Fly. I have only one emotion here and that is that this is a public business and that these broadcasters are in there to render a public service, and when we license them, just as you have authorized us to do, to serve their own localities, and serve those localities to their best interests, and to exercise their own judgment in doing so and in making those facilities available for local purposes and choosing those programs for the best sources available, whatever they may be, whether it is A Network, B Network, or X Network; then if that is emotion, then I want to be on that side; and you may call it emotion, but that is the only feeling I have on the subject. That is my philosophy of the function of a broadcaster.

"Mr. Sanders. Do you mean that the people whom you characterize as a dead mackerel stinking in the moonlight are a part of the public whom you and I both are presumed to serve?

"Commissioner Fly. No; that is a very small group of individuals under the domination of two networks.

"Mr. Sanders. They are not part of the public?

"Commissioner Fly. Pardon me.

"Mr. Sanders. They are not a part of the public, then?

"Commissioner Fly. Well, certainly; the whole industry; the whole broadcasting industry should not be made to serve them exclusively as distinguished from the public.

"Mr. Sanders. That was not my question.

"Commissioner Fly. Well, that is my answer.

"Mr. Sanders. I am trying to find out whether you figure that these 'dead mackerel' are a part of the public.

"Commissioner Fly. No; they are insignificant so far as the public is concerned, except as they are permitted to move in here and dominate this group.

"Mr. Sanders. And, as far as you are concerned, they have no rights at all?

"Commissioner Fly. They have no rights to dominate this industry.

"Mr. Sanders. That was not my question, Mr. Fly.

"Commissioner Fly. They have the same rights as any other individual with comparable positions. I have said nothing about their rights, and you know that I have not.

"Mr. Sanders. I have, and I am trying to get your answer. Further, do you believe that this feeling, rather strong feeling, characterizing a large segment of the public that naturally has to deal with your commission, characterizing it as a dead mackerel that stinks in the moonlight, is a condition that should be taken into consideration by the Congress in dealing with this legislation?

"Commissioner Fly. Well, if you want to turn this vast industry, with its significance to 130 million people over to a couple of men in New York, you can do it. You can go to work and write an act along these lines, and if you adopt some of the proposals that are brought here by the National Association of Broadcasters, and by the Bar Association, that is precisely what you are going to do; but so far as I am concerned, this industry belongs to the people, and that is where I am going to stick.

"Mr. Sanders. Let me get this straight.

"Commissioner Fly. I think it is about time, sir. I really think—I do not think at any time, sir, you have wanted to move in here on behalf of a monopoly and on behalf of mechanism that controls the only practical instrument of free speech we have in this country. I do not think you want to see that lodged in single hands, but I do want to say that if you confuse the purposes of your bill—and those purposes, I take it, were laudatory—if you confuse those purposes with the purposes proposed by these other gentlemen, then you have got an entirely different kettle of fish.

"Mr. Sanders. You are quite right in your statement as to my purpose. I personally am not wedded to the recommendations of the Bar Association.

"My purpose was to have an investigation and a part of the reasons for that investigation was the statement that was made on frequent occasions that you, as Chairman, were so prejudiced against two of these organizations that they could not get a square deal before you, and I am wondering if that is true. I do not know. I have never had any dealing with you or these broadcasting associations, or with the networks; but I am wondering now, and I am asking this really——

"Commissioner Fly. I hope that you will ask it and let me answer it.

"Mr. Sanders. Let me finish my question here.

"Commissioner Fly. I hope so.

"Mr. Sanders. You say that the CBS and the NBC, you characterize, I take it, as 'dead mackerel'. Would you put the Mutual in the same category of fish?

"Commissioner Fly. May I answer the first question first, as to whether I am prejudiced against two of the networks. I think that is an important question.

"Mr. Sanders. I do, too.

"Commissioner Fly. I think it is important that you let me go into that.

"I do not think that any witness has come here and endeavored to say that I have shown any prejudice against any one of these networks.

"Mr. Sanders. You said that you referred to them as dead mackerel stinking in the moonlight. You are the only witness who has done that.

"Commissioner Fly. I have been doing this job of investigating, and so far, I know that the record fails to show any such contention on the part of any individual. I have given my answer to that.

"I think the National Broadcasting Company, and the Columbia Broadcasting System are splendid organizations in many ways. They are doing a vast public service that ought to be preserved and in many ways they are rendering an essential public service and in many ways they are doing a high quality job, even though I do not approve of all of it.

"Now the criticism that I have is a basic criticism. It is not one of feeling. It is not one of emotion. It is one of basic philosophy and it is philosophy which you gentlemen have written into the law, and which I am sworn to abide by, and that is that this is a public service; that when these licenses are handed out to the licensee then they get not merely the privilege, but the duty of the license, and they are obliged to serve the public under that license; to exercise that responsibility themselves, and to serve their own local public interests as well as other interests, and when these two networks dominate those stations throughout the country; throughout the important hours of the day and of the night, and tell them what they must take and what they may not take; when in effect they have a block booking on their time, and in general exercise a domination over all of those individual broadcasters, then I think to that extent they are wrong, and I criticize their business methods.

"I have no quarrel with any of these individuals, and I have no quarrel with a great amount of their public service activities; but when it comes to this one issue as to their dominating the entire industry, there we have differences of opinion and I think you do too, sir.

"Mr. Sanders. You do not put the Mutual in the same 'kettle of fish' as it were?

"Commissioner Fly. Well, now, I have explained why I did not do that; but to the extent they adopt the practices, I would put them in there. The Mutual has not control of all of the time of its affiliated stations throughout the country with exclusive options; and those stations have had a freedom in operation of their own stations and selection of programs and in station policies.

"Now, to that extent, the Mutual operation does not run counter to the law and to the basic philosophy which you gentlemen have put in here; but whenever and to the extent they move into that field of exclusive optioning to control the entire life of the stations throughout the country, then they are going to come under precisely the same criticism as the other nets.

"I must say that the field of differences between the Commission and these other two nets, has narrowed down to relatively small points.

"We have the cooperation of the two big nets over a substantial area of this field and particularly the National Broadcasting Company has taken substantial steps to move to bring its operations in accordance with those regulations.

"Now, in many ways they have been very cooperative. We have no running fight with them. As a matter of fact, we are working shoulder to shoulder with them and helping them to adjust their operations in accordance with the rules.

"Now, the rules call for separation of the two national networks. I have found the company owned by the NBC; I have found cooperation and on my end, I have tried to cooperate with them in an effort to set up those two networks separately and to get that Blue Network not merely on an independent basis, but on a sound business basis, and to enable them to make an effective disposition of it in due course, and in many other ways we have an extensive area of cooperation, and I do not want, with any speechmaking here, to create the impression that there are such wide divergencies of opinion as might be suggested by isolated statements.

"Mr. Sanders. You recognize the fact that to make our society work it is essential, of course, that we all agree on this, that people that appear before courts and before bureaus having quasi-judicial powers, such as yours, should not only get a square deal, but that they should have every confidence that they are getting a square deal; that is, that they not only get it, but believe that they get it—not in every case, of course, but society as a whole should believe it. That is true, is it not?

"Commissioner Fly. Well, of course that is true, and what evidence is there on that point?

"Mr. Sanders. Well, the point I am getting at——

"Commissioner Fly (interposing). Frankly, sir, I do not think a statement of that kind is warranted unless we have evidence on it.

"Mr. Sanders. The only evidence I have is your own statement here today, and I have been wondering——

"Commissioner Fly (interposing). I have tried to make it very clear——

"Mr. Sanders. Let me finish my statement.

"I was wondering, if I represented either of these networks, in view of the statement that was attributed to you by Mr. McGranery, and your statement here this morning, if I represented them before you, I would wonder if you felt as kindly toward me as I would want my judge to feel.

"Commissioner Fly. On what issues?

"Mr. Sanders. If you thought that I was a dead mackerel that stunk in the moonlight.

"What I am getting at is, do you not think that those kind of remarks are——

"Commissioner Fly (interposing). May I say——

"Mr. Crosser. Let him finish his question.

"Mr. Sanders (continuing). —very unfortunate.

"Commissioner Fly. That was not directed to issues of this kind. That was directed to the functioning of a convention in which I had what turned out to be a pretty significant part. At the moment I did not think of any significance there; but that had to do with the functioning of the convention and with two or three men who were running the convention. The text of it will show you so. It has nothing to do with the quality of the men in these big networks generally, and it has nothing to do with the quality of the job that they are doing over the wide area, and I do not want, by any seeming opposition to the ideas which your questions reflect here, to create any basis of dissension where we have a cooperative approach.

"I think we should continue to have it, and I do not think it should be impaired, and I tell you again, sir, that the only differences are differences on the basic policy in connection with the control of the broadcasting stations of this country.

"Now, that is basic, and that is something that is not going to be settled by dialectics or forensics. That is an important basic issue which the courts are going to decide, and if the courts do not hold that the broadcasters of this country do control their own business, then I think that Congress ought to write it into the law and affirmatively express it.

"Mr. Sanders. Some of the witnesses who have testified here have suggested the advisability of separating the necessary prosecuting end of this commission from the judicial end, and, of course, any bureau, any commission, charged with the enforcement of the law has the dual purpose there, one, to investigate a violation of the law and to enforce the law; but would you comment upon that as to the desirability or not at this time?

"Commissioner Fly. Well, that is one of those things that has been debated in regard to all of the commissions for a long time.

"Mr. Sanders. Yes; I know.

"Commissioner Fly. It is really of no great significance to us one way or the other, because we very seldom have investigations or proceedings that could be deemed prosecuting in nature. On rare occasions, for example, we do have a revocation proceeding; but those things come along very rarely and we have nothing that could properly be termed as prosecutions. Take by comparison—and I am not suggesting any change in the Federal Trade Commission Act—but there you do have something in the nature of the prosecuting function: The investigation of price discriminations and unfair trade practices generally, and the problem in our Commission is not presented acutely or broadly.

"Mr. Sanders. That is all.

"Mr. Hinshaw. How do you determine after you have decided that the engineering responsibility would be more or less identical in the various applicants, and financial responsibility is satisfactory, that one group of proposed operators of a station shall be any more liable to serve the public convenience and necessity than another group?

"Commissioner Fly. Well, it depends upon their training and their experience; the general qualifications.

"Mr. Hinshaw. Well, I would like to find out from you a little bit more in detail about those qualifications. Are they generally bent in one direction or another? I wish you would describe that for us a little bit to show us how you arrive at that?

"Commissioner Fly. Can't you make that a little more specific? That covers the field of a man's training and experience, and is just as broad as it can be, sir.

"Mr. Hinshaw. Well, you mentioned a while ago that one of the principal broadcast companies was headed by a former cigar merchant, and I was just wondering how it happened that he would be considered as any more able to run a radio station than somebody else?

"Commissioner Fly. Well, that goes to the question perhaps as to whether or not the network should be licensed. The networks are not licensed. If the cigar manufacturer bought himself into the network and thereby becomes a dominant factor in a lot of stations without being a licensee——

"Mr. Hinshaw (interposing). Supposing he were a newspaper operator then. Would that make him any more or less able to run a radio station than somebody else?

"Commissioner Fly. It might make him more or less.

"Mr. Hinshaw. In what way?

"Commissioner Fly. Well, for example, his work as a newspaper man might be valuable to him in operating a radio station. You take Mr. Ed Klauber, I think that Mr. Klauber,—he is executive vice president of the Columbia—I think his past experience was in the newspaper field, largely with the New York Times, and I imagine they thought that his experience in that field of some value to them in the broadcasting field.

"Now that may very well be true.

"Mr. Hinshaw. Do you lay any weight upon a man's business experience; whether he has been engaged for example in the advertising business or the theater business or some other business which will entitle him to some recognition as a man who could place things before the public?

"Commissioner Fly. Well, it is hard to say what business would give him preference. The business that might more or less automatically give him preference is, if he had a successful record as an operator of a radio station, that would certainly stand him in good stead as an applicant before the Commission, and from there on down, the various related activities are more or less remote.

"Mr. Hinshaw. For example, there is a considerable difference, of course, between the operation of broadcasting in the United States and in Great Britain. In Great Britain I understand it is a Government monopoly and advertising is not permitted to be conducted, whereas in the United States it seems to be more or less a series of private businesses, wherein station operators themselves are responsible for making a profit or not making a profit, and, of course, if they do not make a profit they will run into your accounting department.

"Commissioner Fly. Unless they are pouring money in to the public service, and are just doing that as a public service, intentionally taking a loss.

"Mr. Hinshaw. How many of them are doing that?

"Commissioner Fly. There are several of them.

"Mr. Hinshaw. Are there, really?

"Commissioner Fly. There are several of them.

"Mr. Hinshaw. I would like to know who these public servants are who are throwing their own money into it with no return.

"Commissioner Fly. Well, I would not want to single out some of them to the exclusion of others, but I think if you will take two examples, WQXR in New York City, to start off with, that is an excellent example. That was started by Mr. Hogan, one of the very competent engineers in this field, and he was doing the job of engineering experimentation and that sort of thing and at the same time was experimenting and lifting the quality of entertainment, of the program service. I do not think Mr. Hogan went into that thing with the idea of making a penny out of it. It just happens in recent years that he has had a successful operation and has made money. I do not think that that was a dominant motive, and I am sure he absorbed losses in the early years.

"I think the station at Albuquerque, New Mexico, KOB, is a station that is losing money and at the same time is considered by the owner as a valuable purpose served.

"There are other stations. As I say, there are several of them. I would like to look up a few of them and give them to you.

"Mr. Hinshaw. I hesitate to ask this question, because I know it entails considerable burden, but have you read all of the testimony in connection with that hearing? (The Monopoly Hearing.)

"Commissioner Fly. I think that I read most of it.

"Mr. Hinshaw. That is quite a job.

"Commissioner Fly. I will be glad to turn it over to you, if you want to go over it line by line.

"Mr. Hinshaw. Many thanks.

"Commissioner Fly. Since you have not read the report, I presume that is apparent that you have not read the testimony. But, I do want to make this request of the Committee, and I do think it is a fair request, that before the Committee either directly or indirectly, by legislation, pass judgment on that important issue, that it be good enough to read that report. Immediately upon the issuance of the report, we did send copies to each of the members of the Committee. That was about May 5, 1941.

"Mr. Hinshaw. I have a copy in my files, but I have only read a part of it.

"Commissioner Fly. I was going to be sure that each member has a copy. I will forward to each member an additional copy if you wish, and I would earnestly leave with you my request that you do read it, because I do not believe you would want to pass judgment upon the subject without that study.

"Mr. McGranery. Have you concluded?

"Mr. Hinshaw. I have one more question.

"Mr. Crosser. One more?

"Mr. Hinshaw. As I understand a gentleman by the name of Ethridge has been asked to make a report of a similar nature. Have you seen that report?

"Commissioner Fly. Mr. Ethridge made his report, or at least threw up the sponge at the St. Louis Convention.

"Mr. Hinshaw. Did he make a report to the president, do you know?

"Commissioner Fly. No; he made a speech to the broadcasters.

"Mr. Hinshaw. But he did not make a report to the President?

"Commissioner Fly. I think not. That is between him and the President; but I think not. I think that is a safe answer.

"Mr. Hinshaw. I have not seen the report nor the speech that he made at the convention. I do not know anything about it except that I heard that he was detailed to make a report.

"Commissioner Fly. Well, I think he did not make a report, that he did not make the report that he initially set out to make.

"Mr. Hinshaw. Did he make any other report?

"Commissioner Fly. He made a speech.

"Mr. Hinshaw. Is that the only thing that he made?

"Commissioner Fly. Well, he made a lot of trouble. He was former president of the NAB.

"Mr. McGranery. I just want to open this thing up and go back to the St. Louis convention. I just want to begin where you left off with Mr. Sanders. I understood you to say, Mr. Fly, that, at the time of the colloquy with Mr. Sanders, that this National Association of Broadcasters is dominated by a few.

"Commissioner Fly. That is right.

"Mr. McGranery. Is it not true that a vote was taken at the convention and that that vote was five to one to admit the two chains to membership?

"Commissioner Fly. I would like to give you some of the facts on that. I did not intend to go into this, because I do not think it is something that the committee really wants; but I got my statement of facts from one of the big broadcasting companies, so I assume it is accurate.

"There are nine hundred odd stations in this country, around five hundred of them are members of the NAB. Not more than 300 of them attended the convention and on the various votes which were postponed to the last afternoon of the long session, I think there were by 170 present on the one vote; around 100 present on the second vote; and around 19 on the third vote. (EDITOR'S NOTE: *The record shows that 314 NAB member stations qualified to vote at the convention. Of these 44 were exclusively affiliated with the Blue Network; 67, with CBS; 53, with MBS; 53, with NBC; 1, jointly Mutual-NBC; 9, jointly Mutual-Blue; 2, jointly Columbia-Blue; 29 jointly Blue-NBC; and 52 were non-affiliated stations. On the proposition to admit the networks 168 voted yes and 34 voted no; on network representation on the Board, 162 voted yes, and 40 voted no; on network dues, 169 voted yes, 30 voted no; on abolition of the Executive Committee, 172 voted yes, 32, no.)* I can get you the more specific figures if you want them from the people who have the record; but that is what was authoritatively reported to me.

"I might say that the networks, the two networks, I should say, of the two networks, the Columbia people were there and were very actively on the job. They got the vote out and did a very effective job. That is, they got the vote out which would be favorable on those particular issues.

"Mr. Closser, I think, was there in the various sessions including some sessions of the board of directors, and as I say, I think he did a very effective job.

"Mr. McGranery. Well, are we to take it that it is your idea that the Columbia dominates the National Association? The National Association of Broadcasters?

"Commissioner Fly. I think they are doing a pretty good job of that nowadays.

"Mr. McGranery. Well now suppose—now, you are a lawyer—suppose you were drawing a bill of complaint charging that the National Association of Broadcasters is dominated by the National Broadcasting Systems or the Columbia Broadcasting System, or both. What would you allege in that bill?

"Commissioner Fly. Well, in the first place, I would not draw that complaint, because I am not in that business; as to how broadcasters set up their association and who they let run it is their business. And, I have no interest in that whatsoever.

"But, when people come to me making representations about representing 900 radio stations throughout the country, then, of course, I have got to use a little common sense in appraising the people that come there and appraising their representation, just as when any one comes before you and purports to represent any large groups of people, I think one of your first inquiries is how does he get that way, and does he really represent them, and so as I say, if the broadcasters want to turn over their associational affairs to the Columbia Broadcasting System, that is all right with me.

"Mr. McGranery. Mr. Fly, do you not think in your capacity now—and I say this in all fairness—you are going pretty far when you set yourself up almost as a czar to be the sole arbitrator as to whether or not this is properly controlled.

"Commissioner Fly. What do you mean by setting myself up as a czar. Why, these people set themselves up to run the Government and to say who shall remain in public office and who shall not. Why, these fellows passed resolutions trying to have me removed from my job.

"Mr. McGranery. Well, is there any harm in that?

"Commissioner Fly. Well, who is doing the dictating? I think you perhaps would approve of that. But, I ask you, who is doing the dictating?

"Mr. McGranery. I will say for the record, Mr. Fly, that I would not.

"Commissioner Fly. I appreciate that, sir, and I will withdraw the statement, because I really do not believe you would approve of it.

"Mr. McGranery. I would approve of their right, however, to get up the petition, because there are some things set out in your rules—

"Commissioner Fly. I should think so.

"Mr. McGranery. There are some things set out in your rules.

"Commissioner Fly. A petition could be signed by the broadcasters of this country, if they could do it. I would think that that would be assumed that they might well do it. Between you and me, I do not think that they can do it.

"Mr. McGranery. Well now, I am not at all concerned about that, but I am concerned about the exercise of what you think about your power, and I am sorely concerned about it. I feel that you have demonstrated a great deal of spleen right down the line against these fellows and that there has been a cat and dog fight between you, and that situation is not going to be helped by some of the statements that you have made, and it is not going to be helped by these rules and regulations you have promulgated.

"I do not know, but in my own mind, I think that you have gone pretty far when you say to a station, 'If you sign an exclusive contract with this company, we are going to take your license away from you.'

"Commissioner Fly. I doubt if you are expressing the views of the committee there, with all deference. I do not think that the committee, after studying this subject, reading this report, will come out for the right of any national broadcasting concern in New York to tie up by a contract with a station in Keokuk, Iowa, stating that that New York concern shall control all of the broadcasting time of that station. I do not think Mr. McGranery will approve of it after reflection.

"Mr. McGranery. I do not think that is what it amounts to.

"Commissioner Fly. Well, I have studied that subject for years, sir, and I want to tell you that is what it does amount to. I know; and if you read that report, I think you will be thoroughly convinced. Those are exclusive contracts you are talking about, and option time. What the exclusive clause does not do, the exclusive option clause does. It gives them control of all of the important time of those stations, wherever they are located.

"Mr. Hinshaw. Mr. Fly, how would you handle that, other than under these rules and regulations that you have put out; how could you do it other than that? Do you have any other suggestions?

"Commissioner Fly. Well, I suppose that the Congress could legislate on the subject, state that every station owner should be responsible for the operations of that station and for the choice of programs, and should not tie up with any exclusive source of programs, or give any other concern control over all of its time. I should think that would be very appropriate legislation; but I believe if we wait a few months it will be demonstrated that our rules are within the scope of the present law and you may not need to enact that legislation.

"Mr. McGranery. What would be the practical effect in your opinion if you are permitted to carry out these rules and regulations that you have placed into effect, as to the exclusive clause in the contract and the option time?

"Commissioner Fly. What will be the effect?

"Mr. McGranery. What is the practical effect of that?

"Commissioner Fly. All that that will do is to turn the control of the station back to the licensee and let him take whatever programs he chooses and which he thinks are to the public interest in his own community, which he has sworn to serve, and they can continue to take all of the programs from Columbia; they can continue to take all of the programs from the National, or the Mutual that they want. There is no limitation whatsoever.

"Mr. McGranery. Now, as a practical matter, what would be the situation with respect to the present set-up of Columbia, National and Mutual, as a practical proposition? What would happen?

"Commissioner Fly. Well, as I explained to Mr. Hinshaw yesterday, this matter has been under study for years. Extensive studies have been made, completed, the report was made, and the regulations were issued more than a year ago, and in order to settle the entire matter all these networks have to do is to advise their stations that their contracts are to be construed in accordance with those rules.

"Mr. McGranery. Now, what will happen after that?

"Commissioner Fly. Immediately, approximately nothing; but that will mean then, however, that in the smaller cities where there are not enough stations to service all of the networks, that then a station will be free to serve the local public and meet their wants. If they want to hear Toscanini, then that station will be free to bring the public their Toscanini and if the people there want to hear the world series, then that station will be free to bring the world series, and if they want to hear Raymond Gram Swing, then that station will be free to bring him to those people.

"Now, that is what it means.

"Mr. McGranery. These rules—

"Commissioner Fly (interposing). And, I do not think you would oppose any set-up which would forbid the public in those areas, literally forbid them from having that service. I do not believe, Mr. McGranery, if you read that report and understand it and see the effect of that, that you would approve any such thing as the present practice.

"Mr. McGranery. I grant that I perhaps do not understand the situation, because I am coming to this conclusion, that you cannot do anything else but tear these two great chains down and build Mutual up.

"Commissioner Fly. No, no. I will tell you why. It is not going to be a Chick Sales statement, either. These two big—

"Mr. McGranery. I hope none of the rest of them.

"Commissioner Fly. These two networks have all of the advantages in the world. They have around 85 to 90 per cent of the total night-time power on the stations of this country. They have existing relations with advertisers and with stations; with program sources and all that sort of thing.

"Now, to suggest that they cannot go into a competitive field here and land on their feet and continue a public service is to make a suggestion that I cannot go along with and as a matter of fact, the mere fact that Mutual, with lesser physical facilities and being affected by these restrictive practices of the networks, since Mutual has been able to survive under those onerous conditions with lesser power and all the disadvantages, I think it follows as a matter of course that N.B.C. and Columbia are going to land on their feet and are going to do a good job, and I will tell you that they will do a better job, too, when this thing becomes competitive, because then they will have to have something to give these stations.

"If a station in your locality is free to move out and take the best program available, then there is going to be some real competition to see who can pipe down there the best program for your local public.

Mr. McGranery. Speaking about advertising, is there any difference in the standards of advertising between these networks?

"Commissioner Fly. I do not know. Nobody listens to advertising except the people that are doing it, sir. I would not want to say.

"Mr. McGranery. I am speaking now of standards.

"Commissioner Fly. Standards?

"Mr. McGranery. Not the advertising.

"Commissioner Fly. I do not know. I do not think I would want to comment on that. I doubt if I am qualified to say who has the best advertising. I think you will find—and I mentioned one of the stations a while ago, and I won't repeat it—but there is a station I think that has placed restrictions on the type of advertising; the length of time devoted to advertising, and a limit on the high-pressure stuff and all of that; but in general it is really not my function to criticize that, and I prefer not to do it, sir.

"Mr. McGranery. I think you can go a little further and say that neither Columbia nor National uses any beer advertising on their programs.

"Commissioner Fly. I think that they have beer and ale. I think one of the big controversies in the industry recently has been with the N.B.C. taking over the Ballantine beer and ale program from Mutual.

"Mr. McGranery. That is all.

Representative Sanders elicited from Chairman Fly the opinion that the language of Section 5 of the Sanders Bill (NAB Reports, August 8, 1941, page 667) was too broad in that it would permit, in effect, any person who would be aggrieved or adversely affected by the granting of an application without hearing to intervene in the proceedings. Mr. Fly stated that it should be limited to persons who have a "substantial legal interest." (Section 5 provides that before acting upon an application the Commission must make two affirmative determinations: (1) that the public interest, convenience and necessity would be served by the granting of the application; and (2) that such action would not aggrieve or adversely affect the interest of any licensee, applicant or any other person. In the event the Commission should be unable to make both of these findings, the Section would require the Commission to designate the application for hearing and if granted without hearing, any person claiming to be adversely affected could file a protest and be heard before the Commission. Thus, any person who would be aggrieved or adversely affected by the granting of an application would be assured the right to notice and hearing before any grant could be effective.)

In this connection Mr. Fly said:

"* * * I think the main objection is opening to any and everybody that may have slight interest; that is, whether or not there is any interference within the rules as are generally and consistently accepted in the industry and in the Government, and would permit any competitive interest to move in and under the other procedural device here indefinitely prolong an application. That is, I assume there would be danger of that, and I think the only safe thing to do is to say—and I do not care then how you describe the person—if you say must be a person with substantial legal interest, then you have got something that means something; but this would seem to give every person who has the slightest claim of any sort—and there are so many problems in this industry; dozens of stations, or a half dozen stations in every case, can make some sort of claim of interference either on the same channel or on an adjacent channel—maybe a dozen stations—then, a competitor in an adjoining town can make some sort of a claim.

"As I say, you gentlemen have determined this is to be a competitive industry and we shall not do anything about that. If you do not want it to be a competitive industry, then you ought to say so.

"So I think you ought to confine the interventions here, and the adjudications, to people who have a substantial legal interest."

Mr. Fly also stated that the right of appeal should be similarly limited to persons who have a substantial legal interest.

Discussing the section of the Bill that would divide the Commission into a division of public communications and a division of private communications with the Chairman a member of neither division, Mr. Fly stated:

"Mr. Chairman, in discussing the divisions, while I think the point appeared in my written statement, I did not make the point orally that in the proposed legislation the Chairman would be responsible to the outside world, generally, for the operations of the Commission; for the divisions, and the general conduct of the work; would represent the Commission in their departmental conferences, and that sort of thing. Perhaps most importantly he would represent the Commission before legislative bodies, and in proposed legislation and inquiries into the work of the Commission.

"Now, the result of that is this: Under the proposed bill the Chairman does not have a vote in either of the divisions, and so he may be called upon the carpet and held responsible for the decisions of the division over which he has had no control and has no vote. In other words, it seems to me that we tend to violate something that is basic in our philosophy of administration and every legal responsibility, and that is, always, the responsibility must be accompanied by comparable authority and that a man will not be held accountable and responsible for acts over which he has no control; and as a practical matter, I cannot believe it is feasible. It simply will not work that way."

Discussing the changes in judicial review found in Section 8 of the Sanders Bill, Mr. Fly said:

"CHOICE OF COURTS

"Under the Communications Act, appeals from orders of the Commission may be taken either to three-judge courts under the Urgent Deficiencies Act or to the United States Court of Appeals for the District of Columbia, depending upon the nature of the Commission order sought to be reviewed. If the order of the Commission grants or denies an application for a construction permit or radio station license, or for renewal or modification of an existing station license, the appeal is to the Court of Appeals for the District of Columbia; all other cases go to the three-judge courts.

"The proposed bill provides that in virtually all radio cases an appeal may be taken either to the Court of Appeals for the District of Columbia or to the Circuit Court of Appeals in the circuit where the appellant resides or has his principal place of business. This gives an option to existing licensees to appeal to the Court of Appeals for the District of Columbia or to the Circuit Courts of Appeal in their home circuits, or I assume a circuit court of appeals at the place of business.

"I think that there are strong reasons in favor of having appeals in radio matters restricted to the District of Columbia. Radio stations who wish to appeal generally have Washington counsel. The records and files involved in the appeal are kept here and the consulting engineers who work on the cases are largely concentrated here. In addition, the parties and their attorneys are frequently before the Commission. Washington is thus the one central and convenient place for the litigation.

"However, even if litigants are permitted to sue elsewhere than Washington, I can see no warrant for giving all appellants an option to sue either in their home districts or in the District of Columbia.

"Moreover, in appeals in radio matters the opposing parties in reality are not the applicant and the Commission but rather the applicant and persons already in the field.—Let me illustrate. Suppose a person applies for and is granted a construction permit to erect a new station in Iowa. An existing station on the same frequency in Oregon could then appeal from such grant, if it deemed itself aggrieved by the grant. Under the present bill the existing licensee could bring his appeal either in Oregon or in the District of Columbia. This is an entirely unfair burden with which to saddle an applicant, who is thus brought into court at a distance both from Washington and his home. This is another example of entrenchment of vested interests and of the erection of barriers to the entry of a man of moderate means into the radio field.

"CHANGE IN THE SCOPE OF JUDICIAL REVIEW

"The bill also proposes (Section 402 (g)) to amend the provisions of the existing law with respect to judicial review. That is in committee print, at page 24.

"Our objection to the proposal is that it tampers in a vague and formless way with a large body of well-defined judicial doctrine that has been painstakingly built up over a long period of years. It seems to us that the courts, rather than the legislature, are the best judges of their own competence and their own limitations in reviewing administrative action. A law containing such vague and general language, as is proposed in section 402 (g) of this bill would serve only to confuse both the courts and the lawyers.

"As Mr. Bingham pointed out, it is true that the minority of the Attorney General's Committee did recommend a proposal somewhat similar to that which the Bar Association here proposes. However, the majority expressly declared that in their opinion such a procedure is unnecessary and unwise (Attorney General's Report, pp. 91-92). We fully agree with the conclusion reached by the majority of the Attorney General's committee.

"Moreover, I should like to call your attention to the fact that in copying the proposal made by the minority of the Attorney General's Committee, the Bar Association has omitted a very important proviso. I would like to read what they have left out:

"'Provided, however, that upon such review due weight shall be accorded the experience, technical competence, specialized knowledge and legislative policy of the agency involved as well as the discretionary authority conferred upon it.'

"The omission of this proviso is typical of the effect which the Bar Association has made in this bill to tie the hands of the Commission.

"REPEAL OF THE POTTSVILLE RULE

"The last change in the appeal procedure which I desire to mention relates to the effect to be given to the mandate of the court reversing an order of the Commission. The bill provides in section 8 (h) (committee print, pp. 24-25) that in the event a court reverses a decision of the Commission, it shall be the duty of the Commission to give effect to such judgment and 'unless otherwise ordered by the court, to do so upon the basis of the proceedings already had and the record upon which said appeal was heard and determined.' This section is designed to set aside the holding of the Supreme Court in Pottsville Broadcasting Company v. The Federal Communications Commission, 309 U. S. 134, and Fly v. Heitmeyer, 309 U. S. 146. Those cases involved appeals from orders of the Commission denying applications on particular grounds. The Court of Appeals held that the Commission had committed an error of law in denying the application on the grounds specified. The cases were thereupon remanded to the Commission. Upon remand, the Commission, in the Pottsville case, designated the application for argument, together with other applications for the same facilities on which a hearing had already been held. In the Heitmeyer case, the Commission designated the application for further hearing with other applications for the same facilities. The reason for this action was to enable the Commission to determine on a comparative basis which of the several applications would best serve public interest, convenience and necessity. In other words, the Commission simply took all of the applications for the same facilities and tried them in one case, so that everybody could be heard out fully and on a comparative basis, so that the Commission could determine which one should be granted and could best serve the public interest.

"The appellants thereupon applied to the Court of Appeals for a writ of mandamus requiring the Commission to consider the applications upon the basis of the records already made before the Commission and upon which the Commission had been reversed. The Court of Appeals issued the writs as requested but the Supreme Court reversed, holding that upon remand of a case to the Commission, we are not bound to consider the application on the basis of the record already made but may take into account facts occurring since the filing of the appeal in arriving at a determination concerning how the public interest would best be served.

"Gentlemen, I submit that the rule in the Pottsville case is a salutory one. It is not designed to avoid the effects of judicial review as the Bar Association has suggested. Of course, if the Commission commits an error of law in granting or denying an application, and this error of law is laid bare by the Court, the Commission should and does govern itself accordingly in acting upon that application. It does not follow, however, that because the Commission did commit an error of law that this should give any priority to the applicant in whose case the error of law was committed. But this is precisely what this bill would require. If the Commission denies an application and the Court of Appeals reverses, the Commission would then be under a duty to consider the application on the basis of the record previously made, irrespective of changes in conditions which may have occurred since the filing of the application or the taking of the appeal. Other persons far better qualified to operate a station may have filed applications, for the same facilities, but under the rule of the present bill, the Commission could not consider them.

"Mr. Sanders. Mr. Chairman.

"Mr. Crosser (presiding). Mr. Sanders.

"Mr. Sanders. In connection with this Pottsville case, you stated that this section that you refer to is designed to set aside the holding of the Supreme Court in the Pottsville case. I agree with you, from my reading, I think that that would probably be the effect of enacting that section. However, Mr. Bingham on page 84 of his prepared statement quotes Mr. Justice Frankfurter in that case. I quote from Mr. Bingham, for I have not read the decision. He quotes as follows:

" 'Legislators are ultimate guardians of the liberties and welfare of the people in quite as great a degree as the courts.'

"And then quoting Mr. Justice Frankfurter further:

" 'Congress which creates and sustains these agencies must be trusted to correct whatever defects experience may reveal.'

"You would agree with Mr. Justice Frankfurter's statement?

"Commissioner Fly. Yes, I would agree with that and, of course, I should think that when the case comes back to the Commission that if that party will do the best job in the public service and the grant can be made, that it should be made; but still I think it would be unfortunate if, considering all of the applicants before the Commission, it appeared that, let us say, that he was the worst of the applicants, then before the Commission, I think it would be very unfortunate to have to make the grant to that party. That would in part repeal the basic provisions of this law, that the grant should be made to serve the public interest.

"You see there is threading through this law, broadly, a general philosophy of public interest. How will the public get the most and the best service out of a particular operation or a particular grant. Then, to hold that because a party has been through some procedure, that he gets a private right which is to override the public interest and which would bar the Commission from considering competing applicants and on a comparable basis, I think would be open to serious question.

"I do not think you have heretofore made the statement that there is any vesting of private rights or any advantage to be gained through any procedures or anything of that sort, that gives a private party any advantage over another private party, the main test always being how will we get the best public service. And, I do not think that the Congress would want to put the Commission in a position where, on the day it makes a grant, it would be forced to make the grant to a party who would not render the best public service.

"Mr. Sanders. Of course Congress and the Commission are both in the position of trying to find out what is in the interest of the public. These conflicts between private interests are merely incidental to the superior rule that Congress attempts to enact and the Commission attempts to execute."

There followed a colloquy with Representative Sanders:

"Mr. Sanders. You would also, I take it, agree that there is nothing inherently wrong with the Congress passing legislation to rectify conditions pointed out in the Supreme Court decisions. The Supreme Court has frequently held that it has not the power to change Congressional decrees and if there is anything wrong with Congressional decrees, the Congress itself must change them.

"Commissioner Fly. I certainly think that wherever there are deficiencies in the law—and, of course, Congress has frequently so acted—where there are deficiencies in the law, why then it is the function of the Congress to change them and, of course, neither we nor other parties should rely upon the Supreme Court to amend them; but still that leaves us back where we started, with the question as to whether or not the law is deficient, and if you want to change the basic thesis here of private interest being dominant over public interest, why, I suppose you could do so, even though you are dealing with private property.

"These wave-lengths belong to the people.

"But, if you want to say that these people who are granted these licenses, get some sort of a vested right in these wave-lengths, then, due to the fact that they have gotten on to them and have gotten the benefit of them through the years, or due to the fact that they have gone through certain procedures, I suppose it is within your power to do so. I myself would be very reluctant, though, to advise such course.

"Mr. Sanders. You would approve of the statement, I take it, that the fundamental issue then is not whether this statute was designed to set aside the holding of the Supreme Court in the Pottsville case, as you state on page 26 of your statement; but that the question is whether, as you state at the bottom of page 27, the rule of the Pottsville case was a salutory one, and the main issue is whether it is a salutory rule and not whether the rule has been approved by the Supreme Court.

"Commissioner Fly. No; the main issue is the one which I have stated, sir, and it may be nudging up to the problem as you have suggested it; but to me the main question is whether at any time the private interests shall get itself in a position to predominate over the public interest."

AFA CONVENTION

The NAB Department of Broadcast Advertising assumed an important role in connection with the 38th annual convention of the Advertising Federation of America, held at the Hotel Commodore this week. Frank Pellegrin, Director of the Department, presided over the broadcasters conference on Wednesday morning. John M. Outler, WSB, Chairman of the NAB Sales Managers Executive Committee, spoke on "Radio as an Advertising Medium in Wartime."

Tracing the history of radio and its phenominal growth, Mr. Outler told advertisers that radio is a "tool in your work." He referred to the recent Hooper and Roper surveys which showed radio listeners buy more than non-listeners, and that the longer they listen the more they buy. He stressed the importance of these facts from the standpoint of conserving the advertising dollar. He told of a recent survey made by his own station which disclosed that by tying in drug store displays with radio personalities on the respective programs, merchants increased sales by as much as 18 per cent. He nailed this point down with the observation that the audience loyalty to a program is definite and can be made an effective advertising asset.

He referred to the high praise which had been given radio by government officials and the tremendous contribution which it had made to the prosecution of the war effort. The maintenance of radio audience through proper programming was, he pointed out, a prime necessity if we are to give the war message to the people. "The American system of radio," said Mr. Outler, "is based on commercial effort and the advertisers are the only ones with the budgets and the personnel who know how. And the fact that the advertisers will maintain these audiences provides the means and the channel for the government to get its message across to the greatest number of people."

Lt. Col. Edward M. Kirby, former NAB Public Relations Director, and now heading the Radio Branch of the Public Relations Division of the War Department, high-lighted the relations between the government's war efforts, advertising, and radio. He spoke specifically on the aspects of the War Department's approach to the use of radio in the war.

"We have an army in the making of 3,600,000 men this year," said Col. Kirby. "It will run around 4,000,000 people next year. That cuts into every family, every social and economic unit. There, first, I should say, the disposition of the men who leave our homes, what they do, where they are sent, what they wear, what they eat, and what the danger is to which they are exposed is our number one interest.

"Secondly, this army is not to fight north or south of the Mason-Dixon line, or east or west of the Mississippi. Our Hindenburg line is fighting on the four corners of the earth. It is called total warfare. Total warfare goes for men in uniform, as well as those outside."

Col. Kirby paid tribute to American advertisers who have assumed the responsibility for programs from and to army camps and urged a wider use of this form of advertising as a means of not only preserving the identity of the advertiser, but of assisting the war effort.

Samuel R. Rosenbaum, WFIL, Philadelphia, spoke on the "Challenge to Radio." We print his full address below. Any broadcaster looking for a talk to give to his local Rotary Club or other civic or business organization might make good use of it.

I assume it is hardly necessary at a meeting of people engaged in the advertising profession to catalogue the contributions radio stations are making in the war effort. All of you are probably in direct and frequent contact with radio stations, either as advertisers or listeners, and you know what an unending variety of suggestion and instruction every station is sending out at the request of national and local authorities. No doubt you also read the trade press and you have seen summaries of the amazing extent to which radio stations are being called on.

You know that radio stations are regarded as major factors in building up public response to the need for public cooperation, not only with the fighting forces but with the civilian organizations involved in supplying, producing, rationing and defense. It is taken for granted that the radio station will help to inform the public, instruct the public, and make the public sympathetic with gasoline rationing, rubber rationing, sugar rationing, tin salvage, retail price control, metal conservation and water conservation. It is taken for granted that radio stations will send out all information needed to encourage recruiting in the Army, the Navy, the Air Corps, the Coast Guard, the Merchant Marine, and special services like the Army specialists, glider pilots, the Interceptor centers, and the civilian defense organizations.

It is taken for granted that radio stations are available and will do their share to encourage public support for the Navy Relief, the Army Relief, China Relief, Russian Relief, Greek Relief, the U.S.O., the hospitality centers, the Red Cross, and other worthy war charities. It is taken for granted that radio stations will bear a major share of the labor of getting universal subscriptions to war bonds. Needless to say it is also taken for granted that radio stations will continue to help every worthy local charity and educational and religious enterprise in the listening area, just as generously as was done before the war effort came along.

It is taken for granted that radio stations will be available for every reminder of patriotism and encouragement for public morale such as Flag Day and other national holidays, anniversaries of invasions, victories and defeats in the war now in progress, and local and national special events connected with the prosecution of the war that come up with or without notice, such as speeches by local or national statesmen and local or national celebrations of special occasions by official, semi-official, unofficial or volunteer organizations, committees or local or national agencies of government or community. It is taken for granted that radio stations will carry programs designed to win popular support in the war effort which are created or built by radio producers in government departments or in the Army or Navy, or by the networks. Last week's issue of VARIETY published a striking list of the network commercial advertisers who have made the most successful use of this method of utilizing large and well-established listening audiences. Every station can also bear testimony of local advertisers who have loyally rendered similar service.

In fact all these things are being done by radio stations. In fact radio stations as well take it for granted that they should do so. In fact radio stations have at all times been eager and anxious to be permitted to do these things and more, and radio stations have, from the beginning of the war effort, been impatient that they have not been called on for more, and that their potentialities have not been better organized and better availed of by Washington in order that there should be a maximum of result with a minimum of cross purposes.

All of these things I think that as advertisers and as listeners you know, and this is not news. In fact I think it would be better if this talk were called "Taken for Granted" instead of "The Challenge to Radio."

However, I wonder if you realize how much of an effort it requires for radio stations to make this contribution which is so generally taken for granted. Unless you are really close to it you might well suppose that it is a fairly simple matter for a radio station to put on the air everything it receives from the agencies I have enumerated, and all the station has to do is sort the circulars and hand them to the announcers. In fact it is a far more difficult process. Much of the copy has to be rewritten and boiled down, although the material received from O.F.F. is excellent beyond criticism. The volume of the stream coming into every radio station today is such that it is practically a continuous re-write job for somebody in every station. The copy has to be distributed in such a manner that it does not annoy the listener and that it does not upset the advertisers. There is a constant and unending traffic job of real magnitude, considering that every radio station works on the principle of giving every patriotic request the right of way. There are even engineering problems involved, especially for net work affiliates in producing the tremendous increase in announcements without disrupting the service to network and local advertisers. There is also the problem of keeping advertisers satisfied and happy in spite of the necessity for frequent cancellations and shifts of local and national commercial material to make way for patriotic copy and events which are always given the preference today.

All of this is part of the contribution that radio stations are making and making gladly. And it is well we should do a little talking about it instead of letting it be taken for granted. One aspect must be mentioned, and that is that radio stations are doing much of this service as a free contribution when some other media are collecting pay for it. The same appeal for a relief organization which buys a half page in the local newspapers at regular rates, takes it for granted that it is entitled to full support from the local radio stations and would be shocked at being asked to pay for it. The same group that pays rent for a local hall to hold a meeting, takes it for granted that the radio station will make its contribution without thought of payment. The same group that would not hesitate to pay toll charges for a flock of telegrams or telephone calls to meet an emergency situation, takes it for granted that the radio station will perform the same service as a community contribution. The same committee that will spend money in printing books and circulars for distribution, takes it for granted that the radio station will make a free gift of its circulation. And the radio station always delivers and always produces and always contributes and keeps on hoping that it will be appreciated,—a hope which often turns out to be illusory.

To my mind the real challenge to radio to be presented by this war has not yet been presented. I feel the country has not yet begun to realize the severity and intensity of the efforts and sacrifices which every citizen will be called upon to make. The course of the war will demonstrate that the requests to be made of our citizenry will increase with mounting intensity, and that correspondingly the efforts expected of radio stations to disseminate these requests will be increasingly exacting. At the same time it is a matter of common knowledge that every radio station, except the comparatively few favored stations of large power in metropolitan centers, is beginning to feel the reduction in commercial revenue which is bound to result from the impact of war production and rationing and dislocation of industry. National spot revenue is still holding up, but network revenue is beginning to feel it, and local business is already causing marked concern to stations which depend on it.

This is bound to have its effect not upon the willingness but upon the ability of radio stations to continue to render the national services which are so generally taken for granted. The stations on the National and Columbia networks are in a fortunate position of being the most prosperous economically and of broadcasting the large majority of the great popular commercial programs for national advertisers who are making a real and intelligent use of the medium to get the war message across to their established listening audiences. But the stations on the other networks and the non-affiliated stations are those which make the major portion of their contribution on non-commercial programs and non-commercial announcements and therefore on a sustaining basis, and therefore at their own expense as a public service. It is these stations which, in my opinion, will feel the impact of war conditions more and more in the next twelve months, with declining revenue and increasing demands for public service. In my opinion this is a problem which our national authorities should begin now to plan to meet. I am not suggesting that radio stations wish to be paid for the national contributions they are making. On the contrary, radio stations, even the very smallest, are proud to be permitted to enlist under the flag for the duration. However, it must be realized that there are many stations, especially the small ones and especially those in smaller communities, which are equally important in the building of public morale as those in large metropolitan centers, and I believe it will become urgent within the next twelve months to provide some help for such stations if they are to continue to render the service which is expected of them.

I have no specific suggestion to make on this score. There are plenty of people already giving advice. However, just as an experiment, I might throw out the idea that it would be a fair contribution to the smaller radio stations if, in some way, lines were made available to them so that they could receive and broadcast important national programs without having to pay for them. In fact, as a network affiliate, I sometimes feel there is a little contradiction in the fact that we affiliates, through our affiliation contracts, pay money to maintain the network land-lines that connect us, and are expected to broadcast free-of-charge patriotic programs received over those same lines.

I have no quarrel with any public utility, but I just say it is just another of those contradictions where the radio station serves the public free, and somebody else gets paid even by the radio station.

What a wonderful gesture of patriotism it would be if the land lines were contributed for such patriotic programs just as the stations contribute their time, and the benefit passed on to the stations. This would make it possible for messages of vital importance, the speeches of the President, to be broadcast simultaneously by all the 900 stations in the country without asking for favors from the existing network companies.

Radio is meeting honorably the challenge so far presented by the war. With fair cooperation from the central authorities, it will continue to meet that challenge with equal success. Its greatest test will be the preservation of its freedom in the face of the ever-increasing control of communications which is inevitable under war conditions. Its greatest test will come in the preservation of its right to criticize and discuss strategy and administration without intimidation or suppression. Its greatest test will come in promoting an honest discussion of views for fighting the war and winning the peace, without undue pressure from those in Congress or government. Perhaps the short-term license will prove to be the greatest challenge to radio.

WAR PROGRAM IDEA

Allocation of War Service announcements locally on WOWO and WGL, Westinghouse stations in Fort Wayne, has been placed in charge of Ed Koops of the program department who has announced a plan whereby every local sustaining show, either transcribed or live, ad lib or written, will contain announcements according to a master plan. Koops' procedure involves supplying the entire staff with a weekly mimeographed list showing the programs and type of announcements to be used. Entire talent staff and continuity department are constantly urged to make the announcements blend into the content of the program rather than stick out like a sore thumb. Sample of the type of plugs being used follows:

LATE RISERS LEAGUE

Music: Nothin'.

Ross: Late Risers' time . . . 10:18! That's Central War Time . . . and War Time is 10% Time. Say, how'd you sleep last night? Pretty good, eh? Do you imagine Hirohito slept well last night? If he's heard about America's Rubber Roundup he didn't—because the nation is out to salvage the rubber that is needed to slap the Japs! We don't have to give you details—you know all about it! All we need tell you is that *the need is urgent!* So get busy today and dig up all the scrap rubber you can find. And if you'll look on this next record you'll notice that the title of the tune is "How Do I Know It's Real."

RADIO RATES EXEMPT

Broadcasting advertising rates were specifically exempt from the "service" price-fixing order issued June 23 by the OPA. (Maximum Price Regulation 165, effective July 1.)

COLORADO

Estimated Radio Homes, 1940

Number of Occupied Dwelling Units as reported by U. S. Bureau of the Census in advance release, Series H-7. Percent radio-equipped calculated from Series H-7 Bulletin following the Census Bureau practice. Number of radio units, or radio homes, estimated by applying percent ownership to those units not answering radio question and adding such to those reporting radio.

NAB Research Department

June 19, 1942

IOWA

Estimated Radio Homes, 1940

Number of Occupied Dwelling Units as reported by U. S. Bureau of the Census in advance release, Series H-7. Percent radio-equipped calculated from Series H-7 Bulletin following the Census Bureau practice. Number of radio units, or radio homes, estimated by applying percent ownership to those units not answering radio question and adding such to those reporting radio.

RHODE ISLAND

Estimated Radio Homes, 1940

Number of Occupied Dwelling Units as reported by U. S. Bureau of the Census in advance release, Series H-7. Percent radio-equipped calculated from Series H-7 Bulletin following the Census Bureau practice. Number of radio units, or radio homes, estimated by applying percent ownership to those units not answering radio question and adding such to those reporting radio.

TENNESSEE

Estimated Radio Homes, 1940

Number of Occupied Dwelling Units as reported by U. S. Bureau of the Census in advance release, Series H-7. Percent radio-equipped calculated from Series H-7 Bulletin following the Census Bureau practice. Number of radio units, or radio homes, estimated by applying percent ownership to those units not answering radio question and adding such to those reporting radio.

FEDERAL COMMUNICATIONS COMMISSION

COMMITTEE APPROVES FLY

The Senate Committee on Interstate Commerce has favorably reported the nomination of James Lawrence Fly to succeed himself on the FCC. The Fly nomination is for a period of seven years from July 1.

DCB NOW BWC

The name of the Defense Communications Board was changed to Board of War Communications on June 15 by Executive Order.

DAVIS THANKS NAB

Elmer Davis, the Director of the Office of War Information, has acknowledged receipt of and thanked Neville Miller for his offer of cooperation. He states that he will certainly call upon NAB for assistance as needed.

IN MEMORIAM

C. G. Phillips, president and general manager of KIDO, Boise, Idaho, died suddenly in Portland, Oregon, from a heart attack. Mr. Phillips was a loyal and valuable member of NAB and we deeply regret his passing.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, June 29. They are subject to change.

Monday, June 29

NEW—WKAL, Inc., Kalamazoo, Mich.—C. P., **1230 kc.,** 250 watts, unlimited.

Thursday, July 2

Further Consolidated Hearing

NEW—Herald Publishing Co., Klamath Falls, Ore.—C. P., **1400 kc.,** 250 watts, unlimited.

NEW—Dorman Schaeffer, Klamath Falls, Ore.—C. P., **1400 kc.,** 250 watts, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WSNJ—Howard S. Frazier and W. Burley Frazier (Transferors), Elmer H. Wene (Transferee), Eastern States Broadcasting Corp. (Licensee), Bridgeton, N. J.—Granted consent to transfer of control of Eastern States Broadcasting Corporation, licensee of station WSNJ, from Howard S. Frazier and W. Burley Frazier to Elmer H. Wene, for a total consideration of $3,047, representing 603 shares of common stock (B1-TC-299).

KYA—Palo Alto Radio Station, Inc. (Assignee), Hearst Radio, Inc. (Assignor), San Francisco, Cal.—Granted consent to assignment of license of station KYA (B5-AL-344), from Hearst Radio, Inc., to Palo Alto Radio Station, Inc., for a total consideration of $50,000.

K49KC—Everett L. Dillard, tr/as Commercial Radio Equipment Co., Kansas City, Mo.—Granted modification of construction permit (B4-MPH-95) for extension of time to November 23, 1942, within which to construct a commercial FM broadcast station. Also granted special temporary authority to operate K49KC commercially with temporary equipment.

W49FW—Westinghouse Radio Stations, Inc., Fort Wayne, Ind.—Granted modification of construction permit (B4-MPH-82) for extension of time to October 15, 1942, within which to complete construction. Also granted special temporary authority to operate on a commercial basis with a temporary antenna system pending completion of the antenna specified in the permit.

W57PH—Westinghouse Radio Stations, Inc., Philadelphia, Pa.—Granted modification of construction permit (B2-MPH-71) for proposed antenna system, transmitter site and equipment. Also granted special temporary authority to operate station on a commercial basis with a temporary antenna system pending completion of antenna specified in modification of permit application.

John H. Stenger, Jr., Wilkes-Barre, Pa.—Granted petition for extension of effective date of Commission's Order on application for renewal of license, Docket 5430, for a period of 3 months.

Central New York Broadcasting Corp., Syracuse, N. Y.—Granted authority to close the Commission records with respect to FM station W63SY, by cancelling outstanding construction permit (B1-PH-50) and deleting call signals.

LICENSE RENEWALS

KWLK—Twin City Broadcasting Corp., Longview, Wash.—Granted renewal of station license for the period ending not later than August 1, 1943 (B5-R-959).

Granted renewal of following station licenses for the period ending in no event later than August 1, 1944:

KTBC, Austin, Tex.; WCAE and auxiliary, Pittsburgh, Pa.; WFMD, Frederick, Md.

Granted further extension of following station licenses upon a temporary basis only, pending determination upon applications for renewal of licenses, in no event later than August 1, 1942:

KBST, Big Spring, Tex.; KCMC, Texarkana, Tex.; KFJB, Marshalltown, Iowa; KGKL, San Angelo, Tex.; KPLT, Paris, Tex.; KRBC, Abilene, Tex.; KSWO, Lawton, Okla.; KTFI, Twin Falls, Idaho; KUOA, Siloam Springs, Ark.; KVGB, Great Bend, Kans.; KXL, Portland, Ore.; WBRB, Red Bank, N. J.; WCAX, Burlington, Vt.; WCAZ, Carthage, Ill.; WCOC, Meridian, Miss.; WMRO, Aurora, Ill.; WSPB, Sarasota, Fla.; KGGF, Coffeyville, Kans.; KMTR, Los Angeles, Calif.; WCBT, Roanoke Rapids, N. C.; WCOP, Boston, Mass.; WFPG, Atlantic City, N. J.; WOV, New York, N. Y.; WSPR, Springfield, Mass.; KGIW, Alamosa, Colo.; KVAK, Atchison, Kans.; KWKH, Shreveport, La.; WOV, auxiliary, New York, N. Y.

W5XAU—WKY Radiophone Co., Oklahoma City, Okla.—Granted further extension of station license upon a temporary basis only, pending determination upon application for renewal of license, in no event later than August 1, 1942.

W9XLA—KLZ Broadcasting Co., Denver, Colo.—Granted further extension of station license upon a temporary basis only, pending determination upon application for renewal of license, in no event later than August 1, 1942.

W9XER—Midland Broadcasting Co., Kansas City, Mo.—Granted renewal of station license for the period ending not later than May 1, 1943.

Granted further extension of following station licenses upon a temporary basis only, pending determination upon applications for renewal of licenses, in no event later than August 1, 1942:

W3XDD, W3XPY, Phippany, N. J.; W8XO, near Mason, Ohio.

W8XUM—WBNS, Inc., Columbus, Ohio.—Granted further extension of station license upon a temporary basis only, pending determination upon application for renewal of license, in no event later than August 1, 1942.

DESIGNATED FOR HEARING

KINY—Edwin A. Kraft, Juneau, Alaska.—Designated for hearing modification of construction permit (B-P-3089) to change frequency to **1050 kc.**, make changes in transmitting equipment and commencement and completion dates (B-MP-1478).

KTBI—Tacoma Broadcasters, Inc., Tacoma, Wash.—Designated for hearing application for construction permit (B5-P-3483) to change frequency to **1050 kc.** and increase height of antenna. To be consolidated with hearing on KINY above.

WJOB—O. E. Richardson, Fred L. Adair & Robert C. Adair, d/b as Radio Station WJOB, Hammond, Ind.—Designated for hearing application for construction permit (B4-P-3470) to increase power to 250 watts and make changes in equipment.

CASES DISMISSED

In its Memorandum Opinion of April 27, the Commission stated its policy, among other things, not to grant applications involving the use of materials to construct or change transmitting facilities for standard, FM and television broadcast stations. The Commission on June 23, in view of this policy, dismissed without prejudice the following applications:

Standard

E. Ogden Driggs & Louise Rust Driggs, a partnership, d/b as Frankfort Broadcasting Co., Frankfort, Ky. (B2-P-3429); WTMJ, The Journal Co. (The Milwaukee Journal), Milwaukee, Wisc. (B4-P-3397); WMC, Memphis Publishing Co., Memphis, Tenn. (B3-P-3380); KXA, American Radio Telephone Co., Seattle, Wash. (B5-P-3358); KVI, Puget Sound Broadcasting Co., Inc., Tacoma, Wash. (B5-P-3348); WFBR, The Baltimore Radio Show, Inc., Baltimore, Md. (B1-P-3333); KOWH, World Publishing Co., Omaha, Nebr. (B4-P-3313); KVAK, Radio Enterprises, Inc., Atchison, Kans. (B4-P-3309); KOIN, KOIN, Inc., Portland, Ore. (B5-P-3300); KGIR, KGIR, Inc., Butte, Mont. (B5-P-3298); KVNU, Cache Valley Broadcasting Co., Logan, Utah (B5-P-3243); Northern Ohio Broadcasting Co., Elyria, Ohio (B2-P-3230); WCOV, E. D. Rivers, Valdosta, Ga. (B3-P-3213); WBAX, John H. Stenger, Jr., Wilkes-Barre, Pa. (B2-P-3014); WTMC, Ocala Broadcasting Co., Inc., Ocala, Fla. (B3-P-2708); KTSW, Emporia Broadcasting Co., Inc., Emporia, Kans. (B4-P-3457); KGW, Oregonian Publishing Co., Portland, Ore. (B5-P-3450); WHIS, Daily Telegraph Printing Co., Bluefield, W. Va. (B2-P-3434); WJHL, WJHL, Inc., Johnson City, Tenn. (B3-P-3433); KBPS, Benson Polytechnic School, R. T. Stephens, Agent, Portland, Ore. (B5-P-3154); WJDX, Lamar Life Insurance Co., Jackson, Miss. (B3-P-3031); WREN, The WREN Broadcasting Co., Inc., Lawrence, Kans. (B4-P-2272).

Television

Allen B. DuMont Laboratories, Inc., Washington, D. C. (B1-PCT-16).

Relay

L. B. Wilson, Inc., Portable-Mobile, area of Cincinnati, Ohio (B2-PRE-417); WEWE, WJIM, Inc., Portable-Mobile, area of Lansing, Mich. (B2-PRE-424).

FM

Houston Printing Corp., Houston, Tex. (B3-PH-126).

DOCKET CASES

Standard

Robert V. Lee, Bradenton, Fla. (Docket 5944); Midstate Radio Corp., Utica, N. Y. (Docket 6141); WIRE, Indianapolis Broadcasting Inc., Indianapolis, Ind. (Docket 6237); Fred C. Morgan, Harrison Eiteljorg, Roger A. Beane, d/b as Hoosier Broadcasting Co., Indianapolis, Ind. (Docket 6263); Dyke Cullum and Harry R. England, as co-partners, d/b as Radio Co. of Annapolis, Annapolis, Md. (Docket 6279); WRUF, University of Florida, Gainesville, Fla. (Docket 6281); KGHF, Curtis P. Ritchie, Pueblo, Colo. (Docket 6312); Eastern Pennsylvania Broadcasting Corp., Scranton, Pa. (Docket 6314); Aloha Broadcasting Co., Ltd., Honolulu, T.H. (Docket 6315); WICA, WICA, Inc., Ashtabula, Ohio (Docket 6120); WWSW, Walker & Downing Radio Corp., Pittsburgh, Pa. (Docket 6121); Lake Shore Broadcasting Corp., Cleveland, Ohio (Docket 6172); KGNC, Plains Radio Broadcasting Co., Amarillo, Tex. (Docket 6211); Charles P. Blackley, Staunton, Va. (Docket 6215); Bob Jones College, Inc., Cleveland, Tenn. (Docket 6221); Washtenaw Broadcasting Co., Inc., Ann Arbor, Mich. (Docket 6231); WAGE, Sentinel Broadcasting Corp., Syracuse, N. Y. (Docket 6259); William L. Klein, Chicago, Ill. (Docket 6271); WCBS, WCBS, Inc., Springfield, Ill. (Docket 6298); WLAW, Hildreth & Rogers Co., Lawrence Mass., (Docket 6306); Western Mass. Broadcasting Co., Pittsfield, Mass. (Docket 5998); Parkersburg Sentinel Co., Parkersburg, W. Va. (Docket 6031); Colonial Broadcasting Corp., Norfolk, Va. (Docket 6057); WRAL, Capitol Broadcasting Co., Inc., Raleigh, N. C. (Docket 6210).

Commercial Television

WIXG, General Television Corp., Boston, Mass. (Dockets 5988 and 5989).

FM

Piedmont Publishing Co., Winston-Salem, N. C. (Docket 6045).

MISCELLANEOUS

WKBN—WKBN Broadcasting Corp., Youngstown, Ohio.—Granted modification of construction permit, as modified, for new transmitter, increase in power, install directional antenna for night use and change in hours of operation, for extension of completion date from June 30 to December 31, 1942 (B2-MP-1580).

WIUC—University of Illinois, Urbana, Ill.—Granted modification of construction permit, as modified, for new non-commercial educational broadcast station, for change in transmitter location, change in antenna system, and extension of commencement and completion dates from September 16, 1941, and July 16, 1942, to 10 days after grant hereof and 60 days thereafter, respectively (B4-MPED-13).

W55M—The Journal Company (The Milwaukee Journal), Milwaukee, Wisc.—Granted modification of construction permit, as modified, which authorized new high frequency broadcast station, for change in type of transmitter only (B4-MPH-100).

WAWZ—Pillar of Fire, Zarephath, N. J.—Granted license to cover construction permit for installation of new transmitter, changes in directional antenna system, and increase in power (B1-L-1672); granted authority to determine operating power by direct measurement of antenna power (B1-Z-1405).

WWSW—Walker and Downing Radio Corp., Pittsburgh, Pa.—Granted license to cover construction permit for changes in auxiliary transmitting equipment (B2-L-1671).

KGKF—KGKL, Inc., Portable-Mobile, area of San Angelo, Tex.—Granted application for license for reinstatement of relay broadcast station license which expired October 1, 1941 (B3-LRY-264).

KWFR—Wichita Broadcasting Co., Portable-Mobile, area of Wichita Falls, Tex.—Granted license to cover construction permit for new relay broadcast station (B3-LRY-280).

WJW—WJW, Inc., Akron, Ohio.—Granted petition for an extension of time in which to file an opposition to the petition for rehearing filed by the Capitol Broadcasting Co., Inc., against the grant of the application of WJW, Inc., for changes in its directional antenna and transmitter location; time extended to June 19, 1942.

Herald Publishing Co., and Dorman Schaeffer (both at Klamath Falls, Ore.)—Continued until July 2, 1942, the further hearing on applications for construction permits for new stations (Docket Nos. 6090 and 6091).

Mosby's Inc., Anaconda, Mont.—Denied petition for reconsideration and grant of application for new station (Docket 5966), and amended the issues heretofore released to eliminate reference to Memorandum Opinion of February 23 and substitute therefor an issue in the opinion of April 27, 1942.

Beauford H. Jester, Individually, and as Trustee for W. W. Callan, Dewit T. Hicks, Hilton W. Howell, Wilford W. Haman, Robert G. Levy, Ross M. Sans, and Davis Stribling, Waco, Texas.—Denied petition to reconsider and grant without hearing application for construction permit for new station, and denied petition to prosecute pending application pursuant to provisions of Commission's Memorandum Opinion of April 27, 1942.

South Florida Broadcasting, Inc., Miami, Fla.—Denied petition to reconsider and grant application for new station pursuant to Commission's Memorandum Opinion of April 27, 1942 (Docket 6153).

The Evening News Press, Inc., Port Angeles, Wash.—Denied petition for grant of application for construction permit for new station, and designated said application for further hearing (Docket 4875).

Columbia Broadcasting System, Inc., Boston, Mass.—Denied petition to grant application for new FM station near Paxton, Mass., and designated said application for further hearing (Docket 6024).

WKAL, Inc., Kalamazoo, Mich.—Granted motion to dismiss without prejudice application (B2-P-3270) for new station.

KMP—Eddie Erlbacher, Cape Girardeau, Mo.—Granted petition for continuance to August 3 of hearing now scheduled for June 30, in re application (P2-PC-101-A).

KYW—Westinghouse Radio Stations, Inc., Philadelphia, Pa.—Granted petition for dismissal without prejudice of application for modification of construction permit for extension of completion date.

South Florida Broadcasting, Inc., Miami, Fla.—Granted motion for continuance to July 14 of hearing now scheduled for June 24 in application for a new station (B3-P-2942).

APPLICATIONS FILED AT FCC

560 Kilocycles

KFDM—Beaumont Broadcasting Corp., Beaumont, Tex.—Construction permit to install new transmitter.

620 Kilocycles

WKAQ—Radio Corporation of Porto Rico, San Juan, P. R.—Construction permit to move auxiliary transmitter 3¼ miles from San Juan District, San Juan, P. R., to Sabana Llana, Municipality Rio Piedras, P. R. (location of main transmitter) and use for auxiliary purposes only.

930 Kilocycles

WKY—WKY Radiophone Co., Oklahoma City, Okla.—Modification of construction permit (B3-P-3114, as modified, which authorized installation of directional antenna for night use, move of transmitter, and increase in power to 5 KW day and night) for extension of completion date from 7-20-42 to 1-20-43.

1080 Kilocycles

WINK—Mid-America Broadcasting Corp., Louisville, Ky.—Modification of construction permit (B2-P-2760) which authorized a new broadcast station, for extension of commencement and completion dates from 1-12-42 and 7-12-42 to 7-12-42 and 1-12-43, respectively.

1160 Kilocycles

KSL—Radio Service Corporation of Utah, Salt Lake City, Utah.—Construction permit to make changes in transmitting equipment.

1240 Kilocycles

WGGA—Henry Estes, Austin Dean and L. H. Christian, d/b as Gainesville Broadcasters, Gainesville, Ga.—Voluntary assignment of license to Blue Ridge Broadcasting Company.

1260 Kilocycles

KYA—Hearst Radio, Inc., San Francisco, Calif.—Assignment of license from Hearst Radio, Inc., to Palo Alto Radio Station, Inc. Amended: re officers of parent company (American Newspapers, Inc.)

1290 Kilocycles

KHSL—Golden Empire Broadcasting Co., Chico, Calif.—Modification of construction permit (B5-P-3100) as modified, for installation of directional antenna for day and night use, and increase in power, requesting extension of completion date from 7-16-42 to 8-16-42.

1310 Kilocycles

WDOD—WDOD Broadcasting Corp., Chattanooga, Tenn.—License to cover construction permit (B3-P-2641) as modified, for increase in night power, installation of directional antenna for night use, and move of transmitter.

WDOD—WDOD Broadcasting Corp., Chattanooga, Tenn.—Authority to determine operating power by direct measurement of antenna power.

1320 Kilocycles

KTRH—KTRH Broadcasting Co., Houston, Tex.—Modification of construction permit (B3-P-3011) as modified, which authorized installation of new transmitter, directional antenna for day and night use, change frequency, increase power, and move transmitter, requesting extension of completion on date from 7-10-42 to 9-10-42.

1330 Kilocycles

WFBC—Greenville News-Piedmont Co., Greenville, S. C.—License to cover construction permit (B3-MP-1509) for installation of directional antenna for night use, and increase in power.

WFBC—Greenville News-Piedmont Co., Greenville, S. C.—Authority to determine operating power by direct measurement of antenna power.

1390 Kilocycles

KGER—Consolidated Broadcasting Corp., Ltd., Long Beach, Calif.—Modification of construction permit (B5-P-3096, as modified, which authorized new equipment, increase in power, installation of directional antenna for night use, and move of transmitter) for extension of completion date from 7-12-42 to 10-12-42.

1420 Kilocycles

KCRA—Arkansas Broadcasting Co., Little Rock, Ark.—Extension of special service authorization to operate on **1010 kc.**, 5 KW night, 10 KW day, directional antenna night, using transmitter as authorized in construction permit (B3-P-3049 as modified) for the period 8-1-42 to 8-1-44.

1510 Kilocycles

KGA—Louis Wasmer, Spokane, Wash.—License to cover construction permit (B5-P-2602) as modified, for increase in power, installation of directional antenna for night use, installation of new transmitter, and move of transmitter and studio.

KGA—Louis Wasmer, Spokane, Wash.—Authority to determine operating power by direct measurement of antenna power.

FM APPLICATION

W63NY—Marcus Loew Booking Agency, New York, N. Y.—Modification of construction permit (B1-PH-3, as modified, which authorized new high frequency broadcast station) for extension of completion date only from 7-10-42 to 1-10-43.

TELEVISION APPLICATION

W9XCB—Columbia Broadcasting System, Inc., Chicago, Ill.—Modification of construction permit (B4-PVB-74) as modified, which authorized new experimental television station, for extension of completion date from 7-15-42 to 1-15-43.

MISCELLANEOUS APPLICATIONS

WAUT—Evansville on the Air, Inc., Portable-Mobile.—Modification of license for change in location of transmitter from Portable-Mobile, area of Evansville, Ind., to 2nd floor, 203 N. W. Fifth St., Evansville, Ind.

WEMU—The WGAR Broadcasting Co., Cleveland, Ohio.—License to cover construction permit (B2-PRE-414) which authorized a new relay broadcast station.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Koch Laboratories, Inc.—Charging false representations in the sale of medicinal preparations designated "Glyoxylide," "B-Q," and "Malonide Ketene Solution," a complaint has been issued against Koch Laboratories, Inc., and William F. Koch and Louis G. Koch, officers of the corporation, all of 8181 East Jefferson Ave., Detroit.

R. B. Semler, Inc.—A complaint has been issued charging that R. B. Semler, Inc., New Canaan, Conn., in connection with the sale of a hair tonic designated "Kreml," has violated Section 3 of the Clayton Act, which prohibits exclusive dealing agreements where the effect may be to substantially lessen competition or tend to create a monopoly. (4773)

D. K. Tuey—Alleging misrepresentation in the sale of Chinese herbs sold for medicinal purposes, a complaint has been issued against D. K. Tuey, 107½ South Broadway, Los Angeles. (4774)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Blank & Stoller Corp., formerly of 227 East 45th St., New York, and four individuals, three of whom were officers of the corporation, has been ordered to cease and desist from misrepresentations in the sale of photographic miniatures, also known as goldtone miniatures. (4523)

Lincoln Academy, Inc., trading as Preparatory Service Bureau, 43 Lincoln Park, Newark, N. J., formerly known as Metropolitan Training Academy, and Mr. & Mrs. K. Arnold Freedman, its officers, have been ordered to cease misrepresentations in the sale of correspondence courses intended to prepare students for Civil Service examinations. (4703)

National Press Photo Bureau, Inc.—An order to cease and desist from misrepresentation in the sale of portrait photographs has been issued against National Press Photo Bureau, Inc., and Kay Hart Studios, Inc., and their officers, Samuel F. and Clara L. Reese, all of 509 Fifth Ave., New York, and Bolivar Studios, Inc., formerly of the same address. (3898)

Novelty Sales Co., 806 Walnut St., Philadelphia, has been ordered to cease and desist from selling or otherwise disposing of merchandise by means of a game of chance or lottery scheme. (4039)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Beck Jewelry Enterprises, Inc., 126 East Berry St., Fort Wayne, Ind., which operates 29 retail stores in eight States, generally under the name "Beck Jewelry & Optical Co.," stipulated that it will discontinue certain representations in connection with the sale of its "Kant-Break" eyeglasses. (3493)

Cuban Cosmetic Co.—Alexander C. Brent, Jr., trading as Cuban Cosmetic Co., 5142 South Wabash Ave., Chicago, has entered into a stipulation to cease and desist from the use in advertising matter of any representation or statement, such as "Restores the hair to its natural color," which tends to convey to purchasers the impression that the preparation will restore gray hair to its natural color. (3494)

Gardner Nursery Co., Osage, Iowa, entered into a stipulation to cease and desist from making, by means of radio, catalog or other advertising, any deceptive or exaggerated statement which tends to mislead the public as to the size, quality or probable growth of so-called "trees" or other nursery stock sold by the respondent. The stipulation points out that "fine young shade trees" advertised by the respondent as averaging about a foot in length which would grow to a height of 14 feet in one year or 20 feet in three years consisted largely of shoots or cuttings so small that their development often required years of special care. (3492)

Royal Diamond Co., Jim the Diamond Man, and American Bible Club, C. E. Griffey, 769 Insurance Building, Omaha, Nebr., stipulated to cease certain representations in the sale of jewelry and publications. (02998)

Sarco Remedy Co., E. L. Bachman and V. E. Chambers, Sidney, Ohio, stipulated that in the sale of "Minton's Asthma Remedy" they will cease representing that the preparation will prevent, remedy or correct asthma or any underlying cause of it, or has therapeutic value in its treatment in excess of furnishing limited, temporary relief from paroxysms due to or associated with asthma. (02997)

Sears, Roebuck & Co., Chicago, stipulated to cease certain representations in the sale of "Dr. Overfield's Farm Mixture." The respondent agrees to cease advertising that this product can be depended on to insure health or growth of bone or body in pigs and that it will cure, remedy, prevent or control bull nose, necro or other similar diseases in pigs. The respondent further agrees to discontinue representing, through such statements as "worm remedy" or "will keep them free from worms," that the product is effective in the prevention of worm infestation in hogs, pigs, sheep or goats. (02996)

E. S. Wells Estate—George T. Wells, trading as E. S. Wells Estate, 706 Grand St., Jersey City, N. J., has entered into a stipulation to cease certain representations in the sale of a poison for rats and mice designated "Rough on Rats." (02995)

RADIO DOES A JOB

Sometime ago, you were told to sell this war effort and sell it hard.

You're doing just that. And you're going to sell it even harder as time goes on.

You're doing a swell job. All of you. Let us hear from you as you do an even better one. We want to tell the other boys, and the whole world, about it.

For instance, take a look at what Glenn Snyder at WLS did for the salvage drive this week. We quote his wire.

> "As contribution to war salvage drive radio station WLS moving entire National Barn Dance show and broadcast with cast of 150 people from Eighth Street Theatre Chicago to Bloomington, Illinois, this Saturday night. Full four hour program and stage presentation including hour on NBC coast to coast network will be broadcast from there with admission requiring 100 pounds scrap metal or 50 pounds rubber for each ticket. Station paying all expenses and total proceeds from sale of scrap collected will be donated to local USO organization.
>
> "In addition prairie farmer WLS giving two day all expense July 4th trip to Chicago to entire family of person bringing in greatest amount scrap.
>
> "As of Thursday night 181 tons of metal and 9 tons of rubber already in with 4000 tickets distributed and necessitated moving wires, stage and microphone set ups already installed to larger building to accommodate crowds still bringing in scrap.
>
> "Interesting incident to date include case of one man bringing in 6000 pounds of scrap entitling him to 60 tickets but refusing to accept more than 2 needed and requests from 3 more towns asking for like plan to aid them in local drives."

Carl Loose, program manager at WPAR, Parkersburg, W. Va., doesn't have any big studio show to pack 'em in, but he didn't let them stop him from packing 'em in (with their rubber) anyway.

> "Being in the category of the small station, and being limited in really big stunt promotion," said Carl, "we looked around and grasped the old tried and true method of having a Scrap Rubber Theatre Matinee for the kiddies.
>
> "Every theatre in Parkersburg and one in Marietta, Ohio, participated. On a different day each week, they held a scrap rubber matinee. During the six consecutive days the youngsters turned in 2,972 pounds of rubber."

Sanders Bill Hearings

Uninterrupted by questions, Chairman Fly read 35 pages of prepared testimony at Tuesday's hearing on the Sanders Bill before the House Interstate Commerce Committee.

He dealt with the four matters which the bill would require the FCC to study and report to Congress on: (1) network broadcasting, (2) network licensing, (3) newspaper ownership, and (4) clear channels.

As to network broadcasting, Mr. Fly explained at great length and defended the network regulations now under fire in the courts. He indicated that he felt this matter had been thoroughly covered by the Commission and that he should come to Congress for legislative help only if the courts outlawed the challenged regulations.

Network licensing presented a complex problem which would require much study, Mr. Fly stated. He was of the opinion this should be deferred because (1) the FCC was too busy with its war work and (2) prospective developments in FM and television might change the whole picture.

As to newspaper ownership, Mr. Fly said the FCC already had undertaken a study and would report as promptly as possible. He failed to say to whom the FCC would report.

As to clear channels, he suggested that the committee summon E. K. Jett, the FCC's chief engineer, because "basically the clear channel problem is an engineering problem."

On Wednesday, Mr. Fly was questioned for nearly two hours by committee members.

Chairman Sanders was especially insistent that Mr. Fly express his views on newspaper ownership and the power of the FCC to do anything about it. But the chairman refused to commit himself, insisting that the whole matter was still under study.

Mr. Sanders. Do you conceive that the Commission has the power to refuse licenses to a newspaper-owned radio station?

Commissioner Fly. We have formed no conclusion on that subject. That is one of the subjects which this bill calls for study on and we have been engaged in that study for some months, and have taken extensive testimony. The record has not been closed on it yet. We are making a very extensive study on that subject, and in the course of a pretty short time, why, the Committee may have our conclusions on it—the result of the investigation.

Mr. Sanders. Well, do you think the question of whether you have the power or not depends upon facts established or upon the wording of the statute under which you operate?

Commissioner Fly. Well, statutes do not operate in a vacuum, sir. Statutes operate on given sets of facts.

Mr. Sanders. You think then that the statute means one thing today and can mean something else tomorrow, if the facts change?

Commissioner Fly. Why, of course it does. Due process of law means one thing in one case, that is, you just cannot say due process of law and answer the question. The whole answer to the question as to whether you have due process of law depends upon facts, facts, facts, facts; upon the reasonableness of the particular conduct of the tryer or whatever else is at issue; the reasonableness of the particular statute, in the light of the facts.

Mr. Sanders. Your view of the power of your Commission to deny radio licenses to newspapers then would depend not upon whether Congress had granted that power under the language, but whether the facts warranted it?

Commissioner Fly. I did not say that; I did not say that. I think that the question as to whether there is any power at all on the subject is something that might well have to be determined independently of the facts; but it might well be that the determination of what should be done under the public interest concept would depend upon the factual conclusions. Public interest, you know, does not define itself. Somebody has got to give it a definition by practical application, case by case. You have not spelled it out in the statute. You cannot spell it out in the statute. Yet, I do not think you want us to sit down there and decide public interest without any relation to the facts. That would not make sense.

Mr. Sanders. Well, you are a lawyer. You are on the Commission, and you are presumed to know the facts as they have been established to date.

Is it your view as of this moment that the Commission does have or does not have the power to bar newspapers from owning radio stations?

Commissioner Fly. I am not going to form any conclusion on that until the Commission arrives at a conclusion. I do not think that you want to pull a judge off of the bench in the middle of a proceeding and demand that he tell you what his judgment is going to be. I do not think you want to do that, Mr. Sanders.

Mr. Sanders. No, I do not want to do that.

Commissioner Fly. I want to tell you frankly, I do not know what my own personal judgment will be. Frankly, I do not.

Mr. Sanders. I do think that the members of this committee have a right to ask the Chairman of the Federal Communications Commission whether you believe that Congress has already granted you that power or not, and you decline to answer.

Commissioner Fly. I decline to answer, simply because I have not completed a study on the subject. I have not had a comprehensive report from the counsel on that. I have not had findings of fact.

Mr. Sanders. You take the view then that the law depends upon the facts?

Commissioner Fly. We have been over that, sir.

Mr. Sanders. Yes, but I am coming back to it.

Commissioner Fly. I think the application of the law in many cases must depend upon the facts. The sheer question as to whether the Commission has any power at all, in that situation, may be purely a legal question; as I indicated before. I do not know. But over on the other hand, there may be the power there under the public interest concept to make distinction in the terms of the public interest to be served.

If you want the legal answers to that, sir, I really think it is, that it is pretty nearly purely a question of law then, as to whether or not, assuming that the Commission may have the power, then it may very well depend upon the facts developed in a thoroughgoing study as to whether we are justified in applying the power in that situation.

Mr. Sanders. As a matter of fact, is not your Commission refusing to grant applications to newspaper applicants?

Commissioner Fly. Not at all.

Mr. Sanders. How many newspaper applicants have been refused since you started this study?

Commissioner Fly. None, sir.

Mr. Sanders. Have any of them been granted?

Commissioner Fly. No.

Mr. Sanders. Have any applied?

Commissioner Fly. The thing that we have done there, sir, is to hold those cases in abeyance, pending this study. We had, as I stated yesterday, we had a large number of those cases that came in not merely in the standard broadcasting field, but particularly in the frequency modulation field, which was just opening up, and there we were faced with a serious problem which this Congress had debated through the years, and at times in a very critical fashion, and we determined before we moved one way or the other on those applications, that we ought to have these studies.

Mr. Sanders. So as a matter of fact, you are applying the rule before you come to a conclusion as to whether you have the power to do it or not?

Commissioner Fly. What is the point in making a study to determine what you should or ought to do with applications that are before you and going ahead and disposing of the applications before or prior to the study?

Mr. Sanders. Well, there is no limit, of course, to that method, is there?

Commissioner Fly. Why I would assume there is a limit. I would assume that a party who feels himself aggrieved by having his case postponed during the study could or might mandamus the Commission to require a decision. I do not know whether he could or not. That is a legal question which I have not studied. But, I think it is quite conceivable.

Mr. Sanders. Do you or do you not believe that this is a fundamental question, the right of the Commission to say, arbitrarily—I use the word "arbitrarily" in the legal sense, and not in any other.

Commissioner Fly. Yes.

Mr. Sanders. Just to say on its own motion that because a man is in a certain business, otherwise legitimate, that he cannot have a radio station. Do you or do you not believe that raises a question that is fundamental?

Commissioner Fly. I think that is a significant question.

Mr. Sanders. Well, do you or do you not believe that it might be better to have the Congress determine that issue or to have the Commission determine that issue?

Commissioner Fly. I really, certainly, have no objection to Congress expressing itself on that subject if it cares to, explicitly, and, as a matter of fact, most of the Congressional utterances on the subject have been critical of the Commission for failure of the Commission to do something about it; but if the Congress wants to change its line of approach and do something about it, why, I would certainly raise no question as to the propriety of that approach.

Mr. Brown. When do you expect the Commission to reach a definite opinion on this matter?

Commissioner Fly. Well, I should imagine, within a few months the Commission will have disposed of it. As to whether it will come out with a definite program in terms of decision on the subject, I do not know. It may well be that the Commission will simply leave the matter up to you gentlemen and say, "Here are our studies." And, it is a serious question. Some questions have been raised as to the legal authority, and Mr. Sanders suggests, it is a significant matter, and it may well be that we will put it right in your laps.

Mr. Brown. When do you think we may have the benefit of your studied advice and convictions on that matter?

Commissioner Fly. I said within a few months.

Mr. Brown. I assume that will be the report of the Commission?

Commissioner Fly. I assumed that that was what you meant, the Commission.

Mr. Brown. Until that time the Commission will take no action until it is presented to Congress? Or, is your thought that the Commission will take no further action?

Commissioner Fly. The Commissioners have just not determined what they will do, sir. It has made no determination.

Mr. Brown. In other words, the Commission may decide to bar newspaper ownership?

Commissioner Fly. That is one conceivable result.

Mr. Brown. Or may bring the matter up to Congress to pass upon.

Commissioner Fly. That is right.

Mr. Brown. That is, if Congress does not enact legislation prior to that time.

Commissioner Fly. That is right.

Mr. Brown. I think that is all.

Mr. Sanders. Mr. Chairman——

The Chairman. Mr. Sanders.

Mr. Sanders. Mr. Brown, the questions that I propounded to Mr. Fly in connection with the question you asked were to get Mr. Fly's opinion on whether or not the power to bar newspapers was already in the Communications Act.

Mr. Brown. You mean the legal power.

Mr. Sanders. Yes, and those are the questions I asked him.

Mr. Brown. That is what I wanted to know.

Mr. Fly was questioned at great length by Representative Youngdahl about the "monopoly" rules. At one point Mr. Youngdahl remarked:

Mr. Youngdahl. I have been very much interested in the caliber of (the radio) men who have testified at these hearings. In the first place they seem to be very anxious to cooperate in our war effort and I think they have done a good job.

In the second place they seem to have the public interest in mind, and some of them have testified that the application of these so-called network rules will create a disturbance and confusion.

Commissioner Fly. That is a lot of moonshine.

At the outset of the Wednesday hearing, Mr. Sanders discussed with the Chairman his previous day's testimony that a great many listeners were deprived of the privilege of hearing Lowell Thomas because Mr. Thomas' sponsor chose to buy only 25 outlets. This situation, Mr. Fly had said, was one of those which would have to be examined in connection with the licensing of networks. The following is the testimony:

"Mr. Sanders. Mr. Chairman.

"The Chairman. Mr. Sanders.

"Mr. Sanders. Mr. Fly, you made reference to Mr. Lowell Thomas, but I did not quite understand it. Of course you were using his name merely by way of illustration of the point you were seeking to establish; but it was something like this, that if Mr. Lowell Thomas was broadcasting, his broadcast was limited, I think you said, to around 20 stations, or something like that.

"Commissioner Fly. Twenty-five, I believe.

"Mr. Sanders. And you offered the thought that it would be of benefit to the public if his broadcast could be heard by more than the limited number of stations made available in that particular contract.

"Commissioner Fly. The thing that I suggested there, Mr. Sanders—of course I assumed that Lowell Thomas' broadcasts were meritorious—but I was simply trying to make the point that the stations throughout the country ought to have the opportunity of taking that broadcast and a study of the network situation might, for example, explore the question as to how those should be made available to the listeners throughout the country. As it is, that particular decision is made, in the main, by the advertiser who wants only 25 stations; who wants to take it to only a small portion of the people, and, of course, there are added reasons under the present existing practices of the networks why the people could not get Lowell Thomas in different cities due to exclusivity and option clause provisions which would prevent it from going to some of the cities.

"Mr. Sanders. Well, the company for which Lowell Thomas broadcasts, of course, is a private enterprise, and they are no doubt looking at the profit motive.

"Do you not think that that question that you raised goes to the profit system itself? How would you pay for Lowell Thomas?

"Commissioner Fly. I have not solved it, sir. I just cited that as one of the problems that you would want to consider in connection with this network licensing situation.

"In other words, I am suggesting there is a problem to be studied rather than to present to you an arbitrary answer to the question.

"Mr. Sanders. I see.

"Commissioner Fly. I do think that any system under which it is possible to limit Lowell Thomas to 25 stations is open, on the face of it, to some question, because again we come back to the principle that this is a public business. We are talking in terms of public service, and the service to 130 million listeners, and I think that is entitled to some emphasis even in the face of the fact that at the outset here you have got a commercial sponsor.

"In other words, you might well consider, after studying the thing, that you would want to override a private interest in the interest of 130 million listeners. I don't know.

"Mr. Sanders. As I take it then you merely raised the question without offering a solution?

"Commissioner Fly. Yes, sir. I do not say that we ought to force the Sun Oil or the network to put Lowell Thomas in all of the cities. I do think it is a misfortune that most of the cities are unable to get him."

Later in the morning, Mr. Sanders queried the Chairman with reference to the grant by the Commission of experimental or temporary licenses. Finally Mr. Sanders said:

"You have Station KOB that has had this special authorization for two years, I believe you say, and under the terms of the license that you have given it, or authorization, it has absolutely no legal standing in court, and the legal principle that occurs to me is that if you can do it in one case you can do it in two cases, and you can do it in fifty cases, or one hundred cases. Therefore——

"Commissioner Fly. Let me just say this, Mr. Sanders——

"Mr. Sanders (continuing). Let me finish my statement and then you can answer.

"Commissioner Fly. Yes, sir.

"Mr. Sanders. The question is not whether you are abusing this particular power in this particular instance, but the importance of the question from the standpoint of a Member of Congress is whether it is desirable for you to have that in any case, or if you should have it in any case, whether Congress should not strictly define the time and conditions of your entry, purely from the legal principles involved."

Speaking upon the subject of the length of licenses, Mr. Fly reiterated a statement that he had made earlier in his testimony that he believed legislation should include specific wording with reference to the term of the license. Mr. Sanders said:

"Mr. Sanders. You agreed with Major Bulwinkle the other day that you would meet with him and try to work out an amendment that might make the holders of licenses more permanent. I believe that was what you and Major Bulwinkle decided, was it not, Major?

"Mr. Bulwinkle. Yes.

"Commissioner Fly. That is right."

Mr. Sanders referred to a letter which had been sent to Chairman Lea of the House Committee on Interstate and Foreign Commerce purporting to be an official communication from the Commission issued last September and including some comments with regard to the so-called Sanders Bill. Mr. Sanders said:

"Was that an official communication of the Communications Commission, or your individual report?

"Commissioner Fly. This was the report of the Commission and it was cleared through the Bureau of the Budget.

"Mr. Sanders. On what date was it that the Commission as a whole considered this report?

"Commissioner Fly. I could not say, sir.

"Mr. Sanders. Did you ever have a meeting of the Commission at which this report was considered by the Commission?

"Commissioner Fly. I have no doubt that this was presented to the Commission about the time of the letter, perhaps around the first of August.

"Mr. Sanders. Would you or would you not state that it was taken up at an open meeting of the Commission, a regular meeting of the Commission?

"Commissioner Fly. I do not know, sir. A thing like this is one of a dozen things that will come up in the course of the meetings, and I just do not recall precisely how it came up.

"Mr. Sanders. You do not recall whether or not you ever discussed the Sanders bill in an open meeting of the Commission?

"Commissioner Fly. Oh, yes, we have discussed it a number of times.

"Mr. Sanders. Was this report ever approved by the Commission?

"Commissioner Fly. I have told you what I thought the facts were. I think that the report was approved both by the Commission and by the Director of the Budget.

"Mr. Sanders. Will you state what members of the Commission were present.

"Commissioner Fly. No, I cannot. I could not possibly tell you.

"Mr. Sanders. Mr. Fly, is it not a fact that this report was prepared by you, under your direction, and then approved by other members individually at different times, and that it was never considered at a meeting of the Commission called for that purpose.

"Commissioner Fly. That is conceivable, though I am not changing my testimony, that we have had general discussions of the bill; but it is conceivable that at the time this was prepared it was circulated and approved by individual commissioners, and that is not at all unlikely. I just do not know.

"Mr. Sanders. Do you think that is a desirable procedure? In other words, the other members of the Commission then had the alternative of vetoing what you had already proposed, or agreeing to it."

The report of the Committee on Censorship Organization was the subject of a lengthy exchange between Congressman Sanders and Mr. Fly. It follows:

"Mr. Sanders. Are you familiar with the report of December 12, 1941, of a Committee on Censorship Organization, one of which was Mr. Jett, Mr. E. K. Jett, Chief Engineers and Mr. Thomas Harris, Assistant General Counsel representing the Commission?

"Commissioner Fly. That is on the——

"Mr. Sanders. Censorship organization.

"Commissioner Fly. That is on the organization not by the Commission, but by the administration of the Office of Censorship.

"Mr. Sanders. Reporting December 12, 1941, Committee on Censorship, of which Mr. Jett and Mr. Harrison were members?

"Commissioner Fly. Yes. I, of course, do not have the records before me; but I am roughly familiar with that. At that time the war had been on just a few days before, and the Administration had the problem immediately of devising a scheme of censorship, and at that time all departments having anything to do with communications and information, and that sort of thing, at least in any broad sense, particularly as an example, the Post Office Department, which had one line of communications and our people, who had other lines and the Department of Justice and the Army and the Navy, of course—there was a general Interdepartmental study of the censorship problem with a view to recommending to the President, as I recall, a system of censorship to be set up by the Government, and we contributed what we could to that study. I think Mr. Jett, our Chief Engineer attended a number of conferences, interdepartmental conferences on that subject, and Mr. Plotkin of our law staff also attended a number of them, and we made, and are continuing to make, such contributions to that work as are appropriate.

"For example, when the problems in connection with the maintenance of certain radio teletype circuits, and their broadcasting, the Commission finds it necessary to close the circuits to avoid the problem of censorship, and also to make the frequency available for war purposes. That is just a simple example. And, we keep the Censor advised of the state of censorship and the state of communications throughout the world.

"Mr. Sanders. In that report occurs the following language:

> 'Finally, the Commission, under the Act, has the duty of licensing all radio stations in the public interest, convenience and necessity. The exercise of such licensing power may possibly have an important part in controlling the communications of facts and opinion. Renewals may be denied or revocations ordered where stations have departed from legal requirements. The Commission's licensing authority also extends to radio operators, and in this regard too, it may serve as an aid in carrying out control programs.'

"You agree with that statement?

"Commissioner Fly. I agree with that statement. You understand there we are dealing with proposed legislation.

"Mr. Sanders. No; this is a statement of the powers that you already have.

"Commissioner Fly. Well, the Commission——

"Mr. Sanders (continuing). In the Commission under the Act—referring to the Communications Act.

"Commissioner Fly. Well, let me give you an example of the sort of thing that might happen there.

"Suppose that the radio station engaged in subversive broadcasting. There is no question about its being unlawful and subversive and contrary to the laws set up in this field. There is not doubt, in my mind, but what a license of the station could be revoked, and should be revoked, just as we would for violation of any other law—that is, any other important law.

"Mr. Sanders. This committee has handled a good many emergency laws. In every one of them is contained a provision that the power so granted to the executive would terminate either upon the termination of the emergency or within a stipulated time thereafter.

"This that I am quoting, however, is not a grant of emergency power. It is a statement of powers that the Commission is presumed to have under the Federal Communications Act.

"Commissioner Fly. Yes.

"Mr. Sanders. Not in war time or in peace time, but I am asking whether you believe that the Commission has that power.

"Commissioner Fly. Why, not at all in peace time.

"Mr. Sanders. I am not referring to any specific time——

"Commissioner Fly (interposing). But, let me say——

"Mr. Sanders. Wait a minute, and let me state the question.

"Commissioner Fly (interposing). Let us get this clear. In peace time, I would not suggest that, but in war time operations of the Commission.

"Mr. Sanders. Under the Federal Communications Act.

"Mr. Bulwinkle. He is talking about the proposition that you asked him about.

"Mr. Sanders. You are talking about the act that was passed in 1934.

"Commissioner Fly. Yes. The act was passed then, but I am talking about an application of that act in time of war, and I say that basically it is a pretty serious problem that when any station violates some fundamental law like pursuing a persistent line of subversive conduct in violation of the laws that you gentlemen have made, no matter when this Act was passed, we can refuse to continue to license that operation and refuse to let it continue carrying on this subversive conduct. Well now, to suggest we could do that in time of peace, I think is entirely out of the question because you do not have that problem. You do not have the censorship problem. You do not have the subversive conduct.

"I would say that at any time, in time of peace, when a station is utilized for unlawful purposes—let us assume that a station is utilized to guide the operation of a gang of outlaws in peacetime, of course, we could take it off of the air in peace time; but the reason why this question as to what they put out over the air can be given attention here is because it is war time.

"Mr. Sanders. Do you not think it would be more desirable to have that grant of power—whatever power was necessary—designed to operate only in war time rather than to put a construction upon the peace time act that you already have such power and leave it to your Commission as to when the emergency exists? Do you not think that rather probable?

"Commissioner Fly. I see no objection to that, sir; but again I think we are just trying to find bugaboos here, because we are acting on and operating on this thing from day to day, and we are operating under war conditions, and I am happy to tell you that no question has arisen yet as to the license of any station, because of its war time operation, and I just think we are looking for things to worry about when we have got to take the time in a period of war to worry about the framing of legislation of that sort."

After Mr. Fly had referred to the "vast and thorough-going record" on the chain broadcasting situation and had referred to the amount of work which had been done by the Commission on the newspaper situation, he told the Committee that about 90% of the work of the Commission had to do with the war effort and that it was only at the greatest sacrifice that we spend all of the time we do saying that he personally did not mind the sacrifice. He said:

"I am perfectly happy to stay here as long as there is any demand on the part of this Congress, on this Commission about any investigation or anything of that sort, I want to stay right here with this Committee and give you everything that you want; but I do not want, with all deference, to face the problem as to whether war work shall be broken down by an over-extensive consideration of any of these problems that are not pressing upon us.

"Mr. Sanders. That is all.

"Mr. Youngdahl. Mr. Chairman.

"The Chairman. Mr. Youngdahl.

"Mr. Youngdahl. Mr. Fly, I am very much interested in the last statement of yours, and I think that you are absolutely correct.

"In view of that statement, do you not think that it might be advisable to withhold the application of the so-called network rules until the war is over?

"Commissioner Fly. The Commission has completed all of its work on that problem, sir.

"Mr. Youngdahl. On the other hand, there is an interest that Congress should look into so far as the public is concerned. Is not that correct?

"Commissioner Fly. Well, I do not doubt that. Certainly Congress ought to, if it wants to, make a thorough study of that. We have submitted our report and you can have the entire record if you want it.

"I should think that probably you would be satisfied if you would make a thorough study of the printed report, which is in one small volume before you.

"Mr. Youngdahl. I have been very much interested in the caliber of the radio men who have testified at these hearings. In the first place they seem to be very anxious to cooperate in our war effort and I think they have done a good job.

"In the second place they seem to have the public interest in mind, and some of them have testified that the application of these so-called network rules will create a disturbance and confusion.

"Commissioner Fly. That is a lot of moonshine."

Sales

WAR-TIME ADVERTISING JOBS

Distributed at the AFA convention in New York last week was this compilation of what advertising can do in war-time:

It can:

(1) Help in the education and training of customers' personnel.

(2) Help clear up misunderstandings among the users of your product.

(3) Help industry with its ever-growing maintenance problem.

(4) Speed technical information (or offer technical service) to the men directly engaged in war production.

(5) Help retailers explain shortages and substitutions . . . help them prevent hoarding.

(6) Help dealers promote conservation.

(7) Keep industry up to date on new products and developments.

(8) Keep industry advised of auxiliary attachments, improvements, better methods, new ideas for stepping up production on already-installed equipment.

(9) Help retailers build up the service end of their business.

(10) Help customers get started on sound planning for the future.

(11) Help develop a better understanding of the lesser-known items in your line.

(12) Help customers get the most out of what they *can* get.

(13) Explain to customers what your distributors can do to help them.

(14) Explain any change in price policy.

(15) Help dealers select added lines.

(16) Get your story into defense plants from which salesmen are barred.

(17) Get your story into new companies which are unknown to you because of war-time censorship.

(18) Help swing demand from scarce "special" items to more plentiful or standard items.

(19) Help get war contracts.

(20) Help reduce confusion and delays due to incorrect specification.

(21) Help carry some of the load of over-burdened sales-service departments.

(22) Transmit any helpful information from where it is to where it is needed; *quickly, accurately,* and *economically.*

HAYES NAMED TO SALES GROUP

Arthur Hull Hayes, general manager of WABC, has been reappointed to the NAB Sales Managers Executive committee as the Columbia representative.

Personnel of the committee is now complete, with John M. Outler, Jr., WSB, as chairman; Frank R. Bowes, WBZ, representing large stations; William Malo, WDRC, representing medium stations; Dietrich Dirks, KTRI, representing small stations; Don Davis, WHB, representing Mutual-affiliated stations, and Hayes representing CBS.

MANUAL HELPS GET BUSINESS

Sales managers periodically report how the NAB "Manual of Radio Advertising" can be effectively used in selling radio as a basic advertising medium. They declare that with the fundamentals thus established in the advertiser's mind, it is relatively easier to interpret the station's local story.

A good example is this letter just received from Norman Burdick, sales manager of WJTN, 250-watt station at Jamestown, N. Y.:

"When I first read the 'Manual of Radio Advertising' some months ago, it not only gave me an opportunity to brush up on some important radio material but also made it possible for me to learn a great deal. I was very thankful for having a copy.

"But now I can really say 'Thank you!' for the excellent material contained in the NAB Manual that you prepared. Here's what happened: For several years, one of the largest grocery store chains in our area (Quality Cash Stores . . . 69 retail outlets) could not be persuaded to try radio advertising. Everything we could possibly think of was used. We bombarded them with literature showing results from radio; we presented them with innumerable program and spot announcement ideas; we ran auditions; we switched salesmen on the account. But they would not give us a trial. Finally, a short time ago, I gave their Advertising Manager a copy of your Manual and made him promise to take it home and study it carefully.

"The account has just signed their radio spot contract for fifteen spots a week for thirteen weeks, and another advertiser has started to find out that radio doesn't cost—it pays.

"I know your Manual of Radio Advertising made it possible for us to get this account on the air, so again we say—many thanks for the splendid job you have done!"

TELLS LOCAL STORY

WATN, another 250-watt station, in Watertown, N. Y., faced with particularly strong newspaper competition, has issued a powerful local promotion piece entitled "What Price Radio?" based on the formula in the chapter of the same title in the NAB "Manual of Radio Advertising."

Taking excerpts from the Manual to establish the basic points, the station developed its own comparative cost figures in relation to its competitive newspaper, and made the story applicable to local, regional or national advertisers by breaking down its coverage to show special comparative figures for the city only, for the county, and for its entire primary area.

Concisely presented in a 4-page folder, the piece should be effective in developing radio prospects and in giving strong support to radio sales presentations.

UTILITIES URGED TO ADVERTISE

Cessation of public utility advertising for the duration of the war would be a "deliberate sabotage" of an investment built up during normal times, Davis M. DeBard, vice president of Stone & Webster Service Corp., declared June 23 at a meeting of the Public Utilities Advertising Association during the AFA convention in New York.

"Any utility company which crawls into its shell and ceases to interpret itself to the public during a period of war is inviting the inevitable—serious impairment of prestige, political attacks, and all the other ills associated with a policy of silence" Mr. DeBard declared.

Recently published data indicate that companies which dropped advertising during World War I, he said, "suffered severely" in the post-war period and some nationally known companies passed out of existence.

While urging continued advertising, Mr. DeBard warned, however, that economical coverage is the first consideration. "Any form of advertising which cannot justify itself from this point of view will tend to bring on the utility criticism of customers who will claim that money is being spent recklessly," he pointed out.

W. J. Weir, vice-president of Lord & Thomas, speaking at the same session, charged that advertising is not doing the job it should be doing at present "because of too much fear of the present and of the future."

Mr. Weir urged a continuance of advertising to the public as the only way to maintain good will. "Advertising is business' last point of contact with the American consuming public," he continued. "It's the last means it has for preserving its franchise as a free operating enterprise. And the longer it hesitates, the longer it puts off a resumption of its curtailed advertising, the more precarious becomes its position—the more it invites the very thing it fears."

Many advertisers have lost courage, he contended, and because "they can't see the possibility of selling a can of beans tomorrow morning, are simply twiddling their thumbs instead of continuing to tickle the public's curiosity and desire."

Per-Inquiry and Free Time—Ho-Hum!

Without comment, the following chisels reported by member stations the past week are offered for your edification:

Stockton, West, Burkhart, Inc., Cincinnati, want free time on women's programs to promote Clopay window shades. All in the interests of national defense, of course.

J. Walter Thompson's Press Bureau, New York, also seeks free time on women's programs to promote Cheeks cosmetics. And they ask for a special theme song to be played, too.

Ruth Matthews of the **Ladies' Home Journal** also seeks free time on women's programs to promote an article on cosmetics for stockingless legs, carried in the July issue of the *Journal.*

Forjoe & Co., New York, want P-I deals on a photo-finishing proposition.

Manufacturers Radio Service, Los Angeles, want P-I deals for a shaving liquid called Rev.

D. S. Manson & Associates, Minneapolis, want P-I deals for World Bible Distributors.

National Needlecraft Bureau, Inc., New York, ask for free time on women's programs to promote needlework, which in turn promotes the products of its members.

All have been invited by the NAB to use radio properly.

To the Services

SKAFF, WMBD, IN MARINES

Vincent Lloyd Skaff, newscaster for station WMBD, Peoria, Ill., is a member of Uncle Sam's fighting forces. He is a member of the U. S. Marine Corps Reserve and is now stationed at San Diego, Calif., where he is receiving basic training.

MORE WCAU STAFF IN SERVICE

Three more members of the WCAU staff have joined the armed forces, bringing the station's total to eighteen.

Joseph T. Connolly, sales promotion manager, has been commissioned a Lieutenant (jg) in the U. S. Navy and is training at Harvard.

Frank Shannon, for the past fourteen years a member of the engineering staff, is to be commissioned Captain in the U. S. Army Air Force. He will leave shortly for Salt Lake City.

J. R. Troxel, also a member of the WCAU engineering staff, enlisted in the Army Signal Corps and is now taking a training course at Fort Monmouth.

Priorities

Stations are advised to maintain their spare inventory at 100 per cent. The minute inventory gets into the danger zone, below spare inventory minimum, begin filing PD-1A forms with WPB.

MAKE THIS INCLUSION

To speed delivery of form PD-1A to proper persons at WPB, broadcasters are urged to type "Classification 11.20" at the top of the PD-1A form. Then underscore with a colored pencil.

USE FREE SWAP SERVICE

Make use of NAB's free swap service to stretch out supplies of parts and equipment.

INCLUDE LEGEND ON ORDERS

Because recording records are an operating supply of material, manufacturers of records have sought NAB cooperation in asking stations to write in the approved legend on their orders for recording blanks which they give to jobbers and manufacturers.

This legend reads: "Material for Maintenance, Repair, or Operating Supplies—
Rating A-3 under Preference Rating Order P-129 with the terms
of which I am familiar.
(Name of Operator or Supplier).
(Signature of Designated Official)".

Only in this way can manufacturers guard against a future disruptive shock in the flow of the finished product to broadcast stations.

Victory Programs

WBEN—BUFFALO

In Buffalo, station WBEN has a program, "Production for Victory," 10:30-11:00 p. m., that indicates careful planning to emphasize the victory through production theme.

It's an entertaining show without "preaching" and uses Bob Armstrong's orchestra, singers, actors, talent from other fields and war workers selected from Buffalo plants.

It might be classed as a potpourri since examination of a recent script indicated there were no less than five subjects carried. These included: sugar rationing; "I'm An American Day"; a well done study of "one of the lower forms of life known as the 'War Bore' who sees nothing but the pessimistic gloomy side"; women war workers from Bell Aircraft who work on Airacobras and blood donations for the Red Cross.

After opening fanfare and a short orchestra number, a voice set the program with:

"Buckle down, you Yankee, buckle down!
You can win, you Yankee, if you knuckle down!
Buy another bond,
Watch the boys respond,
Way across the pond,
They'll have to beat 'em down.
Spend your dough, you Yankee, spend your dough!
We can win, you Yankee, if you're on the go!
Give 'em planes and tanks
So the fightin' Yanks
Who deserve our thanks
Will have a chance against the foe!

KHQ-KGA—SPOKANE

Harold Zent, director of public relations, KHQ-KGA, Spokane, Wash., arranged for an impressive and solemn ceremony for the mass induction of bluejackets on Sunday, June 7.

Having worked very closely with the Navy recruiting office, by virtue of his three-a-week Navy enlistment program, he was able to bring a large number of new recruits to the ceremony. It was conducted in the shadow of a monument that stands in honor of Ensign Monaghan who lost his life in Samoa, in line of duty, protecting his superior officer. The locale of the program contributed much to the "feel" of the event, both for listening and visible audience. The three-a-week broadcast which Mr. Zent has conducted since Pearl Harbor, has added a great deal to the recruiting efforts of the Navy in the Spokane territory, according to the Spokane naval recruiting chief.

Radio Training Courses

RADIO TRAINING IN OREGON

In another week the first section of the NAB-ESMDT radio technician training course will be over, according to Frank H. Loggan, manager, KBND, Bend, Oregon. He reported that the average attendance of 35 was genuinely interested, studied hard and attended regularly. One man, with a little previous experience, has already secured his class 2 radiotelephone license. Six others are receiving extra instruction, gratis, from Robert Pickinson, instructor, in order to qualify them to take the FCC examination for a license within the next 15 days. Other members of the class, he said, will have a very good basic training in radio and can progress rapidly in it.

Fifty other people are already registered for new sections and a great many others, who are particularly well qualified, would like to enroll, Mr. Loggan said. The number of men enrolled will ultimately be decided by the number of sections approved in Washington.

Oregon State college has been very helpful in arranging and supervising the courses. R. H. Dearborn, dean of engineering, Oregon State College, heads the radio educational activities within the state.

Utah State College

Utah State Agricultural College, which has been teaching radio technology for 20 years, is engaged in teaching radio in three categories. Part I of the "Fundamentals of Radio" has been in progress for some months and Part II will get started during the first week of July, according to George D. Clyde, Dean, School of Engineering, Industries & Trades, Utah State.

In addition, Dean Clyde is supervising the radio instruction of 300 Navy enlisted men and approximately 100 U. S. Army Signal Corps men.

Manhattan College

Brother Amandus Leo, dean of engineering, Manhattan College, New York City, is maintaining a strong interest in the training of radio technicians. Two new classes of Part II, "Fundamentals of Radio" are to be started. In addition, Brother Leo has arranged to conduct classes in "radio physics" for high school teachers, so that when these men return to school, in September, they will have a firm foundation to stress that part of physics which deals with radio.

A new section, "Fundamentals of Radio" Part II, has been started in which all registrants are members of the Enlisted Reserve Corps (Signal Corps). Because of expected demand there will be four or more additional such sections.

Oswego State Teachers

Graduates of the NAB-ESMDT Radio Training Program, conducted by Oswego State Teachers College, Oswego, N. Y., will be ready for radio work in another 16 weeks.

Part II and other beginning classes are scheduled to start at Oswego on July 6.

University of Wisconsin

Between 450 and 500 students have finished section 1 of the two part Radio Technician Training course, sponsored by NAB-ESMDT of the U. S. Office of Education, according to word just received from H. E. Pulver, director, ESMDT classes at the University of Wisconsin. He also reports that the Signal Corps officer of the sixth corps area, Chicago, has already taken fairly large numbers of students and several of the instructors. Eight more sections, in addition to the 26 started in March, were begun during the last of May and the first of June.

Proposals for some 14 sections of part II of the radio course are awaiting the approval of the ESMDT director, Washington. The University plans to organize the new sections during the first week of July.

Industry Representative is Edwin C. Allen, WIBA, Madison; F. Ellis Johnson, dean of Engineering, University of Wisconsin, Madison, is State Coordinator.

More Training Begins at Syracuse U

The U. S. Army Signal Corps has begun long delayed plans for speeding radio technician training. Start was made at an overflow mass meeting of 500 men in the Onondaga Hotel ballroom, Syracuse, on June 17. It was arranged by Col. Harry C. Wilder, WSYR, New York industry representative of the radio training program. The initial meeting proved conclusively that the interest of the men was at a high pitch even before Lieut. Harry Ross told his listeners that the need was "very urgent".

A necessary time lag followed the mass meeting to permit Syracuse University to arrange facilities for handling the large number of men who signed up. This work is in addition to the multi-section participation in the ESMDT-NAB program.

Academy to Train Radiomen

NAB has supplied radio technician training course material to The Lincoln Academy, Newark, N. J. K. Arnold Freedman, of the Academy's executive office, wrote on July 1:

"I am in receipt of the course material mailed to the Academy on June 27, for which I would like to express my sincere appreciation. I feel sure that this material will be very helpful and hope that the Academy can be of use in alleviating the pressing need for properly trained radio technicians."

STILL GOING STRONG

Radio is credited by the U. S. Civil Service Commission for its outstanding contribution for assistance in recruiting.

On June 20, the Commission announced that placements alone in the War and Navy Departments throughout the United States totaled 1,659,913. This report must certainly be emblazoned upon the history books when the history of this war is written. Radio has served the Commission, continuously, for two years. Continued help of the broadcasters will make certain that the necessary new workers will be found to complete the production program. NAB began cooperating with Civil Service in July 1940.

WQAM ISSUES SERVICE BOOK

F. W. Borton, president of WQAM, Miami, Fla., has just issued the WQAM brochure of public service for the year 1941. The frontis reads:

"In order that our practice of publishing these 'Record of Service' brochures may not be interrupted, yet still conform with the universal practice of conservation during time of war, we are reducing by one-half the size of the 'Record' for 1941.

"On the pages which follow we submit only the skeleton structure of the service we have been privileged to render in our community.

"This material is taken from the authentic WQAM Station logs and we believe that it represents a fair picture of the station's worth to the community to which it has belonged for 20 years."

NEW STATION

Station WALL, Middletown, N. Y., is planning to get on the air approximately July 12. Fred Germain, Jr., program director, has about completed initial plans for his war effort broadcast.

WATCH "INVASION"

Our commentators sometimes refer to the forthcoming second front against the Axis as an "invasion" of France, Belgium or other conquered countries. "Invasion" denotes a war-like grab for territory rather than the freeing of conquered peoples in conquered lands. Let's watch its use.

WAR DAMAGE INSURANCE

On July 1 the free War Damage Protection provided by the Government terminated. In order to protect property against damage caused by enemy attacks or our military services in resisting such attacks, War Damage Insurance must now be purchased from the War Damage Corporation. Many of the large insurance companies have been appointed as fiduciary agents for the War Damage Corporation and the insurance needs of the broadcasting industry can be taken up individually with them or their brokers.

William I. Moore, WBNX, Chairman of the NAB Insurance Committee, states that the NAB Insurance Committee will not hold a meeting on the subject as the War Damage Insurance is not an involved subject and the rates are set by the War Damage Corporation.

MILLER ADDRESSES IRE

Radio engineers are vital in winning this war, but without a continued "courageous enterprise" on their part we might lose it, 300 radio experts and guests from all parts of the country heard here today at the Summer convention of the Institute of Radio Engineers.

Speakers included Neville Miller; E. K. Jett, chief engineer of the FCC; Paul Galvin, president of RMA; Captain E. M. Webster of the United States Coast Guard Communications System, and Arthur F. Van Dyck, the institute's president.

The occasion was a symposium on "What Radio Means in the War Effort," which ended the second day of the three-day convention of the institute.

"Each new stage of the war emphasizes the growing importance of radio," Mr. Miller said. "With the coming of war we saw the government take more positive action in the radio field. Radio cooperated and is continuing to cooperate with the activities of all government agencies. It has accepted in its stride the increased responsibilities, but there is much more to be done."

Mr. Miller pointed out that the operation of broadcasting stations through possible air raids is being worked out and a satisfactory solution is expected.

"One of our greatest assets," Mr. Miller concluded, "is our domestic radio system and the men that make it operate. Let me advocate that we all begin a once to learn how to use this new marvel at home, how to use it to win the war, and, finally, how to use it when the war is over, to make the world a better place in which to live."

Problems of the radio expert will never be finished, delegates were told by Mr. Galvin, "for you will constantly be called upon to explore new horizons, and without courageous enterprise we might lose the war."

"The whole pattern of our war tactics and strategy has been altered by radio communications and radio direction-finders," he said. "You are alive, I am sure, to your war responsibilities, but I implore you to do more. You must do more—we all must do more if we are to win."

Mr. Jett outlined the "huge war task" of the FCC in supervising the radio affairs of the country. Systems are now in effect, he said, to prevent vital information from falling into enemy hands through accident. The country now has direct communication through world-wide radio channels to all Allied nations of the globe, and the FCC has more than 100 radio monitoring depots.

YEUILL-DELANO

George F. Bissell, general manager, WMFF, Plattsburg, N. Y., suggests that any broadcaster negotiating a contract with David

Yeuill or Daniel Delano of Radio Associates, Inc. (Boston) should get in touch with him.

WOMEN'S RADIO DIRECTOR HONORED

Ann Ginn, Director of Women's Activities, Radio Station WTCN, was honored in connection with the recent AFA Convention. She was one of four women accorded Honorable Mention in the Josephine Snapp Award. This award is made each year to the woman who has made the year's outstanding contribution to advertising. The award this year went to Mrs. Barbara Daley Anderson, home economics director and editor of the consumer service bureau "Parent Magazine," who is also president of the New York Woman's Advertising Club.

ARKANSAS

Estimated Radio Homes, 1940

Number of Occupied Dwelling Units as reported by U. S. Bureau of the Census in advance release, Series H-7. Percent radio-equipped calculated from Series H-7 Bulletin following the Census Bureau practice. Number of radio units, or radio homes, estimated by applying percent ownership to those units not answering radio question and adding such to those reporting radio.

FEDERAL COMMUNICATIONS COMMISSION

FLY SAYS WPB AGREES TO EQUIPMENT POOL

WPB officials have agreed "in principle" on the equipment pool for broadcasting stations, FCC Chairman James Lawrence Fly told his press conference on Monday. Up to this time that is the only official statement that has been made that WPB officials were in favor of such a movement.

"On the principle of the thing it is agreed," said the Chairman, "and from here on out we will be discussing ways and means."

The Chairman told the conference that he does not think that if available spare parts and materials were not placed in such a pool that at the end of one calendar year only about 27% of the broadcasting stations of the country would be in operation.

"That's a pretty ominous prospect," he said, "and that is why it is to the interest of all of us that are interested in seeing radio do the big job it is doing."

FLY CONFIRMED

On Monday of this week the Senate confirmed the nomination of James Lawrence Fly to succeed himself as a member of the Federal Communications Commission.

TRANSFER APPROVED

FCC this week granted the application of the Buffalo Evening News to transfer station WEBR, Buffalo, N. Y., to the Buffalo Courier Express. Commissioner Payne did not participate in the opinion.

The Commission's memorandum opinion in this case was as follows:

This is an application for Commission consent to the voluntary transfer of control of WEBR, Inc., licensee of Station WEBR, Buffalo, New York, from Edward H. Butler and Marjorie Mitchell Baird, individually, and Edward H. Butler, as trustee under the last will and testament of Edward H. Butler, deceased, doing business as Buffalo Evening News, to Paul E. Fitzpatrick and Buffalo Courier-Express, Inc. In effect, the proposal is to transfer control of WEBR from the present stockholders, who now control two (WEBR and WBEN) of the five broadcast stations, and one of the two daily newspapers in Buffalo, New York, to the remaining daily newspaper which now has no broadcast station interests.

On March 20, 1941 the Commission adopted Order No 79 directing an investigation "to determine what statement of policy or rules, if any, should be issued concerning applications for high frequency broadcast stations (FM) with which are associated persons also associated with the publication of one or more newspapers, and that such investigation also include consideration of statement of policy or rules, if any, which should be issued concerning future acquisition of standard broadcast stations by newspapers." On April 26, 1941, the Commission announced its policy of placing in its pending files all applications by newspaper interests for new standard broadcast stations as well as applications for transfer of control of existing standard broadcast facilities to newspaper interests, pending determination of the general question of newspaper control of broadcast facilities.

The Commission in recent years has followed the policy of not creating, by the grant of applications, any situation where the same interest would control more than one standard broadcast station in the same primary service area.

While the instant proposal involves the acquisition of control of a broadcast station by newspaper interests, there are factors which impel the Commission to give consideration to other points involved in the proposal. The licensee is presently controlled by a newspaper, the Buffalo Evening News. The granting of the application would eliminate multiple ownership by the News over broadcast facilities in the Buffalo area and would alleviate the concentration of control by the News over facilities for public expression and the moulding of public opinion in the community. It would, at the same time, make for a better balance of competition between the two Buffalo newspaper interests. The advantages to be attained through the proposed transfer lead us to the conclusion that public interest will be served through the granting of this application subject, however, to the express condition that this action is without prejudice to the application to the licensee of any report, policy, rule or regulation which may result from the proceedings under Order No. 79.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, July 6. They are subject to change.

Monday, July 6

Further Hearing

NEW—Beauford H. Jester, individually and as Trustee for W. W. Callan, Dewitt T. Hicks, Hilton W. Howell, Wilford W. Naman, Robert G. Levy, Ross M. Sams and Davis Stribling, Waco, Texas.—C. P., **1230 kc.,** 250 watts, unlimited.

Tuesday, July 7

WIBC—Indiana Broadcasting Corp., Indianapolis, Ind.—C. P., **1070 kc.,** 5 KW night, 10 KW day, unlimited, DA-night.

Wednesday, July 8

Oral Argument Before the Commission

Report No. B-151:
WSAM—Saginaw Broadcasting Co., Saginaw, Mich.—Modification of license, **1400 kc.,** 250 watts, unlimited.

Wednesday, July 8

KALB—Alexandria Broadcasting Co., Inc., Alexandria, La.—C. P., **580 kc.,** 1 KW, DA-night, unlimited.

NEW—Mosby's Inc., Anaconda, Mont.—C. P., **1230 kc.,** 250 watts, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WBAL—The WBAL Broadcasting Co., Baltimore, Md.—Granted special service authorization for changes in directional antenna to relax minima in direction of KTHS, Hot Springs, Ark., to 65 mv./m. (B1-SSA-37).

KMYC—Marysville-Yuba City Broadcasters, Inc., Marysville, Cal.—Granted construction permit (B5-P-3472) to move transmitter and studio location.

WCOS—Carolina Advertising Corp. (Assignor), Carolina Broadcasting Corp. (Assignee), Columbia, S. C.—Granted consent to assignment of license for station WCOS from Carolina Advertising Corp. to Carolina Broadcasting Corp., for a total consideration of $72,000.

WLIB—Arthur Faske, Assignor, WLIB, Inc., Assignee, Brooklyn, N. Y.—Granted consent to assignment of license and construction permit for station WLIB (formerly WCNW), from the present individual licensee, Arthur Faske, to a newly organized corporation, WLIB, Inc. (B1-APL-14).

Philco Radio and Television Corp., Philadelphia, Pa.—Granted construction permit (B2-PVB-89) for an experimental relay television broadcast station to be located between Wyndmoor, Pa., and New York City, and to be used for relaying television programs originated by the NBC station WNBT in New York to applicant's main television broadcast station WPTZ, for rebroadcasting. Channels 13 and 14 (230,000-242,000), 15 watts.

Mosby's, Inc., Anaconda, Mont.—Granted motion to dismiss without prejudice application for construction permit (B5-P-2694) for new station.

WCHV—Community Broadcasting Corp., Charlottesville, Va.—Granted request for dismissal of application for modification of construction permit for extension of commencement and completion dates (B2-MP-1489).

WHAL—Harold F. Gross & Edmund C. Shields, Saginaw, Mich.—Granted request for dismissal of application for modification of construction permit (B2-MB-1541), for extension of commencement and completion dates.

WPTZ—Philco Radio and Television Corp., Philadelphia, Pa.—Granted modification (B2-MPCT-15) of construction permit (B2-PCT-4) authorizing new commercial television station, for move of transmitter, make changes in antenna system, increase ESR to 1000, and for extension of completion date.

Philco Radio and Television Corp., Philadelphia, Pa.—Granted construction permit (B2-PVB-90) for new experimental television relay station; Channels 13 and 14, **230,000-242,000 kc.,** power 15 watts.

W2XGI—General Electric Co., Schenectady, N. Y.—Granted authority to cancel the outstanding construction permit (B1-PVB-91) of experimental television relay broadcast station W2XGI, and to delete the call letters.

DESIGNATED FOR HEARING

WDAE—Tampa Times Co., Tampa, Fla.—Designated for hearing application for construction permit (B3-P-3487) to change frequency to **770 kc.,** and make changes in directional antenna for night use only.

MISCELLANEOUS

WHDH—Matheson Radio Co., Inc., Boston, Mass.—Granted license (B1-L-1638) to cover construction permit (B1-P-2201) for new equipment, directional antenna, increase in power and change in hours of operation; also authority to determine operating power by direct measurement of antenna power. (B1-Z-01372.)

WHDH—Matheson Radio Co., Inc., Boston, Mass.—Granted license (B1-L-1655) to use old Western Electric main transmitter as auxiliary transmitter, with power of 1 KW, for emergency use only. Also granted authority to determine operating power by direct measurement of antenna power for auxiliary transmitter. (B1-Z-1404.)

WGBR—Eastern Carolina Broadcasting Co., Goldsboro, N. C.—Granted license (B3-L-1670) to cover construction permit (B3-P-3488, which authorized rebuilding of station destroyed by fire, and move studio); also authority to determine operating power by direct measurement of antenna power. (B3-Z-1409.)

WELL—Federated Publications, Inc., Battle Creek, Mich.—Granted authority to determine operating power by direct measurement of antenna power. (B2-Z-1403.)

KSJB—Jamestown Broadcasting Co., Inc., Jamestown, N. Dak.—Granted authority to determine operating power by direct measurement of antenna power. (B4-Z-1412.)

WREN—The WREN Broadcasting Co., Lawrence, Kans.—Granted authority to determine operating power by direct measurement of antenna power. (B4-Z-1408.)

KWHB—Topeka Broadcasting Association, Inc., Portable-Mobile, Area of Topeka, Kans.—Granted license (B4-LRE-410) to cover construction permit (B4-PRE-408) which authorized changes in equipment and increase in power to 15 watts in relay broadcast station used with applicant's standard station WIBW.

KSEE—Earle C. Anthony, Inc., Los Angeles, Calif.—Cancelled outstanding construction permit, File No. B5-MPCT-5, for commercial television broadcast station KSEE, and deleted the call letters.

WSAM—Saginaw Broadcasting Co., Saginaw, Mich.—Schedules for oral argument on July 8, 1942, in re application for modification of license. (Docket No. 6127.)

W3XAU—WCAU Broadcasting Co., Philadelphia, Pa.—Denied application (B2-MPVB-79) for extension of completion date for experimental television broadcast station to September 28, 1942.

WDAE—Tampa Times Company, Tampa, Fla.—Denied Special Service Authorization to operate on **770 kc.,** unlimited time, with directional antenna night. (B3-SSA-35.)

APPLICATIONS FILED AT FCC

560 Kilocycles

WIS—Surety Life Insurance Co., Columbia, S. Car.—Modification of construction permit (B3-P-2870 which authorized changes in directional antenna for night use and increase in night power) for extension of completion date from 6-25-42 to 9-25-42.

710 Kilocycles

KMPC—KMPC, The Station of the Stars, Inc.—Modification of construction permit (B5-P-2804) as modified, for move of transmitter, increase in power, new transmitter, directional antenna day and night, requesting extension completion date from 7-2 to 8-2-42.

790 Kilocycles

WGRC—North Side Broadcasting Corp., New Albany, Ind.—Construction permit to change frequency from **1080** to **790 kc.,** power from 250 watts to 1 KW night, 5 KW day, install new directional antenna and change type of transmitter and move transmitter. Amended: to change power to 1 KW day and night, change type of transmitter and employing directional antenna day and night.

910 Kilocycles

WRNL—Richmond Radio Corp., Richmond, Va.—Construction permit to make changes in directional antenna for night use.

980 Kilocycles

WSIX—WSIX, Inc., Nashville, Tenn.—License to cover construction permit (B3-P-3053) as modified to install new transmitter, directional antenna for night use, increase power, change frequency and move transmitter.

WSIX—WSIX, Inc., Nashville, Tenn.—Authority to determine operating power by direct method.

1300 Kilocycles

KGLO—Mason City Globe Gazette Co., Mason City, Iowa—Modification of construction permit (B4-P-3269 which authorized changes in directional antenna, install new transmitter and increase in power) for change in type of transmitter and extension of commencement and completion dates.

1340 Kilocycles

WEBR—WEBR, Incorporated, Buffalo, N. Y.—Construction permit for booster station to be operated on **1340 kc.,** 100 watts, night time only.

1360 Kilocycles

WSAI—The Crosley Corp., Cincinnati, Ohio—Modification of construction permit (B2-MP-1247 which authorized increase in power, installation of directional antenna for night use and move transmitter) for extension of completion date from 7-26-42 to 1-27-43.

WSAI—The Crosley Corp., Cincinnati, Ohio—Modification of construction permit (B2-MP-1247 which authorized construction of 100 watt amplifier for daytime use) for extension of completion date from 7-26-42 to 1-27-43.

1400 Kilocycles

KFVS—Oscar C. Hirsch, treas., Hirsch Battery & Radio Co., Cape Girardeau, Mo.—Construction permit to make changes in equipment.

KRKO—The Everett Broadcasting Co., Inc., Everett, Wash.—Modification of license to change hours from share KEVR to unlimited. Amended: to change name from Lee E. Mudgett and change from application for construction permit B5-P-2027 to one for modified license.

1450 Kilocycles

WOC—The Tri-City Broadcasting Co., Davenport, Iowa—Modification of construction permit (B4-P-2288) as modified, for change in frequency, increase power, move transmitter, install new transmitter and directional antenna for day and night, requesting extension of completion date from 7-19-42 to 9-19-42.

MISCELLANEOUS APPLICATIONS

NEW—Burns Avenue Baptist Church, Detroit, Mich.—Extension of authority to transmit programs from Burns Avenue Baptist Church to Radio Station CKLW, Windsor Ontario, Canada.

W2XEO—Capitol Broadcasting Co., Inc., Schenectady, New York—Construction permit for reinstatement of ST construction permit for new station on **331000 kc.**, 50 watts.

NEW—Frontier Broadcasting Co., Portable-Mobile, area of Cheyenne, Wyo.—Construction permit for new relay broadcast station to be operated on **1646, 2090, 2190, 2830 kc.**, 15 watts, A3 Emission.

NEW—Frontier Broadcasting Co., Portable-Mobile, area of Cheyenne, Wyo.—Construction permit for new relay broadcast station to be operated on **30820, 33740, 35820, 37980 kc.**, 15 watts, A3 Emission.

NEW—National Broadcasting Co., Inc., Portable or Portable-Mobile, area of Los Angeles, Calif.—Construction permit for new relay broadcast station to be operated on **31220, 35620, 37020, 39260 kc.**, 25 watts, A3 Emission. To be used with KPO.

NEW—National Broadcasting Co., Inc., Portable or Portable-Mobile, area of Los Angeles, Calif.—Construction permit for new relay broadcast station to be operated on **1606, 2074, 2102, 2758 kc.**, 75 watts, A1, A2, A3 Emission. To be used with KPO.

NEW—National Broadcasting Co., Inc., near Addison, Ill.—Construction permit for new relay broadcast station to be operated on **1606, 2074, 2102, 2758 kc.**, 1 KW, A1, A2, A3 Emission.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Garment Box Manufacturers Association, New York, whose members are alleged to assemble and sell a substantial part of the national production of garment boxes used by the wholesale and retail garment trade, also seven of its officials, and 24 of its member box companies, are charged with a price-fixing combination and conspiracy, in a complaint. (4777)

National Retail Tea & Coffee Merchants Association, Inc., 1441 Merchandise Mart, Chicago, Oliver J. Corbett, its secretary, two members, and five sellers or distributors of tea, coffee, toilet preparations and household specialities, are charged in a complaint with a combination and conspiracy to restrain trade in the sale of their products. (4776)

Rub-R-Lyfe Co., Seattle, Wash., engaged in the sale of a preparation for the treatment of rubber products, is charged in a complaint with misrepresentation. (4775)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Autogroom Company—Prohibiting misleading and deceptive representations concerning a competitor's product and business, a cease and desist order has been issued against Mathew W. M. Devitt, Roy D. Schlegel, and Robert E. Sargent, trading as Autogroom Co., who have places of business in New York and Washington, D. C., and a plant in Long Island City, N. Y., for the manufacture of an automobile cleaner and polisher designated "Auto-Groom." (3702)

H & H Hat Company—Daniel Hechtman and Steve Moore, trading as H & H Hat Co., 1351 Milwaukee Ave., Chicago, has been ordered to cease and desist from misrepresentations in violation of the Federal Trade Commission and Wool Products Labeling Acts in connection with the sale of women's hats. (4633)

Robert W. Irwin Co., 23 Sumner Ave., Grand Rapids, Mich., household furniture manufacturer, has been ordered to cease and desist from representing that furniture made from a combination of walnut wood and pecan wood is made from walnut, and to cease using the words "Wood: Walnut" or the word "Walnut" to refer to furniture not composed wholly of the wood commonly known as walnut. (4701)

Lasher's Silk Manufacturing Co., Inc., 545 Eighth Ave., New York, has been ordered to cease and desist from misrepresentation in the sale of ribbon seam binding material. The respondent company operates a manufacturing plant in Bethlehem, Pa. (4612)

Montgomery, Ward & Co., Chicago, has been ordered to cease and desist from misrepresentation in the sale of devices for use by women in attempting to reduce body weight. (4447)

Plant Products Co., Inc., 1 Toluca State Drive, North Hollywood, Calif., and its officers, James R. Plant and Sara B. Plant, have been ordered to cease and desist from disseminating any advertisement which represents that the medicinal preparation they sell under the name "Cravex" is a competent or an effective treatment for alcoholism, or that its use will relieve or remove the craving for alcoholic liquors or enable a person addicted to excessive drinking to discontinue the use of alcoholic liquors. (3794)

Sierra Candy Co., Inc., 2203 3d St., San Francisco, has been ordered to cease and desist from selling or distributing candy or other merchandise so packed and assembled that sales of such merchandise are to be made or may be made by means of a game of chance, gift enterprise or lottery scheme and from supplying or placing in the hands of others push and pull cards, punch boards or other lottery devices either with assortments of candy or other merchandise, or separately, which may be used in such distribution, and from selling or otherwise disposing of any merchandise by means of a game of chance, gift enterprise or lottery scheme. (4758)

Supreme Sales Co., and Reliable Premium House, 34 E. 12th St., New York City, has been ordered to cease and desist from the use of lottery methods in the sale of watches, wearing apparel and other merchandise. (3559)

Western Confectioners Association, Inc., San Francisco, its officers, directors and trustees, and 18 of its member manufacturers located in four Western States have been ordered to cease and desist from entering into or carrying out any agreement or combination to establish or maintain uniform or minimum prices for their candy products or uniform discounts to purchasers. (4132)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Doubleday, Doran & Co., Inc., Rockefeller Center, New York City, stipulated to cease certain representations in the sale of books. (3500)

Webster Eisenlohr, Inc., 187 Madison Ave., New York, entered into a stipulation to cease certain representations in the sale of cigars designated "Webster-Eisenlohr Smokers," sold principally in the three Pacific Coast States. (03012)

Food Display Machine Corp., trading as Liberty Burner Co., 620 North Michigan Ave., Chicago, in a stipulation entered into agrees to cease advertising that its product the "Liberty Dortane Gas Burner" is a "gas" burner as gas burners are commonly known, or that the gaseous vapor it produces has been named or recognized as "Dortane" gas. The respondent also agrees to discontinue representing that its burner is free from danger and is a revolutionary invention burning cheap oil in a new way; is cool in its operation and capable of installation by an inexperienced person in 20 minutes or less; and that after installation there is no further service problem. (03015)

Professor V. Greenewald, Rural Route 5, Covington, Ky., has entered into a stipulation to cease using the term "Nature Nervine" or any other name which represents or implies that the drug preparation so designated is a remedy of nature or has beneficial therapeutic effect on the nerves or in the treatment of nervous disorders or conditions. The respondent also agrees to discontinue representing that the product is of any benefit in treating epilepsy, exhaustion, insomnia, stomach troubles and other ailments; that it forms blood, strengthens the nerves, builds the brain or promotes health, and that the preparation possesses any therapeutic value or affords any physiological effects except to the extent it may act as a stomachic and mild carminative. (03014)

Madame Hector Products Company—Etta Hector, trading as Madame Hector Products Co., 1702 Fulton St., Brooklyn, has entered into a stipulation to cease representing that a cosmetic preparation designated as "Madame Hector's Pomado" or the use thereof will increase the growth of hair, prevent the loss of hair or correct the cause of falling hair. (3501)

Keystone Silver, Inc.—Two New York City corporations selling aluminum ware stipulated to cease certain representations in the sale of their products. They are Keystone Silver, Inc., 460 West 34th St., manufacturer of household appliances, and L. Luria & Son, Inc., 160 Fifth Ave., distributor of aluminum ware supplies, including a line manufactured by Keystone Silver, Inc. (3496)

Mi-Dog Food Co., 189 Foster Ave., Battle Creek, Mich., Leo E. Thornton stipulated to cease certain representations in the sale of a dry dog food preparation designated "Mi-Cooked Ready to Feed Dog Ration," also advertised as "Mi-Dog Ration." The respondent agreed to desist from using the terms "meat," "meat scraps" and "meat-cereal food" to describe dehydrated meat meal or any product which is not meat. According to the stipulation, the respondent's preparation consists of several ingredients including dehydrated meat meal, but does not contain meat. (03013)

National Malting Co., 9 Ann St., Paterson, N. J., stipulated that in the sale of its brewer's malt it will cease and desist from giving, or offering to give, sums of money or other things of value to officials or employees of its customers or prospective customers, without the knowledge or consent of such customers, for the purpose of inducing these officials or employees to purchase its brewer's malt for use by their employers or to recommend such purchase by their employers, or as payments to such officials or employees for having induced the purchase or recommended the use of the National Malting Company's product by their employers. (3499)

Norden Laboratories, 227 North 9th St., Lincoln, Nebr., manufacturer of pharmaceuticals, biologics and serums for animal diseases, stipulated to cease certain representations in the sale of "Norden Certified Anti-Hog Cholera Serum." (3496)

Thirteen distributors of shoe polishes or dressings, have entered into stipulations to cease certain representations in the sale of their products

According to the stipulations, the respondent companies advertised that their white shoe dressings "will not rub off" when actually these preparations will rub off to a limited degree under ordinary conditions. Each respondent agreed to cease representing that its dressing will not rub off.

The respondent companies and the products they sell are:

Griffin Manufacturing Co., Inc., 410 Willoughby Ave., Brooklyn, N. Y., "Griffin Allwite" (02999); Dyer-Johnson, Inc., 619 East Vermont Place, Indianapolis, "Johnson's White Leather Wax" (03000); Edison Brothers Stores, Inc., 710 North 12th Blvd., St. Louis, "Klean-M-White" (03001); Gadi Co., Inc., Monroe at Lauderdale, Memphis, Tenn., "Gadi White Way" (03002); Ace Sales Corporation, 74 Gold St., New York, "White Ace" (03003); Manhattan Kreole Products, Inc., 172 North 10th St., Brooklyn, "Milk White" (03004); Consolidated Royal Chemical Corp., 544 South Wells St., Chicago, "Gem White Shoe Cleaner" (03005); Shu-Milk Products Corp., 27 Eighth St., Passaic, N. J., "Snow White Shu-Milk" (03006); Wilbert Products Co., Inc., 805 East 139th St., New York, "Wilbert's No-Rub Shoe White" (03007); Pee-Chee Cleaner, Inc., 869 East 140th St., Cleveland, "Pee-Chee White Shoe Cleaner" (03008); Whittemore Bros. Corp., 68 Albany St., Cambridge, Mass., "Whittemore's Cadet White," "Whittemore's Cadet Shoe Soap," "Whittemore's Bostonian Shoe Soap," and "Whittemore's Bostonian White (liquid and paste)" (03009); James V. Lobell, John J. Lobell, William Hoehn and William Hoehn, Jr., trading as Cavalier Co., Key Highway, Jackson and West St., Baltimore, "Cavalier Domino Shoe White" (03010); and Carbona Products Co., 304 West 26th St., New York, "Carbona Shoe Whitener" (03011). (02999 to 03011)

United Vacuum Cleaner Stores, Inc., 1213 Prospect Ave., Cleveland, operating a number of retail stores in Ohio, stipulated that in the sale of rebuilt vacuum cleaners it will cease and desist from the use of (1) statements such as "new parts throughout" to describe vacuum cleaners in which any of the parts used in the rebuilding are not new; (2) the word "genuine" in connection with the word "Hoover" to imply that all of the replaced parts are of the same make as the corresponding parts utilized in the construction of similar models of vacuum cleaners manufactured by the Hoover Co.; (3) the phrase "Direct from Factory" or any statement of similar meaning which may create the belief that the machines sold by the respondent have been made or rebuilt from Hoover parts in the Hoover Co. factory or that United Vacuum Cleaner Stores, Inc., is a factory representative of the Hoover Co.; and (4) any purported price figure, with or without the picture of an indicated model of vacuum cleaner, to imply that such price is the price of the model pictured or otherwise referred to, unless the designated price actually is the price of the machine advertised. (3495)

Yoghurt Products, Inc., 108 Denny Way, Seattle, Wash., agrees to cease certain representations in the sale of a food product designated "Yoghurt Ferment Capsules" which is intended to be combined with milk to form "Bulgarian Milk." (03016)

Sanders Bill Hearings

CRAVEN TESTIFIES

The testimony of Commissioner T. A. M. Craven of the FCC in support of the Sanders bill, given last week before the House Interstate Commerce Committee, is of such importance as to warrant its publication in full below.

After the commissioner's testimony are excerpts from his examination by various committee members.

My name is T. A. M. Craven. I have been a member of the Federal Communications Commission since 1937. Just prior to that, and for about two years, I was Chief Engineer of the Commission. My professional connection with communications embraces 29 years of continuous service.

I am not a lawyer, and because the bill under discussion deals with some procedural matters, my comments relative to those sections must be of a general rather than a technical legal character.

Moreover, before discussing the bill section by section, I should tell you that I regard the Commission as an agency created by Congress to administer policies established by the Congress. I do not regard the Commission as an agency empowered to promulgate new social-economic policies. We regulate some of the media for the dissemination of facts and opinion. Therefore our actions affect the value to the public of these media for free speech. Hence when the Commission encounters conditions and problems not foreseen at the time the basic legislation was enacted, it seems most desirable that the Commission return to Congress for further instructions. From this standpoint at least, this Committee hearing on H. R. 5497 seems opportune.

In my opinion the Communications Act of 1934 is excellent legislation. It seems to contain balances truly representative of a free democracy. At the same time it is progressive in its application of a modern technical development to the service of the public. However, in view of recent experience, I have admitted reluctantly that some parts of this excellent legislation may require clarification and some revision.

The regulation of radio broadcasting has become one of the most controversial matters before the Commission. Perhaps this is because broadcasting affords the newest and one of the most effective media for the dissemination of facts and opinion. When the availability of transmission facilities is so extremely limited as it is today, numerous problems arise involving the power of the Commission, the rights of licensees and the manner in which radio broadcasting facilities should be utilized in the service of the public. As you know, radio broadcasting licenses must be granted, when applications are made therefor, in accordance with public interest, convenience and necessity. This broad legislative phrase has afforded the opportunity for the wide differences of opinion in the concept of regulation. Now, everyone recognizes that radio broadcasting requires regulation from a technical standpoint in order that radio reception may be cleared of the chaos which might otherwise be caused by interference between the many radio channels and stations thereon. However, many of us believe Congress intended that radio broadcasting be free from unnecessary or arbitrary restraints imposed by the licensing agency. Indeed, I believe this is essential if the public is to have confidence in radio. It seems to me that the conclusion expressed by the President of the United States is wise advice on this subject of radio:

> "But now in our own time, there has come into being another great institution for the general diffusion of knowledge—the radio. Still in its infancy, it already rivals in importance the schools and the press. The government, as the people's agent, has had and has now a still different relation to radio from that toward the school and the press. It has encouraged and aided its development on the one hand, and, on the other, it has set up such controls of its operation as are necessary to prevent complete confusion on the air. In all other respects the radio is as free as the press."

Nevertheless, others believe that the Commission should regulate much more than the technical aspects of broadcasting.

As indicated previously, the fount of many of the problems is the shortage of radio frequencies. Consequently, the number of available facilities is so limited that it is impossible for everyone to be granted a radio license even if he were qualified. In fact, facilities will be so extremely limited that even if we had 100 national networks devoted exclusively to speech-making in 15 minute blocs, the last person of today's population would have to wait 37 years for his or her turn, and then could reach only a small portion of the people then living in the nation. Hence radio cannot be an unlimited medium, even though free from unnecessary Governmental restraint. On the other hand, it is interesting to note that if the facilities were so plentiful that everyone could have a license, radio broadcasting would be useless as a medium for the dissemination of facts and opinion to the nation. Hence, technical progress alone will not solve all the problems in broadcasting.

Thus it is obvious that while Congress has directed that equality of treatment be accorded political candidates and that radio broadcasting facilities be distributed geographically among the several States and communities on a fair, efficient and equitable basis, and while everyone agrees that we should have as many different competing licensees as is practicable, we still have serious problems in the application of radio broadcasting to the service of the public.

The solution of the problems of broadcasting can be influenced by the emphasis placed upon the different regulatory philosophies which may be considered in attaining the objective. For example, if one emphasizes the application of the philosophy of free competition or the philosophy of common carrier regulation, or program regulation in terms of education and culture, we may easily arrive at three different results. On the other hand, if we approach the solution of the problem primarily in terms of the Constitution, while at the same time giving due weight to the competition and quasi public utility aspects, we should secure an excellent solution in terms of general public interest.

I believe that in the consideration of the regulation of broadcasting we must keep paramount in our minds the Bill of Rights, or else we fail to attain the best solution. Other more narrow approaches, regardless of how worthy they may appear, may fail to achieve what I believe to be the objective specified by Congress in the Communications Act of 1934.

Perhaps therefore a good solution of these radio problems can be approached if we recognize that radio broadcasting is a public

SANDERS BILL HEARINGS

(Continued from page 405)

service, not in the sense of common carriers, but nevertheless in some quasi public utility category. This would imply that neither the licensee nor anyone else has rights which are paramount to those of the public. Therefore, whatever rights are conferred in a license are balanced by obligations to serve the public. Nevertheless, after a person has been granted a license to operate a radio broadcasting station, both the licensee and the public should have the right to freedom from unnecessary supervision by the licensing agency. At least licensees and applicants should have the right to a full and fair hearing when their real interests are affected. However, every person should be prevented from exercising control of radio broadcasting in such a manner that he serves private purposes rather than public interest, or in such a manner that anyone controls an excessive number of the limited available transmission facilities. Thus licenses should be distributed among the several States and communities and to persons on a fair and equitable basis.

The Communications Act of 1934 seems to provide for the regulation of broadcasting in accord with the foregoing philosophies. However, in view of recent controversies it would seem desirable that Congress specify more clearly to what extent and in what manner it desires the Commission to regulate broadcasting. If Congress desires the Commission to regulate the business practices of licensees, it should so state. If Congress desires this Commission not to regulate business practices of licensees, it should likewise specify clearly that the Commission has no such power. Likewise it seems desirable that Congress specify whether, before judgment has been rendered in Courts or other competent agencies, the Commission has power to take into consideration alleged violations of laws, other than the Communications Act, which affect the conduct of the licensees. Personally I believe that where alleged violations of laws other than the Communications Act are involved, the *record* of convictions in other jurisdictions should then, and then only, be utilized as evidence of inability to operate a radio station in the public interest; and that in the consideration of license renewals, the Commission should not be permitted to pass prior judgment on the facts in such cases and, before adjudication of guilt by the Courts, punish the licensee by refusing to renew his license. In fact, I believe that trial in proper courts for violation of certain penal sections of the Communications Act itself should antedate Commission revocation or renewal proceedings instituted for the purpose of imposing sanctions for the same violations.

There is pressure on the Commission to require licensees to make their facilities available on a fair basis to the varying schools of social and economic thought, as well as for other controversial questions of a national character. While the limitation in the number of radio channels exists, a necessary corollary of freedom of speech in radio, it seems to me, is fairness to opposing schools of thought and refraining on the part of licensees to abuse power by making stations solely the mouthpiece of their own viewpoints. Congress has already recognized these in part by requiring licensees to afford equal opportunities to political candidates. Licensees ought to carry out this same principle as to all discussions of controversial questions. I do not mean that they should necessarily devote any particular hours or proportion of hours to such discussions, but that if they do, they be fair.

The law does not require this at present, since Congress stopped at the point of applying this principle only to political candidates. The Commission, in my opinion, has no power to go further and attempt to enforce what Congress decided not to do. Furthermore, from my own observations and experience, I do not believe that any amendment of the law is necessary since, so far as I know, licensees generally have conformed to this principle voluntarily and have been fair, with exceptions too rare to be noticed. If, however, a real evil developed, I should favor an appropriate amendment of the law. I hope this will not prove necessary, since it entails a difficult and delicate problem of government regulation in determining to what questions the requirement applies; what is the test of fairness, and a constant danger that the power would be used for purposes of censorship.

I do not, however, agree with the so-called "quantitative" theory, wherein the Commission would require that a given hour, or a given proportion of a broadcast station's hours of operation, be devoted to programs of a prescribed type, such as "informative". To me, such a theory is a paradox because the Commission would be prescribing a type of program for a part of the time. If prescribing a type of program for all the hours is considered by almost everyone to constitute censorship, then the prescribing for only a few hours would likewise constitute censorship.

Coming now to the consideration of the provisions of H. R. 5497 and to the specific proposals made by the National Association of Broadcasters, I would like to divide my discussion into three parts, namely, (1) administration and organization; (2) procedure; and (3) policy.

Administration and Organization

Section 2 merely projects the bi-partisan requirements of the present law forward into the divisions proposed by Section 3. This policy has become so well established in the acts creating this and other similar agencies as to be also axiomatic. Nevertheless, it is interesting to note that under present circumstances and with the Commission limited to seven members, we would have two Democrats and one Republican on one division and two Republicans and one Democrat on the other. However, if the divisions are not to issue regulations or formulate general policies, such matters being left to the entire Commission, I cannot see that this arrangement has any particular political significance.

Dealing now with the question of the Commission's organization, I believe that that organization should be such as to provide for an efficient coordination of policy, a proper separation of the legislative, judicial and administrative functions, and a proper division of work as well as the delegation of details to subordinates. In recent years the Commission has operated under a plan of organization which, in my opinion, is basically unsound. In addition to making possible, and in fact requiring, an undesirable combination of the legislative, judicial and administrative functions, it is unwieldy and cumbersome. The result has been that too many matters which should have received careful attion have received too little attention or none at all. It therefore seems desirable to me that the Act be both specific and compulsory with respect to a division of the Commission and its major functions.

The administrative and judicial work of the Commission can be divided along natural lines, namely: (1) Broadcasting—this includes television, high frequency, domestic and international broadcasting; (2) common carriers—this includes domestic land lines and radio as well as international radio and cable; and (3) radio services involved in safety of life at sea and in the air, the preservation of property, regular radio operations aboard ship and aircraft as well as emergency and auxiliary uses of radio, amateur radio, and the licensing of all radio operators.

The broadcasting, the common carrier, and what I will choose to call the mobile and safety services, present very different regulatory problems. As an example, in the regulation of other common carriers by such bodies as the Interstate Commerce Commission, many helpful analogies have been established which we can and do use in the telephone and telegraph field. On the other hand, in the regulation of broadcasting and in the mobile and safety services there are no comparable analogies and the application of principles employed in other fields may be not only misleading but productive of unsound results. Without going into detail, I think it fair to say that the experience of the Commission to date has amply demonstrated not only the dissimilarity of the problems presented in these several fields, but the danger of attempting to deal with them in the same fashion and with the same personnel.

Moreover, many persons fail to appreciate the importance of the coordination of policy applicable to the various phases of communications under the jurisdiction of the Commission. In the past when the Commission utilized divisions to perform certain of its functions, the effect of lack of coordination was quite apparent. For example, the telegraph division had one interpretation relative to the extension of lines, while the telephone division had another. The consideration of telephone rates applying to broadcasting was conceived in different terms by the broadcast division than by the telephone division, the former thinking in terms of cheaper broadcast service, while the latter thought in terms of discrimination against other users.

Likewise, the question of the relative importance of the various kinds of radio communication from the standpoint of the allocation of frequencies was not coordinated effectively. The important matter of an international communication policy conforming to the best economic interests of this nation in the international field was never discussed adequately. The Commission was too engrossed in the details of broadcasting applications and regulating the business and program service of broadcasting and the investigation of the Telephone Company to consider the broad problem of communications as such. These are but a few examples of the importance of and the need for coordination between various divisions of the Commission as well as the need for the formulation of national communication policies within the framework of legislation enacted by the Congress.

I believe that the entire Commission should formulate all policies within the framework of the Act and to this end should be authorized and required to promulgate all rules and regulations of general application which apply to the work of the Commission and of the divisions thereof. I further believe that the entire Commission should pass upon all recommendations to Congress for any legislation; that it should make the final determination in all matters involving the overlapping of policies or a conflict of jurisdiction between the divisions; and that with respect to certain subjects, such as those involving safety of life at sea and other emergency services, it should make such judicial determinations as may be required. With respect to other functions of the Commission, it seems to me a different solution is required.

In the field of broadcasting and in the common carrier field, after general policies have been established, rights are largely dependent upon facts. The principal question to be determined in any given case is whether or not a particular applicant or party has or will comply with the Communications Act and with the regulations of the Commission. It is necessary here that evidence be carefully taken and weighed, and that the result reached should be in accordance with the showing made. I am satisfied that in view of the number and variety of questions presented, the entire Commission cannot perform these duties either as promptly or as efficiently as can be done by divisions directly charged with this responsibility.

Both as to those matters which are within the jurisdiction of the entire Commission and as to those matters which I believe should be placed within the jurisdiction of divisions, many details can and should be delegated to individual Commissioners and to subordinate officials of the Commission with ultimate approval or disapproval resting in the Commission or the appropriate division. Many administrative determinations must be made which are of a non-controversial character; it is both unnecessary and unwise to occupy the time of the entire Commission or of a division with details of this sort. The necessity for delegation of such duties was recognized both before and after the abolition of the division plan of operation, and the opportunity for such delegation should be continued in effect in any revision of the Act.

Section 3 of H. R. 5497 appears to embrace the principles of organization I have outlined above. It also provides that the chairman of the Commission shall be left free for the performance of certain executive duties, for the coordination of the work of the Commission and of the divisions thereof, for participation in the formulation of policies which are reflected in rules and regulations, and for the handling of all matters relating to legislation and legislative reports. Such an arrangement becomes a practical necessity as the scope of the Commission's activities increases. I believe this would contribute toward a proper relationship between the Commission and the Congress and would aid materially in the formulation and coordination of communication policies.

Procedure

While, as I have heretofore stated, I do not feel qualified to deal with procedural matters in detail, I do have certain rather definite convictions concerning these matters. I feel that the existing adjudicative processes of the Commission have not been entirely satisfactory. In some instances it seems to me that a full and fair hearing has not been given to all parties who have or may have a legitimate interest in the subject matter dealt with. Likewise, our manner in arriving at determinations of a judicial nature seems, at least in some instances, to be at variance with recognized concepts of proper administrative practice and fair play. Clarification in the law itself with respect to all of these matters would be tremendously helpful, not only to parties having business before the Commission but to the Commission itself.

It seems to me that the procedure to be employed by the Commission should be fair, just, simple and efficient, and can be such as to protect both the rights of the public and of individual litigants. Radio service or lack of it in any locality is, of course, a matter of public interest. But we must recognize that applicants and licensees have certain rights, particularly the right to a full hearing on matters and issues which involve their status or ability to initiate or maintain a service. While litigation can be supertechncal with the result that the public may be deprived of the opportunity to secure a needed service, attempts to safeguard public interest by expediting procedural matters cannot be carried to the point of entirely abolishing private rights. It should be possible to secure an orderly procedure which balances the various factors and assures prompt justice to all as well as safeguarding the paramount interests of the public in communication matters.

If broadcasting is to be regarded as a legitimate private enterprise, then I believe no licensee of the Commission should be restricted in his operations without first being accorded a full hearing. It makes no difference that his business may be affected with a great public interest, or that in a final decision benefits to the public necessitate the curtailment of his private rights. Every decision involves a weighing of private as well as of public interests, and every applicant or licensee should be given a chance to show how his private interests compare with the private interests of other applicants and how all are affected by the public interest. Consequently, I believe that the procedural scheme proposed in Section 5 of H. R. 5497 is a step in the right direction.

I have no suggestions to offer concerning Section 8 of the bill which deals with judicial review of the Commission's decisions and orders. As I understand the proposals advanced in this section, judicial review would be both extended and facilitated. As a general matter, I am in agreement with both of these objectives, but I must express my conviction that judicial review, while most helpful, cannot be regarded as an adequate substitute for efficient administration by competent and reasonable Commissioners. I am concerned at times over the long delays involved in litigation and the effect of such delays upon matters pending at the Commission. I realize, however, that this is primarily a problem for the Courts.

Section 9 of the bill deals with rehearings before the Commission and the divisions thereof. Most Commission decisions, particularly with respect to broadcasting, rely not upon past facts but upon future probabilities. Where the basis of a decision is thus speculative at best, I believe that some method should be provided whereby it is possible to secure a re-examination of the results. Furthermore, some method should be furnished whereby the issues and the parties shall be held in status quo while this re-examination is being made. As I understand this section, it will accomplish this purpose.

Sections 4 and 10 of the bill may have imperfections, but if so, my lay mind does not perceive them. All of these proposals of the F. C. C. Bar Association contained in Sections 1 through 6 and 8 through 10 of H. R. 5497 appear to me to constitute a step in the right direction. In any event, I am confident that this Committee is perfectly capable of drafting suitable legislation after hearing all the evidence bearing on the advantages and disadvantages of the Commission's existing procedure.

The proposals of the National Association of Broadcasters also appear to me to have merit. I am particularly interested in the proposal with respect to declaratory rulings. Our recent experiences with the chain broadcasting regulations might have been avoided if we had been able to render a declaratory ruling and had that ruling appealed to the courts before sanctions became operative. I was and still am particularly interested in having the question of the Commission's power determined prior to changing the entire basis of the business structure of broadcasting. In this and many other instances I think the rendition of declaratory rulings would serve a useful purpose.

The second and third proposals of the N. A. B. are also, in my judgment, worthy of serious consideration. The proposal relating to unauthorized penalties and sanctions would require the Commission to interpret the statute literally in imposing penalties or sanctions, to enforce the terms of the statute fairly, and that when imposing sanctions or penalties such action be taken with due appreciation of the consequences. I think extreme care should be exercised to avoid confusion between the legitimate exercise of the Commission's licensing power and a desire which the Commission might have to impose its will upon licensees by the use of the licensing power. The third proposal made by the N. A. B. would do no more than place in statutory form the law as already stated by the Supreme Court in the *Sanders Case*. While this action may be viewed by some as unnecessary, I think that our recent experiences indicate that it is both desirable and necessary to have a clear expression of the Commission's jurisdiction placed in the statute itself.

Section 6 of the bill deals both with a matter of procedure and one of policy. In so far as this section deals with procedure, it would make the procedure applicable to other applications also applicable to transfer applications. I see no possible objection to this course of action, but on the contrary feel that it has merit. After all, it is the Commission's duty to find proper and qualified licensees for the stations which it authorizes, and I see no reason why the steps taken in the case of an applicant for an original instrument of authorization should not apply to the process of finding a new holder for an existing instrument. On the question of policy involved in this section, much could be written and said, but it will suffice here to say that the present Act requires clarification.

It has always been my understanding of the present law that the Commission cannot confer, nor can a licensee receive, any property rights in a radio frequency as against the regulatory power of the United States. If that is so, I do not understand how a transferee can acquire any greater right than was held by the person to whom the construction permit or license was originally issued. This section of the bill seems to have been drafted on the theory that the Commission should concern itself primarily with the qualifications of the transferee to render service in the public interest and not with the consideration paid for the physical plant or business. Under this section, as I interpret it, the Commission would not be expected to concern itself with the price paid by the transferee for any station except in so far as that price might disqualify him to operate it in the public interest. If the price he pays is exhorbitant and the public interest later requires that his station be restricted or his license terminated, these are risks which he assumed. Though these risks may be greater in degree they are not different in kind from those that face every other licensee of the Commission and should receive only the same attention by the Commission.

If the Congress desires some standard other than the one I have outlined, now is an excellent opportunity to clarify the situation.

Policy

Section 7 of the bill would require the Commission to study and report to the Congress at some future date its conclusions and recommendations upon a variety of subjects. All subjects here enumerated involve problems which are currently before the Commission in some form or other, and with respect to each I believe that the ultimate determination should rest with the Congress. I, therefore, agree that either now or later the Commission should make a report and recommendations upon these subjects and request directions from the legislative body concerning their final disposition.

I further believe that since the Commission has already made rather extensive investigations concerning each of the subjects specified it now has the material on hand upon which to base its conclusions and recommendations. I now have certain views concerning each of these subjects which I will submit if the Committee is interested in having them placed in the record at this time. If not, I will conclude my remarks here.

1. The first question proposed by Section 7 is "Whether and upon what terms and conditions Congress shall by statute confer upon the Commission the power to regulate the contractual or other relations between the licensees of radio broadcast stations and networks or other organizations which supply program material to such licensees". For a variety of reasons I believe that this question should be answered in the negative.

As has already been demonstrated, a network is only an aggregation of individual stations joined together by contractual arrangement for the simultaneous rendition of particular programs. Congress has not seen fit, and wisely I believe, to confer upon the Commission the power to regulate the business practices or business policies of individual stations. I can see no greater reason why such power should be conferred when stations are considered in the aggregate as networks. The necessary result of such action would be to confer upon the Commission the power to impose its will upon all licensees with respect to all business practices growing out of the network relationship. Quite aside from the elements of censorship which are necessarily involved when the source of program material may be regulated, I can see no need for this action. On the contrary, I can see much harm that might result therefrom.

As a result of the extensive investigation which the Commission has already made of this subject, it has been demonstrated to my satisfaction, first, that networks as we now know them are essential to our system of broadcasting, and, secondly, that in the main such networks operate efficiently and well. There are, of course, certain imperfections in the structure and certain practices which if continued or extended may have an adverse effect upon the quantity and quality of radio service available to the public. But it is my view that if legislation on this subject is considered necessary, Congress itself should outlaw certain specific practices considered harmful or reprehensible, and that within the limitations thus established the parties be permitted to work out their own economic destiny without interference by the Commission.

I believe that the solution of the problem of network broadcasting rests in permitting the greatest freedom of action both from an economic and from a program standpoint in so far as is consistent with provisions of general law. However, in order to meet the views of those who desire to impose specific limitations, I can agree that it may be helpful for Congress to enact certain provisions which will serve as guideposts to the industry, but which do not directly or indirectly control its economic or program development.

The maximum for which I believe justification can now be found would be the enactment of provisions of law which would prohibit the licensee of any broadcast station from entering into any contract or other arrangement with a network organization containing any or all of the following five restraints upon the ability of a licensee to exercise his responsibility: (1) where the station is prevented from broadcasting public service programs of any other network organization, (a public service program could be defined as any program broadcast under the provisions of Section 315 of the Act by candidates for public office; all programs broadcast by any public officer or on behalf of any government either local, State, or national; and all sustaining programs broadcast upon behalf of any religious, charitable, scientific, literary, educational, patriotic, or fraternal organization); (2) which prevents the station from rejecting or refusing network programs which the station reasonably believes to be unsatisfactory, unsuitable, or contrary to the public interest, or from substituting therefor a program of outstanding local or national importance; (3) which prevents another station serving a substantially different area from broadcasting any network program or programs; (4) which provides by original term, provisions for renewal or otherwise that the station will broadcast the programs of the network organization for a period longer than three years; or (5) which gives the network organization an option upon periods of the station's time which are unspecified, or which can be exercised upon notice to the station within less than a reasonable time, such as 28 days.

With these safeguards imposed by the law itself, I believe that the present good aspects of network service can be maintained or improved, that the bargaining position of both the network and the station will be preserved, that licensees will be free to exercise their responsibilities to the public, that the excellent public service facilities of radio will be improved, and that the over-all result will be far superior to the adoption of any plan whereby both networks and licensees are subjected to the ever-changing economic views and philosophies of an everchanging licensing agency,

2. The second question proposed by Section 7 is "Whether and upon what terms and conditions the Congress shall provide by statute for the licensing of networks." I definitely believe that this question should be answered in the negative.

In my opinion the licensing of networks would inevitably limit rather than encourage competition between networks. Progress today in the network field has stemmed in a large part from public demand and a natural but not enforced competition. The organization of program production and distribution system should remain free and untrammeled except by physical and economic factors and by public demand.

The most important reason for not requiring networks to be licensed is that they are in the last analysis program production and sale agencies. If such agencies are required to apply to the Commission for a license, the Commission will inevitably become both their economic mentor and the judge of the propriety of their program material. This is censorship in its worst form, and it is difficult to see where such action would end if once commenced.

3. The third question proposed by Section 7 is "Whether and on what terms the Congress shall by statute redefine and fix the qualifications of the licensee of any radio station which is intended to and does communicate with the public".

As the law is now written, no distinction is made between the qualifications of licensees for various classes of stations which the Commission may license. Except for aliens and representatives of alien governments prescribed by Section 310(a), and except for those adjudged guilty by the courts of violating the anti-trust laws as provided by Sections 311 and 313 of the Act, the Commission is required by Section 307(a) to "grant to any applicant therefor a station license provided for by this Act" if the statutory standard will be served by such action.

I agree that there are differences between public and private communications and the stations engaged in such communications. I believe that the Congress might be justified in providing special or different qualifications for the licensees of those stations which engaged in public as distinguished from private communications. However, I do not believe that any such classification should be predicated upon the occupation or other business interests of the owner of such station as has been suggested in the newspaper field. I consider such action both unnecessary and dangerous.

I recognize that an important problem of public policy concerns diversification in the operation of the various media for the dissemination of facts and opinion. Of course, diversification of control of these media is desirable. On the other hand, whether this objective should be obtained by legislation which discriminates against one class of persons or which prevents anyone from owning stock in an organization operating a particular kind of medium for free speech, raises questions in a free democracy almost as serious as monopolistic control of the media for the dissemination of facts and opinions.

Another problem is an economic one, particularly in small communities where radio competition with the newspapers may spell disaster to the latter. It is difficult to understand why combinations between the two should be prohibited, if such prohibition should result in poorer radio service and perhaps in destruction of either or both the newspaper and the radio service. Under such circumstances absolutely nothing would be accomplished except destruction of service to the people. In so far as I can ascertain, there is no evidence that newspaper owned radio stations have been operated as such contrary to public interest. In fact, they seem to operate very much like any other good radio station.

However, if the Congress is to redefine and fix the qualifications of the licensee of any radio station which is intended to and does communicate with the public, I would suggest that it do so by providing that on and after a date to be fixed no license shall be granted for such a station except to a corporation whose charter and by-laws shall provide that the business of the corporation is limited to the business of broadcasting or chain broadcasting, together with such other business as may be incidental thereto. My reasons for this suggestion are not those advanced by the ones who advocate separation of the ownership of newspapers and radio stations; in fact, my reasons are not ones of ownership at all, but ones of convenience and the clarification of the status of certain existing licensees.

Radio broadcasting, unlike most other industries, grew up in a large part as an adjunct of other businesses. Electrical manufacturing companies, newspapers, insurance companies, department stores, and others furnished the pioneer money for the establishment of many of our existing stations. They did so at a time when the ownership and operation of a station involved a considerable capital outlay and no revenue was in sight. As a result, even after broadcasting came to stand upon its own feet, we find it merged and sometimes confused with other businesses. Many organizations when confronted with this situation have formed subsidiary corporations for the conduct of the broadcasting business, others have not. Under my suggestion all would be required to do so.

Such action if taken would not deprive the present owners of their property in existing stations; nor would it prevent them from exercising an adequate and proper measure of control in the operation of such properties. It would, however, segregate the business of broadcasting from other and unrelated businesses, and to this end would facilitate both the work of the Commission and the duties of the licensees in making reports and supplying other information to the Commission. Moreover, it would end all confusion and speculation in any given case as to whether another business was supporting a broadcast station or whether the broadcast station was supporting another business. It would also disclose through the books and records of the subsidiary company formed to operate the broadcasting business of any use which the other and unrelated business had made of the broadcast station for the purpose of advertising such other business.

It goes without saying that if such a provision is enacted into law, it should be accompanied by a further provision which would direct the Commission to take such steps as are necessary to expedite the transfer of all outstanding construction permits and licenses for stations of this class to corporations which are qualified to hold the same. These corporations would of course be organized by and subject to the control of the present owners of the station properties. If further limitation of control is desired, the legislation could provide that the charter and by-laws of such radio corporations should prohibit interlocking directorates and duplication of officials in much the same manner as is done in public utility legislation.

4. The fourth question proposed by Section 7 of the bill is "Whether and upon what terms and conditions the Congress shall by statute limit the number of services which may be conducted by any network organization and the number of stations of any class which may be licensed to any network organization". As I understand this, it really propounds two inquiries; the first having to do with the number of services such as standard broadcasting, television, etc., which may be conducted by any network organization; the second having to do with the number of stations engaged in rendering any particular class of service which any particular network may own or operate.

On the first of these inquiries, I do not believe that any limitation should be placed by the Congress or otherwise upon the number of broadcasting services which a network organization may conduct. As new services such as television, frequency modulation and facsimile are opened up, first for experimental work and later on a regular basis, we find that those who are best equipped technically and who are most willing to make the substantial investments required are those who have been engaged in similar types of public communication. To date the development of both television and FM communications has been due almost entirely to those persons and organizations who are now engaged in the operation of standard broadcast stations. While there are differences between standard broadcasting and these newer types of public communication, to a very definite degree the same principles are applicable to all. I feel that any limitation imposed by statute which would prevent those now engaged in standard broadcasting from entering into and developing the newer forms of public communications would be most unfortunate.

With reference to the second of these inquiries, namely, the number of stations of any class which may be licensed to any network organization, much can be said. I think it will suffice here to say that most if not all, persons who have had an opportunity to study this problem will agree that network organizations should be permitted to own stations in those cities and at those points where the ownership of stations is necessary for program origination and for proper network operation. The hitch comes in an attempt to fix those points. Difficulties also present themselves because during the pioneering or developmental stage it may be necessary for a network to own stations at points where later and as the service has progressed such ownership may appear to be unnecessary or even undesirable. It seems harsh to force one who has secured and developed a property during the formative period to relinquish it at a later date when it has become profitable and is sought after by others who did not engage in this developmental work. Such a result should be avoided if possible.

Whatever the determination of the Congress is on either or both of the inquiries propounded by this provision of the bill, I firmly believe that the Congress and not the Commission should impose any limitations which are found to be necessary. In other words, I believe that if the Congress finds it necessary to limit either the number of radio services which a network organization may conduct or the number of stations in any class which it may own that such limitations should be placed in the Act itself and not left to the determination of the Commission. Moreover, if the Congress believes that no limitation should be imposed upon either and that the Commission should determine these questions as they naturally arise in the exercise of its licensing power, it should find some method of stating its views in the statute itself.

If one of these courses is not followed, there will be a constant temptation for the Commission to assert its rule-making power to achieve what it considers to be a desirable result. This has already been done in the FM and television field, and has been attempted in the standard broadcast field. The adoption of the second proposal advanced by the National Association of Broadcasters would probably constitute sufficient notice to the Commission that it was not to attempt limitations not authorized by Congress.

5. The fifth proposal made by Section 7 of the bill would require the Commission to report to the Congress as of a date to be specified concerning "the standards and principles adopted by it to effectuate the mandate contained in Section 307(b) of the Communications Act of 1934, as amended, which requires the Commission to make and maintain a fair, efficient and equitable distribution of radio facilities among the several States and communities together with its recommendations, if any, for future legislation on the subject".

Thus, the proposed bill suggests correctly that the distribution of radio broadcasting facilities remains a problem. This will always be a problem, regardless of technical progress. The more we learn about the usefulness of radio, the more we demand. Hence there is always a race between supply and demand, with the latter far out in front. New developments are on the horizon; what specific problems they will present is difficult to foresee. Therefore, any new legislation should be in broad terms and sufficiently flexible to meet the variable conditions of technical progress.

It should be obvious that radio broadcasting has become a real service to the people of the nation. It has been demonstrated beyond any doubt that the people of America desire the continuation of this service together with such improvements as can be secured.

Therefore, it is unthinkable that any section of the nation's population should be deprived of radio service or that we should willingly permit a degradation of existing service to any area. Yet in my opinion this is the inevitable result of the application of the Commission's policy of encouraging too many radio stations in the business markets. At this point, let me clarify my position so that misunderstanding will not occur. I do not believe that broadcasters should be immune from the statutes dealing with unreasonable restraints upon trade. Broadcasters are businessmen and deserve no special privileges or rights. On the other hand, where violations of the antitrust statutes are alleged, broadcasters should not be discriminated against and deprived of their right to a fair trial in competent courts. In other words, we should not use the Commission's licensing power to impose sanctions for alleged violations of antitrust statutes at least until after adjudication of guilt in the Courts. However, I believe that the Commission's power can be exercised legitimately in preventing the type of monopoly where one person is licensed to operate too many stations and it is the corollary of this phase to which I now refer—namely, the encouragement of an excessive number of licensees in any particular community.

I believe in sound competition, and monopolies contrary to public interest are as abhorrent to me as to anyone else. However, the forcing of unsound competition in the fields of radio will nullify the directions of Congress to distribute radio broadcasting facilities fairly and equitably among the various States and communities. Moreover, the forced application of the doctrine of unlimited economic competition will result in a further concentration of competing stations in the large cities and a dearth of facilities in the smaller communities throughout the nation. Likewise, if too many stations are forced into the large cities, the net result will be impaired program service to the entire nation. Such a policy of unlimited economic competition must of necessity impair good engineering standards, with the consequence that rural radio listeners may be sacrificed for a regulatory theory in which the commercial aspects of radio broadcasting are overemphasized and the public service aspects are neglected.

In my opinion the danger of forcing the doctrine of unlimited business competition is the destruction of a free radio in terms of free speech and the substitution therefor of a "free fight" in terms of meager commercial profits for a few people. Consequently, I believe that if we approach the problems of broadcasting solely from the narrow standpoint of business competition, and without resolving all the factors which affect public interest, we tend to destroy the value of the radio as a medium for the exercise of free speech. There are not sufficient facilities to secure everything anyone may desire in applying the various social-economic doctrines. We cannot have at the same time both unlimited competition and a valuable medium for free speech. I believe that a reasonable balance has to be struck, with the emphasis placed upon freedom of speech rather than commercialism.

Another problem in the distribution of facilities is the wide difference between the performance of the different classes of stations using the standard broadcast band. This results in inequalities not only between the licensees competing in the same local markets, but also inequalities between groups of licensees competing as groups for the national or regional markets. Of course, it would be ideal if these inequalities did not exist. But I know of no competent engineer who can attain this ideal in the standard broadcast band, and still provide efficient and adequate radio service to all the people in the nation. I have high hopes, however, that an approach to this isolated ideal may be secured in the future through the application of the new developments in the ultra high frequency portion of the radio spectrum. That point, however, has not yet been reached.

However, in spite of the inequalities between classes of stations in the standard broadcasting band, I am convinced that the three classifications we now have, namely, clear, regional and local stations, is the best solution not only from the standpoint of radio service to all the people but also from the standpoint of the maximum opportunity for the exercise of free speech with the few radio channels available today for broadcasting.

Therefore, while I agree in general principle with some of the arguments advanced by the clear channel advocates, I must reiterate that regional and local stations, and even the so-called "half area" stations as well as clear channel stations are absolutely necessary for a balanced radio structure. However, I feel that care should be exercised to avoid deterioration of service provided by means of clear channels. After all, it is only by the use of these facilities that service to the small towns and the rural areas can be maintained or improved, and when any one of these channels is permitted by us to disintegrate or to be used for some other purpose we irrevocably prejudice our position both nationally and internationally.

We cannot predict with accuracy future scientific progress. The population residing in rural areas is entitled to receive as much improved radio service as people in cities. There should be no discrimination.

If we are impetuous in breaking down clear channels today we may start something most difficult to unscramble, both from an international as well as a national standpoint. Therefore any new method of using these channels should be in accord with a logical plan which does not impair the possibilities for improvements of service to the rural areas of the United States.

In one sense, clear channels provide a radio reserve for the future. It seems unwisely wasteful to use up all that is left of this natural resource in the standard broadcast band merely to multiply existing radio service in the large cities.

As one who participated actively in the proceedings resulting in the North American Regional Broadcasting Agreement, I can speak with first-hand knowledge concerning the difficulties which were encountered in making twenty-five such channels available for the exclusive use of the United States. As a former Chief Engineer of the Commission, and later a Commissioner, I can speak with some knowledge concerning the difficulties which the Commission encounters in maintaining the status of these channels even when set aside by Commission regulation and by international agreement for this purpose. I therefore feel that some provision should be put in the Act which will make it impossible for the Commission to change the status of one of these channels without first conducting a hearing in which not only the merits of a particular application but the broad questions of allocation involved will be considered and decided. I agree that the formula prescribed by Section 307(b) might be made more specific by particular reference to rural areas and populations.

To carry out the first of these suggestions, Section 303(f) of the Act, which prohibits changes in the frequencies, authorized power, or in the operating hours of any station without consent of the licensee or public hearing, could be amended to provide specifically that the status of a frequency should not be changed without the conduct of a public hearing in which all parties in interest are permitted to appear and participate.

To carry out the second of these suggestions the following language might be added at the end of Section 307(b) as now written:

> "In considering what shall constitute a fair, efficient and equitable distribution of radio service as herein provided the Commission shall consider and give effect to the needs of rural and sparsely settled areas as well as to the more populous areas, and shall in no case make any decision or order upon any application for a license or modification or renewal thereof which will or might result in a reduction in the quantity and quality of radio service available to rural areas without the conduct of a public hearing in which the nature and extent of such reduction is an issue to be heard and determined."

6. The sixth and last proposal advanced in Section 7 of the bill is that the Commission shall report to Congress at some future date "the steps taken and the policies adopted by it to effectuate the purposes of Section 303(g) of the Communications Act of 1934 as amended in so far as those purposes may have application to the larger and more effective use of radio by stations which are intended to and do communicate with the public".

On this subject I feel that there has been a great deal of misunderstanding and confusion both upon the part of the industry and the Commission. Most, if not all, of this has arisen with respect to broadcast stations or stations which are used for communication with the public, and has resulted from the vagueness of the language now found in Section 303(g) of the Act. This section authorizes and directs the Commission to "study new uses for radio, provide for experimental use of frequencies, and generally encourage the larger and more effective use of radio in the public interest".

No one will deny the desirability of, or in fact the necessity for, the inclusion in the Act of provisions which authorize the Commission to carry out the purposes expressed in Section 303(g) and to that end to authorize proper experimentation. On the other hand, the indefinite character of the language employed in this section, as well as pressure which has been exerted upon the Commission to use its experimental power for matters which are not in fact experimental, have produced results which are far from satisfactory. Grants have been made on an experimental basis which cannot be justified on that basis, and conditions have been imposed in truly experimental licenses which are of doubtful benefit and value if true experimentation is to be fostered and encouraged.

True experimentation in radio and particularly in the newer fields sometimes involves the outlay of very substantial sums of money. To date the industry has been quite willing to make these expenditures and to engage in all types of experimentation which hold some promise of successful termination. I do not believe, however, that the members of the industry can be expected to continue to invest large sums in legitimate experimental ventures if the Commission continues to exercise the power of terminating experimental authorizations without hearings for any reason or for no reason at all, and regardless of the success or failure of the experiment. I believe on the other hand that here, as in other instances where the Commission exercises its licensing power, the exercise of such power should be subject to certain checks and balances.

To this end I would suggest that Section 303(g) of the Act be rewritten so as to provide in substance that the Commission shall study new uses for radio and generally encourage the larger and more effective use of radio in the public interest by providing for the experimental use of frequencies and taking such other steps consistent with the provisions of this Act as shall be in furtherance of this larger and more effective use. I believe that the Commission in granting construction permits and licenses for the experimental use of frequencies should be empowered and perhaps required to insert conditions in such instruments of authorization which will compel the holder thereof to make periodical reports to the Commission concerning the results of such experimentation. I further believe that the statute should be so written as to prevent the commercial use of any facility granted upon an experimental basis, unless such commercial use is necessary for the proper conduct of the experimentation and the Commission expressly so finds. I also believe that the Commission should be authorized to grant such instruments of authorization only for such periods of time as in its judgment may be necessary or desirable in view of the nature of the experimentation authorized. But I do not believe that the Commission should be permitted to insert in any such instrument or to impose as a condition to the grant of any such instrument any condition which will have the effect of making the procedural and appellate provisions of this Act inapplicable thereto.

If for reasons which do not now occur to me, the Congress is convinced that the Commission's power to terminate experimental authorizations without notice or hearing should be retained, then I believe that such authority should be specifically conferred in the Act. If such power of termination is expressly conferred in the Act, notice would be served upon all who entered the field of experimentation that regardless of the results thereof, the instrument which they hold and the investments which they have made as a result thereof may be rendered valueless at the will of the Commission. Now there is by implication at least the promise of more which may or may not be realized.

All that I have said concerning experimental operation and regulation thereof presupposes the adaptability of Section 312 of the Act to these problems. This section authorizes the Commission on its own motion and for cause to revoke or modify any station license after affording the licensee an opportunity to be heard. Any allocation changes made necessary to accommodate experimentation, during the progress of experimentation, or as a result of such experimentation can, in my opinion, be carried out under the terms of this section. If this Committee should be of the opinion that Section 312 does not confer this authority, then in my judgment it should be modified or extended to do so.

Future Technical Progress and Its Relation to Today's Legislation

In conclusion, and if the Committee so desires, I should like to mention some things relative to future developments in the field of communications. While future technical progress may have no direct bearing upon the details of H. R. 5497, it does have significant bearing on the general philosophy of legislation and regulation of communications.

Of course, no one can predict with accuracy either the technical course of future developments or the economics which will affect their progress. Consequently I am aware of the dangers which are inherent when embarking upon such a discussion. Nevertheless, I have some knowledge of recent laboratory developments and I have a background of nearly 30 years' practical experience in the application of science to the service of the public. Therefore it is possible that I should see some of the probabilities of significant interest.

The surge of recent inventive activities has centered around electronic research in the micro waves. This means that the present useful radio spectrum will be extended considerably, thus making a little more space not only for some sorely needed radio channels, but also for some new uses of radio. The development of new circuits, new electronic tubes and new types of antennas has opened a wide vista for the peacetime application of electronics to all sorts of activities, including communications and broadcasting. To me, the most interesting development is that which includes what I shall term "wide band transmission". This research will facilitate television and electrical methods of transmitting quantities of printed matter. Frequency modulation is another recent improvement which will improve the quality of reception and extend the range of local radio stations as well as accommodate a larger number of stations in the nation.

I foresee the day when not only will we have color television broadcasting stations all over the country, but also when every telephone will have its corresponding video attachment. People living in rural areas will be able not only to hear and see the radio news commentators, but also will have the newspaper itself delivered by radio. Telegrams will not be transmitted as they are today. We will not have to worry about boiling down what we desire to say in order to get within the ten-word minimum charge. We will think in terms of letter pages and wonder whether it is worth while to pay a little extra for faster delivery of a letter by electronics rather than by the efficient airmail of the future.

Radio likewise will play a most important part in the development of post-war aviation by adding to the safety of flying and by assisting in the coordination of flying activities along airways and at air terminals.

There will be other radio services of economic value, such as radio control centers for doctors' calls, taxi cabs, and for delivery of consumers' goods.

Electronics will play an important part in chemistry, medicine and surgery, and in many manufacturing processes. Time is too limited to expound the many activities in which electronics will function. In fact, I foresee a new era which I like to term the "electronic era," the importance of which in modern social economics cannot be disregarded. A huge new industry is possible—just the kind of life-blood the nation will require after this war.

I would like to quote some extracts from an article I prepared for the National Resources Committee and which was published in its report on Technological Trends and Their Social Implications, dated June 18, 1937. This may be pertinent here because today we are approaching into the electronic era at a faster rate than ever before:

> "There will be required in the future a balance between the unlimited possibilities of facsimile and television as against the limitations imposed by natural, economic and social circumstances. Nevertheless, one can safely state that ability to have one's newspaper printed in the home, ability to see and hear news in the making, ability to transmit quickly from one point to another a written document, and the ability to see and hear the person with whom one desires to communicate, even though he may be separated by thousands of miles, must have a marked effect upon the daily life of anyone living in this modern age. That this may affect the social habits and daily routine of an individual family or that it will affect the economic welfare of the Nation as a whole, cannot be overlooked. . . .
>
> "It also may be expected that these new developments will speed up ordinary life and business, and will affect certain existing industries, such as the motion picture, the newspaper, advertising, and the existing telegraph, telephone and radio systems of the country. . . .
>
> "In education, the application of these modern methods of communication may well effect a complete change in methods of educating not only the child and the adult, but also the entire public. The new communication development may also revolutionize the present school systems of the country.
>
> "Whether or not these new developments will permit more leisure and greater profits will depend entirely upon the control which the public places upon such new developments, particularly as to the organization and methods of making these wonderful facilities available for use by the public at the cheapest cost. In consideration of this factor alone, one must take into account the economic limitations which will be involved in the rapid obsolescence of present-day communication facilities.
>
> "It is considered by many that the application of these modern communication facilities will not result in a decrease in employment, but rather in an increase in employment. However, such employment will tend toward those who are qualified scientifically rather than those who are qualified manually. The person of the future may, as a result of propinquity with the everyday modern communication developments, become a far better educated thinker than the average person of today."

Thus, it is obvious that we shall have new communication problems for Congress and the Commission. The present-day problems will be obsolete and forgotten. Tomorrow we may wonder why we worried so much about today's problems. Therefore it seems essential that we do not base long-term legislation upon what may appear to be a good detailed solution of today's minor troubles in radio. We should avoid the danger of regimenting the future along the grooves of today's thinking, and it is for this reason I hope that any new legislation which may be enacted by Congress will contain statements of broad policy together with such checks and balances as are deemed necessary to insure the development of radio as a free American enterprise in which the public has confidence.

"Mr. Sanders. Mr. Craven, in September of last year, the Chairman of the Commission transmitted to the Chairman of this Committee some comments in regard to H. R. 5497, commonly known as the Sanders bill.

"Did you have an opportunity of passing upon those comments prior to their transmittal to this Committee?

"Commissioner Craven. No, sir. Those were not discussed in the Commission by the Commission, so far as I am aware, and I did not get a copy of it until just a few weeks ago. I did not know about it.

"Mr. Sanders. Is that customary for the Commission to give official opinions and make dispositions, without all of the members of the Commission having been consulted?

"Commissioner Craven. You refer to matters of legislation?

"Mr. Sanders. Well, I refer to anything.

"Commissioner Craven. I would not say that that is customary. I think we have discussed in the past many matters of legislation; but generally speaking, on some of these bills, the discussion is not very extensive. This is the only bill that I recall that affects the Commission's organization and procedure to such an extent, and I know that this one was not discussed. I do not recall the discussions of others; but I would not like to state positively that this procedure is customary.

"Mr. Sanders. Do you not think, or do you think, that it would be desirable for such matters of policy to be discussed in the Commission as a whole before the contents are transmitted to this Committee or any other committee?

"Commissioner Craven. I have suggested, sir, in my testimony, that I felt that the Commission as a whole, under the leadership of the Chairman, should discuss all matters of policy and all matters of legislation and we should thrash them out thoroughly."

"Mr. Sanders. On page 6 of your prepared statement, you have some discussion of the present organization of the Commission. It is my understanding that at one time the Commission used a division system in its organization. That is a fact, is it not?

"Commissioner Craven. Yes, sir.

"Mr. Sanders. Did you serve on the Commission at that time?

"Commissioner Craven. I was the Chief Engineer of the Commission when that system was in effect. I also, just for a few months, I served on a division as a Commissioner. Mr. McNinch, the Chairman, was the Chairman when I came in. He and I were appointed at the same time, and as I recollect it, in a very short time after his assumption of office, we had this proposition of changing from the divisions into the system we now have. I voted for the change at that time with the understanding that later on we would reorganize back into divisions.

"I have always believed in the division plan of operation. I felt that the old division plan was unworkable, because it was a combination—it was a division as to character of communications, rather than as to the functions of the Commission. We had the telegraph carrier, common carrier division, and we had a telephone common carrier division; then we had a broadcasting division.

"I felt that that was unworkable; but I believe just about that time, or shortly thereafter, I recommended to the Commission the establishment, reestablishment, of divisions along fundamental lines, very much as those proposed in this bill which is now under consideration.

"I have long felt that not much attention can be given to all of the things that come before us. I personally, perfectly candidly admit that I have been unable, in times past, when we have had lots of hearings, to give the necessary time to really make a just decision, and I felt that I ought to be relieved of the responsibility of having to pass upon every case.

"Mr. Sanders. It is your considered opinion, then, that a division system such as is suggested in H. R. 5497 would increase the efficiency of the operation of the Commission?

"Commissioner Craven. That is my opinion; yes, sir.

"Mr. Sanders. And you have had practical experience under both systems?

"Commissioner Craven. Yes, sir. I must admit again that there were faults in the past system; but I believe this bill rectifies those faults.

"Mr. Sanders. Mr. Craven, has any other member of the present Commission had any experience under the divisional work?

"Commissioner Craven. Yes, I think Governor Case had.

"Mr. Sanders. Governor Case?

"Commissioner Craven. Yes, sir; and Commissioner Walker.

"Mr. Sanders. And Commissioner Walker?

"Commissioner Craven. Yes, sir. I might state here that I think that more than one or that I am not the only member of the Commission who believes we should have the division plan of operation. I also might state further that the organization of the staff is along divisions of work, such as this. They have a common carrier division; they have a broadcasting division, in each of the major departments of the staff, and I think that that is the natural way to organize.

"I do not see anywhere at all where we should not delegate our duties and be relieved of responsibilities, except for policies. I think we ought to have time to consider broad matters of policy and that is what the function of the entire Commission should be.

"Mr. Sanders. If this phase of the pending legislation should be adopted, that is, the division of the Commission into divisions, separation of the Commission into divisions, how long would you think it would take the Commission to reorganize along those lines; to what extent would it upset the work of the Commission?

"Commissioner Craven. I do not think it would affect the work of the Commission one iota. I think we are all prepared for it. All we would have to do, however, is to write some new procedural rules. I do not think that is a very difficult thing to do.

"The Chairman himself, I think, almost might be concerned, because I do believe he has some burdens, but I think he could delegate some of those duties to the rest of us and we could get them done.

"Mr. Sanders. You would not anticipate then any difficulty in delegating administrative powers under the division plan as provided in H. R. 5497?

"Commissioner Craven. I would not be here today, sir, advocating what I have, if I thought it was difficult to do. I do not see any great difficulty in it. I have organized many things in my life, on a large scale, and this is a simple one."

"Mr. Sanders. On pages 21 and 22 of your prepared statement, you outline five restraints upon the ability of a licensee to exercise his contractual obligation; that is, five restraints upon his contractual powers. I expect that is what it would be considered.

"Commissioner Craven. Yes, sir.

"Mr. Sanders. In your opinion—I think that you have already expressed it—but I would like a clarification of it—do you believe that those five limitations that you recommend would cure the evils that have been discussed by other witnesses as inherent in the present option time control by networks?

"Commissioner Craven. Of course, I do not see the same evil that they do in the option time. I feel that option time is absolutely essential for the efficient conduct of network operations, absolutely essential, for a cohesive national distribution of programs. I have had practical experience in the broadcast field in which I tried to operate on a system somewhat similar to that, with no ability to secure firm time options, and the proposition failed of its own weight. We could not deliver the time.

"Now I can see some merit in what I will call the majority's contentions, but I can see some impracticalities, and it is for this reason that I suggested these compromises. I think this will accomplish much better the objectives of the majority of the Commission, than the rules that they give. I felt that they had over-emphasized commercialism. I prefer to emphasize public service.

"Now, I know that the broadcasters must live. It is not a charitable business. They must have support, and I recognize that, but it seemed to me that the rules—in effect the rules proposed by the majority, the effect of those rules was to indulge more the natural and human desires for profits. I feel that the type of legislation I have proposed here lets profits take their proper place, but emphasizes the thing I think most essential to radio, and that is public service programs, not from the standpoint of commercialism, but from the standpoint of free speech."

"Mr. Sanders. Are you familiar with the type of authorization issued in connection with Radio Station KOB?

"Commissioner Craven. Yes, sir.

"Mr. Sanders. Are you familiar with that particular case?

"Commissioner Craven. Yes, sir.

"Mr. Sanders. Just what experiment is now involved in that particular case?

"Commissioner Craven. Of course, I want to be fair with the majority. I happened to vote against that the last time, because I did not think it was an experiment. And, that is a matter of opinion. They are operating at the present time on a frequency which is a clear-channel frequency, with some type of experimental authorization or special experimental authorization, so that they can secure information concerning the interference and the effect of such interference upon the service of the existing station on the channel. I think they have operated long enough and have sufficient information to tell what the interference is. It exists and we know it and we might as well face the issue and have a hearing such as the type I propose here, if they want to go ahead and grant them.

"Mr. Sanders. Now, of course, I think that every one recognizes the necessity of the Commission having the power to authorize experimental work. Progress, of course, would stop if we did not.

"Do you, or do you not think it would be desirable for some limitation on definition of the type of authorization that might be given by the Commission to be written into the statutory law in regard to these experimental licenses?

"Commissioner Craven. I think it would be very helpful to a person like myself to have something in the legislation describing the different types of authorizations, and in that connection we do have a certain type of special authorization which I think is justified—short-lived authorization—coming on at some special hours, or some special time for special purposes, and I think that those types have merit. I prefer to have it written into the law.

"Also I feel that there may be some factor in the common-carrier aspect. We should perhaps have greater freedom of action in the common-carrier aspect, such as in connection with particular shipping, to give some special type of authorization, such as extending the points of communication; extending to some of these radio stations in the international field.

"I think that the point of the gentlemen who testified on that—I forget who it was—was pretty well taken. On the other hand, in extending it, it gives authority to do that type of authorization, and I think it ought to be on a temporary basis so that the competitive aspect will finally get down and be heard in the event there are objections.

"Mr. Sanders. On page 23 of your prepared statement, in a paragraph toward the bottom of the page, you say that: 'no distinction is made between the qualifications of licensees for various classes of stations which the Commission may license.'

"In your discussion of that topic, would you include experimental licenses as coming within the particular discussion?

"Commissioner Craven. You mean for pure experimentation?

"Mr. Sanders. Yes.

"Commissioner Craven. No, sir. I think it ought to be wide open—any one, any person, ought to be encouraged to experiment, if you limit it to true experimentation.

"Mr. Sanders. But it is your belief that any one authorized to conduct an experiment, whether at a radio station or not, that the type of authorization should be authorized in the statute?

"Commissioner Craven. Yes, sir.

"Mr. Sanders. Or clearly defined, more clearly defined than it is now?

"Commissioner Craven. Yes, sir. One of the things that I thought was important is, sometimes there is going to be a difference of opinion, honest difference of opinion, between the Commission and an inventor as to the value of the service. At the present time we have the absolute right to terminate experimental licenses without a hearing. I think that in the future it is going to be advisable if we had these differences of opinion between, we will say, the staff of the Commission and the inventor, clearly defined by hearing, so that our judgment as to an application of a new invention to the service, to the public, can become, as a result of an investigation or hearing, in which all of the factors can come out and be stressed, and perhaps subject to review by the courts in the event we are arbitrary or capricious."

"Mr. Sanders. You have made it plain that you look for great changes in the radio communications field in the near future?

"Commissioner Craven. Yes, sir.

"Mr. Sanders. Is it your opinion we should postpone any amendment to this act until those changes have taken place, or do you believe we should amend the act in certain particulars to anticipate the proper happening of these problems. What are your views on that?

"Commissioner Craven. I think that we should amend the Act along the lines similar to the suggestions in the Sanders bill. I do not want to be tied down to the details of the Sanders bill. I believe in the principle of it. I think the principles are sound.

"I think you should enact legislation now in order to guide us. I know I would appreciate it very much. It has been a very unsatisfactory thing for me to be on the Commission and in some of these matters not be able to conscientiously agree with my colleagues, and I find that there is a difference among us to our conception of what the Act means. Now, that is an unfortunate situation. If you can clarify it, you are doing something constructive, in my mind.

"Mr. Sanders. In connection with this newspaper controversy, Mr. Craven, have you any views, or any opinion, as a member of the Commission, as to whether or not the Commission has the power to bar newspapers from operating radio stations?

"Commissioner Craven. I am firmly convinced, as I read one of the cases, that in two or three cases, two at least, decisions, the Commission has not got the power to make the rule.

"I voted against the investigation of the newspapers, not because I felt that they should not be investigated, but because there was a hesitancy on the part of the Commission not to confine itself to what recommendations if any should be submitted to Congress in the premise—I think we should have faced the newspaper question. I am perfectly willing to face it and present it to Congress. On the other hand, the other members of the Commission felt differently I believe than I do. Some of them have made their minds up. But, our law department gives us a memorandum which, in my opinion, is interesting. This is a memorandum to the Commission from our general counsel and contains this statement, having to do with the decision of the United States Court of Appeals for the District of Columbia in the Stahlman case. That is where one of the litigants, respondents in this present newspaper investigation, refused to testify on the grounds that the Commission did not have jurisdiction and the matter was taken to the Court of Appeals which found that no harm had been done yet; that the Commission had power to make an investigation, but it had not done anything, as I understand the decision of the court, in the way of making any such rule; but that that was all in the future. Therefore, Mr. Stahlman lost his case, but that decision indicates, as I understand it, that the Commission did not have the rule-making power. Nevertheless, our general counsel states—I would like to submit this whole memorandum, in fairness to the general counsel if I may.

"FEDERAL COMMUNICATIONS COMMISSION

"INTER-OFFICE MEMORANDUM

"For: Information

"To: The Commission.
"From: The General Counsel.
"Subject: Comments on Opinion of the United States Court of Appeals for the District of Columbia in Stahlman v. Federal Communications Commission, No. 8039.

"The case of Stahlman v. Federal Communications Commission involves the validity of a subpoena issued by the Commission requiring the attendance and testimony of James G. Stahlman before the Commission in connection with the investigation conducted by the Commission under Orders No. 79 and 79-A.

"The Commission had issued a subpoena to Stahlman requiring him to appear and testify in connection with a newspaper hearing being conducted under Orders No. 79 and 79-A. When Stahlman refused to appear, the Commission applied to the United States District Court for the District of Columbia for an order requiring Stahlman to appear and testify as required by the subpoena. This order was entered by the District Court, and Stahlman appealed to the United States Court of Appeals for the District of Columbia.

"The Court of Appeals affirmed the order of the lower court. The court held that section 403 of the Communications Act specifically empowers the Commission to conduct the hearing contemplated by Orders No. 79 and 79-A and that the subpoena was therefore proper.

"The court, however, went on in its opinion to include the following:

> "'If in this case it had been made to appear, as counsel for appellant insist, that the Commission's investigation was

> solely for the purpose of the consideration or adoption of a hard and fast rule or policy, as the result of which newspaper owners may be placed in a proscribed class and thus made ineligible to apply for or receive broadcast licenses, we should be obliged to declare that such an investigation would be wholly outside of and beyond any of the powers with which Congress has clothed the Commission. For we have previously held that there is nothing in the Act which either prevents or prejudices the right of a newspaper, as such, to apply for and receive a license to operate a radio broadcast station. Tri-State Broadcasting Co. vs. Federal Communications Commission, 68 App. D. C. 292, 96 F. (2d) 564. Further consideration confirms that view.
>
> " 'The Communications Act requires no more of an applicant for a radio license than proof of citizenship, character, and financial and technical qualifications to operate in the public interest. Possessing these, the applicant's eligibility is unchallengeable, assuming there is an unused frequency free of interference with an established station.'

"It should be noted that this statement by the court is pure dictum. The validity of any possible regulations on the subject of newspaper ownership of radio stations was not involved in the appeal. As Mr. Justice Edgerton said in his concurring opinion:

> " 'Since the Commission does not appear to have forbidden common control of newspapers and broadcast stations, or to have found that such control is contrary to the public interest, or to have initiated an investigation with a view to such a finding, we need not determine whether it should or could do those things. I express no opinion on that question. I think we should wait until it arises and the interested parties, including the Commission, are heard upon it. In other respects, I concur in the opinion of the court.'

"Furthermore, even the dictum itself is not as broad as might appear at first glance. Its scope is greatly narrowed by the following language which appears later in the opinion:

> " 'In the case we have, the Commission in its supplementary order has specified the subjects about which it wishes to obtain information. These are: Whether the joint association of newspapers and broadcast stations tends to prejudice the free and fair presentation of public issues and information over the air; whether such association tends to restrict or distort the broadcasting of news or to limit the sources of news to the public; whether such association affects freedom of access to the radio forum for the discussion of public issues, or unduly limits access of news gathering services, to the injury of the public. From the other side of the picture, the Commission proposes to inquire whether association of newspapers and broadcast stations will result in utilization of improved facilities and experienced personnel in the procuring and dissemination of information, and whether such association may tend to insure greater economic stability and encourage maximum technological development, and finally, what considerations influence newspaper interests to acquire broadcast stations. These subjects, except perhaps the last named, are clearly within the inherent powers of the Commission.'

"This language indicates that newspaper ownership may be considered by the Commission in passing upon individual applications and indeed even seems to suggest that rules might be made with respect to newspaper ownership as long as they are not hard and fast rules barring newspaper ownership of stations under any circumstances. The language also clearly contradicts any suggestion in the dictum first quoted that the Commission in passing upon applications may consider only the citizenship, character and technical and financial qualifications of applicants.

"Moreover, an earlier decision of the court (by Justice Groner) clearly indicates that the Commission has the power to consider factors other than the citizenship, character, and technical and financial qualifications of applicants in passing on applications and also the power to formulate general rules or policies with respect to such factors. Thus in Pottsville Broadcasting Co. vs. Federal Communications Commission, 69 App. D. C. 7. 98 F. (2d) 288, the court on an appeal from a denial of an application for a construction permit remanded the case to the Commission with directions to reconsider the question whether a construction permit to build a local station should be granted to a person not a resident of the town in which the station was to operate. The reason given for the remand was that the Commission had not shown that it had adopted a general policy with respect to the operation of local stations by non-residents. This action of the court clearly indicates not only that the Commission in passing on applications may consider factors other than citizenship, character, and technical and financial qualifications, but also that it has the power to promulgate general rules or policies with respect to such factors.

Telford Taylor,
General Counsel.

"Commissioner Craven. Now, looking at it as a layman, I do not know whether we have got the rule-making power or not. I think Congress ought to make it clear.

"Mr. Sanders. Is it your view, as a member of the Commission, that this question of the limitation of the right to operate radio stations upon newspaper owners and similar classifications, should be passed upon by the Congress and not by the Commission?

"Commissioner Craven. I have advocated that. I have advocated it most strongly as a matter of basic national policy which is involved here and I think we are an agency of Congress and we ought to come to you first and find out what you want us to do."

"Mr. Sanders. That is all I have.

"Mr. Brown. Mr. Chairman.

"The Chairman. Mr. Brown.

"Mr. Brown. Commander Craven, how long have you been connected with the Commission in various capacities?

"Commissioner Craven. Since 1930.

"Mr. Brown. I do not mean as a member of the Commission, but in various capacities?

"Commissioner Craven. Since 1930; 12 years.

"Mr. Brown. Twelve years?

"Commissioner Craven. Yes, sir.

"Mr. Brown. During that time, there has been a great change in the personnel, has there not, in the Commission?

"Commissioner Craven. Yes; a very rapid change. We have had several different chairmen and several different philosophies expressed.

"Mr. Brown. Has that rapid change or turnover in personnel of the Commission itself and of the ranking employees or aids had effect on the general policies of the Commission?

"Commissioner Craven. I think it has; yes, sir. I mean, of course, it is difficult when you get continual changes, new men coming in to a new field, to get a continuity of policy.

"Mr. Brown. Has that been a detrimental or a helpful thing, those changes?

"Commissioner Craven. I have felt for a very long time that the Commission, since the 1934 Act, and prior to that, the Radio Commission has not ever formulated an adequate national communications policy, either within the framework of the Act, or such as should be recommended to this body. I have with me certain recommendations that I submitted some time ago to the Commission that were never considered. We never seemed to have time. We were always changing. These were submitted when Mr. McNinch was there, yet it was tabled at that time for lack of time. (Insofar as it relates to radio broadcasting the Resolution reads as follows:)

"Broadcasting

"This involves the reconsideration of the relationship of Government to broadcasting so that there will be established a revised policy which will insure that broadcasting will be used in a manner which will safeguard freedom of speech and at the same time be effective for the promulgation of basic information to the public concerning the social and economic welfare of the Nation. The policy of private operation of broadcasting free from political control should be reaffirmed."

"Mr. Brown. Now, I would like to go back, Mr. Craven, for a moment to the statement that you made in answer to questions of Mr. Sanders, in which you read a statement of the chief counsel which seemed to be to me a rather surprising interpretation of that court decision.

"Commissioner Craven. Yes, sir.

"Mr. Brown. Some time ago there was filed with the committee a memorandum showing the age of the attorneys employed by the Commission. May I ask the age of your chief attorney?

"Commissioner Craven. I am afraid I do not know, but he appears to me to be a young man.

"Mr. Brown. Is his grade P-4?

"Commissioner Craven. He gets $9,000 a year.

"Mr. Brown. That is the highest rating I see here and a rating in which only one attorney is employed by your Commission. I see the age 34.

"He interprets judicial decisions, judicial decisions of the court of appeals, as I take it from that statement that you just read.

"Commissioner Craven. I think he tried to explain it to the Commission.

"Mr. Brown. In other words, he judges judicial decisions.

"Commissioner Craven. I would not want to say that.

"Mr. Brown. For your Commission.

"Commissioner Craven. I would not want to say that, sir, to that extent. I think that he tried to advise the Commission as to what these things mean. Now, that may be—

"Mr. Brown. Well, the Commission is unable, unfitted to read the decision of the court of appeals in this case and know what it means?

"Commissioner Craven. I do not think they are unable or unfit to do it. I have a good deal of esteem for my colleagues on the Commission. I think they can do it. I can do it.

"Mr. Brown. Do you agree with the interpretation of the attorney?

"Commissioner Craven. Unfortunately I do not.

"Mr. Brown. Was this ruling by the attorney requested by the Commission?

"Commissioner Craven. No, sir; I do not think so.

"Mr. Brown. But, it came within the province of the attorney to interpret the court decision for the benefit of the Commission and for the administration.

"Commissioner Craven. I think he was trying to be helpful on it, sir. I really do. And, I also appreciate any information that I can have.

"Mr. Brown. I understand that this case is being appealed to the Supreme Court, is it not?

"Commissioner Craven. I am not sure. I think it is.

"Mr. Brown. And perhaps in the final analysis the Supreme Court of the United States may interpret the law on this particular matter.

"Commissioner Craven. I am not certain whether this is being appealed to the Supreme Court or not, sir. I have not got the information with me. I can supply it later.

"Mr. Brown. And if the Supreme Court renders a decision, will you request your chief counsel to interpret that decision and—

"Commissioner Craven. I will not. I presume I would appreciate it.

"Mr. Brown. Now, going to the newspaper end of it for just a moment. As I understand your position, you believe that the fact that a man is a blacksmith, or a shoemaker, or a newspaper publisher should not bar him from participating in radio broadcasting?

"Commissioner Craven. That is right, sir.

"Mr. Brown. Has there been any case before your Commission in which licenses have been refused or transfers have not been made or not been approved, because of the fact that the person involved was a newspaper publisher?

"Commissioner Craven. I think in one case. There were two applicants, one not a newspaper publisher, and one a newspaper publisher. Both had made good cases.

"Mr. Brown. The Commission in that instance chose the one who was not a newspaper publisher in preference to the one who was a newspaper publisher?

"Commissioner Craven. We had certain license applications which were set for hearing on the newspaper issue. I recall one at Allentown, Allentown Radio Station. There were others, I believe, that were involved, that I think that up to a recent time, the newspaper question was not taken into consideration in a final disposition.

"There was a split vote on one, four to three decision, in respect to acquisition of a station in Ohio, I believe, by a newspaper.

"Mr. Brown. Will you add there the name of that station?

"Commissioner Craven. It is at Canton, Ohio. I have forgotten the call signs.

"Mr. Brown. The Canton Repository was the newspaper?

"Commissioner Craven. I have forgotten that, I am sorry to say.

"Mr. Brown. That was very recently.

"Commissioner Craven. Very recently we adopted Order 79 and since then we have had also called newspaper applications for radio stations placed in the pending file.

"Mr. Brown. In these particular decisions, were any reasons given by the Commission for their action, or was it just simply ordered——

"Mr. Brown. What is this pending file in which you place these applications for newspapers for radio stations or transfers?

"Commissioner Craven. Well, when an application is made for either a transfer or for a new station in which there is any question whatsoever that the newspaper interest is involved in it, the matter is not acted upon, but it is placed in the pending file, awaiting the outcome of our decision on Order 79, which is the newspaper investigation.

"Mr. Brown. Well, of course, that Order No. 79, as I understand is simply for an investigation and not one that will bar a newspaper; is that right?

"Commissioner Craven. That is for an investigation; yes, sir; but nevertheless——

"Mr. Brown (interposing). Do you have any other cases in this pending file, or is this just a special repository for newspapers.

"Commissioner Craven. I think it is a special repository, the way I look at it. As I stated before, I was forced to vote against the newspaper investigation because of the fact I felt that it ought to be a matter referred to Congress, and I personally have not had so much fear with respect to newspaper operations of radio stations. I do recognize that there is a problem of public policy involved in this question of centralization of control, which I think is your problem.

"Mr. Brown. But you feel that it is a problem which the Congress should pass upon?

"Commissioner Craven. That is right; yes, sir."

"Mr. Youngdahl. Mr. Craven. I was very much interested in your statement this morning in connection with no monopolies contrary to public interest, sound competition, and unsound competition.

"Of course, it is needless to say that every member of this committee is absolutely against monopoly. On the other hand, do you not think that the thing can be so drastically governed by rules and regulations that you might create a condition of unsound competition and thereby injure the public interest?

"Mr. Craven. Yes, sir; I do. Might I elucidate some of my thoughts on that particular matter?

"Mr. Youngdahl. Yes.

"Commissioner Craven. Of course, I again state that I am not an attorney at law and I approach these matters from a practical standpoint of a layman and with a background of a good deal of experience in the broadcasting business.

"It is my conception of the antitrust statute dealing with restraints upon competition, that the underlying factor there is public inerest.

"Those restraints which are unreasonable, of course, are contrary to public interest. Those are the restraints which of course are contrary to public inteest. I think that you can have certain national restraints which perhaps are not unreasonable and, therefore, are not contrary to public interest.

"Now, if the Communications Commission in the field of broadcasting begins to put rules and regulations into effect so circumscribing a natural force and the natural advantages of radio, I feel that that would be contrary to public interest.

"Now, furthermore, I do not feel qualified to, personally, on the Commission, to deal with charges or alleged charges of violations of the antitrust acts. I feel that if I should deal with those personally and take them into consideration that I might very easily do an injustice to the broadcasting licensee. I think he is entitled to have, if there is any allegation of unreasonable restraints upon competition, is entitled to have a trial in the courts, and an adjudication by the courts, by men who are competent to deal with those particular types of violations of law.

"In the chain broadcasting report of the Commission, I felt that there were two types of monopoly or antitrust violations, if you wish, involved.

"One type, which was alleged to be unreasonable restraints upon competition, which in my opinion was not within the jurisdiction of the Commission at all, and in which we, if we tried to regulate that aspect of it, ran the danger of creating an injustice.

"The other type of monopoly was that which has to do with the licensing of stations, too many stations to one person. I think that is entirely within the jurisdiction of the Commission and that that is power which the Congress gave to us, and that is what they meant when they discussed monopolies with respect to chain broadcasting.

"Now, when it comes to business practices, however, I do not believe that Congress gave us that authority to deal with unreasonable competition, until after an adjudication in the courts. I think that is plainly in there. Of course there is some language in the act that says we have the power to regulate chain broadcasting. I forget the section at the moment. I do not think that implies we have the power to regulate everything about chain broadcasting.

"Mr. Youngdahl. Do you feel that the application of the so-called networks rules on the networks would bring about unsound competition so that in the final analysis the public would be injured as a result thereby?

"Commissioner Craven. Yes; I do. If I could take a little of your time, I would like to discuss the merits of those rules. I do not want to take too much time, though.

"Mr. Youngdahl. Go ahead, if it meets with the wishes of the Chair.

"The Chairman. Yes.

"Commissioner Craven. Of course my views of the rules are contained in the minority and supplemental reports on chain broadcasting as well as in my testimony before the Senate Committee investigating this subject matter. Of course I do not want to repeat all of that in detail. Furthermore, since the Senate hearing, the Commission has modified some of its rules. While these modifications remove some of my original objections, I still feel that from the standpoint of merit the rules are susceptible of further improvement.

"I am thoroughly of the opinion that the aggregate effect of the rules is unsound. Now, I recall that in the original draft of the report there was a statement to the effect that it could not be determined what would be the competitive effect of the proposed contractual provisions, or how they would work out in actual practice, and that this matter would have to be examined later in the light of all developments in the field of network broadcasting. I was somewhat shocked when I saw that in the original report. Nevertheless, the Commission set its course and started on its voyage of adventure into the realm of social-economic experimentation. Very soon thereafter the Commission itself changed the original rules, indicating to me that the original rules were unworkable, just as I had contended. Today I have no more assurance that the present rules are not experimental in character. To me it is undesirable to impose radical changes in a successful existing system when the result cannot be predicted. A more moderate and evolutionary course would be safer, in my opinion. The step-by-step method of imposing new reforms is preferable and most desirable when the outcome of the whole reform cannot be predicted.

"I think that everyone will concede that among the objectives we all desire in broadcasting are:

"Good program service to all people, not only in the best markets, but also in the other and less profitable markets, as well as in the vast rural areas far away from the radio markets, and also

"That the utilization of the natural advantages of radio so as to enhance its value as an effective medium for the dissemination of facts and opinion throughout the nation is very desirable. I emphasize that because I think even today that is more important than any other thing.

"Then we should have sound economic structure to make certain the attainment of the first two objectives.

"Now, the factors of competition, diversity of control, methods of program distribution, sales organization, composition of networks and responsibilities of licensees are corollaries to these three objectives.

"We must remember that broadcasting is not charity, and that licensees must live, if they are going to survive and render service. On the other hand, however worthy and human the desire for profits may be, it is in natural conflict with the giving of free service during the hours which have proved to be the most valuable hours from a commercial standpoint. That is a natural law which I think bears on this situation.

"Now advertisers furnish the cash and consequently are the persons who interest the broadcaster tremendously. Also broadcasters are confronted with a multitude of advertisers, some preferring the network method of reaching the public while others prefer national spot business in the best or selected markets. We also have the local advertisers. In any event, the national advertisers prefer the best stations in the best markets and the local advertisers prefer the best stations in their own markets. That is perfectly natural.

"Some of our difficulties might be overcome if there were at least four independent competitive networks in which each affiliate had a real voice in the character of service, and where each network was composed of comparable units, not only from a national standpoint but in each of the principal markets. However, even in this ideal reorganization of facilities, it would be necessary for each network to be cohesive and efficient.

"If the Congress and the Members of the Congress, on important questions, cannot reach all of the country and can only reach a part of it on important matters, what good is radio, as I look at it, as a medium for free speech.

"Mr. Youngdahl. After all, if you will excuse me for interrupting you there, we must also consider the public.

"Commissioner Craven. That is right.

"Mr. Youngdahl. And is not that today one of the few means left by which the public might hear discussions of public questions?

"Commissioner Craven. That is the way I feel about it, sir.

"Now, as I envision the aggregate effect of the rules, they do not encourage a situation in which there is either cohesiveness or efficiency. They tend to overemphasize commercialism, in my opinion. For example, prior to the new rules, when a network did not exercise its option, the affiliate with an exclusive contract could provide either a public service sustaining program from its own network, a local public service program, a local commercial, or a national spot commercial program. It could not substitute a commercial program from another network.

"Under the new rules, as I understand them, while stations may have first call upon their own networks, each station has the opportunity to make itself available to all networks. That adds another commercial source. Consequently I feel that we will have less time than now for public service programs, and that although the rules are intended to safeguard against this contingency, I doubt their effectiveness in this respect. I believe that if we permitted natural forces to counterbalance themselves we could be more effective than by trying to harness natural forces by Government fiat. Moreover, we cannot legislate for all conditions and economic circumstances of the future. I just do not know what the future holds in that respect and I hesitate very much to put arbitrary rules or economic barriers into effect, such as the rules adopted by the Commission, because I am afraid of the future.

"Now, another aggregate effect of the rules seems to be that they give encouragement to the application of the natural tendency to use the best stations in the best markets. While some of the chain companies at the present time may have the best stations in the best markets, the new rules do not affect the natural force where the advertiser is the one who pays the cash and consequently gets what he wants. Therefore, with pressure on the various chain companies from the advertisers to make affiliation contracts with the best stations, we may find that the best stations will be affiliated with all chains and that the smaller stations will be farther away from profitable operation than they are today. I think that unsound. I think we ought to have every type of station profitable, in good markets and poor markets, if possible.

"There are, of course, certain advantages to the majority's rules, but in the aggregate I think that the disadvantages outweigh the advantages."

"Mr. Youngdahl. Would you feel, Mr. Craven, that the imposition of the network rules during our war effort might cause such confusion as would be dangerous to the war effort?

"Commissioner Craven. The network rules in their present form with time options, in my opinion, revolutionize the very basis of doing business in broadcasting. I have no objection to rules which do not revolutionize the fundamental business operations, and I feel that this is an unsound time to do it. We need good radio broadcasting service now. We need to help such chain organizations.

"Mr. Youngdahl. Do you feel that the radio organizations today have given good service so far as their national defense effort is concerned?

"Commissioner Craven. I think they have given excellent service. I do not know how to suggest any improvement, because they have given such excellent service. Of course every one is open to improvement."

"Mr. Youngdahl. If I did not misunderstand the Commissioner's testimony yesterday, the Chairman's testimony, he said that at the present time under the present arrangement, the networks really have control of all of the stations in their network.

"Now, I was interested in that bit of testimony and made some inquiries yesterday afternoon and last evening and I have some figures here that I am going to submit to you and ask you if you know anything about that particular situation.

"I am advised that during 1941 over one network 388 stations refused 629 individual network commercial programs, representing a total of 289 hours and 20 minutes. The general reasons for the refusals were local political speeches, local talent programs, probably local educational and commercial traffic.

"Now it seems to me by those figures that that would show that there was not complete control over these stations even under the present arrangement.

"Could you enlighten us on that, Mr. Craven?

"Commissioner Craven. I am not familiar with the facts and figures. This is the first time that I recall hearing them; but by and large it is my opinion that in the past there was inequality between the network company and the affiliates. I think it was more in favor of the network company than in the affiliates, and I have suggested everywhere I have been an increase in the bargaining power of the affiliate and a greater voice in that particular, and a greater voice in the character of the service.

"On the other hand I do not believe that by and large that vast operation of the networks, even though they are now considered unsatisfactory were in a sense a utilization of control over the affiliates which prevented the affiliates from carrying out what their concept was of public interest.

"Mr. Youngdahl. Assuming that the figures I gave you are correct—and I assume they are, because they were gotten from reliable sources—that would not show complete control by the networks over their affiliated stations, would it?

"Commissioner Craven. That is true, yes. I just cannot conceive of how, under the new regulations, if they were to be imposed, giving to the stations the right, freedom, to take any program of any network how that would bring back control to the local stations and as the Chairman said that under the present system they have lost their identity.

"I have tried to be as fair as I can with a majority of their opinions. Unfortunately I just do not agree with them. But, I think they are entitled to their opinions, and I think that they are sincere in them.

"Mr. Youngdahl. Then another thing that is somewhat troubling me, and I would like to be enlightened on it, is that the Chairman of the Commission testified that it was his opinion that just as many people as possible should hear these outstanding programs. I believe he mentioned Toscanini, and some others, some outstanding musical programs, and so forth.

"Well now, if the network rules were to be imposed, it seems to me that your listening audience would be reduced, because you are simply causing confusion in the field of competition, and the stations would be free to take any network program that they wanted to, and instead of planning, definitely planning on let us say 120 stations for a certain program where the advertiser would spend $50,000, that network might be cut down to 60 stations. Well, if that were the case, surely the advertiser would not spend that original $50,000 on those 60 stations, when he had planned to spend that amount on 120, and, therefore, the quality of your programs would be greatly affected.

"Commissioner Craven. I think I follow you, sir. It has been my opinion that generally speaking the aggregate of these rules is to curtail the value of this media as a forum for the dissemination of facts and opinions. I have felt that the general effect of the rules is to concentrate, since the sellers control and since the force of business controls, naturally, is to concentrate business programs into the best stations.

"Now naturally I guess that would be the fewer and the higher-powered stations or the stations in the best markets, regardless of their power, and I do not know that any advertiser is going to buy something if he can secure good coverage in the purchasing places or the places where the purchasing power is the best. He wants returns on his money.

"There may be some types of advertisers who would want to reach the entire population and desire to pay for a great many stations in order to afford service, but the general tendency, as I see it, particularly in times of economic depression or lack of sales such as we have now, would be to select certain stations.

"I had hoped—I do not know whether this is practical or not—that we could have, as I said before, four good networks, each endeavoring to sell all their stations as best they can to national advertisers and at least make such arrangements, looking at the thing as a whole, whereby they think in national terms rather than perhaps detailed market terms. I do not believe that the Commission, however, should try to force that. I do not know much about economic laws of the future, and I certainly do not know enough about them to know whether that can become practicable or not; but I certainly could give encouragement to any move of that sort on the part of the chains.

"Mr. Youngdahl. In the testimony, as I remember it, it has been stated that the broadcasting companies have spent considerable money on research programs and the building of programs that the public might enjoy, might be educated in, and of great value to the public.

"Now, in the event that unsound competitive conditions were created as a result of further regulation or particular regulation then, of course, it probably would mean that those sums of money would have to be reduced and less money spent by broadcasting systems along those lines.

"Commissioner Craven. That is true. However, if I were back in the broadcasting business, I would be thinking of the future and I would be tremendously interested in furnishing the new service. If I felt that arbitrary rules such as I believe some of the rules of the Commission to be, were going to affect my pocketbook, I would be very much discouraged in putting forward such expenditures.

"Mr. Youngdahl. It might be a matter of necessity, Mr. Craven, to cut down.

"Commissioner Craven. It might be."

"Mr. Hinshaw. When we begin to turn over to administrative agencies of government the powers to control the operation of business methods of these broadcasting companies as individuals and collectively as chain organizations, to the extent where such control can be exercised through the back doors to permit censorship, do you not think that we are endangering this whole system of freedom in this country?

"Commissioner Craven. That has been my whole background of thought. That is the underlying thought of every bit of testimony I have given here in my statement.

"Mr. Hinshaw. I notice on page 16 of your prepared statement, in the second paragraph, you state:

" 'I was and still am particularly interested in having the question of the Commission's power determined prior to changing the entire basis of the business structure of broadcasting. In this and many other instances I think the rendition of declaratory rulings would serve a useful purpose.'

"I wish you would enlarge upon that, if you will.

"Commissioner Craven. What I had in mind there, of course, is the recent interest with respect to the chain broadcasting regulations. I sincerely felt that the Commission does not have the power to make the type of rules that they did. I think they were invading a jurisdiction which was not ours; a jurisdiction which belonged to the Department of Justice and the courts, or else it belonged here in Congress. We should have made recommendations here to seek the power and do it in that way. However, we went ahead and got out a set of rules, notified the entire industry that these rules were going to be placed into effect, and I believe that broadcast licensees generally respect the Commission's power more than has been indicated, sometimes.

"They started to comply with this thing.

"Now, I felt that that was slightly unfair when there was legal doubt on the thing. I was perfectly willing to have my opinions tested and ruled upon by the courts and still am.

"However, I felt the better way of doing it was to declare, make a declaratory ruling, that we did have the power or that we did not have the power, and have the court rule on that fact. That would have settled the matter then and we would not have to worry so much about it. In the meantime, of course, we are getting court adjudication. It has already gone up to the Supreme Court and has not yet gotten down to the merits of the rules, or whether the Commission has the power.

"I think from the standpoint of speed and dispatch of justice that preparatory rulings would be better than the present procedure.

"Now, I am not a lawyer, and I may be wrong on it.

"Mr. Hinshaw. Well, it appears to me that lately the Commission has been pushing itself into fields that have not been heretofore thoroughly explored, to find out where the senses were, probably in order to find out where these limitations of law may lay and that the rules and regulations that have been published recently have been in the direction of finding out how far they could go without being stopped. That is a rather dangerous procedure, it seems to me.

"Commissioner Craven. I have felt that, on the Commission, since we feel and deal in the media of free speech primarily, that we ought, where there is doubt about our power, any reasonable doubt, we should come here and seek the power.

"Mr. Hinshaw. Naturally when the Congress first discusses a principle and writes it into a bill or an act, there is considerable doubt in the minds of Congress as to how far the extent of that law may lead, and it requires some experience in the administration of such a law to determine how far it should be carried. Consequently when we find that the law is being administered in such a fashion that people complain of the administration of it, it seems to me that it is the right time for the Congress to begin to set up the limitations that it perhaps should have set up in the first place, if it had known what those limitations should have been.

"Commissioner Craven. I think I stated in my prepared statement that I felt the present Communications Act of 1934 is excellent legislation and, of course, I feel that any law that is written, if it is poorly administered, of course, defeats its purpose. On the other hand, even a poor law can be administered sometimes by capable people and make the best situation.

"I feel that at the time the Congress wrote the Communications Act of 1934 we did not have the questions that are now before us. Had they been there, I have the feeling that the Congress would have limited and specified with greater particularity the Commission's powers and the rights of the licensees, the rights which they may have, and perhaps their responsibilities.

"Mr. Hinshaw. Has the Commission, to your knowledge, received any requests on the part of any licensee to intercede in protecting the licensee from the network to which it might belong?

"Commissioner Craven. I do not recall that, sir. I do not recall any one doing that. And, I presume that the nearest thing that comes to it is the activity of the Mutual Broadcasting System in trying to secure action by the Commission in respect to the chain broadcasting regulations. I think that is the nearest thing I know of. I do not know of any particular instance.

"Mr. Hinshaw. Do you know of any member of either of the three broadcasting systems that has called upon the Commission or any member of the Commission to intercede to protect them against the rules or regulations or contracts of the networks.

"Commissioner Craven. I do not know of any, sir. It may have happened, but I am not aware of it.

"Mr. Hinshaw. Complaint has been made before the committee, as you doubtless know, that in one set of cases where a radio station belonged to one network and was taking a program from another network, for a particular hour, on which the first network had options, that the first network could then come along and freeze off the program from that particular station and, therefore, by doing that depreciate the value of that program to the network which produced it as a whole, because there was not that additional income coming to that station. Do you care to comment on that subject?

"Commissioner Craven. I think in the first instance that we ought to be able to have time options and that they should be exercised within a reasonable time, less than 28 days, as I have suggested and that a chain could, so far as a commercial program is concerned, and ought not to have to give away to another commercial program when it has time options; but I do believe that the chain company should give way to a public service program in the event that the affiliate wants it. I do believe that it should give way if in the judgment of the affiliate, the particular commercial program offered is not in the public interest; but I do not see any objection to having firm business arrangements between the affiliate and the chain, as to option time.

"Mr. Hinshaw. In other words, if the members of X Chain sold time to Y Chain and was in on that particular broadcast that then the options to the X Chain should cease.

"Commissioner Craven. No, sir; I did not say that. I do not think I did. I hope I did not.

"What I did say is this: Suppose we have X Chain and X affiliate.

"Mr. Hinshaw. Yes.

"Commissioner Craven: I think that the X Chain and X affiliate ought to be able to make an arrangement in terms of specified hours for option time in which X Chain could be assured that they could sell certain time on that station with a reasonable expectation that they would be able to have the time when the option is finally exercised. Probably the option should be exercised before 28 days, to give the station liberty of action, in case the chain does not sell anything, to get something else.

"However, I think that the affiliate, if at a later time learns about the program and considers it not to be in the public interest, ought to have full power not to accept, without any penalty whatsoever.

"Secondly, I think that if the affiliate desires to substitute for that commercial program a public service program or program of outstanding national importance, he should be free to do so without any penalty.

"Mr. Hinshaw. I agree with that entirely.

"Now, I want to get at the point where X Chain and X station are together, but X station sells a certain time to Y chain, or agrees to produce a commercial program for Y Chain and then X Chain comes along and exercises its option on the time which has now been sold commercially to the Y Chain.

"Commissioner Craven. I do not think that the rules should prohibit X Chain from maintaining his option in so far as commercial programs are concerned on X affiliate, and I think that what X affiliate should do, if he wants to, is make specified hours available to Y chain and specified hours, so far as options are concerned, with X Chains and under these circumstances, so that he would not have that difficulty you speak of.

"Mr. Hinshaw. In other words, when he sells time to Y chain for a given commercial program, Y chain is under notice and the advertiser under Y Chain is under notice that this time is optioned to X Chain and he is liable to be removed from it, and consequently should make arrangements for some hour that is not optioned.

"Commissioner Craven. Yes, sir. I have no objection to any individual station under those circumstances if they so desire having certain hours optioned to X Chain and certain hours optioned to Y Chain, but I do not think we should prohibit a station from entering into an arrangement with only one, to have one chain take an option.

"Mr. Hinshaw. As I understand it—I do not remember the exact number—but I believe there are 25 cities in which there are three good stations, but not enough to go around among the four broadcasting systems, and it is the time of those 23 cities that is very largely under argument before this committee in the regulations that are presented and the testimony given.

"Now, do you think that in those 23 cities, arrangements can be made between the several broadcasting companies and the stations in those cities and that there can be equitable arrangements so that it is unnecessary to come in here and break down the entire broadcasting system?

"Commissioner Craven. I thought a long time ago, sir, but for unfortunate circumstances and the atmosphere concerning this whole matter it could have been settled, and that we could have gotten possibly some improvements.

"Mr. Hinshaw. In other words, that is, in these cities where we will say there are three broadcasting stations and four chains that want to broadcast, that there is no reason why the stations and the chains cannot so arrange their option time in those cities that it is unnecessary to break down the arrangement presently set up?

"Commissioner Craven. I think that can be done, sir. I admit that there is a feeling which has grown up now, I presume, that would make business relations more difficult than they used to be.

"Mr. Hinshaw. Have you any suggestion as to how that might be worked out?

"Commissioner Craven. Not now, sir, I have not.

"For example, in Cleveland, Ohio—I have recognized that as being a primary market—the fourth chain is at a disadvantage. I believe that the community could support a fourth independent outlet in which national advertisers would be interested, so that they could have a fair degree of competition. I see no reason why we should not add an additional outlet by the use of some ingenuity on the part of the Commission, as well as on the part of the various applicants. That same situation might apply to some of the other 23 cities, though I do not think at the particular moment where they are. As long as there are those primary markets in that condition, perhaps we could use some ingenuity in that respect.

"Now, where the engineering solution is not practical, I do not see any great difficulty personally in some of those 23 cities so arranging this matter where there is a sort of a comparable distribution, one network getting a break in one of the cities, and another network getting a break in another city. I think they could work it out.

"Mr. Hinshaw. In other words, it is a matter of getting together and using a little common sense.

"Commissioner Craven. That is what I think. I think by now the network companies have a little bit greater concept of public interest than they originally had.

"Mr. Hinshaw. Well, I hope that they will do that, and that the Commission will rescind its orders, certainly for the period of the war, so that the thing can be settled and settled amicably and we can go ahead with our business for whatever time it takes and then settle that question when we have more leisure.

Victory Programs

PLUGS RECRUITING WITH BASE BALL

Ed Allen, general manager, WIBA, Madison, Wis., comes up with a good recruiting angle on his popular evening sports show, six times weekly, 10:20-10:30, which may be used to advantage on certain other stations. With a big male listening audience, Army, Navy and Marine recruiting is station sponsored on alternate nights. A big male audience is assured by virtue of the fact that Madison is greatly interested in twilight ball.

Art Lentz, station sports commentator, handles all games over the park P. A. system. These are over at approximately ten o'clock or a little before. At 10:20 he is at the WIBA microphone with a complete résumé of the game that has just ended plus final big league and minor league scores. And recruiting gets its big play.

WHAM LOOKS AHEAD

Station WHAM, Schenectady, not only is doing a grand job in promoting the war effort, but also is looking ahead toward the peace.

William Fay, general manager, sends the following report:

Looking ahead toward post-war days, we are going to set aside, 7:30 to 8:00 P. M., EWT, on Tuesdays, beginning September 1, and weekly thereafter for the War Information Center of the University of Rochester and will produce a long series of discussions under the title, "The World Tomorrow." The purpose of the series is to focus public attention upon major post-war issues, which are already clearly indicated, and to point out that "The World Tomorrow" will be what we choose to make it. Both the University and WHAM hope to strengthen war morale and determination by encouraging America and the United Nations to keep in mind the kind of new world for which we are fighting.

It is expected that distinguished personages, familiar with post-war problems, will appear in these forums. President Alan Valentine, of the University of Rochester, will act as chairman for most of the programs, aided by Rochester professors and guest participants from other universities. Armin Bender, Director of the University's Office of Public Relations, and Charles Siverson, Program Director of WHAM, will be directly responsible for the series.

ON THE LOS ANGELES FRONT

Harrison Holliway, KFI-KECA, Los Angeles, reports that an offer of five hundred dollars in cash prizes to Boy Scouts and Girl Scouts Troops bringing in the greatest amount of scrap rubber is really producing results. At the moment the Alhambra California Troop Number 4 is leading the pack with 35,594 pounds.

KFI-KECA is buying as well as selling bonds too. Says Ernest Felix, Station Auditor:

First, we secured certain posters from the Treasury Department which we placed in all the hall-ways. At the same time we wrote a bulletin, explaining the payroll savings plan—"To All Employees"—and enclosed this bulletin in the pay check envelopes.

This resulted in some response; and then further results were obtained through the Personnel Department's direct contact with the employee. These contacts, of course, are strictly out of the "pressure" department.

We make it a point to secure new posters as they are released by the Treasury Department. And buttons are issued to the subscribers—which is one way of "advertising" among those who have not yet signed up.

Although not very many originally subscribe to the extent of 10%, we are finding that—after receiving their first bond—they are charged with so much enthusiasm and pride of ownership that they usually increase their payroll allotments.

We use the standard Payroll Allotment Authorization Cards (issued by the U. S. Government Printing Office) on which to keep our records, and find this method convenient and efficient. The form number is O-16-22610. We also make regular monthly reports to the Treasury Department on the progress we have made.

As a further inducement toward the purchase of bonds, we have arranged for sale of stamps at various points throughout the organization, including the reception desk. In this way, we are enabled to sell to the general public as well as to our employees.

WPAR'S BOND STUNT

Whether WPAR's idea for selling bonds would be a good one for your community would have to be checked with your local civilian defense officials. Anyway, it sold bonds in Parkersburg, West Virginia, and here it is:

In conjunction with the Presidential proclamation of Merchants for Victory, Parkersburg, W. Va. went all out in staging the largest parade ever held in this city.

With every unit of the Civilian Defense Organization represented the giant parade began to move at 11:00 AM headed by the Parkersburg Police and Mayor Earl Stevens, followed by the International Championship High School Band of Parkersburg High School.

WPAR, through its promotional department, arranged for every merchant to have a radio in his store, tuned to WPAR.

The streets were lined on both sides all through the business section of the city with men, women and children.

At precisely 12:00 o'clock the "air raid" warning whistles sent forth their wailing sounds. Immediately the "auxiliary police" took their stations, ordered everyone off the streets, and in less than ONE MINUTE the streets of the city were cleared. Everyone had entered the nearest store, where WAR BONDS AND STAMPS were placed on sale for the next fifteen minutes.

Merchants report a magnificent response in the sale of war stamps and many men were seen wearing boutenniers, the ladies wearing corsages of WAR STAMPS. Some were made with stamps of 10¢ denomination, others with 25¢, 50¢ and $1.00 denominations. Over $100,000 in War Bonds and Stamps were sold during the 12:00 to 12:15 period.

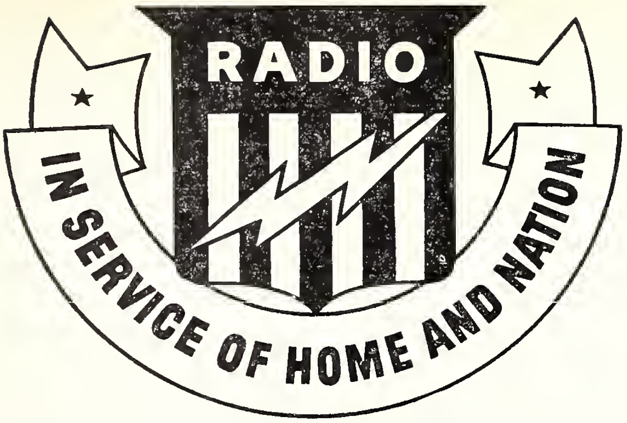
In addition to the reported sale of stamps, the defense officials headed by Major James P. Easley, liaison officer for West Virginia said the "ALERT" was perfect.

The parade preceding the alert was broadcast by WPAR as well as the ALERT at 12 o'clock, when the whistles sounded.

"Neighborhood Call," a fifteen-minute weekly radio series sponsored by the Office of Price Administration, and designed for the family circle, will start on July 10, at 7:30 P. M., EWT, on the RED Network.

With the narrator in the role of the friendly neighbor who drops in for a quiet talk with Dad and Junior and the "missus", their immediate problems under Rent Control, Price Control and rationing are discussed with the aid of occasional dramatic spots and homely analogy to bring home a point.

Scripts were written by Will McMorrow.



RADIO
IN SERVICE OF HOME AND NATION

The design for the radio shield created by WGAR-WJR and introduced at the Cleveland convention has been widely adopted throughout the industry.

John Patt, WGAR manager, reports that some 120 stations have indicated their adoption of this shield and are using it in various forms. For the information of stations we print herewith a replica of the shield. Any station desiring to use the shield on its stationery or any of its publicity is at liberty to do so.

The color scheme adopted in the original design was red, white and blue, but it may be gotten out in any combination of colors desired. If any station desires detailed information on the color scheme, we shall be glad to answer inquiries.

NEW GAS RATIONING

Radio men who *must* use a car in their work are given almost unlimited protection under the new gas rationing plan which becomes effective July 22.

Anyone who uses his car to go to and from work; who makes an effort to share his car with others; and who cannot show that other suitable transportation is available can get a B card (up to 470 gallons a month according to need).

If that isn't enough, additional gas can be obtained, according to need:

"1394.506 (k) By a worker (including an executive, technician or office worker, but not including salesmen) or by an employer, employer's representative or representative of a labor organization in travel to, from, within or between the establishments or facilities listed below, for purposes necessary to the operation or functioning of such establishments or facilities or to the maintenance of peaceful industrial relations therein:

"(2) Establishments or facilities of common carriers; or of other carriers performing services essential to the community or to the war effort; or of plants engaged in the production or distribution of heat, light, power, gas, steam or water; or of irrigation, drainage, flood control, or sanitation systems; or of telephone, telegraph, RADIO or other communications systems.

"(1) By engineers, architects, technicians, supervisors, repair and maintenance men or other workers (but not including salesmen) to enable them to render services or transport materials and equipment necessary for construction, repair, installation or maintenance work (other than repair or maintenance of portable household appliances); or for rendering indispensable services of a specialized nature to agricultural, extractive or industrial establishments."

These regulations can be found in full in the Federal Register of July 9, 1942. The above sections, however, should take care of radio's needs.

Needless to say, the NAB has been actively interested in this matter.

NAB BOARD TO MEET

The NAB Board of Directors will hold its regular summer meeting at the Palmer House in Chicago on Tuesday and Wednesday, July 14 and 15. Full attendance of the Board is indicated and the agenda embraces problems of vital and immediate concern to the industry.

BILL WITHDRAWN

Louisiana House Bill 657, proposing a tax on performing rights organizations and others who receive money for performing rights, was withdrawn last Tuesday.

NEW SCHENECTADY STATION

WSNY, Schenectady, N. Y., expects to begin broadcasting on July 15, according to word from George R. Nelson, general manager. Program Manager is Edward Flynn.

ALABAMA

Estimated Radio Homes, 1940

Number of Occupied Dwelling Units as reported by U. S. Bureau of the Census in advance release, Series H-7. Percent radio-equipped calculated from Series H-7 Bulletin following the Census Bureau practice. Number of radio units, or radio homes, estimated by applying percent ownership to those units not answering radio question and adding such to those reporting radio.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, July 13. They are subject to change.

Monday, July 13

WAAT—Bremer Broadcasting Corp., Jersey City, N. J.—Modification of license to move studio to Newark, N. J.; 970 kc., 1 KW, unlimited, DA-night.

Tuesday, July 14

Further Hearing

NEW—South Florida Broadcasting, Inc., Miami, Fla.—C. P., **1450 kc.**, 250 watts, unlimited.

Wednesday, July 15

NEW—Herman Radner, Dearborn, Mich.—C. P., **680 kc.**, 250 watts, daytime.

Further Hearing

NEW—Camden Broadcasting Co., Camden, N. J.—C. P., **800 kc.**, 500 watts, daytime.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

Birney Imes and Robin Weaver, d/b as Imes-Weaver Broadcasting Co., Murfreesboro, Tenn.—Granted petition insofar as it requests dismissal without prejudice of its application for construction permit for a new station, and denied said petition in all other respects (B3-P-3215).

Southwestern Michigan Broadcasting Corp., Kalamazoo, Mich.—Granted petition to dismiss without prejudice its application for construction permit for new station (B3-P-3188).

WEBR—Edward H. Butler and Marjorie Mitchell Baird, individually; and Edward H. Butler as Trustee under the last will and testament of Edward H. Butler, deceased, doing business as Buffalo Evening News (Transferors); Paul E. Fitzpatrick and Buffalo Courier-Express, Inc. (Transferees): WEBR, Inc. (Licensee), Buffalo, N. Y.—Granted consent to transfer control of WEBR, Inc., licensee of station WEBR, Buffalo, N. Y., from Buffalo Evening News to Paul E. Fitzpatrick and Buffalo Courier Express, Inc. (B1-TC-305).

KXA—American Radio Telephone Co., Seattle, Wash.—Granted construction permit (B5-P-3272) to move transmitter locally and install new antenna, subject to applicant's filing application and provide for operation of the station at a site which meets the standards of Good Engineering Practice when conditions make it feasible to obtain necessary materials.

WDGY—George W. Young, Minneapolis, Minn.—Granted modification of license to provide for unlimited time operation with power of 250 watts night, 5 KW LS, conditions.

W71SB—South Bend Tribune, South Bend, Ind.—Granted modification of construction permit (B4-MPH-99) extending completion date for period of 6 months from June 25.

W75NY—Metropolitan Television, Inc., New York City.—Granted modification of construction permit (B1-MPH-106) for extension of completion date to December 30, 1942.

DESIGNATED FOR HEARING

KHQ—Louis Wasmer, Inc., Spokane, Wash.—Designated for hearing application for increase of day power to 10 KW (B5-P-3377).

KXO—Valradio, Inc., El Centro, Cal.—Designated for hearing modification of license (B5-ML-1128) to change frequency from **1490 kc.** to **1230 kc.**

WCOP—Massachusetts Broadcasting Corp., Boston, Mass.—Designated for hearing construction permit (B1-P-3479) to increase power to 1 KW day and night and make changes in directional antenna system.

WGKV—Kanawha Valley Broadcasting Co., Charleston, W. Va.—Designated for hearing construction permit (B2-P-3427) to increase power to 250 watts and make changes in equipment.

WORK—York Broadcasting Co., York, Pa.—Designated for hearing modification (B2-MP-1560) of construction permit (B2-P-3205) to authorize installation of a new transmitter.

WHEB—R. G. LeTourneau (Transferor), The LeTourneau Foundation (Transferee); WHEB, Inc. (Licensee), Portsmouth, N. H.—Designated for hearing application (B1-TC-301) for consent to transfer control of WHEB, Inc., from R. G. LeTourneau to The LeTourneau Foundation.

W55NY—W. G. H. Finch, New York City.—Designated for hearing application (B1-MPH-104) for new FM station.

WCAU Broadcasting Co., Philadelphia, Pa.—Designated for hearing construction permit (B2-PCT-13) for new television (commercial) station to operate on Channel No. 5, **84000-90000 kc.**, ESR 1128.

W79C—Oak Park Realty and Amusement Co., Chicago, Ill.—Designated for hearing application (B4-MPH-97) for modification of construction permit to extend completion date of new FM station to December 28, 1942.

LICENSE RENEWALS

WSGN—The Birmingham News Co., Birmingham, Ala.—Granted renewal of license for the period ending June 1, 1944 (B3-R-420).

WHBI—May Radio Broadcast Corp., Newark, N. J.—Granted renewal of license for the period ending October 1, 1942 (B1-R-178).

WSPR—WSPR, Inc., Springfield, Mass.—Granted renewal of license for the period ending October 1, 1942 (B1-R-886).

WSAI—The Crosley Corp., Cincinnati, Ohio.—Granted renewal of license for the period August 1, 1942, to October 1, 1944 (B2-R-297).

The following stations were granted renewal of licenses for the period ending August 1, 1944:

WHA, Madison, Wis.; WGBG, south edge of Greensboro, N. C.; WMMN, Fairmont, W. Va.; WORL and auxiliary, Boston; WPEN and auxiliary, Philadelphia, Pa.; WSPA, Spartanburg, S. C.; WWJ and auxiliary, Detroit, Mich.

The following stations were granted renewal of licenses for the period August 1 to December 1, 1942:

WHEC, Rochester, N. Y.; WKBH, LaCrosse, Wis.; WMBD, Peoria, Ill.; WMPS, Memphis, Tenn.; WROK, Rockford, Ill.; WSFA, Montgomery, Ala.

MISCELLANEOUS

KTRH—KTRH Broadcasting Co., Houston, Tex.—Granted modification of construction permit as modified, which authorized installation of new transmitter and directional antenna for day and night use, increase in power, change in frequency, and move of transmitter, for extension of completion date from July 10 to September 10, 1942 (B3-MP-1591).

KTKC—Tulare-Kings Counties Radio Associates, Visalia, Calif.—Granted license to cover construction permit as modified, to change frequency, increase power, install new transmitter and make changes in directional antenna for day and night use, and move transmitter (B5-L-1674). Granted authority to determine operating power by direct measurement of antenna power (B5-Z-1407).

WDOD—WDOD Broadcasting Corp., Chattanooga, Tenn.—Granted license to cover construction permit as modified for move of transmitter, increase in night power, and install directional antenna for night use (B3-L-1675). Granted authority to determine operating power by direct measurement of antenna power (B3-Z-1410).

WKAQ—Radio Corp. of Porto Rico, San Juan, Puerto Rico.—Granted construction permit to move auxiliary transmitter to new location of main transmitter and use for emergency purposes only (B-P-3501).

KSAM—W. J. Harpole and J. C. Rothwell, d/b as Radio Station KSAM, Huntsville, Tex.—Granted modification of license for move of studio to site of transmitter at Walker County Fair Ground (B3-ML-1124).

WKY—WKY Radiophone Co., Oklahoma City, Okla.—Granted modification of construction permit as modified for installation of directional antenna for night use, move transmitter and increase power, for extension of completion date from July 20, 1942, to January 20, 1943.

WFBC—Greenville News-Piedmont Co., Greenville, S. C.—Granted license to cover construction permit to install directional antenna for night use and increase power (B3-L-1678); granted authority to determine operating power by direct measurement of antenna power (B3-Z-1414).

WIND—Johnson-Kennedy Radio Corp., Gary, Ind.—Granted authority to determine operating power by direct measurement of antenna input (B4-Z-1378).

WIS—Surety Life Insurance Co., Columbia, S. C.—Granted modification of construction permit (B3-P-2870, as modified, authorizing changes in directional antenna for night use and increase in power) for extension of completion date from June 25 to September 25, 1942 (B3-MP-1594).

KVOD—Colorado Radio Corp., Denver, Colo.—Granted license to cover construction permit for increase in power, install new transmitter and changes in directional antenna (B5-L-1676); granted authority to determine operating power by direct measurement of antenna power (B5-Z-1411).

KGER—Consolidated Broadcasting Corp., Ltd., Long Beach, Cal.—Granted modification of construction permit, as modified, which authorized new equipment, increase in power, installation of directional antenna for night use, and move of transmitter, for extension of completion date from July 12 to October 12, 1942 (B5-MP-1588).

KHSL—Golden Empire Broadcasting Co., Chico, Calif.—Granted modification of construction permit as modified, for installation of directional antenna day and night and increase power, for extension of completion date from July 16 to August 16, 1942 (B5-MP-1590).

KICD—Iowa Great Lakes Broadcasting Co., Spencer, Iowa.—Granted modification of construction permit which authorized a new station, for change in type of transmitter (B4-MP-1579).

KMPC—KMPC, The Station of the Stars, Inc., Beverly Hills, Calif.—Granted modification of construction permit, as modified, which authorized increase in power, move of transmitter, install new transmitter and directional antenna for day and night use, for extension of completion date from July 2 to August 2, 1942 (B5-MP-1592).

WLBZ—Maine Broadcasting Co., Inc., Bangor, Maine.—Granted modification of construction permit, as modified, which authorized increase in power, installation of new equipment and directional antenna for day and night use, for extension of completion date from June 11, 1942, to December 11, 1942 (B1-MP-1554).

W9XJC—The Journal Co. (The Milwaukee Journal), Milwaukee, Wis.—Granted modification of construction permit, which authorized new ST broadcast station, for extension of commencement and completion dates from December 14, 1941, and June 14, 1942, to December 14, 1942, and June 14, 1943, respectively (B4-MPST-7).

WLW—The Crosley Corp., Cincinnati, Ohio.—Denied petition to grant application for increase in power, and designated said application for hearing (B2-P-3226).

KDYL—Intermountain Broadcasting Corp., Salt Lake City, Utah.—Denied petition to grant application for change in power and frequency, and designated said application for hearing (B5-P-3303).

KSUB—Southern Utah Broadcasting Co., Cedar City, Utah.—Denied petition to grant application for increase in power, and designated said application for hearing (B5-P-3477).

Peter Q. Nyce, Alexandria, Va.—Denied petition "to preserve status quo of application and for other relief" in re application for construction permit for new station, and designated said application for hearing (B2-P-3172).

J. Marion West, Wesley W. West, and P. M. Stevenson, Houston, Tex.—Denied petition requesting that no action be taken upon application for construction permit for new station pending determination of the issues as set forth in Order No. 79; designated said application for hearing (B3-P-2854).

Lexington Broadcasting Co., Lexington, N. C.—Denied petition to grant application for construction permit for new station, and designated said application for hearing (B3-P-3122).

John D. Ewing, New Orleans, La.—Denied petition to grant application for construction permit for new station, and designated said application for hearing (B3-P-3373).

H. Ross Perkins & J. Eric Williams, d/b as The New Haven Broadcasters, New Haven, Conn.—Denied petition to grant application for construction permit for new station, and designated said application for hearing (B1-P-3216).

Hugh Francis McKee, Portland, Ore.—Denied petition to grant application for construction permit for new station, and designated said application for hearing (B5-P-3225).

Fort Smith Newspaper Publishing Co., Fort Smith, Ark.—Denied petition to consider and grant forthwith application for construction permit for new station, and designated said application for hearing (B3-P-3117).

Capital City Broadcasting Co., Inc., Topeka, Kans.—Denied petition to consider and grant forthwith application for construction permit for new station, and designated said application for hearing (B4-P-3059).

KOAM—Pittsburg Broadcasting Co., Inc., Pittsburg, Kans.—Denied petition to grant application for change in power and frequency, and designated said application for hearing (B4-P-3198).

KCMO—KCMO Broadcasting Co., Kansas City, Mo.—Denied petition and supplemental petition to grant application for change in power and frequency, and designated said application for hearing (B4-P-3389).

WHAS—Courier-Journal and Louisville Times Co., Louisville, Ky.—Denied petition for consideration of application for increase in power, and designated said application for hearing (B2-P-3350).

WHEB—WHEB, Inc., Portsmouth, N. H.—Denied petition to grant application for an increase in power with hours of operation limited to daytime, and designated said application for hearing (B1-P-3448).

WIOD—Isle of Dreams Broadcasting Corp., Miami, Fla.—Denied petition to grant application for increase in daytime power, and designated said application for hearing (B3-P-3463).

KALB—Alexandria Broadcasting Co., Alexandria, La.—Denied petition for partial grant of application (B3-P-3062, Docket No. 6130) to authorize change in frequency from **1240 kc.** to **580 kc.** with present power of 250 watts. Hearing scheduled for July 8, 1942.

WIBC—Indiana Broadcasting Corp., Indianapolis, Ind.—Denied petition for reconsideration and grant of application for authority to operate during nighttime hours with power of 5 KW, and amended issues (Docket No. 6267).

WBOC—Peninsula Broadcasting Co., Salisbury, Md.—Denied petition to reconsider and grant application to change frequency to **960 kc.**, with power of 1 KW, to make changes in equipment and to install a directional antenna for use during nighttime hours, and set forth the issues upon which the application will be heard (Docket No. 6302).

Associated Broadcasters, Inc., Indianapolis, Ind.—Denied petition to reconsider and grant application for new station, and set forth the issues upon which the application is to be heard (Docket No. 6288).

Herald Publishing Co., and Dorman Schaeffer, both of Klamath Falls, Ore.—Denied petitions filed pursuant to the Commission's Memorandum Opinion of April 27, 1942, in re applications for new stations, and set forth additional issues upon which the applications are to be heard at further hearing (Dockets 6090 and 6091).

Barclay Craighead and Hennessy Broadcasting Co., both of Butte, Mont.—Denied petitions to reconsider and grant applications for new stations, and designated issues for further hearing on the applications (Docket Nos. 6132 and 6131).

Herman Radner, Detroit, Mich.—Denied petition filed pursuant to Commission's Memorandum Opinion of April 27, 1942, for reconsideration and grant without hearing application for new station (Docket No. 6220).

KFRC—Don Lee Broadcasting System, Inc., San Francisco, Cal.—Denied petition for rehearing directed against the action of the Commission April 8, 1942, granting in part the application of Midnight Sun Broadcasting Co. (KFAR), Fairbanks, Alaska, authorizing increase in power to 5 KW.

KDNT—Harwell V. Shepard, Denton, Texas.—Denied petition for grant of application (B3-P-3345) for permit to increase power from 100 to 250 watts, and supplemental petition requesting that grant of application be expedited, and designated said application for hearing.

WNOE—WNOE, Inc., New Orleans, La.—Denied petition to grant application for change in power and frequency, and designated said application for hearing.

WRLC—R. G. LeTourneau, Taccoa, Ga.—Denied petition for grant of application for change in power, frequency, and hours of operation, and designated said application for hearing. (B3-P-3451)

WMBR—Florida Broadcasting Co., Jacksonville, Fla.—Denied petition to grant application for change in power and frequency, and designated said application for hearing. B3-P-3036)

WFCI—Pawtucket Broadcasting Co., Pawtucket, R. I.—Denied petition to grant application for increase in power, and designated said application for hearing. (B1-P-3458)

The Constitution Broadcasting Co., Atlanta, Ga.—Entered order dismissing application (Docket 6075) for new station to use **550 kc.**, 1 KW night, 5 KW LS, unlimited time.

WOWO—Westinghouse Radio Stations, Inc., Ft. Wayne, Ind.—Entered order dismissing application for construction permit (Docket 6154); **1190 kc.**, 50 KW, unlimited.

Hughes Productions (Division of Hughes Tool Co.), San Francisco, Cal.—Denied petition to grant application (B5-PCT-18) to convert outstanding construction permit into commercial television station, and designated application for hearing.

Hughes Productions (Division of Hughes Tool Co.), Los Angeles, Cal.—Denied petition to grant application (B5-PCT-17) to convert outstanding construction permit into commercial television station, and designated application for hearing.

WOKO, Inc., Albany, N. Y.—Denied petition to retain application (B1-PH-80) for new FM station in the pending files rather than dismiss in accordance with Memorandum Opinion of April 27, 1942; and designated said application for hearing.

La Crosse Tribune Co., La Crosse, Wisc.—Denied petition for consideration of application (B4-PH-115) for new FM station under Memorandum Opinion of April 27, and designated application for hearing.

KFXD—Frank E. Hurt, Nampa, Idaho.—Denied Special Service Authorization (B5-SSA-29) for operation on **1030 kc.**, 250 watts, unlimited time, for the period ending October 1, 1942.

APPLICATIONS FILED AT FCC

550 Kilocycles

KOAC—Oregon State Agricultural College, Corvallis, Oregon—License to cover construction permit (B5-P-2422 as modified) for installation of new transmitter, directional antenna for day and night use, increase in power and move transmitter.

KOAC—Oregon State Agricultural College, Corvallis, Oregon—Authority to determine operating power by direct method.

570 Kilocycles

KUTA—Jack Powers, David G. Smith, Frank C. Carman and Grant R. Wrathall, d/b as Utah Broadcasting Co., Salt Lake City, Utah—License to cover construction permit (B5-P-2342 as modified) for installation of new transmitter, directional antenna for day and night use, increase in power and move transmitter.

KUTA—Jack Powers, David G. Smith, Frank C. Carman and Grant R. Wrathall, d/b as Utah Broadcasting Co., Salt Lake City, Utah—Authority to determine operating power by direct method.

620 Kilocycles

KTAR—KTAR Broadcasting Co., Phoenix, Ariz.—License to use formerly licensed Western Electric transmitter as an auxiliary with 1 KW power.

850 Kilocycles

WJW—WJW, Inc., Akron, Ohio—Modification of construction permit (B2-P-3263 as modified) which authorized new transmitter, change frequency, increase power, install directional antenna and move transmitter requesting change in type of transmitter and extension of commencement and completion dates.

860 Kilocycles

KTRB—KTRB Broadcasting Co., Inc., Modesto, Calif.—Modification of construction permit (B5-P-2631 as modified) which authorized increase in power, change in hours of operation, install new transmitter, directional antenna for night use and move transmitter requesting extension of completion date from 8-30-42 to 11-30-42.

1030 Kilocycles

KOB—Albuquerque Broadcasting Co., Albuquerque, N. Mex.—Modification of construction permit (B5-P-2783 as modified) which authorized new equipment and increase in power, requesting extension of completion date from 8-1-42 to 10-1-42.

1170 Kilocycles

KUOO—Southwestern Sales Corp., Tulsa, Okla.—Modification of construction permit (B3-P-2539) which authorized increase in power, change hours of operation, install new transmitter and directional antenna for night use requesting changes in directional antenna and extension of commencement and completion dates.

1220 Kilocycles

WGNY—WGNY Broadcasting Co., Inc., Newburgh, N. Y.—Special Service Authorization to operate unlimited time on **1220 kc.**, using 1 KW day and night for period ending 4-1-44.

1230 Kilocycles

WESX—North Shore Broadcasting Co., Salem, Mass.—Modification of license to move main studio from Salem, Mass., to Naugus Ave., Marblehead, Mass.

1330 Kilocycles

WEVD—Debs Memorial Radio Fund, Inc., New York, N. Y.—License to cover construction permit (B1-P-3481) for move of former main transmitter for use as auxiliary employing directional antenna, 1 KW power.

1400 Kilocycles

WBNY—Roy L. Albertson, Buffalo, N. Y.—Modification of license to change frequency from **1400 kc.** to **680 kc.**

1430 Kilocycles

KARM—KARM, The George Harm Station, Fresno, Calif.—Special Service Authorization to change frequency from **1430 kc.** to **1030 kc.**, employing directional antenna.

1480 Kilocycles

KIEM—Redwood Broadcasting Co., Inc., Eureka, Calif.—Special Service Authorization to operate with power of 1 KW on **1480 kc.**, unlimited time.

1490 Kilocycles

WERC—Presque Isle Broadcasting Co., Erie, Pa.—Modification of license to change frequency from **1490 kc.** to **1330 kc.**, and change power from 250 watts to 100 watts night and 250 watts daytime.

1590 Kilocycles

WALB—Herald Publishing Co., Albany, Ga.—Voluntary assignment of license to Albany Herald Broadcasting Company.

FM APPLICATION

W49BN—Wylie B. Jones Advertising Agency, Binghamton, N. Y.—Modification of construction permit (B1-PH-10, as modified), which authorized construction of new high frequency broadcast station requesting change in type of transmitter, changes in antenna system and extension of completion date from 7-13-42 to 60 days after date of grant.

MISCELLANEOUS APPLICATIONS

NEW—National Broadcasting Co., Inc., Portable or Portable-Mobile, area of Chicago, Ill.—Construction permit for a new relay broadcast station to be operated on **1606, 2074, 2102** and **2758 kc.**, 25 watts power, A1, A2, A3 Emission.

NEW—National Broadcasting Co., Inc., Portable, area of Los Angeles, Cal.—Construction permit for new relay broadcast station to be operated on **1606, 2074, 2102, 2758 kc.**, 500 watts power, A3 Emission. To be used with KPO.

KEGA—Earle C. Anthony, Inc., Mobile, area of Los Angeles, Cal.—License to cover construction permit for relay broadcast station which authorized changes in equipment and increase in power.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Johnson Smith & Company—Alleging misrepresentation in the sale of watches advertised as "Railroad Type Watches," a complaint has been issued against Alfred Johnson Smith, Paul Smith and Arthur Smith, trading as Johnson Smith & Co., 6615 East Jefferson Ave., Detroit. (4778)

Gold-Tone Studios, Inc., also trading as Camera Art Co.; Irving A. Stern, Paul A. McGuire, Berthold Eidlin, as officials of both companies and Marion Stern, Doris McGuire, Emanuel Eidlin and Ephraim Eidlin, as officials of Camera Art Co., all of Rochester, N. Y., are charged in a complaint with misrepresentation in the sale of tinted or colored photographs or pictures designated "Gold-Tone Oil Colored Portrait," and the frames therefor. (4779)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Besol, Inc., 5713 Euclid Ave., Cleveland, has entered into a stipulation to cease certain representations in the sale of a medicinal preparation designated "Besol," recommended for the treatment of paroxysms of asthma. (03018)

Freydberg Bros., Inc., Stamford, Conn., manufacturer of blanket binding ribbon, stipulated that it will cease advertising, branding, labeling or selling any blanket binding ribbons having cut edges unless full and nondeceptive disclosure of the process of manufacture is made. According to the stipulation, the respondent caused certain blanket binding ribbons, manufactured by the cut-edge process whereby the edges are cut and not woven, to be enclosed in wrappers bearing labels or brands which failed to reveal that the ribbons had cut edges, and also invoiced such merchandise without disclosing the use of the cut-edge process. (3502)

Luxe Manufacturing Co., 147 Manhattan Ave., Brooklyn, N. Y., stipulated to cease representing that a hair rinse designated "Superglo Henna Rinse" is not a dye and that it imparts a natural shade to hair. (03017)

Poirier & Lindeman Co., and Beacon Cut Products Corp., 373 Fourth Ave., New York, stipulated that in the sale of blanket binding ribbon they will cease advertising, branding and labeling ribbon having cut edges unless full and non-deceptive disclosure of the manufacturing process is made by use of a generally understood descriptive term such as "Cut-Edge Blanket Binding." (3503)

Swiss Pine Importing Co., Inc., 611 Broadway, New York, seller of a hair dye preparation designated "Naturene," stipulated to cease certain representations in the sale of its product. (03019)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

David Chalmers Tobacco Co., 724 Main St., Kansas City, Mo., has been ordered to cease and desist from the use of lottery methods in the sale of smoking pipes or other merchandise. (4746)

Champion Specialty Co., 814 Central St., Kansas City, Mo., dealer in drug sundries, notions, novelties and premium merchandise, has been ordered to cease selling or otherwise disposing of any merchandise by means of a game of chance or lottery scheme. (4723)

James A. Reiss Co., Inc., 417 Decatur St., New Orleans, has been ordered to cease and desist from the use of lottery methods in the sale of candy. (4502)

The National Association of Broadcasters
Reports

1626 K STREET, N. W. WASHINGTON, D. C. Vol. 10, No. 28, July 17, 1942

NAB BOARD MEETS

With a 100 per cent attendance the Board of Directors of the National Association of Broadcasters concluded a two-day meeting in Chicago on Wednesday.

A report on membership shows that there are now 514 stations and allied industries affiliated with NAB in addition to which there is one network membership,—that of the Columbia Broadcasting System. No definite word regarding membership has been received from NBC or the Blue.

Vincent Callahan, representing Secretary of the Treasury Henry Morgenthau, outlined the project to have stations act as issuing agents for Treasury War Bonds. The Board pledged 100 per cent cooperation and a War Bulletin (No. 12), outlining various plans is being mailed to all Stations today.

To fill the vacancies occasioned by the resignations of Earl Gammons and Howard Lane the Board elected Ed. Hayek, KATE, and Art Westlund, KRE, respectively.

The report of the "Streamline Committee" was received and the committee was discharged with a vote of thanks. A resolution expressing confidence in President Neville Miller and pledging continued wholehearted support was unanimously adopted.

A project, recommended by the Research Committee, for the publication of complete market data, based upon the 1940 census figures, was approved. This publication will be forthcoming in the near future.

Sydney Kaye reported on BMI and a general discussion of the music situation was had. The AFM situation was discussed and the following statement issued:

"Mr. James C. Petrillo, president of the American Federation of Musicians, has instructed all musicians who are members of his union to stop making phonograph records and other types of recordings after July 31. Mr. Petrillo's order will affect all Americans who listen to music, and it will have a very serious effect upon the broadcasting industry. The broadcasting industry does not employ musicians to make records, and the musicians it employs are engaged on union terms.

"As the result of a series of great inventions, Americans, wherever they live, have become accustomed to the best in entertainment. The radio, the moving picture and the phonograph bring the great artists to the smallest village as well as to our large centers of population. Mr. Petrillo's order amounts to a statement that only those people who live in large cities, and who can afford to see the great artists in person, are entitled to enjoy their performances.

"Hundreds of broadcasting stations are located far from the centers of population at which an ample supply of the best in musical talent is available. Even if these stations could afford to hire more musicians than they now do, the limited amount of talent which would be available to them could not compete for public favor with the great popular and classical orchestras. If Mr. Petrillo can make his order effective, hundreds of broadcasting stations, which are necessary in the public interest and for the national defense, will have their usefulness to the public greatly curtailed.

"Mr. Petrillo is mistaken if he thinks that his order will bring more employment to musicians. All that it means is that millions of people will hear less music. Even if Mr. Petrillo's theory were correct, his order, at this time, would be not only arbitrary and illegal, but unpatriotic. Music plays a vital part in war morale. This is no time to destroy the phonograph record and the electrical transcription which bring the best in music to the people of the

(Continued on page 436)

"BROADCASTING ESSENTIAL"—GENERAL HERSHEY

"Radio broadcasting" is included in the list of 34 broad essential activities which National Selective Service Headquarters has distributed to local boards for their guidance when considering individual registrants for deferment on occupational grounds (Class II-A, II-B, and III-B).

Radio broadcasting appears under the general classification "Communication Services: Telephone, telegraph, newspapers, *radio broadcasting, and television services and the repair of facilities."*

The list includes under broad activity classifications "the products, facilities, and services considered necessary to war production and essential to the support of the war effort", but in no way alters the statutory ban on group deferments.

The list specifies that such activities must meet one or more of the following tests:

(a) That the business is fulfilling a contract of the Army, Navy, Maritime Commission, or other Governmental agencies engaged directly in war production;

(b) that the business is performing a Governmental service directly concerned with promoting or facilitating war production;

(c) that the business is performing a service, Governmental or private, directly concerned with providing food, clothing, shelter, health, safety, or other requisites of the civilian daily life in support of the war effort;

(d) that the business is supplying material under subcontracts for contracts included in (a), (b), or (c), above; or,

(e) that the business is producing raw materials, manufacturing materials, supplies, or equiment, or performing services necessary for the fulfillment of contracts included in (a), (b), (c), or (d) above.

Radio broadcasting would come under (c) above, Selective Service officials stated, as a "requisite of the civilian daily life in support of the war effort."

Having found that the business in which a registrant is engaged comes under some group in the list, and having applied the tests and made the determination that it is an essential activity, consideration will be given to the occupation of the registrant, within that activity, and if he is found to be a "necessary man" as defined by Selective Service Regulations, and difficult or impossible to replace, occupational classification may be made by the local board.

With regard to protection of family relationships and dependents, National Headquarters issued amendments to its Regulations and a memorandum supplementing recently outlined broad policies for induction of single men with dependents and married men who maintain bona fide family relationships in their homes with wives, children, or both.

Broadly, the amendments and memorandum break down Class III-A and Class III-B (the first for the registrant with dependents who does not contribute to the war effort, and the second for the registrant with dependents who does contribute to the war effort) so that when selecting men for induction the local boards may give consideration to both their dependency status and activity in war work. Many "necessary men" in broadcasting now

"BROADCASTING ESSENTIAL"—GENERAL HERSHEY

(Continued from page 435)

in Class III-A will presumably be reclassified in Class III-B under the new set-up.

Deferment Procedure

As pointed out by Major Ernest M. Culligan, Director of Information, Selective Service System, at the Selective Service Breakfast at the Cleveland Convention, it is the patriotic duty of station operators to file Form 42-A with the local board of any man they consider necessary. Form 42-A should be filed when the registrant files his questionnaire, or as soon as possible thereafter. Form 42-A is basic to the local board's determination that he is *in fact* a "necessary man." This should also be done in the case of any necessary men who are now classified in Class III-A in order to enable local boards to reclassify them in Class III-B.

If men you believe to be "necessary men," and as to whom you have filed Form 42-A with their local boards, are not classified as II-A, II-B, or III-B, you should appeal the classification to the Board of Appeals. You have ten days in which to take an appeal from the date of the notice of the registrant's classification. It is desirable that you simultaneously notify the State Occupational Adviser, through the State Director of Selective Service in your State capital, that you have appealed the classification in question. Station operators, on the other side of the picture should make every effort to replace able-bodied men with others not subject to military service.

Be sure to keep informed of the draft status of your employees. Contact your local boards and help them to understand the complexities of your business and its part in the war effort.

A "necessary man" is defined by the Regulations as follows:

"622.24. 'Necessary man' defined. A registrant shall be considered a 'necessary man' in industry, business, employment, agricultural pursuit, governmental service, or in any other service or endeavor, including training or preparation therefor, only when all of these conditions exist: (1) He is, or but for a seasonal or temporary interruption would be, engaged in such activity; (2) he cannot be replaced because of a shortage of persons with his qualifications or skill in such activity; and (3) his removal would cause a serious loss of effectiveness in such activity."

We print for your information the Regulations governing classification of registrants deferred by reason of occupation:

"622.21. Class II-A: Man necessary in his civilian activity. (a) In Class II-A shall be placed any registrant found to be a 'necessary man' in any industry, business, employment, agricultural pursuit, governmental service, or any other service or endeavor, or in training or preparation therefor, the maintenance of which is essential to the national health, safety, or interest.

"(b) Class II-A deferments shall be for the period of 6 months or less as may be deemed necessary to secure or train a replacement for the registrant. If there is a change in the registrant's status during the period of his deferment in Class II-A, his classification shall be reopened and considered anew. At the expiration of the period of the registrant's deferment in Class II-A, his classification shall be reopened, and he shall be classified anew. When the registrant is classified anew, he shall not be again placed in Class II-A unless such classification is warranted, and in addition, the registrant or the registrant's employer convinces the local board, or the board of appeal (if an appeal is taken), or the President (if an appeal is permitted and is taken) that a reasonable but unsuccessful effort has been made during the period of deferment to secure or to train a replacement. If these conditions are met and the registrant is again placed in Class II-A, such further deferment shall be for the period of 6 months or less as may be deemed necessary to secure or train a replacement. The same rule shall be applied when again classifying such a registrant at the end of each successive period for which he has been classified in Class II-A.

"622.22. Class II-B: Man necessary to the war production program. (a) In Class II-B shall be placed any registrant found to be a 'necessary man' in any industry, business, employment, agricultural pursuit, governmental service, or in any other service or endeavor, or in training or preparation therefor, the maintenance of which is necessary to the war production program.

"(b) Class II-B deferments shall be for a period of 6 months or less. If there is a change in the registrant's status during the period of deferment in Class II-B, his classification shall be reopened and considered anew. At the expiration of the period of the registrant's deferment in Class II-B, his classification shall be reopened, and he shall be classified anew. In again classifying the registrant, care should be taken not to impede the war production program. The registrant should be again classified in Class II-B for a period of 6 months or less if such classification is warranted and if the registrant's employer has made a reasonable but unsuccessful effort to secure or train a replacement for the registrant during the period of deferment. The same rule shall be applied when again classifying such a registrant at the end of each successive period for which he has been classified in Class II-B.

"622.23. General rules for classification in Class II-A and Class II-B. (a) On the local board is placed the primary responsibility of deciding which men should be deferred because of their civilian activities. It is in the national interest and of paramount importance to our national defense that civilian activities which are directly contributing to the war effort or which are otherwise essential to the national health, safety, or interest should be maintained where possible, consistent with the fundamental purposes of the Selective Training and Service Act of 1940, as amended.

"(b) No deferment from training and service shall be made in the case of any individual except upon the basis of the status of such individual, and no deferment shall be made of individuals by occupational group or groups of individuals in any plant or institution.

"(c) The local board may avail itself of the assistance of all Federal, State, or local agencies (such as the Office of Production Management Labor Supply Committees, State and Federal employment services, State occupational advisors, county agricultural agents, or others) to obtain information in cases of occupational deferments."

NAB BOARD MEETS

(Continued from page 435)

United States. This is no time to have any part of the nation's manpower engaged in the performance of artificially-created tasks. This is no time to try to abolish one of the world's great inventions.

"Radio employs thousands of musicians. Millions of dollars are paid annually to musicians to make recordings. We call upon the members of Mr. Petrillo's union and on Mr. Petrillo himself, in the interests of the war effort and in the best interests of the American Federation of Musicians, to reconsider the course of action which has been proposed."

President Miller reported on the tax situation, as it is now pending in Congress, and upon the recent hearings on the Sanders Bill before the House Committee on Interstate and Foreign Commerce.

The contribution of the radio industry to the war effort was thoroughly reviewed. The equipment pool, and tire and gasoline rationing were discussed.

Mr. Morency made a brief report on the progress and development of the department store clinic, a project launched by the Department of Broadcast Advertising.

President Miller announced the appointment of Howard Frazier as Director of Engineering to succeed Lynne C. Smeby, resigned.

The Board directed that plans for the New Orleans convention be gotten under way immediately.

Another meeting of the Board is planned for September.

NO RADIO TAX IN BILL

The Revenue Bill of 1942 (H. R. 7378), introduced in the House on Tuesday, contains no tax on radio broadcasting or advertising.

NAB had appeared before the House Ways and Means Committee in April, urging the members to throw out a proposal of the printing trades unions that radio time sales be subjected to a special penalty tax ranging from 5 to 15 percent.

Debate on the bill began yesterday under a rule banning amendments except committee amendments. It is expected that the measure will pass the House next Monday, and thereafter be referred immediately to the Senate finance committee.

FRAZIER NEW NAB ENGINEER

Howard Frazier is NAB's new Director of Engineering. He will report Monday, August 3.

Mr. Frazier has had a long career in the broadcasting business. His first radio job was Control Operator of WCAU, then a 500 watt station operating four evenings a week, 7 to 10 p. m. That was in 1925. Two years later he was Chief Engineer of a Philadelphia station and from 1929-34, Chief Engineer of the Tauble-Haron group of stations—WPEN, WRAX, WTNJ and WFAB.

At this point in his career he became interested in long distance wire line broadcasting circuits, and built a system using Western Union wires to provide reliable, high-fidelity transmission of programs and Morse telegraph communication on a single pair of wires. Special repeaters were installed at each station with emergency fall-back amplifiers and auxiliary power supply. The entire circuit was instantaneously reversible from New York to Washington and is still in use daily between Philadelphia and New York.

He was a consulting engineer on long distance broadcast circuit problems to the American Network with WMCA as key station.

Between 1934 and 1937 Mr. Frazier was consulting engineer and from 1937 to July 6, 1942, was President and General Manager of WSNJ, Bridgeton, N. J. Recently he has been sales engineer on Navy contracts for RCA Manufacturing Company.

He is a native of Bridgeton, N. J., and has lived most of his life in Philadelphia. Mr. Frazier is married and has three children.

WPB STUDIES INDUSTRY NEEDS

On next Monday the Transmitter and Vacuum Tube Industry Advisory Committee meets at WPB, according to Frank McIntosh, chief, Radio Section, Communications Branch. This Industry Committee will study production, needs of the industry, facilities, and further conservation methods.

The Industry Advisory Committee on Replacement Parts for Radio Receivers met at WPB last Monday. Several task committees were appointed to indicate the needs in maintaining home reception and to consider ways for conservation. Reports will be received and studied at WPB on August 13.

BWC ASKS FOR TUBE DATA

The Board of War Communications has determined that transmitting tube information shall be furnished to it and in this connection the Board has sent the following communication to all standard broadcast stations:

Enclosed is a copy of Order No. 13, to which is attached a questionnaire calling for complete information from each licensee with respect to the number and types of transmitting tubes on hand at each broadcast station and the number of hours such tubes have been in service. The Order requires all licensees to fill out the questionnaire and submit one copy to the Board on or before August 1, 1942.

It should be pointed out that the expression "in possession of the licensee" which appears in the questionnaire, is not intended to limit the tubes on which information is required to those legally in the possession of licensees. Information should be given with respect to all tubes available to the licensee, if those tubes are owned either by the licensee or by affiliated or associated companies or interests. Care should be taken, however, to avoid filing information with respect to the same tube by more than one licensee.

A recent survey conducted by Committee IV (Domestic Broadcasting) of the Board to determine the general condition and reserve of transmitting vacuum tubes in the broadcast industry has developed an imperative need for the information sought by the questionnaire. Studies such as that provided by the enclosed Order are necessary if the Board is adequately to perform its function in preparing plans to meet, so far as possible, the needs of the industry during the period of the war.

The resolution passed by the Board calling for this information was as follows:

Whereas, The Board of War Communications has determined that complete information should be obtained with respect to the transmitting tubes of each standard broadcast station;

Now, therefore, By virtue of the authority vested in the Board by Executive Order No. 8546 of September 24, 1940:

It is hereby Ordered, That each licensee of a standard broadcast station shall furnish the information concerning transmitting tubes specified in the attached questionnaire by filing one copy of such questionnaire, properly completed, with the Board on or before August 1, 1942.

Subject to such further order as the Board may deem appropriate.

WFBC ANNOUNCER TO MARINES

Participation in a recruiting for the Marines was too much for Staff Announcer Bob Youmans, WFBC, Greenville, S. C.

After assisting in a drive which netted 59 men, he gave up his job and joined the Devil Dogs as the fifty-ninth member of the Greenville platoon. His final broadcast was a remote from inside the bus, chartered by the station, to carry the group to headquarters in Savannah, Ga.

PER-INQUIRY AND FREE TIME OFFERS

Reports are coming in thick and fast from stations all over the country on the Happiness Magazine, New York City, which is seeking per-inquiry time for subscription deals.

Esquire Magazine, Chicago, wants free time for *fashion filler material.*

The Frank R. Steel Co., Chicago, is seeking P-I deals on behalf of Princess Pat cosmetics.

National Radio Features, Omaha, Neb., is seeking similar deals to promote Real-Sheer beauty film, one of the current lotions used as hosiery substitutes.

All have been invited to use radio on the basis of established rates.

EXPRESS CO. AFTER FREE TIME

Railway Express Agency is seeking free time on their "new" system of follow up service for packages sent to soldiers in the armed forces. Noting that they have just announced a tremendous advertising campaign in newspapers and magazines, for which plenty of cash money has been appropriated, a station writes in:

"As a matter of fact, the Post Office Department has been doing the same thing about re-forwarding packages without additional charge to soldiers, for a long time, so that this move by the Railway Express Agency is simply competitive, and we can see no reason why it should receive free advertising by radio stations."

They have been invited to use radio at regular rates.

WAR DAMAGE INSURANCE

The NAB has sought clarification of the status of radio stations under the War Damage Insurance rate schedule. Having been advised by the War Damage Corporation that it had classified radio stations under Code 14 ("Publicly or privately owned utilities such as light, water, heat, power and communications systems, including transmission lines, underground piping, wiring and conduits."). NAB requested reconsideration of the classification on July 3.

NAB stated its belief that the studio and transmitter house of a radio station should come under Code 4 ("Apartments, hotels, offices, mercantiles, warehouses and other buildings not used for manufacturing."), and that radio broadcasting towers should come under Code 5 ("Manufacturing plants, piers, wharves, bridges and structures not otherwise specifically provided for."). NAB also asserted that in its opinion Code 14 is not a proper classification because radio broadcasting stations do not have any of the characteristics of the public utilities listed under Code 14.

The War Damage Corporation advised NAB on July 11 that in compliance with NAB's request for reconsideration, the matter would be placed before the authorities of the War Damage Corporation for decision.

TEN DIPLOMATS ON WHOM

A feature of WHOM's Flag Day broadcast was ten 15 minute live programs, on which ten diplomatic representatives of the United Nations appeared. Most of the diplomats spoke in their native tongue. The ten periods were topped off with a 30 minute salute to the rest of the allies.

WROK IS 100%

Staff members of station WROK, Rockford, are participating 100 percent in the Treasury Department's payroll savings plan for the purchase of War Bonds. Walter M. Koessler, WROK general manager, announces that each of the 21 station employees is buying bonds and stamps on a weekly payroll basis.

Washington Notes

Gardner Cowles, Jr., associate publisher of the Des Moines Register and Tribune, and head of KSO and KRNT Des Moines, WMT, Cedar Rapids and WNAX, Yankton, S. D., has been appointed assistant in charge of domestic news in the Office of War Information. Appointment was made by Elmer Davis, chief.

At a press conference early this week Chairman James Lawrence Fly of the FCC said that various studies on the whole problem of radio equipment conservation are being made. He also discussed the diathermy situation and stated that the Commission is a little concerned about the registery of these machines. He said that 67,601 have been registered but he guessed that this is not more than two-thirds of the machines in the United States.

TO AMEND RADIO LAW

On Monday a bill (H. R. 7370) was introduced by Representative Lea (D.-Calif.) which, insofar as it affects broadcasting, would amend Section 318 to permit by Executive Order waiver of compliance with or modification or suspension of the operation of the provisions of that section. Proposed by Chairman Fly of the BWC-FCC, the purpose insofar as broadcasting is concerned is to provide a way for friendly aliens to operate transmitting apparatus.

Section 318 requires that transmitting apparatus operated under a station license shall be operated only by persons holding an operator's license. Since under the law, aliens are prohibited from receiving an operator's license, it is impossible for Latin Americans or other friendly aliens to operate such transmitting apparatus. The bill, which was referred to the Committee on Interstate and Foreign Commerce, would permit temporary relaxation of such requirements for the duration and six months thereafter.

Programs for Victory

RADIO PLAN TO SAVE GRAIN

Attention broadcasters in all grain raising states!

You will notice that the No. 2 Radio War Guide gives AA priority rating for regional broadcasts on grain storage.

Radio station WDAY, Fargo, did some tall thinking on the subject as how best to help and, with station KFYR, Bismarck, and interested state, local and federal officials, are working on a program which should prove of value wherever there is insufficient storage facilities. The movement was activated on July 7 and the plan is called "Garages for Grain."

There are between 50 and 80 million bushels of grain that will be left to rot in the fields unless sufficient storage space is found in North Dakota. Throughout the grain belt, local and terminal elevators are plugged with grain and there is little room left to store this Fall's harvest. Yet, more than ever, this is the year when it is imperative not to waste a single bushel.

Through the Commodity Credit Corporation, many storage bins are being constructed, but this program won't meet the demands, according to the broadcasters.

Many thinking people became worried about this critical situation, but it remained for a radio attorney to suggest a plan that has become radio's answer to the emergency. He is Harold Bangert, general counsel for station WDAY. It was his contention that there must be hundreds of garages and buildings throughout North Dakota that could be adapted for grain storage.

WDAY's War Service committee was first to consider the plan. Approving it, the plan was next taken to the state and county war boards of the AAA, where it was again approved. Now county boards are registering the buildings in the "Garage for Grain" and then sending official inspectors to determine whether the buildings are suitable, for grain storage. Thus a reserve pool of storage space is made available for rental by farmers.

"Garages for Grain" was launched in a special state-wide broadcast originating at WDAY and carried by KFYR. These two stations are directing the campaign. A special portion of the program was broadcast from Governor John Moses' garage at Bismarck. The ceremonies consisted of the Governor signing for his own garage as No. 1 in the state. During the broadcast he officially endorsed the radio plan and urged all North Dakotans to cooperate in the registration.

Other speakers on the special half-hour program were Dean H. L. Walster of the North Dakota Agricultural College, Chairman of the state grain storage committee; E. W. Anderson, chairman of the North Dakota AAA; and Attorney Lavin.

Station managers interested in bringing the "Garages for Storage" plan to their state and community are urged to write directly to Bill Dean, director of publicity, WDAY, Fargo, N. D.

"F.O.B. DETROIT" ON 96

"F.O.B. DETROIT," which originates in the studio of WJR, is another outstanding industry contribution to winning the war. Every Saturday afternoon at 3:30 p. m. it's fed to 96 CBS stations.

It is specifically designed to lift public morale by presenting some of the city's outstanding achievements on the production line. Important Detroit industrialists whose factories are given over to war production, highlight the program. The body of the show is musical with stirring martial music by the WJR orchestra and patriotic and traditional songs by the WJR chorus. Among the industrialists who have already appeared on the program are:

C. E. Wilson, president, General Motors Corp.; H. J. Klingler, general manager, Pontiac Motor Division; Alvan Macauley, chairman of the board, Packard Motor Car Co.; H. H. Curtice, president of Buick Motor Car Co.; John Haien, Chrysler Corporation; W. J. Cameron, Ford Motor Company; G. W. Mason, president, Nash-Kelvinator Corp.; Walter P. Reuther, director, General Motors Department, UAW-CIO.; A. E. Barit, president, Hudson Motor Car Co.; C. W. Avery, president and chairman of the board, Murray Corporation of America; and Ernest Kanzler, director of Detroit Region and automotive branch of the War Production Board.

"F.O.B. DETROIT" is purely sustaining and constitutes part of WJR's contribution to the war effort, said Leo Fitzpatrick, general manager. Details of the program appear in a handsome brochure with three colors and gold on the cover and two colors inside. It contains the remarks of each industrialist who appeared on the program.

WFBC'S "RUBBER" MATINEE

A total of 511 children attended a children's matinee sponsored by station WFBC and the Carolina Theatre, Greenville, S. C., on July 11. Though admission was one pound of rubber, the average was over two pounds, since a total of 1,275 pounds of rubber was turned in.

One youngster won the $25.00 War Bond prize for bringing in the most rubber. He turned up with 124 pounds. Second place was won by a young Miss with 104 pounds. She also furnished 100 pounds of tires but these were not counted in this contest, due to the fact that tires were supposed to be turned in during the regular scrap drive.

Program Director Norvin Duncan and Station Manager Bevo Whitmire handled the broadcast. Chief Control Operator Hubert Brown promoted the idea.

"DIVIDE AND CONQUER" SERIES

Through the department of NAB Listener Activities and the Association of Women Directors, a series of thirteen announcements will be released that are timely and vitally important. They have been prepared in cooperation with the National Council of Women on the subject of "Divide and Conquer," inspired by the OFF booklet of the same name.

The Council believes it is essential to have people understand the nature of enemy propaganda to get us fighting among ourselves, against the British, against the Russians, and against groups in our own population.

KGNC MAKES "MERIT AWARDS"

In Amarillo, Texas, John Ballard, general manager, KGNC, has started a unique practice of giving merit awards to men and women of all ages who have performed some act or service of an outstanding nature. The award is open to civilians as well as members of the armed service.

First merit awards went to William Woods Ellison who recently won a distinguished award from Yale University for a thesis on "An Aeronautical Institute and Flying School." He is now stationed at Sheppard Field, Wichita Falls.

The second went to Lieut. Jimmy Daley, a member of the RAF, whose daring and heroic action in air combat with the enemy received world-wide recognition.

"We sincerely trust these merit awards will prove of some worth to those who receive them," said John Ballard, manager of KGNC, "for they are given with all the sincerity and respect at our command."

INDIANA

Estimated Radio Homes, 1940

Number of Occupied Dwelling Units as reported by U. S. Bureau of the Census in advance release, Series H-7. Percent radio-equipped calculated from Series H-7 Bulletin following the Census Bureau practice. Number of radio units, or radio homes, estimated by applying percent ownership to those units not answering radio question and adding such to those reporting radio.

NAB Research Department — July 13, 1942

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, July 20. They are subject to change.

Monday, July 20

KITE—First National Television, Inc., Kansas City, Mo.—Renewal of license, **1590 kc.,** 1 KW, unlimited.

Tuesday, July 21

WROL—S. E. Adcock, d/b as Stuart Broadcasting Company, Knoxville, Tenn.—C. P., **620 kc.,** 1 KW, unlimited, DA-night.

Wednesday, July 22

Consolidated Hearing

WGRC—Northside Broadcasting Corp., New Albany, Ind.—C. P., **790 kc.,** 1 KW night, 5 KW day, DA-night, unlimited.

WKPT—Kingsport Broadcasting Company, Inc., Kingsport, Tenn. —C. P., **790 kc.,** 1 KW, DA-night, unlimited.

Thursday, July 23

Further Hearing

WFAS—Westchester Broadcasting Corp., White Plains, N. Y.—Modification of license, **1230 kc.,** 250 watts, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WGEO—General Electric Co., Schenectady, N. Y.—Granted modification of license (B1-MLIB-53), to add the frequencies **7000** and **11847.5 kc.,** sharing time with WGEA on both.

WGEA—General Electric Co., Schenectady, N. Y.—Granted modification of license (B1-MLIB-52) to add frequencies **7000** and **11847.5,** sharing time with WGEO on both.

WTNJ—WOAX, Inc., Trenton, N. J.—Granted motion to dismiss petition for rehearing directed against the action of the Commission on July 29, 1941, granting without hearing the application of Trent Broadcasting Corp. for a new station in Trenton, N. J., and dismissed said petition of WTNJ.

W69PH—WCAU Broadcasting Co., Philadelphia, Pa.—Granted application (B2-PH-127) for new FM station, which is in effect reinstatement of construction permit (B2-MPH-14); **46900 kc.,** 9,300 square miles.

First Baptist Church, Pontiac, Mich.—Granted extension of authority to transmit programs to Station CKLW, Canada (B2-FP-99).

DESIGNATED FOR HEARING

WOV—Arde Bulova and Harry D. Henshel (Transferors), Murray Mester and Meyer Mester (Transferees), WODAAM Corporation (Licensee), New York, N. Y.—Designated for hearing application (B1-TC-300) for transfer of control of Wodaam Corp., licensee of WOV, from Arde Bulova and Harry D. Henshell, transferors to Murray Mester and Meyer Mester, transferees.

WBOW—Banks of Wabash, Inc., Terre Haute, Ind.—Designated for hearing construction permit (B4-P-3459) to install a new transmitter.

WINK—Mid-American Broadcasting Corp., Louisville, Ky.—Designated for hearing modification (B2-MP-1589) of construction permit (B2P-2760) for extension of commencement and completion dates.

KROW—Educational Broadcasting Corp., Oakland, Cal.—Designated for hearing application (B5-MP-1510) for modification of construction permit for extension of commencement and completion dates.

WKBH—WKBH, Inc., La Crosse, Wisc.—Designated for hearing application for modification of construction permit (B4-MP-1502), requesting extension of completion date.

LICENSE RENEWALS

The following stations were granted renewal of licenses on a regular basis for the period ending December 1, 1942:

KCMO, Kansas City, Mo.; KGIR, Butte, Mont.; KINY, Juneau, Alaska; KLRA, Little Rock, Ark.; KQV, Pittsburgh, Pa.; KXYZ, Houston, Texas; WAGA, Atlanta; WAKR, Akron, Ohio; WBCM, Bay City, Mich.; WBIG, Greensboro, N. C.; WBNS and auxiliary, Columbus, Ohio; WCSC, Charleston, S. C.; WSAN, Allentown, Pa.; WHK, Cleveland, Ohio; WFEA and auxiliary, Manchester, N. H.; WPAB, Ponce, Puerto Rico; WBRY, Waterbury, Conn.; WCBA, Allentown, Pa.; WGAR and auxiliary, Cleveland, Ohio; KUJ, Walla Walla, Wash.; WAWZ, Zeraphath, N. J.; WFBL, Syracuse, N. Y.

The following stations were granted renewals on a regular basis for the period ending October 1, 1944:

KALE, Portland, Ore.; KFAC, Los Angeles; KGHF, Pueblo, Colo.; KFH, Wichita, Kans.; KMO and auxiliary, Tacoma, Wash.; KRIS, Corpus Christi, Texas; WDRC, Hartford, Conn.; WFBC, Greenville, S. C.; KRNT, Des Moines, Iowa; WBBR, Brooklyn, N. Y.; WHAZ, Troy, N. Y.

In the following cases renewals were granted on a regular basis for the period ending August 1, 1944:

KARK, Little Rock, Ark.; KLX, Oakland, Calif.; KPRC, Houston, Texas; WBAA, West Lafayette, Ind.; WBBB, Burlington, N. C.; WJAX, Jacksonville, Fla.; WQAN and auxiliary, Scranton, Pa.; WRRF, Washington, N. C.; WPAT, Paterson, N. J.; WRNL and auxiliary, Richmond, Va.; WFDF and auxiliary, Flint, Mich.; WGBI and auxiliary, Scranton, Pa.

Licenses for the following stations were extended upon a temporary basis only, pending determination upon application for renewal, for the period ending September 1, 1942:

KBWD, Brownwood, Texas; KDFN, Casper, Wyo.; KGCX, Wolf Point, Mont.; KLO, Ogden, Utah; KLPM, Minot, N. Dak.; WAAB and auxiliary, Boston; WALB, Albany, Ga.; WIRE and auxiliary, Indianapolis, Ind.; WJHL, Johnson City, Tenn.; WKY and auxiliary, Oklahoma City, Okla.; WQBC, Vicksburg, Miss.; WTAQ, Green Bay, Wisc.; WWSR, St. Albans, Vt.

KCRC—Enid Radiophone Co., Enid, Okla.—Present licenses extended upon a temporary basis only, pending determination upon application for renewal, for the period ending October 1, 1942.

MISCELLANEOUS

Columbia Broadcasting System, Inc., Boston, Mass.—Granted motion to dismiss without prejudice application for construction permit for new high frequency station. (Docket 6024)

KALB—Alexandria Broadcasting Co., Inc., Alexandria, La.—Granted petition to dismiss without prejudice application for construction permit to operate on **580 kc.,** 1 KW, directional antenna night, unlimited time. (Docket 6130)

W9XZY—The Pulitzer Publishing Co., St. Louis, Mo.—Granted petition to dismiss application for renewal of license. (Docket 6326)

WCBW—Columbia Broadcasting System, Inc., New York, N. Y.—Denied petition for intervention in re application of The Geotechnical Corporation, Dallas, Tex., for construction permit for 6 portable mobile stations. (Docket 6323)

KFVS—Oscar C. Hirsch, tr/as Hirsch Battery & Radio Co., Cape Girardeau, Mo.—Granted construction permit to make changes in transmitting equipment (B4-P-3503).

WOC—The Tri-City Broadcasting Co., Davenport, Iowa.—Granted modification of construction permit as modified, which authorized change in frequency, increase in power, move of transmitter, and install new transmitter and directional antenna for day and night use, for extension of completion date from July 19 to September 19, 1942 (B4-MP-1593).

KUTA—Utah Broadcasting Co., Salt Lake City, Utah.—Granted license to cover construction permit as modified, to install new transmitter and directional antenna for day and night use, increase power, and move transmitter; also granted authority to determine operating power by direct measurement of antenna power (B5-L-1680; B5-Z-1416).

WSIX—WSIX, Inc., Nashville, Tenn.—Granted license to cover construction permit as modified, to install new transmitter and directional antenna for night use, increase power, change frequency and move transmitter; granted authority to determine operating power by direct measurement of antenna power (B3-L-1679; B3-Z-1415).

WEAN—The Yankee Network, Inc., Providence, R. I.—Granted license to cover construction permit as modified, for increase in night power, and changes in directional antenna for day and night use; granted authority to determine operating power by direct measurement of antenna power (B1-L-1654; B1-Z-1386).

WNYD—City of New York, Municipal Broadcasting System, Portable-Mobile, area of New York, N. Y.—Granted construction permit for new relay broadcast station, requesting reinstatement of construction permit which expired (B1-PRY-279).

WNYC—City of New York, Municipal Broadcasting System, Portable-Mobile, area of New York, N. Y.—Granted construction permit for new relay broadcast station, requesting reinstatement of construction permit which expired (B1-PRY-280).

W49BN—Wylie B. Jones Advertising Agency, Binghamton, N. Y.—Granted modification of construction permit as modified which authorized a new high frequency broadcast station, for change in type of transmitter, changes in antenna system, and extension of completion date from July 13, 1942 to 60 days after grant hereof. (B1-MPH-108)

WLIB—Arthur Faske, Brooklyn, N. Y.—Granted license to cover construction permit as modified, for new transmitter, change in frequency, increase in power and change in hours of operation; granted authority to determine operating power by direct measurement of antenna power. (B1-L-1666; B1-Z-1399)

W2XCB—Columbia Broadcasting System, Inc., Portable Mobile, area of New York, N. Y.—Granted modification of construction permit as modified, which authorized new television relay broadcast station, for extension of completion date from July 7, 1942, to January 7, 1943. (B1-MPVB-83)

WIBC—Indiana Broadcasting Corp., Indianapolis, Ind.—Granted motion to continue hearing set for July 7, 1942, in re application for a construction permit to increase night power and make changes in its directional antenna; hearing continued until August 6, 1942. (Docket No. 6267)

KSL—Radio Service Corp. of Utah, Salt Lake City, Utah—Granted construction permit to make changes in transmitting equipment. (B5-P-3502)

W9XMB—The Moody Bible Institute of Chicago, Chicago, Ill.—Granted modification of construction permit which authorized new ST broadcast station, for extension of completion date from May 16, 1942, to November 16, 1942. (B4-MPST-8)

WSAN—Lehigh Valley Broadcasting Co., Allentown, Pa.—Denied petition of WSAN insofar as it requests grant of its application (B2-MP-1495) for modification of construction permit to make changes in equipment and directive antenna system; denied joint petitions of WSAR (B1-P-3278) for grant of its application for construction permit to change directional antenna system and change in frequency, and of WHOM (B1-P-3312) for grant of its application for construction permit to install new transmitter, directive antenna system, move studio to New York City and increase power; designated said applications for hearing, and granted application of WSAN (B2-MP-1556) for extension of completion date.

WLAP—American Broadcasting Corp. of Kentucky, Lexington, Ky.—Denied petition for grant of construction permit (B2-P-3254) to install new transmitter and directional antenna for both day and night use, change operating assignment and increase power; and retained said application on hearing docket.

J. C. Kaynor, Ellensburg, Wash.—Denied petition requesting grant of application (B5-P-2836) for a new station to operate on **1340 kc.,** with 250 watts power, unlimited time, and ordered application designated for further hearing.

Sacandaga Broadcasting Corp., Gloversville, N. Y.—Denied petition for grant of application (B1-P-3404) for a new station to operate on **1340 kc.,** with 250 watts power, unlimited time, and retained said application on hearing docket.

WLEU—WLEU Broadcasting Corp., Erie, Pa.—Denied petition for grant of application (B2-P-3403, Docket 6303), for a new station, and retained said application on hearing docket.

KSL—Radio Service Corp. of Utah, Salt Lake City, Utah—Denied petitions (1) for grant of application (Docket 4361) and (2) that application be kept pending for the duration, and ordered application heard upon issues as contained in Memorandum Opinion of April 27, 1942.

KFPL—C. C. Baxter, Dublin, Texas—Canceled existing license of station, deleted call letters and closed the records of the Commission in regard to this station, necessitated by licensee's request because of shortage of operators and equipment.

WRAL—Capitol Broadcasting Co., Raleigh, N. C.—Dismissed petition for rehearing directed against the action of the Administrative Board on May 18, 1942, granting the application of WJW, Inc., Akron, Ohio, for modification of construction permit (B2-MP-1563).

Proposed Wilkes-Barre, Pa., Broadcast Grant

The Commission announced proposed grant of a construction permit to Northeastern Pennsylvania Broadcasters, Inc., for a new local station to operate on 1240 kilocycles, with 100 watts power (B-153). Mutually exclusive applications by Wilkes-Barre Broadcasting Corporation, Central Broadcasting Company and Key Broadcasters, Inc. for the same facilities were denied. The frequency 1240 kilocycles is now being used by station WBAX, which has been operating under a temporary license since the Commission denied application for renewal on March 31, 1941.

Renewal of License

The Commission announced the proposed grant of renewal of license for the Federated Publications, Inc., Station WELL, Battle Creek, Mich., to operate on 1420 kilocycles with power of 250 watts, unlimited time (B-156).

The renewal of license application for station WELL was set for hearing to examine the type of management contracts entered into by the station. In its Proposed Findings of Fact and Conclusions the Commission states: "We are satisfied, however, that the contracts of 1932, 1934 and 1938 were not observed in practice and that they were not intended to delegate the licensee's responsibilities to the station manager. Control of the station has always remained in the licensee."

Liner's Broadcasting Station, Inc., KMLB

The Commission announced proposed denial of the application of Liner's Broadcasting Station, Inc., (KMLB), Monroe, La., for change in operating assignment from 1200 kilocycles, 250 watts, unlimited time, to 1440 kilocycles, 1 kilowatt, unlimited time, employing directional antenna at night. (B-149)

Petition—Butler Broadcasting Corp.

The Commission denied the petition of Butler Broadcasting Corporation, Hamilton, Ohio, filed pursuant to the Commission's Memorandum Opinion of April 27, 1942, and set for further hearing application for construction permit for new station. (Docket No. 5985-B-144)

Findings of Fact and Final Order—P-23

The Commission entered an order affirming its action of September 23, 1941, suspending the restricted radiotelephone operator permit of John Franklin Norris, Columbiana, Alabama, for the remainder of the license term, because of alleged violations of Sections 301 and 318 of the Communications Act. (P. 23)

The Evening News Press, Inc., Port Angeles, Wash.—Granted petition to dismiss without prejudice application (B5-P-1933) for new station.

WOPI—Radiophone Broadcasting Station, Inc., Bristol, Tenn.—Granted petition to dismiss without prejudice application (B3-P-3438) for construction permit.

KTBI—Tacoma Broadcasters, Inc., Tacoma, Wash.—Granted petition to dismiss without prejudice application (B5-P-3483) for construction permit.

WROL—S. E. Adcock, d/b as Stuart Broadcasting Co., Knoxville, Tenn.—Granted motion to continue hearing now scheduled for July 21 to August 20, on application for construction permit.

John D. Ewing, New Orleans, La.—Granted motion to dismiss application (B3-P-3373) for new station.

Associated Broadcasters, Inc., Indianapolis, Ind.—Granted motion to dismiss without prejudice application (B4-P-3294) for new station.

KOB—Albuquerque Broadcasting Co., Albuquerque, N. Mex.—Modification of construction permit (B5-P-2783 as modified), which authorized new equipment and increase in power requesting changes in equipment and extension commencement and completion dates.

NEW—Blue Network Co., Inc., Portable-Mobile, area of Washington, D. C.—License for new relay broadcast station using equipment of WNCU, to be operated on **31220, 35620, 37020, 39260 kc.,** 25 watts, A1, A2, A3 Emission.

NEW—Blue Network Co., Inc., Portable-Mobile, area of Washington, D. C.—License for new relay broadcast station using equipment of WEJT, to be operated on **31220, 35620, 37020, 39260 kc.,** 2 watts, A3 Emission.

NEW—Blue Network Co., Inc., Washington, D. C.—License for new relay broadcast station using equipment of WEJC, to be operated on **31220, 35620, 37020, 39260 kc.,** 100 watts, A3 Emission.

NEW—Blue Network Co., Inc., Portable-Mobile, area of Washington, D. C.—License for new relay broadcast station using equipment of WEJS, to be operated on **31220, 35620, 37020, 39260 kc.,** 2 watts, A3 Emission.

NEW—Blue Network Co., Inc., Portable-Mobile, area of Washington, D. C.—License for new relay broadcast station using equipment of WEJE, to be operated on **31220, 35620, 37020, 39260 kc.,** 0.25 watts, A3 Emission.

NEW—Blue Network Co., Inc., Portable-Mobile, area of Washington, D. C.—License for new relay broadcast station using equipment of WEJD, to be operated on **31220, 35620, 37020, 39260 kc.,** 0.25 watts, A3 Emission.

NEW—Blue Network Co., Inc., Portable-Mobile, area of Washington, D. C.—License for new relay broadcast station using equipment of WNTJ, to be operated on **31220, 35620, 37020, 39260 kc.,** 25 watts, A3 Emission.

APPLICATIONS FILED AT FCC

560 Kilocycles

KPQ—Westcoast Broadcasting Co., Wenatchee, Wash.—Authority to determine operating power by direct measurement of antenna power on special service authorization.

790 Kilocycles

KFQD—Anchorage Radio Club, Inc., Anchorage, Alaska.—Voluntary assignment of license to William J. Wagner, trading as Alaska Broadcasting Company.

KFQD—Anchorage Radio Club, Inc., Anchorage, Alaska.—Construction permit to install new transmitter and increase power from 250 watts to 1 KW.

WWNY—The Brockway Company, Watertown, N. Y.—Modification of construction permit (B1-P-3265), which authorized change in frequency, increase in power, change hours of operation, move transmitter and install directional antenna requesting extension of completion date from 8-16-42 to 10-16-42.

910 Kilocycles

WSUI—The State University of Iowa, Iowa City, Iowa.—License to cover construction permit (B4-P-2970) for increase in power and changes in directional antenna for day and night use.

WSUI—The State University of Iowa, Iowa City, Iowa.—Authority to determine operating power by direct method.

1000 Kilocycles

KJR—Fisher's Blend Station, Inc., Seattle, Wash.—Modification of construction permit (B5-P-1281), which authorized increase in power, new transmitter, directional antenna for night use and move of transmitter requesting approval of directional antenna and transmitter site.

1150 Kilocycles

WDEL—WDEL, Inc., Wilmington, Del.—Modification of construction permit (B1-P-2758 as modified), which authorized increase in power, installation of new transmitter and directional antenna for day and night use for extension of completion date from 7-20-42 to 9-19-42.

1170 Kilocycles

WWVA—West Virginia Broadcasting Corp., Wheeling, W. Va.—Modification of construction permit (B2-P-2540 as modified), which authorized increase in power, change in hours of operation, move of transmitter, installation of new transmitter, and directional antenna for night use for extension of completion date from 8-6-42 to 11-4-42.

1340 Kilocycles

WEMP—Milwaukee Broadcasting Co., Milwaukee, Wisc.—License to cover construction permit (B4-P-3473) for installation of new transmitter.

1400 Kilocycles

KTTS—Independent Broadcasting Co., Springfield, Mo.—Acquisition of control of licensee corporation by J. H. G. Cooper, through purchase of 4% of stock from minority stockholder.

1490 Kilocycles

WMRC—Textile Broadcasting Co., Greenville, S. Car.—Authority to make changes in automatic frequency control equipment.

KOVC—KOVC, Inc., Valley City, N. Dak.—Authority to determine operating power by direct method.

1520 Kilocycles

WHIP—Hammond Calumet Broadcasting Corp., Hammond, Ind.—Modification of construction permit (B4-P-1604 as modified), which authorized change in hours of operation and changes in directional antenna requesting further changes in directional antenna.

FM APPLICATION

K5IL—St. Louis University, St. Louis, Mo.—Modification of construction permit (B4-PH-37 as modified) which authorized construction of new high frequency broadcast station requesting extension of completion date from 8-4-42 to 2-4-43.

TELEVISION APPLICATION

W9XAK—Kansas State College of Agriculture and Applied Science, Manhattan, Kansas—Modification of construction permit (B4-PVB-25 as modified) which authorized construction of new television station requesting extension of completion date from 7-15-42 to 1-15-43.

MISCELLANEOUS APPLICATIONS

NEW—Blue Network Co., Inc., Portable-Mobile, area of Washington, D. C.—License for new relay broadcast station using equipment of WNBU to be operated on **1606, 2074, 2102, 2758 kc.,** 25 watts, A1, A2, A3 Emission.

NEW—Blue Network Co., Inc., Portable-Mobile, area of Washington, D. C.—License for new relay broadcast station using equipment of WNBR to be operated on **1606, 2074, 2102, 2758 kc.,** 25 watts, A1, A2, A3 Emission.

NEW—Blue Network Co., Inc., Portable-Mobile, area of San Francisco, Calif.—Construction Permit for new relay broadcast station to be operated on **31220, 35620, 37020** and **39260 kc.,** power of 100 watts, A3 Emission.

NEW—Mutual Broadcasting System, Inc., Chicago, Ill.—Extension of authority to transmit programs to CKLW, stations owned and operated by the Canadian Broadcasting Corp. and stations licensed by the Canadian Minister of Transport for the period beginning 9-1-42.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Gallant Trading Co., 1111 South Hill St., Los Angeles, with a branch or warehouse storage room located at 1619 South Vermont St., Los Angeles, engaged in the sale of general merchandise, including clothing, shoes, blankets, mattresses, tarpaulins, and other commodities, are charged in a complaint with misrepresentation. (4780)

Cuneo Press, Inc., et al—A complaint has been issued against four corporations and an individual allegedly associated in a cooperative arrangement to deceive American manufacturers in connection with the sale of advertising matter known as "manufacturers' displays," for use in export catalogs. The respondents, charged with unfair and deceptive acts and practices in violation of the Federal Trade Commission Act, are:

Cuneo Press, Inc., West Cermak Rd. at South Canal St., Chicago, and its subsidiary, Neo Gravure Printing Co., Inc., 601 West 26th St., New York; Eggers & Heinlein, Inc., 44 Whitehall St., and Middleton & Co., Ltd., 80 Broad St., New York, export commission merchants; and Marcus A. Crews, trading as M. A. Crews Co. and as Pioneer Exporters, Lawrenceburg, Tenn., associated with the other respondents in the sale of manufacturers' displays. (4781)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

E. Ingraham Co., Bristol, Conn., and The New Haven Clock Co., New Haven, Conn., watch manufacturers, entered into stipulations to cease and desist from distributing to jobbers, retailers, or others any repaired or second-hand watches unless in invoices and by means of labels or tags attached to such watches, it is clearly indicated that they are rebuilt or second-hand. Reconditioned or repaired watches have been delivered to jobbers and merchants by the respondent corporations without marking or labeling to indicate that they are other than new watches, according to the stipulations, and it is a common practice for merchants to sell them as new goods. (3506-3509)

Pelman Institute of America, Inc., New Rochelle, N. Y., entered into a stipulation to cease and desist from misrepresentations which have the capacity to deceive the public as to the character, quality, value or scope of the correspondence courses of instruction it sells, including one designated "Pelman Institute's Complete Course of Correspondence Instruction in Scientific Mind Training." (3507)

Random House, Inc., 20 East 57th St., New York, engaged in publishing books under the trade name Modern Library, has entered into a stipulation to cease and desist from the use of the words "complete and unabridged" as descriptive of those of its publications, or reprints thereof, which are not full and exact transcripts of the named author's works. (3504)

United States Bronze Sign Co., Inc., 570 Broadway, New York, and its wholly-owned subsidiary, Bronze Tablet Foundry, Inc., stipulated that they will cease and desist from certain representations in connection with the sale of bronze tablets. (3505)

Siegmund Werner, Inc., 36 West 24th St., New York, distributor of skiing equipment, has entered into a stipulation to discontinue representing by statements such as "We manufacture what we sell" that it owns or controls a skiing equipment factory or that the equipment sold by it comes direct from manufacturer to purchaser, unless such are the facts. (3508)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Bible Institute, Inc., The Bible Institute, American Plate Glass Co., and H. W. Lederer, individually and as president of the three corporations, all with principal offices at 224 West 34th Street, New York, have been ordered to cease and desist from deceptive acts and practices in promoting the sale and distribution of Bibles and other religious publications and hand-bag mirrors. (4687)

Harry M. Bitterman, Inc., et al.—Cease and desist orders have been issued in six cases affecting resident buyers and manufacturers and wholesalers of fur garments, millinery and women's ready-to-wear apparel, all located in New York City, as a result of their having violated Section 2 (c), the brokerage section, of the Robinson-Patman Antidiscrimination Act.

The orders are directed against the following respondent resident buyers, engaged in purchasing merchandise for retail dealers located principally in States other than New York:

Harry M. Bitterman, Inc., 370 Seventh Ave.; Harry M. Bitterman, individually and as president and as one of the directors of Harry M. Bitterman, Inc.; and Irving Dash, office manager of Harry M. Bitterman, Inc.; fur garments (4229).

Isaac S. Dickler, 370 Seventh Ave.; fur garments (4231).

David M. Weiss, 370 Seventh Ave.; fur garments (4240).

Jack, Michael, George and Louis Herzog, trading as Jack Herzog & Co., 337 Seventh Ave.; fur garments (4257).

Central Buying Service, Inc., 101 West 37th St., millinery (4259).

Lawrence W. Powers, trading as L. W. Powers Co., 1328 Broadway; women's ready-to-wear apparel (4299).

Climax Cleaner Mfg. Co., 2080 W. 110th St., Cleveland, has been ordered to cease and desist from representing in any manner that Climax Wall Paper Cleaner will not crumble when used for cleaning all types of wall paper. (4668)

Fretted Instrument Manufacturing Corp., Newark, N. J., and United Guitar Corp., Jersey City, N. J., and John Carner, Morris Brooks, Frank Solvino, and Frank Masiello, individually and as officers of one or both of the corporations, have been ordered to cease and desist from unfair and deceptive acts in the distribution and sale of string musical instruments. (4444)

Gene Hughes Drug Stores, Inc., 500 J St., Sacramento, Calif., and its president, Eugene P. Hughes, have been ordered to discontinue disseminating misleading and deceptive representations concerning a preparation sold as a treatment for obesity under the names "Slendoids" and "Slendoids Nu-Form Capsules." Both respondents trade as Sacramento Pharmacal Company. (4316)

Inland Empire Bakers' Association, Inc., 311 Radio Central Building, Spokane, Wash., and its officers and member companies engaged in manufacturing and distributing bread and bakery products in parts of eastern Washington and northern Idaho, have been ordered to cease and desist from entering into or carrying out any combination or conspiracy to fix uniform prices. (4550)

Lustberg, Nast & Co., Inc., New York, manufacturer of heavy clothing such as is commonly worn by sportsmen and outdoor workers, has been ordered to cease and desist from representing in advertisements or on labels that any garment made of wool or cotton or any other woven fabric is manufactured from buckskin or other type of leather. (2536)

Manhattan Brewing Co., engaged in the sale and distribution of beer and ale, with its brewery and principal office at 3901 Emerald Ave., Chicago, has been ordered to cease and desist from misrepresentations in the sale and distribution of its products. (4572)

Milk Cap Statistical Bureau, Philadelphia, and 11 manufacturers representing about 75 percent of the total business of the paper disc milk bottle cap industry, have been ordered to cease and desist from certain practices having the purpose or capacity to restrain, monopolize or eliminate competition in the sale of their products. (4448)

Peggie Moran Co., Inc., 1729¾ North Wilcox Ave., Hollywood, and Irene Johnston, Inc., 811 West Seventh St., Los Angeles, have been ordered to cease and desist from misrepresentation in connection with the sale of a soap known as "Peggie Moran Savon," advertised as an effective agent for removing excess flesh. (4415)

Renesol Corp., 551 Fifth Ave., New York, has been ordered to cease and desist from representing in advertising that the medicinal preparation designated "Renesol," for use in the treatment of epilepsy, is not habit forming and is safe and harmless. (3695)

National Association of Broadcasters

1626 K STREET, N. W. WASHINGTON, D. C. Vol. 10, No. 29, July 24, 1942

CRITICAL OCCUPATIONS LISTED

Making no recommendations of its own, the Board of War Communications announced Monday that lists of critical occupations in the communications industries have been forwarded to the War Manpower Commission, the Selective Service System and the United States Employment Service for such use as these agencies may find.

Separate lists for each of the different types of communications show 23 classes of critical occupations for cable companies, 45 classes for telegraph firms, 51 classes for telephone organizations, 48 classes in the various subdivisions of commercial radiocommunication services, 15 classes in international short-wave broadcasting and in standard broadcasting there are 6 classes of technical workers and 3 classes of skilled personnel in program departments.

The agencies were told "The Board does not feel that it is in a position to consolidate these lists for the entire communications industry due to the fact that the nomenclature of positions and the principles applied in the inclusion or exclusion of positions have been different in the various branches of the industry."

It was suggested that the industry and labor representatives on the Board's Joint Labor-Industry Subcommittee should consult directly with the Government agencies in supplying detailed information on the functions performed by persons in the listed positions. Members of the labor representatives are: Paul E. Griffith of the National Federation of Telephone Workers, for telephone workers; Joseph P. Selley of the American Communications Association, for telegraph workers, and Robert J. Watt of the American Federation of Labor, for radio workers. Industry representatives are: Keith S. McHugh of American Telephone and Telegraph Company, for telephone; Ellery W. Stone of Postal Telegraph, for telegraph, and Dr. C. B. Jolliffe of Radio Corporation of America, for radio. Sidney D. Spear of the Federal Communications Commission will assist the subcommittees and perform necessary liaison on this work for the Board.

SCRAP IRON-STEEL—FAT SALVAGE CAMPAIGNS

Considerable interest has been shown by NAB member stations in the advertising campaign, launched to salvage scrap iron and steel and waste fats. NAB thoroughly investigated the plans of these campaigns. The scrap iron and steel is sponsored by the Iron & Steel Institute, Lukens Steel Co., Coatesville, Pennsylvania, and is being handled by Ed. Madden, vice president of McCann-Erickson, 50 Rockefeller Plaza, New York City.

We have been informed by reliable sources that some 200 radio stations have been scheduled to carry paid advertising in connection with this campaign. There is a possibility that further appropriation for radio advertising will be made available.

The Waste Fat Salvage Campaign is sponsored by the Association of Soap and Glycerine Institutes, 381 Fourth Avenue, New York City, of which Roscoe C. Edlund is manager.

It is reported that this campaign does not contemplate the use of any paid radio advertising. Sponsors of soap programs will utilize a part of their time to further the campaign. The agency handling this account is Kenyon & Eckhardt, 247 Park Avenue, New York City.

It should be made clear that no government department is in any way connected with the placement of this advertising nor are any government funds being used in connection with either of the campaigns.

Programs for Victory

Bond Plans from Iowa

Wire to NAB from Woody Woods, Des Moines, outlines the technique WHO has adopted to sell War bonds and stamps. It's a sound plan based on hard selling with competition.

Here's Mr. Wood's wire:

"Starting July 23, Herb Palmbeck, farm news editor and Bob Burlingame, assistant news editor in charge of night side, will sell war bonds. Each has large and loyal following. Will build up competition between them. Announcers will take sides. Urge listeners to support their favorite. Send order attention Palmbeck or Burlingame. Orders will be acknowledged on air."

On July 16, WHO laid down a foundation for their sales campaign with a 30-minute show, 7:30-8:00 p. m. dedicated to American Heroes Day. It utilized a 40-piece orchestra, courtesy of Local 75 A. F. of M., a mixed chorus and dramatic cast from the station. Harold Fair, WHO program director, composed special music for the occasion and conducted the orchestra and chorus. The program was written and produced by Jack Kerrigan, station production manager, with dramatic bits directed by Max Robinson of the station's production staff. The program labelled "This Is Your War" was produced and dedicated especially to further the efforts of the treasury department in the sale of bonds.

Bond Plans from Texas

Lewis Lacey, promotion manager, KTSA, San Antonio, Texas, wires NAB this plan for bond sales. It may prove of interest to stations with quarters in hotels and office buildings, where stamp booths are open. Says Mr. Lacey:

"We have tied-in here with Women's Club and University Women in lobby of city's leading hotel. They sell stamps and will do all paper work on bond purchases and then accompany buyer to our office for the actual sale and delivery of bond. Our announcements on air will point out this service."

618 Stations Sell Bonds

By July 23, 618 stations had accepted the Treasury Department's call for radio stations to become issuing agents for war bonds in accordance with the plans released last week in the NAB War Service Bulletin No. 12. Henry Morgenthau, Jr., Secretary of the Treasury and Vincent F. Callahan, Director of Radio and Press for the War Savings Staff are still receiving telegrams and letters daily from additional stations agreeing to sell war bonds direct to their listeners though one of the three plans outlined in the NAB Bulletin.

This latest undertaking on the part of the radio industry in

PROGRAMS FOR VICTORY

(Continued from page 453)

the War effort got under way Thursday with a special program by stations throughout the country already authorized as issuing agents by the Treasury and the Federal Reserve Banks. The broadcasts included a special ten-minute transcript with a message from Secretary Morgenthau congratulating the industry on its cooperation in the past and his personal thanks to stations for so willingly accepting this new assignment.

Secretary Morgenthau's Statement

"For over a year now the radio stations of this country have been bringing home to us the full meaning of the war bond and stamp campaign as a vital part of our war activity. Their support of the war bond effort has been given willingly and patriotically. And when I say 'given', I really mean just that. They have done a truly remarkable job.

"Last week we invited all stations throughout the country to take on an even greater responsibility. We invited them to do a job that will make it easier for you to buy war bonds with ten per cent or more of what you earn. Until now most of you have been able to buy war bonds at banks, post offices, and savings and loan associations. We have found, however, that if we increase the number of places where bonds can be sold, we can also increase the sale of bonds to reach our national quota of twelve billion dollars a year.

"Accordingly, I am delighted to know that hundreds of radio stations have agreed to sell bonds and stamps as direct agents of the Treasury Department. This will mean that in many cases, when banks and post offices have closed for the day, you will be able to buy bonds and stamps directly through your local broadcasting station. Needless to say, I am confident that the radio stations of America will handle this responsibility in a way that does them credit.

"Just how the system will work in your own locality has been determined by the management of this station. A representative of the management is waiting now to give you this news, and I hope that you will all listen carefully to what he has to say."

The above transcribed statement was followed in each case with five-minute live talks by station executives explaining how the war bond sales would be handled locally, several noteworthy examples of which follow:

Treasury Reports Other Sales Plans

WCPO, Cincinnati, is promoting direct sale of bonds through tie-up with RKO theatre chain. Bond booths in eight downtown theatres are manned by Junior League girls and each booth has a direct wire to the station. All stars who come to town are used in publicity on the air and in newspapers and invited to sell bonds in one of these booths. The theatres also publicize this promotion on the screen and mention it in newspaper ads. Meanwhile the radio station promotes this function on all its programs.

WFIL, Philadelphia, is building a Victory Booth on Chestnut Street in front of studios. Each staff announcer is being given a definite period of time in the booth each day to sell bonds. The announcer who sells the most bonds during the week is given a $25.00 bond as a prize.

In addition to the announcer contest, WFIL has a "Bond Wagon" on the streets of Philadelphia each day. The Bond Wagon is a real farm wagon—carrying a five piece band—using a P. A. system. The announcer is dressed as Uncle Sam and sells bonds to the public. A real circus barker exhorts the public to buy bonds. A president of a bank makes a one-minute speech each day at 12 o'clock from the "Bond Wagon."

WGR and WKBW, Buffalo, has initiated a youth movement called the Commando Corps of the Court of Honor, a program broadcast weekly from a local auditorium. On this program that announcer, acting as "Commanding Officer," makes awards and promotions to local youngsters for their sales of bonds during the week. Each youngster has a rank which is raised when his weekly sales of bonds increase to warrant it. ($25 makes him a Corporal, $50 a Sergeant, etc.) The young "Commandos" make a report on the program each week. In approximately two months this program has sold and delivered over $47,000 worth of bonds and stamps.

WHIZ, Zanesville, Ohio, is inaugurating a program calling on important citizens in the city to come up and sing a song. If they sing, they must buy a bond or stamps, in accordance with their financial ability. If they refuse to sing, they must buy twice as many bonds or stamps. They are also planning an outdoor rally along the same lines. A member of the station staff has been appointed to handle sale of bonds, and the station is arranging with local Boy Scouts and Western Union to deliver bonds.

WINX, Washington, D. C., has its bond program underwritten by local taxi cab company which finances the bonds, takes the orders sent to WINX and delivers them personally to the purchasers. Names are chosen from phone book and calls are made asking people to buy bonds during broadcast and their names are mentioned on the air. After broadcast, a taxicab delivers bond applications to applicants, gets check drawn to Treasury, delivers same to bank, buys bond and takes it back to purchaser. This program has sold $14,000 worth of bonds on seven broadcasts.

WKIP, Poughkeepsie, N. Y., arranged to get bonds several days ahead of July 23 and hence started its promotion early. WKIP sells war bonds by a series of radio auctions. A specific example: A Poughkeepsie furniture store donated a $45 chair to the cause. The chair was auctioned off. The person getting the chair bought and got $1,500 worth of bonds. The chair cost him nothing.

In order to get his article of merchandise the buyer must appear within 24 hours with the money and take actual delivery of the bonds. Bruff W. Olin, Sr., station manager, is most enthusiastic. He has already called Federal Reserve for a greater supply of bonds. His original allotment is sold out.

KVAK, Atchison, Texas, has secured an empty store next door to the radio station. In the window has placed pictures of all the boys from that city now in the service. Outside the store is a booth to sell bonds. They are producing a one-hour live show daily with theatre personalities and prominent citizens. They are making arrangements to fill bond orders by mail and also to have bond orders delivered in the city by Western Union messengers.

How To Help Win War

WBBM, Chicago, has a weekly half-hour show "TODAY'S WAR AND YOU" that is doing a good job and achieves the purpose for which it was intended.

The purpose, according to Lavinia S. Schwartz, is to provide "a radio clinic to help listeners find their place in the nation's war effort. A panel of personnel experts from the Army, Navy, Marines, Civil Service, and Federal Security Agency," she explained, "discuss case histories selected from listeners' letters—with emphasis on such questions as:

"Where can I best serve my country?

"Should I enlist in the armed forces or should I remain in civilian life?

"How can I be trained?

"Can I get a Commission?

"What financial provisions can I expect?

"What about my present draft classification?"

The permanent panel consists of:

ARMY: Lt. Perry A. Ball, assistant chief of staff, G-2 Hdqts., Sixth Corps area

RADIO DOES A JOB

FEDERAL SECURITY AGENCY
WASHINGTON

OFFICE OF
THE ADMINISTRATOR

JUL 20 1942

Dear Neville:

About the middle of May the Health and Medical Committee of this Agency reported a serious lag in the recruiting of nurses for the nursing schools to meet wartime needs. It was necessary to obtain nearly fifty per cent more than the usual number of recruits.

Schools of nursing were closing their registrations for the new semester during the latter half of June. Time was short and we elected to make our contribution to the final stage of the recruiting drive almost entirely by radio. Under the allocation plan nearly ninety network sustaining and commercial shows carried the appeal for student nurse recruits. The need for nurses also carried an "A" priority for local stations and we have received enthusiastic reports from the field on the local stations' cooperation with the nursing schools and the recruiting agencies.

My thanks can best be expressed in terms of results. The final figures are not in but at the height of that campaign applications were pouring into the recruiting agencies at the rate of some fifteen hundred a day. The quality of the applications was exceptionally high; preliminary analysis of the returns showed 87 per cent were rated excellent and that another 10 per cent were highly probable prospects for nurse training. About June 15 most of the schools reported that they had all the applicants they could handle for the semester just opening.

My congratulations to the radio industry for this dramatic achievement.

Very cordially yours,

Administrator

Mr. Neville Miller,
President, National Association of
Broadcasters,
1626 K Street Northwest,
Washington, D.C.

NAVY: Lt. David Goldenson, officer in charge of recruiting station

MARINES: Captain C. E. Lighter, central recruiting division

CIVIL SERVICE: J. A. Connor, associate district manager, Seventh Civil Service district

FEDERAL SECURITY AGENCY: Julian Baer, technical representative, office of the regional director, FSA.

Occasionally guests represent Naval Aviation, the Coast Guard, and specialized services within the Army.

Announcer Bob McKee reads a case, often in letter form, and asks each member of the panel to answer. Usually seven cases are answered in each half-hour broadcast. Here is a typical letter from a listener:

"It was with great interest that I listened to your initial program on Monday last. You are to be congratulated on performing a very important and vital service to us Americans who would give our right arm to know just what to do in regard to serving our county best—not from our own standpoint, but from our country's standpoint."

Each listener receives from WBBM a two-page directory containing the names and addresses of the Army, Navy, Coast Guard, Maritime Service, Marine Corps, Civil Service, and U. S. Employment Service. Qualifications for enlistment or employment appear in a separate column.

Include Spots in Local Shows

L. Von Linder, WMT, Cedar Rapids, Iowa, says that his station includes a great many War Effort announcements in locally produced programs on much the same basis as OWI employs the network allocation plan.

Works Spots Into Programs

F. H. Booton, program director, WDZ, Tuscola, Ill., also spots War Effort announcements on strongest local shows. He feels that he does a better job "by having our production man work your announcements into programs."

Marines Help Marines

In Greeley, Colo, a group of ex-Marines have banded together to take over the local recruiting job. This, of course, with sanction of MC officials. They conduct a 15-minute program over KFKA every other Friday evening at 6:45 p. m., using the 15-minute script mailed from Washington.

Write Miss McLarney

If any of your listeners request script of "You Can't Do Business with Hitler" transcribed series, you may forward requests directly to:

Miss Mary Louise McLarney
Office of Emergency Management
1516-14th Street, N. W.
Washington, D. C.

Sales

UNITED BROADCASTING SYSTEM OFFER

Many member stations have called the attention of NAB to the communication received from Howard Blake, United Broadcasting System, 480 Lexington Avenue, New York. The communication asks radio stations to accept without charge some proposed transcriptions of top network commercial shows and to run them free for a period of 39 weeks. There is no indication in the letter that any definite arrangements have been made for any specific shows, but Jack Benny, Bob Hope, and Amos and Andy are suggested as the types.

The lure which is held out to the stations is that if they will run them for 39 weeks, United Broadcasting System will conduct a survey to ascertain the extent of the listening audience and that this can then be used by the stations as a basis for securing subsequent commercial accounts. This is a flagrant instance of a "for free."

NAB has written Mr. Blake the following letter and sent with it the resolution adopted at Cleveland, copy of which is also printed herewith:

"Several member stations have forwarded to NAB headquarters your recent request for radio advertising on a gratis basis.

"Please be advised that NAB member stations are not in the business of handling commercial business of any nature on a free basis. Over a period of many years radio has firmly established its position as an advertising medium which gives full value received to those who use it wisely and well. There is no longer need for any radio station to demonstrate to any advertiser its power as a medium for selling merchandise or commodities.

"For stations to accept or do business upon the basis which you suggest is considered not only a bad business practice but in violation of all of the ethics of advertising. We attach hereto a resolution unanimously adopted by the NAB membership at its 1942 convention.

"We invite you and your clients to use the medium of radio upon the basis of a station's quoted card rates. In that event we are certain that you will find stations willing to cooperate 100 per cent and that the results of radio advertising, wisely and efficiently applied, will more than justify the expenditure."

RESOLUTION

Adopted unanimously by delegates to the 1942 Convention of the National Association of Broadcasters, Cleveland, Ohio, May 13, 1942.

Maintenance of a sound broadcasting industry, particularly vital to the nation in these times of war, is predicated on the observance of good business practices and high standards of ethics, both on the part of broadcasters and of those who would use broadcasting facilities. In cooperation with our government the broadcasting industry is doing its utmost in the promotion of the war program by generous, unselfish all-out contributions of time and talent.

However, some organizations and movements outside the government are seeking their commercial advancement or the promotion of special aims through the free use of broadcasting facilities, sometimes even under the guise of participation in the war program. All such efforts are regarded by the National Association of Broadcasters as unwarranted, unsound, and contrary to the best interests of the industry and the nation.

Similarly, efforts by commercial enterprises to purchase radio facilities on a contingent, guaranteed-return, or per-inquiry basis, again sometimes even under the guise of patriotism, or, more reprehensibly, on the basis that the war emergency should persuade broadcasters to relax their standards of ethics, are declared by this Association to lead to unfair and discriminatory practices, to an undermining of the entire structure of commercial radio, and to the deterioration of an industry vital to its government and to the advancement of the American economic system. Such efforts are, therefore, condemned as unethical, as contrary to the best interests of the industry, and if carried to their logical conclusion as contrary also to the best interests of advertising in general and of the clients served by radio. It is the will of this Association, therefore, that all such requests should be denied by its members, and discouraged by every other means at their disposal.

TALENT FEES

Radio Daily, in its July 22 issue, quoted an attorney for the Wage and Hour Division as saying that all staff announcers working under AFRA contracts should have their overtime computed on the basis of staff salary *plus* talent fees.

The NAB contends that, in certain instances, talent fees should be excluded from staff salary in computing overtime since the announcers, in these instances, are employees of the sponsor while they are earning these fees. (See NAB Wage and Hour pamphlet, page 4.)

At the suggestion of L. Metcalfe Walling, Wage and Hour Administrator, the NAB Labor Relations Department has for some time been engaged in making a survey of the entire talent fee situation, with a view to reaching an understanding with the Wage and Hour Division on this matter.

The NAB Wage and Hour Committee, at its Cleveland meeting in May, authorized this survey.

C. T. Lucy, WRVA, chairman of the Wage and Hour Committee, and Mr. Miller will have a conference Monday to discuss the entire matter.

A PAT ON THE BACK

With this issue of the NAB Reports we publish the facsimile copy of a letter received from the Honorable Paul V. McNutt, Administrator of Social Security. The latter speaks for itself. We publish it in form so that any station desiring to use it for display purposes may do so. It is a swell boost for radio and the job that broadcasting is doing in connection with the war effort. We sincerely thank Mr. McNutt.

Gregory Gentling

In the death of Gregory Gentling, KROC, the broadcasting industry has sustained a real and serious loss. Greg was one of the pioneers of the industry and beloved by all who knew him

INTERNATIONAL BROADCASTING

To keep flexible the international short-wave operations of American international stations, the FCC has provided its Chief Engineer with authority to grant temporary frequency shifts when interference problems threaten the efficiency of broadcasts. Upon recommendation of the Board of War Communications the FCC adopted Administrative Order No. 2-E which authorizes the FCC Chief Engineer to act upon any request of an international broadcast station licensee to substitute temporarily another frequency for a frequency specified in the applicant's regular license. It is provided, however, that the Chief Engineer wherever feasible shall authorize a frequency within the same megacycle band as the frequency specified in the regular license.

The effect of the Order would permit the international stations to shift a few kilocycles in either direction to evade interference frequently caused by other communications activities. The Board of War Communications recommended the step as an "effort to insure the best and most continuous reception of United States international broadcast programs in foreign countries".

FEDERAL LEGISLATION

HOUSE

H. R. 7370 (Lea, D.-Calif.) COMMUNICATIONS—To authorize, during time of war, waiver of compliance with or modification or suspension of the operation of certain provisions of the Communications Act of 1934. Referred to the Committee on Interstate and Foreign Commerce.

SENATE

S. 2661 (Clark, D-Idaho) COMMUNICATIONS—To amend section 606 of the Communications Act of 1934 for the purpose of granting to the President in time of war certain powers to waive compliance with, modify, or suspend in whole or in part the operation of certain provisions of the Communications Act of 1934. Referred to the Committee on Interstate Commerce.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, July 27. They are subject to change.

Monday, July 27

Broadcast

To Be Held in Richland County Courthouse, Mansfield, Ohio

WMAN—Richland, Incorporated, Mansfield, Ohio.—Renewal of license, **1400 kc.,** 250 watts, unlimited.

Tuesday, July 28

NEW—Herman Radner, Dearborn, Mich.—C. P., **680 kc.,** 250 watts, daytime.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

National Broadcasting Co., Inc., and Blue Network Co., Inc.—Granted modification of 47 relay station licenses (heretofore licensed for operation with NBC Red and Blue Network stations), to authorize operation with NBC (Red Network) stations only; and granted applications of Blue Network Co., Inc., for licenses to operate 48 relay stations, for period of 2 years, licenses to have uniform dates; designated for hearing application of Blue Network Co., Inc. (B5-PRE-428) for construction permit for one additional relay station.

KLRA—Arkansas Broadcasting Co., Little Rock, Ark.—Granted extension of Special Service Authorization to operate on **1010 kc.,** 5 KW night, 10 KW LS, unlimited time, directional antenna night (B3-SSA-41).

LICENSE RENEWALS

The following stations were granted renewal of licenses for the period ending December 1, 1942:

KDTH, Dubuque, Iowa; KELA, between Centralia and Chehalis, Wash.; KEVE, Everett, Wash.; KFJM, Grand Forks, N. Dak.; KGER, Long Beach, Cal.; KGNC, Amarillo, Texas; KMED, Medford, Ore.; WHP and auxiliary, Harrisburg, Pa.; WMBG and auxiliary, Richmond, Va.; KERN, Bakersfield, Cal.; KGNF, North Platte, Neb.; KGNO, Dodge City, Kans.; KIDO, Boise, Idaho; KSO, Des Moines, Iowa; KTSM, El Paso, Texas; KWK, St. Louis, Mo.; WALA, Mobile, Ala.; WHOM and auxiliary, Jersey City; WWRL, Woodside, L. I.; KSLM, Salem, Ore.; KTUL, Tulsa, Okla.

The following stations were granted renewals on a regular basis for the period ending August 1, 1944:

KFXJ, Grand Junction, Colo.; KPOF, Denver; KUSD, Vermillion, S. Dak.; WJAR and auxiliary, Providence, R. I.; WLBL, Stevens Point, Wisc.; KRRV, Sherman, Texas; WAAF, Chicago; WBEN and auxiliary, Buffalo, N. Y.

Licenses for the following stations were further extended upon a temporary basis only, pending determination upon application for renewals, for the period ending September 1, 1942:

KBST, Big Springs, Texas; KCMC, Texarkana, Texas; KFJB, Marshalltown, Iowa; KGKL, San Angelo, Texas; KPLT, Paris, Texas; KRBC, Abilene, Texas; KSWO, Lawton, Okla.; KTFI, Twin Falls, Idaho; KUOA, Siloam Springs, Ark.; KXL, Portland, Ore.; WBRB, Red Bank, N. J.; WCAX, Burlington, Vt.; WCAZ, Carthage, Ill.; WCOC, Meridian, Miss.; WMRO, Aurora, Ill.; WNBZ, Saranac Lake, N. Y.; WSPB, Sarasota, Fla.; KGGF, Coffeyville, Kans.; KGIW, Alamosa, Colo.; KMTR, Los Angeles, Calif.; KVAK, Atchison, Kans.; KVGB, Great Bend, Kans.; KWKH, Shreveport, La.; WCBT, Roanoke Rapids, N. Car.; WCOP, Boston, Mass.; WFPG, Atlantic City, N. J.; WMUR, Manchester, N. H.; WOV and auxiliary, New York.

Licenses for the following stations were extended upon a temporary basis for the period ending September 1, 1942, pending determination upon renewals:

KABR, Aberdeen, S. Dak.; KFEL, Denver; KFKA, Greeley, Colo.; KFPY, Spokane, Wash.; KFRO, Longview, Texas; KID, Idaho Falls, Idaho; KIEM, Eureka, Calif.; KSEI, Pocatello, Idaho; WFCI, Pawtucket, R. I.; WGES, Chicago; WLOL, Minneapolis; WSAR, Fall River, Mass.; WSPD, Toledo, Ohio; WTJS, Jackson, Tenn.; WTSP, St. Petersburg, Fla.; KSCJ and auxiliary, Sioux City, Iowa; KVAN, Vancouver, Wash.; WADC, Tallmadge, Ohio; WBYN and auxiliary, Brooklyn, N. Y.; WHBL, Sheboygan, Wisc.; WHIS, Bluefield, W. Va.; WING, Dayton, Ohio; WKAT and auxiliary, Miami Beach, Fla.; WNBC and auxiliary, Hartford, Conn.; WSAZ, Huntington, W. Va.; WTAD, Quincy, Ill.

WEVD—Debs Memorial Radio Fund, Inc., New York City.—Granted renewal of license for the period ending October 1, 1944.

KSRO—Ernest L. Finley, Santa Rosa, Calif.—Present license extended upon a temporary basis, pending determination upon application for renewal, for the period ending October 1, 1942.

W8XO—The Crosley Corp., near Mason, Ohio.—Present license further extended upon a temporary basis only to September 1, 1942, pending determination upon renewal.

W8XUM—WBNS, Inc., Columbus, Ohio.—Present license further extended upon a temporary basis only to September 1, 1942, pending determination upon application for renewal.

W5XAU—WKY Radiophone Co., Oklahoma City, Okla.—Present license further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending September 1, 1942.

W9XLA—KLZ Broadcasting Co., Denver, Colo.—Present license further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending September 1, 1942.

WGL—Westinghouse Radio Stations, Inc., Fort Wayne, Ind.—Cancelled hearing on application for renewal of license heretofore scheduled, and dismissed said application.

DESIGNATED FOR HEARING

WJLS—Joe L. Smith, Jr., Beckley, W. Va.—Designated for hearing application (B2-P-2752) to change frequency from **1240** to **560 kc.**, and power from 250 watts to 100 watts night, 250 watts LS.

KSOO—Sioux Falls Broadcast Association, Inc., Sioux Falls, So. Dak.—Designated for hearing construction permit (B4-P-2667—Docket 5860) to increase power to 10 KW, increase hours of operation to unlimited, install a new transmitter, install directional antenna for night use and move transmitter locally.

K61LA—Metro-Goldwyn-Mayer Studios, Inc., Los Angeles, Calif.—Designated for hearing application for modification of construction permit (B5-MPH-73), requesting time within which to complete construction of station.

APPLICATIONS DISMISSED

The Commission dismissed the following cases involving the use of materials to construct new or change facilities of existing standard broadcast stations, inasmuch as petitions have not been filed under provisions of the Memorandum Opinion of April 27:

New Stations:

Jayhawker Broadcasting Co., Inc., Topeka, Kans. (B4-P-3466); The Gazette Co., Cedar Rapids, Iowa (B4-P-2283); Fred Jones, Mary Eddy Jones, and W. E. Hightower, d/b as Fred Jones Broadcasting Co., Tulsa, Okla. (Docket 5947).

For Changes in Facilities:

Educational Broadcasting Corp. (KROW), Oakland, Calif. (B5-MP-1531); Reporter Broadcasting Co. (KRBC), Abilene, Texas (B3-P-2553); John R. Pepper (WJPR), Greenville, Miss. (B3-P-3099); Central Calif. Broadcasters, Inc. (KRE), Berkeley, Calif. (B5-P-2987); Frank E. Hurt (KFXD), Nampa, Idaho (Docket 6260); News-Review Co. (KRNR), Roseburg, Ore. (Docket 6261).

MISCELLANEOUS

WSAI—The Crosley Corp., Cincinnati, Ohio.—Granted modification of construction permit authorizing construction of a 100 watt synchronous amplifier, for extension of completion date from July 26, 1942, to January 27, 1943 (B2-MP-1596). Granted modification of construction permit which authorized increase in power, installation of directional antenna for night use, and move of transmitter, for extension of completion date from July 26, 1942, to January 27, 1943 (B2-MP-1597).

WAUT—Evansville On the Air, Inc., Portable-Mobile, area of Evansville, Ind.—Granted modification of license for change in location of transmitter (B4-MLRY-44).

WEMU—The WGAR Broadcasting Co., Cleveland, Ohio—Granted license to cover construction permit which authorized a new relay broadcast station (B2-LRE-419).

KGDM—E. F. Peffer, Stockton, Calif.—Granted modification of construction permit for change in frequency, hours of operation, increase in power, install directional antenna for night use and new transmitter, for change in type of transmitter (B5-MP-1584).

KOAC—Oregon State Agricultural College, Corvallis, Ore.—Granted license to cover construction permit as modified, to install new transmitter and directional antenna for day and night use, increase power, and move transmitter (B5-L-1681); granted authority to determine operating power by direct measurement of antenna power (B5-Z-1417).

WHKC—United Broadcasting Co., Columbus, Ohio.—Granted license to cover construction permit for new vertical antenna system and move of transmitter (B2-L-1673); granted authority to determine operating power by direct measurement of antenna power (B2-Z-1406).

KGA—Louis Wasmer, Seattle, Wash.—Granted license to cover construction permit as modified, for installation of new transmitter and directional antenna for night use, increase in power, and move of studio and transmitter (B5-L-1677); granted authority to determine operating power by direct measurement of antenna power (B5-Z-1413).

WGRC—Northside Broadcasting Corp., New Albany, Ind.—Denied petition for grant of its application for construction permit to operate on **790 kc.**, 1 KW, unlimited, directional antenna, and amended the issues (Docket No. 6052).

WTEL—Foulkrod Radio Engineering Co., Philadelphia, Pa.—Denied petition for grant of application for construction permit (B1-P-3404—Docket 6299), and set same for hearing.

Hawaiian Broadcasting System, Ltd., Honolulu, T. H.—Denied petition requesting grant of application for construction permit (B-P-2978—Docket 6097), and designated same for further hearing.

Air-Waves, Inc., Baton Rouge, La.—Denied petition requesting grant of application for construction permit (B3-P-3202, Docket 6155), and designated same for further hearing.

Louisiana Communications, Inc., Baton Rouge, La.—Denied petition requesting grant of application for construction permit (B3-P-3242, Docket 6157), and designated same for further hearing.

Newark Broadcasting Corp., Newark, N. J.—Denied petition requesting grant of application for construction permit (B1-P-3249, Docket 6190), and designated same for further hearing.

WPRP—Julio M. Conesa, Ponce, P. R.—Denied petition insofar as it requests reconsideration and grant of application for construction permit (Docket 5678), and ordered amended issues of hearing.

WPRP—Julio M. Conesa, Ponce, P. R.—Denied petition requesting reconsideration and grant of application for modification of construction permit (Docket 6107), and ordered issues of hearing amended.

W63C—National Broadcasting Co., Inc., Chicago, Ill.—Cancelled outstanding construction permit (B4-MPH-69), deleted call signal, and closed the records of the Commission with respect to this station.

W59BM—The Baltimore Radio Show, Inc., Baltimore, Md.—Cancelled outstanding construction permit (B1-PH-119), deleted call signal, and closed the records of the Commission with respect to this station.

W73D—King-Trendle Broadcasting Corp., Detroit, Mich.—Cancelled outstanding construction permit (B2-PH-97), deleted call signal, and closed the records of the Commission with respect to this station.

W69GR—King-Trendle Broadcasting Corp., Grand Rapids, Mich.—Cancelled outstanding construction permit (B2-PH-93), deleted call signal, and closed the records of the Commission with respect to this station.

KTRN—Michael J. Mingo, Tacoma, Wash.—Denied petition requesting the Commission to extend the time for completion of station's construction.

Brainerd-Bemidji Broadcasting Co., Brainerd, Minn.—Denied request for an extension of time to meet the conditions of the Commission's grant of November 25, 1941, of a construction permit for a new station.

WOWO—Westinghouse Radio Stations, Inc., Fort Wayne, Ind.—Cancelled hearing on application for renewal of license for WOWO, and granted renewal upon a regular basis.

WKBV—Knox Radio Corp., Richmond, Ind.—Cancelled hearing on application for renewal of license for WKBV, and granted renewal upon a regular basis.

WNBW—National Broadcasting Co., Inc., Washington, D. C.—Cancelled outstanding construction permit (B1-MPCT-9), deleted the call signal and closed the records of the Commission with respect to this station.

W3XPP—National Broadcasting Co., Inc., Philadelphia, Pa.—Cancelled outstanding construction permit (B2-MPVB-75), deleted call signal and closed the records of the Commission with respect to this station.

WDGY—Dr. Geo. W. Young, Minneapolis, Minn.—The Commission reconsidered and set aside its action of July 7 in denying the application of Dr. Geo. W. Young, licensee of WDGY, for Special Service Authorization to operate unlimited time with power of 500 watts after local sunset during summer months, and 500 watts from sunset Minneapolis to sunset at Albuquerque, and 250 watts after sunset Albuquerque during winter months, and modifying, upon its own motion, the license of WDGY to provide unlimited time operation with 250 watts night, 5 KW LS.(*)

(*) This action puts the application back to its original status.

KGNC—Plains Radio Broadcasting Co., Amarillo, Texas.—Denied Special Service Authorization to operate on **860 kc.** with 500 watts night, 5 KW LS, unlimited time (B3-SSA-32).

KWFT—Wichita Broadcasting Co., Wichita Falls, Texas.—Granted petition to intervene in the hearing on the application of WROL, Knoxville, Tenn., for construction permit.

KDNT—Harwell V. Shepard, Denton, Texas.—Granted petition for extension of time in which to file appearance in re application for construction permit.

WKPT—Kingsport Broadcasting Co., Inc., Kingsport, Tenn.—Denied petition for continuance of hearing now set for July 22, in re application of WKPT and WGRC, New Albany, Ind., for construction permits.

WJAX—City of Jacksonville, Jacksonville, Fla.—Granted petition to dismiss without prejudice application for construction permit (B3-P-3012).

Camden Broadcasting Co., Camden, N. J.—Granted petition to dismiss without prejudice application (B1-P-2926) for new station.

WFAS—Westchester Broadcasting Corp., White Plains, N. Y.—Granted motion for continuance of hearing now set for July 23 to August 24, on modification of license to operate on **1230 kc.**, 250 watts, unlimited.

APPLICATIONS FILED AT FCC

560 Kilocycles

WIS—Surety Life Insurance Co., Columbia, S. Car.—License to cover construction permit (B3-P-2870 as modified) for increase in power and changes in directional antenna.

WIS—Surety Life Insurance Co., Columbia, S. Car.—Authority to determine operating power by direct method.

600 Kilocycles

WCAO—The Monumental Radio Co., Baltimore, Md.—Modification of construction permit (B1-P-3024 as modified) for increase in power, move of transmitter, installation of new transmitter and directional antenna, requesting extension of completion date from 8-8-42 to 9-8-42.

970 Kilocycles

WFLA—The Tribune Company, Tampa, Fla.—Construction permit to increase power from 1 KW night, 5 KW daytime to 5 KW day and night, and make changes in directional antenna for night use. Amended: re further changes in directional antenna.

1000 Kilocycles

WINS—Hearst Radio, Inc., New York, N. Y.—Modification of construction permit (B1-P-3026 as modified) for increase in power, change in hours of operation, installation of new transmitter, directional antenna and move of transmitter requesting extension of completion date from 8-3-42 to 11-3-42.

1370 Kilocycles

WSAY—Brown Radio Service and Laboratory, Gordon P. Brown, Owner, Rochester, N. Y.—Modification of construction permit (B1-P-2924) for change in frequency, increase power, install directional antenna, new transmitter and move transmitter requesting change in transmitter location from Greece, New York, to Brighton, New York, change type of transmitter and changes in directional antenna.

1540 Kilocycles

KXEL—Josh Higgins Broadcasting Co., Waterloo, Iowa.—License to cover construction permit (B4-P-3395 as modified), for new standard broadcast station.

KXEL—Josh Higgins Broadcasting Co., Waterloo, Iowa—Authority to determine operating power by direct method.

FM APPLICATIONS

W85A—General Electric Co., Schenectady, N. Y.—Modification of construction permit (B1-PH-19 as modified) for new high frequency broadcast station requesting change in type of transmitter and extension of commencement and completion dates.

W3XAD—RCA Manufacturing Co., Inc., Camden, N. J.—License to cover construction permit (B1-PVB-92) which authorized addition of transmitter to use Special Emission for FM on aural channel and to change designation of transmitter location.

W3XEP—RCA Manufacturing Co., Inc., Camden, N. J.—License to cover construction permit (B1-PVB-93) which authorized addition of transmitter to use Special Emission for FM on aural channel with power of 10 KW.

MISCELLANEOUS APPLICATIONS

NEW—Columbia Broadcasting System, Inc., New York, N. Y.—Extension of authority to transmit programs to CFRB and CKAO and other stations under the control of the Canadian Broadcasting Corporation for the period 9-15-42 to 9-15-43.

WGEO—General Electric Co., Schenectady, N. Y.—License to cover construction permit (B1-PIB-36) for changes in type transmitter.

KICD—Iowa Great Lakes Broadcasting Co., Spencer, Iowa.—Acquisition of control of permittee corporation by L. W. Andrews through purchase of stock from Fred A. Gefke.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Castle Co., Inc., 1374 Broadway, New York, engaged in the sale and distribution of silver chains and other articles of jewelry, is charged in a complaint with misrepresentation. (4785)

Congoleum-Nairn Inc., Kearny, N. J., engaged in the manufacture and sale of a line of hard-surface composition flooring, including a felt-backed floor covering called "Treadlite Rubber Cushion Inlaid Linoleum," is charged in a complaint with misrepresentation. (4784)

Franklin Sales Co., 212 South Franklin St., Chicago, is charged in a complaint with the use of lottery methods in the sale to ultimate purchasers of various articles of merchandise, including glassware and silverware, pen and pencil sets, radios, luggage, and electrical appliances. (4782)

Press Radio Service—A complaint issued charges Joseph Cohen, trading as Press Radio Service and as Press Supplies, 713 Otis Place, N. W., Washington, D. C., with misrepresentation in the sale of so-called press supplies, including press cards and automobile press tags which he represents as entitling the holder to pass through police and fire lines and to receive the courtesies and privileges extended to regular newspaper correspondents. (4783)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Grand Rapids Furniture Co., Inc., 300 Monroe St., Passaic, N. J., has been ordered to cease and desist from misrepresenting in any manner the place of origin or manufacture of the household furniture it sells. (4463)

Income Audit Service Corp.—An order to cease and desist from misrepresentation in the sale of a bookkeeping and accounting system known as "Income Audit Service" has been issued against Income Audit Service Corp., 3407 Perry St., Mount Rainier, Md., and Frank H. Hibberd, who controls the policies of the corporation. (4715)

Mar-Gol Health Products Corp.—Misrepresentation of the therapeutic properties of a product designated "Roberta Blueberry Juice" is prohibited under an order issued against Mar-Gol Health Products Corp., 203 North Humphrey Ave., Oak Park, Ill. The product is made from a type of blueberry grown by the respondent company in Florida and processed in its plant at Crest View, Fla. (4607)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Clark Mechanical Laboratories, Newark, N. J., entered into a stipulation to cease and desist from certain representations in connection with the sale of electric dry shavers. (3511)

Hill Laboratories, Carterville, Ill., stipulated that it will discontinue certain representations in connection with the sale of a medicinal preparation designated "Hemorointment." (03020)

Houston Milling Co., Inc., Houston, Texas, stipulated that in the sale of American Maid Arrow Feeds it will cease and desist from making the following representations:

That use of Arrow Turkey Growing Mash or Arrow Sure Shot Growing Mash will result in more eggs or greater profit, without limiting such basis of comparison to natural as distinguished from other prepared feeds; that use of Arrow Horse and Mule Feed enables animals to do more work at lower feeding cost; and that the addition of cereal grass to Arrow Feeds gives results that are not possible with many feeds containing no cereal grass. (03022)

Joel Isaacs Shirt Co., 1200 Broadway, New York, has entered into a stipulation to cease and desist from misbranding certain novelty shirts he sells. (3510)

Maytag Co., Newton, Iowa, engaged in selling Maytag washing machines, stipulated to discontinue representing, through use of the words "entirely safe" or the word "safe", or words of similar meaning, that there is no possibility of injury from the use of the wringer on the Maytag, or, by use of the expression "standard of the world for washer value", that the Maytag has been designated as a world standard for washer values by any person, group or organization with authority to set such a standard; that the wringers on most competing washing machines have sharp, protruding corners, or that there are 4,000,000 owners of Maytag washing machines. (03024)

Nott Manufacturing Co., 87 Frankfort St., New York, engaged in selling rat poisons designated "Rat-Not" and "Rat-Nots," entered into a stipulation to cease representing that either of his products is recommended by the U. S. Department of Agriculture; that they will drive outdoors to die those rats which are induced to take them; that either of the products assures the complete extermination of rats, or that either is harmless to humans, dogs, cats or livestock. (03023)

Queen Ant Control, Inc., Columbus, Ohio, has entered into a stipulation to cease and desist from certain representations in the sale of rat poison designated "Q. A. Ratabs." (03021)

The NATIONAL ASSOCIATION OF BROADCASTERS
1626 K STREET, N. W. WASHINGTON, D. C. Vol. 10, No. 30, July 31, 1942

WAR BOND CAMPAIGN

More than 70 percent of all radio stations in the country have agreed to become direct agents of the Treasury Department in the sale of War Savings Bonds, Secretary Morgenthau announced today.

Swiftly mobilized, 621 out of the country's 868 radio stations notified the Secretary that they would undertake this assignment. Radio thus becomes the first industry which as a whole is going outside of its direct field of action to aid the Treasury in its twelve billion dollars a year War Bond selling goal.

Within 24 hours after Vincent F. Callahan, Director of the Treasury's Press and Radio Sections, telegraphed an appeal for help, 511 stations responded with acceptances. It developed that several stations, some of them owned by newspapers, had already become issuing agents and were successfully selling War Bonds and Stamps directly to listeners and delivering bonds through arrangements with local banks.

It is estimated that approximately 90 percent of all stations in the country will become direct Treasury agents for the sale and delivery of War Savings Bonds. Included among the ten percent which it is expected will be unable to accept the assignment are stations which are on the air only a few hours or which do not have the facilities or personnel because they have been hard hit by Selective Service. Several are municipal stations; some may qualify as issuing agents at a later date.

Today there goes out to all the radio stations and the newspapers from the Treasury Department a bulletin reporting progress. In it will appear, among other items, a letter from Neville Miller to Secretary Morgenthau. The letter follows:

> "Mr. Callahan has, I am sure, advised you of the manner in which the radio broadcasters of the nation have responded to your suggestion that they act as issuing agents for war bonds. Over 600 stations already have been authorized to act in that capacity.
>
> "Broadcasters at all times are most happy to cooperate in every way in the government's war effort and this response on their part is but additional evidence of this spirit of cooperation.
>
> "I know that I reflect the sentiment of every broadcaster in saying to you that we deeply appreciate the faith and confidence which you have in our medium. We are proud of the record the industry has already made and welcome this opportunity to be of further service."

Programs for Victory

Each station is authorized to work out whatever local promotion plans would be effective in their areas. In Pittsburgh, KDKA, one of radio's pioneer stations, inaugurated its bond selling campaign with a public celebration on the steps of the City Hall with the mayor and Pennsylvania War Savings officials participating.

WBAL in Baltimore started off its campaign with a series of full-page newspaper advertisements. WUSR in Butler, Pennsylvania, stocked up with $5000 in bonds and sold out the first day, its actual sales totalling $6500. WFIL in Philadelphia is holding an announcers' contest, the announcer selling the most bonds getting a $25 bond. In Chicago WBEN is devoting one and one-quarter hours daily in the afternoon to selling bonds.

Poughkeepsie's WKIP is selling bonds by a series of radio auctions. This feature has been so successful that the first bond supply was sold out in several days, and the station has asked the Federal Reserve Board for more bonds. Station WCPO in Cincinnati, Ohio, has made a tie-up with the RKO theatre chain and has enlisted the aid of Junior League girls and is promoting bonds on all its programs. In Bangor, Maine, station WOBI is offering prizes for the best suggestion as to how a station can sell bonds and is touring a bond wagon through the streets. In New York City station WJZ is selling bonds directly over the air and has erected a booth in Radio City in cooperation with the American Women's Volunteer Service. Station WINX in Washington, D. C., is making direct sales in cooperation with a taxi company, the drivers delivering the bonds.

One of the most novel ideas is being executed by stations WGR and WKBM in Buffalo, N. Y. These stations have inaugurated a youth movement called the "Commando Corps of the Court of Honor." Boys who sell a $25 bond are made corporals. A $50 bond sale mounts the boys to a sergeant. Station KTSA in San Antonio, Texas, in cooperation with a local women's club, is selling bonds and stamps in the downtown. In Des Moines, Iowa, station WBO is promoting a contest between two of its most popular announcers. Station WLS of Chicago, Illinois, opened its campaign with an all-night program. These stations divided the town into two teams with the artists making direct appeal over the air and prizes being awarded to the teams selling the most bonds.

WGAR, Cleveland, writes:

> We are awaiting receipt of War Bonds from the Cleveland Federal Reserve Bank, and the moment these are available to our listeners we will shoot the works.
>
> We already are building up the idea on various programs, advising our listeners that within a few days they can buy bonds at Cleveland's Friendly Station.
>
> Our selling theme at the beginning is going to be built around certain personnel that are on the air every day. For example, our early morning Musical Clock announcer, Johnny McKnight, is going to appeal to all his early morning listeners to help him observe "Johnny McKnight Day," by coming in so that he personally can issue them bonds.
>
> Our Women's Editor is going to do the same thing on her program every day, so is our Musical Director on his program, and certain of our newscasters.
>
> However, we certainly are not going to neglect publicizing many other places where bonds can be obtained. We will continue to give the same amount of time to this as we have always given. Efforts on our own behalf will simply be additional time.
>
> The station will establish a "WGAR Honor Roll," listing in a special broadcast the names of those who have bought from WGAR. We hope this will provide an incentive to those who otherwise may put off buying or even neglect buying from their Post Office, Bank, etc.
>
> Next Sunday we are using Mr. Morgenthau speech, and will follow it with a statement by John Patt, our Vice President and General Manager.
>
> We have also just arranged to have some visiting celebrity appear at our studio each afternoon between five and six to sell

PROGRAMS FOR VICTORY

(Continued from page 461)

bonds, and also appear on the air. We will lead off next Monday with Tommy Dorsey selling and autographing bonds right here in our studio. That, of course, will be publicized plenty prior to Monday afternoon.

WCBI "Buy at Home Campaign"

With the blessings of the Columbus Chamber of Commerce and the Committee for the Sale of War Bonds and Stamps, WCBI, Columbus, Miss., inaugurated their new series of daily hour broadcasts entitled, "Buy at Home." The program is co-sponsored by 20 leading firms of the Columbus area who urge local residents to "Buy at Home," thereby saving tires and gas and also effecting a savings in purchases which may be diverted to buying War Bonds and Stamps. The idea caught on with a bang and is reaping fine results for all concerned. The broadcast features martial music and two announcers alternate with commercial copy and announcements from the Treasury Department.

Every cooperating sponsor was presented with a large red, white and blue placard to display in his show windows carrying the message of the program idea, time of broadcast and pertinent information about the program. The broadcast was sold to cover a period of two months, July and August. The station reports this idea works fine and is a new source of revenue during the comparatively dull summer months.

Arthur B. Church, president, KMBC, Kansas City, has offered a series of cash prizes as incentive bonuses in the scrap metal collection.

The air campaign itself opened with a half-hour show Sunday, July 26. It included a pickup from a scrap metal compressing plant and a studio pickup with farmers and others who outlined the campaign.

One Hundred Dollars in Prizes

Following are the prizes which Mr. Church has authorized:

$50 to the Future Farmers of America or 4H group that collects the most scrap metal; $25 to the group collecting the second largest amount; $25 to the individual in either the FFA or 4H who collects the most.

The competition also included the Boy Scouts. Fifty dollars will be paid to the Boy Scout troup that makes the largest collection; $25 to the Troup that makes second largest collection and $25 to the individual Boy Scout who tops all others.

Radio Delivers WAACS

How an intensive recruiting campaign operates to produce results is attested by KOY, Phoenix, Ariz. Here is the story as certified by Frances C. Myers, coordinator of war production for the station. It concerns cooperative efforts with the U. S. Army recruiting office in the recent drive for the Women's Army Auxiliary Corps.

Says Miss Myers: "The local recruiting office first released the announcement to the press. Some days later we contacted the office to inquire what response they were receiving and learned '*practically none.*' We then joined forces with them and waged an all-out campaign to get the women they needed.

"The call to Arizona was for thirty-two women and, eventually, by intensive driving on the air, we did find for them women in all of the categories. Many of them fell by the wayside in the final examinations, but that was not our fault. The important factor is that we did secure for the recruiting office the thirty-two women!"

The recruiting program titled, "We're in the Army Now!" Below is the announcers introduction of the opening broadcast.

"There's a new cry throughout the nation. It's a battle cry . . . a call to arms for those who love the dream of Freedom! It's not the voice of strong, determined men . . . it's the voice of courageous women—mothers, wives, sisters, sweethearts! It's the voice of the WAACS—The Women's Army Auxiliary Corps."

Musical Comedy by Army Men

"Park Your Khaki," the musical comedy written, directed, orchestrated and produced by the men of Fort Devens, Mass., will be broadcast by stations WBZ and WBZA, this evening, at 10:30. The revue, the first of its kind produced here, features 40 men from the New England States.

"Park Your Khaki" is full of new tunes, comedy, and sketches and satires on Army life. It was produced by Private Walter Petersen, of Boston, who was with the Shuberts before entering the Army, Private Richard Feinberg, of Brookline, Mass., former song writer and theater producer, and Private Kelly Yeaton, of Lisbon Falls, Maine, former writer and theatrical technician. The music is under the direction of Corp. Bob Kaplan, son of Ben Kaplan, radio editor of the Providence Journal and Bulletin. The cast includes men who have been in radio, the theater and motion pictures.

WBZ-WBZA Helps Coast Guard

Special programs, devoted to telling the people of New England of the activities and services performed by the U. S. Coast Guard, will be presented next week over Westinghouse Stations WBZ, Boston, and WBZA, Springfield. The week will be ushered in by a concert by the band of the Coast Guard Academy, of New London, Conn., broadcast from Hatch Memorial shell, on the Esplanade, Boston, over WBZ and WBZA, Sunday, Aug. 2, at 4:30 p. m.

Tuesday, Aug. 4, will be Coast Guard Day on the air over WBZ and WBZA, with programs throughout the day devoted to this vital branch of our armed forces. A dramatization, written to show the work the men of the Coast Guard perform, will be heard on the air at 7:30 p. m. The Coast Guard Band will also be heard on Sundays, Aug. 2 and 9, at 6:15 p. m., on its regular weekly schedule.

SENATORS RAP COMMENTATORS

On Monday, the 27th, some of the members of the Senate had a field day with radio commentators, newspaper editors and columnists. The discussion came about as a result of their criticism of Congress.

Senator O'Mahoney (D-Wyo.) led off with a charge that, "Too many radio commentators and too many editors are merely propagandists, who are trying to convey to their listeners or to their readers the points of view which they themselves hold, even though in many cases they entertain these opinions without any factual basis."

No words were spared by either Senator O'Mahoney or the others who spoke upon the subject. Names of commentators were mentioned and specific instances cited. Senator Chandler (D-Kentucky) complained about a misstatement by one commentator with regard to what that commentator charged was an attempt on the Senator's part to secure an appropriation for a Senatorial investigation by a subcommittee of which he is Chairman of Alaskan defenses. He denied ever having made a request for an appropriation or participated in any activity with respect thereto. He was strongly backed by Senator Lucas (D-Illinois), who said:

"In my humble opinion, the American people are entitled to know the facts, whether they come from radio commentators, from the press of the country, from the Army, the Navy, or the Commander in Chief. If a communique of any kind is to be issued, regardless of its source, the American people are entitled to know the facts. * * * If in this crisis we give the people the facts, we do not need to worry about their response. However, for some reason or other, the people are given innuendos and indictments by implication, leaving the reader or the listener in the air as to what the next move is to be. * * *

"Regardless of what is done in peacetimes, it seems to me that in the great emergency through which we are passing, when the life of this Nation is threatened, every individual, regardless of mercenary or other reasons he may have as a radio commentator or as a newspaper columnist, should in this hour give the best that is in him. * * *

"Let me say one further word as to some of the so-called wizards over the radio. I think the time has come when some sort of an investigation should be made to ascertain the motives and the reasons why some of them continually misquote the facts and take the position they do. Some of the things they say are absurd and ridiculous. Over the radio they constantly attempt to substitute their judgment for that of men who have been trained for years and years in some particular military, air, or naval activity or strategy. * * *"

Senator O'Mahoney resumed and said:

"Democracy cannot be maintained unless we restrain ourselves. Democracy cannot be maintained if the press allows itself to condemn upon small evidence those who happen to be in the public eye. Democracy cannot be maintained if radio commentators, hurrying to make their script ready for a deadline, are not careful about what they propose to state as facts, and then go on the air with hurried interpretations of events that have happened."

Again joining in the discussion, Senator Lucas spoke as follows:

"I think the Senator has done a real service in discussing the misstatements of fact which are now being hurled over the ether waves by some radio commentators. * * * I am of the opinion—and its is based upon reaction in my own family—that at this hour in our national life radio commentators have a tremendous influence and impact upon what the American people are thinking about, and undoubtedly are helping the people to form their conclusions as to what should or should not be done in this emergency."

He then made the following rather startling suggestion:

"Mr. President, I desire to read a portion of the Communications Act, and then make a suggestion.

"Under section 303 of that act the following provision is made:

> "The Commission from time to time shall have the authority to make general rules and regulations requiring stations to keep such records of programs, transmissions, or emergency communications or signals as it may seem desirable.

"I do not doubt that in the exercise of that power the Commission has caused every radio station to submit to it a copy of every address which has been delivered from time to time by the various commentators, and no doubt at this moment they are watching them more carefully than ever before. I think they should do so.

"It seems to me, Mr. President, as a practical suggestion, that Elmer Davis, along with the Commission, but especially Mr. Davis, could very well call in the sponsor of Carter's Little Liver Pills or the sponsor of this perfume, or that drug, and perhaps the owner of the station, and sit down with them and point out that during the last 3 months John Jones, the commentator, has said one thing after another which, in the opinion of Mr. Davis, was not in the best interests of unity, and which was not in the best interests of winning the war under the present very trying circumstances. * * *

"I have no quarrel with any newspaperman, I have no quarrel with any radio commentator, I have no quarrel with any columnist. * * *

"I speak with the utmost sincerity upon this question. I speak in the interest of the common welfare of all Americans. In the interest of national unity I make this suggestion which I hope will have the effect of lighting a little spark in the hearts of some of these men, with the result that they will give us only true facts about the present situation. * * *

"I am satisfied that if Elmer Davis would call in the sponsor and call in the officials of the station over which the type of speech to which reference has been made was delivered, and would sit down with the sponsor and read to him what was said by this particular commentator from time to time, and point out the effect that kind of propaganda is having insofar as the division of our people is concerned, and upon unity in the war he could appeal to the sponsor on the ground of high patriotism to ask the commentator to get in line and refrain from making statements in his broadcasts which weaken national unity, or probably the sponsor himself would see to it that the commentator was ultimately taken off the air."

On this point Senator O'Mahoney expressed serious doubt and said:

"I cannot quite agree with the suggestion the Senator has now made, that Mr. Elmer Davis, or any one else, should be empowered to call in any one and say, 'You did not say the right thing,' or 'This is what you said,' or 'That is what you said.'

"If the Federal Communications Commission or any Government employee, whether the employee is working under civil service or working as a volunteer, were to undertake to discuss, with commentators or editors, the opinions they have expressed or the comments they have made, that would immediately lead to the charge that they were being prevented from saying what they wanted to say.

"Mr. President, it is much more important that everyone be permitted to say what he pleases as he pleases. My appeal this afternoon to the radio and to the press is to exercise that restraint which is becoming a free people, and not to make charges which cannot be substantiated immediately by reference to the facts, and certainly not disseminate upon the air waves of the world accusations against public servants based upon hearsay and innuendo and suspicion, at a time when, above all things, it is essential for all of us to unite in the prosecution of the war."

Concluding the discussion Senator Lucas observed:

"One of the troubles with many radio broadcasters is that they are not responsible to anyone, so to speak. One sponsor has them for 1 week or 6 weeks, and another sponsor has them for another 6 weeks. They are in a category wholly different from that of a newspaper, as I view it, and certainly we ought to have all the information we possibly can obtain in regard to the sponsor, the advertisement, and the individual who is commentating for 1 minute upon a particular article and during the other 14 minutes telling us what is wrong with the world."

"Is Your Hat in the Ring?"

This booklet containing suggestions and advice to candidates for public office using radio has proven extremely popular. So much so, in fact, that it is being revised. The revision will contain the up to date statistics and some suggestions other than those given in the original book. They will be available in quantities to stations for distribution to political candidates at 4 cents a copy. Here is an ideal way to do a candidate a good turn and get some business for your station. *Send your order now!*

Engineering

"BROADCASTING UNDER WAR CONDITIONS"

The foregoing is the title of an article appearing in the August issue of ELECTRONICS. Written by J. B. Epperson, Chief Engineer, Scripps-Howard Radio, Inc., and Beverly Dudley, Acting Managing Editor, ELECTRONICS, the article gives a very clear exposition of many of the technical phases of war time broadcasting operation. We are grateful to ELECTRONICS and the authors for permission to reprint it. The article follows:

The effects of war conditions on the broadcast industry are demanding the most careful consideration of both operating and regulatory bodies at the present time. From the standpoint of technical operations these problems are primarily twofold, although additional factors sometimes enter to affect the operation of broadcast stations adversely. The main problems are: (1) difficulty in obtaining replacement tubes and repair parts due to the high priorities required, and (2) shortage of technical operators and engineers. Unless some way is devised to care for their future needs, broadcast stations may face eventual shutdown in cases of equipment failures.

The equipment and tube shortage is brought on because all manufacturers of transmitting equipment and tubes are extraordinarily affected by the war. All are carrying a heavy defense load, with the result that the A-10 priority rating formerly assigned to broadcasting for maintenance and repair became practically worthless for obtaining tubes and other equipment. Recognizing this condition, WPB issued its order P-129 on April 23, 1942, assigning an A-3 rating for critical materials needed for maintenance and repair. However, because of the increasing scarcity of critical materials, it appears that the A-3 rating is little better than the former A-10 rating when it comes to the purchase of transmitting tubes. This is borne out by the following extract from a form letter received from one tube manufacturer immediately after the P-129 order became effective:

> "The critical nature of many essential materials required in the manufacture of transmitting tubes is such as to make it impossible for us to replenish our stock under the A-3 rating. Under these circumstances we shall continue to supply tubes wherever possible against your orders when covered by the A-3 rating. We feel that you should be advised, however, that for reasons aforementioned, we can fill such orders only provided we have the materials available and we do not have any other unfilled orders bearing higher ratings. It will also be impossible for us to commit ourselves to definite delivery unless the preference rating be sufficiently high to enable us to use it in the purchase of additional materials."

With few exceptions, broadcast stations have managed to keep their equipment in a satisfactory operating condition, but this has been accomplished largely at the expense of reserve stocks of materials. There can be no doubt that the demands on equipment manufacturers have not yet reached their maximum and that it will be necessary to devise some way by which it will be possible to care for future demands of the industry.

Pooling Arrangement as Conservation Aid

To alleviate the shortage of equipment (especially tubes) and to assure that broadcast service will be maintained to the fullest, a "share the spare parts" program has been recommended by the Defense Communication Board (now the Board of War Communications). In brief, this proposal, released on May 24, calls for: (1) inventory of equipment of all stations, together with establishment of requirements of minimum equipment necessary to maintain operations, (2) establishment of conservation districts, each district to contain enough stations so that a representative stock of parts is available in each and to be presided over by a civilian administrator and two assistants, (3) the district administrator and his assistants will be charged with the checking and control of the inventory stock in his district and the redistribution, on a sales basis, of surplus equipment from one station to another.

Such a plan could operate only with the full cooperation of the broadcasters and this cooperation is assured by the fact that it originated with the broadcasters themselves and was prepared and submitted to the BWC by the Domestic Broadcasting Committee of the Board. It is believed that the operation should go a long way to relieve the priorities problem now confronting the 900-odd broadcasting stations in repair and maintenance materials.

It would appear that such a provision for conservation is not only ticklish in its administration, but is, at best, only a temporary stop-gap. There is evidence that not all station operators are fully behind this plan since, it is pointed out, the "share the spare parts" program penalizes the well managed, conservatively operated stations for the benefit of the less efficient stations. Another difficulty with this program as initially outlined is that it makes no provision for the replacement of parts which may be used up in normal operation. Under a system of this sort, it is conceivable that all the broadcasting services of the country could disintegrate simultaneously, like the "One Horse Shay."

The lack of parts is of little concern for many recently modernized stations, or those near metropolitan centers of supply, but it is an increasingly difficult problem for the stations in areas remote from production facilities. A number of stations are unable to obtain such spare parts as condensers, resistors, sockets, transformers or repair parts for their transmitters. Extension of audio line facilities is hampered, and portable and remote amplifying equipment once damaged will probably not be replaced. This situation is being faced as a matter-of-fact problem whose solution must, somehow, be obtained.

Many stations have instituted a complete house cleaning program in which broken and obsolete parts from used equipment have been repaired and reclaimed for future use, even if under restricted conditions. More rigid schedules of repair and maintenance are being enforced, and systematic maintenance is aided by assigning regular duties on a well planned time schedule. Most stations have reduced the filament voltage of tubes to obtain longer life, the amount of reduction being determined by limitations of audio distortion or power output. One station engineer reports that the life of tubes in his station has been increased from 4½ to 7 months through such a procedure.

With regard to tubes, many broadcast operators are caught between the sharp points of a two-horned dilemma. On the one hand they are required by the standards of good engineering practice to maintain an adequate supply of replacement tubes. On the other hand, the heavy demand on tube production for military services makes it difficult or impossible to conform to these regulations. To alleviate the situation somewhat, some stations are reclaiming old tubes previously regarded as unsuitable for operation, but which may be pressed into service under a program of restricted materials. Other stations have experimented with the repair of old tubes. Some engineers feel that too little attention is being given to the rebuilding of transmitting vacuum tubes as a war conservation measure. According to the statement of one company who has rebuilt several tubes, approximately 90 per cent of the defective transmitting tubes above 250 watts in size can be satisfactorily rebuilt. The cost of rebuilding a transmitting tube is ordinarily one-half that of a new tube of the same type. A rebuilt tube might even be better than a new one, providing the tube was originally built before substitute materials were employed.

Even more important than the shortages of tubes and other physical equipment is the shortage of technically qualified personnel for station operation. Through the exercise of additional maintenance and repair work, a station in normally good operating condition can be kept in satisfactory operation for a considerable length of time, with capable technical administration. But the technically trained operating and engineering personnel are vital to its operation and cannot be so easily replaced. Many stations are having difficulty in obtaining experienced technicians since so many have been absorbed by the various government services. The main difficulty arises from the necessity of placing inexperienced men in important positions, and the inability to find individuals with a background sufficiently adequate to become thoroughly trained in a short time.

Personnel Shortages, Too!

There is no blanket deferment from military service of men engaged in station operation. Indeed, the broadcast industry has contributed many of its best technical personnel to the Army, or Navy, to various government administrative agencies, or to technical teaching and research jobs, all of which further the country's war effort. Certainly no one makes such a change without the fullest desire to be of maximum assistance, while those left to carry on are performing equally valuable (if less publicized) work in the additional duties imposed upon them. But several stations have lost heavily of their technical personnel, and are unable to replace licensed operators. The loss of technical personnel does create a serious question as to how the normal services are to be maintained or even extended with an ever-decreasing technical staff.

There are several partial solutions to the problem of personnel; none are completely satisfactory. Control room operators having operator's licenses but no transmitter experience, have been transferred to the operation of the transmitter, and have, in turn, been replaced by persons less experienced. Qualified individuals who, for one reason or another, are not likely to be called into military service, have been used wherever possible. The shortage of personnel has, in some instances, led to outbidding by various stations for the services of those still available. However, a more frequent and self-reliant approach seems to be that of training personnel for broadcast jobs by the NYA or other agencies. In several cases women have been trained as control room operators. It is too early to draw definite conclusions from the few cases in which women have actually been engaged in control room work, although there are indications that qualified women operators are entirely capable of discharging control room duties properly.

Concern has been expressed by some station managers that the necessity for employing less experienced personnel may force a relaxation of standards of operation which could become permanent. Under such conditions, those technically trained men now leaving the broadcast industry might be expected to find other careers for themselves after "the duration." Nevertheless, the opinion is frequently expressed that relaxation of certain standards of good engineering practice, especially with regard to requirements as to distortion tolerances and time off the air, will help materially in easing the present problems.

Several stations, especially the smaller ones, complain of loss of revenue at a time when prices are rising and additional services are required of their operating personnel. The monitoring of key stations for blackout warnings is a problem for some stations who have already lost heavily of their operators and find themselves operating with shoestring personnel. Protection of the station against possible invasion or bombing attacks, fire, lightning, or acts of sabotage requires additional vigilance, especially of stations near the territorial limits of the United States. The need for emergency service equipment, in the event of failure of regular equipment, is recognized by foresighted operators, but again difficulty is encountered in obtaining the necessary priority ratings for engine-driven generators and similar equipment.

Broadcasting forms an integral and important part in the lives of all in the United States. It is a powerful and important factor in knitting together the nation as a unified whole. It is perhaps the most effective single method of disseminating propaganda in the dictionary sense of "tending to persuade by just discussion and argument." One has only to listen to an hour's radio program to be convinced of the importance broadcasting is playing in the building up of national solidarity, for each and every program makes its appeal for some cause or another which is intended to further our war effort. Only one important speech from Washington or London need be marred, through failure of strategically critical equipment or of inexperienced personnel to bring us forcefully to the realization that broadcasting must be maintained because it is so vital a cog in our vast war effort.

There is no use taking an alarmist's point of view with regard to the present situation, for those factors which are being recognized as potentially dangerous can be rectified in time to alleviate any serious disruption of service. Nevertheless, the problems confronting the broadcasting industry must be squarely faced immediately, so that steps may be taken to assure the industry that it will receive the personnel and equipment it requires to maintain its services.

PRIORITIES

Higher preference ratings to enable communications companies to obtain copper necessary for operating construction, maintenance and repair were granted Tuesday by the Director General for Operations of the War Production Board. The action was taken in amendments to Preference Rating Orders P-129 and P-130.

P-129 raises the rating for telephone, telegraph, cable and radio companies for copper from A-3 to A-1-j. Copper order M-9-a restricts deliveries of copper to A-1-k or higher and Tuesday's action enables these communications companies to obtain materials of copper in conformity with that order.

P-130 gives a similar rating for deliveries of copper necessary for operating construction by telephone companies, such as connection of subscribers, changes in central office equipment, and the like.

The A-3 rating continues in effect for supplies other than copper.

QUARTZ CRYSTALS

Radio broadcast stations can now secure replacements of defective, cracked or broken radio oscillators and filters and optical parts. Under amendment No. 1 to Order M-146 issued July 23, the WPB lifted restrictions on such replacements "in instruments directly used for war, public health, welfare or security". Radio broadcasting comes under "welfare", WPB advised NAB.

Under the terms of the order, purchasers of quartz crystals or parts containing them must file a certificate that the use of the crystals will conform to the purposes of the order. If, however, the purchaser is a U. S. agency or a foreign governmental agency, the certificate is not required.

Promotion

WAIM KNOWS WHO LISTENS

WAIM, Anderson, S. C., has just issued a sizable brochure on "Who Listens to WAIM".

It is a research in listening conducted for the station by the Medill School of Journalism, Northwestern University, Evanston, Ill. The brochure is replete with charts illustrating the findings of the investigators.

In a foreword, Wilton E. Hall, chief station executive, said:

> "We can think of nothing more useless than a radio station that has no listeners. When WAIM was built in 1935, we realized the fallacy of Emerson's better-mouse-trap theory and immediately set about to develop good programs and to carry them to the listeners of our area on the wings of enthusiastic public co-operation in every worth-while phase of broadcasting. We did not wait for listeners to come to us, nor did we wait for the organizations and institutions of this section to come and ask for our assistance. Instead, we rolled up our sleeves and resolved, first of all, to become a community asset second to none, and to serve well the people of our Piedmont section of North and South Carolina and Georgia; always to do twice as much as was expected of us as community leaders. This procedure was applied

with equal force to good entertainment features, alert local, national, and international news coverage, and to the wholehearted support of everything for the benefit of our section."

HERE'S HOW!

Walt Dennis, sales promotion manager, KVOO, Tulsa, has prepared, "HERE'S HOW to sell and serve an important market area."

The booklet, issued by the Tulsa Sales Executive Club, on July 10, was mailed to every manufacturer and wholesaler in the United States doing business with Tulsa stores and business firms.

TELL LISTENERS ABOUT FREE PAMPHLET

In an address on July 26, before the National Police Academy, Secretary of the Navy Knox pointed out that Axis sabotage and propaganda are being intensified in this country. Specifically, the Secretary said:

"We know that we can expect attack by sabotage, by spying, and by propaganda. These attacks have already begun. We know that this will be intensified and spread all over our country."

The Office of War Information will appreciate radio commentators and local stations throughout the country calling the remarks of the Secretary to the attention of their listeners and suggesting that as a means of equipping themselves to combat Axis propaganda, they get a free copy of the "Divide and Conquer" pamphlet recently issued by the Office of War Information.

Listeners should write directly to the Office of War Information, Washington, D. C.

Sales

PER INQUIRY AND FREE TIME

Carl Calman, Advertising-Promotion Manager of the Book-of-the-Hour Company, 395 Broadway, New York City, offers a P.I. deal on "Air Raid Protection and First Aid."

The Progressive Circulation Company, Inc., Hollywood, California, seeks a P.I. deal for the sale of Collier's Magazine.

The United Advertising Companies again offer a P.I. deal, this time on Champion Auto Alarm.

Listener Activities

CHILDREN'S PROGRAMS

The Radio Council of Louisville, Kentucky, under the leadership of Mrs. F. C. Linkenberg, President, has recently issued 10,000 bulletins with listings of good programs for children in that area, broadcast over Stations WHAS, WAVE, WINN and WGRC. The selections were made by the Research and Bulletin Committee of the Louisville Council.

The Council secured the cooperation of the Model Farms Dairy of Louisville and it is with their compliments that the release is printed.

Following are the programs selected for boys and girls:

Monday

1:30 p.m.	Open Book	WINN
7:00 p.m.	Cavalcade of America	WAVE
7:30 p.m.	Margaret Speaks	WAVE
8:30 p.m.	Dr. I. Q.	WAVE

Tuesday

11:30 a.m.	U. S. Marine Band	WGRC

Wednesday

7:00 p.m.	Nelson Eddy	WHAS
7:30 p.m.	Dr. Christian	WHAS
8:00 p.m.	Junior Miss	WHAS

Thursday

7:30 p.m.	Aldrich Family	WAVE

Friday

11:30 a.m.	Summer Playhouse	WGRC
7:00 p.m.	Cities Service Concert	WAVE
7:30 p.m.	Information Please	WAVE
8:00 p.m.	March of Time	WINN
8:30 p.m.	Brewster Boy	WHAS

Saturday

9:00 a.m.	Rainbow House	WGRC
9:30 a.m.	American Farmer 4-H Clubs	WHAS
10:00 a.m.	Lincoln Highway	WAVE
10:30 a.m.	U. S. Army Band	WGRC
10:30 a.m.	Let's Pretend	WHAS
10:30 a.m.	Little Blue Playhouse	WINN
11:00 a.m.	Growing in Safety	WINN
1:00 p.m.	U. S. Marine Band	WAVE
4:00 p.m.	Cleveland Symphony Orchestra	WHAS

Sunday

1:30 p.m.	Sunday's Children	WINN
2:00 p.m.	Columbia Symphony	WHAS
2:30 p.m.	Army Hour	WAVE
4:00 p.m.	Family Hour	WHAS
4:30 p.m.	Plays for Americans	WAVE
8:30 p.m.	American Album of Familiar Music	WAVE

Monday, Tuesday, Wednesday, Thursday, Friday

8:35 a.m.	Treasure Chest	WGRC
4:00 p.m.	Vic and Sade	WHAS

Labor

TALENT FEES

The trade press has been having a field day with the subject of talent fees and the Wage and Hour Act.

C. T. Lucy, WRVA, chairman of the NAB Wage and Hour Committee, discussed the whole matter at a meeting Monday with Joseph L. Miller, NAB director of labor relations.

It was decided that the NAB, as soon as possible, should send out to all members an authoritative bulletin on the subject. This will be done.

COST OF LIVING

The Labor Department reports that the cost of living increased 0.8 per cent between May 15 and June 15, and on June 15 was 11.3 per cent above June 15, 1941. It is now 116.4 per cent above the 1935-39 average.

AVERAGE COMPENSATION

The average pay envelope in broadcasting stations the week of October 12, 1941, executives excluded, contained $38.88, as compared with $37.75 the corresponding week of 1940. Network employees were not included.

Technicians that week received an average of $42.93; announcers, $36.76.

A complete breakdown of these FCC figures will be available within a few weeks.

CENSUS SHOWED 28,839,154 RADIO HOMES IN 1940

The U. S. Bureau of the Census issued today an advance release showing radio units by states, giving for the first time a total figure for all states. It shows that 82.8% of all occupied dwelling units were equipped with radio. The NAB projection of the total figure is 28,839,154. This figure is subject to revision when the by-county figures are released for the five states, New York, Pennsylvania, Ohio, Illinois, California.

The annual NAB estimate of radio homes in the United States at January 1, 1940, was 28,000,000 (NAB Reports, April 12, 1940, p. 4171). The preliminary Census figure which dates April, 1940, indicates that the January 1st estimate was in something approaching perfect alignment. The estimate of "Radio Today" in January, 1940, was 28.700,000, which for all practical purposes, was an accurate estimate.

The estimates of the Joint Committee on Radio Research, as of January 1, 1938, appear now to have been more accurate than was originally hoped. The total figure for the United States, 26,666,500, follows in perfect alignment with the annual estimates made for the industry and the 1940 Census figure indicates that no slight change in that trend is necessary.

The individual state estimates of the Joint Committee were not quite so accurate. Generally, the Joint Committee was too conservative in New England, Middle Atlantic, East North Central and West North Central states, insofar as percentage ownership was concerned. The Joint Committee figures were high, generally, for the South and Pacific Coast. A saving factor, however, was that the estimates of the Joint Committee of the total families in a number of cases were low, which offset the errors in per cent ownership, resulting in a figure of radio families not too far out of line.

The following table gives the figures of annual estimates which have been made available to the industry each year:

HOMES WITH RADIO SETS

Date		*Estimate*	*Census*
January 1,	1923	60,000	
"	1924	1,000,000	
"	1925	2,500,000	
"	1926	3,500,000	
"	1927	5,000,000	
"	1928	6,500,000	
"	1929	7,500,000	
"	1930	9,000,000	
April—	1930		12,048,762
January 1,	1931	12,000,000	
"	1932	14,000,000	
"	1933	16,810,000	
"	1934	20,402,000	
"	1935	21,456,000	
"	1936	22,869,000*	
"	1937	24,600,000	
"	1938	26,666,500*	
"	1939	27,500,000	
"	1940	28,000,000	
April—	1940		28,839,202**
January 1,	1941	29,300,000	
"	1942	30,600,000	

---

* Joint Committee on Radio Estimates.

** NAB Preliminary projection from Census data.

RADIO HOMES IN THE UNITED STATES—1940

Estimated from 1940 U. S. Census of Housing Data. Number of Occupied Dwelling units and percent radio-equipped as reported by U. S. Census, and number of dwellings having radio estimated from Census data by projecting percent ownership to the number of units not answering the radio question, applied separately to Urban, Rural-Nonfarm and Rural-farm units for each county.

	All Units			Urban Units			Rural-Nonfarm Units			Rural-Farm Units

* Preliminary estimates calculated from U. S. Census advance release, "Home Radios: 1940," Series H-13, Number 1, which presents urban, rural-nonfarm, rural-farm, and total figures for each state. NAB will issue final estimates when the U. S. Census Bureau releases state figures by county.

† Preliminary—subject to correction of 5 states noted with asterisk.

NAB Research Department

July 27, 1942

TEXAS

Estimated Radio Homes, 1940

Number of Occupied Dwelling Units as reported by U. S. Bureau of the Census in advance release, Series H-7. Percent radio-equipped calculated from Series H-7 Bulletin following the Census Bureau practice. Number of radio units, or radio homes, estimated by applying percent ownership to those units not answering radio question and adding such to those reporting radio.

July 22, 1942

FEDERAL COMMUNICATIONS COMMISSION

FCC MONITORING

By action of the FCC on July 28 the name of the Foreign Broadcast Monitoring Service was changed to Foreign Broadcast Intelligence Service. It was believed that the term "monitoring" describes the single operation of listening, whereas the service also involves news intelligence and news analyses.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, August 3. They are subject to change.

Tuesday, August 4

WMAW—C. T. Sherer Co., Inc., Worcester, Mass.—Modification of C. P. for extension of completion date to 8-17-42, under C. P. only; **1200 kc.,** 250 watts. Amplifier stations: 100 watts, unlimited.

Thursday, August 6

WIBC—Indiana Broadcasting Corp., Indianapolis, Ind.—C. P., **1070 kc.,** 5 KW night, 10 KW day, unlimited, DA-night.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KGHI—Arkansas Broadcasting Co., Little Rock, Ark.—Granted construction permit (B3-P-3495) to install a new transmitter (replacement for present equipment). (Unqualified recommendation by FCC Inspector that present equipment is obsolete and new transmitter on hand.)

KOVC—KOVC, Inc., Valley City, N. Dak.—Granted modification of license (B4-ML-1131) for changes in antenna. (Use 65 foot antenna in lieu of 150 foot antenna partially destroyed by storm.) Granted on applicant's representations that an appropriate application will be made for authority to install an antenna in accordance with the Standards of Good Engineering Practice as soon as it is feasible to obtain the necessary materials and construct the same.

WARK—Summit Radio Corp., Akron, Ohio.—Granted modification of license to operate with 5 KW power, non-directional daytime.

KGEI—General Electric Co., San Francisco, Calif.—Granted modification of license for international broadcast station to add frequencies **7250, 9550** and **15210 kc.,** on condition that authorization for these frequencies may be deleted at any time without advance notice or hearing (B5-MLIB-54). Same, for addition of frequency **11730 kc.** (B5-MLIB-55).

W65H—WDRC, Inc., Hartford, Conn.—Granted request for waiver of the requirements of Section 3.261 of the Commission's Rules (regarding minimum operating schedule); station to continue to operate only from 6 p. m. until midnight.

KRKO—The Everett Broadcasting Co., Inc., Everett, Wash.—Granted modification of license authorizing unlimited time operation and cancelled the outstanding Special Service Authorization.

DESIGNATED FOR HEARING

KTRH Broadcasting Co., Houston, Tex.—Designated for hearing application for construction permit for Portable-Mobile relay station to operate on **1606, 2074, 2102** and **2758 kc.,** with 50 watts power (B3-PRY-276). Same, B3-PRE-426, to operate on frequencies **30820, 33740, 35820** and **37980 kc.** with 3 watts power.

Houston Printing Corp., Houston, Tex.—Designated for hearing application for construction permit for new relay broadcast station to operate on frequencies **1646, 2090, 2190** and **2830 kc.,** 100 watts power (B3-PRY-274).

Larus and Brother Co., Inc., Richmond, Va.—Designated for hearing application for construction permit for new relay broadcast station to operate on **1646, 2090, 2190** and **2830 kc.,** 40 watts power (B2-PRY-277). Same, B2-PRY-275, with power of 35 watts.

W. A. Patterson, Chattanooga, Tenn.—Designated for hearing application for construction permit for new relay broadcast station to operate on frequencies **1622, 2058, 2150** and **2790 kc.,** with power of 35 watts (B3-PRY-278).

WHEC, Inc.—Designated for hearing application for construction permit for new relay broadcast station to operate on frequencies **30820, 35820** and **37980 kc.,** with 30 watts power (B1-PRE-427).

WBNY—WBNY-Brooklyn, Inc., Brooklyn, N. Y.—Designated for hearing application for modification of license to move main studio from 1 Nevins St., Brooklyn, to 132 West 43rd St., New York, N. Y. (B1-ML-1126).

K51L—St. Louis University, St. Louis, Mo.—Designated for hearing application for extension of time for completion of construction of FM station (B4-MPH-109).

LICENSE RENEWALS

KGB—Don Lee Broadcasting System, San Diego, Calif.—Granted renewal of license for the period August 1, 1942, to not later than October 1, 1944 (B5-R-38).

WSMB—WSMB, Inc., New Orleans, La.—Granted renewal of license for the period August 1, 1942, to not later than October 1, 1944 (B3-R-448).

WBNX—WBNX Broadcasting Co., Inc., New York, N. Y.—Granted extension of license upon a temporary basis only, pending determination upon application for renewal of license, in no event later than September 1, 1942 (B1-S-250).

WEVD—Debs Memorial Radio Fund, Inc., New York, N. Y.—Granted extension of license upon a temporary basis only, pending receipt and determination upon application for renewal of license, in no event later than October 1, 1942 (B1-S-270). (For auxiliary transmitter.)

Granted renewal of license of following stations for the period August 1, 1942, to not later than December 1, 1942:

KTBS and auxiliary, Shreveport, La.; WOKO and auxiliary, Albany, N. Y.

Granted renewal of license of following stations for the period August 1, 1942, to not later than August 1, 1944:

KHJ and auxiliary, Los Angeles, Calif.; KOMO and auxiliary, Seattle, Wash.; WSUI, Iowa City, Iowa.

MISCELLANEOUS

WDEL—WDEL, Inc., Wilmington, Dela.—Granted modification of construction permit as modified, for increase in power, install new transmitter and install directional antenna for day and night use, for extension of completion date from July 20, 1942, to September 19, 1942 (B1-MP-1607).

WWVA—West Virginia Broadcasting Corp., Wheeling, W. Va.—Granted modification of construction permit as modified, for increase in power, change in hours of operation, move of transmitter, install new transmitter and install directional antenna for night use, for extension of completion date from August 6, 1942, to November 4, 1942 (B2-MP-1606).

WEVD—Debs Memorial Radio Fund, Inc., New York, N. Y.—Granted license to cover construction permit for move of former RCA 1-G main transmitter to location of new main transmitter and use as an auxiliary transmitter, employing directional antenna day and night (B1-L-1685).

WSUI—The State University of Iowa, Iowa City, Iowa.—Granted license to cover construction permit for increase in power and changes in directional antenna for day and night use and authority to determine operating power by direct method (B4-L-1687; B4-Z-1419).

KPQ—Wescoast Broadcasting Co., Wenatchee, Wash.—Granted authority to determine operating power by direct measurement of antenna power on special service authorization (B5-Z-1418).

KEGA—Earle C. Anthony, Inc., Portable-Mobile, area of Los Angeles, Calif.—Granted license to cover construction permit for changes in equipment and increase in power of relay broadcast station (B5-LRE-420).

KAOY—Don Lee Broadcasting System, Portable-Mobile, area of Los Angeles, Calif.—Granted modification of construction permit as modified for new relay broadcast station, for extension of commencement and completion dates only, from September 1, 1941, and February 28, 1942, to February 28, 1942, and August 27, 1942, respectively (B5-MPRE-54).

WJSM—United Broadcasting Co., Cleveland, Ohio.—Granted license to cover construction permit which authorized new relay broadcast station (B2-LRE-411).

KTRB—KTRB Broadcasting Co., Inc., Modesto, Calif.—Granted modification of construction permit as modified, for increase in power, change hours of operation, install new transmitter and directional antenna for night use, and move transmitter, for extension of completion date from August 30 to November 30, 1942 (B5-MP-1598).

W9XAK—Kansas State College of Agriculture and Applied Science, Manhattan, Kans.—Granted modification of construction permit as modified, which authorized new experimental television broadcast station, for extension of completion date from July 15, 1942, to January 15, 1943 (B4-MPVB-85).

WMHC—Textile Broadcasting Co., Greenville, S. C.—Granted authority to make changes in automatic frequency control equipment (B3-F-248).

KOB—Albuquerque Broadcasting Co., Albuquerque, N. Mex.—Granted modification of construction permit as modified, which authorized new equipment and increase in power, for changes in equipment and extension of commencement and completion dates from July 7, 1940, and August 1, 1942, to 30 days after date of grant and 90 days thereafter, respectively (B5-MP-1803).

WJW—WJW, Inc., Akron, Ohio.—Granted modification of construction permit as modified, which authorized new transmitter and directional antenna for day and night use, change frequency, increase power, and move transmitter, for change in type of transmitter and extension of commencement and completion dates from July 17, 1942, and January 13, 1943, to 30 days after grant and 60 days thereafter, respectively (B2-MP-1600).

KGLO—Mason City Globe-Gazette Co., Mason City, Iowa.—Granted modification of construction permit, which authorized changes in directional antenna, install new transmitter, and increase power, for change in type of transmitter.

KITE—First National Television, Inc., Kansas City, Mo.—Granted petition to continue hearing on application for renewal of license; hearing continued until September 3, 1942. (Docket No. 6300.)

A. M. Burton, Nashville, Tenn.—Upon consideration of petition, dismissed without prejudice application for construction permit for new station. (Docket 6109.)

WAPO—W. A. Patterson, Chattanooga, Tenn.—Denied petition for grant of application for construction permit to increase nighttime power from 1 KW to 5 KW, using directional antenna; and set forth issues upon which the application will be heard. (Docket 6291.)

WKZO—WKZO, Inc., Kalamazoo, Mich.—Granted modification of construction permit, which authorized increase in night power and changes in directional antenna, for extension of completion date from July 24, 1942, to October 25, 1942 (B2-MP-1616).

Beauford H. Jester, Waco, Tex.—On the Commission's own motion, ordered that the issues heretofore released on application for construction permit for new station be supplemented; present hearing date retained. (Docket 6218.)

WIBC—Indiana Broadcasting Corp., Indianapolis, Ind.—On the Commission's own motion, ordered that Issues Nos. 2 and 3 of the issues heretofore released on application for construction permit be stricken; present hearing date retained. (Docket 6267.)

WCAU—WCAU Broadcasting Co., Philadelphia, Pa.—Granted motion for extension of time within which to file proposed findings now due August 4, 1942, to August 11, 1942, in re applications of WGAR, Cleveland, Ohio (Docket 6309), WHBC, Canton, Ohio (Docket 6310), and WADC, Akron, Ohio (Docket 6311).

H. Ross Perkins and J. Eric Williams, d/b as New Haven Broadcasters, New Haven, Conn.—Granted petition for dismissal without prejudice application for construction permit for new station. (Docket 6355.)

Sacandago Broadcasting Corp., Gloversville, N. Y.—Granted petition for dismissal without prejudice application for construction permit for new station. (Docket 6299.)

KSD—The Pulitzer Publishing Co., St. Louis, Mo.—Granted petition to dismiss without prejudice application for construction permit. (Docket 6284.)

WFCI—Pawtucket Broadcasting Co., Pawtucket, R. I.—Granted petition to dismiss without prejudice application for construction permit. (Docket 6343.)

Hugh Francis McKee, Portland, Ore.—Granted petition to dismiss without prejudice application for new station. (Docket 6356.)

Capital City Broadcasting Co., Inc., Topeka, Kans.—Granted petition to dismiss without prejudice application for new station. (Docket 6358.)

WHAS—Courier-Journal and Louisville Times Co., Louisville, Ky.—Granted petition to dismiss without prejudice application for construction permit to operate on **840 kc.**, with 750 KW, unlimited. (Docket 6348.)

APPLICATIONS FILED AT FCC

550 Kilocycles

KOY—Salt River Valley Broadcasting Co., Phoenix, Ariz.—Modification of construction permit (B5-P-3068) which authorized increase in daytime power and installation of new transmitter for extension of completion date indefinitely from 8-16-42.

590 Kilocycles

WKZO—WKZO, Inc., Kalamazoo, Mich.—Modification of construction permit (B2-P-3281) which authorized increase in night power and changes in directional antenna for extension of completion date from 7-25-42 to 10-25-42.

610 Kilocycles

WSGN—The Birmingham News Co., Birmingham, Ala.—License to cover construction permit (B3-P-3440) which authorized increase in daytime power and change in equipment.

690 Kilocycles

KFEQ—KFEQ, Inc., St. Joseph, Mo.—Modification of construction permit (B4-P-2477 as modified), which authorized installation of new transmitter, move transmitter, directional antenna for day and night use, increase in power and change in hours of operation for extension of completion date from 7-30-42 to 9-30-42.

930 Kilocycles

NEW—Edwin A. Kraft, Ketchikan, Alaska.—License for new standard broadcast station to be operated on **930 kc.**, 1 KW, unlimited time. (Facilities assigned to KGBU.)

1190 Kilocycles

WLIB—WLIB, Inc., Brooklyn, N. Y.—License to use formerly licensed main transmitter as an auxiliary using 250 watts power.

1240 Kilocycles

WSNY—Western Gateway Broadcasting Corp., Schenectady, N. Y. —License to cover construction permit (B1-P-2690 as modified), for new standard broadcast station.

WSNY—Western Gateway Broadcasting Corp., Schenectady, N. Y. —Authority to determine operating power by direct method.

WFTM—Fort Myers Broadcasting Co., Fort Myers, Fla.—Transfer of control of licensee corporation from W. E. Benns, Jr., Mrs. W. E. Benns, Sr., Fred S. Mellor, T. F. Skinner and W. E. Benns, Sr., to Ronald B Woodyard (150 shares).

1290 Kilocycles

WTOC—Savannah Broadcasting Co., Savannah, Ga.—Modification of construction permit (B3-P-2944 as modified), which authorized installation of directional antenna for night use and increase in night power, requesting extension of completion date from 8-15-42 to 10-15-42.

KHSL—Golden Empire Broadcasting Co., Chico, Calif.—Modification of construction permit (B5-P-3100 as modified), which authorized installation of directional antenna for day and night use and increase in night power requesting extension of completion date from 8-16-42 to 9-16-42.

1330 Kilocycles

KFAC—Los Angeles Broadcasting Co., Inc., Los Angeles, Calif.—Construction permit to increase power from 1 KW to 5 KW, install new transmitter, install directional antenna for night use and move transmitter. Amended: re changes in directional antenna.

1360 Kilocycles

KSCJ—Perkins Bros. Co. (The Sioux City Journal), Sioux City, Iowa.—Modification of license to change corporate name to Perkins Brothers Company.

1450 Kilocycles

KGIW—E. L. Allen, Alamosa, Colo.—License to cover construction permit (B5-P-3220) for increase in power from 100 watts to 250 watts and installation of new transmitter.

1510 Kilocycles

WLAC—J. T. Ward, d/b as WLAC Broadcasting Co., Nashville, Tenn.—Modification of construction permit (B3-P-1250 as modified), which authorized installation of new transmitter, directional antenna for night use, increase power and move transmitter requesting extension of completion date from 8-1-42 to 9-1-42.

1590 Kilocycles

WAKR—Summit Radio Corp., Akron, Ohio.—Modification of construction permit (B2-P-3038 as modified), which authorized increase in power, changes in directional antenna for night use only, and installation of new transmitter for extension of completion date from 9-1-42 to 11-1-42.

FM APPLICATION

W59NY—Interstate Broadcasting Co., Inc., New York, N. Y.—Modification of construction permit (B1-PH-109 as modified), which authorized construction of new high frequency broadcast station requesting extension of required date of completion from 8-17-42 to 2-17-43.

MISCELLANEOUS APPLICATIONS

NEW—National Broadcasting Co., Inc., New York, N. Y.—Extension of authority to transmit programs originating in NBC's studios at Rockefeller Plaza, New York, and/or points in U. S. where network programs may originate to CMX, Havana, Cuba, for the period beginning 8-20-42.

KMPC—KMPC, The Station of the Stars, Inc., Beverly Hills, Calif.—Modification of construction permit (B5-P-2804 as modified), which authorized increase in power and installation of directional antenna, new transmitter and move transmitter requesting extension of completion date from 8-2-42 to 9-2-42.

WLAB—Larus and Brother Co., Inc., Richmond, Va.—Modification of construction permit (B2-PRE-418) which authorized construction of new relay broadcast station requesting changes in transmitting equipment and decrease in operating power from 100 watts to 31.4 watts.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Blue Ridge Coal Co., Inc., 1212 West North Ave., Baltimore, with coal yards in South Washington, Va., Washington, D. C., and Baltimore, is charged in a complaint with misrepresentation in the sale of coal. (4787)

Red Cross Shoe Company—Misuse of the American National Red Cross name and emblem for commercial purposes in the sale and distribution of shoes is charged in a complaint against United States Shoe Corp., also trading as Red Cross Shoe Co., Cincinnati. The respondent company has branch factories at Chillicothe, Greenfield, and Harrison, Ohio. (4786)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Agricultural Insecticide & Fungicide Association, New York, and 26 manufacturers of agricultural insecticides, fungicides and related products, and 11 officers and directors of the association. have been ordered to cease and desist from certain practices, including price fixing, having the tendency and effect of restraining and suppressing competition in the sale and distribution of their products. (4145)

National Lacquer Manufacturing Co., and trading as National Titanium Co., 2330 East 37th St., Vernon, Calif., has been ordered to cease and desist from misrepresentation in the sale of paints. (4088)

United Diathermy, Inc., 100 West 42nd St., New York, engaged in the sale and distribution of an electrical device designated "United Short Wave Diathermy", has been ordered to cease and desist from false advertising and misrepresentation of its product. (4453)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Samuel Berg Co., 49 East 21st St., New York, engaged in the sale and distribution of upholstery fabrics, stipulated to discontinue the use of the word "SUNFAST," or other words of similar import, to describe or refer to a fabric which changes or loses color or otherwise deviates from its original color when exposed to the light of the sun. (3512)

B. E. Sanders, Inc., Tulsa, Oklahoma, engaged in selling a permanent wave solution designated "Floating Oil-of-Castor", has stipulated that it will cease representing that its preparation is a new type of permanent wave solution, will nourish the hair, or contains less ammonia than is contained in other permanent wave solutions. The respondent further agrees to cease representing that the preparation is sold by means of a special, introductory or limited offer, and, by use of the words "Floating Oil-of-Castor" in the designation of its product, that the oil ingredient of the preparation is composed principally of castor oil. (03028)

Sun-Ra Co., Gloucester, Mass., engaged in selling "Sun-Ra Vitamin Ointment," has stipulated to cease representing that the preparation is a remedy, treatment or cure for eczema, or has any therapeutic value in the treatment of psoriasis, insect bites, abrasions or skin irritations in excess of having a limited value in the treatment of bites of non-venomous insects and in the relief of minor abrasions and skin irritations; that the preparation is healing; that it contains boric acid, or that it does not contain harmful ingredients. (03026)

Waterbury Pen Co., and Radio Advertising Service, 706 Insurance Center, Chicago, engaged in selling Waterbury Fountain Pens, entered into a stipulation in which he agrees to discontinue using the name "Waterbury" in connection with or as part of the trade name for his fountain pens; representing that the pens are manufactured by a nationally known manufacturer or that he manufactures such pens or actually owns or controls the factory or plant in which they are manufactured; or representing that his fountain pens are sold at a lower price than is customary, or at an introductory price or as a special offer, when the indicated price is the usual and regular price at which the pens are customarily sold. (03025)

Western Natural Foods Co., 1518 Second Avenue, Seattle, Wash., engaged in selling medicinal preparations designated "Kema Tablets" and "Kema Tea," has stipulated to discontinue representing that either of his products is of value in bringing about weight reduction or as an accessory or supplemental food or dietary aid or has any significant food value; that either of the products supplies mineral colloids essential to hydrolysis, saponification, oxidation or elimination of fat; that Kema Tea is of value in keeping organs of elimination in proper working order, or that either of the products is harmless. (03027)

NAB Reports
The NATIONAL ASSOCIATION OF BROADCASTERS
1626 K STREET, N. W. WASHINGTON, D. C. Vol. 10, No. 31, August 7, 1942

NBC Joins NAB

Niles Trammell, NBC President, in his letter transmitting NBC's application for membership in NAB, stated that this action was taken in recognition of the majority sentiment expressed by the NAB membership at the Cleveland convention. He pledged whole-hearted cooperation through NAB in meeting industry problems. His letter and the reply of President Neville Miller follow:

Trammell's letter—

"I am transmitting to you with this letter a signed application for network membership for the National Broadcasting Company in the National Association of Broadcasters.

"At the recent convention of the Association in Cleveland, I stated the position of our company relative to network membership as being, first, that we saw no particular need for this type of membership; second, that we were opposed to mandatory placement of a network representative of our company on the Board of Directors of the Association; and third, that we considered the dues for such membership to be unduly excessive.

"I wish to state that our views relative to the foregoing are unchanged.

"The Cleveland convention, however, through its democratic processes voted against the position I took and in applying for membership now I am doing so because I feel it advisable to abide by the decision of the Association.

"As I have stated many times it is our sincere wish to do everything in our power to contribute to harmony in the ranks of the broadcasters. We are subordinating our own views to those evidenced by the large majority of NAB members and are accepting their desire that we become network members with the hope that we can thus make a contribution to industry peace and cooperation.

"I still feel very strongly that the network companies, and NBC in particular, are paying too high a proportion of the total dues which support the NAB. I trust that this situation can be rectified. I also think it would be more desirable to have network membership on the Board of Directors only if such representative is elected by the Association through normal procedures.

"I would be less than frank if I did not acquaint you with my concern over the lack of unity existing in the Association today. I feel that immediate steps should be taken to create, develop and maintain a strong, cohesive association in the broadcasting industry, to adequately gather together and represent all of the group interests. The present differences in the ranks of the broadcasters, with many voices speaking in Washington for them, has led to confusion and ineffectiveness for the entire industry, and this situation demands prompt correction. It is our desire to cooperate fully to achieve industry objectives."

Miller's reply—

"I am delighted to acknowledge receipt of your recent letter enclosing application of NBC for membership in the NAB. I shall present this to our Board at its next meeting at which time I also shall call the Board's attention to your views as expressed in your letter.

"The dues schedule for networks is based on volume of business similar to the dues schedule for stations. Last fall when we discussed the various methods for determining network dues, we all agreed that this was the proper method, and I was under the impression that the schedule as adopted met with your approval.

AFM Bulletin

All news relative to the developments in the AFM situation are covered in AFM Bulletin No. 3, mailed with this week's REPORTS.

"Regarding network representation on the Board, the By-Laws covering this subject have been changed twice during the past few years, and if you desire to propose an amendment in accordance with the views expressed in your letter, I know the membership will gladly consider it.

"The lack of unity within the industry to which you refer has existed, but I believe it has in many cases been more vocal than real. The membership of the NAB on the whole has been loyal and there have been but few resignations. There have been some differences of opinion as to policies, but all policies of the NAB have been decided by the Board only after full discussion. Many who rightfully claim under our democratic process the right to express their views seem to fail to recognize any obligation to abide by the decision of the majority. Therefore, I especially appreciate the spirit behind your action as evidenced by your statement that though your views remain unchanged you feel it advisable to abide by the decision of the Association. I am sure this action on your part will contribute to industry, peace and cooperation, and I hope others who have disagreed with NAB policies will follow your example. Certainly at a time such as this, we need to devote all our energies to winning the war.

"You may rest assured that I shall do all within my power to promote a strong Association truly representative of all interests. I am delighted that we shall have the support and cooperation of your organization."

HAGGERTY AGAIN

On Monday, John B. Haggerty, president of the International Allied Printing Trades Council, appeared before the Senate Finance Committee and again requested a discriminatory tax on radio time sales so that current radio advertising revenue will be diverted to printed media. It was similiar to the proposal he made before the House Ways and Means Committee on April 14, without results, and before the Finance Committee last summer, which NAB was successful in killing.

NAB's position is on record with the Ways and Means Committee and will shortly be presented again to the Senate Finance Committee.

Sales

According to NEWSWEEK (August 3) Radio Station KFEL in Denver, recently surveyed the radio tastes of some 25,000 soldiers at Lowry Field, Fitzsimons General Hospital, and Fort

SALES

(Continued from page 477)

Logan. It found at least one radio to every barracks, while many had between 10 and 40, each of which was listened to by between 50 and 150 men. As for their tastes: "Variety programs are any sponsor's best bet in the evenings . . . Heavy stuff doesn't interest them . . . They've got enough drama in their own lives what with a war to be fought . . . Good music is a rare choice. They want 'gut-bucket' swing by the masters . . . They like to hear Army talent, but they don't want to hear Army brass hats making speeches."

P-I DEALS

The Van De Mark Advertising Agency of Cincinnati asks a P-I deal on Foto Color.

The Charles H. Mayne Company, Los Angeles, seeks P-I business on a Civilian First Aid Kit.

The Radio Training Association of America, Youngstown, Ohio, is soliciting information from radio stations, stating that they are interested in placing some advertising at a cost-per-inquiry basis.

All of these parties have been written to the effect that P-I deals are not consistent with the ethics of advertising and have been asked to use radio at regular advertising rates.

Programs for Victory

Swap Broken Records for New

WCAU, Philadelphia, is doing a big business in broken records, according to Kenneth W. Stowman, director of station promotion.

In cooperation with the American Legion in the Philadelphia metropolitan area, WCAU is inducing listeners to donate old, scratched, cracked and broken discs. The money raised will be used to buy new records for fighting men.

Ten thousand records were collected on the opening night of the campaign, August 4.

Here's the Plan

WCAU Mobile Bandstand makes tour of neighborhoods. Ross Mulholland and his "Moonlit Music Hall", and the "Swanee Singers" provide entertainment. Legion posts in each locality are on hand to greet the roving unit with bands or drum and bugle corps. That's the ballyhoo of Old Stager, Ken Stowman.

The plan is for two stops at 8 and 9:30 p.m. on the 4th, 5th, 6th, 12th and 13th of August. Three stops are scheduled August 11—eight, nine and ten p.m.

KVOO Recruits Destroyer Crew

KVOO became one of Uncle Sam's accredited Navy "recruiters" July 18 when the station sponsored "Navy Victory Day" in which an attempt was made to recruit 125 men, complement of a destroyer crew.

The station featured a full schedule of spot announcements and four special broadcasts, two half hours and two 15-minutes, spread over the day. State and district Naval recruiting officers took the program time in "round tables" and in interviews to explain all phases of Naval recruiting and what the Navy offered young American men and older men, too.

Climax of the day was a mass induction ceremony in an evening half hour broadcast of approximately 75 men enlisted during the day. Remainder of the program was taken up with a round table at which Naval officers reported the day's results.

Counting actual enlistments and applications, more than 130 recruits joined up to make the day an outstanding success inasmuch as the quota for that day for the entire state was only 40 men. "The effects of the day's programs over KVOO will be felt for a long while to come," Lieut. F. F. Adams, state recruiting officer, told KVOO Program Director Eddie Coontz, in commenting on the station's fine job.

Atlantic Charter Day—August 14

Radio Bureau of Office of War Information has mailed all stations a kit of material for use in the promotion of Atlantic Charter Day, August 14.

Inspection of this material indicates that it will be exceedingly helpful to stations participating in the day's observance. Attention is called to three important points which need to be stressed at this time."

(1) The Four Freedoms and what the Charter means in concrete terms to the man in the street.

(2) The fact that the Atlantic Charter is world-wide in scope.

(3) The importance of the United Nations Idea in winning the peace as well as winning the war.

Anti-Sabotage Campaign

William Wise, president, KWBW, Hutchinson, Kansas, is engaged in an anti-sabotage campaign of his own, with the full sanction of the Hutchinson police department and the city council. An announcement has been running daily since August 1, indicating that a $50 war bond will be paid for information leading to the arrest and conviction of enemies of the United States engaged in subversive activities and sabotage. The announcement continues: "If you suspect anyone of plotting sabotage—keep the information to yourself and report to the proper police authorities in your town or communicate with Chief of Police, Marion Scott of the Hutchinson Police Dept. Stamp out the Axis. Keep your eyes and ears open for saboteurs."

The Peoria Bond Plan

From the pool of ideas that are submitted by aggressive broadcasters will come ideas for improvements in selling bonds and stamps. As indicated before, reports of local plans are solicited from stations.

Here is the way WMBD, Peoria, is conducting its campaign according to a letter from Vernon Nolte, program director.

Bank Is Issuing Agent

"In order to avoid all the extra bookkeeping and devote all of our time to the actual sales, WMBD contacted one of our very best clients and one of the most progressive financial institutions in the city, Peoples Federal Savings & Loan Association and requested them to be our issuing agent. They readily agreed and so every bond and stamp that is sold over WMBD, goes through the hands of Peoples Federal.

"We started our Bond Selling Campaign Thursday night, July 30, with a one hour program from 8:00 to 9:00 o'clock. This program featured all of the station talent and a little talk by Edgar Bill, president of WMBD, a representative from Peoples Federal Savings & Loan Association, telegrams from the Governor of the State of Illinois and the Congressman and all sales were made direct by telephone. Our inaugural program sold over $5,000 worth of Bonds and Stamps in one hour and this morning as I write this letter, more and more orders are coming in by mail.

Broadcast Promotions

"In addition to this one hour program every Thursday night, we are devoting our entire morning farm period, 5:45-6:45 to the sale of bonds, with our farm director, Farmer Bill. Also two special programs every afternoon and a program, a half hour show, 10:30-11 every night, handled by a different personality announcer each evening. This 10:30 program is in the spirit of competition and our announcers and personalities try to outdo each other in selling the most bonds. The man who wins, having the most sales for any one week, will receive a special award which hasn't been decided upon as yet.

Sells Bonds 3 Ways: Stamps 2 Ways

"That in brief is our program schedule for the sale of Bonds. In checking with Peoples Federal Savings & Loan Association, we found that we were in a position to sell bonds in three different ways and stamps in two different ways. We have a special form made out, that our telephone operators and receptionists fill out upon the receipt of an order. On bonds, we will either mail them C.O.D., await the arrival of a check and mail the bond registered mail, or the bond may be picked up and paid for at the WMBD Tank Booth in front of our building. On stamps, we will either mail the stamps out on receipt of the cash or the stamps may be paid for and picked up at the WMBD Tank Booth.

Government Pays for C.O.D.'s

"Incidentally, the Government is standing the cost of the C.O.D. and I think that is a point that other stations may be able to work out in their own communities.

Tank Booth

"At this writing, our Tank Booth is not yet completed, but we expect to have it erected within a very few days. This booth is an exact replica of a United States Army M-3 Tank. complete with guns, gun turrets, tractor treads and everything. It is made and molded out of wood and the sides are plate glass. The dimensions are approximately 8'x16'x10'. This tank is air conditioned in summer, heated in the winter. Telephone will be installed and of course a microphone. We are planning to have our various personalities appear in this Tank Booth at various times of the day, and perhaps we will also take some news broadcasts from there."

TO THE MARINES

Edward C. Coontz, program director, KVOO, Tulsa, has joined the Marine Corps. When he gets the signal he expects to leave for Quantico as a member of the Candidates Class.

MICHIGAN

Estimated Radio Homes, 1940

Number of Occupied Dwelling Units as reported by U. S. Bureau of the Census in advance release, Series H-7. Percent radio-equipped calculated from Series H-7 Bulletin following the Census Bureau practice. Number of radio units, or radio homes, estimated by applying percent ownership to those units not answering radio question and adding such to those reporting radio.

FEDERAL COMMUNICATIONS COMMISSION

The FCC early this week received an announcement from Tulsa, Okla., of the death of Walter D. Humphrey, one of its principal attorneys, on August 1st.

Mr. Humphrey was born March 5, 1876 in Onslow County, North Carolina. He was a pioneer Oklahoma lawyer and for about 8 years was a member of the Oklahoma Corporation Commission. He was one of the organizers of the Oklahoma Tax Commission, and was a member of that Commission for 4 years. Originally lived in Nowata, Oklahoma.

Came to the FCC February 25, 1935. Surviving are his wife and two daughters in Tulsa, Oklahoma, and a sister, Mrs. Abee, of Washington, D. C.

On August 1 the FCC took over the operation of the Columbia Broadcasting System's listening post in San Francisco, chairman James Lawrence Fly announced at his press conference on Monday.

He stated that the listening post has been in operation for a considerable period and recently had been operated in cooperation with the Office of War Information. Mr. Fly said, however, that it was thought best to combine the various listening services and so CBS facilities were made available to the Commission. Mr. Fly explained that it will be useful to the Commission by increasing the coverage of the Pacific area. The Commission is not taking over ownership of the station, just operation.

A transmitter vacuum tube industry advisory committee has been appointed at WPB as follows:

Frank H. McIntosh, Chief of the Radio Section, is the Government Presiding Officer.

Committee members are:

W. W. Eitel,
Eitel-McCullough, Inc.,
San Bruno, California.

Rex L. Munger,
Taylor Tubes, Inc.,
Chicago, Illinois.

St. George Lafitte,
Federal Telegraph Co.,
Newark, New Jersey.

Henry C. Bonfig,
RCA Manufacturing Co.,
Camden, New Jersey.

S. Norris,
Amperex Electronics, Inc.,
Brooklyn, New York.

H. D. Wilson,
Western Electric Co.,
New York City.

C. E. Wilson,
General Electric Co.,
Schenectady, New York.

Roy Burlew,
Ken-Rad Tube & Lamp Co.,
Owensboro, Kentucky.

FCC States Policy for Licensing High Frequency (FM) and (ST) Broadcast Stations

Because war conditions have caused great shortages in materials, equipment and skilled personnel necessary to radio broadcasting, the FCC has announced that holders of construction permits for new frequency modulation (FM) radio stations may obtain licenses during the war to operate presently existing facilities, provided construction has reached a point where the transmitter is capable of rendering a substantial public service. FM broadcasters securing licenses under this policy will have to show that additional construction is not possible at this time and must assure the Commission that construction will be completed according to Rules, Regulations and Standards of the FCC as soon as the required materials and engineering personnel have become available.

According to FCC records there are 5 licensed FM stations now in operation. Twenty-three stations are operating under special temporary authorization pending completion of construction in accordance with the construction permits. Upon appropriate application these would receive licenses to replace the special temporary authorizations. An additional 7 stations are now conducting program tests and have filed applications for operating licenses. The new policy under which the FCC will consider applications for operating licenses on the basis of partial construction probably will affect also 20 other holders of FM construction permits. Six permittees now building studio transmitter links (ST), which connect with station transmitters, would come under the policy. Applicants for new facilities however are barred, except under special circumstances, by an earlier "freeze" policy announced in the Memorandum Opinion of April 27, 1942, which recognized the necessity for conserving critical materials and banned new grants for FM as well as most other types of broadcast radio.

The Commission observes that the Communications Act does not contemplate extensions of time within which to complete construction unless it appears that construction can be completed within a reasonable length of time. Nor is it desirable to continue the issuance of special temporary authorizations upon a short term basis. However, it is desirable to encourage such service as is now possible to listeners having FM receivers. Accordingly, the Commission will give consideration to applications for licenses to cover partial construction of FM and ST stations where such construction has proceeded to the point where it is possible to provide a satisfactory though limited FM service. The Commission will also consider applications where construction has been completed and the permittee has been unable to secure equipment and technical personnel to make measurements, required as a prerequisite to issuance of a license. Such licenses will be granted on the definite understanding that immediately the required materials and personnel are available, steps will be taken to comply fully with the original construction permit.

To secure a grant of such an application for license, it will be necessary for each applicant to show (1) *diligence in proceeding with construction and the reasons for failure to complete construction;* (2) *the actual status of construction which the applicant believes sufficient to provide an acceptable FM service;* (3) *the materials and technical personnel needed to complete construction and make proof of performance (Section 6, Form 320);* and, (4) *the applicant's determination to proceed to final completion in accordance with the Rules, Regulations and Standards of the Commission when materials for further construction and needed technical personnel become available.*

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARING

The following broadcast hearing is scheduled to be heard before the Commission during the week beginning Monday, August 10. It is subject to change.

Monday, August 10

Further Consolidated Hearing

NEW—Hennessy Broadcasting Co., Butte, Mont.—C. P., **1490 kc.**, 250 watts, unlimited.

NEW—Barclay Craighead, Butte, Mont.—C. P., **1490 kc.**, 250 watts, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KWID—The Associated Broadcasters, Inc., San Francisco, Calif.—Granted modification of construction permit (B5-MPIB-36) to add the frequency **7230 kc.**, with unlimited time of operation, and extend completion date to 180 days after grant.

Burns Avenue Baptist Church, Detroit, Mich.—Granted extension of authority to transmit programs to Station CKLW, Windsor, Ontario, Canada.

W2XMT—Metropolitan Television, Inc., New York City—Granted application (B1-MPVB-82) for modification of construction permit for experimental television station for extension of commencement and completion dates, subject to submitting to the Chief Engineer within 30 days a satisfactory report as to plans, personnel, and program of research and experimentation.

ACTIONS ON DOCKET CASE

The Commission announced its Proposed Findings of Fact and Conclusions (B-152), proposing to grant the application for renewal of license of Puerto Rico Advertising Co., Inc. (WPRA), Mayaguez, Puerto Rico (Docket No. 5929), and to deny the applications of Puerto Rico Advertising Co., Inc., for construction permits for new standard broadcast stations at Arecibo, Puerto Rico (Docket No. 5930), and at San Juan, Puerto Rico (Docket No. 5938), and also to deny the application of Caribbean Broadcasting Association, Inc., for construction permit for new standard broadcast station at San Juan, Puerto Rico (Docket No. 5898).

DESIGNATED FOR HEARING

WMRO—Martin R. O'Brien, Aurora, Ill.—Designated for hearing application for modification of license (B4-ML-1112) for increase in hours of operation from daytime to unlimited, using 100 watts night, 250 watts LS.

WHAT—Independence Broadcasting Co., Philadelphia, Pa.—Designated for hearing application for modification of license (B2-ML-1129) to change frequency from **1340** to **1550 kc.**, and increase hours of operation from sharing with WTEL to unlimited.

WALB—Herald Publishing Co., Albany, Ga.—Designated for hearing application for renewal of license (B3-R-1134); **1590 kc.**, 1 KW, unlimited time, directional antenna night.

WALB—Herald Publishing Co., Albany, Ga.—Designated for hearing application (B3-P-3383) to change frequency to **1550 kc.**, and make changes in directional antenna system for night use.

WALB—Herald Publishing Co. (Assignor), Albany Herald Broadcasting Co. (Assignee), Albany, Ga.—Designated for hearing application (B3-AL-346) for consent to voluntary assignment of license of station WALB from Herald Publishing Company to Albany Herald Broadcasting Company.

LICENSE RENEWALS

The following stations were granted renewal of licenses for the period ending October 1, 1944:

WHBL, Sheboygan, Wisc.; WKAT and auxiliary, Miami Beach, Florida; WLOL, Minneapolis, Minn.

The following stations were granted renewals for the period ending August 1, 1944:

WJHL, Johnson City, Tenn.; WKY and auxiliary, Oklahoma City, Okla.; WSAZ, Huntington, W. Va.; WTAD, Quincy, Ill.

Licenses for the following stations were renewed for the period ending December 1, 1942:

KDFN, Casper, Wyo.; KGCX, Wolf Point, Mont.; KLO, Ogden, Utah; KLPM, Minot, No. Dak.; WAAB and auxiliary, Boston; WHIS, Bluefield, W. Va.; WIRE and auxiliary, Indianapolis, Ind.; WWSR, St. Albans, Vermont.

MISCELLANEOUS

KFEQ—KFEQ, Inc., St. Joseph, Mo.—Granted modification of construction permit as modified, which authorized installation of new transmitter and directional antenna for day and night use, increase in power, change in hours of operation, and move transmitter, to extend completion date from July 30 to September 30, 1942 (B4-MP-1619).

WINS—Hearst Radio, Inc., New York City.—Granted modification of construction permit as modified, for increase in power, change hours of operation, install new transmitter and directional antenna for day and night use, and move transmitter, for extension of completion date from August 3 to November 3, 1942 (B1-MP-1610).

WMAW—C. T. Sherer Co., Inc., Worcester, Mass.—Granted continuance of hearing now set for August 4, on application for extension of completion date of its construction permit, until August 17, 1942 (Docket No. 6313).

J. Marion West, Wesley W. West, and P. M. Stevenson, Houston, Texas.—Granted petition to dismiss without prejudice application (B3-P-2864) for new station and cancel hearing.

KCMO—KCMO Broadcasting Co., Kansas City, Mo.—Granted petition to dismiss without prejudice and cancel hearing on application (B4-P-3389) for construction permit.

Peter Q. Nyce, Alexandria, Va.—Granted petition to dismiss without prejudice application (B2-P-3172) for new station.

KOAM—The Pittsburg Broadcasting Co., Inc., Pittsburg, Kans.—Granted petition to dismiss without prejudice application (B4-P-3198) for construction permit.

WMBR—Florida Broadcasting Co., Jacksonville, Fla.—Granted petition to dismiss without prejudice application (B3-P-3036) for construction permit.

Lexington Broadcasting Co., Lexington, N. C.—Granted petition to dismiss without prejudice application (B3-P-3122) for new station.

Louisiana Communications, Inc., Baton Rouge, La.—Granted petition to dismiss without prejudice application (B3-P-3242) for new station.

Fort Smith Newspaper Publishing Co., Fort Smith, Ark.—Granted petition to dismiss without prejudice application (B3-P-3117) for new station.

Dorman Schaeffer, Klamath Falls, Ore.—Granted petition to dismiss without prejudice application (B5-P-2951) for new station.

WWNY—The Brockway Co., Watertown, N. Y.—Granted modification of construction permit which authorized installation of directional antenna for night use, change frequency, increase power, change hours of operation, and move transmitter, for extension of completion date from August 16, 1942, to October 16, 1942 (B1-MP-1605).

KMPC—KMPC, The Station of the Stars, Inc., Beverly Hills, Calif.—Granted modification of construction permit, as modified, for increase of power, installation of directional antenna for day and night use, new transmitter, and move of transmitter, for extension of completion date from August 2 to September 2, 1942 (B5-MP-1614).

WCAO—The Monumental Radio Co., Baltimore, Md.—Granted modification of construction permit as modified, for increase in power, move of transmitter, installation of new transmitter and directional antenna for day and night use, for extension of completion date from August 8 to September 8, 1942 (B1-MP-1608).

WLAC—J. T. Ward, tr/as WLAC Broadcasting Service, Nashville, Tenn.—Granted modification of construction permit as modified, for installation of new transmitter and directional antenna for night use, increase in power, and move transmitter, for extension of completion date from August 1 to September 1, 1942 (B3-MP-1615).

WIS—Surety Life Insurance Co., Columbia. S. C.—Granted license to cover construction permit as modified, for changes in directional antenna and increase in power (B3-L-1688); granted authority to determine operating power by direct measurement of antenna power (B3-Z-1421).

W85A—General Electric Co., Schenectady, N. Y.—Granted modification of construction permit for new station, for change in type of transmitter and extension of commencement and completion dates to 10 days after grant hereof and 30 days thereafter, respectively (B1-MPH-110).

KOVC—KOVC, Inc., Valley City, N. Dak.—Granted authority to determine operating power by direct method in accordance with terms of B4-ML-1131 (B4-Z-1420).

WRLC—R. G. LeTourneau, Toccoa, Ga.—Granted petition to dismiss without prejudice application (B3-P-3451) for construction permit.

WHEB—WHEB, Inc., Portsmouth, New Hampshire—Granted petition to dismiss without prejudice application (B1-P-3448) for construction permit.

APPLICATIONS FILED AT FCC

740 Kilocycles

KTRH—KTRH Broadcasting Co., Houston, Texas.—Modification of construction permit (B3-P-3011 as modified), which authorized installation of new transmitter, directional antenna, change in frequency, increase in power and move transmitter for changes in transmitting equipment.

770 Kilocycles

KOB—Albuquerque Broadcasting Co., Albuquerque, N. Mex.—Extension of special service authorization to operate on **770 kc.,** 25 KW night, 50 KW daytime, unlimited time, using the transmitter as specified in modification of construction permit (B5-MP-1603) for the period 10-1-42 to 4-1-44.

1300 Kilocycles

WOOD—King Trendle Broadcasting Corp., Grand Rapids. Mich.—Modification of construction permit (B2-P-2874), which authorized increase in power, installation of new transmitter, directional antenna for night use, and move of studio and transmitter for extension of completion date from 8-23-42 to 9-23-42.

1410 Kilocycles

WKBH—WKBH, Inc., LaCrosse, Wis.—Authority to determine operating power by direct measurement of antenna power.

1450 Kilocycles

WILM—Delaware Broadcasting Co., Wilmington, Del.—License to cover construction permit (B1-P-3387) for move of transmitter and use of WDEL's south tower of directional array.

1490 Kilocycles

WWSW—Walker and Downing Radio Corp., Pittsburgh, Pa.—Modification of license to change corporate name to WWSW, Inc.

FM APPLICATIONS

W47NY—Muzak Radio Broadcasting Station, Inc., New York, N. Y.—Modification of construction permit (B1-PH-48 as modified), which authorized construction of new high frequency broadcast station for extension of completion date from 8-4-42 to 2-4-43.

W53H—The Travelers Broadcasting Service Corp., Hartford, Conn.—License to cover construction permit (B1-PH-12 as modified) for new high frequency broadcast station.

W85A—General Electric Co., Schenectady, N. Y.—License to cover construction permit (B1-PH-19 as modified) for new high frequency broadcast station.

MISCELLANEOUS APPLICATIONS

WRET—Ralph A. Horton, Portable-Mobile, area of Ft. Lauderdale, Fla.—License to cover construction permit (B3-PRE-410) for new relay broadcast station.

WAAD—Ralph A. Horton, Portable-Mobile, area of Ft. Lauderdale, Fla.—Modification of construction permit (B3-PRY-259), which authorized a new relay broadcast station for change in type of transmitter and extension of commencement and completion dates.

NEW—The Ohio State University, Portable-Mobile, area of Columbus, Ohio.—Construction permit for new relay broadcast station to be operated on **1622, 2058, 2150, 2790 kc.,** 25 watts, and A3 Emission.

WFMJ—William F. Maag, Jr., Youngstown, Ohio.—Voluntary assignment of license to The WFMJ Broadcasting Company.

WMNH—The Radio Voice of New Hampshire, Inc., area of Manchester, N. H.—License to cover construction permit (B1-PRY-272) for a new relay broadcast station.

W2XMC—Muzak Corporation, New York, N. Y.—Modification of construction permit (B1-PEX-36 as modified), which authorized construction of new developmental broadcast station for extension of completion date from 9-1-42 to 3-1-43.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Britt-McKinney Co., in Greenville, S. C., and as Britt & Co., in Spartanburg, S. C., engaged in business as brokers of canned foods and fruits and miscellaneous merchandise, are charged in a complaint with violation of Section 2(c) of the Clayton Act, as amended by the Robinson-Patman Act. (4792)

Haband Company, et al.—Complaints have been issued charging Max Habernickel, Jr., and John A. Anderson, trading as Haband Co., Paterson, N. J., and Clermont Cravat Co., Inc., 39 West 29th St., New York, with misrepresentation of the constituent fiber or material of neckties they sell. The Clermont Cravat Company, manufactures certain neckties designated "The Aldrich No. 1202," which are labeled "all silk," and others called "The Cherokee No. 1275," which bears an Indian head on the label and the legend "Hand Made Tie." These ties are sold and distributed by the Haband Company respondents. (4790-4791)

National Technical Institute (formerly National Diesel Institute), Virginia, Ill., conducting correspondence courses of instruction in Diesel engineering, air conditioning, aeronautical engineering, electrical engineering, and commercial training, is charged in a complaint with misrepresentation. (4789)

Universal Fingerprint Systems, Ltd., Seattle, Wash., is charged with misrepresentation in a complaint. (4788)

CEASE AND DESIST ORDER

The Commission issued the following cease and desist order last week:

Success Portrait Co., trading as Chattanooga Art Medallion Co. and as Art Trade Studios, Chattanooga, Tenn., its officials, and scores of agents and employees operating under various trade names, have been ordered to cease and desist from misrepresentations in the sale of tinted or colored photographic enlargements and miniatures, and frames. (4522)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Alpinel Corp., 565 Broadway, New York, engaged in selling a preparation designated "Girolamo Pagliano Syrup," has stipulated that it will discontinue representing that the preparation has a purifying effect on the blood or on the humors of the body; that it eliminates noxious substances from the organisms; and that it is a remedy or cure for any disease or has any therapeutic value except as a cathartic. (03030)

Hempstead Selipon Co., Hempstead, N. Y., engaged in selling "Elip," a medicinal preparation containing potassium bitartrate, sulphur, and emodin, stipulated to discontinue representing that the product is a remedy for or that it will cure hemorrhoids or cause that condition to dry up; that it will cause the suffering resulting from hemorrhoids to cease; that it is safe, or that it will relieve the itching, inflammation, or bleeding caused by hemorrhoids. (03032)

Reese Chemical Co., 10617 Frank Ave., Cleveland, selling a medicinal preparation designated "Red Hearts," has stipulated to cease and desist from representing that the product will restore youthful vigor or sex vitality or act as an aphrodisiac or stimulant. (03031)

B. E. Sanders, Inc., Tulsa, Oklahoma, engaged in selling a permanent wave solution designated "Floating Oil-of-Castor", has stipulated that it will cease representing that its preparation is a new type of permanent wave solution, will nourish the hair, or contains less ammonia than is contained in other permanent wave solutions. The respondent further agrees to cease representing that the preparation is sold by means of a special, introductory or limited offer, and, by use of the words "Floating Oil-of-Castor" in the designation of its product, that the oil ingredient of the preparation is composed principally of castor oil. (03028)

Western Land Roller Co., Hastings, Nebr., engaged in selling a farm implement designated "Western Pulverizer, Packer and Mulcher," also as "New Western," "Western," and "Western Land Roller," have entered into a stipulation to cease and desist from representing:

> That use of the machine in preparing a seed bed will save one-third, one-half or more of the seed ordinarily used when planting alfalfa, winter wheat, barley, and oats over other methods of properly preparing seed beds for such crops;
> That when it is used for preparing a seed bed every seed will germinate and make a strong growth or that a good stand may be obtained every year;
> That it will be effective in causing potato crops to mature eight to ten days earlier or to produce a larger yield than a potato crop planted in a seed bed properly prepared by other implements and methods;
> That its use will increase profits of sugar and wheat growers from 25 to 50 percent or effect any other definitely stated increased percentage of profit;
> That it will prevent or protect against crop failures except to the extent that such failures may be caused by or attributed to loose unpacked soil;
> That its use will increase the yield of corn from 20 to 40 bushels an acre or effect any definitely stated increased yield over such yield as may be obtained by generally recognized good farming practices; and that it will prevent soil from blowing except insofar as such blowing may be caused by or attributable to loose, unpacked soil. (03029)

Western Natural Foods Co., 1518 Second Avenue, Seattle, Wash., engaged in selling medicinal preparations designated "Kema Tablets" and "Kema Tea," has stipulated to discontinue representing that either of his products is of value in bringing about weight reduction or as an accessory or supplemental food or dietary aid or has any significant food value; that either of the products supplies mineral colloids essential to hydrolysis, saponification, oxidation or elimination of fat; that Kema Tea is of value in keeping organs of elimination in proper working order, or that either of the products is harmless. (03027)

NAB Reports
The NATIONAL ASSOCIATION OF BROADCASTERS
1626 K STREET, N. W. WASHINGTON, D. C. Vol. 10, No. 32, August 14, 1942

The Broadcast Industry Prepares For Its Most Important Season

The following article was prepared by Earl J. Glade, vice-president of Station KSL, Salt Lake City, and recently reappointed chairman of the NAB Code Compliance Committee. It will be reprinted, in pamphlet form, for distribution with "Is Your Hat in the Ring?"

The broadcasting industry is fully aware of the extraordinary cautions that must be observed by it this fall in its treatment of news and politics. This is obviously because of:

1. The World War; and
2. The national election in the United States.

The recent vigorous consideration of these vital issues in the House of Representatives and the Senate was, indeed, timely. Informative and constructive discussions can always clear the atmosphere. The injection of political issues into news discussions by sponsored commentators is, of course, a problem of serious concern.

Probably at no time in the country's history has there been such an avid interest in news. Every family in the land is so close to the national war effort that not only the tension, but also the attention, is snapping taut.

Our station managements realize this most keenly. Almost without exception, they have taken elaborate precautions to protect the sensitivities of America's millions of listeners. By and large, this has been done superbly well. With the unprecedented volume of business being handled from coast to coast, occasionally some enthusiast gets out of bounds and has to be brought back in. That will happen in a democracy, under freedom.

Co-operating with the press, the broadcasting industry has made world news instantly available throughout the far-reaches of the land, with the result that today undoubtedly the nation stands more fully and more accurately informed than at any previous time.

The Industry's Code

The news section of the Code indicates the high standard for news broadcasting which members of the National Association of Broadcasters have set for themselves. Here it is in its entirety:

News

> "News shall be presented with fairness and accuracy and the broadcasting station or network shall satisfy itself that the arrangements made for obtaining news insure this result. Since the number of broadcasting channels is limited, news broadcasts shall not be editorial. This means that news shall not be selected for the purpose of furthering or hindering either side of any controversial public issue nor shall it be colored by the opinions or desires of the station or network

(*Continued on page 488*)

THE BROADCAST INDUSTRY PREPARES FOR ITS MOST IMPORTANT SEASON

(Continued from page 487)

management, the editor or others engaged in its preparation or the person actually delivering it over the air, or, in the case of sponsored news broadcasts, the advertiser.

"The fundamental purpose of news dissemination in a democracy is to enable people to know what is happening and to understand the meaning of events so that they may form their own conclusions and, therefore, nothing in the foregoing shall be understood as preventing news broadcasters from analyzing and elucidating news so long as such analysis and elucidation are free of bias.

"News commentators as well as all other newscasters shall be governed by these provisions."

All news commentators should re-read these three paragraphs.

The difficulties involved in living up scrupulously to this forthright statement of policy are at once apparent, but an earnest effort is being made by the industry so to do.

An American radio station is presumed to have no editorial policy. However, the mere selection of a news item for broadcast is an exercise of the editorial function. The choice of each feature, therefore, has a direct bearing on the character of the news period. Selecting news material for broadcasting is considered so significant by listeners, as indicating the sympathies of the station management, that extreme caution must be constantly observed to keep the station free from the charge of bias. This appears to be more necessary with radio than with the press.

Freedom of Speech

Nothing is more repugnant to the radio industry than to have to interfere with complete freedom of speech as far as that freedom applies to well known news commentators, and others of recognized standing. Station managements would naturally prefer to edit, merely, but not to censor. Responsibility of the station under the law, however, necessitates a most careful follow-through. All of the networks and all well managed stations have clearly defined policies covering the entire handling of this vital issue.

As was convincingly stressed by Senator O'Mahoney in the recent senate discussion, data utilized by radio news analysts must be factual. Only the utmost in accuracy both as to the material used and deductions drawn is good enough for radio.

Controversial Public Issues

A controversial public issue is one in which the welfare of the general public as a whole is affected and in which there exists a discernible, divided public opinion.

In its Code, the broadcasting industry has laid down explicit rules for guidance in the handling of this most difficult phase of radio programming.

The Code states in part:

"As part of their public service, networks and stations shall provide time for the presentation of public questions including those of controversial nature. Such time shall be allotted with due regard to all the other elements of balanced program schedules and to the degree of public interest in the questions to be presented. Broadcasters shall use their best efforts to allot such time with fairness to all elements in a given controversy.

"Time for the presentation of controversial issues shall not be sold, except for political broadcasts. * * *"

The exception is made for political broadcasts because, at certain times the contending parties want to use and are entitled to use more time than broadcasters can possibly afford to give away.

The functioning of the controversial issue section of the Code has been one of the most beneficent provisions, not only for the public, but also for the industry.

At a very heavy cost to itself, by refusing to accept money for broadcasting discussions of controversial issues, the radio industry has proved to the nation its earnest desire to be scrupulously fair in handling all public matters where controversy is involved. It definitely guarantees to the poor as well as to the rich, not only the right to be heard, where it can be demonstrated that there is a public interest, but, *more importantly, the right to hear.*

> *If any radio station is not conscientiously observing this important section of the Code, it is failing in one of broadcasting's most vital trusts.*

Political Broadcasts

With regard to political broadcasts, reference is invited to Sections 3.421-3.424 of the Federal Communications Commission's Rules and Regulations.

On July 2, 1938, Chairman Frank R. McNinch, speaking for the Commission, admitted that "no set of rules or statute can specifically cover all situations that may arise," and that, "conformity to the spirit as well as the letter of these rules will enable stations to make their facilities available to political candidates upon terms and conditions which will assure fair treatment to all."

"The commission," he continued, "will, of course, insist upon good faith in the application of these rules and will deal vigorously with infractions thereof."

The record is convincing evidence of how earnestly the radio industry has striven to live up to the spirit and the letter of the law in the matter of political broadcasts. Against the almost insuperable odds of time limitations, there being only so many hours in a broadcast day, and the equitable allocation of this time to all contending parties, radio station managements have done a highly creditable piece of work. Isolated mistakes have occurred—some, it would seem, inexcusable. However, it may well be asked: What other industry has a more satisfactory general record for distinguished public service than radio broadcasting?

It is understandable, under the frustration of disappointment where contending political interests are demanding the same broadcast time, and numerous other impossible considerations, that tempers should flare. But these differences can always be equitably composed and fair consideration dealt every one, if all the parties will just take time to get together.

Operating an average of eighteen hours per day, or seventy-two 15 minute periods, with every second of that time, every note played, every measure sung, every word uttered, under the relentless scrutiny of the government, the public, the sponsor, and, possibly, several official checkers, the various station managements have an assignment that represents a real challenge. But they are not too absorbed, as experience clearly reveals, gladly to show their patrons and the public the thoughtful courtesies and consideration which are their full due.

Under the extraordinary pressure of political campaigns, mistakes will sometimes occur. Actually they are rare. The human factor is still functioning. It is most certainly the earnest effort of the industry to have these errors fewer and fewer.

The fall of 1942 with the world war fighting away at our very doors and a national election inviting our attention and our interest, radio broadcasting will have the greatest opportunity of its twenty years for an incomparable public service.

It will not disappoint America!

Programs for Victory

BONNIE BAKER HELPS WROK

At WROK, Rockford, Ill., they're selling bonds by phone, mail and in person, according to Bill Traum, promotion director. "Songstress Bonnie Baker," said Bill, "helped to get us off to a swell start on the fifth."

Starting this week, the Rockford Morning Star, with which WROK is affiliated, is contributing four advertisements a week "for the duration," to keep the readers posted on the station's war bond sales activities.

Mr. Traum has suggested to Vincent Callahan of the Treasury Department that he authorize a suitable emblem for incorporating in such advertisements, perhaps with such words as "Station XXXX Qualified Issuing Agent, U. S. Treasury Department."

WCBI ANNOUNCERS' BOND CONTEST

A productive angle in the promotion of the sale of war bonds and stamps has been worked out with J. O. Slaughter, chairman of the War Savings Committee of Lowndes County by station WCBI, Columbus, Miss. General Manager Bob McRaney has divided twelve quarter hour programs per week among four staff announcers, Phil Gulley, Buck Hinman, Bert Craig and Bill Shackleford, giving each a free hand in producing three shows each per week to encourage the listeners to buy more bonds and stamps.

They ask buyers to write them a card, giving their name, address, date of purchase and place of purchase of bonds. Listeners are to give credit to announcer of their choice. At the end of the month-long contest the sales credited to each announcer will be tabulated, and the one having largest total will receive a $25 war bond.

CERTIFICATES FOR WHO BOND BUYERS

Between July 23 and August 6 WHO sold $85,081 worth of war bonds and stamps.

According to Woody Woods, WHO publicity director, the station will soon be giving their bond purchasers a membership in the WHO U. S. WAR SAVINGS BOND CLUB with a windshield sticker in red, white and blue.

On the evening of July 24 at 9:30 p. m. the station played the 10 minute transcription, featuring "I'm Saving a Dime Out of Every Dollar" and the talk by Secretary Morgenthau. This was followed by a 5 minute talk by J. O. Maland, vice president of the Central Broadcasting company and manager of WHO. On Thursday evening, July 30, there was another 30 minute show at 7:30 p. m. entitled "This Is Your War." It featured a 30 piece orchestra, male quartet, girl trio and chorus. Messrs. Burlingame and Palmbeck, who are slugging it out in a bond sales competition, appealed to their friends for sales.

"The Iowa Bond Dance Frolic," another 30 minute show, followed on August 6. This was a barn dance type production with a cast of forty, also featured by Messrs. Burlingame and Palmbeck in a two-minute talk.

WHAM AT WAR

William Fay, general manager, WHAM, Rochester, has just issued a handsome illustrated, hard cover brochure entitled "WHAM Goes to War."

Contents concern War Week in Rochester, June 14-21, 1942, and the part played by the station. The weeks promotion was in charge of Mr. Fay and Charles Siverson, program director. WHAM now operates on a 24 hour basis. Dick Toole, who takes over at midnight, has received mail from all 48 states, Canada, Cuba, Mexico, Alaska, Hawaii, Australia, etc.

RADIO CAN DO IT

KGBS, Harlingen, Texas, has come to the support of the Cameron County Selective Service Board in an unusual manner. The Board experienced difficulty in getting returns on Selective Service questionnaires. A week or so ago the Board turned over a list of 11 delinquents to KGBS. Ingham S. Roberts, general manager, called out the names on a Spanish program with a proper explanation of what was wanted. By noon of the day following, 9 of the 11 delinquents had reported.

WPDQ TO START SEPT. 15

Radio Station WPDQ, Jacksonville, Fla., Robert R. Feagin, general manager, expects to be on the air by Sept. 15.

On Aug. 12, Mr. Feagin told members of the Jacksonville Kiwanis Club all about radio's part in the war effort. Station will operate on 1270 kc. with 5,000 watts, day and night.

Open Season No Limit

JAPANESE HUNTING LICENSE

Free Ammunition
and Equipment—With Pay

Those headlines, some additional copy with a place for a name complete the license. Rights to use this unique license are distributed by the Marine Corps.

TO THE MARINES

Staff Sergeant Fann, formerly commercial manager, WBRW, Welch, W. Va., is Marine recruiting officer in Welch. Close Marine-station cooperation has boosted recruiting, according to James M. Flenniken, program director.

CHILDREN'S PROGRAMS

A new streamlined edition of "Broadcasting to the Youth of America" by Dorothy Lewis will be released in the near future. To bring this material up to date, please send us a complete story of your successful shows of 1941-42. From those submitted, the most unique will be selected for detailed description. Also please send us information of how your station has used children, children's programs and the schools to aid in the war effort.

Please be prompt so that if your station has a story to tell in the children's program field, it may be included in "Radio Patterns for Children's Programs."

You will recall that Dorothy Lewis visited about 350 stations in 1940 taking down data on 1500 program series. The findings were released in "Broadcasting to the Youth of America," of which 30,000 copies have been distributed to date.

SCHOOL WORKSHOP AT WGY

WGY is cooperating with the Schenectady Public Schools in a Radio Workshop for elementary and secondary school teachers and supervisors. This is believed to be the first venture of this kind undertaken jointly by radio and school authorities.

The workshop will be in session three weeks with Max U. Bildersee, supervisor of the Bureau of Radio and Visual Aids of the New York State Education Department, as director. The purpose of the workshop is to train teachers for better use of radio in the classrooms and in the writing of radio scripts and in production.

Twenty teachers enrolled for the three-weeks' course which will consist of morning and afternoon sessions, with plenty of "homework" to supplement the day's lectures and discussions. The enrollment limit was set at twenty but, according to Dr. Howard Pillsbury, superintendent of Schenectady schools and the instigator of the workshop, double that number tried to sign up for the lecture series. All sessions will be held at the Education Building, Union Street, Schenectady. Victor Campbell is WGY's representative on the workshop staff.

Max Bildersee has been with the New York State Education Department less than two years. Prior to that association he was connected with the education department of the British Broadcasting Corporation and later with the National Broadcasting Company.

Dr. Pillsbury, is past president of the American Association of School Administrators, past president of the New York State Teachers Association and president of the New York State Council of City and Village Superintendents.

DOROTHY LEWIS REVIEWS

"All Children Listen"

By what magic did Hitler enslave the minds of Nazi youth so that they would become robots, facing death joyously, and perishing in battle with Hitler's name on their lips?

Dorothy Gordon, the well-known radio artist, author and lecturer, gives us the answers to these questions in her newest book, "All Children Listen" published by George Stewart, Inc. Miss Gordon made an intensive study of broadcasting in Germany, Italy, Russia and in fact, the entire European continent in 1933 and in 1936. She saw how radio was seized in Germany, immediately upon Hitler's ascension to power, to indoctrinate the Nazi youth with the virus of fascist poison, and to teach children to hate . . . to destroy . . . and to live only for the supposedly glorious opportunity of dying for Hitler. She watched the effect of Hitler's broadcasts upon his young people, as they were piped into every classroom . . . and she realized, with sinking heart, that the time would come when only savage fighting, pillaging and ruthless murder would satisfy the young Nazis.

Upon her return to the United States, Miss Gordon began to crusade for radio programs which would instill in our youth the same burning devotion to democracy as the dictators had developed for fascism through clever radio programs.

"All Children Listen" provides much food for thought . . . for Miss Gordon makes it clear that parents, educators and broadcasters must share alike the blame for their failure to use radio for promoting democratic precepts in American youth. She paints a vivid picture of contrasts, as she reviews the history of children's radio programs in the United States, and in the dictator nations.

The author, who is a staunch advocate of the American system of broadcasting, proposes that considerably more time a day be devoted to children's radio programs than at present. She recommends that the finest artistic talent be employed to present radio programs which will dramatize democratic ideals, and prepare our young people for the post-war world.

"America," says Miss Gordon, "must not lose the chance of making our young people the standard bearers of a goal for human liberty; a goal of progress and intellect and the pursuit of human happiness!"

Commercial sponsors will be particularly interested in Miss Gordon's interesting views on educating the consumer of the future. She points out that children are consumers of more than a third of all the merchandise sold in the country, and says that the children's market has scarcely been touched.

Miss Gordon also rebukes the educational groups which have refused to cooperate with anything "commercial" and says that they must accept the disadvantages of commercialism that go with the advantages of sponsored programs.

Altogether, "All Children Listen" is well worth the attention of broadcasters for the fresh slant on their own problems they will receive from Miss Gordon's book.

—Dorothy Lewis, Coordinator of Listener Activities, NAB.

BRYSON TO OWI

Lyman Bryson, Chairman of the Adult Education Board of the Columbia Broadcasting System, was today appointed educational advisor in the Office of War Information, Gardner Cowles, Jr., Director Domestic Operations of OWI, announced.

Bryson will continue his work with the Columbia Broadcasting System, serving the Office of War Information part time, without compensation. His immediate work will be to assist the Domestic Branch of the OWI in perfecting a better flow of war information to the public schools via radio and other channels. He will also assist in the establishment of an adult education branch of the OWI which will stimulate discussion of the war and the war aims of the United Nations among all organized groups in the country.

Bryson has had extensive experience throughout the country in the adult education field. His work with the Office of War Information will be done in close cooperation with the United States Department of Education.

PER-INQUIRY REQUEST

The radio industry has been flooded this week with a letter from the John P. Myers Co., New York City, soliciting a per-inquiry deal for the Overman Tire Company's product, *Rubber Life*.

The NAB has written the John P. Myers Company, pointing out that this procedure is an unsound business practice, and has requested that they employ radio time at regular, established rates.

PROPOSED AMENDMENTS TO WPB REGULATION NO. 10

Compliance by the broadcaster with Amended WPB Regulation No. 10 will not be difficult. When ordering merely place the Production Code number X 11.20 on all purchase orders and PD-1A Forms. This requirement is in addition to the regulations applying to Preference Ratings, with all of which there must be full compliance.

This Regulation was originally issued June 1, 1942, under the title "Allocation Classification System." The proposed amendment would change the title to "Production Code." Broadcast stations are required to use the appropriate code letter and numbers on all purchase orders, either verbal or written, placed after August 31, 1942, or calling for delivery after August 31, 1942. Prior to August 31, 1942 purchase orders may comply with the original Regulation No. 10 as amended June 26 and July 22, 1942 or the proposed amendment of Regulation No. 10.

The purpose of the new regulation is to supply information regarding the flow of basic materials for the war program and related civilian economy. The supply is not large enough to satisfy all essential requirements. It is, therefore, necessary to review in their relation to the war program the most essential requirements of finished products and to determine their urgency of manufacture. To this end a standard method of identification and reporting must be established for all industry, and consequently, any information requested from time to time by the War Production Board as to the distribution of an industry's products will be reported and classified on the basis of this Production Code.

A dual system of letters and numbers is to be used on all purchase orders, except as exempted in Priorities Regulation No. 10.

Letters indicate the broad classes of ultimate purchaser, i.e., Army (A), Navy (N), all others (X).

Numbers indicate the classes and subclasses into which certain industries have been grouped.

Neither the code number nor letter indicates the order of importance. They are not preference ratings nor do they serve the same purpose as preference ratings. They simply serve to identify the purpose for which any particular product or material is to be used. The mere fact that an order may bear the number 14.00 does not mean that it is any more or any less important than an order bearing either the numbers 1.10, 2.20, 11.10, or 19.00.

WPB COMMITTEES

WPB has announced the following radio transmitter manufacturers industry advisory committee and a similar committee for the radio receiver vacuum tube industry:

Radio Transmitter Manufacturers Industry

Frank H. McIntosh, Chief of the Radio Section, is the Government Presiding Officer.

Committee members are:

W. J. Barkley
Collins Radio Co.
New York, N. Y.

H. E. Bonfig
RCA Mfg. Company
Camden, N. J.

Sosthenes Behn, Pres.
International Telegraph & Telephone Co.
East Newark, N. J.

Walter Evans
Westinghouse Electric Co.
Bloomfield, N. J.

Fred M. Link, Pres.
Link Radio Corp.
New York City

A. Lloyd, Mgr.
Hammerlund Co.

Tung-Sol Lamp Works, Inc.
Newark, N. J.

L. H. Coffin, President
Hytron Corporation
Salem, Mass.

Lawrence K. Marshall, Pres.
Raytheon Production Corp.
Newton, Mass.

Labor

WAGE POLICY

All of us are worried about inflation. We all remember that it took a wheelbarrow load of paper money to buy a loaf of bread in post-war Germany. We don't want that to happen here.

One of the things we can do to prevent inflation is to stop indiscriminate wage and salary increases. We shudder about an increase in steel wages, when increases in our own business, along with the thousands of other comparatively small industries, are much more important in the aggregate.

President Roosevelt has said that there should be *no* increases unless wages or salaries are substandard or inequal.

If there are any *substandard* salaries in radio, they are so few and far between that they can be rectified easily.

What the President meant by *inequalities* is still much discussed. The best thought we have found on the matter is that there should be *substantially* equal pay for equal work of equal quality in a community. Naturally competitive conditions would have to be taken into account.

The War Labor Board, in an effort to head off wage freezing by the federal government, has added a third factor to this policy. So far, Mr. Roosevelt has allowed it to stand. The War Labor Board, upon request, will grant wage increases up to 15 per cent (no higher) above pay received in January, 1941. This corresponds to the 15 per cent increase in the cost of living since January, 1941. If these employees have received any increases since January, 1941, the amount of these increases should be deducted from the 15 per cent.

It should be remembered, too, that this War Labor Board "formula" has been applied only to employees who must spend most of their earnings for the necessities of life. It certainly was not meant for those whose earnings provide luxuries that might well be sacrificed in wartime.

In summary, unless serious consideration is given to proposed wage increases, we probably are in for wage freezing by the government. We probably wouldn't like that. Because managerial salaries, bonuses and dividends probably would be frozen along with wages. And because once the government started fixing wages, it might be a long time before it got out of that business.

Here's a tip: how about giving (and taking, Mr. Manager) increases in war bonds.

JOINT NEGOTIATIONS

Broadcasters in cities where more than one station deals with the same labor union should read the following editorial from the *Baltimore Sun,* then think about the possibility of joint negotiations.

Such joint negotiations have worked out successfully in Birmingham, St. Louis, San Francisco and other cities. The NAB Labor Relations Director will be glad to discuss this problem with any members.

WLB's Mr. Davis Thinks Employers Should Organize

Chairman William H. Davis of the War Labor Board thinks the time has come for general organization among employers for collective bargaining with the unions. Mr. Davis makes this comment in his capacity as chairman of a Twentieth Century Fund committee which has supervised a survey of contemporary labor relations for the fund. The committee has no responsibility for the findings reached by a research staff which found that employer organization was extending. But Mr. Davis himself believes employer organization for collective bargaining is a good thing.

"It makes for greater stability throughout an industry," says Mr. Davis. It works toward "more responsible unions and puts management on a more fair and equitable competitive basis so far as wage costs are concerned. . . ."

Mr. Davis has been saying that employers ought to organize for collective bargaining for some time. When he went to England and Sweden in the summer of 1938 as a member of a Presidential commission studying labor relations, he found that nation-wide employer organization for bargaining with the unions was taken as a matter of course in those countries. In 1936 British employers were organized into 266 general associations or federations, while there were some 1,550 local or district organizations. Organization was similarly widespread in Sweden. Apparently, Mr. Davis has felt ever since the 1938 trip that America might come to the same evolutionary development.

Presumably, Mr. Davis' earlier feeling on this issue has been reinforced by his work as chairman of the War Labor Board. Surely such a post should have provided him unparalleled opportunity for detecting the flaws in collective bargaining as now practiced in the United States. Here Mr. Davis has possibly begun to find that employers are sometimes actually at a disadvantage when up against some of the great new nation-wide unions. At any rate, he says that employer organization "would do much to promote an equality of bargaining power between management and labor."

Of course, it is not as though the employer organization for which Mr. Davis calls were unknown in the United States. On the contrary, as stated above, the Twentieth Century Fund study shows that it is already growing in this country. The employer associations which deal with Mr. John L. Lewis' coal-miners' union are an example. As the power of organized labor increases, doubtless organization of employers for collective bargaining will extend.

TIME SPENT DRIVING AUTOMOBILE

The time spent by an outside employee driving an automobile on business of his employer must be considered as time worked under the Fair Labor Standards Act, according to an opinion released by the Wage and Hour Division, U. S. Department of Labor.

The Division's statement of its position was specifically directed to the case of an insurance company with outside employees engaged in the insurance business, but it was pointed out that the principle involved would apply equally to other outside employees.

"Since an employee who drives an automobile is required to expend continuous effort and energy and has no opportunity to relax, sleep, eat or otherwise pursue his own interests, it is the opinion of the Wage and Hour Division," the statement said, "that all the time which an employee spends in driving an automobile on the business of his employer is time worked under the Fair Labor Standards Act. If, however, an employee works regularly at a fixed place of employment, the time he spends driving to and from work is not ordinarily to be considered time spent on the business of his employer and need not be treated as hours worked."

BELO CASE

A petition asking the United States Supreme Court to grant a rehearing in the Wage-Hour case against the A. H. Belo Corporation, publishers of the *Dallas Morning News,* has been presented to the court by the Solicitor General, acting on behalf of L. Metcalfe Walling, Administrator of the Wage and Hour Division, U. S. Department of Labor, Mr. Walling announced.

The Supreme Court on June 8, 1942, in a 5 to 4 decision, ruled that the salary arrangement of the A. H. Belo Corporation, whereby it contracted with its employees to establish a certain "regular rate" of hourly pay to yield a guaranteed weekly wage regardless of the number of hours worked, up to a specified number of hours in a week, and with extra compensation thereafter, did not violate the overtime provisions of the Fair Labor Standards Act.

CALIFORNIA

Estimated Radio Homes, 1940

Number of Occupied Dwelling Units as reported by U. S. Bureau of the Census in advance release, Series H-7. Percent radio-equipped calculated from Series H-7 Bulletin following the Census Bureau practice. Number of radio units, or radio homes, estimated by applying percent ownership to those units not answering radio question and adding such to those reporting radio.

FEDERAL COMMUNICATIONS COMMISSION

FLY OPPOSES TAX

Some rather extravagant demands have been made on the broadcast industry from adverse competitive sources that a heavy tax be laid on the industry, FCC Chairman James Lawrence Fly told his press conference on Monday.

"Of course we have been through that problem time and time again, and I think it is obvious to everybody that a tax of 25 or 30 million dollars on the industry as has been suggested from some quarters would be not merely unfortunate but it would be tragic from the standpoint of the industry."

Mr. Fly said further on this point that "the broadcast industry just simply couldn't carry any such burden." He said also that he doubted if this would receive any serious consideration.

Stories have been spreading in certain competing advertising circles, Mr. Fly told the conference also, "that radio stations may have to go off the air for lack of materials. Now that's a lot of eye wash. It is true that we have problems in the broadcasting industry just as there are in many industries and as there must be in competing industries. But I have talked this matter over with the WPB representative and others concerned with it and I find no reasonable justification for any such rumors. We not only plan to have the broadcasting industry continue to do its job but that is quite essential from the standpoint of general morale, war information, and other essential purposes. It is not merely true that every effort be made to keep broadcasting going but we see no basis for any suggestions that there be any demolition of the service. I think that it is very unfortunate that these adverse interests display themselves in these forms at a time like this. Broadcasting industry is doing a big job in the war effort. It is rendering a great deal of public service and is carrying on very splendidly. When it is moving along successfully with this burden it should not be bothered with this bunch of pups snipping at its heels all the way."

CLEVENGER TO FCC

The FCC announces the appointment of Russell R. Clevenger as Director of Information to fill that position during the absence of George O. Gillingham, now on active duty with the Army.

Mr. Clevenger was on the staff of the New York Times for five years, spending part of that time in Europe writing special articles. He has had wide experience in the field of public relations and is now on leave of absence as vice president of Albert Frank-Guenther Law, Inc. He received his B.A. and B.Litt., from Columbia University. Mr. Clevenger was born in 1899 at Wilmington, Ohio; is married and has one child.

During the past several years he has advised the following firms on their public relations: Warner Bros. Picture Corp.; Texas Corp.; Crucible Steel; Dow Chemical; New Jersey Central; Baltimore & Ohio; Consolidated Edison; National Power and Light; Virginia Public Service; Columbia Gas & Electric; Chase National Bank; Marine Midland Trust Co.; New York Curb Exchange and the Automatic Phonograph Manufacturers Assoc. In 1940 he established the public relations department of Broadcast Music, Inc., during the days that organization contested for music supply for broadcast radio with ASCAP, and he conducted its operations until March 1942. More recently he has been a consulting expert to the Secretary of the United States Treasury.

FCC QUESTIONNAIRE ON RECORDINGS

The Commission authorized the sending of a questionnaire within the next few days to all licensees of standard broadcasting stations seeking to learn the extent to which recordings and electrical transcriptions are used by the radio industry. The questionnaire also is to inform the Commission with respect to the problem raised by the recent cancellation of a broadcast scheduled to originate at Interlochen, Mich.

921 STATIONS

During the month of July, 1942, the Federal Communications Commission granted no permits for the construction of new stations, and no operating licenses were issued. Three CP stations and one licensed station were deleted. The stations deleted are as follows: CP Station KTOM, Brainerd, Michigan; CP Station KTRN, Tacoma, Washington; CP Station WHAL, Saginaw, Michigan; and licensed Station KFPL, Dublin, Texas.

A comparative table by month follows:

	Aug. 1	Sept. 1	Oct. 1	Nov. 1	Dec. 1	Jan. 1	Feb. 1	Mar. 1	Apr. 1	May 1	June 1	July 1	Aug. 1

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, August 17. They are subject to change.

Monday, August 17

WMAW—C. T. Sherer Co., Inc., Worcester, Mass.—Modification of C. P., for extension of completion date to 8-17-42, under C. P. only; **1200 kc.,** 250 watts, amplifier stations: 100 watts, unlimited.

Tuesday, August 18

WLW—The Crosley Corporation, Cincinnati, Ohio.—C. P., **700 kc.,** 650 KW, unlimited, DA-night.

Thursday, August 20

WROL—S. E. Adcock, d/b as Stuart Broadcasting Co., Knoxville, Tenn.—Modification of license, **620 kc.,** 1 KW, unlimited, DA-night.

Friday, August 21

KHQ—Louis Wasmer, Inc., Spokane, Wash.—C. P., **590 kc.,** 5 KW night, 10 KW day, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KTTS—O. E. Jennings (Transferor), J. H. G. Cooper (Transferee), Independent Broadcasting Co. (Licensee), Springfield, Mo.—Granted consent to the acquisition of control by J. H. G. Cooper over the Independent Broadcasting Company, licensee of Station KTTS, through the purchase of 20 shares of common stock from O. E. Jennings, for a consideration of $1,000 or par value (B4-TC-306).

KWBW—The Nation's Center Broadcasting Co., Inc. (Assignor), William Wyse and Stanley Marsh (a partnership) doing business as The Nation's Center Broadcasting Co. (Assignee), Hutchinson, Kans.—Granted consent to assignment of license (B4-AL-342) for station KWBW, from The Nation's Center Broadcasting Co. to William Wyse and Stanley Marsh (a partnership) doing business as The Nation's Center Broadcasting Company.

W8XUM—WBNS, Inc., Columbus, Ohio.—Granted application for renewal of license for facsimile broadcast station.

DESIGNATED FOR HEARING

WAAT—Bremer Broadcasting Corp., Jersey City, N. J.—Denied petition filed pursuant to Memorandum Opinion of April 27, 1942, to prosecute the application and designated for hearing said application for construction permit (B1-P-3374) to install a new transmitter, make changes in directional antenna system, and increase day and night power from 1 to 5 KW.

Raymond C. Hammett, Talladega, Ala.—Designated for hearing pursuant to policy with respect to new construction under the present emergency, application (B3-P-3365) for construction permit for new broadcast station to operate on **1230 kc.,** 250 watts, unlimited time.

John W. Choate, Leonore V. Choate, E. P. Nicholson, Jr., and John Wallbrecht (a partnership), Middlesboro, Ky.—Designated for hearing pursuant to policy with respect to new construction under the present emergency, application (B3-P-3493) for construction permit for new broadcast station to operate on **1230 kc.,** 250 watts, unlimited time.

MISCELLANEOUS

Wilkes-Barre Broadcasting Corp., Wilkes-Barre, Pa.—Granted petition for an extension of time within which exceptions may be filed to the proposed findings of fact and conclusions of the Commission on its application (Docket 6135) and those of Central Broadcasting Co. (Docket 6169), Northeastern Pennsylvania Broadcasters, Inc. (Docket 6170), and Key Broadcasters, Inc. (Docket 6171) for new standard broadcast stations; time extended for five days—from August 7 to August 12, 1942.

KTRH—KTRH Broadcasting Co., Houston, Tex.—Granted modification of construction permit as modified, which authorized installation of new transmitter and directional antenna for day and night use, increase in power, change in frequency, and move of transmitter, for changes in transmitting equipment (B3-MP-1620).

South Florida Broadcasting, Inc., Miami, Fla.—Granted petition for an extension of time within which to file its proposed findings and conclusions on its application for a construction permit for a new standard broadcast station (Docket No. 6153); time extended 10 days.

KPAC—Port Arthur College, Port Arthur, Texas.—Denied petition to grant application for modification of license without hearing, and ordered the issues heretofore released to be amended.

KWK—Thomas Patrick, Inc., St. Louis, Mo.—Granted petition to dismiss without prejudice application for modification of construction permit for approval of directional antenna for day and night use. (Docket 6262)

KMLB—Liner's Broadcasting Station, Inc., Monroe, La.—Granted petition to dismiss without prejudice application for construction permit to operate on **1410 kc.,** 1 KW, unlimited, directional antenna at night. (Docket 5994)

WTEL—Foulkrod Radio Engineering Co., Philadelphia, Pa.—Granted motion to dismiss without prejudice application for construction permit to operate on **1340 kc.,** 250 watts, sharing WHAT. (Docket 6305)

LaCrosse Tribune Co., LaCrosse, Wisc.—Granted petition to dismiss without prejudice and cancel hearing on application for construction permit for new high frequency station. (Docket 6373)

Herald Publishing Co., Klamath Falls, Ore.—Granted petition to dismiss without prejudice application for construction permit for new standard broadcast station. (Docket 6090)

KSL—Radio Service Corp. of Utah, Salt Lake City, Utah.—Granted petition to dismiss without prejudice application for construction permit to operate on **1160 kc.,** 500 KW, unlimited time. (Docket 4361)

WMAW—C. T. Sherer Co., Inc., Worcester, Mass.—Granted petition to dismiss without prejudice application for modification of construction permit for extension of completion date to August 17, 1942. (Docket 6313)

WSAR—Doughty & Welch Electric Co., Inc., Fall River, Mass.—Granted motion to dismiss without hearing application for construction permit to operate on **1470 kc.,** 1 KW, directional antenna day and night, unlimited time. (Docket 6381)

WHOM—New Jersey Broadcasting Corp., Jersey City, N. J.—Granted motion to dismiss without hearing application for construction permit to operate on **1480 kc.,** 5 KW, unlimited, directional antenna day and night. (Docket 6382)

WLW—The Crosley Corp., Cincinnati, Ohio.—Granted motion for leave to amend application so as to eliminate the need for any construction by reducing power requested and eliminating directional antenna; amendment to be filed within 15 days; dismissed without prejudice request for removal from hearing docket; on Commission's own motion continued hearing now set for August 18 to October 19, 1942. (Docket 6341)

KHQ—Louis Wasmer, Inc., Spokane, Wash.—Granted motion for continuance of hearing on application for construction permit to operate on **590 kc.,** 5 KW night, 10 KW day, unlimited time, now set for August 21 to September 28, 1942. (Docket 6342)

J. C. Kaynor, Ellensburg, Wash.—Granted motion for continuance of hearing on application for new station, now set for August 26 to September 29, 1942. (Docket 5965)

APPLICATIONS FILED AT FCC

1240 Kilocycles

KICD—Iowa Great Lakes Broadcasting Co., Spencer, Iowa—Modification of construction permit (B4-P-3178 as modified) which authorized construction of new station for extension of completion date from 8-16-42 to 11-16-42.

1250 Kilocycles

WDAE—Tampa Times Company, Tampa, Fla.—Special Service Authorization to operate on **770 kc.,** with power of 5 KW, unlimited time, employing directional antenna for night use.

1270 Kilocycles

WPDQ—Jacksonville Broadcasting Corp., Jacksonville, Fla.—Modification of construction permit (B3-P-3385 as modified) which authorized construction of a new standard broadcast station requesting change in type of transmitter, change type of frequency monitor and extension of commencement and completion dates of construction.

1290 Kilocycles

WHKY—Catawba Valley Broadcasting Co., Inc., Hickory, N. C.—Modification of construction permit (B3-P-3259) which authorized installation of new transmitter, directional antenna for night use, change frequency, increase power and move transmitter for extension of completion date from 9-6-42 to 11-5-42.

1340 Kilocycles

WALL—Community Broadcasting Corp., Middletown, N. Y.—License to cover construction permit (B1-P-2594 as modified) which authorized construction of new standard broadcast station.

WALL—Community Broadcasting Corp., Middletown, N. Y.—Authority to determine operating power by direct measurement of antenna power.

1380 Kilocycles

WSYB—Philip Weiss, trading as Philip Weiss Music Co., Rutland, Vermont—License to cover construction permit (B1-P-3090 as modified) which authorized change in frequency, increase in power, installation of new transmitter, directional antenna for night use.

WSYB—Philip Weiss, trading as Philip Weiss Music Co., Rutland, Vermont—Authority to determine operating power by direct measurement of antenna power.

MISCELLANEOUS APPLICATIONS

WCBX—Columbia Broadcasting System, Inc., New York, N. Y.—Modification of license to add the frequency of **9480 kc.** to present licensed frequencies, sharing time with WCDA and WCRC on this frequency.

WCDA—Columbia Broadcasting System, Inc., New York, N. Y.—Modification of license to add the frequency of **9480 kc.** to present licensed frequencies, sharing time with WCBX and WCRC on this frequency.

WCRC—Columbia Broadcasting System, Inc., New York, N. Y.—Modification of license to add the frequency of **9480 kc.** to present licensed frequencies, sharing time with WCBX and WCDA on this frequency.

KRED—Redwood Broadcasting Co., Inc., Portable-Mobile, area of Eureka, Calif.—Construction permit for reinstatement of (B5-PRY-263) which expired 7-19-42 which authorized construction of new relay broadcast station to be operated on **1622, 2058, 2150, 2790 kc.**, 75 watts, A3 Emission.

WBCZ—WHEB, Inc., Portable-Mobile area of Portsmouth, N. H.—License to cover construction permit (B1-PRE-416) which authorized construction of new relay broadcast station.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Philip Morris and R. J. Reynolds—Complaints have been issued charging Philip Morris & Co., Ltd., Inc., and R. J. Reynolds Tobacco Co., manufacturers and distributors of cigarettes and smoking tobacco, with misrepresentation and false advertising. Philip Morris cigarettes, Dunhill cigarettes and Revelation smoking tobacco are named in the complaint against the Philip Morris company as the products misrepresented, and Camel cigarettes and Prince Albert smoking tobacco are involved in the complaint against the Reynolds company. Both complaints allege that in newspaper advertising, radio broadcasts and through other media the respondents have made false and misleading representations concerning the merits of their products. (4794-4795)

Neva-Wet Corporation of America, 500 Fifth Ave., and Neva-Wet Bottling Co., Inc., 683 Fifth Ave., New York, and Samuel Howard Lefkowitz and Irving Lefkowitz, as officials of both companies and also trading as Sani-Age Co. and Sani-Age Corporation of America, are charged in a complaint with misrepresentation. (4793)

Westinghouse Electric Supply Company et al.—Nine complaints involving collusion and fraudulent bidding in connection with Navy Department shipyard contracts have been issued. The bids were on electrical and construction materials required to rehabilitate the facilities of the Cramp Shipbuilding Company, Philadelphia. The respondents and their agents, most of whom are located in Philadelphia, are engaged in selling either electrical supplies, mill work, lumber, or other building materials, and machinery.

The respondents named in the complaints are:

Westinghouse Electric Supply Company and R. R. Dewees, as its agent; Grater-Bodey Company and S. W. Roberts as its president; J. P. Rainey, trading as J. P. Rainey & Company; James A. Clancy, M. A. Webster, and Joseph R. Duffy, trading as J. R. Duffy Manufacturing Company; American Steel and Wire Company of New Jersey; Walter H. Cave, as agent of Cyclone Fence Company and American Steel and Wire Company of New Jersey; Paul W. Crawford, trading as Adams-Crawford Company, and A. F. Crawford as agent of the company; P. J. McBride and George B. McClennen, trading as Delta Equipment Company; Russell Keely and F. Oliver Keely, individually and trading as S. S. Keely & Sons; A. Wilt & Sons Company and Frank R. Bowers as president; Frank L. O'Brien and Clarence J. O'Brien, individually and trading as The O'Brien Machinery Company; William J. Cattie, trading as Cattie Tool Company; W. B. Rapp; Walker Brothers and Anthony M. Callanan, individually and as vice president of Walker Brothers and Adelphia Electric Company, and Norman T. Liethold, individually and as secretary of the company; and Charles F. Rohleder and his agents, Allen McLaine Ward and J. R. Baldridge, Jr. (4708 to 4807)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Empire Merchandise Corp., et al.—Orders to discontinue the use of lottery methods in the sale and distribution of merchandise and candy have been issued against Empire Merchandise Corp. and Sophie Rubman, an officer of the corporation, 414 Broadway, New York; Popular Products Corp. and Mitchell Cinader and Esther Cinader, officers of the corporation, 243 West 17th St., New York; and Vinton T. James and George E. James, doing business as J. and J. Candy Co., 1507 West Trade St., Charlotte, N. C. (3357-3479-4769)

Rudolph Wurlitzer Co., 121 East Fourth St., Cincinnati, has been ordered to cease and desist from misrepresentation in connection with the sale of pianos covered or finished in whole or in part with a material designated "Kordevon." (4525)

Tiger Yarn Co., Minnette Yarn Co., Bengo Yarn Shop, and Goldman's Yarn Shop, 1643 Bathgate Ave., New York, has been ordered to cease and desist from misrepresentation in the distribution and sale of certain knitting yarns. (4625)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Brown & Williamson Tobacco Corp., Louisville, Ky., stipulated to cease certain representations in the sale of "Kool" mentholated cigarettes. (3486)

Morck Brush Manufacturing Co., 236 Eighth St., San Francisco, engaged in the manufacture of paint and brushes, including so-called Morck Speed-Line Brushes, one type of which is designated "No. 248 Stucco Brush," has entered into a stipulation to cease and desist from use in advertising matter of any representation that its brushes will give 65 per cent more coverage, or wear, or last 50 per cent longer, or have 20 per cent more carrying capacity than other brushes of comparable size and quality on the competitive market; and from using any representation which may convey the belief to prospective purchasers that its brushes possess either coverage, wearing or carrying capacity qualities in excess of what is actually the fact, or that they exceed the coverage, wearing or carrying capacity qualities of comparable competitive brushes in any represented amount when such indicated superiority does not exist. (3514)

Anna Plotz, 2315 South Central Park Ave., Chicago, engaged in the preparation and sale of "Kitrab," a salve having an iodine content and alleged to be useful as a treatment for goiter and scrofula, has stipulated in connection with the sale and distribution of the product, to cease and desist from any representation which conveys the impression or belief that its use constitutes a cure or competent treatment for scrofula or goiter generally or any type of goiter other than simple goiter arising from iodine deficiency. The respondent also agrees to cease any representations which attribute to the product, when used by sufferers from goiter, scrofula or similar diseases, any therapeutic values or effects in excess of what it actually possesses. (3513)

ThoroBread Co., Inc., 1125 West Sixth St., Cincinnati, engaged in selling certain dry dog food preparations designated "ThoroBread T Squares (biscuits)," "ThoroBread Kibbled." "ThoroBread Fine Kibbled (meal)," and "ThoroBread Meat Cereal Dog Feed," and The Keelor & Stites Co., 3001 Carew Tower, Cincinnati, advertising agency which disseminates advertisements for the ThoroBread corporation, have stipulated to cease and desist from using the terms "meat," "dehydrated meat," "meat cereal," or any other terms of similar import to describe dehydrated meat meal or any product which is not meat. (03034)

Veltex Co. and Vi-Co Sales Co., 1811 First Ave., North, Birmingham, Ala., engaged in selling a medicinal preparation designated "Vi-Co Compound," have stipulated to discontinue representing that the preparation is a vegetable and mineral compound; that it will afford relief for indigestion or sour stomach; that they guarantee any specific profit or any specific investment of money made by purchasers of the preparation; and that prospective agents, salesmen, distributors, dealers or other representatives can make profits or earnings within a specified period of time which are in excess of the average net earnings consistently made in like periods of time by active full-time agents, salesmen or other representatives in the ordinary and usual course of business and under normal conditions and circumstances. (03033)

FTC CLOSES CASES

The Federal Trade Commission has closed without prejudice the case growing out of the complaint against Economy Sales Co., Inc., and Samuel Knight, alias Samuel Nitke, Jersey City, N. J., charged with the use of lottery methods in the distribution and sale of merchandise. The corporate respondent no longer is in existence, having been dissolved by proclamation of the Secretary of State of New York.

The Commission has also ordered that the case growing out of its complaint against Stayner Corp. and Erwin, Wasey & Company of the Pacific Coast, both of San Francisco, be closed as to the latter respondent.

Stayner Corp. is engaged in compounding and selling a medicinal preparation designated "Minra," and advertisements of the product were prepared by Erwin, Wasey & Company of the Pacific Coast, an advertising agency. The complaint alleged that both respondents had disseminated advertisements containing false representations concerning the therapeutic value of Minra.

A stipulation as to the facts and an agreement to cease and desist having been entered into by Erwin, Wasey & Company of the Pacific Coast, the Commission ordered the case against it closed without prejudice.

Under the stipulation, Erwin, Wasey & Company of the Pacific Coast agrees to discontinue disseminating any advertisement which represents, among other things, that the preparation is a remedy or cure for acidosis, indigestion, influenza, infection, headaches, or toxemia; that it furnishes the necessary materials to produce sound teeth, bones, muscles, or good health, and that it gives protection against mineral deficiencies.

The advertising agency further agrees to cease and desist from representing that any of the results claimed for Minra have been proved by tests made at universities or colleges, or by competent trainers or coaches, or on college athletes.

Talent Fees

A question regarding "talent fees" under the Wage and Hour Act is becoming increasingly serious.

Several stations have been forced to pay out considerable sums in "back-pay" because they had calculated announcers' overtime on a salary basis rather than a gross earnings basis.

The Wage and Hour Division of the U. S. Department of Labor contends that the gross earnings basis is the proper basis for calculating overtime when talent fees are involved.

We contend that this is not always correct. We contend that an announcer while working on a commercial program is often, in fact, the employee of the sponsor. Hence, when the announcer is the employee of the sponsor, his talent fee should not be added to his station salary in determining his overtime rate.

The Wage and Hour people have advised us that they are willing to modify their opinion if we can convince them that they have erred. This we shall endeavor to do.

Meantime, it would be well for all stations to look at the facts in their own cases, to see whether their announcers' overtime should be based on station salary or gross earnings.

This whole problem disappears, if (1) the announcers involved are limited to a 40-hour week, or (2) the announcers can be classified as professional employees. In neither case need any overtime be paid, as far as the law goes.

With the growing shortage of manpower, however, a strict 40-hour week for all announcers is impractical. Many announcers can be classified as professional employees, but the $200-a-month factor eliminates many others. For the definition of a professional employee, see the NAB Wage and Hour booklet, page 11.

The Wage and Hour people's "gross earnings" theory grows out of the extremely broad definition of the word "to employ" in the Wage and Hour Act itself. "To employ" is defined as "to suffer or permit to work." To the best of our knowledge there has been no comprehensive judicial interpretation of that definition. And so we must turn to what might be called the common standards for establishing the employer-employee relationship.

Who *in fact* hires and fires the man? Who pays him? Where does he work? Who directs or controls his work? Whose tools does he use? Who pays his social security taxes?

These are basic questions. In the complicated talent fee structure now existing in the broadcasting industry there are many others. Just for instance, is the station acting merely as the agent for talent or sponsor in establishing the relationship? Even if the station actually pays the talent, isn't the station just acting as paying agent for the sponsor?

Is the station paying the announcer his salary while he is working for a sponsor, or does he "mark out" that period?

To make all this a little more clear, let us cite some examples. A highly paid staff announcer at one of the large New York network stations is approached by an advertiser to handle a network commercial out of his regular hours as a staff announcer. The advertiser clearly is the employer, because he hires and fires directly, directs and controls the announcer's work and pays his social security tax.

In this case, then, any overtime the announcer put in on his staff job would be based on his staff salary and not on his gross earnings, because the network was not the employer of this announcer while he was working on the commercial program.

(This announcer probably would be classified as a professional employee anyway, but we cite the case as a good example of a clear employer-employee relationship between the advertiser and the announcer.)

On the other hand, take the case of an announcer who is doing a news broadcast in a small station. Without even knowing that announcer's name, an advertiser starts to sponsor that newscast. The advertiser is billed for $100 time and $10 talent. The talent fee is turned over to the announcer. The station retains complete direction and control over the announcer's work. The station hired him and, in fact, is free to fire him at any time.

In this case, the station appears clearly to be the employer and the announcer's overtime rate must be based on his staff salary plus his fee.

In between these two extremes are hundreds of variations. Probably you have some variation in your station. If you do, please send every detail to the NAB for our opinion. We are convinced that the sponsor is the employer in many cases. If the facts in your case do not warrant this opinion, we will be glad to suggest changes. Better safe than sorry.

We are in entire sympathy with AFRA's contention that the overtime provisions of AFRA contracts should be accepted as legal. These contracts provide that overtime should be based on staff salary and not on gross earnings. Those hours spent on "fee" jobs, under AFRA contracts, are marked out of working hours, in recognition of the principle that the announcer is not working for the station when he is handling a commercial program for a sponsor.

The Belo decision supplies the possibility of a partial but far from a whole answer to this problem. The Supreme Court stated that there was nothing in the Wage and Hour Act to prevent payment of *more* than time and one half for overtime.

And so, if an announcer works on a commercial *after the completion of his regular work week*, the fee he receives undoubtedly is greater than his regular overtime rate. Hence his fee would be ample compensation.

Don't get stuck for any undue back pay. If in doubt, write the NAB.

REPORTS UNTRUE THAT U. S. PLANS TO CLOSE STATIONS

Considerable anxiety was created within the industry by a news story to the effect that WPB had recommended to the Federal Communications Commission that "All radio stations, with the exception of a number of key stations scattered throughout the country, should shut down operations at midnight."

The story went on to the effect that suggestions had been drawn up by the Communications Branch of the WPB which called for the operation after midnight of certain large stations for emergency purposes only. It further said that "Small radio stations or chains

REPORTS UNTRUE THAT U. S. PLANS TO CLOSE STATIONS

(Continued from page 501)

which are experiencing difficult times because of the war as a result of lower earnings should be taken off the air, the WPB believes. It contends that these stations should be permitted to cease operations voluntarily and to resume after the war."

Many stations have written to NAB, evidently thinking that some discussions were being carried on about the subject of compelling certain stations to cease operation as a means of conserving materials. Such is not the case and NAB has so advised those inquiring.

There have been almost continuous discussions between representatives of the industry, the FCC and the Communications Branch of the WPB on the subject of material conservation. At no time in these discussions has the slightest suggestion or intimation been made of any arbitrary or compulsory orders regarding operation. Some operators have been apprehensive as to the future and have made inquiries as to whether or not consideration is being given to the possibility of curtailing the hours of service required under their license and the effect which such curtailment might have upon the license. This gave rise to a discussion of the wisdom of permitting licensees to voluntarily curtail service.

FCC Chairman James Lawrence Fly at his press conference on Monday discussed this subject and observed that the newspaper accounts referred to "are markedly out of order."

Mr. Fly told the conference that "no measure has been suggested by anyone in the government or in the industry which is not aimed toward establishing stability and durability of broadcast service and coverage."

Mr. Fly said that no suggestion has been made which would result in any real impairment of the service being rendered to the public by radio or the service rendered to advertisers. "There have been a number of points raised," he said, "for consideration from different sources, including our own staff and including the staffs of the WPB, but all of those suggestions are aimed along constructive lines."

The various suggestions, Mr. Fly said, will be given study by the Domestic Broadcasting Committee of the Board of War Communications. That will be done promptly.

The survey of tubes, Mr. Fly said, was conducted by the Board and "I don't think that returns are complete yet and of course it is essential that the committee have the benefit of that survey since the tubes are almost undoubtedly at choke point. I have great confidence that we shall come off with some constructive results in terms of conservation and in the renewed assurances of continuity and stability. In light of the job which broadcasting has been doing for the war effort I don't think anyone will sit by and permit that service to be impaired."

WPB CONSOLIDATION

All wireless communication equipment requirements, civilian and military, have been consolidated under the direction of the Radio and Radar Branch of the Aircraft Production Division, the War Production Board announced.

Formerly there were two groups that covered this field. The Radio and Radar Branch handled military requirements and the Radio Section of the Communications Branch handled civilian requirements. The latter section has been transferred to the Radio and Radar Branch and has been named the Civilian Radio Section.

Frank H. McIntosh, who was chief of the section under the Communications Branch, will continue to be chief under the Radio and Radar Branch. Ray C. Ellis, chief of the Radio and Radar Branch, will head the augmented group.

A. F. OF M.

In place of the special A. F. of M. bulletin which has been instituted to acquaint NAB members with developments in the musicians situation, there will be mailed to stations this week from New York a broadside containing some of the outstanding editorials inspired in the nation's press by the ban against recordings.

Thus you will be given an advance mailing of this broadside which will be widely distributed next week among heads of influential organizations, members of appropriate House and Senate Committees, Federal officials, newspaper columnists and radio commentators, chief editorial writers and other leaders in forming public opinion.

That the country is thoroughly aroused and overwhelmingly critical of the ban on recordings is definitely shown in the more than 9,000 press clippings already received at NAB New York office.

WAR DAMAGE INSURANCE

Broadcast studios, transmitter buildings and towers come under Occupancy Code 14, the War Damage Corporation stated this week in response to NAB's plea for classification under Occupancy Codes 4 and 5. All communications systems, it was said, are military objectives and consequently command rates appropriate to such a classification. Buildings and structures taking the rates provided for Occupancy Code 14, if of fire resistant construction according to fire insurance standards (classifiable under Construction Code 1), receive substantial credits in rates which bring the net rates down to the level of Occupancy Code 5.

The War Damage Corporation's letter of August 19 to NAB Counsel, Russell Place, reads as follows:

"Your letters of the 3rd of July and 7th of August were considered by the Directors of the War Damage Corporation at a recent meeting and Occupancy Code Classification No. 14, as provided under Regulations "A" of the War Damage Corporation, was re-affirmed.

"Communication systems, as such, have been considered as military objectives and consequently commanding the rates appropriate to such a classification. May we draw your attention to modifications which have been bulletined since July 1st as to broadcasting stations housed in office buildings or hotels, or any other class of business. The predominant occupancy by area governs the classification of tenants. Consequently, radio broadcasting equipment within a hotel or mercantile building would enjoy the rates as provided at Occupancy Code 04. However, where the predominant occupancy would be the broadcasting facility, the rates provided at Code 14 would apply, but in your connection we draw your attention to Memorandum No. 6 issued by the War Damage Corporation to its Fiduciary Agents on July 25th, 1942. Item 13 modifies the original rates as published in connection with Occupancy Code 14 to give effect to construction eligible for Construction Code No. 1 classification. For your reference I attach an excerpt from the Memorandum, quoting in detail the revised ruling.

"Consequently, it appears that the objectives sought through your letters of the 3rd of July and 7th of August have been achieved as outlined above."

EXCERPT FROM MEMORANDUM TO FIDUCIARY AGENTS NO. 6—JULY 25, 1942

"13. *Utility Properties.* The rates applicable to publicly or privately owned utilities as set forth in the Rate Schedule opposite Occupancy Code No. 14 do not provide any credits for fire resistive construction. Notwithstanding, utility properties classifiable under Construction Code No. 1 are eligible for the following rates, effective Juy 1, 1942:

Coinsurance and Annual Rates			
50%	80%	90%	100%
.20	.14	.13	.12"

Radio Classes Prove Worth

HUNDREDS MORE NEEDED

WHEN noses were counted last spring there were Radio Technician Training Courses in 46 states with a total enrollment in excess of 20,000.

More proposals from state schools are being OK'd currently and broadcast engineers are still assisting educators in the teaching job. Reasons why the Engineering, Science, Management, Defense Training-NAB radio program is so highly regarded by the military and industry are two: (1) it is effective; and (2) there is no loss in production while students learn.

Memo to Managers:

“1942 WAR IS RUN BY RADIO”

Urge Educators
To Arrange More
Radio Classes

INTERVIEW — TELEPHONE — TELEGRAPH !

It's not only how much we do but how quickly we do it that counts in winning this war.

Hundreds more radio classes are needed and needed without delay. Urge educators to send their proposals for more night classes and sections of “Fundamentals of Radio” to the ESMDT Director, U. S. Office of Education, Washington, D. C. Please make this your first order of business. We can't win with too little, too late.

Be sure to keep us advised. Course outlines available on application

The Big Need

The big need as stated a year ago, is for people grounded in the fundamentals of radio. That's exactly what students get when they complete Parts I and II of “Fundamentals of Radio.” Then graduates can absorb specialized training. Many can pass a first class radiotelephone license examination with a few weeks of extra study.

News from the Teaching Front

Rutgers and New Jersey

Ordinarily it would be poor psychology to lead off with the account of what is undoubtedly the largest pre-service radio teaching job in the country. But this is being risked because the Nation, as a whole, made one big mistake in the beginning. It failed to make plans that were big enough. That applies to everything we did. So we do need hundreds of additional classes in “Fundamentals of Radio” . . . as many as qualified institutions have the facilities for teaching. And even then sufficient personnel will be lacking.

At any rate, here's the Rutgers and New Jersey story, in part, from M. A. Chaffee, associate director, Engineering Defense Training, Rutgers University:

“Rutgers University is very much alive to the old NAB course in radio. After enrolling, last January, over 2,000 in ‘Fundamentals of Radio, I,’ we started in June on ‘Fundamentals of Radio, II,’ with 1,000 students carried over from the first course. We could easily have taken 1,500 but were limited by Washington to 1,000. Part II is now operating very successfully with about 125 already enlisted in the Enlisted Reserve Corps of the U. S. Signal Corps. We helped Governors Island in obtaining these enlistments.”

Between 1,500 and 3,000 men are now being recruited for “Fundamentals of Radio, I,” with simultaneous enlistment in the Enlisted Reserve Corps of the U. S. Signal Corps. To save time, listeners to the radio recruiting announcements and programs are directed to write Rutgers direct.

All Stations Active

The recruiting campaign began over WOR on July 27. It was augmented on the thirtieth when Captain Kenneth A. Laplant, enlistment officer, Second Service Command Area, Governors Island, and Mr. Chaffee went on the air at 6:25 P. M.

As soon as possible thereafter, men from Mr. Chaffee's office made personal calls on WBAB, and WFPG, Atlantic City; WTNJ, Trenton; WAWZ, Zarephath; WCAP, Asbury Park; WSNJ, Bridgeton; WCAM, Camden; WAAT, and WHOM, Jersey City; WHBI, Newark; WPAT, Paterson; WBRB, Red Bank; and WTTM, Trenton, in order that the size and importance of the job might be explained in detail. Calls were preceded by a letter from the NAB War Committee.

In addition to the above, Rutgers has found time to give additional radio instruction. One hundred ninety-six out of 200 students in Civil Service Junior Engineering aids, from Philadelphia

Signal Depot, recently finished their course—a total of 576 hours of pre-radar. One hundred additional students started a similar course, 12 weeks of 48 hours per week, on August 3.

Louisville Activity

The University of Louisville and the Louisville broadcasters continue their cooperation in the radio technician training program. Three sections of "Fundamentals of Radio, II," began August 10. In September three classes of "Fundamentals of Radio, I," will be started. This is in addition to the six earlier sections.

Information came from W. E. Hudson, chief engineer WAVE, and industry engineering advisor for the program. All instructors for the courses are technical men from Stations WHAS and WAVE. While several instructors have been called to the armed forces, competent replacements from station staffs have so far been available. Mr. Hudson wrote that:

"Representatives of the University of Louisville are to be complimented on their efforts in cooperating and supervising to make this course a success."

Rockford Going Strong

WROK, Rockford, is again engaged in recruiting students for "Fundamentals of Radio" under direction of the University of Illinois Extension Division.

Classes begin September 14. The teaching staff includes two WROK engineers, Thomas C. Cameron and Maurice Nelson. Bill Traum, station promotion director, said that many of the students of the first "Fundamentals of Radio" course, last spring, are now in the Signal Corps.

Jamestown, N. Y.

Simon Goldman, manager, WJTN, has been in contact with Paul B. Orviss, director of the New York State Agricultural and Technical Institute at Alfred University, as to future plans with the ESMDT-NAB course. Alfred is now operating two courses in Jamestown and in many other cities in that general area of New York.

Mr. Orviss indicated that there would be marked expansion in the radio training program. As reported by Mr. Goldman, Director Orviss said, "The desire at the present time seems to have us expand the program as much as possible, both in the old areas and also in the new areas."

Manager Goldman wrote that the reactions by the students themselves are very fine and there have been vast benefits locally through the radio instruction.

Manhattan College

Several weeks ago, Brother Amandus Leo, Dean of Engineering, Manhattan College, NYC, visited NAB headquarters to learn whether the Signal Corps, in particular, had any additional constructive suggestions to make about "Fundamentals of Radio."

He was put on the telephone to the proper officer and learned that the big demand, as previously announced by NAB, is for men trained in the "Fundamentals of Radio." Without first acquiring fundamentals, it is impossible to train a man for real specialized communication tasks in any service. Manhattan is teaching both I and II of Fundamentals of Radio.

State of Wisconsin

Over a month ago, a report from Dean F. Ellis Johnson and A. G. Pulver, ESMDT Director, University of Wisconsin, and Ed Allen, WIBA, industry representative, stated that 12 "Fundamentals of Radio" classes with approximately 350 students in ten cities had been started since May; and that more would be started as soon as ok had been received from ESMDT, Washington. These cities are:

Appleton
Ashland
Eau Claire
Hurley
Marinette
Medford
Wausau
Wis. Rapids
Madison
Green Bay, St. Norbert's College

Classes, outside of Milwaukee, begun last March, produced over 500 graduates.

More Classes Needed

No present teaching activities conflict with the ESMDT-NAB program. Major Richard R. Kilgore, U. S. Army Signal Corps, Military Personnel Division, Washington, and Captain J. Elroy McCaw, Army Air Forces, War Department, Washington, have authorized us to say to you and all other interested persons that the need is for as many ESMDT-NAB radio classes as possible. This takes into consideration the various other radio training classes now formed or contemplated.

New Book Written for Course

Prentice-Hall, book publishers, 70 Fifth Avenue, New York City, has published "Fundamentals of Radio" for use with the course outline, "Fundamentals of Radio, I and II." The book was edited by Dr. W. L. Everitt, Professor of Electrical Engineering, Ohio State University, now on duty as Chief Consultant on Air Communication to the Chief Signal Officer of the Signal Corps. The authors are: Edward C. Jordan, Instructor in Electrical Engineering, Ohio State University; Paul H. Nelson, Assistant Professor of Electrical Engineering, The University of Connecticut; William Carl Osterbrock, Professor of Electrical Engineering, University of Cincinnati; Fred H. Pumphrey, Professor of Electrical Engineering, Rutgers University, now on leave as a Major in the military training branch of the Signal Corps; Lynne C. Smeby, former NAB Director of Engineering, now consultant on air communication for the Signal Corps, and associated with Dr. Everitt.

Programs for Victory

BING CROSBY AIDS BOND SALE AT KFBC

Uncle Sam was $15,000 richer after a bond sale held in the studios of KFBC, Cheyenne, Wyo., August 11. Bing Crosby, Phil Silvers and Jimmy Van Heusen, in town for a USO Camp Show at Fort Francis E. Warren, visited the studios and conducted a whirl-wind bond selling campaign and an impromptu ad lib show. Many bonds were purchased in the offices of KFBC during the campaign and many others were ordered over the phone. A novel idea for the sale created tremendous interest as the largest bond purchaser, A. V. Tyrrell, local Chevrolet dealer, who purchased $2,000 in bonds, was the winner of a song dedicated and sung by Bing Crosby.

William C. Grove, manager of KFBC, made arrangements for the program with A. E. Wilde, state administrator for the War Savings Staff, and Hy Blane, traveling USO Camp Show Representative. The affair was "MC'd" by Art Peterson, KFBC Production Manager.

KXOK PUTS SHOWMANSHIP IN DRIVE

KXOK, the St. Louis Star-Times and the Fanchon and Marco St. Louis Amusement Company chain of theatres, have joined forces in an all out drive to collect every spare ounce of rubber and scrap metal in Greater St. Louis, in direct response to the nation's needs, for the production of war material.

In addition to free admission to the thirty-one theatres to anyone bringing in scrap material, two live western Pinto horses, completely equipped, will be given away to the two boys or girls bringing in the largest amount of material.

In order to promote the campaign, horses completely equipped and ridden by western-costumed riders are touring the city, the thirty-one theatres are running screen trailers, KXOK is running interviews, spots and programs calling attention to the drive, and the Star-Times is playing the drive in the news columns.

All money received for salvage of the scrap metal and rubber will be turned over to the USO in St. Louis to be used for the purchase of needed furniture and equipment.

KGNC BOND-WAGON

KGNC, Amarillo, Texas, inaugurated, on August 11, the first of a weekly series of studio programs expressly designed to promote the sale of War Bonds, for which the station has been appointed issuing agent.

According to Raymond Hollingsworth, assistant manager, the program will continue to feature a completely new cast of popular entertainers and guest speakers each week. KGNC Bond-Wagon of the Air is broadcast 7:30-8:00 p. m.

Members of the station War Bond Department will be on hand to issue bonds to studio visitors who wish immediate purchases. Others are invited to phone their names and addresses.

M-3 IS BOND SALES OFFICE

A photograph arrived this morning of the WMBD Victory Tank. This is a reproduction of the M-3, commonly referred to as the "General Grant," and was built by E. B. Hulsebus and Wallace Nyberg, of the Home Building Service division, Peoples' Federal Savings and Loan Association of Peoria, issuing agents of war bonds and stamps for radio station WMBD. It looks like the real thing. The tank is insulated and air conditioned for use in winter and summer. The booth is open six days a week, 9 a. m. to 5:30 p. m. Various WMBD entertainers come to the Victory Tank at announced times.

For the first two weeks of the plan to sell bonds and stamps over the air the total sale was $26,327.65. Since there are four special shows plugging the sale over WMBD, aside from booth sales, it is expected that the monthly total will exceed the $50.000 mark.

WPAT SAYS "SWEET AND LOW"

Since a great many three-shift war workers are located in the territory served by WPAT, Paterson, N. J., Henry Miller, program director, is promoting the idea of keeping radio volume down at all times.

One of his announcements reads, "Maybe you like this program. We're glad if you do. But there may be a fellow trying to sleep near you, who has been working all night in a war plant. And he probably doesn't want to hear it. So keep your radio low, please."

READER'S DIGEST ARTICLE

The article, "Radio's Plug-Uglies," in the August issue of the *Reader's Digest* has been the subject of considerable correspondence between the stations and the NAB.

An effort is being made to obtain the early printing of a factual reply to the article. It seems to be agreed that the best answer to the charges and insinuations made in this article is a recitation of the facts regarding radio advertising and the results which it has produced. Word has come to NAB that several trade publications will shortly run articles responsive to the charges made in the *Reader's Digest* article.

NAB is following the situation very closely and will do all within its power to offset any misconceptions which the article may have created.

1942 PEABODY RADIO AWARDS

Merritorious public service by individual radio stations, regional and local, will this year be recognized in the George Foster Peabody radio awards.

This was decided at a meeting Thursday of a committee of the Board at the NAB offices. This meeting was attended by Edward Weeks, Boston, editor, *Atlantic Monthly;* Neville Miller, C. E. Arney, Jr., and Joseph L. Miller of NAB; John E. Drury, dean, Henry W. Grady School of Journalism, the University of Georgia.

December 15 was set as the closing date for this year's entries. Proper forms may be secured from either the NAB offices in Washington or from Dean Drury.

Last year the Peabody awards went primarily to programs. The year before stations and networks were recognized. For 1942 both programs and stations are to be eligible.

The Peabody awards, as originally set up, were designed to recognize the most disinterested and meritious public service rendered each year by the broadcasting industry, and to "perpetuate the memory of George Foster Peabody, benefactor and life trustee of the University of Georgia, and friend of educational progress everywhere."

This original purpose will be borne in mind in this year's selections, but an effort will be made to narrow the bases of measurement, both in terms of stations and programs.

Awards will be made in at least six categories:

1. That program or series of programs inaugurated and broadcast during 1942 by a regional station which made an outstanding contribution to the welfare of the community the station serves.
2. That program or series of programs inaugurated and broadcast during 1942 by a local station which made an outstanding contribution to the welfare of the community the station serves.
3. Outstanding reporting of the news.
4. Outstanding entertainment in drama.
5. Outstanding entertainment in music.
6. Outstanding educational program.

The awards under reporting, drama, music and education may go to either a station or a network program.

TAX ADVERTISING

Any station knowing of a provision in a city charter permitting the city to use radio facilities in advertising water taxes, poll taxes, etc., when due, will kindly communicate with Radio Station WSYB, Rutland, Vermont.

SELECTIVE SERVICE 1-B OUT

Elimination of Class 1-B, the Selective Service designation for registrants considered fit for limited military service only, beginning August 20 was announced yesterday by National Headquarters, Selective Service System. Thereafter all registrants who are not totally disqualified will be reclassified in Class 1-A and the Army will decide, after induction, on their individual assignment to full or limited military service. Registrants found to be unsuited for any military service will be placed in Class IV-F.

THE ASSOCIATION OF WOMEN DIRECTORS

One of our most distinguished members is Alma Kitchell, known in nearly every household in America. Miss Kitchell has broadcast over NBC and the Blue Network for years, through her delightful song recitals and programs directed to women listeners. Her "Brief Case" and "Streamlined Journal" have made history in this field. One of the reasons Alma has made such a success has been that besides being a broadcaster, she is a mother and home maker who practices these arts conscientiously and consistently.

Miss Kitchell has made the great sacrifice to the war effort, through the enlistment of her son last spring. She wanted to do even more and was inspired to buy a stamp every day and put it aside for that son against the day of his return. Mrs. Henry Morgenthau, Jr., heard about it—and she told her Secretary of the Treasury husband. Both of them were delighted with this splendid thought that both embodied patriotism and thrift. In consequence, on Sept. 2nd, Alma will have a new thrill, for instead of interviewing a celebrity as she often does, she will be interviewed herself by Mrs. Morgenthau. The program will inaugurate a drive to inspire all American mothers of sons in our armed forces, to follow her example and get solidly behind the slogan of this campaign—

"A stamp every day
For the son who's away."

We hope that every woman director in the country will get behind this plan because it certainly appeals to all mothers and offers an opportunity to do a job for Uncle Sam and the cause of freedom.

PER-INQUIRY REQUESTS

The William S. L. K. Laboratories, Milwaukee, Wis., is seeking P-I business for their drug products.

The J. L. Stewart advertising agency, Chicago, is trying to place P-I deals for their client, an insurance company.

Again the Mendenhall Manufacturing Company of Mendenhall, Miss., is soliciting a P-I offer, this time for perfume.

Similar attempts have been reported of the Martin J. Pollak publishing firm for their *Soldier's, Sailor's and Air Force Souvenir Handybooks,* and of the Midwest Specialty Company, Omaha, Neb., for a *Sterling Silver Victory Ring.*

Stations are asked to continue reporting to the NAB all per-inquiry and free time offers.

BMI MEMBERSHIP

District Seven (Ohio-Kentucky) leads the list in percentage of stations which are BMI member.

BMI on August 1 had 788 members, 86.6 per cent of all operating stations. District 7 has 45 of its 46 operating stations in BMI. Other district percentages:

District	*No. of Stations in BMI*	*Total Stations*	*Per Cent of Stations in BMI*
1	53	59	89.8
2	62	75	82.7
3	45	49	91.8
4	83	89	93.3
5	67	77	87.0
6	47	56	83.9
7	45	46	97.8
8	40	46	87.0
9	47	59	79.7
10	48	55	87.3
11	28	34	82.4
12	26	32	81.3
13	51	57	89.5
14	34	42	81.0
15	33	35	94.3
16	44	49	89.8
17	35	50	70.0
	788	910	86.6

Note: Count includes 28 FM and short wave stations in BMI.

Included in count of stations not in BMI are 10 which according to our best information are presently in construction permit status, but which may have gone on the air.

NEW BMI CATALOGUE

BMI announces the acquisition of the performance rights in the catalogue of France Music, making available to BMI licensees, when records are so badly needed, upwards of one hundred excellent recorded titles by such artists as Sablon and Trenet, to which will be added many records of French derivation in the future. BMI will announce this acquisition in its next bulletin.

NAB OPPOSES TAX

On Tuesday, the NAB filed with the Senate Finance Committee its reply to the appearance of John B. Haggerty advocating a special tax on radio. Haggerty had inserted in the record an exploratory staff memorandum prepared for inter-office use by the Treasury in 1941, and which had been placed at the disposal of one or two members of the House Ways and Means Committee when the 1941 Revenue Act was under consideration. That this memorandum does not reflect Treasury policy was made clear in a letter from Randolph E. Paul, General Counsel of the Treasury, entered in the record for August 13, 1942.

Also submitted for the record by Mr. Paul was a statement of the plan prepared jointly by the Treasury and the FCC, and submitted without recommendation as to its adoption. This plan was prepared pursuant to the Senate Finance Committee's request made to the Treasury in 1941 that they explore the possibilities of a tax on radio broadcasting.

The NAB's statement:

"The National Association of Broadcasters respectfully invites the attention of your Committee to the testimony and memoranda submitted to your Committee during its hearings on the Revenue Bill of 1941 (Hearings, pp. 726, 740, 741, 1476) and to the Committee on Ways and Means this year (Hearings, pp. 3298-3309), in opposition to the suggestion, which Mr. John B. Haggerty has again made, that a special tax be imposed upon the radio industry.

"The Association also desires, as a matter of record, to summarize briefly the conclusive replies to Mr. Haggerty's statements:

"(1) The Treasury has not recommended and is not recommending (jointly with the Federal Communications Commission, or otherwise) the adoption of a special tax upon the radio industry. (See letter of Randolph E. Paul, General Counsel, Treasury Department, to Honorable Walter F. George, dated August 13, 1942 —Hearings before the Committee on Finance, Part 16 (unrevised), August 13, 1942, pp. 1996-1997).

"(2) The proposed tax is not supported by labor generally. Mr. W. C. Hushing, of the legislative committee of the American Federation of Labor; Mrs. Emily Holt, of the American Federation of Radio Artists; and Mr. Lawson Wimberly, of the International Brotherhood of Electrical Workers, are among the witnesses who appeared on behalf of labor before the Senate Committee on Finance and the Committee on Ways and Means in opposition to the proposition.

"(3) The proposed tax would seriously jeopardize the extraordinary and commendable contribution to the Nation's war effort which radio is now making.

"(4) There is no justification for the imposition of a discriminatory tax of this nature upon any industry, and most certainly not an industry engaged in the dissemination of facts and information.

"We trust that your Committee will again reject any proposal to impose a special tax upon the radio industry; and we are confident that your Committee will afford the industry and others interested an adequate opportunity to be heard in the event that any plan (such as the plan prepared jointly by the Federal Communications Commission and the Treasury Department and which was submitted *without recommendation as to its adoption* in the letter from Mr. Paul, dated August 13, 1942, above referred to) is under consideration by your Committee."

The American Federation of Labor, the International Brotherhood of Electrical Workers, and Morris Lynch in behalf of Radio Station WCFL also filed statements opposing a special radio tax.

FEDERAL LEGISLATION

H. R. 7441 (Hoffman, R.-Mich.) FREEDOM OF EXPRESSION—To make it unlawful for any person, firm, corporation, association, or group to, directly or indirectly, intentionally or willfully interfere in any way with the lawful production, transmission, transportation, dissemination, or movement of any music, musical program, or radio broadcast thereof from any point within the continental United States or any of its Territories or possessions or land under its control or jurisdiction, to any point lying beyond the State or Territorial line of the State, Territory, or possession where such music or musical program, entertainment or broadcast originates, is offered for transmission, or transportation, dissemination or movement, either over the air, the land, or the sea. Referred to the Committee on the Judiciary.

ILLINOIS

Estimated Radio Homes, 1940

Number of Occupied Dwelling Units as reported by U. S. Bureau of the Census in advance release, Series H-7. Percent radio-equipped calculated from Series H-7 Bulletin following the Census Bureau practice. Number of radio units, or radio homes, estimated by applying percent ownership to those units not answering radio question and adding such to those reporting radio.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, August 24. They are subject to change.

Monday, August 24

Further Hearing

WFAS—Westchester Broadcasting Corp., White Plains, N. Y.—Modification of license, **1230 kc.**, 250 watts, unlimited.

Tuesday, August 25

Further Hearing

NEW—Air-Waves, Inc., Baton Rouge, La.—C. P., **1400 kc.**, 250 watts, unlimited.

Thursday, August 27

Further Hearing

NEW—Hawaiian Broadcasting System, Ltd., Honolulu, T. H.—C. P., **1340 kc.,** 250 watts, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

Edwin A. Kraft—Granted application for license (B-L-1691) to operate a radio station at Ketchikan at the location of former Station KGBU (which license expired without renewal), on **930 kc.,** 1 KW power, unlimited time; subject to conditions.

National Broadcasting Co., Inc., New York City, N. Y.—Granted extension of authority (B1-FP-103) to transmit programs to Station CMX, Havana, Cuba, through the facilities of RCA Communications, Inc.

WESX—North Shore Broadcasting Co., Salem, Mass.—Granted modification of license (B1-ML-1135) to move main studio from Salem to Marblehead, Mass., and granted petition for waiver of Rule 3.30 so as to permit announcement of station location as Salem.

W39NY—City of New York Municipal Broadcasting System.—Granted request for extension of time to November 14, 1942, for completion of construction of FM station (B1-MPH-96).

DESIGNATED FOR HEARING

National Broadcasting Co., Inc., area of Chicago, Ill.—Designated for hearing application for construction permit (B4-PRY-285) for new relay broadcast station.

National Broadcasting Co., Inc., near Addison, Ill.—Designated for hearing application for construction permit (B4-PRY-282) for new relay broadcast station.

Frontier Broadcasting Co., Cheyenne, Wyo.—Designated for hearing application for construction permit (B5-PRY-283) for new relay broadcast station.

Frontier Broadcasting Co., Cheyenne, Wyo.—Designated for hearing application for construction permit (B5-PRE-430) for new relay broadcast station.

WQAM—Miami Broadcasting Co., Miami, Fla.—Designated for hearing application for modification of construction permit (B3-MP-1543) for change in type of transmitter, approval of present antenna, and approval of present transmitter site.

WHCU—Cornell University, Ithaca, N. Y.—Designated for hearing applications for construction permits (B1-P-3086 and B1-P-3318) to change facilities.

KOY—Salt River Valley Broadcasting Co., Phoenix, Ariz.—Designated for hearing application for modification of construction permit (B5-MP-1617) for indefinite extension of completion date.

LICENSE RENEWALS

KVAN—Vancouver Radio Corp., Vancouver, Wash.—Granted renewal of license for the period ending not later than August 1, 1944 (B5-R-1027).

WTAQ—WHBY, Inc., Green Bay, Wisc.—Granted renewal of license for the period ending not later than October 1, 1944 (B4-R-607).

Granted further extension of following licenses upon a temporary basis only, pending determination upon applications for renewal of licenses, in no event later than October 1, 1942:

KABR, Aberdeen, S. D.; KBST, Big Springs, Tex.; KBWD, Brownwood, Tex.; KCMC, Texarkana, Tex.; KFEL, Denver, Colo.; KFJB, Marshalltown, Iowa; KFKA, Greeley, Colo.; KFPY, Spokane, Wash.; KFRO, Longview, Tex.; KGGF, Coffeyville, Kans.; KGIW, Alamosa, Colo.; KGKL, San Angelo, Tex.; KID, Idaho Falls, Idaho; KIEM, Eureka, Calif.; KMTR, Los Angeles, Calif.; KPLT, Paris, Tex.; KRBC, Abilene, Tex.; KSEI, Pocatello, Idaho; KSWO, Lawton, Okla.; KTFI, Twin Falls, Idaho; KUOA, Siloam Springs, Ark.; KVAK, Atchison, Kans.; KVGB, Great Bend, Kans.; KWKH, Shreveport, La.; KXL, Portland, Ore.; WADC, Tallmadge, Ohio; WBNX, New York, N. Y.; WBRB, Red Bank, N. J.; WCAX, Burlington, Vt.; WCAZ, Carthage, Ill.; WCBT, Roanoke Rapids, N. C.; WCOC, Meridian, Miss.; WCOP, Boston, Mass.; WFCI, Pawtucket, R. I.; WFPG, Atlantic City, N. J.; WGES, Chicago, Ill.; WSAR, Fall River, Mass.; WING, Dayton, Ohio; WMRO, Aurora, Ill.; WMUR, Manchester, N. H.; WNBZ, Saranac Lake, N. Y.; WOV and auxiliary, New York, N. Y.; WQBC, Vicksburg, Miss.; WSPB, Sarasota, Fla.; WSPD, Toledo, Ohio; WTJS, Jackson, Tenn.; WTSP, St. Petersburg, Fla.

MISCELLANEOUS

WPDQ—Jacksonville Broadcasting Corp., Jacksonville, Fla.—Granted modification of construction permit as modified, for change in type of transmitter, change of frequency (B3-MP-1622).

WTOC—Savannah Broadcasting Co., Savannah, Ga.—Granted modification of constuction permit as modified, which authorized installation of directional antenna for night use, increase in night power, for extension of completion date from August 15 to October 15, 1942 (B3-MP-1613).

KHSL—Golden Empire Broadcasting Co., Chico, Calif.—Granted modification of construction permit as modified, which authorized installation of directional antenna for day and night and increase in night power, for extension of completion date from August 16 to September 16, 1942 (B5-MP-1612).

KGIW—E. L. Allen, East of Alamosa, Colo.—Granted license to cover construction permit for increase in power and installation of new transmitter (B5-L-1692).

WSGN—The Birmingham News Co., Birmingham, Ala.—Granted license to cover construction permit for increase in power and changes in equipment (B3-L-1693).

WEMP—Milwaukee Broadcasting Co., Milwaukee, Wis.—Granted license to cover construction permit for installation of new transmitter (B4-L-1686).

WSNY—Western Gateway Broadcasting Corp., Schenectady, N. Y.—Granted license to cover construction permit as modified, which authorized construction of new broadcast station (B1-L-1690); granted authority to determine operating power by direct measurement of antenna power (B1-Z-1423).

WEMP—Milwaukee Broadcasting Co., Milwaukee, Wis.—Granted license to use old main transmitter as auxiliary transmitter for emergency use only (B4-L-1639).

WLIB—WLIB, Inc., Brooklyn, N. Y.—Granted license to use formerly licensed composite 250 watt transmitter as an auxiliary transmitter on **1190 kc.,** 250 watts, for auxiliary purposes only (B1-L-1684).

WKBH—WKBH, Inc., La Crosse, Wis.—Granted authority to determine operating power by direct measurement of antenna power (B4-Z-1424).

WLAB—Larus and Brother Co., Inc., Richmond, Va.—Granted modification of construction permit which authorized construction of a new relay broadcast station, for changes in transmitting equipment and decrease in operating power from 100 watts to 31.4 watts (B2-MPRE-55).

WGHB—The Tribune Company, Area of Tampa, Fla.—Upon request cancelled license for relay broadcast station (B3-LRY-229).

Tidewater Broadcasting Corp., Norfolk, Va.—Adopted order dismissing without prejudice application for construction permit for new broadcast station (Docket No. 6162).

Camden Radio, Inc., Camden, Ark.—Dismissed without prejudice application for construction permit for new broadcast station (B3-P-3494).

WHKC-WCLE—United Broadcasting Co., Columbus, Ohio; Cleveland, Ohio.—Denied petitions filed pursuant to the provisions of the Memorandum Opinion of April 27, 1942, in re applications for construction permits (B2-P-2533 and B2-P-2834) to change facilities, and designated said applications for hearing.

WBIG—North Carolina Broadcasting Co., Inc., Greensboro, N. C.—Denied petition for partial grant of application to authorize only change in frequency at this time, and designated for hearing said application to change frequency from **1470** to **640 kc.,** increase power from 5 KW to 50 KW unlimited time with directional antenna (B3-P-3391).

WOKO—WOKO, Inc., Albany, N. Y.—Denied petition requesting that application be retained in the pending files; and designated for hearing said application to change facilities (B1-P-3238).

WCKY—L. B. Wilson, Inc., Cincinnati, Ohio.—Dismissed without prejudice application for construction permit (B2-P-3227) to change frequency from **1530 kc.**, 50 KW, unlimited time, to **640 kc.**, unlimited time, with modifications in its directional antenna system.

WKRC—Cincinnati Times-Star Co., Cincinnati, Ohio.—Dismissed without prejudice application for construction permit (B2-P-3390) to change facilities from **550 kc.**, 1 KW night, 5 KW day, unlimited time, to **640 kc.** with power of 50 KW, unlimited time, with new directional antenna system.

Granite District Radio Broadcasting Co., Murray, Utah.—Dismissed without prejudice application for construction permit for new standard broadcast station (Docket No. 6003).

KFSD—Airfan Radio Corp., Ltd., San Diego, Calif.—Denied (1) petition to reconsider and grant without hearing application for modification of construction permit (Docket 6245), and (2) the petition filed pursuant to the Memorandum Opinion of April 27, 1942; and amended the issues upon which the application will be heard.

WSAV—WSAV, Inc., Savannah, Ga.—Denied petition for grant of application for construction permit to change frequencies from **1340** to **1370 kc.**, increase power from 250 watts unlimited time to 1 KW unlimited time with directional antenna at night; and designated said application for hearing (B3-P-3453).

WPRP—Julio M. Conesa, Ponce, Puerto Rico.—Denied petition requesting authority to construct an antenna at a new site as proposed in applications for construction permit and modification of construction permit (Docket Nos. 5678 and 6107).

WLEU—WLEU Broadcasting Corp., Erie, Pa.—Granted motion to dismiss without prejudice application for construction permit to operate on **1260 kc.**, 1 KW night, 5 KW day, directional antenna night, unlimited time (Docket 6303).

WFAS—Westchester Broadcasting Corp., White Plains, N. Y.—Granted motion for continuance of hearing from August 24 to September 24, 1942, in re application for modification of license (Docket 6216).

Hawaiian Broadcasting System, Ltd., Honolulu, T. H.—Granted motion for continuance of hearing from August 27 to October 30, 1942, in re application for new station (Docket 6097).

WKBW-WGR—Buffalo Broadcasting Corp., Buffalo, N. Y.—Granted motion to postpone hearing from September 10 to October 20, 1942, in re applications for renewal of licenses of WKBW and WGR (main and auxiliary) stations (Dockets Nos. 6324 and 6325).

KDYL—Intermountain Broadcasting Corp., Salt Lake City, Utah.—Granted motion for order to take depositions in re application for construction permit (Docket 6351).

KROW—Educational Broadcasting Corp., Oakland, Calif.—Granted petition to dismiss without prejudice application for modification of construction permit (Docket 6376).

WOV—Wodaam Corp., New York, N. Y.—Granted motion to dismiss without prejudice application for transfer of control from Arde Bulova and Harry D. Henshel (transferor) to Murray Mester and Meyer Mester (transferee) (Docket 6378).

WSAN—Lehigh Valley Broadcasting Co., Allentown, Pa.—Granted motion to dismiss without prejudice application for modification of construction permit as modified (Docket 6380).

Air Waves, Inc., Baton Rouge, La.—Granted motion to withdraw without prejudice application for construction permit for new station (Docket 6155).

APPLICATIONS FILED AT FCC

590 Kilocycles

WAGA—Liberty Broadcasting Corp., Atlanta, Ga.—Modification of construction permit (B3-P-2938 as modified) which authorized change in frequency, increase in power, move of transmitter, installation of directional antenna for night use and new transmitter, requesting extension of commencement and completion dates.

620 Kilocycles

WLBZ—Maine Broadcasting Co., Inc., Bangor, Maine.—Involuntary transfer of control of licensee corporation from Thompson L. Guernsey to Eastland Broadcasting Co.

770 Kilocycles

KXA—American Radio Telephone Co., Seattle, Wash.—License to cover construction permit (B5-P-3272) for move of transmitter and installation of new antenna.

1300 Kilocycles

KOL—Seattle Broadcasting Co., Seattle, Wash.—License to cover construction permit (B5-P-3030 as modified) which authorized increase in power and installation of directional antenna.

KOL—Seattle Broadcasting Co., Seattle, Wash.—Authority to determine operating power by direct method.

1320 Kilocycles

KTRH—KTRH Broadcasting Co., Houston, Texas.—License to cover construction permit (B3-P-2788 as modified) which authorized installation of directional antenna for night use and increase in night power to 5 KW.

KTRH—KTRH Broadcasting Co., Houston, Texas.—Authority to determine operating power by direct method.

1450 Kilocycles

KMYC—Marysville-Yuba City Broadcasters, Inc., Marysville, Calif.—License to cover construction permit (B5-P-3472) for move of transmitter and studio.

MISCELLANEOUS APPLICATIONS

KAOY—Don Lee Broadcasting System, Portable-Mobile, Area of Los Angeles, Calif.—Modification of construction permit (B5-PRE-297 as modified) which authorized construction of new relay broadcast station for extension of commencement date from 2-28-42 to 8-27-42 and completion date from 8-27-42 to 1-23-43.

NEW—General Electric Co., San Francisco, Calif.—Construction permit for special relay broadcast station to be operated on **31220, 35620, 37020, 39260 kc.**, 75 watts and A3 Emission.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Bee-Dew Cosmetic Co., 703 East Forest Ave., Detroit, is charged in a complaint with misrepresentation. (4811)

L. L. Edwards, Shelbyville, Tenn., engaged in the sale and distribution of nut products and candy to jobbers and retail dealers, is charged in a complaint with the use of lottery methods in the sale of his products. (4797)

Fox Studios, formerly United Studios, and Saul C. Fineman, Isla Fineman Lucas, Harry Becko, Howard Sheld, Harvey Grastey, Dick Sperling, and Nicholas Mock, all of Boise, Idaho, are charged in a complaint issued with misrepresentation in the sale and distribution of tinted or colored enlargements and miniatures of photographs. (4807)

Globe Cardboard Novelty Co., Inc., 515 Greenwich St., New York; Globe Printing Co., 1023 Race St., Philadelphia, and Morris Aaron and Louis Broudo, as co-partners and officials of both companies, are charged in a complaint with manufacturing lottery devices which they sell and distribute to manufacturers of and dealers in various lines of merchandise. (4808)

Kaiden-Kazanjian Studios, Inc., Frances Kaiden and Aram Kazanjian, officials of the corporation and also trading individually as Keystone News & Photo Service, 21 West 46th St., New York, are charged in a complaint with misrepresentation. The complaint charges that to obtain negatives from which they produce and sell photographs and miniatures, the individual respondents have falsely represented that they conduct a news and photo service under the name of Keystone News & Photo Service and are in touch with and assist in handling various publicity features for the press. (4812)

M. J. Kellner Brokerage Company, Illinois Brokerage Company, and O-K Sales Company, Springfield, Ill., is charged in a complaint with violation of Section 2(c) of the Clayton Act, as amended by the Robinson-Patman Act. (4796)

J. Silverman & Associates, et al.—Questionnaires, falsely indicating that they are issued by branches of the United States Government and which are used by collection agencies to procure information of the whereabouts and employment of debtors, are the basis of two complaints. The requests for information bear a Washington, D. C., postmark, and replies, received in Washington, then are remailed to collection agencies in various cities. Communications and replies, resulting from the questionnaires, have been received by the Selective Service System of the United States and other Government divisions from persons who believed the queries were issued by these agencies.

Respondents named in the complaints are Michel Lipman and Jack Silverman, trading as Chief Statistician and as J. Silverman & Associates, 821 Market St., San Francisco, and Leo Greenberg, trading as Bureau of Research, Reclassification Department, 215 West Fifth Street, Los Angeles. William Edgar Spicer, whose office and place of business is at 302 Bond Building, Washington, D. C., is named as respondent in each complaint.

Michel Lipman, Jack Silverman and Leo Greenberg are all engaged in the business of selling printed mailing cards designed and intended to be used by collection agencies, merchants and others, to whom they are sold, in obtaining information concerning the purchasers' debtors.

The products of the San Francisco respondents are made up of units comprising two cards separated by a perforated line designed to enable the addressee of the cards to detach the "information" card, which is self-addressed to "Chief Statistician, Bond Building, Washington, D. C." The complete cards are addressed to the debtor at his last known address or to anyone thought to have information concerning him, by purchasers of the cards. The returned "information" cards then are relayed by the respondent Spicer, the complaints charge, to the respondents Lipman and Silverman in San Francisco or Greenberg in Los Angeles, who forward them to the original purchasers. (4809-4810)

CEASE AND DESIST ORDER

The Commission issued the following cease and desist order last week:

Louis A. Walton Co., 407 South Market St., Chicago, Kling Bros. & Co., Inc., 333 West Van Buren St., Chicago, and Leopold Kling and Samuel Kling, individually and as officers of both corporations, have been ordered to cease and desist from misrepresentation in the sale of men's clothing. (4528)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Cardinal Paint Corp., 4610 Geraldine Ave., St. Louis, Mo., engaged in the sale and distribution of paints, varnishes, enamels and stains, has stipulated to discontinue representing by the use of statements or labels on containers or in any other manner that its paint products contain lead or other ingredient in stated percentages or proportions unless the products do in fact contain such ingredients in the percentages or proportions represented; using any quantitative analysis on labels or other advertisements which does not truthfully and unambiguously designate all ingredients of every kind contained therein, together with the correct percentage or proportion of each such ingredients; and using labels bearing the statement "Net contents one gallon U. S. standard measure" on containers the actual net content of which is less than one gallon, or otherwise representing that the quantity of paint or other substance in any container is in excess of the true content. (3517)

Chamberlain Sales Corp., and L. H. Chamberlain, its president, Des Moines, Iowa, engaged in selling a hand lotion designated "Chamberlain's Lotion" has stipulated that it will cease representing that any test made to show that Chamberlain's Lotion flows more readily than other lotions indicates that it is superior to other lotions, or that other lotions containing tragacanth gum or other filler are sticky. (03035)

Fuller Blade Co., Inc., 294 Badger Ave., Newark, N. J., engaged under the trade name "Wonder Blade Co." in the wholesale distribution of razor blades, has stipulated to desist from use on containers or in printed or advertising matter, or in any other way, of any price marking or other means of purportedly representing the retail selling price of the products, when such price marking or purported selling price is fictitious, exaggerated, or in excess of the price for which the products are customarily sold in the usual course of retail trade. (3518)

Kennedy Car Liner & Bag Co., Shelbyville, Ind., engaged in the manufacture of food bags, bowl covers and similar items under the trade designation "Keko," has stipulated to desist from use of the word "odorless" or any other explicit or categorical term of similar implication as descriptive of food bags, bowl covers, or other articles of merchandise which are not in fact devoid of scent or odor. (3515)

Makasar Beauty Products Co., and as Mme. Gensie Jenious & Co., 178 Bloomfield Ave., Montclair, N. J., engaged in selling hair preparations designated "Makasar Wonderful Pomade" and "Makasar Wonderful Pomade Double Strength," have stipulated to discontinue representing that either of the preparations has any therapeutic value in the treatment of conditions which cause falling hair. (03036)

PDQ Camera Co., 109 East 35th St., Chicago, engaged in selling a camera designated "PDQ Camera," has entered into a stipulation in which it agrees to discontinue representing that the camera is automatic; that gold-tone sepia photos can be made with it, or that the camera can be successfully used in photographing drivers or chauffeurs for procuring licenses. (03037)

Tex-O-Kan Flour Mills, doing business under the trade name of Burrus Feed Mills, Dallas, Tex., engaged in selling livestock and poultry feeds designated "Texo Poultry Fatner," "Texo Laying Mash," "Texo Calf Meal," "Texo Horse and Mule Feed," "Texo

Protein Supplement," "Texo 24% Protein Dairy Feed," "Texo All Mash Chick Starter," and "Texo Broiler Mash"; and Rowland Broiles, trading as Rowland Broiles Co., Fort Worth, Tex., engaged in conducting an advertising agency which disseminated advertisements for the above named products on behalf of Burrus Feed Mills, have stipulated to cease and desist from representing that the Texo Feeds bring greater profits at lower feeding costs; that the "Fatner" produces the most pounds at lowest costs; that the "Laying Mash" gives assurance of most eggs at lowest feeding cost; that the "Calf Meal" or "Horse and Mule Feed" assures the building of calves into a healthier herd or maintains horses and mules in a sleek or healthy condition; that the "Protein Dairy Feed" satisfies the demand for a peak milk production the year round; that the "All Mash Starter" produces better or healthier chicks at lower feed costs, without limiting such basis of comparison to natural as distinguished from other prepared feeds; or that the "Broiler Mash" makes choice, white, juicy or fine-flavored meats. (03038)

Dr. Henry Yee Herb Co., 707 J St., Sacramento, Calif., engaged in the sale and distribution of herbs offered as treatments for various diseases, has stipulated to cease representing by means of advertisements sent through the mail, radio broadcasts, or other media, that the herbs can be depended upon to purify the blood or impart normal healthy tone to the entire body, or that they constitute a competent treatment or effective remedy for nerve symptoms or pains, nervousness, neuritis, rheumatism, liver or kidney disorders, cancer of the bowels, heart trouble, anemia, or other ailments. (3516)

FTC DISMISSES COMPLAINT

The Federal Trade Commission has ordered dismissal of its complaint against The Howell Co., St. Charles, Ill., manufacturer of household and office furniture. The complaint had alleged misrepresentation of a plain carbon steel tube product as a steel alloy containing chromium.

NAB Reports
The NATIONAL ASSOCIATION OF BROADCASTERS
1626 K STREET, N. W. WASHINGTON, D. C. Vol. 10, No. 34, August 28, 1942

A. F. OF M. BULLETIN

Now being prepared is a complete roundup of developments in the Petrillo recording ban. A special bulletin will be issued with next week's *Reports,* which will bring all matters up to date.

TAX EXEMPTION OF ADVERTISING

Paul B. West, President of the Association of National Advertisers, Inc., has written a letter of confirmation and clarification to Mr. Guy T. Helvering, Commissioner of Internal Revenue, following a conference on the subject of the deductibility of advertising expense on corporate income tax returns.

This is a subject of vital interest to all broadcasters and its importance justifies the printing of the entire communication. It follows:

"General Advertising Policy

"The Treasury Department and the Bureau of Internal Revenue fully appreciate the important part advertising plays in our national economy and there is no intention to restrict reasonable and normal advertising by disallowing it as a deductible expense. This was attested to by Secretary Morgenthau in testifying before the Joint Congressional Committee on Taxation when he said:

> 'The test of whether expenditures for advertising are deductible is whether they are ordinary and necessary and bear a reasonable relation to the business activities in which the enterprise is engaged. This is not intended to exclude institutional advertising in reasonable amounts or good will advertising calculated to influence the buying habits of the public. If such expenditures are extravagant and out of proportion to the size of the company or to the amount of its advertising budget in the past, or if they are not directed to public patronage which might reasonably be expected in the future, such payments will be disallowed.'

Duties of the Bureau

"The Internal Revenue Bureau is charged with the responsibility of collecting Federal taxes, among which are the Income Tax and the Excess Profits Tax. It is governed by statute and expects full cooperation from the taxpayer whereby the Government receives its full share of taxes. Thus it is the duty of the Bureau, particularly in view of Excess Profits Tax, to prevent abuses and attempts to avoid the high tax rate. The Bureau has full power to disallow unreasonable expenses for tax purposes.

Increased Advertising Costs

"The Bureau recognizes that advertising costs have been forced upward by reason of increased space and time rates, increased cost of printing, engraving, art work and other advertising production costs. In this connection, the Bureau suggests that advertisers keep their cost records as complete as possible.

Increased Need for Advertising

"The Bureau recognized that in many cases the rationing of gasoline and tire restrictions have cut down on the number and frequency of calls salesmen can make on dealers and that this has thrown an added burden on advertising since expenditures for direct mail and dealer house organs must be increased to keep necessary contact with wholesalers and dealers. This also affects the cost of installation of displays formerly handled by salesmen.

Salvage Campaigns

"Many advertisers are using a large part of their appropriations, and, indeed, have increased them, for the purpose of salvaging materials necessary for the war effort, such as fats and grease, iron, steel, non-ferrous metals, rubber, etc. The Bureau recognizes that such advertising efforts, if they bear a direct relation to the business carried on by the corporation, are essential to obtain raw materials and are, therefore, a normal business expense. As such they will be deductible if made with a reasonable expectation that the corporation's business will be benefited by an increase in materials essential to its operations. The Bureau further recognizes that such use of advertising is normal under abnormal conditions, conditions which have never before existed.

New Products

"Priorities, the cutting off or curtailing of imports, and new research have resulted in some manufacturers bringing out new products. In other cases substitutes have had to be made. In these cases, the manufacturer must inform the public and the trade through advertising in justice to himself, his dealers and the consumer. The Bureau does not question this and will take into consideration all normal factors incident to launching a new product. Such expenditures which are reasonable in amount, taking into consideration the facts in each case, will be allowed as deductions for Federal income tax purposes.

Added Lines

"In certain instances, manufacturers, in order to keep their dealers in business, have been supplying them with alternate products. For example, a rubber manufacturer, to aid his dealer outlets, has added such items as luggage, tools, sports equipment, furniture, etc., to replace tires no longer available. The Bureau recognizes that such a manufacturer must merchandise these to the dealer and the public through advertising. Expenditures for this purpose which are reasonable in amount taking into consideration the facts in each case will be allowed as deductions for Federal income tax purpose.

Changes in Buying Habits

"Some manufacturers, because of priorities, must attempt through advertising to change buying habits. Curtailment of the use of metals has meant the elimination of many types of containers, of small size packages, etc. For example, beverage manufacturers, because of the shortage of plate for bottle caps, must try to educate the public to use large instead of small size bottles. The Bureau recognizes that this calls for advertising expenditures. Such expenditures if reasonable in amount taking into consideration the facts in each case will be allowed as deductions for Federal income tax purposes.

TAX EXEMPTION OF ADVERTISING

(Continued from page 515)

Advertising to Speed War Production

"Many companies are using advertising and advertising technique to speed the war effort among their own employees. So far this has been directed at one objective—to convince the shop and office worker that he is part of the all-out war effort and hence that carelessness and inefficiency, unnecessary absences and accidents on the production front are detrimental to the men on the fighting front. To accomplish this job, posters, banners, house organs, local newspaper advertising, direct mail, local window displays, motion pictures, spot radio, and many other advertising devices have been used. Undoubtedly, many companies will call on advertising to do a similar job in furthering the sale of war bonds through the payroll-deduction plan. The Bureau recognizes that the expense incident thereto is a justifiable one so long as it is reasonable, whether that expense is listed as a production or a selling (advertising) cost.

New Companies

"Since the war began, certain new companies have come into being and have invested many thousands of dollars in plant equipment for the production of war material. As long as the war lasts, they will have nothing at all to sell the public. Those companies deem it but good business practice to advertise so that when the war ends and they turn to peace time production, the public will be familiar with their names and hence their plant investment may be protected. The Bureau recognizes that advertising by such companies is a proper deductible expense so long as such expenditures are reasonable. As Secretary Morgenthau has said: "The test of whether expenditures for advertising are deductible is whether they . . . bear a reasonable relation to the business activities in which the enterprise is engaged. . . . If such expenditures are extravagant and out of proportion to the size of the company . . . or if they are not directed to public patronage which might reasonably be expected *in the future* such payments will be disallowed."

In General

"It is, of course, impossible for the Bureau to lay down a definite rule in advance which will fit all situations. In general and as Secretary Morgenthau has indicated, the Bureau will be rational and fair, recognizing that advertising is a necessary and legitimate expense of doing business as long as it is not carried on to unreasonable extent or becomes an obvious attempt to avoid tax payments. This principle applies whether the company has no government contracts, whether it is selling both to government and to consumers or industry, whether it is wholly converted to war production, whether it is a new company selling only to government, or whether it is a new company selling to government and industry.

"The Bureau has no desire to be arbitrary but it will, of course, uphold the statutes. Its collectors will, in each individual case, examine the records and act accordingly. If an advertiser feels the decision of the collector is wrong, the burden of proof of that fact rests upon him. He can, of course, appeal the decision if he feels an injustice has been done.

Advertising for the Government

"Under Section 23 (o) of the Code, an individual may make a gift to the government and deduct that gift from his income tax. Section 23 (q), however, referring to corporations, omits this provision. There is, therefore, no provision in the law for allowing as a deductible expense monies or time or space given directly to the government for advertisements signed solely by a government bureau or department. If, on the other hand, advertisements featuring the sale of War Bonds, conservation, nutrition or other government objectives are clearly signed by a corporation, such as "This space donated by the John Jones Co., manufacturers of Jones' vitamins," the advertisement will be considered as an institutional or good will advertisement of the manufacturer and hence, deductible, *provided, of course, that the expenditure is reasonable and not made in an attempt to avoid proper taxation.*

"Advertising"

"By 'advertising,' the Bureau includes all forms of advertising recognized by the industry of which the individual company is a part, such as newspaper, periodical, business paper, radio, car card, outdoor, display, motion pictures, house organs, direct mail; etc.

Advance Rulings in Individual Cases

"In view of the foregoing matter the Bureau feels that applications for rulings in advance on advertising expenditures of specific companies should be necessary only in most unusual circumstances. If an advertiser will follow the rules laid down, he should have no difficulties in determining whether a given advertising expense is justifiable or not.

"The Bureau will consider applications for individual rulings on specific items but the advertiser should realize that no obligation rests upon the Bureau to render such rulings, that the Bureau is busy with an unusual volume of work, and that, in general, it believes such rulings will be unnecessary in the light of information put forth in this letter."

BWC LABOR QUESTIONNAIRE

At the direction of the Board of War Communications and with the cooperation and approval of the War Manpower Commission, the Industry and Labor Advisory subcommittees of the Board are conducting a current survey of labor requirements and supply in the communications industry. In cooperation with the War Manpower Commission, lists of critical occupations are being prepared for the various branches of communications. In addition, the United States Employment Service is extending its regular surveys of labor supply to cover the communications industry. This will mean that future forecasts of potential shortages will be predicated on the same reporting basis as for other vital industries. The fullest cooperation of all branches of the industry, both with the Board and with the agencies associated with the War Manpower Commission, is necessary.

A questionnaire was mailed to all radio station licensees and communication companies on August 20 and is returnable one week after receipt.

Broadcast stations have requested information concerning proper tabulation of employees not included under classifications appearing on the questionnaire.

In order that the information received from broadcast stations will be of maximum value to the Domestic Broadcast Committee of BWC it is important that the method of classifying employees be uniform. It is therefore suggested that employees listed below be tabulated under the column indicated on the questionnaire.

Classification	*of Questionnaire*
Station Managers	(E) (2)
Asst. Station Managers	(E) (2)
Sales Managers	(E) (1)
Salesmen	*
Program Directors	E - 1
Announcers	*
News Editors	*

Classification	*of Questionnaire*
Continuity Writers	*
Musicians	*
Chief Engineers	G
Technical Super.	G
Maintenance Men (Technical)	H
Operators (Licensed)	I
Operators (No License—or Restricted License)	J
Office Managers	E - 1
Clerical & Accounting	F
Non-skilled, General	*

* Enter on additional vertical columns to be added to form 62348.

Employees performing dual duties should be entered as one employee in each classification and a statement attached setting forth the approximate portion of time devoted to each classification.

The same procedure also applies to part time employees.

THURMAN ARNOLD CONDEMNS ASCAP INTERPRETATION OF CONSENT DECREE

In a letter dated August 18, 1942 addressed to Broadcast Music, Inc., Thurman Arnold, Assistant Attorney General, refers to a letter written by John G. Paine, General Manager of ASCAP to all ASCAP members as putting too narrow an interpretation upon the Department of Justice's communications with respect to the consent decree signed by ASCAP.

Mr. Arnold points out that a portion of his letter is construed by Mr. Paine "to mean that ASCAP has the right to institute disciplinary action against any member who seeks to discuss or advise with any third party, including BMI, concerning the issuance direct to users of performing licenses." Says Mr. Arnold:

"This is too narrow an interpretation of the language of my letter of July 13th. Discussions between third parties (including BMI) and an ASCAP member for the purpose of determining the free and voluntary wishes of an ASCAP member in connection with the issuance of performing licenses direct to users is not prohibited by the decree provided such third party offers no secret inducement."

This letter is a vindication of BMI's positon that ASCAP members, under the decree, may issue gratuitous licenses permitting the performance by broadcasters of works published by BMI and its affiliates.

The letter of the Department of Justice indicates clearly that ASCAP has no right to institute disciplinary action against any ASCAP member who freely and voluntarily issues such performing licenses. A copy of Thurman Arnold's communication in full is appended hereto.

In accordance with the letter from Thurman Arnold, BMI expects to publish the works of a number of ASCAP writers who have indicated their intention to grant gratuitous licenses directly to broadcasting stations.

Priorities

Inquiries have been received at NAB concerning the assignment of a preference rating of A-1-J to orders for replacement vacuum tubes. A WPB informant states as follows:

"The rating of A-1-J under P-129 is applicable to vacuum tubes and other items which contain copper as a functional part for maintenance and repair items used in broadcast stations. Items not containing copper should be assigned the preference rating A 3."

WHILE CONGRESSMEN ARE HOME

While the capital city continues to be a veritable beehive of industry incident to the war effort, things on Capitol Hill these days are more quiet than usual. Although Congress has not officially adjourned, most of the senators and representatives have gone back home to look after their political fortunes and to talk to the home folks.

With many legislative matters vitally affecting radio pending before Congress, such as the Sanders bill and the Tax bill, broadcasters should make it a point, where convenient, to contact their congressmen and senators and assist them in gaining a better understanding of radio's problems.

All stations have received the reprint of Earl Glade's article, "The Broadcast Industry Prepares for Its Most Important Season" (NAB Reports, page 487). This is excellent material to place in the hands of congressmen or senators. The very effective contribution radio is making to the war effort should be emphasized to members of congress, for while most of them appreciate what radio has done, few of them have any conception of the magnitude of the contributions made.

While NAB is vigilant in matters of legislation affecting the industry, the best results can be obtained by a continuing interest on the part of local broadcasters and effective contact with their representatives and senators.

DRAMATIZED POLITICAL BROADCASTS

Several inquiries have been received at NAB headquarters regarding the question of dramatized political broadcasts. This is a subject which recurs at the outset of every political campaign. Some misunderstanding seems to exist with reference to the industry policy upon the matter.

While there is no specific provision in the NAB Code covering this subject, the Board of Directors of the NAB in 1940 reaffirmed the position which it had previously expressed at the time the Code was adopted. This position enunciated an industry policy which limits political broadcasts to "political speeches, interviews and announcements, and the remote control broadcast of any bona fide political meeting."

While the subject of dramatization of political announcements and programs is not specifically mentioned, they are by every reasonable implication excluded. The reasons underlying this exclusion of dramatized political broadcasts would seem to be quite apparent.

Broadcasters in making their facilities available for political campaigns and to candidates for public office are instrumentalities for the dissemination of accurate information and facts as an aid to the voters in determining policy and selecting public officials. Every precaution should be taken to see that this obligation is fully and honestly discharged. Dramatizations of any kind often resort to what may be termed "dramatic license." Frequently dramatic techniques do not always conform to fact. The NAB Board of Directors has consistently felt that the interests of the industry, as well as of the voting population is best served by elimination of dramatized announcements and programs.

FAT SALVAGE CAMPAIGN

Inquiries continue to come into NAB from stations regarding the Fat Salvage campaign. Information regarding this campaign was published in an earlier issue of "NAB Reports" (page 453). The campaign is, as there stated, sponsored by the Association of Soap and Glycerine Institutes, 381 Fourth Avenue, New York City. The agency handling the account is Kenyon & Eckhardt, 247 Park Avenue, New York City.

Listener Activities

KTMS SCHOOL BROADCAST

Ken Peters, program director of KTMS, Santa Barbara, Calif., tells of a program recently inaugurated by that station, which seems worthy of consideration by other broadcasters.

"According to our plans," writes Mr. Peters. "every school in both Santa Barbara and Ventura counties will tune in KTMS for a special school news broadcast each morning at 9:15 A.M. This news broadcast will be given from our studios by one of the teachers. At the same time every teacher in every classroom will be at the blackboard before a map of the world, pointing out the location where the war is being waged at that particular time.

"These broadcasts, of course, are public service features of our station, and the only commercials to be used will be in the form of plugs for defense stamps and bonds."

RADIO COUNCIL AT WORK

The Minnesota Radio Council, with a representation through its members of 100,000, has served since its organization 3 years ago, to develop outstanding original sustaining programs, to improve the discrimination of radio listeners and to teach them to take advantage of the cultural opportunities offered by the broadcasters, and above all, to give practical training in radio techniques to its members to enable them to use radio effectively as a medium for informing and entertaining the public.

This broad objective has enabled the Council to serve this state in a very practical and definite way. It has served organizations such as the American Association of University Women, The Minnesota State Library Association, The Minnesota Public Health Association, and others, by assisting them to become articulate through the medium of radio. It has served the broadcasting stations by acting as a training ground for those who want to use the radio.

To a great extent, The Minnesota Radio Council is responsible for the high standard of sustaining shows presented to the local stations for broadcasting. This has been accomplished through Council meetings where demonstration broadcasts, analyses of radio techniques, actual demonstrations of radio production have constituted an intensive short-course in professional radio. This instruction has given organizations requesting time on the air a working knowledge of what a radio program is, difficulties involved in its production, and a conscientious desire to serve the radio station by meeting its requirements for entertainment in sustaining shows. Incidentally, through its demonstration programs, the Council has assisted many young people to recognition. Through the use of this talent on organization shows, this service to young aspirants in the field of radio has been continued and amplified. Obviously, no statement of service can be given which excludes the wider service to the people of the Northwest, the radio audience itself. For there is a vast difference between a good sustaining show, based upon the historical background of the state, for example, than the now fast-becoming-obsolete organization program with its "talk" by a chairman, or board representative, its perfunctory airing of some group ego, in a dull and lifeless and thoroughly non-professional manner.

Because its meetings form a work-shop for radio problems, the Council's programs have had many far-reaching effects. For example, Luther Weaver, member of the University of Minnesota faculty in its Extension Division, discussed radio script at a July '42 meeting. So interested was Mr. Weaver in the work of the Council and its objectives, that he has persuaded the University of Minnesota to offer a course in "How To Listen To Radio" as a new feature in the Extension Division. A statement concerning the course, from the new University of Minnesota Extension Division 1942-43, follows:

"Though millions of Americans listen to the radio every day, few of us know how to get the most out of this source of information and enjoyment. This course aims to make radio the efficient public servant it can become to each of us. It will point out sources of information about programs, clear up deaf spots in listening habits, and suggest standards for evaluation and criticism."

There is no pre-requisite to this course, which is probably unique in education.

Directing women's organizations toward more effective war service by helping them create radio programs on the vital subjects of nutrition, morale-building, the problems of the home front, has been and is the chief task of the Minnesota Radio Council during the forthcoming year. Its war service programs, public health programs and programs for children bear the stamp of alertness to the nation's needs, and a growing consciousness of the effective part which radio which reaches and holds the attention of women in the home, can play in these times.

WOMEN DIRECTOR'S ASSOCIATION

In response to the first call for membership in the Association of Women Directors of the National Association of Broadcasters every district replied enthusiastically. Letters were received from 40 states, only Vermont, Wyoming, Nevada, Virginia, Arkansas, North Dakota, Colorado and Southern California are yet to be heard from. All members report success in using the releases already sent out and anticipate the regular Bulletin when it appears under the Editorship of Miss Jane Weaver, Station WTAM Cleveland, Ohio. Every member is urged to send an item to her for inclusion in the first issue.

Mrs. Dorothy Lewis, Coordinator of Listener Activities, was asked to appoint Chairmen in each NAB District, who, in turn, will ask one Director in each state to serve as Vice Chairman. These chairmen will seek to reach every eligible member so that at meetings in each district all may get acquainted and better cooperate in the war effort and the field of radio itself.

The following women have been asked to serve as District Chairmen:

District 1	Miss Caroline Cabot, WEEI, Boston, Mass.
District 2	Miss Jean Lawrence, WGY, Schenectady, N. Y.
District 3	Miss Virginia Covey, KDKA, Pittsburgh, Pa.
District 4	Miss Mary Mason, WMAL, Washington, D. C.
District 5	Miss Evelyn Hicks, WSGN, Birmingham, Ala.
District 6	Miss Marjorie Cooney, WSM, Nashville, Tenn.
District 7	Miss Ruth Lyons, WLW, Cincinnati, Ohio.
District 8	Miss Ruth Crane, WJR, Detroit, Mich.
District 9	Miss Millicent Polley, WHBK, Rock Island, Ill.
District 10	Miss Peggy Cave, KSD, St. Louis, Mo.
District 11	Mrs. Hayle Cavenor, WCCO, Minneapolis, Minn.
District 12	Miss Dorothy McCune, KVOO, Tulsa, Okla.
District 13	Miss Peggy Morris, WFAA, Dallas, Texas.
District 14	Mrs. H. M. Fletcher, KSEI, Pocatello, Idaho.
District 15	Miss Ann Holden, KGO, San Francisco, Calif.
District 16	Miss Leah McMahon, KFSD, San Diego, Calif.
District 17	Miss Susan Allen, Spokane, Wash.

"THE *UN*CONQUERED PEOPLES"

The National Council of Women, through the Listeners Activities Department, has prepared another series of spot announcements for the Association of Women Directors, under the title, "The *Un*conquered Peoples". Here is a subject that is filled with drama and pathos. It stirs our imaginations and should serve as a stimulus to all Americans to increase their all-out effort to win the war. In this country we are, in reality, working side by side with these courageous, *un*conquered peoples, who by indirection are aiding in the ultimate fall of the Axis powers. These people are ingeniously and relentlessly implementing the adage, "Where there's a will, there's a way". The spirit of these *un*conquered peoples points the way to freedom.

Programs for Victory

2 GOOD SHOWS AT KMA

Earl May's KMA, Shenandoah, Iowa, is currently involved with a couple of good programs.

"The first, 'News For Americans,' a five-a-week quarter-hour, explains Bill Bates, program director, was conceived to organize and correlate much of the flow of government information into a listenable unit. The material, handled by two announcers, is presented under four sub-heads: 'News From The Home Front,' 'News From the Farm Front,' 'News From the Factory Front,' and 'News From The Fighting Front'. Organ provides dramatic backbround and transitions.

"This program also promotes the second, 'The K M A Victory Auction, a Saturday afternoon half-hour. A professional auctioneer donates his services to auction off to participating audience articles brought in by listeners. Anything saleable worth ten cents up is auctioned, and contributors are paid off in stamps or bonds.

"Station talent provides draw; and to add interest, hats, ties, wigs, etc., worn by talent are offered for auction. 'Auction,' takes place on half-block vacant lot across the street from K M A.

WCLO AND GAZETTE WORK TOGETHER

Well placed announcements and one to three fifteen minute programs daily sell war stamps and bonds for WCLO, Janesville, Wis. The Janesville Gazette with which the station is associated also has a part in the big push. On August 15 the paper ran a full page and the WCLO Bond Wagon received a big play. James F. Kyler says "We're doing all right."

KVOO SAVES STRAWBERRIES

An issue of "Oklahoma Extension News," monthly publication of the Oklahoma Agricultural and Mechanical College Extension Division, just received, features an article dealing with KVOO's hard hitting campaign which saved a large part of eastern Oklahoma's strawberry crop.

The rescued strawberries, said Walt Dennis, sales promotion manager, will be eaten this winter by our allies. He thinks the station's service is just another example of how the medium contributes to the nation's war effort.

OWI RADIO CAMPAIGN

The Office of War Information today announced a special radio campaign designed to inform the American people of the facts of the war effort of the United Nations.

The campaign—described as the most important ever attempted thus far by the United States Government through the medium of radio—will begin September 14 and continue through October 26, 1942.

All radio stations throughout the country were sent a telegram this morning announcing the plan, and a complete presentation was sent by mail later in the day.

In a memorandum to stations, William B. Lewis, Chief of the Radio Bureau of the Office of War Information, said "I need not stress the importance of acquainting the American public with the true facts about the United Nations. It is obvious that for complete unity of effort by our people, every American should be completely informed on the contributions of every member of the United Nations."

Stations will be furnished with 43 transcribed one-minute spot announcements, featuring such famous news commentators as:

H. V. Kaltenborn
William Shirer
Gabriel Heatter
Walter Winchell
Raymond Clapper
John Gunther
John W. Vandercook
Earl Godwin
Lowell Thomas
Raymond Gram Swing
Pearl Buck

Transcriptions will feature war effort *facts*, in concise announcements, on fourteen of the major United Nations including England, Russia, China, Greece, The Fighting French.

V-MAIL CAMPAIGN

The War Department has assigned United States broadcasters the major role in promoting the use of the revolutionary new V-Mail system of handling letters to and from American armed forces overseas. Last week, over the signature of Lt. Col. E. M. Kirby, chief of the Radio Branch of the War Department Bureau of Public Relations, regular V-mail letters were sent out to broadcasters, news commentators, network program producers and women's commentators, calling upon them for cooperation in promoting the use of V-Mail. The opening gun was sounded August 23 on *The Army Hour.*

The new V-Mail technique, developed as a large-scale operation to facilitate the handling of the huge volume of correspondence to and from American soldiers, sailors and Marines on overseas duty, is based on a process of micro-filming letters written on special V-Mail forms. These special forms are available free of charge at U. S. post offices at present, although it is planned to permit their manufacture, under government license, and sale at retail. V-Mail service is supervised by the Army Postal Service, cooperating closely with the Post Office Department.

When facilities for reproduction are available at overseas posts, V-Mail letters are photographed on 16 mm. film in this country, and reels of this film, containing thousands of letters in a small space and with little weight, are flown overseas, where photographic copies are made for delivery to the addressee. The same idea holds for letters from overseas to addresses in this country. When reproduction facilities are not available, the V-Mail letter, in its original form, is dispatched to the overseas address under the highest mail priority. Ultimately, it is planned, the micro-film process will be used for most of the overseas mail to members of the armed forces.

WARTIME FOREST FIRE PREVENTION

The following letter of appreciation for the work done by the broadcasting industry in behalf of the Wartime Forest Fire Prevention was received by President Neville Miller from R. F. Hammatt, director of the campaign:

"The splendid manner in which the American broadcasting industry is cooperating in the nationwide Wartime Forest Fire Prevention campaign merits far more appreciation than can be expressed in any ordinary letter.

"Here are three typical examples of that cooperation.

"One: On July 20 Wallace Kadderly, of the Radio Service of the Department of Agriculture, solicited 800-odd individual stations on the possibility of using prepared transcription material relating to the campaign. To date more than 55 per cent of the contacted stations have expressed a desire to use that forest fire prevention material.

"Two: On Friday night, July 24, CBS devoted its entire 'Report to the Nation' program to forest fire prevention.

"Three: Station KTFI, affiliated with NBC, says it has scheduled the forest fire transcription as follows:

" 'The one-minute spots on Tuesday at 6:45 p. m., Wednesday at 3:15 p. m., and Friday at 10:30 p. m.; the 4½-minute spots on Mondays and Fridays at 5:25 p. m.; the 20-second spot, Tuesday at 3:45 p. m.; the 15-second spot at 4:45 p. m. on Thursdays. This schedule will continue through September 15, and the transcription will be returned after the above date.'

"Through you, and on my own behalf as well as for the Forest Service, I want to express sincere thanks to the members of your Association for such generous and helpful cooperation."

DIRECTOR GENERAL OF BBC VISITS

Sir Cecil Graves, director general of the BBC, who recently came to the United States to study American broadcasting, was a visitor at NAB headquarters this week. He was accompanied by Mr. Lindsay Wellington, North American director of BBC.

A branch office has been established in Washington, in charge of Miss Annette Ebsen.

MILLER LOANED TO WAR DEPARTMENT

Joseph L. Miller, NAB director of Labor Relations, was requisitioned by the War Department to serve temporarily as Labor counseller in connection with the taking over, under War Labor Board orders, of the S. A. Wood Machine Company plant at Boston.

The assignment will consume a week or ten days, after which Mr. Miller will return to full time service at NAB headquarters.

LEE DE FOREST FELICITATED

Lee deForest, pioneer radio figure, was felicitated by President Miller on behalf of the industry on his sixty-ninth birthday.

Mr. deForest is now living in retirement in Los Angeles.

NOT A GOVERNMENT ORGANIZATION

Several stations have queried NAB for information regarding a questionnaire sent by Robert J. Coar, director, Radio Room, Old House Office Building.

The question most frequently raised was whether this was a government agency. The answer is "No"; this is a commercial proposition.

What apparently raised the question was the address, "Radio Room, Old House Office Building", and question six of the survey, "We will or will not make records for the government."

COURSE FOR ANNOUNCERS IN CANADA

President Glen Bannerman, Canadian Association of Broadcasters, writes that a special course for radio announcers has been arranged by the association and the Ontario Agricultural College, Guelph, Ont.

The course begins September 1 with twenty-five students, and ends on the 25th. It is especially designed to impart a knowledge of microphone technique. and is open to men and women eighteen years and over. But only men ineligible for active war service will be admitted.

WCAU BEGINS PAID RADIO COLUMN

WCAU, Philadelphia has inaugurated a daily radio column, "This Is Radio", as paid advertising, in the Philadelphia Inquirer.

It is assembled by the station's publicity staff and maintains the news-room approach. Items are not devoted exclusively to WCAU and CBS, but drawn from the Mutual, NBC and Blue, as well as from other Philadelphia stations. Copy is set two columns by half column deep.

Harry Murdock, formerly with the Evening Public Ledger, is the station's new assistant director of publicity and station promotion.

WAKEFIELD SPEAKS OPTIMISTICALLY

FCC Commissioner Ray C. Wakefield, speaking before the Public Utility Section of the American Bar Association at its annual convention in Detroit, August 25, gave an over-all picture of the difficulties which communications agencies are experiencing in their wartime operations. He spoke of the tremendous change which the war had wrought in the Commission's regular work and in the number of people required to discharge the tasks which it has been called upon to perform.

He revealed that in July of 1940 the peacetime staff of the Commission numbered about 750, consisting of lawyers, engineers, accountants and necessary administrative and clerical staffs. Today the Commission has a staff of some 2,000, the majority of which devotes full time to work directly connected with the war effort, while the others find more and more of the impact of war on their work. He also referred to the additional burden put upon the Commission by the Board of War Communications work, of which FCC Chairman Fly is also chairman.

Speaking of priorities, Commissioner Wakefield said, "Although WPB has recognized the vital needs fulfilled by communication services in its priority systems, allocation of materials has been insufficient to enable the companies to maintain their peacetime efficiency." He also referred to the tremendous turnover in personnel and sounded a warning note. He said, "The difficulties of communications companies in handling the increased traffic have been aggravated by the substantial loss of personnel to the armed forces. The strain on experienced technical employees has been heavy and will probably continue to be so for some time. To fill the gap the companies have had to recruit inexperienced persons and engage in a general program of training."

Referring specifically to the Commission's activities in the broadcasting field, Mr. Wakefield said, "Since that time, the Commission's work in broadcasting has been sharply affected by the scarcity of materials and the necessity of conserving whatever materials and personnel are available. As you may know, by opinions issued on February 24 and April 27, the Commission has adopted a policy which, in effect, has placed a halt on broadcast construction and expansion. In the field of high frequency (FM) broadcasting, the Commission has deemed it advisable to grant licenses where the construction, though not fully completed, has proceeded to the point where it is capable of rendering a substantial public service. Unfortunately, it became necessary to dismiss a number of applications which has been pursued diligently, and in some cases, with a great deal of expense. These applicants, through no fault of their own, had been caught in the web of circumstances. But I must say that, by and large, they have graciously accepted their fate in a spirit indicative of an all-out desire to aid the war effort.

"However, research and the development of the art of broadcasting is being steadily encouraged. It is our hope that just as radio emerged from the first world war as an industry of great national significance, the coming of peace will find radio an even more advanced medium of communication. Television, high frequency (FM) and facsimile broadcasting all appear as bright spots in the radio picture. They present distinct possibilities as post-war industries to take up the inevitable slack in employment and production that comes with the release of armed forces and the closing of war industries."

NEW YORK

Estimated Radio Homes, 1940

Number of Occupied Dwelling Units as reported by U. S. Bureau of the Census in advance release, Series H-7. Percent radio-equipped calculated from Series H-7 Bulletin following the Census Bureau practice. Number of radio units or radio homes estimated by applying percent ownership to those units not answering radio question and adding such to those reporting radio.

	All Units			Urban Units			Rural-Nonfarm Units			Rural-Farm Units

FEDERAL COMMUNICATIONS COMMISSION

FCC STUDIES FREEZE ORDER

The FCC has appointed a Committee composed of Commissioners Craven, Payne and Durr, to make a study of pending applications and problems arising thereunder, having to do with the use of materials and the construction or change of broadcasting facilities; and to submit to the Commission their conclusions as to what changes, if any, the Commission should recommend to the Board of War Communications and the War Productions Board.

RADIO COMPENSATION AND EMPLOYMENT UP

The FCC Report shows that employment in broadcasting, including station and network staff employees, had increased in the sample week of 1941 over a similar week in 1940. Following is the comparison:

	Week beginning Oct. 13, 1940	Week beginning Oct. 12, 1941
Full time staff employees	21,646	23,666
Part time staff employees	4,007	3,978
Total	25,653	27,644

The above figures include only those employees hired directly by stations and networks. They do not include those engaged in radio, hired by advertising agencies and clients, recording companies, etc.

The Commission's report is as follows:

"Personnel increases and advances in average salaries in the radio broadcasting industry again were reflected in annual financial reports of stations and networks which are filed with the Federal Communications Commission. Using the week beginning October 12, 1941 as a base period, three national networks, five regional chains and 817 standard broadcast stations reported that 23,666 persons were employed on a full time basis having a weekly payroll of $1,138,249. This showed a personnel increase of 2,020 people for the industry, and a growth of the weekly salary total by $121,883 over a similar period in 1940.

"Exclusive of executive personnel the average weekly wage at the national radio chains was $57.41, representing a dip of fourteen cents from the year before, while the $48.39 average at regional networks represented a $6.81 climb, and individual station increases of $1.13 brought average pay envelopes to $38.88. Staff musicians and artists employed full time are included in the totals but those persons hired by radio departments of advertising agencies or program sponsors are not. The eight broadcasting systems had 4,009 full time workers and the remaining employees were on the rolls of individual stations. FCC accountants after studying earlier reports stated that 1941 returns show the consistent growth of employment and average compensation within the broadcasting business.

"The average weekly compensation for the 19,567 full-time employees of the 817 stations was $45.15, an increase of $1.64 over 1940. Of these full-time employees 2,426 were in the executive class with an average weekly pay of $89.46, an increase of $5.04 over 1940, while the remaining 17,141 below the grade of executive had an average weekly income of $38.88, an increase of $1.13 over 1940. For the major network executives the average was $258.83 as compared with $251.68 for 1940, while the major network employees below the grade of executive was $57.41, a decrease of 14 cents from 1940. It is noted that the employees of the regional networks had a more encouraging experience with the executive class advancing from an average weekly pay of $91.50 in 1940 to $137.57 in 1941 while those below the grade of executive were having an increase in pay from $41.58 in 1940 to $48.39 in 1941.

"Reports from the licensees of 817 stations were included in the tabulations for 1941 compared with 765 stations for the year 1940. The 1941 tabulations for full-time employees of unlimited time stations reveal the following:

Class of Station	*Type of Employee*	*Number of Stations*	*Number of Employees*		*Compensation of Employees*	
			Total	*Average Number Per Station*	*Total*	*Average Compensation Per Employee*
Clear Channel	Executives	59	284	5	$ 39,897	$140.48
	Other than Executives		3.924	66	200,633	51.13
	Total—Clear Channel	59	4.208	71	$240,530	$ 57.16
Regional	Executives	251	965	4	101,070	$104.75
	Other than Executives		6.948	28	273,604	39.38
	Total—Regional	251	7,913	32	$374,674	$ 47.35
Local	Executives	401	865	2	52,568	$ 60.77
	Other than Executives		4,445	11	123,346	27.75
	Total—Local	401	5.310	13	$175,914	$ 33.13
All Classes	Total for Executives	711	2,114	3	$193,535	$ 91.55
	Total for all other than Executives		15,317	22	597,583	39.01
	Total—All stations	711	17,431	25	$791.118	$ 45.39

"Stations in the more densely populated regions employ more people per station than stations of the same class located in less densely populated regions. This was also true in 1940. For example, there were 18 clear channel unlimited time stations in the northeastern region that employed 1438 people full time, or an average of approximately 80 people per station, while in the southeastern region there were 8 clear channel unlimited time stations that employed 466 people full time, or an average of approximately 58 people per station. It is also found that there were 133 unlimited time stations in the northeastern region that employed 4,691 people full time, or an average of approximately 35 people per station, while in the southeastern region there were 162 unlimited time stations that employed 2,682 people full time, or an average of approximately 17 people per station. If considered from the pay roll angle it develops that in the northeastern region the average pay for all the full time employees of the 18 clear channel unlimited time stations was $62.40, while in the southeastern region the average pay for all the full time employees of the 8 clear channel unlimited time stations was $39.38. In the northeastern region the average pay for all the full time employees of unlimited time stations was $50.24, while in the southeastern region the average pay for all the full time employees of unlimited time stations was $37.98.

"The increase in employment, due in a certain degree to an increase in number of stations, was distributed with a fair degree of evenness throughout the several operating departments of stations at the rate of 7 to 13 percent of the 1940 figures except for the miscellaneous which showed a decrease of 8 percent. The increase in station employment for full time employees was:

	Number of Employees	Percent of Increase
Executive	229	10
Technical	243	7
Program	793	12
Commercial	174	9
General and Administrative	350	13
Miscellaneous	(27)	(8)
Total increase	1,762	10

The total number of part time employees in the industry during the week beginning October 12, 1941, was 3,978 with a payroll for the week of $122,775. The stations had 3,424 part time employees, both executive and other, with a payroll of $84,767 for the week, and the networks had 554 part time executives and other employees with a payroll of $38,008."

CIVILIAN DEFENSE RADIOS

The FCC has issued the following press release:

"The first licenses to be granted by the Federal Communications Commission under newly-established regulations for civilian defense radio systems have been issued by the Commission to the City of Akron, Ohio, and the City of Lawrence, Massachusetts. Classified as War Emergency Radio Service these stations extend the organized civilian units functioning under the Office of Civilian Defense. In event of air raids or other enemy action, which destroy other forms of communications, the emergency radio will be available to coordinate rescue and repair work.

"Under the terms of the licenses granted Akron will have a two-way low-powered radio system of sixteen receiver-transmitters. Some of these will be in fixed locations, others will be mobile and a few will be of the type known as "walkie-talkies" because the operator may use it while moving about. Lawrence, Massachusetts, has been licensed for a system of eleven two-way radios.

"Applications of many other cities are now pending at the FCC and requests from the different communities vary to fit local conditions. Fort Wayne, Ind., has plans for more than one hundred such sets, while Dayton, Ohio, indicates that forty radios will serve its needs. Some applications are being returned to municipalities because the forms fail to indicate what arrangements exist for liaison with Defense Commanders for the purpose of receiving orders of radio silence when conditions dictate. Regulations of the FCC require that the licenses be issued to the municipal governments proper rather than any of the departments.

"Formation of the War Emergency Radio Service was announced jointly by the FCC and the OCD last June 13, at which time it was explained that radio amateurs, repairmen and others having sufficient experience would be asked to volunteer and serve in the operation of the civil defense radio systems. The two-way radios operate on ultra short-waves with power sufficiently low to limit their range to approximately ten miles. Spare parts laying around radio repair shops are considered sufficient to construct these radios, engineers declare."

The service comprises two classes of radio stations, namely, Civilian Defense and State Guard stations which are intended to provide distinct and separate communication facilities on frequencies above 112,000 kilocycles, for use by Civilian Defense Corps and State Guard, or equivalent to sufficiently recognized organizations.

In the interest of security, it is deemed necessary that an official designated as a radio aide be appointed by the station licensee, which licensee must be the municipality or state government involved. This aide is to direct and supervise the operations of all Civilian Defense radio stations within his area. He must be qualified and hold a valid radio operator's license of any class except a restricted radio telephone operator's permit. This is going to create a difficult problem in some communities, and affords an opportunity for a standard broadcasting station in the community to render worthwhile assistance in this emergency radio service.

These stations will undoubtedly contribute substantially to the war effort and to the defense of the communities in which they are located. Since the entire system is to be operated on relatively high frequencies, it is not likely to disturb in any way the interests of existing broadcasters.

Sales

CLASSIFIED AD PROGRAMS

Miss Beth Kensinger of WHBF, Rock Island, Ill., has asked for details of any classified ad programs that have been or are being used by radio stations. She desires information regarding the set-up of such programs, the selling methods used, the rates and the format of the air shows.

Any station having this type of program is asked to communicate with Miss Kensinger.

TRADE DEAL

The Kermit-Raymond Corp., 745 Fifth Ave., New York City, is submitting a trade deal to stations. The deal involves a plan under which the stations accept thirteen 15-minute radio shows, "Famous Fathers," and in exchange gives to the Kermit-Raymond Corp. thirteen 1-minute spot announcements.

We have written the Corporation that the best results from radio advertising are secured when announcements and programs are bought under standard rates and under standard contracts.

PER-INQUIRY REQUEST

The Paul Grant Advertising Agency, Chicago, is seeking per-inquiry business for their client's "Home Book of Medicine."

We have invited this agency to use radio on the basis of established rates.

FINAL CENSUS FIGURES

The U. S. Bureau of the Census released the last of the state and county radio family figures today, Friday, August 28. The New York State figures appear in this REPORT.

The final figure for radio families at census date, April 1940, is 28,838,203. This is a correction of the figure released in the NAB REPORTS, July 31, 1942 (pages 467-468), which was based on complete figures for forty-three states and preliminary projection for the five states, New York, Pennsylvania, Ohio, Illinois and California.

The following tabulation of state figures is repeated here for convenience. It contains final projection as prepared by the NAB Research Department for each state and for the U. S. total.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, August 31. They are subject to change.

Tuesday, September 1

Further Hearing

NEW—Newark Broadcasting Corp., Newark, N. J.—C. P., **620 kc.**, 5 KW, unlimited, DA-night and day.

Thursday, September 3

KITE—First National Television, Inc., Kansas City, Mo.—Renewal of license, **1590 kc.**, 1 KW, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KPQ—Wescoast Broadcasting Co., Wenatchee, Wash.—Granted modification (B5-MP-1558) of construction permit for

(Continued on page 526)

FINAL FIGURES

Radio Homes in the United States—1940

Estimated from 1940 U. S. Census of Housing Data. Number of Occupied Dwelling units and percent radio-equipped as reported by U. S. Census, and number of dwellings having radio estimated from Census data by projecting percent ownership to the number of units not answering the radio question, applied separately to Urban, Rural-Nonfarm and Rural-farm units for each county.

APPLICATIONS GRANTED

(Continued from page 524)

approval of present transmitter site, reduce power from 5 KW to 1 KW and make changes in directional antenna system.

KICA—Western Broadcasters, Inc. (assignor), Hugh DeWitt Landis (assignee), Clovis, N. Mex.—Granted consent to assignment of license for station KICA from Western Broadcasters, Inc., to Hugh DeWitt Landis, for a total consideration of $16,000 (B5-AL-338).

DESIGNATED FOR HEARING

WRDO—WRDO, Inc., Augusta, Maine.—Designated for hearing application for construction permit to increase power from 100 watts to 250 watts, install a new transmitter and antenna and move transmitter site locally (B1-P-3480).

LICENSE RENEWALS

Granted renewal of following station licenses for the period ending in no event later than December 1, 1942:

WBYN and auxiliary, Brooklyn, N. Y.; WNBC and auxiliary, Hartford, Conn.

KSCJ and auxiliary.—Perkins Brothers Co. (The Sioux City Journal), Sioux City, Iowa.—Granted renewal of license for the period ending not later than October 1, 1944.

Granted further extension of license upon a temporary basis only, pending determination upon applications for renewal of licenses, not later than October 1, 1942:

W5XAU, Oklahoma City, Okla.; W9XLA, Denver, Colo.

W8XO—The Crosley Corp., near Mason, Ohio.—Granted further extension of license upon a temporary basis only, pending determination upon application for renewal of license, to not later than October 1, 1942.

The Commission on August 24 adopted a final order (B-156) granting the application of the Federated Publications, Inc. (WELL), Battle Creek, Mich., for renewal of license (Docket No. 6199).

MISCELLANEOUS

WAKR—Summit Radio Corp., Akron, Ohio.—Granted modification of construction permit as modified, which authorized increase in power, changes in directional antenna for night use, and installation of new transmitter, for extension of completion date from September 1 to November 1, 1942 (B2-MP-1618).

WGEO—General Electric Co., Schenectady, N. Y.—Granted license to cover construction permit, which authorized installation of new transmitter for international broadcast station (B1-LIB-24).

Wilkes-Barre Broadcasting Corp.; Central Broadcasting Co.; Northeastern Pennsylvania Broadcasters, Inc.; and Key Broadcasters, Inc.—Scheduled for oral argument on September 23, 1942, in re exceptions to the Commission's Proposed Findings B-153, entered in the applications for construction permits for new broadcast stations. Dockets 6135, 6169, 6170 and 6171, respectively.

APPLICATIONS FILED AT FCC

940 Kilocycles

WMAZ—Southeastern Broadcasting Co., Inc., Macon, Ga.—Construction permit to move auxiliary transmitter to location of main transmitter at Forsyth Road, Macon, Georgia, increase power of auxiliary transmitter from 1 KW to sunset KOB and 250 watts after sunset KOB to 1 KW day and night, using the directional antenna specified to be used with main transmitter day and night.

990 Kilocycles

WNOX—Scripps-Howard Radio, Inc., Knoxville, Tenn.—Modification of construction permit (B3-P-2839, as modified, which authorized directional antenna for night use, increase in power, install new equipment) for changes in directional antenna system, and extend completion date from 9-17-42 to 30 days after grant.

1010 Kilocycles

KLRA—Arkansas Broadcasting Co., Little Rock, Ark.—Modification of construction permit (B3-P-3049, as modified, which authorized move of transmitter, changes in directional antenna for night use, change frequency, and increase power) for extension of completion date from 9-13-42 to 3-13-43.

1080 Kilocycles

KRLD—KRLD Radio Corp., Dallas, Tex.—License to cover construction permit (B3-P-3484), which authorized changes in directional antenna system.

KRLD—KRLD Radio Corp., Dallas, Tex.—Authority to determine operating power by direct method.

1110 Kilocycles

KPAS—Pacific Coast Broadcasting Co., Pasadena, Calif.—Modification of construction permit (B5-SSA-14), which authorized installation of a 5 KW transmitter and directional antenna requesting extension of completion date from 8-9-42 to 1-13-43.

1140 Kilocycles

KGDM—E. F. Peffer, Stockton, Calif.—Modification of construction permit (B5-P-3199, as modified, which authorized change in frequency, increase in power, change hours of operation, installation of directional antenna for night use, and new transmitter) for extension of completion date from 9-20-42 to 10-20-42.

1290 Kilocycles

KHSL—Golden Empire Broadcasting Co., Chico, Calif.—Modification of construction permit (B5-P-3100, as modified, which authorized installation of directional antenna for day and night use, and increase in power) for extension of completion date from 9-16-42 to 10-16-42.

1300 Kilocycles

KGLO—Mason City Globe Gazette Co., Mason City, Iowa.—Modification of construction permit (B4-P-3269 as modified), which authorized installation of new transmitter, increase power, and changes in directional antenna for night use requesting extension of completion date from 8-28-42 to 10-27-42.

1450 Kilocycles

WLAN—Thomas J. Watson, Endicott, N. Y.—Modification of construction permit (B1-P-1679), which authorized construction of new station requesting approval of antenna, approval of transmitter site, change type of transmitter, approval of amplifier and location. Amended: re change in transmitter site, type of transmitter and to omit request for synchronous amplifier.

WLAY—Muscle Shoals Broadcasting Corp., Muscle Shoals City, Ala.—Construction permit to install a new transmitter.

WLAY—Muscle Shoals Broadcasting Corp., Muscle Shoals City, Ala.—Authority to determine operating power by direct measurement of antenna power.

1490 Kilocycles

WWSW—Walker & Downing Radio Corp., Pittsburgh, Pa.—Modification of license to change corporate name from Walker and Downing Radio Corp. to WWSW, Inc.

FM APPLICATION

W59NY—Interstate Broadcasting Co., Inc., New York, N. Y.—License to cover construction permit (B1-PH-109 as modified), which authorized construction of new high frequency broadcast station, in part, in accordance with Commission action of 8-4-42.

W67NY—Columbia Broadcasting System, Inc., New York, N. Y.—License to cover construction permit (B1-PH-55 as modified), which authorized new high frequency broadcast station, in part, in accordance with Commission action of 8-4-42.

TELEVISION APPLICATION

WBKB—Balaban and Katz Corp., Chicago, Ill.—Modification of construction permit (B4-PCT-14), which authorized construction of new television broadcast station requesting change in ESR from 800 to 860, changes in antenna systems, change in aural transmitting equipment and extension of completion date from 8-15-42 to 12-15-42.

MISCELLANEOUS APPLICATIONS

NEW—National Broadcasting Co., Inc., New York, N. Y.—Extension of authority to transmit recorded programs to all broadcast stations in Canada licensed to operate by the Canadian Government, which may be heard consistently in the United States for the period beginning 9-15-42.

NEW—National Broadcasting Co., Inc., New York, N. Y.—Extension of authority to transmit programs to Stations CFCF and CBL and the Canadian Broadcasting Corporation for the period beginning 9-15-42.

W4XGG—Gordon Gray, Winston-Salem, N. Car.—Modification of construction permit (B3-PST-6), which authorized construction of new ST broadcast station requesting extension of completion date from 9-6-42 to 11-5-42.

KWID—The Associated Broadcasters, Inc., San Francisco, Calif.—License to cover construction permit (B5-PIB-34, as modified, which authorized new international broadcast station). Amended: to add frequency **7230 kc.,** operating unlimited on this frequency, accordance B5-MPIB-36.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Ed. W. Arnold Company, a common law trust doing business under the trade names of Edward W. Arnold Company, and Edw. W. Arnold Company, and Ed. W. Arnold, individually, Logansport, Ind., engaged in the manufacture and sale of bath cabinets designated "Arnold's Electro-Vaporized Mineral Bath and New Deluxe Multi-Treatment Cabinets," and a mechanical device designated "Tu-Way Massager," is charged in a complaint with misrepresentation. (4818)

Paul Case, Brockton, Mass., engaged in the sale of medicinal preparations designated "Case Combination New Improved Method," "The New Improved Case Combination Method," and "Case Combination Formulae," is charged in a complaint with false advertising and misrepresentation. (4813)

Thomas E. Collins Co., 5036 Geary Blvd., San Francisco, engaged in the sale and distribution of a medicinal preparation designated "Alimentone," is charged in a complaint with misrepresentation. (4816)

Duo-Tint Bulb & Battery Co., Inc., and Carrie Riggs, Helen Corts and Dalton W. Riggs, as officials of the corporation, 4431 North Racine Ave., Chicago, engaged in the sale and distribution of small incandescent electric light bulbs and batteries, are charged in a complaint with misrepresentation. (4814)

Lekas and Drivas, Inc., 19 Roosevelt St., New York, importers and distributors of olive oil, are charged in complaint with misrepresentation in the sale of "L. & D. Olive Oil" and "Aristocratic Imported Virgin Olive Oil." (4815)

Nu-Tred Tire Agency, et al.—Alleging unfair and deceptive acts and practices in commerce, a complaint charges a Chicago tire recapping corporation and its officials with acquiring old casings from dealers in junk and old tires, recapping them inexpertly and carelessly, and selling the inferior and unfit product as "guaranteed" high quality recaps and casings.

The respondents named in the complaint are American Industrial Rubber Co., doing business as Nu-Tred Tire Agency, Champion Rubber Co., L. & S. Tire Distributors, and Harvester Tire Sales, 4405 South LaSalle St., Chicago, and Harold Trilling, Manny G. Tenenbaum, Olin K. Lewis, and E. F. Smith. The respondent Trilling is named as the principal stockholder and general manager of the corporation, Tenenbaum as being in charge of its purchases of old automobile tires for recapping, and Lewis and Smith as "master salesmen" or regional sales managers receiving additional over-riding commissions on sales made by other salesmen. (4819)

Pow-A-Tan Medicine Co., Huntington, W. Va., engaged in selling a medicinal preparation designated "Powatan Herb Tonic," is charged with misrepresentation in a complaint. (4817)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Cutter Laboratories, Berkeley, Calif., with depots and branch offices at Los Angeles, Chicago, San Antonio, Seattle, Denver, Fort Worth, El Paso, Boise, and New Orleans, engaged in manufacturing, compounding and selling, among other products, a vaccine preparation designated "Blacklegol," recommended as a means of rendering cattle immune to an ailment known as blackleg, has been ordered to cease and desist from certain misrepresentations concerning its product and competing preparations. (4348)

J. Freidson Shoe Co., 200 Essex St., Boston, engaged in the sale and distribution at wholesale of shoes, particularly children's shoes, has been ordered to cease and desist from misrepresentation concerning its products. (4632)

Manhattan Brewing Company—An order directing the Manhattan Brewing Company, Chicago, to cease and desist from certain representations with regard to its products, has been set aside by the Commission, with leave granted to the respondent to file a new answer to the complaint within 20 days. The ruling of the Commission was made upon the petition of the respondent which alleged misunderstanding of the circumstances under which its answer to the complaint was filed. The case was set for further hearings in accordance with the Commission's regular procedure. (4572)

N-A Company, Laurel, Miss., engaged in the sale of a medicinal preparation variously designated as "N-A No. 7," "Vicine," "Nature's Aid," and "N-A," has been ordered to cease and desist from misrepresentation of his product. (4662)

John Romano, operator of a curio shop at 1004 Main St., Daytona Beach, Fla., has been ordered to cease and desist from misrepresentation in the sale of a coin catalog. The complaint in the case was issued against Romano and National Coin Corporation, of which Romano was president and principal owner before it was dissolved. The Commission closed the case as to the corporate respondent. (3862)

Style & Merit Buying Service, 225 West 34th St., New York, have been ordered to cease and desist from violation of the brokerage section of the Robinson-Patman Act. (4249)

NAB Reports
The NATIONAL ASSOCIATION OF BROADCASTERS
1626 K STREET, N. W. WASHINGTON, D. C. Vol. 10, No. 35, September 4, 1942

LOCALLY ORIGINATED WAR EFFORT BROADCASTS

MAY—JUNE—JULY, 1942

1,541,640 Announcements . . . 186,075 Programs

The broadcast stations of the country have done a Herculanean job in aiding the War Effort.

The mere tabulation of the spots and programs devoted to various departments and agencies in the government is the least important part of station contribution. The real McCoy is the end results which have been accomplished.

This is a record which stands out like Pikes Peak, "head and shoulders above the crowd."

For those who like red rot statistics the following table is recommended. Only announcements and programs of local origination are included.

NAB Reports
The NATIONAL ASSOCIATION OF BROADCASTERS
1626 K St., N. W. WASHINGTON Phone NAtional 2080

Neville Miller, *President* C. E. Arney, Jr., *Assistant to President*

Joseph L. Miller, *Director of Labor Relations;* Paul F. Peter, *Director of Research;* Russell P. Place, *Counsel;* Howard Frazier, *Director of Engineering;* Arthur C. Stringer, *Director of Promotion*

SELECTIVE SERVICE REVISED

Stressing the desirability of maintaining as much uniformity in inducting types of registrants as is possible under the autonomous provisions of the Selective Training and Service Act, Maj. Gen. Lewis B. Hershey, Director of Selective Service, has instructed all State Directors to apportion calls for inductees from their States among their local boards so that, in so far as is feasible, no board will be calling one type of registrant with dependents substantially in advance of the other boards.

State Directors should continue to place calls on their local boards, General Hershey stated, so as to place the heaviest load right now, on boards having the most single men, or men with collateral dependents only.

General Hershey's memorandum to State Directors, also directs all local boards to complete on or before October 16, 1942, the initial classification of all registrants liable for military service. This schedule must be met, the memorandum emphasizes, because the serious military situation requires that the Selective Service System prepare to fill calls during the coming year "which will be equal to or in excess of the monthly calls made in August, September and October of this year."

The procedure outlined by his memorandum, General Hershey said, will tend to level off inductions with the ultimate objective of calling men from the small town and from the city on an approximately uniform basis. He estimated that this leveling off process might require several months to accomplish because of the time required to process registrants and accord them full rights of appeal.

"Obviously," General Hershey told the State Directors, "the distribution of registrants by types among local boards is not uniform; and for that reason efforts to speed classification should be particularly concentrated and calls should be levied upon those boards within your State from which single men without dependents can be made available for induction. Calls should then be levied upon boards with substantial numbers of registrants having collateral dependents until a reasonable uniformity among local boards in your State has been accomplished."

Pointing out that they now may give immediate consideration to allowances payable under the Servicemen's Dependents Allowance Act of 1942, General Hershey also directs local boards to proceed at once with the reconsideration of the classification of Class III-A and Class III-B registrants who have collateral dependents. Class III-B registrants, in addition to having dependents, must be engaged in work essential to the war effort. Registrants with collateral dependents only are to be inducted ahead of men who maintain bona fide family homes.

Collateral dependents, as they are defined in a previous memorandum are: Wives or children (with whom the registrant does not maintain a bona fide family relationship in his home); parents, brothers, sisters, grandparents, grandchildren, divorced wives, persons under 18 years of age whose support has been assumed in good faith, or persons of any age physically or mentally handicapped whose support has been assumed in good faith.

As soon as local boards have reconsidered the classification of all registrants having collateral dependents, and have notified the State Director of that fact, the current memorandum instructs that they then should reopen and reconsider the classification of all registrants who have wives (but no children) with whom they maintain a bona fide family relationship in their homes. It is stressed, however, that the marriage must have taken place before December 8, 1941, *or at a time when selection was not imminent.*

Registrants having wives and children, or children with whom they maintain a bona fide home, and who were married before December 8, 1941, and at a time when selection was not imminent, shall not be placed in Class I-A (available for induction) until such action is authorized by the National Headquarters, General Hershey emphasized.

Heretofore local boards, which are composed of uncompensated citizens volunteering their services, have classified registrants in accordance with Army induction calls, General Hershey said. Now, he declared, mounting needs for military manpower make it desirable to complete all classifications as soon as possible so that Army requisitions for men, no matter how large, may be met promptly.

A factor preventing quick change in the order of induction with relation to dependency, General Hershey asserted, is that the Army must make provision from 2 to 3 months in advance for the reception of inductees. Army Induction Stations and Reception Centers must be equipped and staffed considerably in advance of the arrival of recruits, he pointed out.

"Since calls for inductees are sent to the States from National Headquarters 60 days in advance," General Hershey said, "at least that period of time is required to conform to any change in policy or to carry out any revision of the order in which men may be inducted."

Citing that Selective Service Regulations, in accordance with the intent of Congress in the passage of the Servicemen's Dependents Allowance Act of 1942, recognize certain groups of dependency. General Hershey said:

"Our policy is to follow the order of dependency deferment set up in those Regulations to the fullest extent consistent with the local board's ability to furnish the number of men required by the military forces each month. It is our further policy to follow the order of deferments on a nation-wide basis as far as possible."

As present needs for certain occupational deferments expire, General Hershey also said, single men and others not conforming to the type currently being inducted will be called.

"And the same situation," he added, "will apply to men reaching the age of 20 and thereby becoming eligible for selection."

The classification drive now under way for completion by October 16 is the first effort ever made to enumerate our Nation's total manpower of military age, General Hershey stated. He said:

"We have reached a point where such a nation-wide survey is possible and also imperative.

"Registration of all men between the ages of 18 and 65 has been accomplished by the five nation-wide registrations held since the Selective Training and Service Act became law on September 16, 1940. The Fourth Registration, of course, listed men from the ages of 46 to 65 who, under present law, are not subject to military service. In the Fifth Registration, on June 30, 1942, that of men 18 to 20 years old, inclusive, only those who have actually reached their 20th birthday anniversary are subject to call until such time as Congress may modify the law."

Through frequent reports on available manpower of the various groups, National Selective Service Headquarters maintains up-to-date information on the status of all types of registrants—single men with dependents deferred for occupational reasons, various dependency classifications, etc., General Hershey declared. Future calls will be adjusted as frequently as necessary, he said, to draw from the same pools of men in all States on as nearly a uniform basis as possible.

WILL YOU WRITE A LETTER FOR ARMY AIR FORCES?

Air Forces Need Tens of Thousands More Radio Technicians

Printed below is a statement by Army Forces

"One of the most critical needs in the Army Air Forces today is for tens of thousands additional radio technicians.

"In order to obtain more men, the Air Forces Technical Schools have been greatly expanded. However, this will only partially meet the requirements. It is therefore necessary to utilize to the maximum degree the facilities available through the ESMWT-NAB course in Fundamentals of Radio, so that many of those entering the Air Forces in months to come will have pre-induction training. This will shorten the amount of time necessary to devote to training after entering service.

"In order to meet Army Air Forces requirements for communications personnel, it will be necessary to train thousands of additional men in the Fundamentals of Radio. These technicians are needed for flying and ground duty in radio operating, maintenance and inspection duties. Successful operation of Air Forces units depends to a high degree upon communications. Prospective requirements for communications personnel far exceed the estimate of a few months ago.

"It is requested that broadcasters assist in every way possible in stimulating interest in ESMWT courses and in organizing classes in cooperation with state educational institutions.

Announce Air Forces Enlisted Reserves

"Effective immediately, it is possible to have qualified individuals enrolled in the Engineering, Science, Management, War, Training courses in Fundamentals of Radio, to enlist in the Enlisted Reserves of the Army Air Forces and be assigned to Communications Activities. Broadcasters are requested to call this to the attention of those individuals who are responsible for conducting ESMWT courses in their respective areas. Not only will broadcasters thus contribute substantially to the War Effort but they will assist materially in alleviating the ever increasing shortage of technicians in the broadcasting industry.

"Those desiring to enter the Enlisted Reserves may do so by contacting their local recruiting officer or their local ESMWT institution or by writing to the Director of Communications, Headquarters, Army Air Forces, Washington, D. C.

Other Needs

"There are other needs for people with this same type of training in addition to the requirements of the armed forces.

Direct Enlistment

"In addition, attention is called to the fact that a direct recruiting campaign, designed to obtain communications specialists for the Army Air Forces, is now in progress. Those individuals having experience in communications may enlist directly in the Army Air Forces for assignment to communications."

What Gen. Somervell Says

And if anybody still is reluctant to believe the immensity of the shortage, read this statement by Lt. Gen. Brehon B. Somervell, commanding the Army's Service of Supply:

"Gen. Somervell said that on January 1 the Army needed 15 men of every 1,000 received who had some kind of training as radio operators.

"Yet from February 1 to March 31, we were getting less than one man per 1,000. We were short then almost 15 men per 1,000 inducted. Think of that. Actually, out of every 15,000 inducted we needed 4,689 with training as radio operators. We were getting 135. We were short 4,544."

The above paragraphs were contained in Gen. Somervell's talk, August 28, to a meeting of educators in Washington.

He also told the educators:

"We can lose this total war on the battle front as a direct result of losing it on the industrial front, on the home front or on the educational front."

Industry Has Never Failed— Let's Not Now!

The Army Air Forces request our help.

It's a simple thing, they ask, namely for every station head to write:

to every engineering school in your state
to every college with a physics department

setting forth the following points:

(a) That tens of thousands of additional radio technicians are needed.
(b) That the ESMWT-NAB course in Fundamentals of Radio exactly fills the bill for the Army Air Forces Enlisted Reserves just as it does for the Signal Corps Enlisted Reserves. [The fact that there are Enlisted Reserves of the Army Air Forces will be new to them, because, at the moment, it is known only to a handful of people here.]
(c) That facilities of the Air Forces Technical Schools have insufficient capacity to turn out the required technicians.
(d) That the situation demands expansion of the ESMWT-NAB Fundamentals of Radio course to the maximum. Right now. Not next month, not next semester.
(e) That they would not over produce if men counted in six figures were under simultaneous instruction.

IF YOU DO THIS

(1) We'll be making sure that these vital facts have been called directly and personally to the attention of educators, all educators. Then and only then will we have honored the request of the Army Air Forces for help in spreading the word to all educators. Don't worry about duplicate letters. The more the merrier.

The industry has never fallen down yet on a request for help from the U. S. A. and this is no time to begin.

ADDRESS YOUR LETTERS TO

The President of all schools. Copies to the following, if an engineering school:

(a) Head of the Department of Electrical Engineering.
(b) The ESMWT Institutional Representative.

SEND A COPY TO

(a) Director of Communications
Headquarters, Army Air Forces
Washington, D. C.
(b) Secretary
NAB War Committee
1626 K Street, N. W.
Washington, D. C.

There Is Nothing Else to Do At This Moment

Nothing else to do for the Army Air Forces at this moment but spread the word abroad among all of the educational institutions of America. Should you be asked by the President of a Liberal Arts College anything about the technique of participating in the teaching job, refer him to the ESMWT Institutional Representative of the nearest Engineering school. The way this thing is set up, Liberal Arts schools must clear through engineering schools. The needs are so urgent and imperative that every effort must be made to break the teaching bottle neck.

Don't Delay. Do It Today!

Engineering

BROADCAST PROGRAM FAILURE ALARM

Described in the August issue of Communications is an automatic monitoring device which provides a visual and oral alarm when the carrier, studio-transmitter program line or program fails. The article is by Elwin J. O'Brien, Assistant Professor of Electrical Engineering, University of North Dakota.

It is believed the installation of this automatic alarm may be found particularly helpful at stations employing inexperienced operators and announcers. Use of the device should also improve operation, when due to present day emergency conditions, operators and announcers are assigned dual duties.

The device is installed at the transmitter, with alarm indicating positions available at the transmitter, studio control room, supervisor's office or other advantageous points. No additional wire circuits are necessary between studio and transmitter.

The operation of the alarm is instantaneous upon failure of the carrier or studio-transmitter program circuit. The program failure alarm has an adjustable time delay, which can be set for delays of 20, 46 and 76 seconds before operation of the alarm. Normal periods of dead-air will not operate the alarm.

The device can be assembled and installed by a capable technician working from the description in COMMUNICATIONS. The cost of parts should not exceed $75.00 and many stations will find much of the required materials in the discarded and spare parts stock.

COMMUNICATIONS is published by the Bryan Davis Publishing Company, Inc., 19 East 47th Street, New York City.

NEW PRODUCTION CONTROL PLAN

WPB has announced that an experimental plan for budgeting the use of materials for prime war contractors, Contract Production Control, is being tried out in connection with three Navy contracts for radios. It is said that if the plan is successful it may be given a place in the WPB's general program for controlling the flow of materials.

Principal feature of Contract Production Control is the setting up of a complete budget of materials and parts required to fulfill a prime war contract.

The prime contractor obtains from all of his sub-contractors on a specified form (CPC-2) information which will show both materials requirements and a proposed shipping schedule for the parts which the sub-contractor will supply.

These reports will be assembled by the prime contractor on Form CPC-1, together with a statement of his own materials requirements and a production schedule of parts he will make himself, and submitted to the contracting agency. Preference ratings will be assigned to the approved deliveries of materials and parts and applied in the usual manner. It will be the intention to assign ratings high enough so that the schedules can be exactly met, with the result that deliveries should be neither earlier nor later than necessary to fulfill the contract delivery dates.

In order to avoid duplicating authorizations to purchase materials under the Production Requirements Plan, firms operating under both plans are required to deduct materials authorized under Contract Production Control from those authorized on fourth quarter PD-25A and PD-25F forms.

PRICE CEILINGS ON RADIO PARTS

An amendment to make clear that maximum prices for all radio apparatus and parts covered by Maximum Price Regulation No. 136 are those charged by sellers on March 31, has been issued by OPA.

Maximum Price Regulation No. 136, as amended (Machines and Parts and Machinery Services), has two pricing dates for machines and parts. For some items, maximum prices are those charged October 1, 1941, for others March 31, 1942.

It was the intent of OPA that all radio apparatus and parts use the March 31, pricing date, and to formalize this intent, Amendment No. 12 to Maximum Price Regulation No. 136 has been issued.

The amendment becomes effective Sepetmber 8.

Programs for Victory

The following news item from the N. Y. *Times* is significant:

Radio Gets $10,666,000 In War Bond Pledges

Special to *The New York Times*

WASHINGTON, Aug. 30—A total of $10,666,000 was pledged for war bonds in the radio drive staged by the Blue network and the Treasury in a seven-hour coast-to-coast broadcast over the week-end, the Treasury said tonight.

The Treasury said that the final total of pledges would be much higher since the amount announced represented only pledges received during the broadcast period.

PROMOTE "WHAT CAN I DO"

This week saw the delivery to all broadcast stations of suggested promotion back of the distribution of the forty-eight page and cover pamphlet, "What Can I Do." The title was suggested by the tone of several hundred thousand letters which were received by the Office of Civilian Defense, the President and others.

Getting these books into the hands of citizens is regarded by the government as one of the highly important tasks which radio can perform.

Stations are urged by NAB to get behind the plan in an effort to effect the entire distribution of the first printing as soon as possible. There is no doubt in our minds that several times five million copies can be distributed by an aggressive and concerted drive. This is based on the fact that every family has consciously or unconsciously asked the question, "What can I do?"

Stations can supply the answers by putting this booklet in every household in the United States.

No distribution cost should be assumed by stations. It should be paid for by local Office of Civilian Defense.

WSB TRIBUTE TO RADIO

A recent WSB three column institutional advertisement in the *Atlantic Journal*, headed "The Greater Obligation," has two paragraphs which point to the heights which broadcasting has attained. Here they are:

"Service to the nation is the privilege of every man, woman, and child. And in times like these, the privilege of service is sacred.

"Radio broadcasting has attained high stature in recent months—has become a dependence for the rapid and effective dissemination of information essential to the war effort."

WDRC DOOLITTLE VISITS NAB

Franklin M. Doolittle, president, WDRC, Hartford, visited NAB headquarters yesterday in behalf of the radio technician training program. Mr. Doolittle is industry representative for Connecticut.

DR. HOLLAND AT NAB

Dr. E. O. Holland, president, State College of Washington, Pullman, visited NAB headquarters this week. State College operates station KWSC.

ART HOLBROOK TO COAST GUARD

Art Holbrook, WIBW, Topeka, is due to report to the Coast Guard today. Good luck, Art.

AMERICAN EDUCATION WEEK 1942

EDUCATION FOR FREE MEN is the theme of the 22nd annual observance of American Education Week, Nov. 8-14. This theme is most fitting at a time when the entire world is at war to determine whether freedom or tyranny shall prevail among men.

American Education Week is a time for a concerted effort on the part of all school systems thruout the nation to help the public understand why education is more and not less important as a result of the urgency of the war effort. It is a time for interpreting to the people what the schools are contributing to the war effort and the part that they must play in the peace that is to follow after military victory is achieved.

The National Education Association has prepared materials to assist local school systems in the observance, among which are posters, leaflets, stickers, manuals, plays, and other materials. Write to the National Education Association, 1201 Sixteenth Street, N. W., Washington, D. C., for complete information.

IN MEMORIAM

Edward T. Hanover, General Manager of WHAM, Rochester, died while visiting at Alexandria Bay, New York, on Saturday, August 29. Mr. Hanover was 59 years old. He has been associated with Stromberg-Carlson for 41 years having come to that company at the age of 18 and been with them continuously since.

At the time of his death he was Vice President In Charge of Manufacturing and Broadcasting and a Director of the Company.

He was instrumental in fostering radio manufacturing and broadcasting by Stromberg-Carlson and played a large part in formulating the early policies of the industry in his capacity as a consultant with the original Radio Commission. He was born in Wisconsin and a graduate of the University of Wisconsin. Surviving are his widow and a mother and brother.

PER-INQUIRY REQUESTS

The France and Duff Advertising Agency, Lincoln, Neb., is seeking P-I deal for a hatchery client.

The Gibson Co., Harlan, Ia., "national distributor of many fast selling items," is soliciting P-I deals.

All stations are asked to continue reporting these P-I and free time "chisels."

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, September 7. They are subject to change.

Tuesday, September 8

Further Hearing

NEW—Beauford H. Jester, Individually and as Trustee for W. W. Callan, Dewitt T. Hicks, Hilton W. Howell, Wilford W. Naman, Robert G. Levy, Ross M. Sams and Davis Stribling, Waco, Texas.—C. P., **1230 kc.**, 250 watts, unlimited.

Wednesday, September 9

Further Hearing

NEW—Butler Broadcasting Corp., Hamilton, Ohio.—C. P. **1420 kc.**, 250 watts, unlimited.

Friday, September 11

WGKV—Kanawha Valley Broadcasting Co., Charleston, W. Va.—C. P., **1490 kc.**, 250 watts, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WNOX—Scripps-Howard Radio, Inc., Knoxville, Tenn.—Granted modification of construction permit (B3-MP-1627) for changes in directional antenna; on the Commission's own motion granted 30 day extension from September 17 for completion of construction.

WWRL—Long Island Broadcasting Corp., Woodside, Long Island, N. Y.—Granted in part modification of license to change hours of operation from sharing WLIB, to unlimited time, on present power of 250 watts (B1-ML-1101). Dismissed application for modification of construction permit (B1-P-3116) as modified, to extend completion date (B1-MP-1545).

DESIGNATED FOR HEARING

National Broadcasting Co., Inc., Portable or Portable-Mobile, area of San Francisco, Calif.—Designated for hearing application for construction permit for new relay broadcast station (B5-PRY-281).

National Broadcasting Co., Inc., Portable or Portable-Mobile, area of San Francisco, Calif.—Designated for hearing application for construction permit for new relay broadcast station (B5-PRE-429).

National Broadcasting Co., Inc., area of San Francisco, Calif.—Designated for hearing application for construction permit for new relay broadcast station (B5-PRY-284).

Blue Network Co., Inc., Portable-Mobile, area of San Francisco, Calif.—Designated for hearing application for construction permit for new relay broadcast station (B5-PRE-432).

W71RF—Rockford Broadcasters, Inc., Rockford, Ill.—Designated for hearing application for modification of construction permit (B4-MPH-24), pursuant to the Commission's Memorandum Opinion of April 27, 1942.

LICENSE RENEWALS

Granted renewal of following station licenses for the period ending in no event later than December 1, 1942:

KCRC, Enid, Okla.; WSPD, Toledo, Ohio.

Granted renewal of following station licenses for the period ending in no event later than February 1, 1943:

KAST, Astoria, Ore.; KGHI, Little Rock, Ark.; WMPC, Lapeer, Mich.; WTHT, Hartford, Conn.

Granted renewal of following station license for the period ending in no event later than April 1, 1943:

KWAT, Watertown, S. D.

Granted renewal of following station licenses for the period ending in no event later than June 1, 1943:

WBRK, Pittsfield, Mass.; WBRE, Wilkes-Barre, Pa.; WLAK, Lakeland, Fla.

Granted renewal of following station licenses for the period ending in no event later than October 1, 1944:

WADC, Village of Tallmadge, Ohio; WATR, Waterbury, Conn.; WGBF, Evansville, Ind.; WHIO, Dayton, Ohio; WORK, York, Pa.

Granted extension of following station licenses upon a temporary basis only, pending determination upon application for renewal of license, in no event later than November 1, 1942:

KAVE, Carlsbad, N. Mex.; KFXD, Nampa, Idaho; KGEK, Sterling, Colo.; KPDN, Pampa, Tex.; KVNU, Logan, Utah; KVOA, Tucson, Ariz.; KWOC, Poplar Bluff, Mo.; WAML, Laurel, Miss.; WBIR, Knoxville, Tenn.; WCAT, Rapid City, S. Dak.; WCLS, Joliet, Ill.; WGAU, Athens, Ga.; WFTM, Fort Myers, Fla.; WHBY, Appleton, Wisc.; WHOP, near Hopkinsville, Ky.; WINN, Louisville, Ky.; WINX and amplifier, Washington, D. C.; WJW, Akron, Ohio; WKST, New Castle, Pa.; WLOF, Orlando, Fla.; WNEL, San Juan, Puerto Rico; WOLS, Florence, S. C.; WOMT, Manitowoc, Wisc.; WPAX, Thomasville, Ga.; WPID, Petersburg, Va.

MISCELLANEOUS

KICD—Iowa Great Lakes Broadcasting Co., Spencer, Iowa.—Granted modification (B4-MP-1624) of construction permit (B4-P-3178) for extension of completion date to November 16, 1942.

KGLO—Mason City Globe-Gazette Co., Mason City, Iowa.—Granted modification (B4-MP-1626) of construction permit (B4-P-3269) for extension of completion date to October 27, 1942.

WNAX—WNAX Broadcasting Co., Yankton, So. Dak.—Granted modification (B4-MP-1568) of construction permit (B4-P-3288) for extension of completion date to December 7, 1942.

WNBP—Wylie B. Jones Advertising Agency, Binghamton, N. Y.—Granted license (B1-L-1702) to cover construction permit (B1-P-3185) as modified, authorizing change in frequency, increase in power, installation of new transmitter and directional antenna for night use, and move of transmitter, and change of studio from Arlington Hotel, 136 Chenango St. to 134 Chenango St., Binghamton; also granted authority to determine operating power by direct measurement (B1-Z-1431).

KPRC—Houston Printing Corp., Houston, Texas.—Granted license (B2-L-1512) to cover construction permit (B3-P-3791) as modified, for installation of directional antenna for night use, increase in power, and authority to determine operating power by direct measurement of antenna input (B3-Z-1239).

WOOD—King-Trendle Broadcasting Corp., Grand Rapids, Mich.—Granted modification (B2-MP-1621) of construction permit (B2-P-2874) for extension of completion date to 9-23-42.

WENK—WLEU Broadcasting Corp., area of Erie, Pa.—Cancelled relay broadcast station license authorization in accordance with licensee's letter of August 19.

WHEC, Inc., Rochester, N. Y.—Granted motion to dismiss without prejudice application for new relay broadcast station (B1-PRE-427).

WKBH—WKBH, Inc., La Crosse, Wisc.—Granted petition to dismiss without prejudice application (B4-MP-1502) for modification of license to extend completion date.

WOKO, Inc., Albany, N. Y.—Granted petition to dismiss without prejudice application (B1-PH-80) for new FM station.

KSOO—Sioux Falls Broadcast Association, Inc., Sioux Falls, So. Dak.—Granted petition to dismiss without prejudice application (B4-P-2667) for construction permit.

WBOC—The Peninsula Broadcasting Co., Salisbury, Md.—Granted motion to dismiss application (B1-P-3352) for construction permit.

WDAE—Tampa Times Company, Tampa, Fla.—Granted motion for 30-day continuance of hearing now scheduled for October 5; hearing to be held November 4.

Fort Hamilton Broadcasting Co., Hamilton, Ohio.—Denied petition for intervention in hearing on application for construction permit for new station filed by Butler Broadcasting Corp., Hamilton, Ohio.

Raymond C. Hammett, Talladega, Ala.—Granted petition for leave to amend application for new station to specify a used transmitter and related equipment; denied as to removal from hearing docket.

J. C. Kaynor, Ellensburg, Wash.—Granted petition for order to take depositions in re application for new station.

WLW—The Crosley Corp., Cincinnati, Ohio.—Granted petition for extension of time within which to file proposed amendment in re application in Docket 6341, and time for filing same extended to September 2, 1942.

KTRH Broadcasting Co., Houston, Texas.—Granted motion to dismiss without prejudice application (B3-PRE-426) for new relay station.

Houston Printing Corp., Houston, Texas.—Granted motion to dismiss without prejudice application (B3-PRY-274) for new relay station.

WSAV—WSAV, Inc., Savannah, Ga.—Withdrew motion to dismiss application (B3-P-3453) without prejudice.

W. A. Patterson, Chattanooga, Tenn.—Granted motion to dismiss without prejudice application (B3-PRY-278) for new relay station.

WAPO—W. A. Patterson, Chattanooga, Tenn.—Granted motion to dismiss without prejudice application (B3-P-3382) for construction permit.

KTRH Broadcasting Co., Houston, Texas.—Granted motion to dismiss without prejudice application (B3-PRY-276) for new relay station.

KVOE—The Voice of The Orange Empire, Ltd., Santa Ana, Calif.—Denied petition to grant application for a construction permit to change frequency from **1490 to 1480 kc.,** increase power from 250 watts to 1000 watts, and install new transmitter; and designated said application for hearing (B5-P-3482).

KSUB—Southern Utah Broadcasting Co., Cedar City, Utah.—Granted motion to dismiss without prejudice application (B5-P-3477) for construction permit; denied request for return of application to petitioner.

KHQ—Louis Wasmer, Inc., Spokane, Wash.—Passed over for a week motion for 30-day continuance of hearing now set for September 28 on application for construction permit.

W55NY—William G. H. Finch, New York City.—Granted petition for acceptance of appearance filed August 24, 1942, in re application for modification of construction permit (B1-MPH-104).

WABC—Columbia Broadcasting System, Inc., New York City.—Dismissed without prejudice conditional petition to intervene in the hearing on application of KDYL (B5-P-3303) for construction permit; exceptions noted.

KXKY—First National Television, Inc., Kansas City, Mo.—Granted in part petition to continue hearing now set for September 3 to September 16 only, instead of for 90 days, in re application for renewal of license.

Beauford Jester, individually and as Trustee for W. W. Callan, et al., Waco, Texas.—Granted request for continuance of hearing now set for September 8 to September 21, in re application for construction permit (Docket 6218).

APPLICATIONS FILED AT FCC

710 Kilocycles

KMPC—KMPC, The Station of The Stars, Inc., Beverly Hills, Calif.—Modification of construction permit (B5-P-2804 as modified), which authorized increase in power, installation of new transmitter, directional antenna and move of transmitter for adjustment of directional antenna system and extension of completion date.

KMPC—KMPC, The Station of The Stars, Inc., Beverly Hills, Calif.—License to cover construction permit (B5-P-2804 as modified) in accordance with above.

KMPC—KMPC, The Station of The Stars, Inc., Beverly Hills, Calif.—Authority to determine operating power by direct method.

740 Kilocycles

KTRH—KTRH Broadcasting Co., Houston, Texas.—Modification of construction permit (B3-P-3011 as modified), which authorized change in frequency, increase in power, installation of directional antenna for day and night use, new transmitter and move of transmitter requesting extension of completion date from 9-10-42 to 3-10-43.

1240 Kilocycles

WJRM—Allegheny Broadcasting Corp., Elkins, W. Va.—Modification of construction permit (B2-P-3328) which authorized construction of new standard broadcast station for approval of transmitter and studio sites and antenna. Amended: to change transmitter site to east of U. S. Route 219 and Western Maryland railroad and near Northern Corporate limits of Elkins, W. Va., and changes in antenna system.

1290 Kilocycles

WNBF—Wylie B. Jones, Advertising Agency, Binghamton, New York.—License to cover construction permit (B1-P-3185 as modified) for changes in frequency, increase in power, installation of new transmitter, directional antenna for night use, and move transmitter and studio.

WNBF—Wylie B. Jones, Advertising Agency, Binghamton, New York.—Authority to determine operating power by direct method.

1320 Kilocycles

KXYZ—Harris County Broadcast Co., Houston, Texas.—Modification of construction permit (B3-P-3016 as modified), which authorized change in frequency, increase in power, move of transmitter, installation of new transmitter and directional antenna for night use for extension of completion date from 9-9-42 to 1-20-43.

WJAS—Pittsburgh Radio Supply House, Pittsburgh, Pa.—Modification of construction permit (B2-P-2947 as modified), which authorized increase in power and installation of directional antenna for night use, requesting extension of completion date from 9-27-42 to 11-27-42.

1400 Kilocycles

KFVS—Oscar C. Hirsch, trading as Oscar C. Hirsch Battery and Radio Co., Cape Girardeau, Mo.—License to cover construction permit (B4-P-3503), which authorized changes in transmitting equipment.

KFVS—Oscar C. Hirsch, trading as Oscar C. Hirsch Battery and Radio Co., Cape Girardeau, Mo.—Authority to determine operating power by direct method.

KVGB—Helen Townsley, Great Bend, Kansas.—Construction permit to move transmitter 38 feet, 6 inches (same address).

1420 Kilocycles

WOC—Tri-City Broadcasting Co., Davenport, Iowa.—Modification of construction permit (B4-P-2288 as modified), which authorized changes in frequency, increase in power, move transmitter, install new transmitter and directional antenna for day and night use, requesting extension of completion date from 9-19-42 to 10-19-42.

1450 Kilocycles

KMYC—Marysville-Yuba City Broadcasters, Inc., Marysville, Calif.—Authority to determine operating power by direct method.

1490 Kilocycles

KPAB—Mervel M. Valentine, Laredo, Texas.—Voluntary assignment of license to Laredo Broadcasting Co.

NEW—Laredo Broadcasting Co., Laredo, Texas.—Construction permit for new standard broadcast station to be operated on **1490 kc.,** 250 watts, unlimited time.

WRGA—Rome Broadcasting Corp., Rome, Ga.—Authority to determine operating power by direct method.

FM APPLICATIONS

W65H—WDRC, Inc., Hartford, Conn.—License to cover construction permit (B1-PH-35 as modified), which authorized construction of new high frequency broadcast station.

W71NY—Bamberger Broadcasting Service, Inc., New York, N. Y.—License to cover construction permit (B1-PH-46 as modified), which authorized construction of new high frequency broadcast station, in part in accordance with Commission action of 8-4-42.

W45CM—WBNS, Inc., Columbus, Ohio.—License to cover construction permit (B2-PH-8 as modified), which authorized construction of new high frequency broadcast station, in part in accordance with Commission action of 8-4-42.

W73PH—Wm. Penn Broadcasting Co., Philadelphia, Pa.—License to cover construction permit (B2-PH-118), which authorized construction of new high frequency broadcast station, in part in accordance with Commission action of 8-4-42.

W49BN—Wylie B. Jones Advertising Agency, Binghamton, N. Y.—License to cover construction permit (B1-PH-10, as modified, which authorized new high frequency broadcast station), and for change in location of studio from 136 Chenango St., Binghamton, N. Y., to 134 Chenango St., Binghamton, N. Y.

W67C—Columbia Broadcasting System, Inc., Chicago, Ill.—License to cover construction permit (B4-PH-57) as modified, which authorized a new high frequency broadcast station, in part, in accordance with Commission action of 8-4-42.

TELEVISION APPLICATIONS

W9XBB—Balaban & Katz Corp., area of Chicago, Ill.—License to cover construction permit (B4-PVB-78) as modified, which authorized a new experimental television relay broadcast station.

W9XPR—Balaban & Katz Corp., Chicago, Ill.—License to cover construction permit (B4-PVB-79) as modified, which authorized a new experimental television broadcast station.

MISCELLANEOUS APPLICATIONS

KEJM—Perkins Brothers Co. (The Sioux City Journal), area of Sioux City, Iowa.—Modification of license to change corporate name to Perkins Brothers Company.

WBEE—Worcester Telegram Publishing Co., Inc., Worcester, Mass.—License to cover construction permit (B1-PRY-266 as modified), which authorized construction of new relay broadcast station.

W2XYP—Columbia Broadcasting System, Inc., New York, N. Y. License to cover construction permit (B1-PRE-386) as modified, which authorized a new ST Broadcast station. Amended: to delete request for **333400** and **336400 kc.**

W47P—Walker & Downing Radio Corp., Pittsburgh, Pa.—Modification of license to change corporate name to WWSW, Inc.

W8XAL—The Crosley Corp., Cincinnati, Ohio.—Extension of special experimental authorization to operate on **6080 kc.,** 1 KW, sharing time with WLWO, and A0 and A1 emission for identification purposes only.

W1UC—University of Illinois, Urbana, Ill.—License to cover construction permit (B4-PED-21 as modified), which authorized construction of new non-commercial educational broadcast station.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

American Cigarette and Cigar Co., Inc., manufacturer and distributor of "Pall Mall Cigarettes," and The American Tobacco Co., manufacturer and distributor of "Lucky Strike Cigarettes," are charged in complaints with misrepresentation in the advertising of their cigarettes. (4826-4827)

Atlantic Packing Company—Samuel Perloff, Harry Perloff, Earl Perloff, and Morris Perloff, trading as Atlantic Packing Co., and Atlantic Packing Co., Distributors, 919 North Front St., Philadelphia, engaged in the wholesale distribution of canned foods, are charged in a complaint issued with misrepresentation. (4822)

Club Razor & Blade Manufacturing Corp., 36 Green St., Newark, N. J., engaged in the manufacture and sale of safety razor blades, is charged in a complaint with misrepresentation. (4820)

Fraering Brokerage Co., Inc., 423 South Front St., New Orleans, with branch offices and warehouses at Alexandria, La., and Jackson, Miss., is charged in a complaint with violation of the brokerage section of the Robinson-Patman Act. (4823)

Siegel & Alenikoff, 520 Eighth Ave., New York, engaged in the manufacture and sale of women's textile coats and other garments, are charged in the complaint with misrepresentation. (4824)

Southgate Brokerage Co., Inc., 249 West Taswell St., Norfolk, Va., which also operates branch offices and warehouses at Winston Salem, Charlotte, Wilmington, and Greensboro, N. C., is charged in a complaint with violation of the brokerage section of the Robinson-Patman Act. (4821)

Edward Wemett & Co., 1612 South San Pedro St., Los Angeles, engaged in the sale of medicinal preparations designated "Wemett's Salve" and "Wemett's Ointment," is charged in a complaint with false advertising and misrepresentation. (4825)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Reilly Tar & Chemical Corp., Indianapolis, engaged in the manufacture and sale of various coal tar products, including one designated "Reilly Transote," formerly designated "Reilly Transparent Penetrating Creosote," recommended as a treatment for wood building construction and for the soil on which a termite-infested building stands, has stipulated that in advertising its product it will discontinue any representation conveying the belief to purchasers that the repellent effectiveness of "Reilly Transote" is of such permanence as to assure against all future termite infestations and decay, or is such as will afford permanent or complete protection against termites and decay irrespective of the lapse of time. The respondent also agrees to cease any representation implying that tests of the product have been made by the Termite Investigations Committee of California which were of such scope or time coverage as to warrant the inference that the effective value of the product would remain unimpaired or endure as complete protection against termites, irrespective of the lapse of time. (3520)

Shalem & Co., 244 Fifth Ave., New York, engaged in the importation and sale of Chinese decorative cloths and merchandise, has stipulated to desist from the use on labels affixed to their products, or in any other way, of the word "linen" either alone or in connection with the word "pure" as descriptive of products not made from the fiber of flax, from the use of the word "linen" in any way so as to convey the belief that products made from other than flax fibers are made from flax fibers. (3519)

Alexander Smith & Sons Carpet Co., Yonkers, N. Y., with sales offices at 295 Fifth Ave., New York, and C. H. Masland & Sons, trading as Masland Wilton Mills, Philadelphia and Carlisle, Pa., engaged in the sale and distribution of rugs, have stipulated to cease and desist from use of the words or names "Kirman," "Sarouk" or other distinctively Oriental name or word or simulation thereof as a designation for or as descriptive of rugs which are not in fact made in the countries or localities so designated or implied and which do not contain all of the essential characteristics and qualities of genuine Oriental rugs; unless, if properly used to designate the pattern or design only, such words are immediately accompanied in equally conspicuous type by such words as "design" or "pattern" so as to indicate clearly and definitely that only the design or pattern delineated on the surface of the rug is a likeness of an Oriental design or pattern as, for example, "Kirman design" or "Sarouk pattern." (3521)

Spers Company, Le Center, Minn., engaged in selling a rat poison designated "Rat-Rid," stipulated to cease representing that the product is completely safe or non-poisonous to children, pets, livestock or poultry; that rats eating the product leave the premises to die, or that they require no handling or leave no odor, and that the product is an effective poison for mice. They further agree to cease use of the designation "Rat-Rid" as the name for the product, or otherwise representing that its use will rid premises of rats. (03042)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

T. H. McKenna, Inc., et al.—Three corporations engaged in wholesaling and retailing medical books have been ordered to cease and desist from entering into or carrying out any mutual agreement to fix or maintain prices or to establish or control the territory in which they sell such books.

The order is directed against T. H. McKenna, Inc., New York; Chicago Medical Book Co., Chicago, and J. A. Majors & Co., Dallas, Tex. These dealers, the Commission found, are the largest wholesale distributors of medical books in the New York area, the Middle West, and the South and Southwest, respectively. (3558)

Princess Yarn Co., 49 Essex St., New York, have been ordered to cease and desist from certain misrepresentations concerning their products. The Commission found that the respondents falsely represented in catalogs the constituent fibers or materials of which their yarns are made. (4631)

FTC DISMISSES CASE

The Federal Trade Commission has ordered that complaints issued by it against Granite Railway Co., 1245 Hancock St., Quincy, Mass., and J. S. Swingle, Inc., 327 Willard St., Quincy, Mass., be dismissed.

Both corporations are engaged in the quarrying, distribution and sale of granite blocks to be manufactured into monuments. The complaints had alleged that advertisements circulated by the corporations representing their product as "Everlasting" were misleading.

NAB Reports
The NATIONAL ASSOCIATION OF BROADCASTERS
1626 K STREET, N. W. WASHINGTON, D. C. Vol. 10, No. 36, September 11, 1942

Selective Service

We print below a suggested statement to serve as the basis for filling out Selective Service Form 42-A or an attachment thereto for submission to local Draft Boards. This draft is not intended for use in its entirety, but should be modified and adapted to serve the requirements of the individual case. Paragraphs not applicable in a given case should be deleted and other pertinent information should be added.

For procedure to secure temporary deferment to "key" men, see NAB Reports, July 17, p. 435.

I

This plea is not for the individual registrant concerned, but rather is made on the basis of his qualifications and consequent usefulness in the radio broadcasting industry which has been designated by National Headquarters of the Selective Service System, in its memorandum of July 11, 1942, to local boards, as an industry "essential to the support of the war effort."

The probability is that as time goes on, radio broadcast stations will become more and more essential,—increasingly so if the war approaches our shores,—and it appears obvious that an essential industry should be operated at maximum efficiency. Further, in the interest of such efficiency it follows that, owing to the highly specialized nature of broadcasting from the technical, legal, business and public relations standpoints, trained and efficient personnel is indispensable.

II

As an example of the importance of radio to the war effort, the attached exhibit shows the amount of time given freely by radio stations at the Government's request, in a recent three months' period to promote recruiting, the sale of bonds, etc. (Submit copy of p. 529, NAB Reports of Sept. 4. Reprints available at NAB upon request.)

III

In all military defense areas the operation of radio broadcast stations has been placed directly under the authority of the Commander responsible for the defense of the area involved. Certain stations have been designated as "key" stations and required to operate twenty-four hours daily, other stations are required to keep tuned to the key stations at all times. These operations are deemed essential by the military authorities in combating enemy air raids.

IV

Radio is only effective if it is able to maintain its listening audience and this requires efficient operation. Amateurish, untrained announcers can only influence people to turn their radios off. News editors unfamiliar with the technicalities of censorship may only succeed in relaying information of value to the enemy. The technicians at a broadcast station are in effect the stage managers of the show and much of the appeal of radio entertainment is due to the skill with which they do their work. Just as a motion picture of great artistic merit could be ruined and without appeal if the camera men were technically unskilled, so could the creation of a great radio script writer be valueless without skilled technical personnel to see that it is properly broadcast.

V

Due to the unavailability of spare parts and tubes and the rapid depreciation of equipment which cannot now be replaced, the radio broadcasting industry is currently operating within a narrow margin of safety. Breakdowns and technical interruptions will inevitably become increasingly frequent. The technical staff is responsible for the smooth operation of the station and repairs of breakdowns. Most stations have only one technician on duty at key points and during his hours of work he is solely responsible for repairs. Just as a chain is only as strong as its weakest link, the continuous operation of a station may depend at any time on the skill of any individual technician at any given point. The ability of a technician to make rapid and effective repairs is dependent upon his basic knowledge of fundamental principles, his familiarity with the wiring, lay-out and construction of the smallest detail of the entire plant and his natural aptitude to diagnose trouble. It has been said that good radio repairmen are born, not made. This is no doubt due to the fact that a peculiar process of mental reasoning is necessary to analyze and correct technical difficulties hence the successful training of replacements can only be determined after the individual trainee has progressed a great way in his studies. It is common knowledge in the industry that only a small percentage of the graduates of technical schools possess the aptitude for making speedy repairs of intricate radio equipment as well as practical, everyday operation of a radio station.

VI

The efficiency of any organization bears a direct relationship to the caliber of the management. Broadcasting is a complex industry embracing many highly specialized fields. The manager of a broadcast station should have considerable knowledge of music, the dramatic arts, literature, public relations, advertising, merchandising, the technical phases of radio, law, news reporting and general business practice. From the foregoing it can easily be recognized that replacement of top flight radio executives is virtually impossible, during the present emergency.

VII

The industry, in recognition of its obligation to supply radio technicians for the armed forces, assisted through its trade organization, The National Association of Broadcasters, is inaugurating training courses. Over 20,000 students have been enrolled in over 800 classes in 46 states. These courses, while intended primarily to train personnel for the military and for essential war production of radio equipment, will produce a certain number of apprentice technicians for radio stations. However, graduates from these thirty-two week courses are in no sense equipped to handle responsible technical jobs in a radio station. At least 6 to 8 months of specialized experience and training in a station

SELECTIVE SERVICE

(Continued from page 539)

before they can be entrusted with even minor responsibilities is needed.

VIII

Prior to the war the Federal Communications Commission required all broadcast stations to have an operator holding a first class radio telephone operator's license on duty at the transmitter at all times. The Commission recognizing the present shortage of licensed operators has modified its Rules under Order No. 91B. This Order permits stations to be operated by a holder of a restricted radio telephone operator's license subject to the supervision and immediate availability in case of emergency of an operator holding the usual first class license. Under no circumstances does the Commission permit stations to be operated by unlicensed persons. Although stations are required by law to have only one first class radio telephone operator available at all times this represents a minimum legal requirement and should not be construed as an indication that it is practical to operate on this minimum basis. Order No. 91B specifically states that in case of a breakdown of the broadcast equipment repairs and adjustments can only be made by a holder of the first class radio telephone operator's license. (At this point in your letter to the Local Draft Board outline in detail the minimum requirements of your station for technicians and the reasons for arriving at this minimum taking into consideration hours of operation, station power and plant arrangement.)

HAVE YOU WRITTEN LETTER FOR ARMY AIR FORCES?

Have you written the letter that the Army Air Forces asked each broadcaster to write? The request is found on page 531 of last week's NAB Reports.

If you have not written this letter, we strongly urge you to do so today. Four or five hundred such letters will help get this program in high gear.

Right now a force of extra recruiting personnel is in the field literally scraping the bottom of the barrel for trained and semi-trained radio technicians for immediate enlistment.

In a very few weeks there aren't going to be many available radio technicians left anywhere in the United States.

How Do You Stand?

Will you be able to carry on when the going gets tougher? If there isn't a class in the Fundamentals of Radio in your territory or in your hometown to take care of present and prospective needs, we urge as strongly as we know how that you get busy and arrange for such a course.

On Thursday of this week, Dean Crothers of the Engineering, Science and Management War Training was queried as to whether there had been any changes for admission to such classes. He said "no." Courses are open to qualified civilians as well as to enlisted reserves. He expressed the opinion, however, that students enrolled should be of military caliber and headed for the military or for industry. That's the latest advice from the U. S. Office of Education.

Schools Originate Proposals for Courses

The application for a course originates in the field with an educational institution not in Washington. Proposals for courses are sent in by properly qualified engineering schools. The place to start negotiations for a course in Fundamentals of Radio is with the Institutional Representative of a university or college having an engineering department or with the Dean of the engineering school or the President if you happen to know either of them. Some few non-engineering schools giving majors in physics, like University of Chicago and University of Buffalo, are likewise eligible for direct contracts with ESMWT. Most classes are given off campus and in cities many miles remote from the sponsoring institution—where sufficient qualified students may be recruited.

Many engineers and technicians at radio stations make good instructors for these classes. They are paid for their work of teaching just as any instructor, after approval by the educators.

In our eagerness to help the country win the war we must have capable technical personnel. Otherwise the industry would fold up and be unable to help any longer.

If women are going to ferry airplanes from factory to the take-off points you can bet your last dollar they're going to be employed as broadcast technicians when they learn how. Courses are open to both men and women and enlisted reserves.

"THIS WAR IS RUN BY RADIO."

NAB BOARD MEETING

A meeting of the NAB Board has been set tentatively for September 24-25 at the Palmer House, Chicago. Developments in the musicians situation will determine whether the meeting will be postponed to October 1-2.

DOROTHY LEWIS TOUR

Mrs. Dorothy Lewis, NAB Director of Listener Activity, leaves New York next week for an extended tour of the nation. In the course of the trip, itinerary of which is printed below, Mrs. Lewis will meet with radio station operators, station directors of women's activities, schools and colleges, with radio councils and with civic groups to organize such councils.

Among the subjects which Mrs. Lewis will discuss and upon which conferences will be held are: "Children in Wartime," "Radio's Major Role in the War," "Layman's Place in American Radio."

Conferences are scheduled in many places where she will visit and the foregoing subjects will be the theme. She will address the Minnesota Federation of Women's Clubs at Mankato, the University of Minnesota Conference on the "Layman's Place in American Radio." She will visit Winnipeg and Vancouver, Canada, under the auspices of the Canadian Broadcasting Corporation and the Canadian Association of Broadcasters. She will also be in attendance at the Chicago Educational Conference.

This will be the third annual tour which Mrs. Lewis has made under the auspices of NAB. As a result of her first tour, the very splendid book, "Broadcasting to the Youth of America," was issued. This has proven very helpful to station operators, radio listeners and school people. The itinerary follows:

September 18, Syracuse; September 19, Cleveland; September 20, Chicago (Quiz Kids—Guest); September 21, Toledo; September 22, Milwaukee; September 23-24, Mankato; September 25, Minneapolis; September 26, Minneapolis (Educational Conference); September 27, to Winnipeg; September 28, Winnipeg; September 29, to Fargo; September 30, Fargo.

October 1-2, Omaha; October 3, Des Moines (luncheon—Educational Conference); October 4, to Kansas City; October 5, Kansas City; October 6, Wichita; October 7, Denver; October 8, Boulder (Educational Conference); October 9, Salt Lake City; October 10, Provo (Educational Conference); October 11, Salt Lake City; October 12, Salt Lake City—Ogden; October 13, Pocatello; October 14, to Missoula; October 15, Missoula; October 16. Spokane; October 17, Seattle (Educational Conference); October 18, to Vancouver, B. C.; October 19, Vancouver, B. C.; October 20, Seattle; October 21-22, Portland (Educational Conference); October 23, Sacramento (dinner conference); October 24, Oakland and Berkeley (Mills College Conference); October 25-26, San Francisco; October 27, Fresno; October 28-29 Los Angeles; October 30, Los Angeles (conference New England Women—West Coast); October 31, Los Angeles.

November 1-5, Los Angeles; November 6, Los Angeles (Educational Conference); November 7, Los Angeles (Tea); November 8, to Phoenix; November 9, Phoenix; November 10-11, to Chicago; November 12-13, Chicago (Chicago Educational Conference); November 14, Davenport, Iowa; November 15-17, Iowa City, Iowa; November 18, Rockford, Illinois; November 19, Peoria, Illinois; November 20, Nashville (Educational Conference); November 21, Louisville; November 22, Washington, D. C.; November 23, New York.

Listener Activities

RADIO SERVES NATIONAL ORGANIZATIONS

The use of radio by national organizations has presented many problems both to network officials and to local station managers. Most of these organizations are staffed by voluntary workers, and, in many cases, without previous radio experience. The result has been a severe problem to radio executives, and unsatisfactory performances to the laymen concerned. It is encouraging to know that a number of such national bodies are streamlining their radio activities in an attempt to do a more effective job. The National Girl Scouts, Incorporated, have done an extraordinary thing in securing from the DuPont Company and its advertising agency, Batten, Barton, Durstine and Osborne, the permission to use the "Cavalcade of America" recordings with the advertising deleted and the Girl Scout propaganda inserted. To date, 130 Councils have rented the series which means that 16% of all the radio stations in the country have signed up. A recent check by letter through the Coordinator of Listener Activities resulted in responses from over 50% of the stations using this program. Below are quotes from some of the letters received.

"I have found that the program series was well received. We naturally tied in with local leaders—mayor, etc.— so that there was a personal, homey touch. Our dramatic director coached the Scouts and local people before making the weekly transcriptions. The girls felt they would prefer transcriptions to a live appearance so that they could hear themselves." (Ed. This is the only case that has come to our attention where the local "live" script was transcribed.)

"We received numerous telephone calls the week following the last broadcast from listeners wanting to know why the show wasn't on. We regret that the series was so limited."

"We found the transcribed series excellent and the local Girl Scout council serviced the program in a commendable fashion. To the best of our knowledge the program was well received by the public—one listener sending in an unsolicited $25 contribution to the local council."

"Even though we didn't set any new world's records for attracting listeners to these broadcasts, we feel that the whole field of public service broadcasting will benefit if more shows of this type are made available. Too much public service broadcasting is amateurish, and this project looks like a long step toward the solution of that particular program."

"We did not have, nor did we expect, much cooperation from the local Girl Scout organization. Our relations with them are extremely friendly, but, through no fault of their own, the local organization does not have the least idea of how to make available use of the free service at their disposal through broadcasting. . . . They seem to be afraid to ask us for any cooperation and most of the time do not know what they want. . . . This lack of appreciation of how to use radio is something that needs immediate correction. Our local group is so accustomed to being turned down by our own newspaper that they are very timid about approaching us and we practically have to force our attentions on them."

"I cannot conceive of a more fundamentally sound method to inculcate the finest traditions of American manhood and womenhood into these fine young folks. It is my frank opinion that the very fine, intelligent cooperation given by the Girl Scout organization here to this series, as outlined above, does warrant the time and expense of carrying this program."

"Since you ask for a frank comment concerning the question of the use of radio as a medium for your program, I would certainly suggest that you utilize such shows as the 'Cavalcade of America' and not depend upon local talent. We have done three 'Live' shows for your organizations recently, and with all due respect to the girls, it is only natural that the result is an amateur effort and is undoubtedly listened to only by the proud parents of the participants."

At Davenport, Iowa, WOC accepted the program and the following arrangements were made:

Each of the three councils was responsible for two programs—for incorporating local interest into the live scripts furnished by National, for selecting an important civic person and a Girl Scout representative to deliver these two talks, and for rehearsing and taking charge of the program.

"The following publicity campaign took place preceding and during the broadcasts:

Essay Contest: "Which Broadcast I Like Best and Why." This was announced at the leaders' meeting. Leaders not present were contacted personally by a member of the Cavalcade Committee. A Judging Committee was announced, and the contest divided into three classifications—for Brownies, Intermediates and Seniors. Nine prizes were donated by the department store, all articles from the Girl Scout department, and they were prominently displayed with a sign calling attention to the 'Cavalcade' programs and the contest.

Newspaper Stories and Pictures: Before and during the series. Also a story in the Girl Scout Regional Journal.

Churches: Each church was contacted and the following announcement inserted in their bulletins: 'Girl Scouts, Parents and Friends: Tune in to WOC every Sunday night at eight o'clock from February 15 to March 22 and listen to "Cavalcade of America" broadcasts, an interesting and historical program.'

Spot Announcements: Every sponsor of programs over WOC was contacted relative to granting permission for a little free time for spot announcements, both prior to and during the broadcasts. Each responded graciously and eleven sponsors gave space on his programs, which covered morning, afternoon and evening hours. Each time a differently worded 'boost' was given our 'Cavalcade' program."

Other national organizations will learn much from the experience of the Girl Scouts in this unusual project and should find the comments of radio station managers enlightening.

ORDER 4 MILLION MORE COPIES OF "WHAT CAN I DO"

The speed and aggressiveness with which the broadcasters put into execution of the suggested plan for distributing "What Can I Do" booklets for OCD, increased the original print order by four million. This happened in less than a week's time after the mailing of the folio on August 29.

Entirely new to OCD operation is the speed with which this national campaign was launched and gotten under way by the broadcast industry. Because of the personal attention which broadcasters gave to the matter all delay was eliminated.

Several cities were reported whose local OCD did not know about the campaign. Naturally they got busy the minute the news was brought to them by the stations. For all this "extra" help, OCD is greatly appreciative.

New Haven Plan

In New Haven, Conn., the metropolitan area was divided into six zones. Each day requests for "What Can I Do" booklets, received from listeners, are distributed to the proper zone. Wardens make the delivery in person. They do this in New Haven because booklet delivery enables the wardens to make an additional contact with residents in their immediate communities. The booklets are mailed to all people living outside of the six zone area. This is all according to information received from James T. Milne, manager, WELI, who is also local OCD radio chairman.

Though only 12,000 booklets were on hand at the beginning of the campaign, Sept. 8, Mr. Milne was assured that he would receive as many booklets as he could give away in the metropolitan New Haven area with its 165,000 population.

Out in Logan, Utah, where the Cache County Defense Council is temporarily short of funds, the Council and Reed Bullen, manager, KVNU, decided on using the manpower of the public schools for delivery purposes.

Schools Help

Booklets were placed in the hands of principals of every school in the county. Each child takes one home to his parents and delivers as many others as are needed to cover any families, in their vicinity, without children in school. Teachers are told to impress upon the children the importance of everyone receiving one of the booklets and of reading it from cover to cover.

In order that this might be impressed further upon the minds of all of the people in the station's service area, KVNU is running a heavy campaign, advising parents to get this booklet from their children, etc., and telling why it is important that it be read.

Counties other than Cache, covered by KVNU, are being contacted and arrangements made to assist in this promotion.

A large number of letters have been received from stations which reflect the appreciation of local OCD Councils for the information that as many copies of "What Can I Do" would be available as could be used without waste.

This information reached the councils in cities having broadcast stations without having to be fanned down from the state organization which takes considerable time. Consequently, the industry was able to contribute in another way to the speed-up of distribution.

In only one or two instances has it been reported that local councils are without means for mailing the booklets. If any other stations encounter similar situations notify Arthur Stringer at NAB headquarters.

NEW HIGH IN NAVY RECRUITING

During August, 1942, Navy made a new high in recruiting. The exact figure for the month is confidential but informed broadcasters will get an idea of the number from a statement of Admiral Randall Jacobs, Chief of Naval Personnel. He said that the Navy is now enlisting the equivalent of a peacetime Navy a month.

Lt. Comdr. Dudley A. White, Bureau of Naval Personnel, said that the aggressive part played by the broadcast industry played a prominent part in making the record possible.

COAST GUARD HAS STIFF QUOTA

A folio of Coast Guard announcements for suggested use during September and October will be mailed all stations this week.

This fighting force has a stiff quota to meet which it is confidently expected will be met with the usual assistance given by the industry.

BUY A BOND—$18.75 UP

Charlie Zurhorst, promotion manager, WOL, Washington, wonders whether it wouldn't be a good idea to intersperse announcements on bonds with an announcement on a single bond.

Most everybody has to start with one bond, says Charlie, so why not say, "Buy a bond tomorrow (today)—$18.75 up."

NEW WBZ PUBLICITY MANAGER

George W. Slade is the new publicity manager of WBZ-WBZA, Boston and Springfield, according to Cy Young, general manager. He replaces Eugene Stafford who has entered the armed forces.

PACE IS NEW CHIEF ENGINEER AT WFBC

New Chief Engineer at WFBC, Greenville, S. C., is Wilson Pace. He replaces Hubert Brown who has joined the technical staff of WKRC, Cincinnati.

LEE DE FOREST REPLIES

Responding to a telegram of congratulations sent by President Neville Miller (NAB Reports, page 520), Lee de Forest has written the following letter:

"I very much appreciate the warm telegram of birthday greetings which you were so thoughtful as to send me.

"I was never in better health and strength than I am now, and judging from the way I feel and work at the present time I may hope to live to see the '69' reverse itself!

"Rest assured that one reason for my present condition is the deep and unending satisfaction which comes to me daily as I realize what radio broadcasting has done, and is continually accomplishing, in the way of aid to the war effort of the United Nations, confident that in the years to come it will prove a most powerful factor in the maintenance of World Peace."

OWI CAMPAIGN

A campaign announced by the Office of War Information designed to inform the American people of the facts of the war effort of the United Nations, originally announced in NAB Reports, page 519, has been revised. As a result of the excellent advice given by stations and because of the fact that other campaigns of an important nature are coming up, the number of daily announcements has been cut from 10 to 6.

Some misgivings were had on the part of station managements in cities in which several stations are located, over the effect of 10-a-day announcements on every station. OWI has cut the number of announcements to 6 but urgently requests that every station schedule these 6 announcements daily. The subject was given careful consideration at a conference held in Washington on Tuesday and it was the consensus that the best results can be obtained if all stations will cooperate fully. This they are urged to do.

PER-INQUIRY REQUESTS

The Radio Book Club, 80 Arden St., New York City, Emanuel Demby, Radio Director, is soliciting stations on a P-I deal. Although the publicity states that this is not a pre-inquiry deal in the full sense of the word, it is just that in every sense of the word. It is exactly this kind of deal that the Broadcast Advertising Department has sought to eliminate from radio stations. A letter has been written to Mr. Demby.

The United Advertising Co. is at it again, this time in behalf of the Skrudland Photo Service. In their letter they state that "over 28 radio stations of varying power" are carrying these per-inquiry deals. This is rather disappointing considering the efforts that have been made to eliminate this method of using radio.

RADIO ARTISTS VOLUNTEER

The Office of War Information Wednesday announced that top-flight radio artists of the country had offered their services to the Government in war work under the direction of the OWI.

A three-way plan, under which the talent of these stars will be utilized, was submitted to OWI by Kay Kyser who is forming a "Committee of 25" leading radio performers.

At noon Wednesday acceptances had been received by OWI from Jack Benny, Edgar Bergen, George Burns, Gracie Allen, Nelson Eddy, Clifton Fadiman, Jean Hersholdt, Frank Morgan, Hal Peary, Lanny Ross and Major Bowes. Others invited by Kyser were Mr. and Mrs. Goodman Ace, Fred Allen, Amos and Andy, Bob Burns, Eddie Cantor, Bing Crosby, Bob Hope, Andre Kostelanetz, Fibber McGee and Molly, Edward G. Robinson, Red Skelton, Kate Smith, Fred Waring, William Abbott and Lou Costello.

The "Committee of 25" will meet for the first time at a series of conferences to be held by OWI with networks and advertising agencies in New York, September 18; Chicago, September 21; and Hollywood, September 24 and 25.

The OWI stated that as the war reaches deeper into American lives there is an increasing need for the government to maintain personal contact with its armed forces, its labor forces, and its home front forces through messages of information and inspiration. The Office is aware, and deeply appreciative, of the individual contributions already made by radio talent, but feels that a united group of performers can effectively aid the OWI in the great job ahead.

Members of the group are already touring Army and Navy camps here and abroad, and performing valuable service through their radio programs by speaking to the country on such important war topics as Salvage, Bonds, Recruiting, Rationing, etc. The OWI stated that the group would also donate much time and effort in personal appearances before war plant workers, carrying to them not only entertainment but information on the progress of the war.

The "Committee of 25" will work in close cooperation with four other committees which have greatly aided the OWI in the effective use of radio for war time information. These four comprise a network committee: a committee of government radio chiefs; the Advertising Council Committee in New York, Chicago and Hollywood; and a committee of leading radio station operators.

FEDERAL COMMUNICATIONS COMMISSION

FCC OPERATOR EXAMINATIONS

Examinations for operators' licenses are held regularly at FCC District Headquarters' Offices throughout the country. Recently, to expedite the granting of new licenses, additional examination points were established. Exact dates on which examinations are to be held at these points have not as yet been determined. Applicants should obtain further information regarding the exact dates by corresponding with the inspector in charge of the district in which an examination point is located.

The additional examination points together with the approximate dates of the next examinations are indicated as follows:

Williamsport, Pa.—November 1942-May 1943.

INSURANCE RATES DROP

The Employers Liability Assurance Corporation have reduced the rates for their Broadcasters Liability Insurance policy (NAB REPORTS, November 7, 1941, p. 834). The new rates are as follows:

	Full Cover	Full Cover Except Literary and Dramatic	Full Cover Except Network	Cover Excluding Network and Literary and Dramatic
1st $25,000	4%	3½%	3%	2½%
Next $25,000	2½%	2¼%	2%	1¾%
Next $50,000	2%	1¾%	1½%	1¼%
Over $100,000	1¼%	1%	⅞%	¾%

The above rates are based on 15% participation by the insured in all cases and the minimum amount of insurance which can be written on this type of policy is $10,000.

The experience on the insurance written during the past year has been satisfactory, it is reported, which resulted in the company's willingness to reduce rates. On a sufficiently larger volume of this business, it is said, it is altogether possible that the rates may be further reduced at some future date.

920 STATIONS

During the month of August, 1942, the Federal Communications Commission granted one permit for the construction of a new station and issued operating license to one station. One operating station and one CP station were deleted. A comparative table by month follows:

	Sept. 1	Oct. 1	Nov. 1	Dec. 1	Jan. 1	Feb. 1	Mar. 1	Apr. 1	May 1	June 1	July 1	Aug. 1	Sept. 1
Operating	859	869	877	882	887	891	893	897	899	906	906	905	905

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, September 14. They are subject to change.

Monday, September 14

WCOP—Massachusetts Broadcasting Corp., Boston, Mass.—C. P., **1150 kc.**, 1 KW, DA-night, unlimited.

Wednesday, September 16

KXKX—First National Television, Inc., Kansas City, Mo.—Renewal of license, **1590 kc.**, 1 KW, unlimited.

Thursday, September 17

WORK—York Broadcasting Co., York, Pa.—Modification of C. P., **1350 kc.**, 1 KW, DA-night, unlimited.

Friday, September 18

NEW—WCAU Broadcasting Co., Philadelphia, Pa.—C. P., **84000** to **90000 kc.**, ESR-1128, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KICD—Fred A. Gefke (Transferor), L. W. Andrews (Transferee), Iowa Great Lakes Broadcasting Co. (Permittee), Spencer, Iowa.—Granted consent (B4-TC-307) to the acquisition of control over Iowa Great Lakes Broadcasting Company by Lawrence W. Andrews, by purchase of 140 shares of the unissued common stock and 120 shares of the unissued preferred stock of the licensee, for a consideration of $3,500 for the Common and $3,000 for the preferred stock.

Columbia Broadcasting System, Inc., New York City.—Granted extension of authority under Sec. 325(b) of the Act to transmit programs to Stations CKAC, Montreal, Canada. CFRB, Toronto, and other stations under the control of the Canadian Broadcasting Corp. (B1-FP-102).

National Broadcasting Co., Inc., New York City.—Granted extension of authority under Sec. 325(b) of the Act to transmit programs to Canadian radio stations CFCF and CBL, and to such other stations in Canada as the Canadian Broadcasting Corp. desires (B1-FP-105).

National Broadcasting Co., Inc., New York City.—Granted extension of authority under Sec. 325(b) of the Act, to transmit recorded programs to all broadcast stations in Canada licensed to operate by the Canadian government which may be heard consistently in the United States (B1-FP-104).

WRNL—Richmond Radio Corp., Richmond, Va.—Granted construction permit (B2-P-3505) to make changes in directional antenna for nighttime use.

HEARINGS DESIGNATED

KWG—McClatchy Broadcasting Co., Stockton, Cal.—Designated for hearing application to make changes in transmitter and antenna and increase power from 100 to 250 watts (B5-P-3498).

KROY—Royal Miller, Sacramento. Calif.—Designated for hearing application for construction permit (B5-P-3497) to install a new transmitter and increase power from 100 to 250 watts.

LICENSE RENEWALS

The following stations were granted renewals for the period ending June 1, 1943:

WAIR, Winston-Salem, N. C.; WDMJ, Marquette, Mich.; WGH, Newport News, Va.; WGTM, Wilson, N. C.; WJPR, Greenville, Miss.; WLBC, South of Muncie, Ind.; WLAV, Grand Rapids, Mich.; WNBH, New Bedford, Mass.; WRAW, Reading, Pa.; WSTV, Steubenville, Ohio.

The following stations were granted renewals for the period ending October 1, 1944, on a regular basis:

KYA and auxiliary, San Francisco; WHBF, Rock Island, Ill.; WISH, Indianapolis, Ind.; WOOD, Grand Rapids, Mich.; WWNY, Watertown, N. Y.; WXYZ and auxiliary, Detroit, Mich.

The following stations were granted renewal of licenses on a regular basis for the period ending February 1, 1943:

KWG, Stockton, Calif.; KWNO, Winona, Minn.; WAIM, Anderson, S. C.; WBHP, Huntsville, Ala.; WCED, DuBois, Pa.; WCLO, Janesville, Wisc.; WCOL, Columbus, Ohio; WENY, Elmira, N. Y.; WITH, Baltimore, Md.; WKBO, Harrisburg, Pa.; WMOB, Mobile, Ala.; WSAM, Saginaw, Mich.

The following stations were granted renewals on a regular basis for the period ending April 1, 1943:

WBBL, Richmond, Va.; WEBQ, Harrisburg, Ill.; WHIZ, Zanesville, Ohio; WLOK, Lima, Ohio, and WSBC, Chicago, Ill.

MISCELLANEOUS

WHKY—Catawba Valley Broadcasting Co., Inc., Hickory, N. C.—Granted modification of construction permit which authorized installation of new transmitter and directional antenna for night use, increase power, change frequency, and move transmitter, for extension of completion date from September 6 to November 5, 1942 (B3-MP-1623).

KHSL—Golden Empire Broadcasting Co., Chico, Calif.—Granted modification of construction permit, as modified, which authorized installation of directional antenna for day and night use, and increase in power, for extension of completion date from September 16 to October 16, 1942 (B5-MP-1630).

WAGA—Liberty Broadcasting Corp., Atlanta, Ga.—Granted modification of construction permit, as modified, which authorized change in frequency. increase power, directional antenna for night use, new transmitter, and move of transmitter, for extension of commencement and completion dates from March 21, 1942, and September 17, 1942, to September 17, 1942, and March 17, 1943, respectively (B3-MP-1625).

KGDM—E. F. Peffer, Stockton, Calif.—Granted modification of construction permit, as modified, which authorized change in frequency, increase in power, change hours of operation, install directional antenna for night use, and new transmitter, for extension of completion date from September 20, 1942, to October 20, 1942 (B5-MP-1629).

WLAY—Muscle Shoals Broadcasting Corp., Muscle Shoals City, Ala.—Granted authority to determine operating power by direct measurement of antenna power (B3-Z-1430).

WALL—Community Broadcasting Corp., Middletown, N. Y.—Granted license to cover construction permit for new station (B1-L-1695); granted authority to determine operating power by direct measurement of antenna power (B1-Z-1425).

KTRH—KTRH Broadcasting Co., Houston, Tex.—Granted license to cover construction permit as modified, which authorized installation of directional antenna for night use, and increase in power (B3-L-1699); also granted authority to determine operating power by direct measurement of antenna power (B3-Z-1427).

WSYB—Philip Weiss, trading as Philip Weiss Music Co., Rutland, Vt.—Granted license to cover construction permit, as modified, for change in frequency, increase in power, installation of new transmitter and directional antenna for night use (B1-L-1696); granted authority to determine operating power by direct measurement of antenna power (B1-Z-1426).

WGNY—WGNY Broadcasting Co., Inc., Newburg, New York.—Denied special service authorization (B1-SSA-44) to operate unlimited time, using power of 1 KW.

WJZM—Roland Hughes, Clarksville, Tenn.—Denied request for permission "to cooperate with the local police department in transmitting police messages intended for officers located in patrol cars over the city", and advised that, should the city officials desire to pursue this matter further with a view to establishing a police communications system as such, they get in touch with the Commission.

WORK—York Broadcasting Co., York, Pa.—Granted motion to continue hearing to November 16 on application for modification of construction permit, now scheduled for September 17.

KDNT—Harwell V. Shepard, Denton, Texas.—Granted petition for leave to amend application for construction permit to request frequency **1400 kc.**, and 100 watts power, on condition that amendment is filed within 45 days.

KHQ—Louis Wasmer, Inc., Spokane, Wash.—Withdrew petition for order to take deposition and motion to continue hearing in re application for construction permit.

WINK—Mid-America Broadcasting Corp., Louisville, Ky.—Granted petition for acceptance of appearance filed August 24, in re application for modification of construction permit.

WMIS—Natchez Broadcasting Co., Natchez, Miss.—Granted petition to accept appearance in re application for renewal of license.

WGRN—P. K. Ewing, Greenwood, Miss.—Granted petition to accept appearance in re application for renewal of license.

APPLICATIONS FILED AT FCC

580 Kilocycles

WIAC—En rique Abarca Sanfeliz, Hato Rey, P. R.—Modification of license to change location of main studio from 13 Comercios St., San Juan, Puerto Rico to Stop 29, Ordonez St., Hato Rey, P. R.

600 Kilocycles

WCAO—The Monumental Radio Co., Baltimore, Md.—Modification of construction permit (B1-P-3024 as modified), which authorized increase in power, move of transmitter, installation of new transmitter and directional antenna for day and night use, for extension of completion date from 9-8-42 to 10-8-42.

700 Kilocycles

WLW—The Crosley Corp., Cincinnati, Ohio.—Construction permit to increase power from 50 KW to 650 KW, make changes in transmitter of W8XO for use by WLW and install directional antenna for night use. Amended: to request modification of license instead of construction permit to operate with power of 50 KW night and 500 KW daytime, using the transmitter licensed to W8XO.

900 Kilocycles

WSBA—Susquehanna Broadcasting Co., York, Pa.—License to cover construction permit (B2-P-3314 as modified), which authorized construction of new standard broadcast station.

WSBA—Susquehanna Broadcasting Co., York, Pa.—Authority to determine operating power by direct measurement of antenna power.

990 Kilocycles

WNOX—Scripps-Howard Radio, Inc., Knoxville, Tenn.—License to cover construction permit (B3-P-2839 as modified), for increase in power, changes in equipment and directional antenna for night use.

WNOX—Scripps-Howard Radio, Inc., Knoxville, Tenn.—Authority to determine operating power by direct measurement of antenna power.

1110 Kilocycles

KPAS—Pacific Coast Broadcasting Co., Pasadena, Calif.—Modification of construction permit (B5-P-3261 as modified), which authorized construction of new standard broadcast station for approval of directional antenna for day and night use as now adjusted and extension of commencement and completion dates.

1150 Kilocycles

WDEL—WDEL, Inc., Wilmington, Del.—Modification of construction permit (B1-P-2758 as modified), which authorized increase in power, installation of new transmitter and directional antenna for day and night use for extension of completion date from 9-19-42 to 10-17-42.

1230 Kilocycles

NEW—Raymond C. Hammett, Talladega, Ala.—Construction permit for new standard broadcast station to be operated on **1230 kc.**, 250 watts, unlimited time. Amended: re change in type of transmitting equipment.

1300 Kilocycles

WOOD—King-Trendle Broadcasting Corp., Grand Rapids, Mich.—Modification of construction permit (B2-P-2874 as modified), which authorized increase in power, installation of new transmitter and directional antenna for night use and move transmitter and studio requesting extension of completion date from 9-23-42 to 11-23-42.

1380 Kilocycles

KIDO—Frank L. Hill and C. G. Phillips, d/b as Boise Broadcast Station, Boise, Idaho.—Voluntary assignment of license from Frank L. Hill as surviving co-partner of Hill and Phillips, co-partners, and Georgia Phillips, Executrix of estate of C. G. Phillips, deceased, to Georgia Phillips, d/b as Boise Broadcast Station.

1450 Kilocycles

KEUB—Eastern Utah Broadcasting Co., Price, Utah.—Authority to install automatic frequency control equipment.

KORE—Frank L. Hill & C. G. Phillips, d/b as Eugene Broadcast Station, Eugene, Oregon.—Voluntary assignment of license from Frank L. Hill, as surviving co-partner of Hill and Phillips, co-partners, and Georgia Phillips, Executrix of estate of C. G. Phillips, deceased, to Frank L. Hill and Violet Hill, co-partners, d/b as Eugene Broadcast Station.

1480 Kilocycles

KGCX—E. E. Krebsbach, Sidney, Mont.—License to cover construction permit (B5-P-3476), which authorized move of transmitter and studio and antenna changes.

KGCX—E. E. Krebsbach, Sidney, Mont.—Authority to determine operating power by direct measurement of antenna power.

1490 Kilocycles

WRGA—Rome Broadcasting Corp., Rome, Ga.—License to cover construction permit (B3-P-3478) for move of transmitter and changes in antenna system.

1510 Kilocycles

WLAC—J. T. Ward, trading as WLAC Broadcasting Service, Nashville, Tenn.—License to cover construction permit, which authorized increase in power, installation of new transmitter and directional antenna for night use and move of transmitter (B3-P-1250 as modified).

WLAC—J. T. Ward, trading as WLAC Broadcasting Service, Nashville, Tenn.—Authority to determine operating power by direct measurement of antenna power.

FM APPLICATIONS

W71SB—South Bend Tribune, South Bend, Ind.—License to cover construction permit (B4-PH-54 as modified), which authorized construction of new high frequency broadcast station, in part in accordance with Commission action of 8-4-42.

W59C—WGN, Inc., Chicago, Ill.—License to cover construction permit (B4-PH-7), which authorized construction of new high frequency broadcast station, in part in accordance with Commission action of 8-4-42.

TELEVISION APPLICATION

WPTZ—Philco Radio and Television Corp., Philadelphia, Pa.—Modification of construction permit (B2-PCT-4 as modified), which authorized construction of new commercial television broadcast station requesting extension of completion date from 10-1-42 to 12-1-42.

MISCELLANEOUS APPLICATIONS

W6XDU—Don Lee Broadcasting System, Los Angeles, Calif.—Modification of construction permit (B5-PVB-83 as modified), which authorized addition of aural equipment using special emission for extension of completion date from 9-1-42 to 12-1-42.

W4XGG—Gordon Gray, Winston-Salem, N. C.—License to cover construction permit (B3-PST-6), which authorized construction of new ST broadcast station.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Arco Case Co., 15 East 40th St., New York, engaged in the sale and distribution of traveling bags, brief cases, trunks, and other merchandise, is charged in a complaint with misrepresentation. (4831)

Fratelli Branca & Company, Inc., 12-14 Desbrosses St., New York, engaged in the sale and distribution of a medicinal preparation designated "Fernet-Branca" is charged in a complaint with false advertising and misrepresentation. The complaint charges that in newspaper and periodical advertising, by radio continuities and other advertising means the respondent has represented that its preparation is a cure or remedy for stomach disorders, indigestion, headaches, insomnia, and other ailments; that it gives the body resistance to the inclemency of the weather; regulates the bodily functions and aids in digestion, and that its use will promote, maintain and improve health generally. (4828)

Vocational Placement Bureau, et al.—Use of a facsimile signature so prepared as to resemble the signature of Henry Morgenthau, Secretary of the Treasury, on collection agency cards which are mailed from a Washington address, is charged in a complaint issued against two Ohio distributors of such cards and their Washington, D. C., intermediary. The respondents named in the complaint are Andrew J. Lytle and Richard Carl Lytle, trading as Vocational Placement Bureau, Debtors Finance Bureau and Bureau of Records of Employment, Everett Building, Akron, Ohio, and William Edgar Spieer, 302 Bond Building, Washington. (4829)

Wisconsin DeLuxe Doll & Dress Co., trading as Wisconsin DeLuxe Corporation, 1902 North Third St., Milwaukee, engaged in the sale and distribution of blankets, clocks, electric fixtures and other merchandise, is charged in a complaint with the use of lottery methods. (4830)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

S. C. S. Chemical Co., 2617 South Crawford Ave., Chicago, engaged in selling medicinal preparations designated "S. C. S. Corn Salve" and "S. C. S. Athlete's Foot Salve," stipulated to cease and desist from representing that the corn salve is a remedy or cure for corns or will enable one to get rid of them or that it is a remedy or cure for callouses or warts; that the foot salve will cure athlete's foot or ringworm or that it is effective in the treatment of those conditions unless limited to such cases as are not "deep-seated"; or that the foot salve is effective in the treatment of eczema. (03043)

Chesebrough Manufacturing Co., Consolidated, 17 State St., New York, engaged in selling Vaseline Hair Tonic, and McCann-Erickson, Inc., 50 Rockefeller Plaza, New York, an advertising agency which disseminated advertisements of the product, have stipulated to discontinue representing that Vaseline Hair Tonic prevents or tends to prevent the recurrence of dandruff scales or that it affects the cause of dry scalp or goes to the root of dry scalp trouble. (03040)

Collins Piano Co., Greenville, Tex., maintaining sales offices in other cities, including one at Texarkana, Tex., and engaged in the sale and distribution of new and used pianos, has stipulated to cease representing that it has or is offering for sale at any particular place any used or repossessed piano or other product of which a balance is represented to be due unless such representations are true. (3524)

Evergreen Hatchery, Lynden, Wash., engaged in the sale and distribution of chicks, stipulated to cease and desist from representing by use of the words "Member . . . Washington State Poultry Improvement Association," or in any other manner, that he is a member or that his hatchery is under the supervision of the Washington State Poultry Improvement Association. (3522)

Feather Mills, 1014 Thomas St., Seattle, Wash., engaged in the manufacture and sale of pillows under various brand names, has stipulated to cease and desist from use on labels of the term "Grey Goose Down" as descriptive of pillows not wholly filled with down, and from use of the word "down" either alone or with the word "goose" so as to convey the belief that the pillows are wholly filled with down or that they do not contain any material other than down. He also stipulates that he will cease representing that his pillows contain a designated amount of down, when actually the down content is less than that indicated. (3523)

Liberty Broadcasting Corp., operating Radio Station WAGA, Atlanta, Ga., engaged in selling the use of its radio transmittal facilities and power, stipulated to cease representing that WAGA has more listeners in Atlanta than any other radio station or that, when operating as authorized in its construction permit, it can be heard without interference over the entire State of Georgia; or misrepresenting through exaggeration the number of prospective purchasers who listen to the station. (03047)

Perfection Foods Co., trading as Standard Kennel Food Co., Battle Creek, Mich., engaged in selling dry dog food preparations designated "Standard Kibbled Biscuit," "Standard Whole Biscuit," "Standard Puppy Meal," "Standard Dog Food" and "Standard Cubes," and A. F. Dando, trading as Strand Agency, Battle Creek, Mich., conducting an advertising agency which disseminated advertisements for the products on behalf of Standard Kennel Food Co., stipulated to cease and desist from using the terms "meat" or "meat cereal" or any other terms of similar import or meaning to designate or describe dehydrated meat meal or any product which is not meat in fact. (03045)

Pixacol Co., P. O. Box 3583, Cleveland, Ohio, engaged in the sale of a medicinal preparation designated "Pixacol," stipulated to cease and desist from representing that the product constitutes a cure for psoriasis and also that he will cease disseminating any advertisements which fail to reveal that the preparation may irritate the skin, particularly if applied with rubbing; that one should avoid getting it into the eyes or on mucous membranes, and that it should in no case be applied to large areas of the body, provided, however, that such advertisements need only contain the statement: "Caution Use only as Directed," when the directions for use on the labeling contain a caution or warning to the same effect. (03041)

Price Candy Co., 2 West 39th St., Kansas City, Mo., engaged in selling "Health Candy," stipulated to desist from representing that the product is less fattening than ordinary candies; that it will not cause fat to be stored in the body, or that its sweetening ingredient is composed entirely of dextrose. The Price Candy Co. further agrees to cease representing by use of the word "Health" in the designation of its product, or otherwise, that the product will have a significant effect upon the health of users. (03044)

Tardif Domestic Peat Sales Co., Waukesha, Wis., engaged in mining, preparing and distributing peat obtained from peat bogs at Delafield, Wis., has stipulated to desist from use of the words "Peat Moss" as descriptive of its product and from the use of the words "Peat Moss" in any way so as to convey the belief to purchasers that the product is moss peat, a product consisting chiefly of the decomposed stems and leaves derived from species of Sphagnum mosses. (3525)

T-Lax Products Co., Birmingham, Ala., engaged in selling a drug designated "T-Lax," stipulated to cease representing that T-Lax can be relied upon to attain or maintain good health; that it is effective in the treatment of stomach, liver or kidney troubles or of indigestion, biliousness, or similar ailments; that it aids digestion; that it will act as a laxative or have any effect upon the liver or act as a diuretic or aid to the kidneys; that it will remove the poisonous accumulation from the blood stream, or that it is different from all other products offered for the same purpose. (03046)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Capitol Paint & Varnish Works, Inc., 1346 West Concord St., Chicago, engaged in the manufacture and sale of paints and varnishes, has been ordered to cease and desist from certain misrepresentations concerning its products. (4536)

Giroux Company, Inc., 401 West 13th St., New York, manufacturer and distributor of a table sauce, has been ordered to cease and desist from misrepresentation concerning its product. (4731)

Merit Health Appliance Co., 707 South Hill St., Los Angeles, engaged in the sale and distribution of a therapeutic device designated "Merit Short Wave Diathermy," have been ordered to cease and desist from false advertising and misrepresentation of their product. (4543)

Teeterbabe Company of Colorado, 4714 Clay St., Denver, Colo., engaged in the sale and distribution of electric irons, electric toasters, cameras, and other merchandise, has been ordered to cease and desist from use of lottery methods in the sale of his products. The Commission finds that the respondent distributed sales literature, including letters of instruction, and pull cards as part of sales equipment. (3709)

BOND SALES GREAT, SEND IN REPORTS, SAYS CALLAHAN

"Radio Bond sales by stations that have reported to date are more than satisfactory," says Vincent F. Callahan, Director of Radio and Press for the Treasury's War Savings Staff.

"As of September 12, returns had been received from 148 stations. These stations reported a total of $2,441,530.37—or an average of roughly $160,000 per station reporting during the month and a half that the plan has been in operation.

"However, you will note that only 148 stations have thus far reported on their sales—and more than 750 stations agreed to sell Bonds. It is very important that *all* stations report their sales to us, so that the radio industry can receive full credit for the job it is doing. Remember, we will not release individual sales figures—and thanks again, as always, for your wonderful cooperation."

Labor

MANPOWER TRENDS

There is a growing recognition on the part of government officials of the need for swift action in protecting essential war industries against the undue inroads on the part of the military service. Of course, with the United States called upon to raise an army of some 10,000,000 men as stated by General Hershey, many men who are now working in essential war industries are bound to find their way into the Army, either by the operation of the Selective Service Act or by enlistment.

Chairman Paul V. McNutt of the Manpower Commission in testifying before the Tolan Committee investigating national defense migration on Wednesday (16) stated that it was his belief that drastic action would have to be taken to control the employment within the 34 essential activities and occupations, among which is radio broadcasting. He pointed out that these activities must be maintained if the entire war effort of the nation is to function smoothly. Already the Manpower Commission has frozen labor in the lumbering industry and in nonferrous mining. It is likely that this policy may be pursued in the case of other industries.

On Monday of this week, Mr. McNutt signed directive No. 10 effective September 27, implementing the President's Executive Order signed September 12, and establishing procedure to cover transfers and releases of the federal government's 2,300,000 civilian employees. This directive confers upon the Civil Service Commission the authority to make findings that civilian employees in any department of the Federal Government are qualified to perform work in one of the 34 critical war occupations. Employees thus certified are at liberty to accept employment in private industry without disturbing their Civil Service status. They can serve in private industry for the duration of the war and 6 months thereafter and then return to government service with their Civil Service status unimpaired.

All of these events point to early disposition either by Congress or by the Manpower Commission of the manpower problem now confronting the essential war activities, including radio broadcasting.

OVERTIME POLICY

President Roosevelt on September 9 issued an executive order dealing with the payment of overtime which supersedes all present policy or the terms of current labor agreements. The order is effective October 1.

Double time is outlawed except in the case of the employee who works seven days in a row. On the seventh day of his work week, this employee must be paid double time.

Time and one half must be paid on New Year's, Fourth of July, Labor Day, Thanksgiving, Christmas and Memorial Day or one other holiday of greater local importance.

Otherwise, the provisions of the Wage and Hour Act or of labor contracts prevail.

The text of the order:

Whereas many labor organizations have already adopted the patriotic policy of waiving double time wage compensation or other premium pay for work on Saturday, Sunday and holidays, as such, for the duration of the war; and

Whereas it is desirable and necessary in the prosecution of the war, and to insure uniformity and fair treatment for those labor organizations, employers, and employees who are conforming to such wage policies that this principle be universally adopted:

Now, Therefore, by virtue of the authority vested in me by the Constitution and the statutes, as President of the United States and as Commander in Chief of the Army and Navy, it is hereby ordered:

1. That the following principles and regulations shall apply for the duration of the war to the payment of premium and overtime wage compensation on all work relating to the prosecution of the war:

A. No premium wage or extra compensation shall be paid to any employee in the United States, its territories or possessions, for work on Saturday or Sunday except where such work is performed by the employee on the sixth or seventh day worked in his regularly scheduled workweek and as hereinafter provided.

(1) Where because of emergency conditions an employee is required to work for seven consecutive days in any regularly scheduled workweek a premium wage of double time compensation shall be paid for work on the seventh day.

(2) Where required by the provisions of law or employment contracts, not more than time and one-half wage compensation shall be paid for work in excess of eight hours in any day or forty hours in any workweek or for work performed on the sixth day worked in any regularly scheduled workweek.

Holiday Pay

B. No premium wage or extra compensation shall be paid for work on customary holidays except that time and one-half wage compensation shall be paid for work performed on any of the following holidays only: New Year's Day, Fourth of July, Labor Day, Thanksgiving Day, Christmas Day and either Memorial Day or one other such holiday of greater local importance.

II. All Federal departments and agencies shall conform to the provisions in all existing and future contracts negotiated, executed, or supervised by them to the policies of this order. All such

OVERTIME POLICY

(Continued from page 549)

departments and agencies shall immediately open negotiations to alter provisions in existing contracts to conform them to the requirements of this order.

III. Nothing in this order shall be construed as requiring a modification of the principle that every employee should have at least one day of rest in every seven days. The continuous operation of plants and machines in prosecuting the war does not require that employees should work seven consecutive days.

IV. Nothing herein shall be construed as superseding or in conflict with the provisions of the statutes prescribing the compensation, hours of work and other conditions of employment of employees of the United States.

V. All Federal departments and agencies affected by this order shall refer to the Secretary of Labor for determination questions of interpretation and application arising hereunder.

VI. The provisions of this order shall become effective October 1, 1942.

WAGE POLICY

By October 1, national wage policy should be determined. President Roosevelt set that date in his recent message to Congress about the problem of inflation.

Meantime, there appears to be a rush for pay raises. The nearest thing to a national policy available at the moment is the so-called "Little Steel" formula devised by the War Labor Board. This formula, *meant to apply only to those whose entire income goes mainly for the necessities of life,* provides a 15 per cent increase over wages prevailing in January, 1941. This increase is based on the increase in the cost of living. All wage increases since January, 1941, must be calculated into the 15 per cent.

If a union demands more, a broadcaster is within his rights in demanding that the case be referred to the War Labor Board, through the U. S. Labor Department. All unions are pledged to a no-strike-pending-arbitration policy for the duration.

COST OF LIVING

The U. S. Labor Department reports that the cost of living advanced 0.4 per cent between July 15 and August 15, and on the latter date was 19 per cent higher than it was in August, 1939, just before the outbreak of war. The increase since May 15 has been 1.2 per cent.

Sales

NAB APPOINTS AVERY

Lewis H. Avery has been named Director of NAB's Department of Broadcast Advertising, succeeding Frank Pellegrin, now a captain in Uncle Sam's growing Army.

Mr. Avery—Lew to the radio fraternity—brings to his new job a splendid background of experience in radio and in advertising. He comes directly from Free and Peters whom he has served in the mid-west area for the past several years. Prior to that his radio career stretches back to his high schools days in 1917 when he built and operated a ½-kilowatt station in his home town, Seneca Falls, New York. This early radio venture ended when the sheriff received orders from the Federal Government to close all radio stations in his county.

Lew turned to engineering and started a course at Union College, Schenectady. However, his natural bent for writing led him into the publicity department of the General Electric Company. In 1926, while thus employed, he became a part-time announcer on Station WGY and within a very short time was doing news programs and conducting a half-hour weekly farm program.

After two years at this dual capacity, Lew became assistant to the advertising manager of the Mohawk Power Corporation, and in 1930 was given top spot as advertising manager of that company.

In 1930 he went to Batten, Barton, Durstine and Osborn and was assigned by Arthur Pryor, Jr., to handle all radio activities for that agency on accounts between Albany and Detroit. In 1932 he became manager of planning and service for Radio Stations WGR-WKBW at Buffalo. In this capacity he coordinated all sales and merchandising activities. Seven months later, in January 1933, he became Director of Sales for these two stations.

In July 1936 when the move to form a Sales Managers Division of NAB was gotten under way, Lew was one of the leaders and became a member of the first Executive Committee, and in 1937 was chairman of that committee and served through 1937 and 1938. In 1938 Avery presented a comprehensive plan of broadcast advertising to the Sales Managers Division. This was unanimously adopted and became the basis of NAB's broadcast advertising activity.

Lew Avery was born at Seneca Falls, New York. He attended Mynderse Academy before enrolling in Union College. In 1927 he married Miss Helen E. Smith of Schenectady. The Averys have an eight-year-old daughter and a two-year-old son. Mr. Avery will assume his new duties at NAB headquarters on October 1.

"JUST ANOTHER 'RADIO PLUG-UGLY'"

Joseph W. Lee, president of the Oklahoma Network, Inc., recently sent Neville Miller the following letter:

DEAR NEVILLE:

I was sitting in my office at KGFF this morning talking with a friend about the viciously unfair "Radio Plug-Uglies" diatribe in August *Readers Digest.* It was 10:55 a. m.. I noted the time because we were waiting to hear the opening of our studio AP Newscast at 11:00 a. m.

The phone rang.

My secretary came to the door and said, "Shawnee Hospital on the line."

The voice said, "This is Miss Henry at Shawnee Hospital; we have an emergency. We need a blood donor, type 2, and we can't reach any of our regulars of this type. There is a lady here who lives in Tribbey, Oklahoma, who needs a transfusion immediately. She has no relatives, and no one near who can help her. Could you help us on this?"

We prepared a brief appeal, asking volunteers to phone the Shawnee Hospital at once. The announcement was handed our newscaster just a few seconds before he went on the air with our newscast at 11:00 a. m. He gave it immediately.

At 11:10 Miss Henry called and informed us that within five minutes of our announcement two volunteers had called. One was the proper type and was even then enroute in his car to the hospital. Miss Henry said that a woman from Tribbey, Oklahoma, would be grateful . . .

Things like this happen of course everywhere in radio, constantly. Every station could probably duplicate this story.

Anyway this incident happened today, and is true as related above in exact detail.

Just another "Radio Plug-Ugly."

PER-INQUIRY OFFERS

The Greeting Card Industry, 200 Fifth Ave., New York City, is again seeking free time for promotional purposes.

COURT REVERSES FCC IN KOA CASE

Dividing 4-2, the U. S. Court of Appeals for the District of Columbia on Monday reversed the FCC in the NBC-KOA appeal in the WHDH clear channel case, and held that electrical interference to the service area of a station is sufficient to give it the right to intervene and be heard by the Commission, and to appeal in case the decision is favorable to the applicant.

The majority split three ways as to the degree of intervention the existing station is entitled to, and the stage of the proceedings when it may be had. Justice Rutledge stated that the right arose when the "Proposed Findings of Fact and Conclusions" were issued and not before. Chief Justice Groner and Justice Vinson declared that participation in the hearing should have been accorded from the outset. Justice Stephens concurred in the latter view, adding that a station license "whether or not it may be technically a property right, it is a thing of value to the person to whom it is issued and a business conducted under it may be the subject to injury." He further declared that "to construe doubtful language of Congress as permitting the impairment or destruction of a licensee's interests without a hearing would be to invalidate, under the due process clause of the Fifth Amendment, the action of Congress. That that clause protects against the arbitrary impairment or destruction of substantial rights even though they are limited by the public interest, is not open to doubt."

That the six Justices found it necessary to express their views in three majority and two minority opinions is regarded by radio lawyers as further evidence of need of revision of the Communications Act.

We print the opinions in full below:

UNITED STATES COURT OF APPEALS FOR THE DISTRICT OF COLUMBIA

No. 7933

National Broadcasting Company, Inc., appellant,

v.

Federal Communications Commission, Appellee

and

Matheson Radio Company, Inc., and Berks Broadcasting Company, intervenors.

Appeal from the Federal Communications Commission.

On Reargument

Decided September 12, 1942.

Before Groner, Chief Justice, and Stephens, Miller, Vinson, Edgerton, and Rutledge, Associate Justices.

Rutledge, J. The appeal is from an order of the Commission entered April 7, 1941. The applicant (Matheson Radio Company, Inc.) operates Station WHDH at Boston, Massachusetts, and is intervenor here. Appellant operates Station KOA at Denver, Colorado, upon the same frequency, 830 kc, now 850 kc under the North American Regional Broadcasting Agreement. The order authorized increases in power and time for WHDH. Appellant claims it is aggrieved and its interests are adversely affected by the order. Hence it asserts both a right of appeal and one to hearing by the Commission, which denies both. The principal questions are therefore whether, on the showing made, (1) appellant has standing to appeal; (2) the Commission acted arbitrarily or erroneously in refusing to permit it to intervene as a party in the administrative proceedings.

KOA is a Class I station, operating since 1928 on a clear channel with 50 kw power.[1] By virtue of this classification it was the only station operating on its frequency at night prior to the order now in question. From 1930 WHDH had been a 1 kw station operating daytime only until sunset Denver time. The order modified its license to permit operation for unlimited time and with 5 kw power. No formal or literal modification was made in KOA's license, but modifying the license of WHDH created electrical interference after sunset in KOA's secondary service area. Roughly the region affected is that lying 700 miles or more east of Denver. To accomplish this change, the Commission had to transfer the frequency 850, on which both stations operate, from subdivision (a) to subdivision (b) of Section 3.25 of its rules.[2] Accordingly the order provided for this transfer.

The substantive injury of which appellant complains consisted therefore in creating new and additional electrical interference, affecting its secondary service area; degrading the status of Station KOA from a clear channel station by reclassifying it; and, in effect though not in terms, modifying its license in these respects. As appears below, appellant also asserts these changes not only affected its interests substantially and adversely, but had like effect upon the public interest, in depriving listeners within the secondary service area of its service and also in jeopardizing the status of this frequency under the North American Regional Broadcasting Agreement.[3]

The substantive injuries, however, both to appellant and to the public, are set forth primarily not to secure substantive redress in this appeal, but (1) to establish appellant's standing to appeal; and (2) to show that appellant had a right to intervene in the Commission's proceedings of which it has been deprived either arbitrarily or erroneously. The case therefore raises again the troublesome question concerning who is entitled to appeal from the Commission's orders and upon what showing, under the nebulous provisions of the statute in this respect;[4] and the equally difficult, perhaps more unsettled inquiry, who, if anyone, may intervene as of right in its proceedings for granting, denying or modifying a license under the equally cloudy provisions relating to these matters.

---

[1] Under Sections 3.22 and 3.25 of the Commission's Rules and Regulations, the following provisions concerning clear channel stations are made:

"§ 3.22 *Classes and power of standard broadcast stations—(a) Class I station.* A 'Class I station' is a dominant station operating on a clear channel and designed to render primary and secondary service over an extended area and at relatively long distances. Its primary service area is free from objectionable interference from other stations on the same and adjacent channels, and its secondary service area free from interference, except from stations on the adjacent channel, and from stations on the same channel in accordance with the channel designation in § 3.25 or in accordance with the 'Engineering Standards of Allocation' at page 2756. The operating power shall be not less than 10 kw nor more than 50 kw (see also § 3.25 (a) for further power limitation)."

"§ 3.25 *Clear channels; class I and II.* The frequencies in the following tabulation are designated as clear channels and assigned for use by the classes of stations as given:

"(a) To each of the channels below there will be assigned one Class I station and there may be assigned one or more Class II stations operating limited time or daytime only: 640, 650, 660, 670, 700, 720, 740, 750, 760, 770, 800, 810, 820, 830, 850, 860, 870, 980, 1,000, 1,070, 1,090, 1,130, 1,150, 1,170 and 1,190 kilocycles. The power of the Class I stations on these channels shall not be less than 50 kw.

"(b) To each of the channels below there may be assigned Class I and Class II stations: 680, 710, 790, 970, 1,020, 1,040, 1,050, 1,060, 1,080, 1,100, 1,110, 1,140, 1,160, 1,180, 1,460, 1,470, 1,480, and 1,490 kilocycles." Code of Fed. Reg. (Supp. 1939) 2742, 2744.

[2] See note 1 *supra.* Various contentions made with reference to this change, as being one in policy, "legislative" or "judicial" in character, made upon hearing before an improper official, *i. e.,* an examiner, etc., are not considered herein, since other and more important issues are sufficient to dispose of the appeal.

[3] Par. B, 8 (d) of Part II of this treaty provides: "If within the period of this Agreement the country to which a clear channel has been assigned shall have made use of the channel but not in the manner above described or not to the extent required by the provisions of this Agreement, such country shall be considered as having relinquished that portion of the rights which it has not used and at the expiration of this agreement, the other countries party thereto shall have the right, if they see fit, to withdraw the unused privileges from such country and to reassign them to any or all of the other interested countries.

[4] The question has been presented here and in the Supreme Court in numerous cases. *E. g.,* Sanders Bros. Radio Station v. F. C. C., 70 App. D. C. 297, 106 F. (2d) 321 (1939), *rev'd on other grounds,* 309 U. S. 470 (1940); WOKO, Inc. v. F. C. C., 71 App. D. C. 228, 109 F (2d) 665 (1940); Yankee Network, Inc. v. F. C. C., 71 App. D. C. 11, 107 F (2d) 212 (1939); Stuart v. F. C. C., 70 App. D. C. 265, 105 F. (2d) 788 (1939); Pittsburgh Radio Supply House v. F. C. C., 69 App. D. C. 22, 98 F. (2d) 303 (1938); Red River Broadcasting Co. v. F. C. C., 69 App. D. C. 1, 98 F. (2d) 282 (1938), *cert denied,* 305 U. S. 625 (1938); Pulitzer Pub. Co. v. F. C. C., 68 App. D. C. 124, 94 F. (2d) 249 (1937).

I. *The Right to Appeal*

Appellant has standing to appeal. The statute confers this upon a "person aggrieved or whose interests are adversely affected." Section 402 (b) (2). In *F. C. C.* v. *Sanders Brothers Radio Station,* 309 U. S. 470 (1940), the Supreme Court held that the licensee of a competing station likely to be financially injured qualifies for appeal. It went further and asserted that Congress *"may have been* of opinion that one likely to be *financially* injured by the issue of a license would be the *only* person having a sufficient interest to bring to the attention of the appellate court errors of law in the action of the Commission in granting the license." (Italics supplied) "Financially" was inserted by amendment of the opinion after the decision was first handed down. It does not follow that this guarded and speculative dictum makes economic injury the sole criterion of status to appeal, as the Commission and WHDH contend. The *Sanders* case involved on its facts only financial injury. The court held that sufficient. Though it suggested the possible insufficiency of other kinds of injury, no question concerning them was before it. The decision therefore cannot be taken as deciding such an issue.

There are strong reasons why the dictum should not be accepted as either stating or forecasting the law. Nothing in the statute specifies or requires a showing of financial injury as the exclusive basis to appeal. Nor are the hypotheses tenable that such injury is the only sort, of a substantial kind, likely to occur or that only persons financially hurt will be able or likely to appeal. It is true they probably will have the financial resources necessary for litigation. It does not follow that others, who may be affected adversely though not financially, will be neither willing nor able to appeal.

The contrary assumption ignores the facts that radio broadcasting is not exclusively a matter of business or financial gain, and that it is the public interest, not the private right, which is primarily at stake upon the appeal. Unfortunately, commercial enterprise has taken over the lion's share of the field. Unfortunately, because when radio was in its infancy, many persons hoped that much of its work would be done by educational, religious and eleemosynary institutions, more than the event has permitted. Notwithstanding the policy which has so favored commercial operators, there is a considerable volume of noncommercial broadcasting. It takes place through stations supported not by advertising or "plugs," but by churches, universities, colleges, charitable foundations and others who have no profit-making revenues. Many still hope that the evils apparently inherent in commercial broadcasting yet may bring about a larger allocation of frequencies to licensees whose objects are not primarily the making of money.

Limiting appeals to persons financially injured would have the practical effect of denying them to nonprofit-seeking broadcasters. Conceivably, in very rare instances, such operators could show financial injury. But obviously they could not do so in the circumstances in which commercial stations are able most frequently to demonstrate its possible incidence. The view cannot be accepted that these stations can appeal only when some action of the Commission has the practical effect of destroying their capital investment. Such a view would not be consistent with the public interest and right which is the foundation of all broadcasting and which primarily the commercial broadcaster's appeal is designed to protect. *F. C. C.* v. *Sanders Bros. supra.* The latter is likely to utilize the public interest as a vehicle for protecting his private standing, however tentative that may be in legal status. Few business institutions rush to the defense of the public weal when they are not affected in any private way. As between such operators, therefore, and the noncommercial broadcaster, the latter cannot be held a knight unworthy, unable or unwilling to battle for the general good in the lists of appellate litigation. Congress had no intention to exclude nonprofit stations from taking appeals, either absolutely or in practical effect. And if they can appeal by showing other than financial injury, so also can commercial operators.

Absence of economic injury however does not amount to presence of other sufficient injury. Appellant asserts it is enough that the order creates electrical interference. This the Commission now denies, in reversal of its apparent position prior to the *Sanders* decision.[5] Appellant argues that electrical interference, regardless of amount or effect, creates the right of appeal. To support this it points out that the whole occasion for regulation, including the feature of license, arises from the limited number of frequencies and the chaos electrical interference would cause, indeed did cause,[6] if there were no authority vested with power of license, allocation and police.

It is not necessary, however, to go so far with appellant. In the present stage of radio, very few changes, either in frequency or in power, can be made without creating some degree of electrical interference. This may range from minute and practically harmless interruption with remote and very occasional listeners in secondary service areas to total obliteration in the primary field. Nothwithstanding the Commission's apparently contrary view,[7] the latter effect would appear to be more than sufficient for appeal, whether or not a showing of financial injury could be made. Likewise, at the other end, it seems doubtful that an infinitesimal amount of new electrical interference should create standing to appeal.

Presumably by the decision in the *Sanders* case the Supreme Court intended that the financial injury must be something more than nominal or highly speculative. It seems not unreasonable to read the opinion as requiring by implication that there be probable injury of a substantial character. So much by way of limitation seems necessary to prevent vindication of the public interest from turning into mass appeals by the industry at large, with resulting hopeless clogging of the administrative process by judicial review. Likewise, with electrical interference, it is hardly necessary to secure appellate championship by every broadcaster who may be affected in only a remote and insubstantial manner. It follows that electrical interference, without a showing of financial injury, may be sufficient to create standing to appeal. But for this purpose there must be a reasonable possibility that it will be substantial. And this must appear, as we have held, from the notice of appeal and statement of reasons. *Yankee Network, Inc.* v. *F. C. C.,* 71 App. D. C. 11, 107 F. (2d) 212 (1939).

In this case the notice sufficiently discloses appealable interest. It states that appellant is aggrieved and its interests are adversely affected by the order and by its reaffirmance on denial of appellant's petition for rehearing; sets forth in detail the nature and steps of the proceedings before the Commission; and states, among reasons relied upon, that the order:

"(a) Results in *a substantial* modification of the license held by appellant . . . without having afforded it an opportunity to be heard as required by Section 312 (b) of the Communications Act of 1934." (Italics supplied.)

"(b) Results in a change in the class and character of the frequency . . . without consent or hearing as required by Section 303 (f)."

"(c) Results in a degradation of service on 830 kc (850 kc) which will be prejudicial to the priority rights of the United States on this channel under Paragraph B 8 (d) of Part II of the North American Regional Broadcasting Agreement without affording appellant an opportunity to be heard on its own behalf and on behalf of the listeners it serves."

"(d) Results in a discrimination against service to rural listeners in order to furnish additional service to the residents of the City of Boston and as such is violative of the requirements of Section 307 (b) of the Communications Act of 1934."

Other assigned reasons include assertedly improper procedures in changing Commission policy, failure to return the application as required by its rules, amendment of the rules under improper notice, insufficiency of the evidence to support the decision, denial of hearing according to due process of law, etc.

On its face, therefore, the notice charges that the order substantially modified the license of KOA, changed the class and character of its frequency, degraded the station's service under the North American Agreement; jeopardized thereby not only appellant's rights but the priority rights of the United States and therefore the interests, present and future, of the listening public, and created discrimination against rural and in favor of urban listeners contrary to statutory requirements. These reasons appear to be a sufficient showing of both private and public interest and of adverse affectation to sustain the appeal. They require that it be considered on the merits, that is, on the question whether appellant was wrongfully refused a hearing before the Commission.

---

[5] The controversy in that case, and previously, concerning Section 402 (b) (2) was with reference to whether financial injury was sufficient, it being apparently the Commission's position that injury from electrical interference was the most that Congress had in mind in enacting this section.

[6] Prior to the Radio Act of 1927, and following the decision in United States v. Zenith Radio Corp., 12 F. (2d) 614 (N. D. Ill. 1926), and the Attorney General's opinion, OPS. ATT'Y GEN. (1926) 126. See MONOGRAPH OF THE ATTORNEY GENERAL'S COMMITTEE ON ADMINISTRATION PROCEDURE, PART 3. FEDERAL COMMUNICATIONS COMMISSION (1940) 83.

[7] The Commission's position that only financial injury, whether or not resulting from electrical interference, is sufficient for appeal necessarily means that electrical interference without financial injury, regardless of the extent or effect of the interference, would be no basis for appeal. Generally, of course, extensive interference would cause financial injury. But it is not clear this would be true of nonprofit stations or necessarily, perhaps, always in other cases.

II. *The Right to Hearing*

The extent of the conflict concerning intervention appears from the extreme positions taken by appellant, on the one hand, that such a right arises from the Fifth Amendment as a matter of due process of law, and by the Commission and WHDH, on the other, that Congress has given the former an absolute discretion which nothing in the Constitution inhibits or limits.

It is said that existence of a right of appeal presupposes a right to intervene. The statute does not expressly so provide. But in view of our conclusion, for reasons to be stated, that appellant was entitled to intervene, it is not necessary to decide whether in some unusual circumstance one not entitled to become a party might appeal.

On the other hand, the Commission's argument is untenable that appellant has no right to be heard because it has no vested right in the frequency, or in its license or status thereunder, *F. C. C.* v. *Sanders Bros., supra,* or because the statute empowers the Commission to make rules and regulations, Section 154 (i), and to "conduct its proceedings in such manner as will best conduce to the proper dispatch of business and to the ends of justice." Section 154 (j). The fallacy is that one who has no such vested right has therefore no procedural protections in relation to the more tenuous rights, privileges or status he possesses.[8] Whatever its proper label, "qualified right," "privelege," "status," "licensee," appellant acquired something of value by virtue of its license and the statute. The label is not important. The fact that appellant has fulfilled statutory conditions and has received statutory advantages, status and protections is important. *Tutun* v. *United States,* 270 U. S. 568 (1926). That it may be deprived of these and that the Commission has discretion to take them away, wholly or in part, do not mean that it can do so in an unfair manner or without hearing.[9] The protections of procedural due process do not disappear because the substantive right affected is not a full-grown vested right like that in one's castle at the common law. The right of appeal in capital criminal cases is entirely statutory. But that does not put it entirely beyond constitutional limitation. *Cf. Boykin* v. *Huff,* 73 App. D. C. 378, 121 F. (2d) 865 (1941), and authorities cited. Similarly, though statutory rights in the nature of occupational license, revocable in administrative discretion, may not be "property" for purposes of protections afforded by substantive due process, they are not unguarded against arbitrary administrative action.[10] Procedural due process protects them against this, and does so notwithstanding the broad rule-making power and discretion given the Commission concerning the manner of conducting its business.

The crucial issue therefore comes down to whether appellant has been deprived of an opportunity for a fair hearing to which it was entitled either by the statute or by elementary due process. The two prongs of the question may be considered together. It will aid first to set forth the statutory provisions concerning hearing and those provided by the Commission's Rules and Regulations which are pertinent both to hearing and to intervention. These then may be considered in the light of what was done by appellant and the Commission.

A. The Statutory Provisions and Scheme of Hearings

Provisions concerning hearings are contained in Sections 309 (a), 303 (f), 312 (a), (b), and 409 (a) of the Act,[11] in addition to Section 154 (i), (j) referred to above.

Section 309 (a) relates to applications for license, for renewal and for modification. The Commission is authorized to issue, renew or modify the license, if *upon examination of the application,* it determines that public interest, convenience or necessity would be served by *granting* it. If it does not reach *such* a decision on examining the application, then it must set the matter for hearing, "notify *the applicant* . . . and afford *such applicant* an opportunity to be heard under such rules and regulations as it may prescribe." (Italics supplied.)

Under Section 303 (f) the Commission is authorized to "make such regulations *not inconsistent with law* as it may deem necessary to prevent interference between stations and to carry out the provisions of this Act," but with the proviso that "*changes in the frequencies, authorized power, or in the times of operation* of any station shall not be made without the consent of *the station licensee* unless, *after a public hearing,* the Commission determines that such changes will promote public convenience or interest or will serve public necessity, or the provisions of this Act will be more fully complied with . . ." (Italics supplied.) These are the most important provisions presently involved.

Section 312 (a), (b) requires hearing with notice to the station licensee when revocation or modification of license is proposed. In the case of modification the licensee is to be "given reasonable opportunity to show cause" why the order should not issue, after having notice in writing.

By Section 409 (a) a commissioner or examiner or the director of a division is empowered, when designated by the Commission, to hold hearings, except an examiner may not do so in administration of Title III with respect to a matter involving: "(1) a change of policy by the Commission, (2) the revocation of a station license, (3) new devices or developments in radio, or (4) a new kind of use of frequencies. In all cases heard by an examiner the Commission shall hear *oral arguments* on request *of either party.*" (Italics supplied.)

As has been noted, Section 154 (i), (j) confers broad power upon the Commission to make rules and regulations, issue lawful orders and determine the manner of conducting its business.

Before turning to the regulations we may note that Section 309 (a) does not *in terms* guarantee an applicant or anyone else a hearing in all cases. The matter may be determined upon examination of the application, if in that manner the Commission is able to conclude that the application should be *granted*. In other words, the applicant is not entitled to a hearing if the action is to be in his favor. On the other hand, if the Commission cannot decide for him by merely examining the application, it must afford *him* a hearing with due notice. In short, it cannot deny the application without a hearing and the applicant is a necessary party. Whether other persons who may be affected, including existing licensees, are or may be entitled to a hearing is not determined explicitly or perhaps implicitly by this section. It is primarily an applicant's section and deals chiefly, though not necessarily exclusively, with applicants' rights.

---

[8] See Davis, *The Requirement of Opportunity to be Heard in the Administrative Process* (1942) 52 YALE L. J. 1093, 1118-25, and authorities cited and discussed therein.

[9] *Ibid.*

[10] *Ibid.*

[11] 48 STAT. 1082, 1085, 1086-7, 1096 (1934), 47 U. S. C. §§ 303 (f), 309 (a), 312 (a), (b), 409 (a) (1941).

§ 303 (f). "Make such regulations not inconsistent with law as it may deem necessary to prevent interference between stations and to carry out the provisions of this chapter: *Provided, however,* That changes in the frequencies, authorized power, or in the times of operation of any station, shall not be made without the consent of the station licensee unless, after a public hearing, the Commission shall determine that such changes will promote public convenience or interest or will serve public necessity, or the provisions of this chapter will be more fully complied with."

§ 309 (a). "If upon examination of any application for a station license or for the renewal or modification of a station license the Commission shall determine that public interest, convenience, or necessity would be served by the granting thereof, it shall authorize the issuance, renewal, or modification thereof in accordance with said finding. In the event the Commission upon examination of any such application does not reach such decision with respect thereto, it shall notify the applicant thereof, shall fix and give notice of a time and place for hearing thereon, and shall afford such applicant an opportunity to be heard under such rules and regulations as it may prescribe."

§ 312 (a). "Any station license may be revoked for false statements either in the application or in the statement of fact which may be required by section 308 hereof, or because of conditions revealed by such statements of fact as may be required from time to time which would warrant the Commission in refusing to grant a license on an original application, or for failure to operate substantially as set forth in the license, or for violation of or failure to observe any of the restrictions and conditions of this chapter or of any regulation of the Commission authorized by this chapter or by a treaty ratified by the United States: *Provided, however,* That no such order of revocation shall take effect until fifteen days' notice in writing thereof, stating the cause for the proposed revocation, has been given to the licensee. Such licensee may make written application to the Commission at any time within said fifteen days for a hearing upon such order, and upon the filing of such written application said order of revocation shall stand suspended until the conclusion of the hearing conducted under such rules as the Commission may prescribe. Upon the conclusion of said hearing the Commission may affirm, modify, or revoke said order of revocation."

§ 312 (b) "Any station license after June 19, 1934, granted under the provisions of this chapter or the construction permit required hereby and after such date issued, may be modified by the Commission either for a limited time or for the duration of the term thereof, if in the judgment of the Commission such action will promote the public interest, convenience, and necessity, or the provisions of this chapter or of any treaty ratified by the United States will be more fully complied with: *Provided, however,* That no such order of modification shall become final until the holder of such outstanding license or permit shall have been notified in writing of the proposed action and the grounds or reasons therefor and shall have been given reasonable opportunity to show cause why such an order of modification should not issue."

§ 409 (a). "Any member or examiner of the Commission, or the director of any division, when duly designated by the Commission for such purpose, may hold hearings, sign and issue subpenas, administer oaths, examine witnesses, and receive evidence at any place in the United States designated by the Commission; except that in the administration of sections 301-362 of this title an examiner may not be authorized to exercise such powers with respect to a matter involving (1) a change of policy by the Commission, (2) the revocation of a station license, (3) new devices or developments in radio, or (4) a new kind of use of frequencies. In all cases heard by an examiner the Commission shall hear oral arguments on request of either party."

Section 312 (a) (revocation), (b) (modification), on the other hand, deals primarily with rights of existing licensees. Hearing on notice is prescribed. When the question is modification *the licensee* must be given "reasonable opportunity to show cause" why the order should not issue. When it is revocation the hearing is to be "conducted under such rules as the Commission may prescribe." In contrast with Section 309 (a), Section 312 deals expressly and therefore primarily, not with applicants and their rights, but with licensees and their rights. Under the one applicants cannot be affected adversely without a hearing; under the other licensees cannot be so affected by revoking or modifying the license without a hearing. Neither section purports to make the hearing provided *ex parte* or to limit it in the one case to applicants, in the other to licensees. But neither purports to bring in others or give them a right to come in. Though others are not expressly excluded, the theory seems to be in each instance that the hearing is principally, though not necessarily exclusively, for the benefit of the applicant in the one case, of the licensee in the other. Neither section is designed on its face explicitly to take care of the situation where the interests of an applicant and an existing licensee or of two licensees clash or may do so.

Section 303 (f) is in terms, particularly of the proviso, much like Section 312 (a), (b), in that it provides expressly for public hearing concerning "changes in the frequencies, authorized power, or . . . times of operation," unless "the station licensee" consents to the change. It is not stated explicitly that he is entitled to notice and participation in the hearing, but that seems clearly implied from the provision for hearing and prohibition of these changes without it unless he consents. Furthermore, the section contains no explicit statement concerning notice to or participation by any other person. On its face therefore the provisions of Section 303 (f) concerning hearing and the licensee's participation are much like those of Section 312 (b) dealing with modification, though in terms they are not entirely identical.[12] In a broad sense both may be said to deal with modification and both to require hearing, unless the licensee affected consents to the change. This is true, notwithstanding Section 303 (f) in its principal grant of authority is, as is noted later, primarily a rule-making or "legislative" section, and the proviso is in one aspect a limitation upon the Commission's rule-making power.

But to regard Section 303 (f) as merely a duplicate or alternative provision to Section 312 (b), for protection of the licensee when his license is to be modified adversely, would make it practically superfluous. This would also ignore the primary clause and purpose of Section 303 (f), as well as the differences in express terms of the two sections.[13] The proviso is merely an incident or a limitation of the main provision, which is a grant of power to the Commission to "make such regulations *not inconsistent with law* as it may deem necessary *to prevent interference* between stations and to carry out the provisions of this Act." (Italics supplied) The principal concern of the section is interference, and the limitations of the proviso, including the requirement of hearing, relate to matters most likely to cause and most directly related to interference. In contrast with Sections 309 (a) and 312 (b), which are primarily one-party sections, Section 303 (f) deals with subject matter which necessarily involves at least two private parties in addition to the Commission, with the principal occasion for difference and dispute between or among them, namely, interference, and with the chief causes of this. The section is therefore basically a two-party or multiple-party section, not counting the Commission. This is true notwithstanding the primary clause is cast in terms of delegating rule-making power to the Commission concerning the subject matter. It is nevertheless multiple-party subject matter. The parties affected may be two or more existing stations, or they may be one or more such stations and an applicant or applicants for license. The section does not literally designate others than "the station licensee". But it necessarily contemplates, from the very nature of the subject matter, that others similarly situated will be similarly affected, and the only persons who may be so affected are other licensees and applicants.

In my judgment this fact is of paramount importance, for determining both what is meant by "changes in the frequencies, authorized power, . . . times of operation" and the nature and character of the hearing required, each a matter in fundamental dispute here. Conceding, as I think we may, that Sections 309 (a) and 312 (b) are primarily one-party sections, that is, they involve ordinarily one party in addition to the Commission itself, and the hearings they provide are chiefly, though not necessarily exclusively, for determining matters in the first instance between the Commission and an applicant in the one case and it and a licensee under prospect of having the terms of his license changed in the other, Section 303 (f) is from the outset no such one-sided matter. It is essentially one which from the start raises issues affecting not only the Commission, but also other persons who as among themselves are opposed in interest. The conflict is not, even in the initial stage, merely Commission-applicant, as in Section 309 (a), or Commission-licensee, as in Section 312 (b). It is Commission-licensee-applicant or Commission-licensee-licensee. It is three-way, and it may turn out to be adverse three ways.

In my opinion this paramount fact makes the hearing provided by Section 303 (f) an essentially different kind of hearing or stage in hearing from those provided and required by Sections 309 (a) and 312 (b). In the first place, it differentiates that hearing from the one provided by Section 312 (b) and prevents it from becoming a mere duplicate or alternative of the latter. If their issues, purposes and application were identical, there would be no need for two such explicit, and to some extent inconsistent, provisions for hearing. The mere fact that the modifications which might be involved in the hearing under Section 312 (b) are broader and more inclusive than those specified in Section 303 (f) does not explain the duplicate provision, since the latter includes the most important respects in which modification might be required under Section 312 (b). But beyond this, the two sections have or are likely to have entirely different consequences. Many of the modifications which may be proposed under Section 312 (b) relate to matters affecting only the Commission and the particular licensee, in other words, do not affect other licensees or applicants. They involve such things as equipment, observance of regulations in broadcasting, etc., essentially Commission-licensee issues and only such. Hence, in these cases, there would be no need for giving notice and right to participate to other persons. Consequently provision for such notice and participation was not included and the Section provides these protections only for the person necessarily and ordinarily affected, the licensee faced with possible modification of the terms of his license. It does not exclude others, but it gives them no right to come in at this stage. The Commission may permit them to do so in its discretion. But it is not required to admit them until it becomes apparent their rights also may be affected.

It would be a very strange thing, however, for Congress to insist upon notice and hearing when the issues lie merely between the Commission and one party, whether applicant or licensee, and to ignore entirely or fail to make similar provision in the much more highly controversial three-party situation. It would be even more strange for it to guarantee these safeguards to one of the parties in the latter situation, as against both the Commission and the other party interested, but deny it to the latter or leave his right to be heard entirely within the Commission's unlimited discretion, especially when he is or may be the only one adversely affected. In my opinion Congress did neither. Framing Sections 309 (a) and 312 primarily for one-way conflicts, it left the more complex multiple-party situation to be dealt with by Section 303 (f). And in doing so, while it gave the Commission large discretion and rule-making power, it provided specifically for public hearing upon proposed changes relating to the most important causes of interference and of conflict and dispute between licensees or between them and applicants. This section therefore is distinguishable from Sections 309 (a) and 312 (b), in necessarily bringing together from the start the private parties with clashing interests, as well as the Commission with which each may be at odds, and in providing a hearing for disposition of these issues. Congress, in providing for this hearing, did not intend only one of the affected parties to have notice and be heard.[14]

---

[12] Section 312 (b) is cast in terms of notice and "to show cause," specifying that notice be given the operator whose license is to be modified. Section 303 (f) has no express provision for notice and merely requires "public hearing" when "the station licensee" does not consent to the proposed change. Section 303 (f) also deals only with "changes in the frequencies, authorized power, or . . . times of operation," not broadly with *modification* of station *license*, as does Section 312 (b). Section 303 (f) is not limited in terms to changes made *in the license* itself, while Section 312 (b) is so limited in its terms.

[13] See note 11 *supra*, and *circa* note 12 *supra*.

The section is not aptly drawn, particularly in the language which provides for the hearing. But only superficial reading would lead to the conclusion that only one of the interested parties is given right to a hearing. Literally read, the section merely requires a hearing if the changes specified are to be made "without the consent of the station licensee." There is no provision, as there is in Sections 309 (a) and 312 (a), (b), for notice or for any specified person to be heard. As has been said, it is only by implication from the condition of "the station licensee's" failure to consent to the proposed change that his protections in these respects can be found within the section's terms. So much, however, is necessary, unless the "public hearing" is to be one at which no one but the Commission would have the right to appear and participate.

What is more important, the section does not in terms identify the "station licensee" whose consent is required if hearing is dispensed with and who, by implication, is entitled to hearing if he does not consent. Presumably, though by inference, he is or may be the licensee in the terms of whose license some change is proposed. But the section does not say this explicitly. In this respect also it differs in terms from Section 312 (b). The latter relates expressly to modification of "station license," and prohibits making the order until "the holder of such outstanding license" is given notice and hearing. No such explicit terms appear in Section 303 (f). It nowhere mentions "station license" or "modification" of license. It does refer to "station licensee," but in no way, except by possible implication, does it identify him as the "holder of the outstanding license" which is to be "modified" in terms, or exclude the licensee whose operations may be more seriously affected, even destroyed by favorable changes made in another operator's license. In short, section 303 (f) is drawn in different terms and, in my opinion, for different purposes, from Section 312 (a), (b). Literally the hearing provision relates to "changes in frequencies, authorized power, or . . . times of operation," not to "modification" of outstanding licenses. Literally also it requires the consent "of the station licensee," if the change is made without hearing, and hearing if such consent is not given. But it does not specify whether the licensee is one in the terms of whose license a change is to be made or one only affected by a change made in another's license or by granting a new application. This further narrows the crucial issue. The Commission asserts the only person entitled to hearing under Section 303 (f) is the station licensee in whose license the change is made. Hence, in its view, KOA had no right under the section to be heard, since there was no change in its license and it continued free to operate on the same frequency, power and time after WHDH's application was granted as before. This view is presented with vigor and combated with equal force. Much of the argument revolved pedantically about the difference between "in" and "of," that is, whether "change *in* frequency" means "change *of* frequency," as if the two forms might not mean the same thing and that as well what the one as what the other asserts. The controlling principles of construction are greater than prepositional hairsplittings.

The Commission's interpretation, though possible upon the language, would ignore the fundamental character of the subject matter and of the controversies as well as the conflict of interests; make the section's provision for hearing one-sided; exclude one of the private parties interested and, in some instances, as in this case, the only one adversely affected; make the section a merely narrower duplicate of Section 312 (b), without taking account of their differences in terms, purposes and ordinarily applicable situations; and, finally, so construed, there would be serious question concerning the Section's validity. That construction would create the incongruous situation that an applicant for a license and a licensee facing literal "modification" would be entitled by the terms of the Act to hearing before adverse action, but a licensee equally or more seriously "affected" by the granting of another's application or changing another's license favorably would have no right to be heard except in the Commission's discretion. Logically this would be true, notwithstanding the interference thus created might blot out the "affected" station's operations. In this view a commercial station could wipe out a nonprofit one completely by licensed interference and, under the Commission's argument that financial injury is the only basis for appeal, the latter would have no right to be heard before either the Commission or the courts. If the injured station were also a commercial one and could show financial injury, it could appeal, but would have no right to be heard before the Commission. If it could not show financial injury, it would be in the same boat with the nonprofit station.

Such a construction would run contrary to the policy of every other provision for hearing in the Act. Not only in Section 303 (f) itself, but in Sections 309 (a) and 312 (a), (b), the statute dispenses with hearing when the action to be taken is *favorable* to the person, whether applicant or licensee, whose interests are directly and immediately involved. It is zealous to provide for hearing when the decision is or may be adverse to him. Yet, in this situation, KOA is the only station adversely affected. The action is favorable to WHDH. It was merely an applicant. KOA was an existing station. As between the two, if either was entitled to the greater protection, it would seem to be KOA. If the action taken or proposed had been adverse to WHDH, it had a statutory right to hearing, and in fact the Commission respected it. Yet when it reached the point of proposed decision in WHDH's favor and adverse to KOA, it denied that the latter had any right to hearing, whether statutory or constitutional. This perverts the hearing policy of the Act. That is to dispense with hearing when decision is favorable to the one affected, to require it when it is adverse. Section 303 (f) is no exception. It does not specify in terms who shall be heard or have notice. But it provides for public hearing when the "station licensee" does not consent to the proposed change in frequency, power, or time. It does not say "the licensee whose license is modified in terms." Unquestionably it includes him. But he is amply protected by Section 312 (b). Whether he or the other station or stations affected will be injured depends, not on the mere fact his license is altered, but on *how* it is changed, whether favorably to him or to the others. The Commission's view posits the right to hearing, not upon the question who is hurt or likely to be hurt, as do the other sections, but upon whose letter of license is altered or likely to be changed. It ignores realities, effects and consequences in favor of the formal and literal nature of the change. "The letter killeth; the spirit keepeth alive." Section 303 (f) does not in terms exclude the station licensee who is injured by changes favorable to other licensees or applicants. Such licensees may be the only persons injured or adversely affected by the action. In such a case (and this is one), to posit hearing upon the want of consent of the licensee in whose favor the decision is made would be to deprive the only person injured or capable of being injured, and through him the public he serves, of the right to be heard. Such a view would pervert the section into an instrument for suppressing all protest by the only person hurt or likely to be hurt, except possibly as he might raise his voice on appeal, and then only, in the Commission's view, to be met with the answer that he has no right to be heard before it. It would suppress also representation of the public interest which it is the primary purpose of the statute to protect and secure.

In my judgment therefore Section 303 (f) cannot be given the narrow construction, merely duplicating the function and purpose of Section 312 (b), for which the Commission and WHDH contend. In addition to its obvious injustice, contradiction of the statute's general hearing policy, failure to take account of the differences of the two sections in language, subject matter and character of the controversies dealt with, the Commission's view refuses to recognize that the fact of interference rather than mere literal change in the terms of a license is what causes harm and chaos to stations affected, to the industry, and to the public. If accepted, it would also raise serious question concerning the section's validity, both for want of essential minima of procedural due process in some opportunity to be heard as of right and for want of essential fair play in favoring one interested party unduly as against another. Neither preservation of the public interest nor of the Commission's broad power and discretion to conduct its functions in disposing of the public's business requires acceptance of an interpretation so doubtful and unfair.

The foregoing views necessarily contemplate that the hearing provided by Section 303 (f), under the proviso, has in such an application as this "quasi-judicial" rather than merely "legislative" effect. That is true, in my opinion, notwithstanding the Section's principal grant of power is to make rules. In such an application as this, the making of rules relating to the defined changes necessarily affects existing rights by changing them, and that is as true as if the change were made by order rather than by rule.

---

[14] This view derives some support also from the provisions of Section 409(a), note 11 *supra*, that "In all cases heard by an examiner, the Commission *shall* hear oral arguments on request *of either party*," explicitly recognizing the right of more than one person to be a party. (Italics supplied.)

When such an effect is achieved, whether by the one form of action or the other, the ordinary distinction between "quasi-legislative" and "quasi-judicial" action gives way before the elementary requirement that rights be not destroyed or impaired without hearing. The proviso requires hearing whether the change is in form "legislative" or "judicial."

B. The Regulations and Their Application

It remains to consider whether the regulations, as they have been applied, have violated appellant's right to a hearing. The construction given above to Section 303 (f) does not mean that every licensee who may be in some way, however minutely or remotely, affected by the change or who may consider or surmise that he will be affected, is entitled to a hearing or that the hearing must be a full-panoplied judicial proceeding. Further questions therefore are: (1) What interest or injury must an affected licensee have, and how must this be disclosed, in order for him to assert the right to hearing; (2) what is meant by hearing; (3) when does the right arise and when may it properly be asserted?

Interference may affect only a few stations or many. With frequencies crowded as they are, a change in the frequency, power or time of one station may affect dozens, possibly hundreds of others, some seriously, some only slightly. Expedition of the Commission's functions requires that hearings not become radio conventions or terminable trials like some receivership proceedings. There must therefore be some limit to the number of persons entitled to participate as parties and to the extent to which those so entitled may take part.

Apart from applicants and licensees faced with modification or revocation of license, the statute makes no express provision for determining who may be necessary parties, whether by right of intervention or as persons entitled to notice and party status from the inception of the hearing. With the two stated exceptions, the Commission has treated the matter as one of intervention under rules prescribing the basis upon which "affected" stations and others may come in. Under its former regulation, Rule 105.19, Rules and Regulations (1935), disclosure of "a substantial interest in the subject matter" was sufficient. This proved unsatisfactory[15] and has been revised to add the requirement that the petition also show "the facts on which the petitioner bases his claim that his intervention will be in the public interest." Rules and Regulations (1939), Section 1.102.

The two regulations are alike in excluding persons who cannot show substantial interest. There would seem to be no valid objection to this. Participation as parties of persons only insubstantially or remotely interested or affected is not necessary for protection of either private right or public interest. Exclusion of such persons from participation as of right is necessary for efficient conduct of the Commission's functions and to keep the hearings within manageable bounds.

Affirmatively, however, the two rules operate differently. The practical effect of the old one (Rule 105.19) was that affected licensees became parties upon disclosing in the petition "substantial interest in the subject matter." Upon this showing, intervention became a matter of right. So effective, the rule may be taken as having complied with the implicit requirements of Section 303 (f). *Red River Broadcasting Co.* v. *F. C. C.*, 69 App. D. C. 1, 98 F. (2d) 262 (1938). Persons substantially affected by action proposed under that section had the right to come in. That it was exercised nominally as a process of intervention, by filing a petition showing the nature of their interest, rather than by receiving notice and being regarded as parties from the outset, was no more than a reasonable concession to the Commission's difficulty of ascertaining in advance who might be sufficiently interested and of confining the hearing within reasonable bounds. *Red River Broadcasting Co.* v. *F. C. C., supra.*

The new rule (Section 1.102), however, excludes persons substantially interested, including existing licensees "affected," unless the petition states facts to show their "intervention will be in the public interest." The intended purpose was to cut down the number participating under the old rule.[16] The language of the new requirement is ambiguous. If by it were meant that the intervenor must show that the public interest is tied up substantially with his private one, so that in the hearing he would be champion for both, perhaps the analogy to the conditions necessary for appeal, as stated in the *Sanders* case, would sustain the further limitation.

The rule, however, has not been so applied. The Commission has not interpreted it as calling merely for a statement of specific facts to show that the public interest is involved in the petitioner's operations, will be affected substantially and adversely by the change proposed, and consequently that the petitioner's participation will be in championship of both its own and the public interest. Rather as counsel have stated the matter in the brief, the decisions denying appellant's right to intervene were "not based on appellant's lack of interest. The Commission held that whether or not appellant had a sufficient interest, it should not be permitted to intervene because it failed to show *how its participation in the hearing* would be *of any assistance in the determination of the issues involved.*" Referring to the practice under the former rule (Rule 105.19), it is also said that procedure "was abolished because it made impossible an efficient administration of the Act." And again, "It thus became apparent that interest alone was an insufficient test for intervention. . . . Virtually every application involves many persons who claim to be interested. . . . Most such applications are for facilities in a community which already has one or more stations which may be fearful of the petition . . . or are for facilities which cause electrical interference to existing stations. In many situations both factors combine to increase the number of potentially interested persons. . . . In practically every instance the persons who claim interest in the proceedings are existing licensees whose private interests are promoted by protracted proceedings which delay as long as possible the establishment of competing facilities. In view of these facts there is no wonder that the old intervention rule did not conduce 'to the proper dispatch of business and to the ends of justice'."

So applied, the rule comes down at best to one of efficiency, without controlling regard to interest, public or private, or how far it may be affected; at worst to one of mere convenience to the Commission in performing its functions. That this is the meaning and effect of the rule, as it has been applied, appears not only from the argument and the briefs, but also from the Commission's key decision in support of this policy, ***In re Application of Hazelwood, Inc.*** (Docket 5698), from the undue reliance placed in argument upon the breadth of the Commission's discretion and rule-making power, and from the action taken in this case.

A rule which posits the basic right of hearing exclusively upon mere convenience to the Commission or whether the petitioner's participation "will be of assistance to it in determining the issues," leaving this to be determined solely in its discretion, is not reasonable. It is a denial of any right to hearing. That it may be inconvenient or time-consuming for such a body to hear persons substantially interested and affected, or that, in the Commission's exclusive discretion, they may not be able to aid it, furnishes no basis for refusal to hear their side of the case, whether on the facts or the law. Efficiency is not to be bought at such a price to essential fairness *Cf.* Brandeis, J., dissenting in *Myers* v. *United States,* 272 U. S. 52, 240 (1926). If therefore the rule has been applied to appellant in this manner and with this effect, it has cause for complaint. Whether it has been so applied and with such consequence is the remaining question.

Upon that, the facts are important, as are also the questions whether appellant disclosed its own and the public interest and the affectation of both sufficiently. Involved also is the question of what kind of hearing appellant was entitled to have.

In my opinion there was no improper denial of hearing prior to the denial of the second petition for intervention filed December 16, 1940, when the Commission gave notice to KOA and others of its *proposed* findings and conclusions favorable to granting WHDH's application. Until then it was wholly possible the application, filed under Section 309 (a), would be denied. Until that time the proceeding was, as has been pointed out, essentially a one-way matter, involving questions primarily and initially between the applicant and the Commission. It had been unable to decide from the application in favor of the applicant. Accordingly, as the section required, it put the matter down for hearing and notified WHDH. It also gave notice to others who might be affected, including KOA, though the section did not in terms require this. Appellant then petitioned for intervention and the petition was denied, as were a petition to review this action and a motion by appellant to dismiss the application on the ground it did not conform to the rules. In none of this was there abuse of the Commission's powers or discretion or violation of appellant's statutory or constitutional rights. In this initial stage the burden was upon the applicant to convince the Commission *prima facie* that granting its application would be in the public interest. The very fact the matter was set for hearing was a tentative indication the decision would be adverse to the applicant.[17] WHDH had therefore the laboring oar. Unless and until it convinced the Commission there was apparently valid ground, at least a *prima facie* case, for granting the application, no harm was done or could be done to other stations. Hence, until it appeared from this initial stage of the total administrative process that some harm to KOA and others similarly situated possibly or probably would result, there was no essential reason either in due process or in the provisions of Sections 309 (a) and 303 (f) for bringing them in. Until then the Commission was entitled in its discretion, as Section 309 (a) contemplated, to treat the matter as one exclusively between itself and the applicant. So much by way of concession, not only to the terms and the general scheme of the statute, but also to efficiency in performing the Commission's functions, is reasonable.

[16] *Ibid.*

Concomitant with this view of the statute, however, is the requirement that the conclusions of law and fact reached by the Commission in the initial stage, concerning issues which might affect other parties substantially, should be tentative, not final and conclusive, if they were favorable to the applicant. This, in fact, appears to have been observed, since the findings and conclusions were issued as "proposed," not as final and decisive, and notice concerning the proposed action was given to affected persons.

At this point, however, the clash between the interests of KOA and WHDH, and their respective public constituencies, became apparent, with the possibility of the latter's success. WHDH had succeeded in discharging its initial burden. The necessary effect of action in its favor would be to create electrical interference with KOA and also to require its reclassification under the Commission's rules. At this stage, then, the matter had become one no longer primarily between WHDH and the Commission, but one primarily between them, on the one hand, and KOA and other stations adversely affected, on the other. Though the process initiated under Section 309 (a) would not become final and complete until conclusive decision had been made, the provisions of Section 303 (f) then first came compellingly into play, overlapping the final phase of the proceedings under Section 309 (a), and required that persons substantially and adversely affected by the proposed decision be given opportunity to present their side of the case.

At this point appellant filed its second petition for intervention, which was denied January 7, 1941. However, the order permitted it to file a brief *amicus curiae*. It did so and participated in this character in the oral argument upon the question of adopting the proposed findings. On March 27, 1941, the proposed findings and conclusions were adopted by a vote of three to two, with two Commissioners not participating. The members voting in the negative filed a vigorous dissenting opinion. 8 F. C. C. Rep. —— (1941). The decision became effective by formal order April 7, 1941. Appellant's petition for rehearing was then denied and this appeal followed.

In the final and decisive stage of the Commission's action, therefore, appellant was excluded as a party, notwithstanding it was permitted to file a brief and appear in oral argument as *amicus curiae*. Unless these concessions gave it all to which it was entitled by way of hearing, the exclusion cannot stand as justified. This is because the basis on which it was made was not valid. It is not necessary to regard Section 1.102 as invalid, since it may be possible to apply it with valid effect. However, the manner in which it has been applied generally and in this case is invalid, as being contrary both to Section 303 (f) of the Act and possibly also to elementary fair play required by due process.

Conceding appellant's interest, its substantial character, not denying its substantial relation to the public interest or that this as well as appellant's private interest might be adversely affected by the order, the Commission refused to recognize appellant as a party on the ground its petition did not disclose facts to show how its participation in the proceedings would be helpful to or would assist the Commission in deciding the issues. It then belied this action by announcing in the order of denial that appellant might file a brief as *amicus curiae*.

In view of the basis for the Commission's action, it is perhaps not necessary to inquire whether the petition, under some other rule or some other interpretation of the present one, would be sufficient. It was denied for an invalid reason, and that in itself is error sufficient to require reversal, unless its effects were cured by allowing appellant to appear as *amicus curiae*.

The petition, however, more than complied with the rule, apart from the invalid interpretation. It set forth petitioner's interest as a dominant clear channel station on the frequency 830 kc, with freedom from interference at night; that granting WHDH's application would cause electrical interference; require change in classification of KOA's frequency under the Commission's rules; result in degradation of service on frequency 830 kc prejudicial to the priority rights of the United States under the North American Regional Broadcast Agreement; discriminate against service to rural listeners and in favor of urban ones already well served; and stated other reasons not necessary to repeat. This admittedly was sufficient to show the substantial character of petitioner's interest, and in addition its substantial relation to the public interest, including service to rural areas, possible discrimination against them in favor of urban regions, and possible injury to the nation's priority rights under the international treaty, together with possible or probable substantial injury both to appellant privately and to the public interest. So much appearing, the petition complied in every respect with Section 1.102, except the construction that "intervention will be of assistance to the Commission in its own judgment" or "will be convenient for the Commission." The petition therefore complied with the rule in all its valid aspects, and should have been granted.

The Commission argues, however, that appellant was accorded in substance its full right to hearing, notwithstanding it was excluded as a party, because, first, it was allowed to file a brief and to appear in oral argument as *amicus curiae;* and, second, under Rule 1.195 appellant had, but failed to exercise, the right to present such evidence as it might choose to submit. Rule 1.195 provides for maintaining in the office of the secretary a record of all communications received relating to the merits of any application, together with the names and addresses of the senders. When the date for hearing is set, the secretary is required to notify these persons that they will have opportunity to appear and give evidence. Under the rule they are not precluded "from giving any relevant and competent testimony" because they lack "a sufficient interest to justify . . . intervention as a party. . . ." In view of these things the Commission says appellant had, but waived, full opportunity to present evidence, and had also full opportunity for argument, oral and written, upon the legal issues—thus, in effect, to appear upon both the facts and the law. It asserts therefore that appellant actually was deprived of no substantial right. This presents the final refinement of the issue.

Appellant claims too much. The petition, among other things, sought to "reopen the proceeding in order to afford petitioner an opportunity to introduce evidence, to cross-examine all witnesses, and otherwise participate fully in the proceedings; upon such record file proposed findings of fact and conclusions of law; have the right to file exceptions to any proposed Commission decision thereafter issued; request oral argument upon such proposed decisions and upon its exceptions thereto; in all respects participate fully in the important issues involved in the application" of WHDH. In short, appellant sought not only to participate as a party in the final and crucial stage of the process under Section 303 (f), but also to reopen, repeat and participate in the initial stage under Section 309 (a) as fully as would a party in judicial proceedings in equity with the rights to present evidence, cross-examine witnesses, including all who had been heard previously, take exceptions, submit findings, take part in argument, etc. Such a view of the proceedings would convert them essentially into a judicial trial in the final stage for reexamination *de novo,* so far as appellant might demand, of issues and matters presented in the initial one. In my judgment no such extensive right of participation is contemplated by Section 303 (f) or any other section, or is required by due process, and to enforce it would pervert the statutory scheme, convert the requirement of fair administrative hearing into one for a judicial procedure, and bring about a clogging of the Commission's work and functions inconsistent with their nature, complexity and due performance.

Both the Commission and appellant therefore have gone too far in their positions. On the one hand, appellant's right to hearing is not conditioned absolutely in the Commission's discretion, as it would be if limited to participation in argument as *amicus curiae* and in presenting facts under the provisions of Rule 1.195, applicable to all members of the public. Its right to participate is to do so at a matter of right, not of grace, and as a party. That is true, notwithstanding the extent of participation allowed as a matter of grace or discretion may be substantially or nearly identical with what the party is entitled to have as a matter of right. On the other hand, appellant is not entitled to a full-dress judicial proceeding or to dictate the extent of its participation, without regard to reasonable limitations which may be imposed by the Commission to achieve orderly and not unduly extended hearings. Some middle ground therefore must mark out the boundary between appellant's right and the Commission's power.

---

[17] MONOGRAPH OF THE ATTORNEY GENERAL'S COMMITTEE ON ADMINISTRATIVE PROCEDURE, PART 3, FEDERAL COMMUNICATIONS COMMISSION (1940) 13.

It would be enough to dispose of the appeal that appellant was excluded from appearing as a matter of right and allowed limited participation as a matter of grace. But to do this, without more, would leave the further proceedings in doubt. Two problems must be distinguished, one the determination of appellant's right to participate, the other the extent of that right. The former is not a matter of discretion with the Commission. One in appellant's position must be heard upon issues such as this proceeding involved in the final stage, under Section 303 (f). But that right is not inconsistent with the Commission's requiring its existence to be shown by something more than mere general allegations that the holder is substantially interested, will be substantially affected, and that the public interest is involved and will be likewise affected. If this were all that could be required, practically everyone affected in any way, immediately or remotely, substantially or slightly, could come in at his option by alleging these generalities. On the other hand, it is not necessary to set forth the evidence which would be presented on the merits, nor would requiring this be reasonable. Between these two extremes a middle ground may be found to enable the Commission to determine that the interest and the injury, public and private, are substantial and real rather than insubstantial or visionary, and are substantially related. Perhaps an analogy can be taken from judicial proceedings in which findings of fact are required, in the distinctions which involve evidentiary facts, basic facts and ultimate facts.[18] There could be no undue limitation of the right to appear in requiring existence of the ultimate facts on which it is posited to be shown by statement of such basic facts, so that the Commission might be guided by something more than the vacuistic formulae of "substantial interest," "adversely affected," etc. So much at least would seem to be properly conceded, not to the Commission's discretion, but to the necessity that it be enabled to distinguish with reasonable certainty between persons entitled to come in as of right and others not so entitled but claiming this status on grounds insufficient once the actual facts of their situation become apparent. If at times there may be difficulty, as there is in judicial proceedings, in determining what are basic as distinguished from merely evidentiary facts, reasonable latitude toward including some of the more important of the latter will resolve it. The error if any should be made upon the side of stating more rather than less than may be actually necessary.

The other problem, involving the extent of the right to participate, is properly within the Commission's discretion under its broad rule-making power, reasonably exercised, beyond a few essential minima required by elementary notions of fair play. Neither the statute nor the Fifth Amendment prescribes specifically what these minima are. Nor has it been made clear by judicial decision what constitutes a minimum compliance with due process in the way of administrative hearing. Presumably this will vary to a considerable extent with the nature of the substantive right, the character and complexity of the issues, the kinds of evidence and factual material,[19] the particular body or official, and the administrative functions involved in the hearing. In other words, essential fairness of hearing bears some relation to these factors, but beyond certain, though very few, basic requirements which may be common to all fair hearings, the extent of participation by parties and others is a matter for regulation by statute or properly conferred rule-making authority.

The Communications Commission deals with highly technical and complex engineering and economic functions and relations, a highly organized and crowded industry serving primarily a public interest, but strongly affected with private incentive. Its functions are both regulatory and quasi-judicial. Its action in a single case often affects many persons, station licensees and others. Its hearings therefore tend to be many-party ones, in which each one appearing seeks as large a participation as possible. Often certain issues affect some, but not other parties. Yet once a party has come in, his tendency is to have a hand in all that goes on. Cross-examination especially lends itself to abuse in such a situation.[20] So does the opportunity to present expert testimony.[21] Consequently, in contrast with the fundamental right to come in, to be present as a party and be heard, much in the way of discretion must be conceded to the Commission in controlling the extent to which parties may be allowed to participate. The Commission's objective of keeping the hearings within manageable bounds is to be achieved, therefore, not as has been attempted by excluding persons who rightfully should come in, but by controlling through reasonable regulation the extent to which they may take part. As to this the Commission has and rightfully may exercise much authority in various specific ways.

The essential minima for fair hearing would seem to include a reasonable opportunity to present evidence concerning disputed issues of fact and argument upon issues of law affecting the party tendering them, and to do both as a party to the proceeding, not merely in the character of one present on sufferance or favor. In neither respect however does this mean, as appellant seems to think, that a party may require retracing all steps taken before the stage at which his right to come in arises or that he may wander throughout the record upon issues affecting other parties, but not himself substantially.[22] In this case, therefore, it does not mean, as appellant assumed, that it could require the entire proceedings prior to the time of its proper intervention to be reopened with right on its part to cross-examine all witnesses heard in the preliminary stage under Section 309 (a) and, apparently, in its discretion to compel reproduction of all testimony then produced. Such a view would force the Commission to incur the waste of holding the preliminary hearing upon the application under Section 309 (a) and then repeating all that had been done in it when it becomes apparent, from the proposed determination favorable to the applicant, that the final stage of hearing under Section 303 (f) must be gone through with in order to afford one in appellant's position his opportunity to be heard.

The statute contemplates no such wasteful process, and in my opinion due process does not require it. Adequate protection for appellant's rights can be secured without this, and in full consonance with the statutory scheme. It contemplates, as has been said, a preliminary hearing in which only the applicant is required to be present as a private party. It may become final, if the decision is adverse to him. If so, others affected will not be harmed, and their presence in this stage would only clutter the proceedings and the record. If not, then appellant's right to hearing arises under Section 303 (f). But nothing in the act or in the Constitution requires this to be entirely *de novo*. It is enough that it be adequate.[23] At the proper stage of intervention, the record in the preliminary hearing has been made. It may be made available to the intervenor. From the multiplicity of evidence and of issues it is not unfair to require him to specify, at least in a general way, the issues he proposes to meet, the evidence he wishes to contradict, and other matters concerning which he wishes to raise objection. This should be done with particularity, not merely by broadside charge against the entire previous proceedings. With the issues so self-limited, it will then be for the Commission to determine whether, in the exercise of its quasi-judicial discretion, the intervenor's participation should be further limited, in relation to the production of evidence, cross-examination, argument or other normal incidents of hearing. In this manner each party may be restricted fairly to the issues and participation pertinent to his case, rather than allowed to roam through the entire proceedings upon matters relevant to others, but not to himself or matters concerning which he has no objection. Perhaps a considerable part of such confinement may be accomplished by the issuance of appropriate general regulations. But whether by that method or by action in the particular case, the result may be achieved of affording the intervenor fair and adequate hearing, without at the same time permitting him to run away with the hearing, nullify all that has gone before the intervention, or unduly extend the hearing beyond what fair protection of his rights and the public interest may require.

[18] Saginaw Broadcasting Co. v. F. C. C., 68 App. D. C. 282, 96 F. (2d) 554 (1938).

[19] See Davis, *The Requirement of Opportunity to be Heard in the Administrative Process* (1942) 51 YALE L. J. 1093, 1106, 1117.

[20] *Id.* at 1103. MONOGRAPH, *op. cit. supra* note 17, at 16, 17.

[21] Particularly when the agency has a body of technical experts, such as the Commission's engineering staff, competent to give disinterested expert opinion upon the technical issues or questions. See MONOGRAPH, *op. cit. supra* note 17, at 19.

[22] This seems implicit in the well-recognized rule that due process requirements are satisfied if at any time before governmental action becomes final, hearings are allowed either by administrative or judicial action, and therefore persons not directly or immediately affected in the initial stages of a hearing which involve primarily the interests of others may be excluded until a later phase when their interests become directly and immediately involved. See Davis, *op. cit. supra* note 19, at 1104, 1136-40, and authorities cited; MONOGRAPH, *op. cit. supra* note 17, at 20.

[23] *Ibid.*

It is not necessary to extend the discussion further. Appellant has shown sufficiently its right to come in. It should have been allowed to do so, as a party to the proceeding, not merely as a friend of the Commission or a member of the public. That is true, notwithstanding the extent of participation actually allowed may have been substantially all that a party was entitled to have, though by this statement it is not intimated that this was true. That question need not be determined. It is one thing to be present as a party, and as a matter of right. It is another to appear upon favor or by sufferance. It is still another to be heard in a particular fashion or at a particular time or stage.

Appellant's right arose, not when the preliminary proceedings upon the application were begun nor when the matter was set for hearing, nor thereafter prior to issuance of the "Proposed Findings of Fact and Conclusions"; but when these were issued. At that time, upon the showing made in appellant's petition, it should have been recognized as a party and allowed to participate thereafter on that basis.[24]

The extent of its right to participate, however, was largely within the discretion of the Commission, having due regard to the principles above stated. Appellant was not entitled as a matter of right to all of the relief demanded in its second petition to intervene or in the petition for rehearing, and upon another hearing may be required, in the Commission's reasonably exercised discretion, to confine itself as has been indicated, and to point out with reasonable particularity the portions and features of the previous proceedings it wishes to challenge.

This does not amount, in substance or effect, to acceptance of the Commission's view that appellant can be excluded for failure to set forth facts to show that its intervention will be of assistance to the Commission in deciding the issues. That factor is pertinent to the question how far appellant may participate, though perhaps not conclusive of it. It is not the criterion of the right to be heard. It may, in fact, have exactly the opposite effect, that is, the intervention may present facts or legal argument, contrary to those tentatively accepted by the Commission, which will make its decision more difficult. That is one purpose of hearing. Nor does this view posit the right to be present and to take part upon an exercise of the Commission's discretion or favor. With that right established, every other has protection, and if there is violation by some attempted exercise of discretion in any other respect it may be corrected, first by argument before the Commission itself, or if it is not corrected there, then by appeal.

Without attempting therefore to blueprint the procedure to be followed with respect to the extent of appellant's participation in another hearing, we may leave such matters to the Commission's judgment, where they properly belong, subject only to compliance with the basic requirements of fair play and adequate opportunity to be heard.

For the error in excluding appellant from participation as a party in the final and controversial stage of the proceeding, contrary to the requirement of Section 303 (f) of the Act, the order must be reversed, with directions to afford appellant opportunity for hearing in accordance with the provisions of that section.

Reversed and remanded.

GRONER, C. J., and VINSON, J.: Judges Groner and Vinson concur in the conclusion of Judge Rutledge that appellant has not only a right to appeal to this court under Section 402 (b) (2) of the Act, but also the right to intervene in the proceeding before the Commission. We are, therefore, in agreement with Judge Rutledge that the case should be reversed and remanded for further hearing.

In view of the importance of the principles involved, we consider it desirable, however, to set out in a word our separate views as to the meaning and effect of those Sections of the Act upon which we all agree the decision must turn.

We are in agreement with Judge Rutledge that under Section 303 (f) the Commission should have accorded appellant the right to participate in the hearing as a party. But we are also of opinion that, since in the facts of this case it is apparent that the granting of the application of the Matheson Radio Company, Inc., operators of Station WHDH at Boston, would result in what amounts, if substance be regarded rather than form, to a modification of appellant's license, Section 312 (b) of the Act also provides a right of participation by appellant in the proceedings under that application. While the question is no longer material here—since we assume that, in the present state of the record, the Commission will re-open the proceedings and permit the intervention of appellant as a party—we express our disagreement with the view of Judge Rutledge that the Commission, in its discretion, may exclude appellant from participation until after the proposed findings of fact have been made. It is our view that participation in the hearing, under either Section 303 (f) or Section 312 (b), should have been accorded both to appellant and to Matheson Company from the outset. It is true that Section 309 (a) appears to contemplate that if upon examination of an application for a station license, or the renewal or modification thereof, the Commission shall make a determination in favor of the application, it need not accord a hearing to the applicant. But we think, whatever the effect otherwise of this section may be, it is inapplicable in the facts of this case. Here the application of Matheson Company for an extension of its facilities is in effect an application, as we have said, the granting of which will, if substance be regarded, modify the license of appellant. In the circumstances, we think Section 312 (b) is applicable and that both appellant and the Matheson Company were entitled to participate in the proceedings as parties and with the rights of parties. We think the statute contemplates that a licensee's right, although limited and defeasible, shall not be modified or destroyed without a hearing. To allow a hearing only after proposed findings of fact have been made is to deprive appellant of participation during the crucial period of the proceeding—that is, when the evidence is being taken and the record being made up. Appellant's interest existed from the beginning, and it is not enough that that interest was considered by the Commission. It is axiomatic that one whose rights will be affected, not only may himself engage in their protection, but must do so affirmatively and at every step in the proceedings—or take the consequences of his default. *Red River Broadcasting Co.* v. *Federal Communications Commission,* 69 App. D. C. 1, 98 F. 2d 282. There was no default in this case.

STEPHENS, *Associate Justice:* I concur in the conclusion of Judge Rutledge that the appellant has not only a right to appeal to this court under § 402 (b) (2) of the Communications Act but that it had also the right to intervene in the proceeding before the Commission, and I am therefore in agreement with Judge Rutledge that the case should be reversed and remanded for further hearing. I am also in agreement with the views and conclusions expressed by Judges Groner and Vinson in their separate opinion. I desire to add the following:

I am aware that the provisions in the Communications Act for hearings speak *in terms* of licenses and rights which are undergoing alteration, suspension or revocation through direct action of the Commission thereon, and not *in terms* of the rights of existing licensees—such as those of the appellant—which will be impaired by the direct action of the Commission in extending the facilities of another licensee. But I think that by clear implication the safeguards of the Act operate for the benefit of such a licensee as the appellant. For it cannot be doubted that the modification—in the instant case the extension of facilities—of one license right may have the consequence of impairing, or even of destroying, the business of another licensee; this in practical effect is a modification or revocation of his license. A contrary view would regard form rather than substance. That the granting of new or additional station rights may have the consequence of impairing or destroying the business of an existing licensee is recognized in *Commission* v. *Sanders Radio Station,* 309 U. S. 470 (1940), where the Supreme Court, after stating that it is not the purpose of the Act to protect a licensee against competition but to protect the public, that Congress intended to leave competition in the business of broadcasting, stated also:

> This is not to say that the question of competition between a proposed station and one operating under an existing license is to be entirely disregarded by the Commission, and, indeed, the Commission's practice shows that it does not disregard that question. It may have a vital and important bearing upon the ability of the applicant adequately to serve his

---

[24] This statement is not intended as meaning that adequate hearing might not have been afforded at a later stage, by appropriate regulation, as upon petition for rehearing. *Cf.* United States v. Illinois Central Ry., 291 U. S. 457 (1934); Comment, *Necessity for Hearing Before Enforcing Order of Interstate Commerce Commission* (1934) 43 YALE L. J. 1300; Davis, *op. cit. supra* note 19, at 1136-40.

> public; it may indicate that both stations—the existing and the proposed—will go under, with the result that a portion of the listening public will be left without adequate service; it may indicate that, by a division of the field, both stations will be compelled to render inadequate service. . . . [309 U. S. 475-6]

It is true that in the *Sanders* case the statement is made that the policy of the Act is that no person is to have "anything in the nature of a property right as a result of the granting of a license." But the opinion is that case also recognizes that station licensees may be financially injured by the issue of a license to a competing station. The language first quoted must be read in connection with the opinion as a whole and in connection with the utterances of the Supreme Court in *Federal Communications Commission* v. *Pottsville Broadcasting Co.*, 309 U. S. 134 (1940), and *Radio Commission* v. *Nelson Bros. Co.*, 289 U. S. 266 (1933). In the *Pottsville* case the Court said: "To be sure, the laws under which these [administrative] agencies operate prescribe the fundamentals of fair play. They require that interested parties be afforded an opportunity for hearing." In the *Nelson Bros.* case the Court said: "Whether the Commission applies the legislative standards validly set up, whether it acts within the authority conferred or goes beyond it, whether its proceedings satisfy the pertinent demands of due process, whether, in short, there is compliance with the legal requirements which fix the province of the Commission and govern its action, are appropriate questions for judicial decision." In view of the *Pottsville* and *Nelson Bros.* cases, and in view of the provisions of the Communications Act which recognize rights, limited in time and quality by the terms of the licenses issued, in station licensees (see especially §§ 301, 309 (b) (1), (2), 319 (b)), I think it clear that a station license issued under the Communications Act for a definite term for the conduct of a broadcasting business requiring substantial investment is more than a mere privilege or gratuity. Whether or not it may be technically called a property right, it is a thing of value to the person to whom it is issued and a business conducted under it may be the subject of injury. I think the Supreme Court in the *Sanders* case in its reference to the absence of "anything in the nature of a property right as a result of the granting of a license" was using the term property right in the sense of a right absolute or indefeasible. It is clear of course that under the Communications Act a station licensee's rights are subject to modification, or even to revocation, in the public interest. But I do not think the *Sanders* decision was intended to be taken as meaning that no right even of a limited and defeasible nature exists in a licensee. Nor do I think that the decision was intended to mean that an existing broadcasting station and the investment therein may be injured or destroyed by the introduction of competition or through the extension or modification of the facilities of other licensees *without a hearing before the Commission on the question whether the public interest, convenience and necessity will be served by such injury or destruction.*

Even if the Communications Act were doubtful in its recognition of the existence of rights in licensees and in its provision for hearings upon the question whether the public interest requires the reduction or destruction of such rights, I think it would be the duty of the courts to construe the Act as recognizing such rights and providing for such hearings—and this for two reasons. First, in the absence of indubitably clear language requiring such a conclusion, it would be unthinkable to conclude that the Congress would provide for the granting of station licenses for radio broadcasting contemplating, in connection with operating a station, investment in building space and equipment, the hiring of talent, the contracting for advertising, and the employment of labor, but at the same time fail to recognize that by whatever technical name they might be called, whether property rights or license rights, interests would arise, in the persons to whom licenses were granted, which should as a matter of fair play not be impaired or destroyed by the Communications Commission without a hearing upon the question whether the public interest would be served by their impairment or destruction. Right to a hearing before injury by the government in the public interest is one of the fundamental decencies guaranteed by democratic institutions. It is the safeguard of the Anglo-American legal system against arbitrary or capricious action by public authorities. No purpose should be attributed to Congress to deny such a right. Second, to construe doubtful language of Congress as permitting the impairment or destruction of a licensee's interests without a hearing would be to invalidate, under the due process clause of the Fifth Amendment, the action of Congress. That that clause protects against the arbitrary impairment or destruction of substantial rights even though they are limited by the public interest, is not open to doubt. *Cf. Northern Cedar Co.* v. *French*, 131 Wash. 394, 230 Pac. 837 (1924).

Mr. Justice Miller dissenting: I find no substantial allegation of injury in any of appellant's reasons for appeal. Surely it is not enough, to secure standing to appeal on the basis of affectation of interest or aggrievement, that electrical interference will occur beyond that previously occurring. Surely some injury, actual or anticipated, should be the minimum requirement. And if injury has occurred or is threatened, what other test or measure of its substantiality could there be than that it is financial?

In the *Sanders* case the Supreme Court said: "Congress had some purpose in enacting §402 (b) (2). It may have been of opinion that one likely to be *financially* injured by the issue of a license would be the *only person having a sufficient interest* to bring to the attention of the appellate court errors of law in the action of the Commission in granting the license."[1] [Italics supplied.] Of course, stated as it is in speculative form concerning legislative purpose, it is possible to argue that this language was not intended to say that *only* a person likely to be *financially* injured has a sufficient interest, within the meaning of Section 402 (b) (2). But I think that is exactly what the Supreme Court intended to say. As the Commission in its brief points out, the word financially, which I have italicized, was added after the opinion was first released.[2]

While intangibles such as prestige, or position, in the broadcasting world may seem valuable to a licensee, still they are unimportant—in view of that free competition which Congress intended should exist in the field of broadcasting—unless injury to them would result in financial injury. If, for example, loss of prestige should result in loss of advertising then, perhaps, a tangible injured interest would appear which would give standing to appeal. But if there is no interest, of such character, that it will reveal itself in terms of financial injury, then there is no sufficient interest to give standing to appeal.

This is true even of a licensee which is operating on a nonprofit basis, a college, a church, or a benevolent institution. Financial backing is required to maintain such a licensee. If the injury threatened, endangers that financial backing then the licensee may have standing to appeal; otherwise not. Where else could the line be drawn? Would it be sufficient that a Methodist organization was aggrieved by hearing Baptist doctrine preached in the same listening area; or that one college should be disturbed by the songs and cheers of a rival institution of learning?

It is apparent in the present case, therefore, that unless electrical interference was likely to result in financial injury appellant was not an aggrieved or affected person within the meaning of the statute. And if financial injury was likely to result, the licensee could have spelled out that fact in his reasons for appeal. It imposes no undue burden upon one who seeks judicial review of the Commission's decision, to require that he specify clearly, unequivocally, precisely, the nature of his alleged injury. This, appellant has failed to do.[3] Consequently, I would dismiss the appeal.

Edgerton, J., dissenting: I think that "person aggrieved or whose interests are adversely affected" contemplates a substantial injury as distinguished from a trifling or negligible one. I should suppose that interference *might* affect reception of KOA's signal so adversely, and over so large and important an area, as to cause substantial injury and give appellant standing to appeal, whether or not it caused financial loss. But interference is an elastic term; it may be of any degree. Some interference is minimal and practically harmless. Appellant's notice of appeal, though it alleges "substantial modification" of its license, alleges neither substantial injury nor any facts which constitute substantial injury. It alleges nothing more injurious than "interference to KOA in areas where KOA's signal is now interference free." This allegation would be supported if it were shown that in some small area, thousands of miles from Denver, and of no actual or potential importance to appellant, a few listeners could and did at rare intervals get, without interference, a feeble signal from KOA, and that their reception of that signal would be made a little worse by WHDH's modification. I think such an allegation would not show standing to appeal. Since appellant's actual allegation may mean no more, we can accept it as showing standing to appeal only if we waive the rule that pleadings are to be construed against the pleader.

[1] Federal Communications Commission v. Sanders Brothers Radio Station, 309 U. S. 470, 477.

[2] See Federal Communications Commission v. Sanders Brothers Radio Station, 309 U. S. 642.

[3] Stuart v. Federal Communications Commission, 70 App. D. C. 265, 267, 105 F. (2d) 788, 790; Perkins v. Lukens Steel Co., 310 U. S. 113, 125: "Nor can respondents vindicate any general interest which the public may have in the construction of the Act by the Secretary and which must be left to the political process. Respondents, to have standing in court, must show an injury or threat to a particular right of their own, as distinguished from the public's interest in the administration of the law."

If we take that step, I think we should affirm. I find nothing in the Communications Act which required the Commission to give appellant a hearing; quite the contrary. Yet the Commission gave appellant a hearing. It violated neither the Act nor due process.

The Commission was asked to and did modify the license of WHDH. Sec. 309 (a) of the Communications Act provides in effect that the Commission may grant, though it may not deny, an application for modification without a hearing. Most modifications of licenses affect other licensees, and Congress might easily have required that other licensees who stand to lose be given a hearing. It did not. So far as the Act is concerned, therefore, no hearing was necessary. True, Sec. 303 (f) requires that the licensee of a station be given a hearing if the Commission is to change that station's "frequencies, authorized power, or . . . times of operation." But that section is not applicable here, since neither the frequency, the power, nor the time of KOA, appellant's station, is being changed. Similarly, Sec. 312 (b) forbids "modification" of a license without opportunity to the licensee to show cause why the license should not be modified; but that section is not applicable, since appellant's license is not being modified in any particular.[1] Its license merely authorized it to operate with specified equipment, frequency, power, and time, and still authorizes it to operate with the same equipment, frequency, power, and time. To say that appellant's frequency or its license is being "changed" or "modified" seems to me an inapposite figure of speech. It is true that the Commission's rules, until they were changed in the course of these proceedings, stated that only one Class I station "will be assigned" to the frequency of 850 kilocycles. But that statement of the Commission's purpose or policy was not incorporated, or referred to, in appellant's license. Therefore the license cannot, unless by a most liberal construction, be regarded as intended to make any exclusive grant to appellant, whether of equipment, frequency, power or time. Appellant's license is no more exclusive in respect to frequency, power, and time than in respect to equipment. And the settled rule requires not a liberal but a strict construction of franchises and licenses.[2] Moreover, Section 301 of the Act provides that "no . . . license shall be construed to create any right, beyond the terms, conditions, and periods of the license," and the Supreme Court has said: "The policy of the Act is clear that no person is to have anything in the nature of a property right as a result of the granting of a license. Licenses are limited to a maximum of three years' duration, may be revoked, and need not be renewed. Thus the channels presently occupied remain free for a new assignment to another licensee in the interest of the listening public."[3]

The Constitution does not, in my opinion, give appellant a right to a full hearing, of the trial type, in the proceedings before the Commission. In the absence of statute, licensing authorities are usually under no duty to give any sort of hearing to license holders before changing rules which affect the value of licenses.[4] Appellant's case is somewhat similar to that of a licensed automobile operator who hould demand that he be given a hearing before the speed limits are reduced. It is stronger in one respect; for appellant is, and the particular automobile operator is not, more likely than anyone else to be affected by the change proposed. But it is weaker in another respect; for appellant is not, and the automobile operator is, forbidden to do after the change what he was free to do before the change. Only the consequences of appellant's activities, and not the activities themselves, are affected by the change which the Commission has made in the license of WHDH. Appellant is in substantially the same position as the owner of a licensed garage or liquor store who is subjected to new competition by the licensing of a similar business nearer his own than would have been possible under the regulations which were in force when his own license was issued.

It may be that appellant was, as a matter of due process, entitled to some sort of hearing. The Commission's proceedings had a fact-finding aspect, and were more likely to affect appellant's interests than those of any other person. But appellant was not entitled to a hearing which should include "the incidents of a trial in court."[5] Persons may be "heard" without being "permitted to intervene, and thus become parties."[6] Appellant was entitled to no more than a hearing reasonably adequate to protect its interests and reasonably practicable for the Commission and the public; in other words, to a fair opportunity to bring its facts and arguments to the Commission's attention.[7] It had such a hearing—whether of right or of grace we need not inquire. Pursuant to the Commission's Rule 1.195, it was given an opportunity to appear and present evidence. It chose not to do so. It was permitted to, and did, file a brief and make oral argument. Nothing more was required. It was not formally a party, and some aspects of a trial at law, including opportunity for cross-examination, may have been absent. To rule, as the majority of the court in effect do, that the Commission's action was therefore erroneous, is to cramp the administrative process by forcing it into the very mold which it is designed to avoid.[8] Since the Commission had to decide primarily a question of policy and only incidentally a question of fact, the technique of a trial would have been clumsy and wasteful.[9]

Programs for Victory

Col. Marriner to Urge Radio Courses

In an effort to increase the number of ESMWT-NAB courses in the Fundamentals of Radio, Col. A. W. Marriner, Director of Communications, Army Air Forces, is to communicate with all qualified schools urging them to give such training.

This follows letters to state schools by broadcasters, which pointed out that tens of thousands of radio technicians were urgently required.

Burton Writes 24 Schools

Thanks are extended to the many station managers who have written educational institutions regarding the necessity for the training of tens of thousands of radio technicians.

The longest single list of educational institutions receiving letters from an individual writer has been sent by D. A. Burton, owner, WLBC, Muncie, Ind.

His list of Indiana institutions included twenty-four—liberal arts colleges, Teachers colleges, and Engineering schools.

Request to write schools was made on page 531 of the NAB Reports of September 4 and on page 540 of the September 11 issue. If you have not written in accordance with the September 4 and 11 requests, we sincerely believe that it will help the war effort if you will do so.

"What Can I Do" Is Going Well

Serving as an object lesson to young and old is a letter written by an 84-year-old lady, Mrs. Mary S. Dodge, Boston, Mass., in response to hearing one of the "What Can I Do" announcements over WMEX, Boston.

---

[1] Sec. 303, including (f), deals in a summary way with the "powers and duties of Commission." Sec. 312, including (b), deals in a detailed way with "revocation and modification" of licenses and with "notice and hearing."

[7] When an importer has contested the valuation of his goods by the customs service, and exercises his right to have them valued by appraisers, the question "is not to be tried before the appraisers as if it were an issue in a suit in a judicial tribunal." Auffmordt v. Hedden, 137 U. S. 310, 323. If he "is afforded such notice and hearing as enables him to give his views and make his contention in respect of the value of his goods, he cannot complain." Criget v. Hedden, 155 U. S. 228, 238.

[8] *Cf.* Federal Communications Commission v. Pottsville Broadcasting Co., 309 U. S. 134.

[9] *Cf.* Davis, The Requirement of Opportunity to be Heard in the Administrative Process, 51 Yale L. J. 1093, 1098.

Appellant could have had a hearing of the trial type if it had chosen to comply with the Commission's rule regarding petitions to intervene.

After requesting a copy of the book Mrs. Dodge wrote: "I know there must be something I could do. I am 84 years old and not as able to do as I did in the last war, but how I wish I could find something. My sight is going fast but I have been told not to give up doing all I can. Not to rest my eyes as the backs of them are hardening. Do you think I am too old to have my blood given for future use?"

BOSTON

W. S. Pote, WMEX Director, wrote that 15 to 18 announcements per day is producing a "ton" of mail.

That kind of promotion throughout the country should get rid of ten million books in short order.

VISALIA

And on the Pacific Coast comes word from Charles Niete, defense reporter, KTKC, Visalia, Calif., that "What Can I Do" is exactly what we have been looking for."

WEST PALM BEACH

WJNO, West Palm Beach, Florida, has put its first special promotion behind the distribution of WHAT CAN I DO by arranging for a complete discussion of the booklet on "Forum of Civic Progress" show.

Mayor J. O. Bowen, vice chairman of the Palm Beach County Defense Council, launched the promotion.

Since the distribution of these books is distinctly a sales job which stations themselves know how to do best, there has been released only a very small quantity of promotion material from Washington.

The only seeming possibility of running into temporary difficulty is through exhaustion of supplies of copies of "What Can I Do". But this can be overcome almost instantly by having the local Civilian Defense Council communicate with the State Office. Books are printed and stacked in Chicago, awaiting orders.

Mass Induction in 2 Florida Cities

Norman McKay of WQAM, Miami, and Larry Roller of WJNO, West Palm Beach, have completed arrangements for a joint program of a mass induction service taking place in both cities. The program is scheduled for today 5:15 to 5:45 P. M. Mayor C. H. Reeder of Miami, Captain H. H. J. Benson, Chief of Staff, Seventh Naval District, the American Legion Band, and Mayor J. O. Bowen of West Palm Beach will participate.

KMBC Collects Million Pounds Scrap

More than one million pounds of scrap metal were collected in KMBC's $200 "Scrap Metal Collection Contest." Contestants' poundage was proven by receipts from junk dealers. Here are the prize winners together with the amounts of their collection:

Troop 240, Harrisonville, Missouri, collected 59,590 pounds of scrap. Won first prize of $50 in Boy Scouts contest.

Troop 120, Kansas City, Missouri, collected 38,515 pounds and won second prize of $25. Patrol leader Tom Erwin of this troop personally collected 9,500 pounds of scrap and iron and won $25 for the job.

Powhattan 4-H Club, of Browne County, Kansas, collected 190,465 pounds of scrap and took first place in the contest arranged for Future Farmers and 4-H boys and girls. Received $50 in prize money. Second place and $25 went to Lexington, Missouri, Future Farmers chapter. This chapter collected 91,444 pounds.

The individual award of $25 for the farm youth turning in the most scrap metal went to Walter Skinner, Fairview, Kansas, FFA Chapter, who collected 19,880 pounds.

Sell $157,000 Bonds in Hour

It looks as if Jack Mitchell of KTSA staff, San Antonio, has set up some kind of record in selling War Bonds.

Lew Lacey, station promotion director, is authority for the statement that "Mitchell sold $157,000 in Bonds to an audience of 2,500 in less than one hour's time and without any advance commitments of any kind."

This occurred during a special showing of "Wake Island" and in assisting the local picture industry.

Total bond sales for the evening were $309,000.

WHO Sells $400,225 in Bonds

A red, white and blue membership certificate in WHO's U. S. War Savings Bond Club, for pasting on windows of members, was received at NAB headquarters this week. Woody Woods, WHO, director of public relations, said that sales through September 12, 1942, were $400,225.

WCBI Sells $10,000 in Bonds

During a short campaign over WCBI, Columbus, Miss., staff announcers sold $10,000 worth of bonds, according to General Manager Bob McRaney.

Announcer Billy Shackleford topped all participating announcers in the campaign by selling $4,000 worth of bonds.

As first place winner he was presented with a $25 bond by the Chairman of the Lowndes County bond sales committee.

TREASURY SPOTS MAY BE SOLD

A folio of announcements which may be sponsored locally have been mailed all stations by the Treasury Department War Savings Staff.

They are known as the "Sponsored Authors Announcements," since each has been written by a nationally known writer.

Included in the list of eleven writers are:

Louis Bloomfield
Faith Baldwin
Granville Hicks

"GOD'S MINUTE"

W. C. Alcorn, Vice President and General Manager of WBNX, submits a most interesting program suggestion. It calls for a 1-minute program under the title, "God's Minute," to be broadcast each day from 11:59 a. m. to high noon. The individual station would enlist the cooperation of the clergy within the community and of prominent laymen to broadcast 1 minute of prayer, the prayer to be uttered in behalf of the safety of our boys in the service and the success of our military enterprise.

The title, "God's Minute," is a copyrighted one belonging to the John C. Winston Company, publishers of a book by that name. That Company has been kind enough to release the title for use by any radio station provided the program is not commercially sponsored and that no direct quotation from the book is made.

This is a program suggestion worthy of consideration of all station managers. If further details are desired, we shall be very glad to provide them.

Listener Activities

CLEVELAND COUNCIL REGIONAL CONFERENCE

The Radio Council of Greater Cleveland will hold its second regional conference on radio Thursday, September 24, at the

Higbee Co. Auditorium. The morning session will be devoted to discussion of children's programs. Miss Mary Grannan, Supervisor of Children's Programs of the Canadian Broadcasting Corporation and author of the "Just Mary" stories, will entertain the children with some of her inimitable stories. This will be followed by discussion by the children of various radio programs.

The afternoon session will be devoted to a series of talks as follows: "Through a Woman's Eyes," by Miss Sheela Carter, News Commentator of MBS; and "Radio's Responsibility to Children," by Miss Grannan.

Following the talks a series of conferences will be held as follows:

Producing Children's Radio Programs—Leader, Mrs. Frederick T. McGuire, Jr., Junior League.

"The Parent's Responsibility for Radio Listening"—Leader, Mrs. Keith Weigle, Director, Northeast District, Ohio Congress of Parents and Teachers.

The Radio Chairman's Job—Leader, Mrs. J. E. Reeb, Radio Chairman, Lakewood Council of Parents and Teachers.

Standards for Evaluating Radio for Children—Leader, Miss Margaret L. White, Supervisor of English, Cleveland Elementary Schools.

MINNESOTA RADIO COUNCIL MEETS

The Minnesota Radio Council opens its season on Friday, September 25th, at a one o'clock luncheon meeting at the Leamington Hotel ballroom, with a program planned to equip its membership for service, through radio, in the war effort.

Seven discussion leaders, among them Dorothy Lewis of New York, Coordinator of Listener Interests for the National Association of Broadcasters, will analyze the subject: "Radio as a Constructive Force in the World of Today and Tomorrow." E. W. Ziebarth, Director of the Minnesota School of the Air, will introduce the discussion leaders.

An unusual plan of program procedure, outlined by Mrs. Lewis, will enable every member attending the luncheon to participate in the program. Leaders will preside at individual tables and will base their contribution to the program on the respective group discussions. A hostess will be in charge of each table.

Discussion leaders and their subjects follow:

Dr. Raymond Chadwick, Hennepin Avenue Methodist Church, first vice president of the Minnesota Radio Council, "Religious Broadcasting Today and Tomorrow"; Joyce Gregory, Director of Radio for the Minneapolis Public Schools, "Children's Radio in War-time"; Dr. Tracy Tyler. Director of Radio in Education at the University of Minnesota, "Radio in Education"; Dr. E. A. Meyerding, Executive Secretary of the Minnesota Public Health Association, "Radio Education for Physical Fitness"; and Mrs. Wright Brooks, program chairman of the Minnesota Chapter of the American Association of University Women, "The Organization's Use of the Radio to Further the War Effort."

Mrs. Lewis will review the discussion and speak on "Radio Serves the Post-war Era."

FIRE PREVENTION WEEK—OCT. 4-10

All stations were mailed, this week, a folio on Fire Prevention Week which President Roosevelt has set by proclamation for the October 4-10 interval.

In the same proclamation the President called upon OCD to carry the ball in this year's celebration.

Two 15-minute transcribed shows are being mailed from Hollywood, while the rest of the material was contained in the envelope going to stations.

WHO AWARDS PALMER TROPHY

Don Radda of Washington, Iowa, set a new world record for tall corn when he exhibited a stalk towering 26 feet 10 inches in the sixth annual WHO National Tall Corn Sweepstakes, judged Saturday, Sept. 5.

Radda, who won the 1940 contest, broke the previous record made last year by Lawrence Flander, Harper, Iowa, with a stalk 23 feet 2½ inches tall. He received $100 in cash and the Col. B. J. Palmer Gold Trophy. More than 30 entries were made by farmers from all parts of Iowa and Illinois. WHO gave a total of $225 in cash awards and the Palmer Trophy.

100% INCREASE IN V-MAIL

For the part the broadcast industry played in boosting V-Mail almost 100% in the two weeks promotion campaign, congratulations were voiced this week by Lt. Col. E. M. Kirby, Chief Radio Branch, Bureau of Public Relations, War Department.

Maj. H. F. Ambrose, Army Postal Service, released the statistics. "For the week ending August 23, 1942," he said, "there was a total of 111,196 V-Mail letters dispatched on microfilm from this country. For the following week (August 24-August 30 inclusive) there was an increase of 32.9%, the total for the week being 147,660 V-Mail letters dispatched. For the week ended September 6, 1942, there was dispatched a total of 219,972 V-Mail letters, which represents an increase of 95.2% over the week immediately preceding the August 23 broadcast.

"Inasmuch as the full effect of the broadcast on the public would not be reflected in the writing of letters and the arrival of the same at points of embarkation on both coasts, it is believed that the latter period offers the best comparison.

FEDERAL COMMUNICATIONS COMMISSION

NO STATION SILENCING SOON, SAYS FLY

Silencing of any broadcast station is not an immediate prospect but the need for conservation of material is immediate. It is present and it is urgent, James Lawrence Fly, FCC Chairman told a press conference early this week.

"I cannot but feel some concern about the statements that have been made in places by subordinate officials as to what broadcast service is essential and what broadcast service is to be maintained," the chairman told the newsmen.

Continuing on this subject Mr. Fly said, "I think I can fairly say that you may safely disregard all such statements. I am confident that for a substantial period the means can and will be found to maintain all the present broadcast service, and in any case the substantial reduction of broadcast service is not to be decided by isolated subordinate officials. That raises a question of national public policy and it will be decided as a matter of national policy. I have every confidence that problems will be worked out and give industry the continuity and security which it deserves. As you know, different means have been suggested for the conservation of materials, and all of those will be considered by the Board of War Communications when it receives the recommendations of the Domestic Broadcast Committee."

The chairman said that the questionnaire on the broadcast station tube supply which was sent out to all the stations some time ago has received hearty cooperation from the industry. The returns are in and they have been tabulated and the report is now in the hands of the Domestic Broadcasting Committee. In connection with the tube questionnaire, Mr. Fly said, "The data provided by the report is really very helpful because it goes pretty thoroughly into the status of tube supply amongst all of the broadcasters and will afford a very substantial basis for such action as the Board may take or such recommendations as it will want to forward. Needless to say, tubes are consumable and in substantial quantities, and there is the crux of a pretty serious problem. However, it ought to be made clear that up to the present time the WPB has been able to supply all stations with the necessary tubes. I think there is no doubt from informal information which we have that they can continue to do that for a limited period—perhaps I should say for a substantial period if the conservation of materials is practiced judiciously. However, there is our big question mark—that is, the ability of WPB to make tubes available indefinitely. Military requirements are great."

The problem of manpower for the entire communications industry has been given extensive study and received the cooperative attention of the industry and of the various Government agencies concerned—Board of War Communications, War Manpower Commission, Selective Service, U. S. Employment Service. Mr. Fly said, "As you know, a questionnaire covering this field was sent out by the BWC to all companies, including wire, radio, and the communications companies in general. That information is coming in pretty good shape. The biggest companies have, of course, the most extensive job, but they will all be in very shortly, and when that information is received and broken down it will be referred to the respective committees of the BWC for their advice and recommendations. As you know, the problem of possible shortage and the rate of turnover, possibilities of recruiting the various training programs existing and those that may be possible, will be given consideration. I believe we will get some substantial and constructive results out of this whole study. The communications industry need not feel that this work will be slowed down."

AMATEUR LICENSES DISCONTINUED

The FCC by its Order No. 87-B adopted today, has discontinued the issuance of new, renewal, or modified amateur station licenses until further notice. This action has been taken in view of the many difficult administrative problems which have arisen in connection with the issuance of amateur station licenses as a result of the war. Inasmuch as many licensees are in the military services or engaged in war industries in various parts of the country, it is impossible for such station licensees to exercise proper control of transmitting apparatus and the control of the premises upon which such apparatus is located as required by the Rules and Regulations Governing Amateur Radio Stations and Operators.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, September 21. They are subject to change.

Monday, September 21

WIOD—Isle of Dreams Broadcasting Corp., Miami, Fla.—C. P., **610 kc.**, 5 KW night, 10 KW day, unlimited, DA-night and day.

Further Hearing

NEW—Beauford H. Jester, Individually and as Trustee for W. W. Callan, Dewitt T. Hicks, Hilton W. Howell, Wilford W. Naman, Robert G. Levy, Ross M. Sams and Davis Stribling, Waco, Texas.—C. P., **1230 kc.**, 250 watts, unlimited.

Wednesday, September 23

Oral Argument Before the Commission

NEW—Wilkes-Barre Broadcasting Corp., Wilkes-Barre, Pa.—C. P., **1240 kc.**, 250 watts, unlimited.

NEW—Central Broadcasting Co., Wilkes-Barre, Pa.—C. P., **1240 kc.**, 250 watts, unlimited.

Wednesday, September 23

KDYL—Intermountain Broadcasting Corp., Salt Lake City, Utah. —C. P., **880 kc.**, 10 KW, DA-day and night, unlimited.

Thursday, September 24

KXO—Valradio, Inc., El Centro, Calif.—Modification of C. P., **1230 kc.**, 100 watts, unlimited.

Further Hearing

WFAS—Westchester Broadcasting Corp., White Plains, N. Y.—Modification of license, **1230 kc.**, 250 watts, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KOB—Albuquerque Broadcasting Co., Albuquerque, N. Mex.—Granted extension of Special Service Authorization to September 30, 1943, in exact accordance with present authorization; **770 kc.**, 50 KW day, 25 KW night (B5-SSA-45).

KMPC—KMPC, The Station of the Stars, Inc., Beverly Hills, Calif.—Granted modification (B5-MP-1634) of construction permit (B5-P-2804) as modified, for extension of completion date and adjustments in the directional antenna system.

KOCA—Ruth G. Terry and J. E. Neal (Transferors), Roy G. Terry (Transferee), Oil Capitol Broadcasting Assn. (Licensee), Kilgore, Texas.—Granted consent to acquisition of control (B3-TC-294) of Oil Capitol Broadcasting Association, license of station KOCA, by Roy G. Terry. Also granted renewal of license for the regular period.

DESIGNATED FOR HEARING

KOBH—Black Hills Broadcast Co. of Rapid City, Rapid City, So. Dak.—Designated for hearing application for construction permit (B4-P-3339) to change frequency from **1400** to **610 kc.**, increase power from 250 watts to 5 KW, install new transmitter, install directional antenna for day and night use and move transmitter.

WFLA—The Tribune Company, Tampa, Fla.—Designated for hearing application for construction permit (B3-P-3491) to increase nighttime power from 1 to 5 KW and make changes in directional antenna for nighttime use.

KFXM—J. C. and E. W. Lee, d/b as Lee Brothers Broadcasting Co., San Bernardino, Calif.—Designated for hearing application for construction permit (B5-P-3475) to install new transmitter, directional antenna for day and night use, increase power from 250 watts to 1 KW, change frequency from **1240** to **1300 kc.**, and change hours of operation from share KPPC to unlimited time.

WWNC—Asheville Citizen-Times Co., Inc., Asheville, N. C.—Designated for hearing in accordance with Memo Opinion of April 27, 1942, application for modification of construction permit (B3-MP-1437).

WTNJ—WOAX, Inc., Trenton, N. J.; WCAM, City of Camden, Camden, N. J.; WCAP, Radio Industries Broadcast Co., Asbury Park, N. J.—Designated for further hearing the applications of these stations for renewal and modification of licenses. It appears that additional facts are necessary to enable the Commission to make a proper determination, and said applications are designated for further hearing on the following issue: "To determine the qualifications of the applicant, WOAX, Inc., its officers, directors and stockholders to continue the operation of Station WTNJ, as presently operated or as proposed in Docket No. 6161."

LICENSE RENEWALS

Licenses for the following stations were renewed for the period October 1, 1942, to October 1, 1944:

WAAC, area of Tuscola, Ill.; WAAE, area of Tuscola, Ill.; WAAH, area of Wheeling, W. Va.; WAAJ, area of Toledo, Ohio;

WAAU, area of Chicago; WADP, near Franklin, Tenn.; WADQ, area of Nashville, Tenn.; WAEB, area of Macon, Ga.; WAEW, area of Washington, D. C.; WAFZ and WAFY, area of Minneapolis, Minn.; WAHB, area of Milwaukee, Wis.; WAHL, area of Paducah, Ky.; WAHM, area of Richmond, Va.; WAIC, area of Louisville, Ky.; WAID, area of Syracuse, N. Y.; WAIH, area of Chicago; WAIJ, area of Utica, N. Y.; WAIN, area of Peoria, Ill.; WAIO, area of Tuscola, Ill.; WAIQ, area of Louisville, Ky.; WAIY, area of Utica, N. Y.; WAOE, area of Aurora, Ill.; WATA, area of Ashland, Ky.; WAIU, area of Urbana, Ill.; WAUQ, area of Syracuse; WAUR, south of Champaign, Ill.; WAUV, Louisville, Ky.; WAVB, area of Portsmouth, Ohio; WAWT, area of Birmingham, Ala.; WBAC, area of Jersey City, N. J.; WBAE, area of Cincinnati, Ohio; WBAF, area of Cincinnati; WBAM, WBAN, area of New York City; WBGM, area of Fort Wayne, Ind.; WATC, area of Louisville, Ky.

Granted renewal of following station licenses for the period beginning October 1, 1942, and ending in no event later than April 1, 1943:

KWIL, Albany, Ore.; KWLC, Decorah, Iowa; KYUM, Yuma, Ariz.; WBML, Macon, Ga.; WFAS and auxiliary, White Plains, N. Y.; WFOY, St. Augustine, Fla.; WGBB, Freeport, N. Y.; WJBY, Gadsden, Ala.; WJMC, Rice Lake, Wis.; WKOK, Sunbury, Pa.; WLAG, LaGrange, Ga.; WTAX, Springfield, Ill.; WIBU, Poynette, Wis.; WSNJ, Bridgeton, N. J.

Granted renewal of following station licenses for the period October 1, 1942, and ending in no event later than October 1, 1944:

WASH, Grand Rapids, Mich.; WDOD, Chattanooga, Tenn.; WFBM, Indianapolis, Inc.; WFBR and auxiliary, Baltimore, Md.; WJDX, Jackson, Miss.; WTCN, Minneapolis, Minn.; WTOC, Savannah, Ga.

Granted renewal of following station licenses for the period beginning October 1, 1942, and ending in no event later than June 1, 1943:

KXRO, Aberdeen, Wash.; WEBR and auxiliary, Buffalo, N. Y.; WHAT, Philadelphia, Pa.; WIZE, Springfield, Ohio; WJMA, Covington, Va.; WJPF, Herrin, Ill.; WSAV, Savannah, Ga.

Granted renewal of following station licenses for the period beginning October 1, 1942, and ending in no event later than February 1, 1943:

WBLJ, Dalton, Ga.; WBOW, Terre Haute, Ind.; WESX, Marblehead, Mass.; WIBX, Utica, N. Y.; WJBC, Bloomington, Ill.; WMFR, High Point, N. C.

Granted extension of following station licenses upon a temporary basis only, pending determination upon application for renewal of license, in no event later than November 1, 1942:

KHAS, Hastings, Nebr.; KSUB, Cedar City, Utah; KVIC, Victoria, Texas; WBOC, Salisbury, Md.; WDAK, West Point, Ga.; WDSM, Superior, Wis.; WGAA, Cedartown, Ga.; WGAC, Augusta, Ga.; WISE, Asheville, N. C.; WJLS, Beckley, W. Va.; WLNH, Laconia, N. H.; WMFF, Plattsburgh, N. Y.; WRBL, Columbus, Ga.; WCOU, Lewiston, Maine; WJOB, Hammond, Ind.; WSAJ, Grove City, Pa.; WSAY, Rochester, N. Y.; WTOL, Toledo, Ohio.

Granted extension of following station licenses upon a temporary basis only, pending determination upon application for renewal of license, in no event later than December 1, 1942:

KGEZ, Kalispell, Mont.; KOVO, Provo, Utah; KPHO, Phoenix, Ariz.; KVOX, Moorhead, Minn.; KWLM, Willmar, Minn.; KYSM, Mankato, Minn.; WFIG, Sumter, S. C.; WFTC, Kinston, N. C.; WJNO, West Palm Beach, Fla.

Granted renewal of following station licenses for the period beginning October 1, 1942, and ending in no event later than October 1, 1944:

WHLD, Niagara Falls, N. Y.; WNAC, Boston, Mass.; WOL and auxiliary, Washington, D. C.; WORC, Worcester, Mass.; WRR and auxiliary, Dallas, Tex.; WSPR, Springfield, Mass.

KSRO—Ernest L. Finley, Santa Rosa, Calif.—Granted renewal of license for the period ending October 1, 1944.

WLOG—Clarence H. Frey and Robert O. Greever, Logan, W. Va. —Granted renewal of license for the period ending February 1, 1943.

WMBO—WMBO, Inc., Auburn, N. Y.—Granted renewal of license for the period ending June 1, 1943.

MISCELLANEOUS

KVGB—Helen Townsley, Great Bend, Kans.—Granted construction permit (B4-P-3509) to move transmitter a distance of 38 feet, 6 inches, at same address.

KXYZ—Harris County Broadcast Co., Houston, Texas.—Granted modification (B3-MP-1632) of construction permit (B3-P-3016) for extension of completion date to 1-20-43.

WOOD—King Trendle Broadcasting Corp., Grand Rapids, Mich.—Granted modification (B2-MP-1586) of construction permit (B2-P-2874) for change in type of transmitting equipment and change in directional antenna.

WOC—Tri-City Broadcasting Co., Davenport, Iowa.—Granted modification (B4-MP-1631) of construction permit (B4-P-2288) for extension of completion date to 10-19-42.

KSCJ—Perkins Brothers Co. (The Sioux City Journal), Sioux City, Iowa.—Granted modification of license (B4-ML-1136) to change name of licensee from Perkins Brothers Company (The Sioux City Journal) to Perkins Brothers Company.

WWSW—Walker & Downing Radio Corp., Pittsburgh, Pa.—Granted modification of license to change corporate name from Walker and Downing Radio Corp. to WWSW, Inc. (B2-ML-1137).

KLRA—Arkansas Broadcasting Co., Little Rock, Ark.—Granted modification (B3-MP-1628) of construction permit (B3-P-3042) for extension of completion date to 3-13-43.

KTRH—KTRH Broadcasting Co., Houston, Texas.—Granted modification (B3-MP-1633) of construction permit (B3-MP-1633) of construction permit (B3-P-3011) for extension of completion date to 3-10-43.

WCAO—The Monumental Radio Co., Baltimore, Md.—Granted modification (B1-MP-1637) of construction permit (B1-P-3024) for extension of completion date to 10-8-42.

WDEL—WDEL, Inc., Wilmington, Dela.—Granted modification (B1-MP-1638) of construction permit (B1-P-2758) for extension of completion date to 10-17-42.

WLAC—J. T. Ward, tr/as WLAC Broadcasting Service, Nashville, Tenn.—Granted license (B3-L-1707) to cover construction permit (B3-P-1250) for new transmitter, increase in power to 50 KW, installation of directional antenna, for night, and move of transmitter. Also granted authority to determine operating power by direct measurement of antenna power (B3-Z-1437).

KRED—Redwood Broadcasting Co., Inc., Portable-Mobile, area of Eureka, Calif.—Granted construction permit (B5-PRY-287) for new relay broadcast station reinstating construction permit (B5-PRY-263), which expired 7-19-42; frequencies: **1622, 2058, 2150, 2790 kc.**, 75 watts power, to be used with applicant's standard station KIEM, Eureka, Calif.

WBCZ—WHEB, Inc., Portable-Mobile, area of Portsmouth, N. H. —Granted license (B1-LRE-421) to cover construction permit (B1-PRE-416), which authorized new relay broadcast station to be used with applicant's standard station WHEB, Portsmouth, N. H.; frequencies: **30820, 33740, 35820, 37980 kc.**, 25 watts.

W85A—General Electric Co., Schenectady, N. Y.—Granted license (B1-LH-13) to cover construction permit (B1-PH-19), which authorized a new FM station; frequency: **48500 kc.**, 6,600 square miles, unlimited time operation.

KAOY—Don Lee Broadcasting System, Portable-Mobile, area of Los Angeles, Calif.—Granted modification (B5-MPRE-56) of construction permit (B5-PRE-297) for extension of completion date for new relay station to 1-23-43.

WBEE—Worcester Telegram Publishing Co., Inc., Portable-Mobile, area of Worcester, Mass.—Granted license (B1-LRY-286) to cover construction permit (B1-PRY-266), which authorized a new relay broadcast station to be used with applicant's standard station WTAG.

W53PH—WFIL Broadcasting Co., Philadelphia, Pa.—Granted license (B2-LH-10) to cover construction permit (B2-PH-73), authorizing a new FM station; frequency: **45300 kc.**, 9,300 square miles coverage, unlimited time.

KWID—The Associated Broadcasters, Inc., San Francisco, Calif.—Granted license to cover construction permit (B5-PIB-34) for new international broadcast station; frequencies: **6060,**

***7230, 9570, 11870, 15290, 17760** and **21610 kc.**; 100 KW power; share time with WCBX, WCDA and WCRC on **6060 kc.**, with WBOS on **9570** and **11870 kc.**; unlimited time on **7230, 15290, 17760** and **21610 kc.**

KPRC—Houston Printing Corp., Houston, Texas.—Dismissed without prejudice application (B3-MP-1398) for modification of construction permit to install a 10 KW transmitter and the use of 10 KW day power.

Utica Observer Dispatch, Inc., Utica, N. Y.—Adopted order dismissing without prejudice application for construction permit (Docket 6043).

KDYL—Intermountain Broadcasting Corp., Salt Lake City, Utah. —Granted petition to amend order to take depositions and for waiver of Rule 1.221, in re application for construction permit to operate on **880 kc.**, 10 KW, directional antenna day and night, unlimited time (Docket No. 6351).

Pottsville Broadcasting Co., Pottsville, Pa.—Adopted order dismissing application for construction permit (Docket 4071). since applicant has failed to furnish the Commission with certain additional information requested by it.

Pottsville News & Radio Corp., Pottsville, Pa.—Adopted order dismissing application for construction permit (Docket 4402), since applicant has failed to furnish the Commission with certain additional information requested by it.

The Schuylkill Broadcasting Co., Pottsville, Pa.—Adopted order dismissing application for construction permit (Docket 4176), since applicant has failed to furnish the Commission with certain additional information requested by it.

Wilkes-Barre Broadcasting Corp., Wilkes-Barre, Pa.; Central Broadcasting Co., Wilkes-Barre, Pa.; Northeastern Penna. Broadcasters, Inc.. Wilkes-Barre, Pa.; Key Broadcasters, Inc.. Wilkes-Barre, Pa.—Adopted order designating for further hearing (Commissioners Case and Craven dissenting), applications for construction permits of applicants for a new station in Wilkes-Barre, Pa., on the following issue: "To determine the qualifications of the applicant, Northeastern Penna. Broadcasters, Inc.. its officers, directors and stockholders to construct a new broadcast station at Wilkes-Barre, Pa., as proposed in Docket No. 6170." It was further ordered that the oral argument which is scheduled for September 23, 1942, be cancelled.

WOW—Woodmen of the World Life Insurance Society, Omaha, Nebr.—Denied petition of WOW which requested the Commission to order Station KBON to discontinue program tests or any other type of operation on the frequency **1490 kc.**, and which further requested application for license for the operation of KBON be designated for hearing.

KHQ—Louis Wasmer, Inc., Spokane, Wash.—Granted motion to dismiss without prejudice application for construction permit to operate on **590 kc.**, 5 KW night, 10 KW day, unlimited time (Docket No. 6342).

W71RF—Rockford Broadcasters, Inc., Rockford, Ill.—Granted motion to dismiss without prejudice application for modification of construction permit to operate on **47100 kc.**, with an area of 3900 square miles (Docket No. 6422).

KOY—Salt River Valley Broadcasting Co., Phoenix. Ariz.—Granted petition to dismiss without prejudice application for modification of construction permit to operate on **550 kc.**, 1 KW night, 5 KW day, unlimited time (Docket No. 6415).

WFAS—Westchester Broadcasting Corp., White Plains, N. Y.—Granted motion for continuance of hearing now set for September 24, to October 26, in re application for modification of license to operate on **1230 kc.**, 250 watts, unlimited time (Docket No. 6216).

APPLICATIONS FILED AT FCC

680 Kilocycles

KFEQ—KFEQ, Inc., St. Joseph, Mo.—Modification of construction permit (B4-P-2477 as modified) which authorized installation of new transmitter, directional antenna for day and night use, increase power, change hours of operation and move transmitter, requesting extension of completion date from 9-30-42 to 11-30-42.

780 Kilocycles

WBBM—Columbia Broadcasting System, Inc., Chicago, Ill.—Authority to determine operating power by direct measurement of antenna power.

900 Kilocycles

WSBA—Susquehanna Broadcasting Co., York, Penna.—License to cover construction permit (B2-P-3314 as modified) which authorized construction of new standard broadcast station.

1340 Kilocycles

KAND—Navarro Broadcasting Assn., J. C. West, Pres., Corsicana, Tex.—Modification of license to change location of main studio from State National Bank Bldg., Corsicana, Texas, to ½ mile north of Corsicana on Highway 75, Corsicana, Tex.

KROC—Southern Minnesota Broadcasting Co., Rochester, Minn. —Involuntary transfer of control of licensee corporation to Agnes P. Gentling, as Executrix of the Last Will and Testament of Gregory P. Gentling, Deceased (2505½ shares).

1360 Kilocycles

WSAI—The Crosley Corp., Cincinnati, Ohio.—License to cover construction permit (B2-MP-1247 as modified) for increase in power, move of transmitter and installation of directional antenna for night use. Amended: re proof of performance.

WSAI—The Crosley Corp., Cincinnati, Ohio.—Authority to determine operation power by direct measurement of antenna power. Amended: re proof of performance.

WSAI—The Crosley Corp., Cincinnati, Ohio.—License to cover construction permit (B2-MP-1247 as modified) for 100 watts synchronous amplifier for daytime use.

WSAI—The Crosley Corp., Cincinnati, Ohio.—Authority to determine operating power by direct measurement of antenna power (of amplifier).

1380 Kilocycles

KBWD—Brown County Broadcasting Co., Brownwood, Tex.—Authority to determine operating power by direct measurement of antenna power.

1430 Kilocycles

KWKW—Southern California Broadcasting Co., Pasadena, Calif. —License to cover construction permit (B5-P-3108 as modified) for new standard broadcast station.

KWKW—Southern California Broadcasting Co., Pasadena, Calif. —Authority to determine operating power by direct measurement of antenna power.

FM APPLICATION

W41MM—Gordon Gray, Winston-Salem, N. C.—Modification of construction permit (B3-PH-76 as modified) which authorized construction of new high frequency broadcast station requesting extension of completion date from 10-14-42 to 1-19-43.

TELEVISION APPLICATIONS

W6XYZ—Television Productions, Inc., Los Angeles, Calif.—Modification of construction permit (B5-PVB-33 as modified) which authorized construction of new television broadcast station, for change in type of aural transmitter, change in aural emission from A3 to Special for FM, changes in aural antenna system, change type of visual transmitter, increase power from 1 KW visual and aural to 2 KW aural and 4 KW visual and extension of completion date from 10-15-42 to 3-15-43.

KTSL—Don Lee Broadcasting System, Hollywood, Calif.—Modification of construction permit (B5-PCT-7 as modified) which authorized construction of new television broadcast station for extension of completion date from 10-12-42 to 4-12-43.

(*Subject to condition that the authorization for this frequency may be modified by the Commission to delete this frequency without advance notice or hearing.) (B5-LIB-23).

MISCELLANEOUS APPLICATIONS

WDAB—Charleston Broadcasting Co., area of Charleston, W. Va. —Modification of construction permit (B2-PRY-270) which authorized construction of new relay broadcast station for extension of commencement and completion dates.

W9XG—Purdue University, W. Lafayette, Ind.—Modification of construction permit (B4-PVB-52 as modified) which authorized changes in equipment, frequencies, decrease in power and addition of aural channel using Special Emission for extension of completion date from 9-24-42 to 9-24-43.

KORE—Frank L. Hill and C. G. Phillips, d/b as Eugene Broadcast Station, Eugene, Oregon.—Voluntary Assignment of License from Frank L. Hill, as surviving co-partner of Hill & Phillips, co-partners, and Georgia Phillips, Executrix of Estate of C. G. Phillips, deceased, to Frank L. Hill and Violet Hill, co-partners d/b as Eugene Broadcast Station. Amended: to change name of Violet Hill to Violet G. Hill.

NEW—Penn Thomas Watson, area of Wilson, N. C.—License for new relay broadcast station using equipment and facilities formerly licensed under call letters WGTO on **1606, 2074, 2102, 2758 kc.,** 25 watts, A3 Emission.

KEYS—Earl C. Dunn and Charles W. Rossi, d/b as Nueces Broadcasting Co., Corpus Christi, Texas.—Voluntary Assignment of license from Earl C. Dunn and Charles W. Rossi d/b as Nueces Broadcasting Co. to Earl C. Dunn, Charles W. Rossi, H. B. Lockhart and E. C. Hughes, d/b as Nueces Broadcasting Co.

KBTB—Red River Broadcasting Co., Inc., Duluth, Minn.—Construction permit to move transmitter of relay broadcast station from 16th St. and St. Louise Ave., Duluth, Minn., to Front St. and 63rd Ave. West, Duluth, Minn.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

International Research—Use of "lures" by a distributor of collection agency cards and two Washington intermediaries, in which fictitious "trust funds" and promises to pay "a sum of money" to persons whose addresses were sought, were used as bait, is charged in a complaint. The respondents are Edward Lowenthal, trading as International Research and Bureau of Industrial Allocation, 188 West Randolph St., Chicago, and Sidney Dean Sarff and H. J. Whittington, Evans Bldg., 1420 New York Ave., N. W., Washington. (4832)

Stanley J. Remus & Co., engaged principally as a jobber in the purchase and sale of canned salmon, tuna, shrimp and sardines; P. E. Harris & Co., Kelley-Clarke Co., and Oceanic Sales Co., all of Seattle, Wash., engaged in the canning and sale of canned fish, are charged in a complaint with violation of the brokerage section of the Robinson-Patman Act. (4833)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Heger Products Co., Inc., 459 Como Ave., St. Paul, Minn., engaged in selling a dog food designated "Dog Nibs," has stipulated to cease using the word "meat" or any other word or term of similar import to describe dehydrated meat or dehydrated beef meal, or any product which is not made of meat or beef. (03049)

V. La Rosa & Sons, Inc., 347 Kent Ave., Brooklyn, distributor of a food product designated "La Rosa Grade A Macaroni," and Andre Luotto, 30 Rockefeller Plaza, New York, conducting an advertising agency which disseminated advertisements for the product, have stipulated to cease representing that La Rosa Grade A Macaroni or the protein contained therein is incapable of adding excess body weight; that the maraconi product will prevent acidosis; that the product contains sufficient protein to prevent the destruction of body tissues or to keep the body in a state of nitrogen balance; that the product through its bulk or roughage content, or otherwise, will insure proper digestion and assimilation or enable one to avoid a sluggish intestinal condition; or that the macaroni, when cooked and ready for serving, will provide per pound as much as 300 International or U. S. P. Units of Vitamin B-1. (03048)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Indestro Manufacturing Corp., 2649 North Kildare Ave., Chicago, manufacturer and distributor of automobile tools, including wrenches, has been ordered to cease and desist from misrepresention of its products. (4006)

Paramount Yarn Co., 362 Grand St., New York, engaged in the sale and distribution of knitting yarns, has been ordered to cease and desist from misrepresentation concerning its products. (4521)

Specialty Accounting Supply Manufacturers Association, Chicago, O. L. Moore, its secretary, and 30 members of the association who manufacture and sell sales books and continuous form sales records stationery have been ordered to cease and desist from engaging in or continuing any agreement or understanding to restrain and eliminate competition in price in the sale of their products.

The respondent member manufacturers are: Acme Register Co., Minneapolis; Adams Bros. Sales Book Co., Topeka, Kans.; American Sales Book Co., Inc., Niagara Falls, N. Y.; Atlantic Register Co., Waltham, Mass.; Autographic Register Co., Hoboken, N. J.; Baltimore Sales Book Co., Baltimore; Bonnar-Vawter Fanform Co., Cleveland; Cosby-Wirth Manifold Book Co., Minneapolis; Craft Sales Book Co., Inc., Philadelphia; Egry Register Co., Dayton, Ohio; W. S. Gilkey Printing Co., Cleveland; Stephen Greene Co., Philadelphia; Hamilton Autographic Register Co., Hamilton, Ohio; Hanna Register Co., Springfield, Ill.; Philip Hano Co., Inc., Holyoke, Mass.; Lisbon Sales Book Co., Lisbon, Ohio; Roscoe M. Breeden, doing business as Los Angeles Register & Printing Co., Los Angeles; McCaskey Register Co., Alliance, Ohio.

The Miami Systems Corp., Cincinnati; National Carbon Coated Paper Co., Sturgis, Mich; The Potter Press, Waltham, Mass.; C. W. Potter, Inc., Waltham, Mass.; The Rotary Printing Co., Norwalk, Ohio; Schwabacher-Frey Co., San Francisco; Shelby Salesbook Co., Shelby, Ohio; The Snapout Forms Co., Chardon, Ohio; The Standard Register Co., Dayton, Ohio; Sunset-McKee Sales Book Co., Oakland, Calif.; United Autographic Register Co., Chicago; and The Wallace Press, Inc., Chicago. (4538)

Uniform Mfg. Exchange, Inc.—An order to cease and desist from agreements, understandings and conspiracies to suppress competition in the manufacture and sale of uniforms has been issued against Uniform Manufacturers Exchange, Inc., 112 East 19th St., New York, and 23 member firms, all located in New York.

The Commission finds that the respondents, who are manufacturers and distributors of uniforms and overcoats worn by bellboys, porters, doormen and others engaged in similar employment, in 1934 organized the respondent exchange to control and regulate the business of manufacturing and selling uniforms and since 1936 have maintained a cost guide and Manual to govern the manufacture and distribution of such products.

The respondent members of the exchange named in the order are:

All-Bilt Uniforms, Inc., 147 Fulton St.; S. Appel & Co., Inc., 18 Fulton St.; Bernhard, Schrag & Co., Inc., 18 West 18th St.; Brooks Uniform Co., Inc., 1140 Sixth Ave.; I. Buss, Inc., 84 Fifth Ave.; Walter Cahn Co., Inc., 237 Lafayette St.; Stone Uniform Co., Inc., 9 East 19th St.; Uniforms by Ostwald, Inc., 18 East 16th St.; The Joseph F. Webber Uniform Corp., 273 Fifth Ave.; Z. & O. Uniform Co., Inc., 45 East 20th St.; Russell Uniform Co., 1600 Broadway; B. Schellenberg & Sons, 72 Willoughby St., Brooklyn; Smith-Gray Corp., 740 Broadway; A. DuBois Son, Inc., 17 Union Square, West; L. P. Maher, Inc., 331 Fourth Ave., Merson Clothes, Inc., 254 Canal St.; Charles Palley and Abraham Cebulsky trading as Acme Uniform Co. 817 Broadway; Charles Mitchell and Paul Perkins trading as Mitchell & Perkins, 260 West 41st St.; John A. Hughes and William A. Thomas, trading as Hughes & Thomas, 53 East 19th St.; L. M. Barth, 257 Fourth Ave.; Arthur R. Meyers, trading as National Uniform Co., 41 East 28th St.; Albert T. Scafati, trading as A. T. Scafati Corp., 226 West 41st St.; and Al S. Mair, trading as Fisher-Mair Uniform Co., 11 West 25th St.

Also named are: George Appel, Howard V. Smith, Sr., I. Charles Bernhard, Elias Goldstein, T. A. DuBois, Arthur Stone, and E. S. Smith, officers and directors of Uniform Manufacturers Exchange, Inc. (4712)

FTC CLOSES CASE

The Federal Trade Commission has closed its case against The Georgia Marble Finishing Works, Canton, Ga. The complaint charged misrepresentation by the respondent of the enduring qualities of tombstones and monuments manufactured by it. The Commission finds that the corporate respondent has been dissolved and its charter surrendered.

Programs for Victory

WHBC'S $18,000 BOND PROMOTION CONTEST

Out in Canton, Ohio, radio station WHBC is sponsoring a bond selling campaign at a cost in excess of $18,000 with $13,200 in prize money. It is open to senior high school students.

Four hundred seniors took the qualifying test at McKinley High School, under the direction of a Western Reserve University faculty member, September 19. The twenty students who received highest grades remain in the contest.

Since an $18,000 contest for a single radio station, even in these times of box car figures, is unusual, Manager Felix Hinkle was asked for information. He suggests that in communities where there are war industries there should be little difficulty in obtaining financing for this type of promotion, providing the approval is made by the proper persons and the Board of Governors is hand-picked from the top bracket of the community.

Apparently Mr. Hinkle followed his own advice, for the following Ohio firms were almost instantly agreeable to contributing funds: The Alliance Machine Co., Alliance; The Bonnot Co., Canton; Canton Clearing House Association, Canton; The Climalene Co., Canton; The Diebold Safe & Lock Co., Canton; The Griscom-Russell Co., Massillon; The Hercules Motors Corp., Canton; The Hoover Co., North Canton; The Hygienic Products Co., Canton; The Luntz Iron & Steel Co., Canton; The Morgan Engineering Co., Alliance; The Massillon Steel Casting Co., Massillon; The Republic Stamping & Enamelling Co., Canton; The Timken Roller Bearing Co., Canton; The Tyson Roller Bearing Co., Massillon; The Union Metal Manufacturing Co., Canton.

The station management named six men to the committee to have complete charge of the contest: Wendell Herbruck, Chairman; Michael H. Conrad, Secretary; Rev. John B. Barker; Grant D. Esterling; Dr. Charles B. Ketcham; J. Brenner Root.

The First Trust & Savings Bank of Canton was named trustee of the funds of the contest. Western Reserve University has complete charge of the qualifying examination.

The Radio Contest

The radio contest itself is of the quiz variety with all questions prepared by Western Reserve, sealed in an envelope and delivered to the master of ceremonies on each program, at the time the program is to go on the air.

There are 35 programs in the contest, presented one a week for 35 consecutive weeks beginning September 29.

Out of the funds contributed by local manufacturers, $13,200 is prize money to be distributed as follows:

1st Price—$4,000 Scholarship
2nd Prize—$3,000 Scholarship
3rd Prize—$2,000 Scholarship
4th Prize—$1,000 Scholarship
16 other prizes—$200 in war bonds each.

Budget expenses include $1,000 for newspaper advertising; $1,000 for printing, $2,000 for salaries for two clerks to keep votes and records. And a sum for the educational director.

Though WHBC is donating all of its time and talent, Mr. Hinkle believes that the broadcaster should probably charge for such service and insert a covering amount in the budget as expense. He said that he was sure that this could have been done locally without criticism. It was not done because in this instance the station did not wish to profit on this promotion.

How Winners Are Determined

Winners are determined by points. Total points comprise those earned by answering the quiz question correctly and the points voted contestants by bond purchasers in the county. Every question answered correctly carries 25,000 points. Each person in Stark County, Ohio, who purchases "E" defense bonds during the contest, shall have the right to vote for any contestant on the program at the rate of one point for each dollar in [maturity value] bond purchases.

Write for Details

All broadcasters who are interested in this promotion are invited to write Mr. Hinkle for complete details. He has assured NAB that he will be very happy to supply them.

WBIG Produces Morale Program

"God Favors the Bold and Strong of Heart" is the title of one of the patriotic shows broadcast by WBIG, Greensboro, N. C.

Major Edney Ridge, station director, has forwarded the script of the September 15 broadcast. The program opens with organ playing "Onward Christian Soldiers." There are three voices; first male voice, second male voice and feminine voice.

In the September script the first announcer picks up after the organ theme with:

"A few days ago one of our greatest generals, Lieutenant-General Brehon B. Somervell of the United States Army, emphatically stated, 'We are losing this war' . . . in last week's issue of LIFE, under the title, 'THE SOFT PEOPLE WANT GOOD NEWS, THE STRONG PEOPLE WANT TRUTH,' we are quoting by special permission of the magazine. Here goes—

"The Civil War was a test of freedom, and we passed it. But the war against the armed slavery of Germany is an even bigger test, and we haven't passed this one yet. And the strong people insist that to win this war we must pass the test. To win, we must prove, as Lincoln did, that freedom is stronger than slavery. We can adopt as many of Hitler's methods as we like, but we cannot adopt his principles.

"We must win with our principles, and to do this we must realize that freedom is not just a word, to be won with a little oratory. Freedom is a fact, that is, people, 130,000,000 of them. Each of these 130,000,000 people—these facts of freedom—must pass Lincoln's test, individually and on his own. Each one must voluntarily take upon himself or herself the sacrifices, whether in blood or in comfort, that the struggle requires.

"Each must mobilize his factory, his union, his city, his farm, his home, his personal life—for war. And to this end, each must be informed.

WBIG PRODUCES MORALE PROGRAM

(Continued from page 569)

"And this test applies to you, Donald Nelson, the big man with a bigger job. Here's a motto for you: 'Get sore and stay sore.'

"It applies to you, Phil Murray of the CIO, and you, Messrs. Thomas and Reuther of the Automobile Workers. Tell your men what is at stake, that they must meet Lincoln's test.

"It applies to you, Ed O'Neal of the Farm Bureau, and you, Senator Russell of the farm bloc. Have more faith in your people.

"It applies to you, Franklin Roosevelt, man of many burdens. Be honest with us. Dump our share of this war on our shoulders.

"It applies to you, the Polish worker, and you, the Negro worker, and you, Farmer Jones, and you, the obscure writer of this page. You are only halfway mobilized for war. Nothing any of you can do will ever be enough.

"It applies to all of us, Americans: all who have ever stood upon a porch to watch the long wind stroking the borderless American plains, or seen a white road winding among dusty American apple trees and oaks, or heard the deep surf beating on an American shore; all who have learned freedom in the scuffle of the people's schools, or heard it spoken at the crossroads on lazy afternoons, or felt its electric power in the voting booth. It is we—each of us—who must prove whether a nation so conceived and so dedicated can long endure." . . .

WJR Larry Payne, Fund Raiser

WJR's announcer, Larry Payne, has demonstrated his ability as a fund raiser. Benefactor was the Selfridge Field Band and Recreation Center, Michigan.

While producing a weekly half hour show, "Selfridge Salute," he learned of the need for funds to expand services and conceived the money raising plan. Mr. Payne's co-workers were: L. P. Wagner, general manager of Jefferson Beach Park, and members of American Women's Volunteer Services.

The Plan

This is the plan he presented:

1. Designate Friday night, August 28, at Jefferson Beach Park as "Selfridge Field Nite."
2. Sell tickets at 50c each, entitling the bearer to $1.70 in amusement tickets at the park.
3. Give all the proceeds of the advance sale to Selfridge Field Recreation and Band funds.

Plan was accepted and Mr. Payne went to work, receiving the backing of the following broadcast stations in Metropolitan Detroit, in addition to his own, WJR: WWJ, W45D, CKLW, WJLB, W49D, WEXL, WJBK, WCAR.

The Detroit News, Free Press and Times also extended cooperation.

Results

Three thousand nine hundred dollars ($3,900) was presented to Colonel William T. Colman, commanding officer, through Major William C. Ingram, base executive, on August 28.

Mr. Payne said that more money would be forthcoming as settlements with the ticket salesmen were completed. He predicted that the total could run to $5,000.

What Do You Think of This?

The following letter was received by OWI. We're printing it to test your reactions on the writer's proposal.

It is suggested you send comments to Douglas Meservy, Deputy Chief, OWI Radio Bureau, Washington, D. C.

"To you, OWI, as the 'Coordinator' of news," wrote Mr. Black, "I am taking the liberty of offering one suggestion that I believe will be of a National benefit. At present our news commentators and reporters use a great many synonyms for the warring powers that are confusing to the average country listener—as an example

		Allied Nations	
Axis		British	
Nazis		English	
German	all equal our enemy	Russians	all equal our army
Italian		Soviets	
Japanese		Reds	
Niponese		Chinese	
etc.		American	
		Yanks, etc.	

"In a radio comment or a newspaper article the *same* country may be referred to by *three* different names in as many sentences.

"I have tenants on the farm of average intelligence, who get confused over these multiple terms and fail to learn who is fighting who.

The Suggestion

"So my suggestion is that all radio commentators and news reporters be instructed to use the words 'The Enemy' when referring to our enemies and the words 'Our Army' when referring to any forces on our side.

"The word 'Our' is in the possessive case, and that will help cement all the people in the war, and stop so much reference to 'They' when actually referring to the Allied Nations. Since *our* boys are on practically all fronts, it is *our war* and *our army* and not *the* war and *the* British, Chinese, etc.

"If you mingled with the common herd as I do, you would readily see the need for and good that could be accomplished by a unified name covering all the Allied Nations and one covering all our enemies."

ONE FOR THE BOOK

Kern Tips, KPRC, Houston, Tex., reports that one of his station's bond customers ($262) was George Lee Taylor, 28-year-old negro, who is serving a stretch of 20 years for the murder of his wife.

"I like the programs KPRC sponsors in the sale of bonds," Taylor told the warden. The negro came into the $262 by a real estate sale.

WCSC TALKS TO SHIPBUILDERS

Station WCSC, Charleston, S. C., is putting on some down-to-earth bond programs for the boys in nearby shipyards who aren't doing so badly on payday. Here's a typical script:

A little over nine months ago . . . our country . . . went to war! Ever think of it that way? "Went . . . to . . . war"—cold, hard, ugly words! Maybe you don't think that means anything—just words, like . . . "Remember Pearl Harbor!" and "Slap a Jap!" and "Join the Scrap!" and "Wartime Is Ten Percent Club Time!" But, did you ever stop to think exactly what those words mean to . . . a shoe salesman in a stinking fox-hole in the Philippines—or to a young garage mechanic, taking off for his first flight over Rommel's lines in Egypt? No, I'll betcha'! And if you want to spend an unpleasant half-hour sometime, get off in a corner by yourself and let your imagination run . . . put yourself with any one of our boys . . . on any one of the front lines! If you've got any imagination at all . . . you won't wait for the end of that little day-dream . . . there's something else, like that, that I'm going to say that's going to give you the same kind of unpleasant half-hour—if you've got the guts to face it! Let's take it this way! You, out there . . . and you . . . you're in "War Production!" You're doing a vital job—a job, just as important as the guy with the gun . . . maybe without quite all the risks . . . but just as important. . . . Well, answer this question for yourselves . . . nobody listening . . . and nobody's going to snoop, but, a couple of years ago, say, you were making . . . how much? Twenty-five dollars a week? Yeah, something like that! And how much are you making now? Go on! Answer yourself—nobody wants to know—nobody's snooping. . . . Just a little problem in mental arithmetic coming up . . . something you can figure out in your own little corner all by yourself. Any one of you out there who hasn't had about a 300 percent boost in the paycheck in the last couple of years . . .? Mind now, I didn't say 10 percent or 15 percent . . . I'm figuring 25 dollars against, say, about 75 dollars a week since two years ago . . . and the cold, hard arithmetic of that is 300 percent pay increase! Well, with 300 percent more dollars in your kick . . . what are you doing with it? Is . . . as much as ten percent of it going into war bonds? Answer yourself . . . nobody wants to know! Is it? Now, just hold that little day-dream right there and put this one with it! After this war is over . . . what's going to happen to that 300 percent? Maybe, even, how about that job? (Use your imagination—it's good.) All right then, let's stop being grim and look at the common horse sense of the matter. Ten or 15 or 20 percent of that 300 percent larger paycheck, invested in war bonds—I said "invested"—you're not *giving*, remember, you're *getting*—getting four dollars for every three in ten years . . . and that little return from Uncle Sam . . . that'll go a long way toward beginning a home, say, . . . or just keeping your family . . . with you out of a job, or, in case . . . well, just in case . . . (pause) and look, I'm not telling you anything you don't already know . . . maybe it's just . . . you hadn't thought about it . . . didn't have time to get off in a corner and let your imagination run! Well . . . you do it? Start with that part about our country "being at war" . . . and go on from there—it'll be unpleasant . . . but it'll be profitable!

NEWS OF AIRPLANE CRASHES

Unconsciously many newspapers and some radio stations are undermining morale of the people by publishing or broadcasting in series news items concerning crashes of civilian and military airplanes. While it is true that the number of accidents to aircraft, both military and civilian, has increased, it is likewise true that there are many more planes in the air today than ever before. The percentage of accidents to the number of planes flying is probably not materially more than it was in normal times.

There is no suggestion that news regarding airplane crashes be suppressed but some care should be taken in printing news of them or making radio announcements in news broadcasts. They should not be linked in a series. It is just like broadcasting news of casualty lists. They don't do public morale any good. Here's a suggestion that the news departments of broadcasting stations may well consider.

PER-INQUIRY OFFERS

The Gospel Sales Co., 1103 Emerson Tower Bldg., Baltimore, Md., is seeking per-inquiry deals in the interests of selling Bibles.

D. S. Manson & Associates, Minneapolis, Minn., is on the P-I market again, this time bartering for "Red Devil Soot & Carbon Remover," a furnace cleaner.

Both of these companies have been advised of the radio industry's attitude towards attempts of this nature and have been invited to use radio at established rates.

The NAB Department of Broadcast Advertising is very grateful for the continued cooperation of the stations in reporting all free time and per-inquiry solicitations.

MANPOWER QUESTIONNAIRE

Returns of the Manpower Questionnaire mailed to all stations September 16th indicate that stations recognize the importance of the problem. Their prompt attention and the care with which they are filling out the questionnaire will help headquarters to prepare the data required for action on behalf of the industry.

Those stations which have not yet returned the questionnaire are urged to complete the information required and mail their return promptly. Speed is of the essence in meeting the problem.

Today Selective Service officials are accepting an NAB invitation to visit the studios and transmitters of four Washington stations so that they may see at first-hand the complexity of broadcasting operations and the personnel requirements to keep the stations on the air. Russell Place and Howard Frazier are accompanying the group.

PROGRAMS FOR ALASKA

In an effort to provide American troops in remote stations with the kind of contact they want with home, the Office of War Information announced today that it would purchase a minimum of eight hours radio time daily beginning about October 1 to pipe news and special programs to service men in Alaska.

Commercial shows taken from the three major radio networks also will be transmitted. The programs will be piped from San Francisco to four Alaskan stations at Fairbanks (KFAR), Juneau (KINY), Ketchikan (KTKN) and Anchorage (KFQD) and rebroadcast over medium wave transmitters.

As equipment becomes available, the OWI, in conjunction with the Army Signal Corps, will install low-powered transmitters at Nome, Dutch Harbor and Kodiak.

The OWI already is broadcasting news and variety programs for the information and entertainment of American troops on overseas duty. The schedule of Alaskan broadcasts was arranged by Murry Brophy, chief of the Bureau of Communications Facilities of the OWI's Overseas Branch.

PRIORITY FOR SET REPAIR

Priority assistance in the purchase of repair-shop material for the maintenance of home radios may be applied for on Form PD-1X by distributors and dealers who buy directly from manufacturers, it was explained today by Linford C. White, chief of the War Production Board's Distributors' Branch.

This procedure does not impose any requirements upon the consumer or the repair-shop operator, but by making it easier for the large distributor to obtain parts it maintains established links between producer and home set owner.

Mr. White pointed out, however, that preference ratings would be assigned by his branch only to items necessary to the functioning of receiving sets. No fancy, non-essential radio gadgets and no phonograph parts will be rated on Form PD-1X, nor will repair parts for Army, Navy and other Government-owned radios. Assistance in acquiring the latter is available through other established procedures.

LIEUT. LEVY IN NEW POST

Navy Lieutenant Leon Levy now has the post of consultant to OWI Radio Bureau. He was relieved from duty in the Philadelphia area at the request of William B. Lewis, Bureau Chief. In endorsing the transfer, Rear Admiral A. E. Watson stated that the change was approved with reluctance but granted because new duties were of such importance.

Lieut. Levy represents the new Liaison Division of the Radio Bureau in the Philadelphia district. He is president of WCAU Broadcasting Co., Philadelphia.

HUB TAFT TO ARMY

Hulbert Taft, Jr., general manager of WKRC, Cincinnati, and president of the Ohio Association of Broadcasters, has been commissioned a first lieutenant in the Army Air Forces, and is slated to report at Miami October 1. Ken Church, director of national sales and promotion for WKRC, succeeds him as general manager of the station. Mr. Taft has appointed John Patt, WGAR, Cleveland, to head the Ohio Association of Broadcasters.

FEDERAL COMMUNICATIONS COMMISSION

FCC POLICY ON APPLICATIONS INVOLVING USE OF QUARTZ

The FCC has relaxed slightly its interpretation of the Memorandum Opinion of April 27, in order that applications involving shifts in frequency in which no materials will be utilized other than quartz crystals, may be granted, provided:

(a) Such applications involve no inconsistencies with Order No. M-146 of the War Production Board relating to quartz crystals;

(b) Such applications involve no engineering conflict with any other application pending at any time since February 22, 1942;

(c) Such applications involve no inconsistencies with the Commission's Rules and Regulations;

(d) Such applications tend toward a fair, efficient, and equitable distribution of radio service, are consistent with sound allocation principles and offer substantial improvement in standard broadcast service; and

(e) Such applications are otherwise in the public interest.

The Committee studying this matter advises that it will make further recommendations relative to the Memorandum Opinion.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, September 28. They are subject to change.

Tuesday, September 29

Further Hearing

NEW—J. C. Kaynor, Ellensburg, Wash.—C. P., **1310 kc.**, 250 watts, unlimited.

Wednesday, September 30

WNOE—WNOE, Incorporated, New Orleans, La.—C. P., **1060 kc.**, 50 KW, unlimited, DA-day and night.

Thursday, October 1

WJOB—O. E. Richardson, Fred L. Adair and Robert C. Adair, d/b as Radio Station WJOB, Hammond, Ind.—C. P., **1230 kc.**, 250 watts, unlimited.

Friday, October 2

WHEB—R. G. LeTourneau, Transferor, The LeTourneau Foundation, Transferee, Portsmouth, N. H.—Transfer of control of WHEB, Inc., **750 kc.**, 1 KW, limited time WSB.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WOOD—King-Trendle Broadcasting Corp., Grand Rapids, Mich.—Granted modification of construction permit as modified, which authorized increase in power, installation of new transmitting equipment and directional antenna for night use, and move transmitter and studio, for extension of completion date from September 23 to November 23, 1942 (B2-MP-1639).

WAAD—Ralph A. Horton, Portable-Mobile, area of Ft. Lauderdale, Fla.—Granted modification of construction permit, which authorized a new relay broadcast station, for change in type of transmitter and extension of commencement and completion dates from January 27, 1942 and July 27, 1942, to 60 days after date of grant and 120 days thereafter, respectively (B3-MPRY-31).

WFTM—W. E. Benns, Jr., W. E. Benns, Sr., Mrs. W. E. Benns, Sr., T. F. Skinner and Fred M. Mellor (Transferors), Ronald B. Woodyard and Reginald B. Martin (Transferees), Ft. Meyers Broadcasting Co. (Licensee), Ft. Meyers, Fla.—Granted consent to the transfer of control of Fort Meyers Broadcasting Company, licensee of station WFTM, from W. E. Benns, Jr., W. E. Benns, Sr., Mrs. W. E. Benns, Sr., T. F. Skinner and Fred H. Mellor to Ronald B. Woodyard and Reginald B. Martin (B3-TC-309), consisting of all issued and outstanding capital stock of the licensee, for a total consideration of $12,600.

WGGA—Henry Estes, Austin Dean and L. H. Christian, a partnership, d/b as Gainesville Broadcasters (Assignor), Blue Ridge Broadcasting Co. (Assignee), Gainesville, Ga.—Granted consent to voluntary assignment of license from Henry Estes, Austin Dean and L. H. Christian, d/b as Gainesville Broadcasters, Station WGGA, to Blue Ridge Broadcasting Co. (B3-AL-345), from a partnership to a newly organized corporation.

DESIGNATED FOR HEARING

KVAK—Carl Latenser, Atchison, Kans.—Designated for hearing application (B4-R-1006) for renewal of license.

KVAK—Carl Latenser (Assignor), Radio Enterprises, Inc. (Assignee), Atchison, Kans.—Designated for hearing, to be consolidated with above application, consent to the voluntary assignment of license of station KVAK from Carl Latenser to Radio Enterprises, Inc. (B4-AL-320).

KMTR—KMTR Radio Corp., Los Angeles, Calif.—Designated for hearing application for renewal of license (B5-R-17).

Ohio State University, Columbus, Ohio (Portable-Mobile).—Designated for hearing application for construction permit (B2-PRY-286) for new relay broadcast station to operate on **1622, 2058, 2150** and **2790 kc.**, with 25 watts power, A3 emission, to be used with applicant's standard broadcast station WOSU at Columbus, Ohio.

LICENSE RENEWALS

Granted renewal of following relay broadcast station licenses for the period October 1, 1942, and ending no later than October 1, 1944 (areas given):

KAAC, Los Angeles, Calif.; KAAD, Fort Worth, Tex.; KAAO, Denver, Colo.; KAAR, Englewood, Colo.; KAAZ, Los Angeles, Calif.; KABB, San Francisco, Calif.; KABD, Los Angeles, Calif.; KABE, St. Paul, Minn.; KABG, Los Angeles, Calif.; KABH, Shreveport, La.; KABJ, Omaha, Nebr.; KADB, Long Beach, Calif.; KAGM, Cape Girardeau, Mo.; KAID, Omaha, Nebr.; KAIE, St. Paul, Minn.; KAIH, Los Angeles, Calif.; KAIZ, Omaha, Nebr.; KALO, Salt Lake City, Utah; KAOG, Los Angeles, Calif.; KAOV, Beaumont, Tex.; KAQV, KAQW and KAQX, Omaha, Nebr.; KAQY, Wichita, Kans.; KAXA, Los Angeles, Calif.; KAXB, Oklahoma City, Okla.; KAXY, Fort Worth, Tex.; KAZA, Oklahoma City, Okla.; KBIB, Wichita, Kans.; KBIC, KBID, Salt Lake City, Utah; KBKC, Los Angeles, Calif.; KBLE, Long Beach, Calif.; KBQB, Juneau, Alaska; KBRG, Fargo, N. D.; KBSF, San Francisco; KBTA, Duluth, Minn.; KDRA, Denver, Colo.; KEGB, San Francisco, Calif.; KEHC, Topeka, Kans.; KEHV, San Francisco, Calif.; KEJR, Fort Worth, Tex.; KEMA, Shenandoah, Iowa; KEPE, Los Angeles, Calif.; KETV, San Francisco, Calif.; KFAA, Dallas, Tex.; KFDB, Amarillo, Tex.; KHTA, KHTB, Dubuque, Iowa; KIEF, KIEG, KIEL, Seattle, Wash.; KIFF, St. Louis, Mo.; KIFO, Long Beach, Calif.; KIGA, St. Paul, Minn.; KIIH, Lincoln, Nebr.; KIIS, Houston, Tex.; KILB, Shreveport, La.; KNED, Fort Worth, Tex.; KNEF, Salt Lake City, Utah; KQCB, Seattle, Wash.; KRME, Merced, Calif.; KRSA, San Francisco, Calif.; KSFQ, San Francisco, Calif.; KTSR, El Paso, Tex.; KWHB, Kansas City, Mo.; WAAI, Cleveland, Ohio; WAAK, Charlotte, N. W8XWI—Guy S. Cornish, area of Cincinnati, Ohio.—Granted renewal of Class II Experimental public address relay station license for the period October 1, 1942, to October 1, 1943 (B2-RARE-1).

WMNH—The Radio Voice of New Hampshire, Inc., Portable-Mobile, area of Manchester, N. H.—Granted license to cover construction permit which authorized a new relay broadcast station (B1-LRY-285).

Granted further extension upon a temporary basis only, pending determination upon application for renewal of license, in no event later than November 1, 1942, of following station licenses:

W5XAU, WKY Radiophone Co., Oklahoma City, Okla.; W9XLA, KLZ Broadcasting Co., Denver, Colo.

Granted renewal of following station licenses for the period beginning October 1, 1942, and ending in no event later than February 1, 1943:

KELO, Sioux Falls, S. D.; KGDE, Fergus Falls, Minn.; KMLB, Monroe, La.; KOOS, Marshfield, Ore.; WABI, Bangor, Me.; WAYX, Waycross, Ga.; WCPO, Cincinnati, Ohio; WIL, St. Louis, Mo.; WJRD, Tuscaloosa, Ala.; WLVA, Lynchburg, Va.; KADA, North of Ada, Okla.; KRLH, Midland, Tex.; WSKB, McComb, Miss.; KPOW, Powell, Wyo.; KVCV, South of Redding, Calif.; KVEC, San Luis Obispo, Calif.; KVOS, Bellingham, Wash.

Granted renewal of following station licenses for the period beginning October 1, 1942, and ending in no event later than June 1, 1943:

KBND, Bend, Ore.; KCKN, Kansas City, Kans.; KHMO, Hannibal, Mo.; KMYR, Denver, Colo.; KOME, Tulsa, Okla.; KRJF, Miles City, Mont.; KUIN, Grants Pass, Ore.; KVSF, Santa Fe, N. Mex.; WEMP and auxiliary, Milwaukee, Wisc.; WEXL, Royal Oak, Mich.; WSOY, Decatur, Ill.

Granted renewal of following station licenses for the period beginning October 1, 1942, and ending in no event later than April 1, 1943:

KANS, Wichita, Kans.; KASA, Elk City, Okla.; KBIZ, Ottumwa, Iowa; KFJI, Klamath Falls, Ore.; KGBS, Harlingen, Tex.; KIUL, Garden City, Kans.; KPPC, Pasadena, Calif.; KROY, Sacramento, Calif.; KWJB, South of Globe, Ariz.; KWOS, Jefferson City, Mo.; KXOX, East of Sweetwater, Tex.; WATN, Watertown, N. Y.; WCOV, Montgomery, Ala.; WJIM, Lansing, Mich.; WHAI, Greenfield, Mass.; WHBU, Anderson, Ind.; WJTN, Jamestown, N. Y.; WMFG, Hibbing, Minn.; WJEJ, Hagerstown, Md.; KGY, Olympia, Wash.; KALB, Alexandria, La.; KDON, Monterey, Calif.; KFOR, Lincoln, Nebr.

Granted renewal of following station licenses for the period ending in no event later than December 1, 1942:

KABR, Aberdeen, S. D.; WQBC, Vicksburg, Miss.

Granted renewal of following station licenses for the period beginning October 1, 1942, and ending not later than October 1, 1944:

KDYL and auxiliary, Salt Lake City, Utah; KGCU, Mandan, N. D.; KGLO, Mason City, Iowa; KGVO, Missoula, Mont.; KIT, Yakima, Wash.; KTRH, Houston, Tex.; WFVA, Fredericksburg, Va.; WJAS, Pittsburgh, Pa.; WKNE, Keene, N. H.; WIBA, Madison, Wisc.; KGBX, Springfield, Mo.; WEBC and auxiliary, Duluth, Minn.; KFBB, Great Falls, Mont.; KFJZ and auxiliary, Fort Worth, Tex.; KGGM, Albuquerque, N. Mex.; KHSL, Chico, Calif.; KOIL, Omaha, Nebr.; KVOR, Colorado Springs, Colo.; KRGV, Weslaco, Tex.

Granted renewal of following station licenses for the period beginning October 1, 1942, and ending in no event later than June 1, 1943:

KOCY, Oklahoma City, Okla.; WFBG, Altoona, Pa.; KFYO, Lubbock, Tex.; KRMD, Shreveport, La.

Granted renewal of following station licenses for the period ending in no event later than August 1, 1944:

KFKA, Greeley, Colo.; KFEL, Denver, Colo.

W8XO—The Crosley Corp., near Mason, Ohio.—Granted further extension of license upon a temporary basis only, pending determination upon application for renewal of license, in no event later than November 1, 1942.

WCAX—WCAX Broadcasting Corp., Burlington, Vt.—Granted renewal of license for the period ending in no event later than June 1, 1944.

Granted extension of following station licenses, upon a temporary basis only, pending determination upon application for renewal of license, in no event later than November 1, 1942:

KAND, Corsicana, Tex.; KBTM, Jonesboro, Ark.; KDLR, Devils Lake, N. D.; KFBC, Cheyenne, Wyo.; KFXM, San Bernardino, Calif.; KGFJ, Los Angeles, Calif.; KGFW, Kearney, Nebr.; KHBG, Okmulgee, Okla.; KHUB, near Watsonville, Calif.; KWFC, Hot Springs, Ark.; WBBZ, Ponca City, Okla.; WCRW, Chicago, Ill.; KLS, Oakland, Calif.; KMAC, San Antonio, Tex.; KODL, The Dalles, Ore.; KOL, Seattle, Wash.; KRBA, Lufkin, Tex.; KROC, Rochester, Minn.; KSUN, Lowell, Ariz.; WFHR, Wisconsin Rapids, Wisc.; WFIN, Findlay, Ohio; WJBW, New Orleans, La.; WOCB, near Hyannis, Mass.; WSOC, Charlotte, N. C.; KBTM, Jonesboro, Ark.; KFGQ, Boone, Iowa; KFOX, Long Beach, Calif.; KVOL, Lafayette, La.; KVSO, Ardmore, Okla.; WAJR, Morgantown, W. Va.; WBRW, Welch, W. Va.; WCMI, Ashland, Ky.; WTRC, Elkhart, Ind.; WEDC, Chicago, Ill.; WTEL, Philadelphia, Pa.

Granted further extension of following station licenses upon a temporary basis only, pending determination upon application for renewal of license, in no event later than November 1, 1942:

WBRB, Red Bank, N. J.; WCAZ, Carthage, Ill.; WCOC, Meridian, Miss.; WEVD (auxiliary), New York, N. Y.; WFCI, Pawtucket, R. I.; WING, Dayton, Ohio; WMRO, Aurora, Ill.; WMUR, Manchester, N. H.; WNBZ, Saranac Lake, N. Y.; WSAR, Fall River, Mass.; WSPB, Sarasota, Fla.; WTJS, Jackson, Tenn.; WTSP, St. Petersburg, Fla.; KFJB, Marshalltown, Iowa; KVGB, Great Bend, Kans.; WGES, Chicago, Ill.; KBWD, Brownwood, Tex.; KCMC, Texarkana, Tex.; KFPY, Spokane, Wash.; KFRO, Longview, Tex.; KGIW, Alamosa, Colo.; KID, Idaho Falls, Idaho; KIEM, Eureka, Calif.; KPLT, Paris, Tex.; KRBC, Abilene, Tex.; KSEI, Pocatello, Idaho; KSWO, Lawton, Okla.; KTFI, Twin Falls, Idaho; KUOA, Siloam Springs, Ark.; KWKH, Shreveport, La.; KXL, Portland, Ore.; KBST, Big Springs, Tex.; KGGF, Coffeyville, Kans.; KGKL, San Angelo, Tex.; WBNX, New York, N. Y.; WCBT, Roanoke Rapids, N. C.; WCOP, Boston, Mass.; WFPG, Atlantic City, N. J.

Granted extension of following station licenses upon a temporary basis only, pending determination upon application for renewal of license, in no event later than December 1, 1942:

KCRJ, Jerome, Ariz.; KPFA, Helena, Mont.; WHBI, Newark, N. J.; WRAL, Raleigh, N. C.; KHBC, Hilo, Hawaii; WLBJ, Bowling Green, Ky.

MISCELLANEOUS

Beauford H. Jester, Individually and as Trustee for W. W. Callan, Dewitt T. Hicks, Hilton W. Howell, Wilford W. Naman, Robert G. Levy, Ross M. Sams and Davis Stribling, Waco, Texas.—Granted petition for a continuance of hearing in re application for a construction permit for a new standard broadcast station, now set for September 21, 1942, until October 8, 1942. (Docket No. 6218.)

KITE—First National Television, Inc., Kansas City, Mo.—Granted petition for a continuance of hearing in re application for renewal of license, now set for September 21, 1942, and continues dais hearing until September 24, 1942. (Docket No. 6300.)

KIDW—The Lamar Broadcasting Co., Lamar, Colo.—Adopted Decision and Order denying renewal of station license. (Licensee, through failure to file corporation reports and to pay corporate license tax to State of Colorado, ceased to exist as a corporate entity on October 14, 1937. At Commission hearings on July 15, 1941, and October 8, 1941, for the renewal of license no appearance was made for the applicant. Since February 21, 1942, KIDW has had authority to remain silent.)

WNOE—WNOE, Inc., New Orleans, La.—Granted motion to dismiss without prejudice application for construction permit (B3-P-3446) to operate on **1060 kc.,** 50 KW.

W79C—Oak Park Realty and Amusement Co., Chicago, Ill.—Granted motion to vacate hearing and dismiss without prejudice application for modification of construction permit (B4-MPH-97).

Hawaiian Broadcasting System, Ltd., Honolulu, T. H.—Granted motion to dismiss without prejudice application (B-P-2978) for a new station.

Beauford H. Jester, Individually and as Trustee for W. W. Callan, et al., Waco, Texas.—Granted motion for order to take depositions in re application for a new station.

KXKX—First National Television, Inc., Kansas City, Mo.—Denied petition for 90 day continuance of hearing on application for renewal of license now set for September 24.

APPLICATIONS FILED AT FCC

590 Kilocycles

WAGA—Liberty Broadcasting Corp., Atlanta, Ga.—License to cover construction permit (B3-P-2938 as modified) which authorized change in frequency, increase power, installation of new transmitter and directional antenna for night use and move transmitter.

WAGA—Liberty Broadcasting Corp., Atlanta, Ga.—Authority to determine operating power by direct method.

790 Kilocycles

WWNY—The Brockway Co., Watertown, N. Y.—Modification of construction permit (B1-P-3265 as modified) which authorized installation of directional antenna for night use, change of frequency, increase power, change hours of operation and move transmitter for extension of completion date from 10-16-42 to 12-16-42.

1170 Kilocycles

WWVA—West Virginia Broadcasting Co., Wheeling, W. Va.—Modification of construction permit (B3-P-2540 as modified) which authorized increase in power, change hours of operation, move transmitter, installation of new transmitter and directional antenna for night use for adjustment in directional antenna system for night use.

WWVA—West Virginia Broadcasting Co., Wheeling, W. Va.—License to cover construction permit (B3-P-2540 as modified) as above.

WWVA—West Virginia Broadcasting Co., Wheeling, W. Va.—Authority to determine operating power by direct measurement of antenna power.

1230 Kilocycles

WCOL—WCOL, Inc., Columbus, Ohio.—Authority to determine operating power by direct measurement of antenna power.

1240 Kilocycles

KWOS—Tribune Printing Co., Jefferson City, Mo.—Authority to make changes in automatic frequency control equipment.

1260 Kilocycles

WNAC—The Yankee Network, Inc., Boston, Mass.—Extension of special service authorization to operate with power of 5 KW employing directional antenna at night for the period 10-1-44.

1300 Kilocycles

WASH—King-Trendle Broadcasting Corp., Grand Rapids, Mich.—Modification of license to increase power from 500 watts to 5 KW, employing the directional antenna at night and using the transmitter as authorized under construction permit (B2-P-2874 as modified) for Station WOOD. Transmitter location to be RFD, south of Grand Rapids, Mich.

1340 Kilocycles

KOCY—Plaza Court Broadcasting Co., Oklahoma City, Okla.—Relinquishment of control of licensee corporation through sale of 300 shares of stock to Plaza Court Broadcasting Co. (200 shares), John D. Thomas (50 shares), and C. E. Johnson (50 shares).

1490 Kilocycles

KEYS—Earl C. Dunn and Charles W. Rossi, d/b as Nueces Broadcasting Co., Corpus Christi, Teaxs.—Voluntary assignment of license to Earl C. Dunn, Charles W. Rossi, H. B. Lockhart and E. C. Hughes, d/b as Nueces Broadcasting Co.

FM APPLICATION

W49D—John Lord Booth, Detroit, Mich.—Modification of construction permit (B2-PH-20 as modified) which authorized construction of new high frequency broadcast station for extension of completion date from 10-11-42 to 1-11-43.

TELEVISION APPLICATION

WTZR—Zenith Radio Corp., Chicago, Ill.—Modification of construction permit (B4-PCT-9 as modified) which authorized construction of new television broadcast station requesting extension of commencement and completion dates.

MISCELLANEOUS APPLICATION

W7XER—Midland Broadcasting Co., Kansas City, Mo.—Construction permit to install new transmitter and increase power from 1½ kilowatts to 3 kilowatts.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Amogen Co., 147 North St., San Antonio, Tex., engaged in the advertising and sale of a medicinal preparation designated "Amogen Tablets," is charged in a complaint with false advertising and misrepresentation. (4836)

George & Thomas Cone Co., manufacturer of ice cream cones, Sharon, Pa., is charged in a complaint with use of lottery methods in the sale of his products. (4837)

Glover & Wilson, Little Rock, Ark., engaged as brokers in the sale of food products, are charged in a complaint with violation of the brokerage section of the Robinson-Patman Act. (4835)

J. T. Jarrell Company—A supplemental complaint has been issued charging violation of the brokerage section of the Robinson-Patman Act against Jim S. Porter, trading as J. T. Jarrell Co., Little Rock, Ark. Subsequent to the issuance of the original complaint against J. T. Jarrell Co., a corporation, the corporation was dissolved and its vice president and principal stockholder, Jim S. Porter, continued to operate the business of J. T. Jarrell Co., in the same manner and form as when it was a corporation. (4547)

Mono Service Co., 349 Oraton St., Newark, N. J., engaged in the manufacture of paper cups for the packing of ice cream, is charged in a complaint with supplying others with the means of conducting lotteries in connection with the sale of its products and ice cream. (4834)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Baer Laboratories, Inc., 30 East 20th St., New York, engaged in the preparation, sale and distribution of a medical preparation designated "Sulfuraid-21," has been ordered to cease and desist from misrepresentations concerning the product. (4686)

Maurice J. Engel, 146 West 29th St., New York, has been ordered to cease and desist from misrepresentation in the sale of knife blades used by the fur industry. (4490)

Norfolk Mattress Co., Inc., Norfolk, Va., manufacturer and distributor of mattresses, pillows, bedsprings, and studio couches, which it brands or labels "Dr. Ezera Storm" or "Dr. Ezera Storm's," has been ordered to cease and desist from misrepresentation in the sale of its products. (4488)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

General Automotive Specialty Co., Inc., Long Island City, N. Y., engaged in the sale and distribution of switches for use in connection with electrical devices or equipment, has stipulated that it will cease and desist from use of the words "bakelite base" as a designation for or as descriptive of any switch not equipped or provided with a bakelite base, and from use of the word "bakelite," either alone or in connection with any other words, to describe any part of an electrical switch not composed of bakelite. (3526)

Felix Girard Co., Inc., 2013 Fourth Ave., South, Minneapolis, Minn., engaged in the manufacture of insecticides and a rat and mouse poison designated "Red Cross Rat and Mouse Embalmer," has stipulated in connection with the sale and distribution of its products, to cease and desist from use of the word "Embalmer" or words of like meaning as descriptive of a product which, when fed to rats or mice, will not embalm their bodies, that is, preserve such bodies and prevent their decay; representing by statements such as "World's Leading Rodenticide" that their products lead all other rat and mouse poison throughout the world either in volume of sales or merit; use of the statement "Each pound of the Embalmer is guaranteed to clear 5,000 square feet of infested floor space," or any other statement or representation to the effect that it can be depended upon to destroy or eradicate all rats or mice in or from buildings or the floors or walls thereof; use of the word "Guaranteed" or any words of similar meaning in connection with the advertising or sale of its product, unless, whenever used, clear and unequivocal disclosure be made in direct connection therewith, of exactly what is offered by way of security; use of any guaranty unless strict and complete performance be made therewith; and use of any unwarranted statement or representation having the capacity or tendency to disparage or discredit competitors. (3530)

Edwin F. Nickol, Inc., Versailles, Ohio, engaged in the sale and distribution of monuments and grave vaults, including reinforced concrete vaults supplemented with either marble or granite covers, has stipulated to discontinue use of any statement or representation, the effect of which tends or may tend to convey the belief that its burial vaults or memorials are everlasting or will endure forever; or that the carvings on such memorials will forever withstand the ravages of time and water. (3529)

Puritan Knitting Mills Corp., Altoona, Pa., engaged in the manufacture of sportswear, including sweaters, has stipulated in connection with the sale and distribution of its products, to cease using the words "Shetlana" or "Shetlanas" or any other word or term connoting "Shetland,' either alone or in conjunction with other words, to describe any yarn, garment, or fabric which is not the wool of, or made from the wool of, Shetland sheep grown on the Shetland Islands or the contiguous mainland of Scotland. (3527)

Savoy Luggage Shop, Savoy Luggage Manufacturing Co., and Savoy Trunk & Leather Goods Manufacturing Co., 60 East 59th Street, New York, engaged in the sale and distribution of luggage and other merchandise, has stipulated to cease and desist from representing as the customary or regular retail prices of his merchandise prices which in fact are fictitious and in excess of the prices at which such merchandise is regularly sold at retail, or using fictitious price labels or markings on his merchandise or on the packaging thereof; representing directly or inferentially that the prices at which he offers for sale or sells his merchandise constitute a discount to purchasers when, in fact, they are the usual and customary prices at which he sells his merchandise; describing or representing his business as a wholesale business or representing that the prices at which he sells his merchandise are wholesale prices; using or disseminating any so-called discount cards or similar devices purporting to enable the holder to receive a discount or other financial advantage in the purchase of merchandise when the holder does not receive a discount, deduction, or other material financial or trade advantage based upon the actual prices at which the merchandise is usually sold; using the word "manufacturing" or any word or words of like meaning as part of his trade name, and using such words in any manner to convey the belief that he actually owns, operates or controls the factory or factories in which the merchandise sold by him is made or manufactured. (3531)

Spiegel, Inc., 1061 West 35th St., Chicago, engaged in the sale and distribution of merchandise, including women's coats, has entered into a stipulation in which it agrees to cease and desist from use of the term "Fur Fabric" as descriptive of garments manufactured from fabrics composed of fibers other than fur; and from the use of the word "Fur" or any fur-connoting word, either alone or in connection with the word "fabric," so as to convey the belief that such garments are made or manufactured from the fur of fur-bearing animals or from a fabric made of fur; and from advertising, selling, or distributing garments composed of fibers other than fur under any representations or conditions of deceptive concealment whereby purchasers or the consuming public may be misled into buying such garments in the belief that they are composed of fur. (3528)

NAB Reports
The NATIONAL ASSOCIATION OF BROADCASTERS
1626 K STREET, N. W. WASHINGTON, D. C. Vol. 10, No. 39, October 2, 1942

NAB BOARD MEETING

The NAB Board of Directors held a two-day session in Chicago, September 24-25. The entire Board with the exception of Paul Morency, Ted Taylor and Paul Kesten were in attendance.

Three stations, KFAR, Fairbanks, Alaska, KLUF, Galveston, Texas, and KTHS, Hot Springs, Arkansas, as well as the National Broadcasting Company, were elected to membership.

Frank M. Russell, NBC Vice President, nominated by NBC, was elected as a network Director on the NAB Board representing that company.

A project involving the study of advertising as an instrument of economic development and social progress was approved by the Board and the support of NAB was pledged.

The subject of radio personnel and the effect of the Selective Service was discussed at length and plans were perfected to inform broadcasters regarding procedure to protect key personnel. It was also agreed that efforts to impress upon Selective Service officials the importance of maintaining efficient personnel in key positions in broadcasting should be continued.

The problem of essential materials to maintain broadcasting was reported and measures adopted to insure proper presentation of the subject to the appropriate governmental agencies. The Board expressed the opinion that broadcasters should undertake a program for the training of women to replace men in key positions.

A public relations plan submitted by President Miller received approval of the Board and steps are immediately being gotten under way to fill the vacancy occasioned by the resignation of Edward M. Kirby, now a Lieutenant Colonel in the Army.

A series of District meetings to be held this fall was approved and the following tentative schedule adopted:

Tentative Schedule for 1942 District Meetings

Following are the Districts, Places, Days, and Dates for 1942 Meetings:

1—Worcester, Mass., Monday, Oct. 19 (Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont).

4—Pinehurst, N. C., Friday-Saturday, Oct. 23-24 (District of Columbia, Maryland, North Carolina, South Carolina, Virginia, West Va.).

5—Jacksonville, Fla., Monday-Tuesday, Oct. 26-27; Atlanta, Georgia, Wednesday-Thursday, Oct. 28-29 (Alabama, Florida, Georgia, Puerto Rico).

6—Nashville, Tenn., Friday-Saturday, Oct. 30-31 (Arkansas, Louisiana, Mississippi, Tennessee).

13—Dallas, Texas, Monday-Tuesday, Nov. 2-3 (Texas).

12—Tulsa or Oklahoma City, Wednesday-Thursday, Nov. 4-5 (Kansas, Oklahoma).

14—Salt Lake City or Ogden, Monday-Tuesday, Nov. 9-10 (Colorado, Idaho, Utah, Wyoming, Montana, western South Dakota).

Harrison Holliway

The sudden and untimely death of Harrison Holliway came as a distinct shock. Although but 42 years old, Harrison was one of the radio industry's real veterans, having been engaged in various capacities with western stations for over 25 years. His death came after a short illness, although he had not been in the best of health for the past two years.

The high regard in which Mr. Holliway was held by his fellow broadcasters was evidenced by his election as NAB Director for the 16th District, embracing southern California, Arizona and New Mexico. He retired from the Board this year largely on account of his health. At the time of his death he was executive head of Radio Stations KECA-KFI.

In his passing the radio industry has lost a splendid character and one who contributed largely to the betterment of the industry. Mr. Holliway is survived by his widow, Edna O'Keefe Holliway, a daughter, Victoria, 3 months old, and two sons by a previous marriage, Harrison, 2d, aged 10, and Kingan, aged 8.

16—Los Angeles, California, Thursday-Friday, Nov. 12-13 (Arizona, southern California, New Mexico).

15—San Francisco, California, Monday-Tuesday, Nov. 16-17 (northern California, Nevada, Hawaii).

17—Portland or Seattle, Thursday-Friday, Nov. 19-20 (Alaska, Oregon, Washington).

11—Minneapolis, Minn., Tuesday-Wednesday, Nov. 24-25 (Minnesota, North Dakota, eastern South Dakota, western Wisconsin, Ironwood, Mich.).

10—Des Moines, Iowa, Friday-Saturday, Nov. 27-28 (Iowa, Missouri, Nebraska).

9—Chicago, Illinois, Monday-Tuesday, Nov. 30-Dec. 1 (Illinois, southern and eastern Wisconsin).

8—Indianapolis, Indiana, Wednesday-Thursday, Dec. 2-3 (Indiana, all of Michigan except Ironwood).

7—Columbus, Ohio, Friday-Saturday, Dec. 4-5 (Kentucky, Ohio).

2—New York, N. Y., Monday-Tuesday, Dec. 7-8 (New York, New Jersey).

3—Philadelphia, Pennsylvania, Wednesday-Thursday, Dec. 9-10 (Delaware, Pennsylvania).

Complete plans for these meetings will be perfected and announced in the near future.

Of course AFM and Mr. Petrillo came in for lengthy discussion. Sydney Kaye, NAB counsel in the AFM matter,

NAB BOARD MEETING

(Continued from page 577)

reported on the work which is being done in public relations, legal and legislative fields in regard to this matter. It was felt that satisfactory progress is being made and that efforts along the present lines should be continued.

A resolution expressing regret at the shocking news of Harrison Holliway's death and expressing deepest sympathy to his family and business associates was adopted by the Board.

The Board adopted a resolution pledging the continued cooperation of the industry in the war effort and renewed devotion to service in the public interest.

Following the regular session of the Board an executive session was held at which internal association matters and personnel were discussed. It was voted to hold a special session of the Board on October 13 or 14 in Chicago to further discuss these internal matters with particular reference to personnel and policies.

NAB ASKS EXEMPTION FROM PREMIUM PAY ORDER

At the direction of the Wage and Hour Committee, the NAB is asking the Labor Department to exempt the broadcasting industry from President Roosevelt's Executive Order on premium pay.

The Wage and Hour Committee, at a meeting Wednesday in Washington, found that the only substantial effect the order would have on the broadcasting industry would be to require those stations not now paying time and one half for holiday work to do so.

Since the broadcasting industry, like public utilities, operates normally on a 365-day-year and a seven-day-week, the effect of the order on the industry would be directly contrary to one of the broad purposes of the order—to combat inflation.

The Wage and Hour Committee agreed that the industry was covered by the Order, which is applicable to "work related to the prosecution of the war."

Most of the provisions of the order, effective October 1, do not affect broadcasting stations. It provides:

(1) Payment of time and one half for all work on New Years Day, Fourth of July, Labor Day, Thanksgiving Day, Christmas Day, and either Memorial Day or one other such holiday of greater local importance.

(2) Payment of double time on the seventh consecutive day of work unless there is an agreement between employer and employees which provides for at least one whole day off in each regular week. For instance, double time need not be paid for the seventh day in such a case as this: An employee's regular day off was Saturday, in a regular work week which started Sunday morning. He took Saturday off, as usual, in week "A." In week "B" by agreement, he took Wednesday off. In week "C" he went back to Saturday off. In this case, he need not be paid double time for Wednesday in week "C."

(3) There is to be no time and one half or double time for Saturday and Sunday work just because of the name of the day.

(4) In all other respects, the terms of the Wage and Hour Act and of union contracts, if any, prevail. For instance, time and one half for overtime over 40 hours a week prevails. If a union contract provides for time and one half after eight hours in any single day or time and one half on the sixth day, that contract prevails.

Members of the Wage and Hour Committe at the meeting:

C. T. Lucy, WRVA, chairman; James B. Rock, KDKA; Quincy A. Brackett, WSPR; and A. K. Redmond, WHP.

Selective Service

MANUAL ON PRESS

The list of 34 essential activities, which includes radio broadcasting under "Communications," was attached to the amendment of Local Board Release 115 made July 11, 1942, and released July 15, 1942, as Local Board Release 137. In filling out Form 42-A ("Affidavit—Occupational Classification (Industrial)) reference should be made to Local Board Release 137 under the question "Description of the Activities of this Company." The following language is suggested:

"Communications, — radio broadcasting. (See Local Board Release 115, as amended by LBR 122, 4/11/42, and LBR 137, 7/15/42. In the List of Essential Activities attached to LBR 137, under the title "Communications," radio broadcasting is designated an essential activity.) See Exhibit A*, attached, for analysis of this station's broadcasting operations essential to the support of the war effort."

Enclosed with the issues of NAB Reports is a planographed copy of the first page of LBR 137. This may be attached to Form 42-A to insure local board's making proper reference to the List of Essential Activities. Extra copies are available at NAB upon request.

NAB is preparing a "Selective Service Handbook" to assist stations in requesting occupational deferment of "key" men. It will contain pertinent excerpts from the Selective Service Act and Regulations, Local Board Releases, a dummy Form 42-A, and authoritative procedure for prosecuting claims for occupational deferment. It should be off the press next week.

SELECTIVE SERVICE OFFICIALS VISIT STATIONS

On Friday, September 25, officials from National Headquarters of the Selective Service System made an inspection tour of four Washington, D. C. broadcast stations. The trip was arranged by NAB to familiarize them with broadcast station operations and the difficulties encountered in training replacement technicians and other key personnel on short notice. Russell Place and Howard Frazier of NAB accompanied the group.

The officials appeared to be deeply impressed and it is believed similar tours arranged by broadcasters for local boards having jurisdiction over their key personnel would be helpful. Stations located in or near state capital cities can be of real service to the industry by sponsoring these inspection trips for the State Director and Occupational Advisers from their Selective Service State Headquarters.

---

*Exhibit A should include list of typical month's government programs and spots.

GAS AND TIRE RATIONING

Merging of the gasoline and tire rationing programs into a single system to control mileage of the nation's passenger autos according to essentiality of use was announced today by Price Administrator Leon Henderson to become effective throughout the country probably about Nov. 22.

The rationing of gasoline will follow the plan now in operation for the seven and a half million autos in the East, with each of the nation's 27 million cars getting a basic A-book allowance of enough gas for 2880 miles of family necessitous and occupational use for a year. Additional gasoline will be allowed only on proof of need and in quantities strictly limited to the degree of essentiality to the nation's war effort.

This gasoline rationing system will then be meshed into the tire rationing program to bring the overall mileage of America's autos within the limits of the available rubber supply, with use of tires being limited to essential transportation needs of the country. Observance of a 35 mile per hour maximum speed limit will be a basic requirement in both gasoline and tire ration allowances.

The new nation-wide mileage rationing plan has been under intensive development in OPA in anticipation of the need, since publication of the Baruch Committee's rubber conservation report on September 10. These advance preparations make it possible to have the system in operation some two weeks sooner than otherwise would have been possible, Mr. Henderson said.

Some 20 million passenger cars outside of the present gasoline rationed area will be brought under mileage rationing when the plan goes into effect, Mr. Henderson said. He estimated that mileage rationing would cut the use of private cars an average of almost 60 per cent from normal.

Owners of cars in the as yet unrationed area will be required under the plan, to register and will receive a basic gasoline ration for their cars allowing 2880 miles per year at the present value of the coupons, assuming 15 miles to the gallon. The time and places for this registration will be announced later.

Additional mileage up to 470 miles a month may be obtained by the motorist who can show that the "A" book is not sufficient to meet his occupational needs, and who shows either that he has formed a carsharing club to keep his car filled to capacity while in use, or that he has been unable to do so and that there is no other means of transportation available to him.

A special "preferred mileage" category is provided for 14 types of occupations deemed essential to the war effort and to the public health and safety. These rations issued through a "C" book, are tailored to meet the proven need, without a specific ceiling on the mileage. Tires on all cars must be submitted to OPA for on-wheel inspection every 60 days to insure proper care.

The deviations from the present ration system in the East will not be great, since the East Coast plan was designed for possible nation-wide extension as a mileage rationing plan. It already has reduced average passenger car mileage near to the objective of 5000 miles set by the Baruch report. The changes required for the rest of the country will be incorporated in the Eastern plan when nation-wire mileage rationing becomes effective so that all cars throughout the country will be operating under a single set of rules, Mr. Henderson said.

The rationing of gasoline to the 20 million additional cars in the nation will require manufacture of thousands of tons of safety paper, a major printing job, and the setting up of an extensive nation-wide machinery to issue the books and handle the supplementary applications. Local War Price and Rationing boards will be asked to augment their staffs with temporary volunteer workers to handle the extra work, and instructions for doing this will be sent to them well in advance of the registration period, Mr. Henderson said.

Supplying the necessary coupons and forms and organizing for the gigantic undertaking is a task that will require more than six weeks to complete, Mr. Henderson estimated. He said orders have been placed for the safety paper and the printing of 60 million books of gasoline ration coupons, 91 million gummed sheets for preservation of the coupons as the service stations receive them from the motorists, 60 million application forms, and some 100 million copies of audit control forms, regulation books, and instruction guides and other necessary forms.

Sales

SALES MANAGERS EXECUTIVE COMMITTEE MEETS

The Sales Managers Executive Committee, advisory body to the NAB Department of Broadcast Advertising, met in Chicago on September 23 and 24. In addition to Chairman John M. Outler, Jr., WSB, the following Committee members were present: Arthur Hull Hayes, CBS, New York; Frank R. Bowes, WBZ, Boston, Mass.; William Malo, WDRC, Hartford, Conn.; Dietrich Dirks, KTRI, Sioux City, Ia.; Donald D. Davis, WHB, Kansas, City, Mo., and George H. Frey, NBC, New York.

Invited to attend were Sherman Gregory of NBC, William Gillespie of KTUL, Tulsa, and Walter Johnson of WTIC, Hartford. Sheldon Coons, retail advertising consultant, also attended.

Methods of securing a larger share of the retailers' advertising budget were discussed. Important plans will be revealed shortly.

Lewis H. Avery, newly appointed director of the Department of Broadcast Advertising, was introduced to the Committee and attended all of the sessions. Mr. Avery will report to his new position on October 1.

A general discussion regarding the effect of the war upon broadcast advertising took place, and reports indicate a most healthy condition.

Problems growing out of the criticism which has been leveled at radio by certain magazines and newspapers were discussed at length. The Committee felt that while most of the criticisms were unfair and to some extent exaggerated, there is need for careful scrutiny on the part of all stations as well as commercial managers of the content and length of commercial announcements.

As the result of a general discussion of a practice that appears to be growing more prevalent, the Sales Managers Executive Committee adopted the following resolution which is self-explanatory:

Whereas

The Sales Managers Committee of the National Association of Broadcasters is charged with the duty and responsibility of fostering and developing revenue-producing ideas for radio broadcasting; which duty and responsibility also involves an observation and analysis of practices which can have a deleterious effect on the future of our several businesses, and

Whereas

There has been noticed an occasional tendency on the part of some radio broadcasters, either deliberately or inadvertantly, to couple two or more announcements in the same spot on a schedule and

Whereas

This is against the best interests of the listener, the advertiser and the station, and provides a further opportunity for pointed criticism of radio broadcasting as an advertising medium; and, moreover, produces distrust on the part of the advertiser or his agency in the verity of our operation, therefore

Be It Resolved

That the Sales Managers Committee of the National Association of Broadcasters condemns such practise of double spotting and that while we hold that it is the privilege and prerogative of station operation to manage available business according to individual lights, we do most earnestly recommend the elimination of this abuse in the common interest and for the common good.

ADVERTISING EXEMPTION

In an earlier issue of the REPORTS (p. 515) a statement issued by Paul West, President of ANA, told of the results of a conference with Internal Avenue Commissioner, Guy T. Helvering, with regard to the subject of exemption of advertising costs from tax liability. The following official statement has now been issued by Commissioner Helvering:

"To be deductible, advertising expenditures must be ordinary and necessary and bear a reasonable relation to the business activities in which the enterprise is engaged. The bureau recognizes that advertising is a necessary and legitimate business expense so long as it is not carried to an unreasonable extent or does not become an attempt to avoid proper tax payments.

"The bureau realizes that it may be necessary for taxpayers now engaged in war production to maintain, through advertising, their trade names and the knowledge of the quality of their products and good-will built up over past years, so that when they return to peacetime production their names and the quality of their products will be known to the public.

"In determining whether such expenditures are allowable, cognizance will be taken of (1) the size of the business, (2) the amount of prior advertising budgets, (3) the public patronage reasonably to be expected in the future, (4) the increased cost of the elements entering into the total of advertising expenditures, (5) the introduction of new products and added lines, and (6) buying habits necessitated by war restrictions, by priorities, and by the unavailability of many of the raw materials formerly fabricated into the advertized products.

"Reasonable expenses incurred by companies in advertising and advertising technique to speed the war effort among their own employes, and to cut down accidents and unnecessary absences and inefficiency, will be allowed as deductions.

"Also reasonable expenditures for advertisements, including the promotion of Government objectives in wartime, such as conservation, salvage or the sale of war bonds, which are signed bv the advertiser, will be deductible provided they are reasonable and are not made in an attempt to avoid proper taxation.

"No definite rule for determining what is reasonable in the case of expenditures for advertising can be laid down in advance so as to fit all situations and all classes of taxpayers. In determining whether the amounts are reasonable it is necessary to take into consideration all the facts and circumstances in each particular case.

"The bureau will consider applications for individual rulings."

PER-INQUIRY OFFERS

Not only are P-I offers contrary to the Code of Ethics of the broadcasting industry, but investigation has also disclosed that much of the merchandise and many of the services offered are of doubtful or questionable value.

The Shaffer Brennan Margulis Advertising Co. of St. Louis, Mo., is at it again. S. I. Rosenfeld asks stations to carry a P-I deal for Paramount Hosiery of Lexington, N. C. He says that his client operates strictly legitimately, meaning that they fill orders promptly. But P-I deals are not consistent with good radio advertising ethics. Stations are again importuned not to accept this or any other P-I offer.

The Guenther Bradford & Co. advertising agency, Chicago, is seeking per-inquiry deals for their client, Dendex Co., Los Angeles, who are selling dental plate "reliners."

The United Advertising Companies, Chicago, are sending P-I requests to the stations for a game called "Battlecheckers" and for "Sinasiptec," a sinus medical aid.

The Radio Sales Co., Nestor, Calif., is submitting a per-inquiry offer to radio stations for the purpose of promoting "Stop-a-Leak," a solution to preserve motor tires.

Engineering

VACUUM TUBE REPAIR FACILITIES

The NAB Engineering Department has been conducting an investigation of the facilities available for the repair of vacuum tubes. The firms listed below have notified NAB of their willingness to accept for repair the types indicated and reports from stations using these tubes show satisfactory life from repaired tubes. Several additional manufacturers are now preparing repair facilities which will be announced in the near future.

Every effort has been made to make this directory complete; any omissions are not intentional and should be brought to the attention of the Engineering Department.

Please communicate directly with the organizations listed for detailed information concerning delivery, preference rating required, guarantee and prices.

Freeland & Olschner, Inc., 922 Howard Avenue, New Orleans, Louisiana. Phone: Raymond 4756. Types repaired: All tubes in general use, 250 watts or larger.

General Electric Co., Radio, Television and Electronics Dept., 1 River Road, Schenectady, New York. Types repaired: 207, 891, 892.

Garrett W. Lewis, Route 3, Los Gatos, California. Types repaired: 100T, 204A, 207, 212E, 220B, 220C, 228A, 232A, 250T, 251A, 279A, 450T, 806, 849, 869A, 869B, 872A, 891, 891R, 892, 892R, 893, 893R.

RCA Manufacturing Co., Mr. Harold Vance, Tube and Equipment Division, Camden, New Jersey. Phone: Camden 8000. Types repaired: 207, 891, 891R, 892, 892R.

PRIORITIES

Preference Rating Order, P-129, which authorized a Preference Rating of A-1-j on replacement items containing copper expired on September 30, 1942.

It is expected a new Preference Rating Order, P-133 will be announced within the next few days. The proposed order will assign a Preference Rating of A-1-j to all tubes, parts and essential materials necessary to maintain broadcast station operation. Plans are also under way to allocate materials and manufacturing facilities to make available vacuum tubes to broadcasters on the A-1-j Preference Rating. This should eliminate the necessity in most instances of filing PD-1A applications. Complete details of P-133 will be published when released by WPB.

CONSERVATION OF "VINYLITE"

In recent months it has become increasingly difficult to obtain "Vinylite", the thermoplastic used for the manufacture of radio transcriptions. This is due to the greatly increased use of "Vinylite" resin for war production. This material has been placed under strict control by the War Production Board by their General Preference Order M-154. This order permits the allocation of "Vinylite" for radio transcriptions after provision has been made for filling war orders.

We believe that there will be sufficient "Vinylite" for the radio transcription industry for some time to come, requiring very little, if any, new "Vinylite", provided the radio stations will return the transcription discs to the manufacturer for refabrication after they have served their purpose.

It is essential that all stations return transcription discs to the manufacturer in order that "Vinylite" may be conserved and the flow of transcriptions maintained. The various transcription manufacturers have given stations instructions on minimum quantities of transcriptions to be returned and whether by express or otherwise. Station operators are urged to comply strictly with these instructions.

FEDERAL COMMUNICATIONS COMMISSION

FLY'S PRESS CONFERENCE

Questioned at a press conference early this week as to whether or not the FCC intended to try and unfreeze various materials chairman James Lawrence Fly of FCC said. "I don't know whether they will succeed in doing so or not."

Discussing the conservation of equipment Mr. Fly told the newsmen, "that's in the hands of Industry Committees and I think they will be out with that in the course of a few days, and we ought to have some outward progress on that pretty soon."

The Chairman said he thought it a matter of real importance and should be gotten through the Board of War Communications to the WPB, "because after all we do have a serious situation on the conservation of materials, and I think it is of real interest to have a record of cooperation with the WPB in terms of conservation."

The question of manpower Mr. Fly told the conference is in the hands of industry committees and, "I would guess that industry itself is pretty well informed on the status of it since their representatives are working on the matter. I imagine they will present it to the Board within a week or so." Mr. Fly said this will include definitions and classification and when completed will be turned over to the other agencies. "As you know," the chairman said, "that is being worked out by the Industry Committees themselves and I think they are moving right along with the work, and it is my impression that it's in good shape and I guess they will get it before the Board and move along."

ARMY RADIO LISTENERS FAVOR DANCE MUSIC, NEWS AND COMEDY

The average soldier prefers radio programs of dance music, news broadcasts, comedy programs and sports events, and doesn't care too much for serial dramas, operas, symphonies or hill-billy music, according to a survey conducted in Army camps throughout the United States by the Research Branch, Special Service Division, the War Department announced today.

Approximately one soldier out of six owns a radio, the survey disclosed, and slightly more than half of the men listen to a program at some time during a typical weekday. Forty per cent said there are certain programs they would like to hear but cannot, the chief reasons being that there is no radio convenient, that programs come through when they are unable to listen, or that they have difficulty in getting the stations that carry them.

For some reason, more soldiers listen on Thursday than on any other weekday, and of those who listen on this day, 26 per cent tune in on morning programs, 29 per cent during midday hours and 52 per cent in the evening.

The listening peak on a typical weekday morning is from 6:15 to 7:00 o'clock; at midday from 12:15 to 12:45, and in the evening from 7:00 to 8:30 o'clock. The majority listen to programs in their barracks.

Popular music, sweet and dance music, is the favorite program, the survey showed, with 87 per cent of the soldiers questioned expressing a like for this type of broadcast, 3 per cent expressing dislike and 10 per cent expressing no opinion.

Second in popularity are news broadcasts, reports and comments on current happenings, liked by 86 per cent, disliked by 3 per cent and 11 per cent expressing no preference.

Comedy programs, gags, skits and funny plays are liked by 85 per cent, disliked by 4 per cent, and 11 per cent voiced no opinion.

Sports broadcasts, news and reviews of athletic activities are liked by 69 per cent, disliked by 10 per cent, and no opinion from 21 per cent.

Variety programs, offering several different kinds of entertainment, are favored by 66 per cent, disliked by 9 per cent, and no opinion from 25 per cent.

Popular music of the swing type, hot, scat and jive, are approved by 62 per cent, disapproved by 16 per cent, and 22 per cent expressed no opinion.

Radio plays, complete in one broadcast, are also approved by 62 per cent, disliked by 13 per cent, and 25 per cent voiced no opinion.

Old familiar music, ballads, folk songs and tunes of long ago, are liked by 57 per cent, disliked by 15 per cent, and no opinion from 28 per cent.

Quiz programs are also liked by 57 per cent, disliked by 17 per cent and no preference by 26 per cent.

Hill-billy and western music are approved by 42 per cent, disapproved by 33 per cent, and no opinion from 25 per cent.

Special event programs, including on-the-spot descriptions of ceremonies and other events, are favored by 39 per cent, disliked by 22 per cent, and no opinion from 39 per cent.

Classical music, broadcasts of symphonies, opera and other "serious" music are approved by 32 per cent, disliked by 35 per cent, and 33 per cent expressed no preference.

Serial dramas, stories that are continued from one broadcast to another, are approved by only 16 per cent, while 57 per cent disliked such broadcasts and 27 per cent expressed no opinion.

FCC STATION LICENSE RENEWALS

Inquiries are reaching NAB as to the reason for many renewal licenses being issued for periods of less than two years. In some instances 8 months, 6 months, 4 months, etc.

We are informed that in general these short-term renewals are not significant. The Commission is merely staggering the next renewal date in accordance with the order establishing the new license periods by frequencies, as amended on October 11, 1941, by action of the Commission.

BILL LEWIS IN CLOSED CIRCUIT TALK

William B. Lewis, chief of the radio bureau, OWI, is to address broadcasters on closed circuits on Friday, October 2, on the subject of OWI Regulations No. 2. From 12:45 to 1:00 p. m. he will speak over NBC and MBS from 4:15 to 4:30 p. m. over CBS and Blue.

Programs for Victory

FIRE PREVENTION WEEK BEGINS SUNDAY

Broadcast promotion of Fire Prevention Week, October 4-10, is lined up coast to coast. This year's emphasis is placed, by OCD, upon damage done by the war effort through the destruction or injury by fire of materials, dwellings or other structures.

BOOKLETS TO PASS 10,000,000 MARK

The third print order for "What Can I Do" booklets, advertised gratis by broadcast stations and published by OCD, is soon to be placed.

Within six days after news of the booklet reached stations, the original five million order was upped four million. Marvin Beers says OCD is now on the verge of ordering again.

The V-Home angle is being used by stations wherever local OCD councils are prepared. Stations are urged to continue the promotion of "What Can I Do" in order to insure maximum distribution of this booklet which is highly important to the war effort. Director Landis will authorize printing of additional booklets as long as demand persists.

OK SPONSORSHIP OF NAVY ET

Sponsorship of Navy's weekly transcribed programs, "Man Your Battle Stations," has been authorized by the Chief of Naval Personnel, by direction.

The matter will be explained in detail in a memorandum to all stations dated October 5, and attached to the weekly folio of Navy announcements.

COL. MARRINER ON ARMY HOUR

The Army Hour, broadcast over NBC stations, on October 11, will feature Army Air Forces Communications.

Colonel A. W. Marriner, Air Forces Director of Communications, will be among those appearing on the program.

VARIED PROMOTIONS SELL BONDS AT WMAQ

Everything from a thirty-piece brass band, playing on the drive overlooking the Chicago River to an effigy of Hitler has been used by WMAQ, NBC's Chicago station, in helping to sell several hundred thousand dollars worth of war bonds to date.

WMAQ recently completed a three-week contest among five of its top announcers—Bob Brown, Cleve Conway, Charlie Lyon, Fort Pearson and Louis Roen—in which each of the announcers had fifteen minutes on the air one day a week and a full-hour at the WMAQ Bond Booth in the main lobby of the Merchandise Mart one noon each week. In three weeks, the announcers sold some $50,000 worth of bonds over the counter during the noon periods alone, not counting direct sales by mail to radio listeners. Purchasers got to hit a dummy of Hitler, and Chicago radio artists entertained at the booth.

Then Chicago members of AFRA, the Chicago Federation of Musicians, and the Radio Writers' Guild came forward with the offer to stage a big variety show of their own on WMAQ late one night. The program went on the night of September 19, and brought some $25,000 in pledges to buy bonds.

On the night of September 28, WMAQ joined WBBM, WGN, WENR, WCFL, WIND, WJWC and other Chicago stations in broadcasting another big variety show for which Chicago radio, stage, night club and screen artists donated their talent. More than $360,000 worth of bond sales in Chicago alone were reported, and the 24 downstate stations which carried the program had not yet reported.

In addition, the WMAQ-NBC Central Division, with 270 employees, is 100 per cent pledged to payroll deductions for bond purchases, and now each of the employees is out to sell $100 worth of bonds to an outsider, which would net $27,000 more in sales.

NEW PROGRAM HEAD AT KDKA

New Program Manager for KDKA, Pittsburgh, is Robert E. White, formerly chief announcer of WBZ-WBZA. Appointment was announced last week by James R. Rock, General manager, KDKA. Last year Mr. White won the H. P. Davis Memorial Award as the outstanding announcer in the eastern time zone.

WTAD GETS THE MONEY

WTAD, Quincy, Ill., staged a war bond rally Thursday night, September 24, which produced sales and pledges of $358,400.

C. Arthur Fifer, general manager, explained that the staff of WTAD raised $242,243 of this amount prior to the opening of the rally.

The entertainment consisted of a name orchestra, Freddy Nagel, with a member of WTAD's staff conducting and the picture, Wake Island, furnished by the Washington Theatre of Quincy.

Admission to the theatre was the purchase of a $25 or $50 war bond. This netted $83,350; $32,807 was received from an auction conducted the night of the show.

New Angle on Scrap

The metal scrap heaps in Quincy are larger and heavier than they would have been without a special promotion by WTAD.

WTAD is aggressively after such items as iron fences, statues, fountains, etc., which, though still in good condition, will perform a more useful function as scrap. Station is advocating the giving up of all metal items even though a real sacrifice to the owner is involved.

First of the special scrap programs was broadcast September 22 at 7:15 p.m. It was built around the example of two local residents with adjoining homes surrounded by 1,000 feet of heavy ornamental iron fence. Though a landmark for years and in perfect condition, Mr. and Mrs. L. P. Bonfoey and Mr. and Mrs. E. N. Monroe tossed the fence on the local scrap heap.

Because of this example, Station Manager C. Arthur Fifer has received reports of many similar, if not as large, donations.

"WAR SACRIFICE FUND"

Jess Willard, general manager of WJSV, Washington, D. C., is sponsor of a personal "War Sacrifice Fund" plan to help win the war, by producing additional funds for investment in war savings bonds.

It was devised as a means for patriotic individuals to go beyond the normal line of duty, voluntarily, to help win the war. Here's how it operates:

Each person establishes his own personal "War Sacrifice Fund" with sacrifice savings. Such savings are beyond legal requirements, such as taxes; and beyond the normal line of duty such as investing 10%. Into the fund are placed sums of money which might normally have been expended for an extra cocktail, a package of cigarettes, a box of candy or contemplated travel.

Mr. Willard pointed out that if all the workers established a "War Sacrifice Fund" and averaged $1 a week it would produce $2,808,000,000 a year. But he thinks that the average, based on sound economic calculations, should be at least $4 a week. This would bring in $11,232,000,000 annually, beyond the normal national income for war purposes.

OVER A HUNDRED GRAND FOR SAM

Current transportation difficulties have necessitated the discontinuance of the KMBC Victory Caravan which has been playing personal appearances at War Bond rallys in the station's listening area. The effort previously directed to the Caravan will now be devoted to direct sales efforts which are proving so effective.

Actual sales, not pledges, made by the KMBC Victory Caravan amounted to $110,149.40. The original slogan was "A HUNDRED GRAND FOR UNCLE SAM." Despite the discontinuance of the unit the original quota was exceeded by 10%.

List of cities covered by the Caravan, together with actual sales made by the Caravan follow:

Leavenworth, Kan.	$ 3,640.00
Emporia, Kan.	11,230.00
Ottawa, Kans.	900.00
Iola, Kan.	12,492.60
Olathe, Kan.	14,086.75
Warrensburg, Mo.	3,640.00
Independence, Mo.	2,400.00
Liberty, Mo.	2,755.00
Hamilton, Mo.	16,566.45
Cameron, Mo.	24,607.70
Harrisonville, Mo.	18,026.50

PRESIDENT DAVIS TO WPB

Donald D. Davis, president of General Mills Company, Minneapolis, reported for work in Washington last Tuesday. He is the first of several top men in the production field who will be recruited by WPB to strengthen the staff of the office of the Vice Chairman on Program Determination.

Mr. Davis has the post of Director of the newly created Program Coordination Division of the War Production Board.

ARE WE LETTING OUR ALLIES DOWN?

J. E. (Pat) Garner, Manager and News Editor of KFPW, has made excellent use of the "background" material on the United Nations sent out by the Office of War Information. The material was condensed into a brief talk which Garner delivered to the Fort Smith (Arkansas) Lions Club. The Club thought so highly of the talk that it has been printed in pamphlet form. A limited supply is available upon request to Mr. Garner at KFPW, Fort Smith, Arkansas.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, October 5. They are subject to change.

Monday, October 5

Further Hearing

KXKX—First National Television, Inc., Kansas City, Mo.—Renewal of license, **1590 kc.**, 1 KW, unlimited.

Tuesday, October 6

KPAC—Port Arthur College, Port Arthur, Texas.—Modification of license **1250 kc.**, 1 KW, DA-night, unlimited.

Wednesday, October 7

Television Broadcast

NEW—Hughes Productions, Division of Hughes Tool Company, Los Angeles, Calif.—C. P., **60000-66000 kcs.**; Ch. No. 2, ESR-500.

NEW—Hughes Productions, Division of Hughes Tool Company, San Mateo County, Calif.—C. P., **60000-66000 kcs.**; Ch. No. 2, ESR-740.

Thursday, October 8

Further Hearing

NEW—Beauford H. Jester, Individually and as Trustee for W. W. Callan, Dewitt T. Hicks, Hilton W. Howell, Wilford W. Naman, Robert C. Levy, Ross M. Sams & Davis Stribling, Waco, Texas.—C. P., **1230 kc.**, 250 watts, unlimited.

Friday, October 9

WBOW—Banks of Wabash, Inc., Terre Haute, Ind.—C. P., to install new transmitter, **1230 kc.**, 250 watts, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WFMJ—Wm. F. Maag, Jr. (Assignor), The WFMJ Broadcasting Co. (Assignee), Youngstown, Ohio.—Granted consent (B2-AL-348) to assignment of license for station WFMJ from William F. Maag, Jr., to The WFMJ Broadcasting Co., a newly organized corporation of which the assignor, Wm. F. Maag, Jr., will own 99.2 percent of its authorized capital stock.

WNAC—The Yankee Network, Inc., Boston, Mass.—Granted extension for period of 60 days of Special Service Authorization to operate with power of 5 KW, employing a directional antenna at night (B1-SSA-47).

W31NY—Edwin H. Armstrong, Alpine, N. J.—Granted application for modification of construction permit of high frequency broadcast station for extension of completion date to November 4, 1942.

DESIGNATED FOR HEARING

WQBC—Delta Broadcasting Co., Inc., Vicksburg, Miss.—Designated for hearing application for modification of license (B3-ML-1076) to change frequency from **1390 to 1470 kc.**, hours of operation from day to unlimited, and use 500 watts power night, 1 KW day.

KFAC—Los Angeles Broadcasting Co., Inc., Los Angeles, Calif.—Designated for hearing application to increase power from 1 to 5 KW, move transmitter, install new transmitter, and install directional antenna for night use (B5-P-3499).

MISCELLANEOUS

WJAS—Pittsburgh Radio Supply House, Pittsburgh, Pa.—Granted modification of construction permit, as modified, for increase in power and installation of directional antenna for night use, for extension of completion date from September 27 to November 27, 1942 (B2-MP-1635).

KFVS—Oscar C. Hirsch, tr/as Hirsch Battery & Radio Co., Cape Girardeau, Mo.—Granted license to cover construction permit to make changes in transmitting equipment (B4-L-1705); granted authority to determine operating power by direct measurement of antenna power (B4-Z-1435).

KMYC—Marysville-Yuba City Broadcasters, Inc., Marysville, Calif.—Granted license to cover construction permit which authorized move of transmitter and studio (B5-L-1697).

KBWD—Brown County Broadcasting Co., Brownwood, Tex.—Granted authority to determine operating power by direct measurement of antenna power (B3-Z-1440).

KMYC—Marysville-Yuba City Broadcasters, Inc., Marysville, Calif.—Granted authority to determine operating power by direct measurement of antenna power (B5-Z-1433).

WRGA—Rome Broadcasting Corp., Rome, Ga.—Granted license to cover construction permit for move of transmitter and changes in antenna system (B3-L-1703); granted authority to determine operating power by direct measurement of antenna power (B3-Z-1432).

KFEQ—KFEQ, Inc., St. Joseph, Mo.—Granted modification of construction permit as modified, for installation of new transmitter and directional antenna for day and night use, increase in power, change hours of operation, and move of transmitter, for extension of completion date from September 30 to November 30, 1942 (B4-MP-1640).

WNOX—Scripps-Howard Radio, Inc., Knoxville, Tenn.—Granted license to cover construction permit as modified, for directional antenna for night use, increase in power, and changes in equipment (B3-L-1709); granted authority to determine operating power by direct measurement of antenna power (B3-Z-1439).

WSBA—Susquehanna Broadcasting Co., York, Pa.—Granted license to cover construction permit, as modified, for a new broadcast station (B2-L-1708); granted authority to determine operating power by direct measurement of antenna power (B2-Z-1438).

WBUL—Blue Network Co., Inc., (Portable-Mobile), area of Chicago, Ill.—Granted modification of license for change in serial number of transmitter from Serial No. 3 to Serial No. 2 (B4-MLRE-107).

W47P—Walker and Downing Radio Corp., Pittsburgh, Pa.—Granted modification of license to change corporate name from Walker and Downing Radio Corp. to WWSW, Inc. (B2-MLH-1).

W2XMC—Muzak Corp., New York, N. Y.—Granted modification of construction permit, as modified, for new developmental broadcast station, for extension of completion date from September 1, 1942, to March 1, 1943 (B1-MPEX-9).

WPTZ—Philco Radio & Television Corp., Philadelphia, Pa.—Granted modification of construction permit, as modified, for new commercial television broadcast station, for extension of completion date from October 1 to December 1, 1942 (B2-MPCT-17).

WEJK—National Broadcasting Co., Inc. (Portable-Mobile), area of Chicago, Ill.—Granted modification of license for change in serial number of transmitter from Serial No. 3 to Serial No. 2 (B4-MLRE-108).

W2XYP—Columbia Broadcasting System, Inc., New York, N. Y.—Granted license to cover construction permit as modified, for new ST broadcast station; granted on an experimental basis only, conditionally (B1-LST-1).

WDAE—Tampa Times Company, Tampa, Florida.—Denied Special Service Authorization (B3-SSA-46), to operate on **770 kc.**, 5 KW, unlimited time, directional antenna night.

KTSM—Tri-State Broadcasting Co., Inc., El Paso, Texas.—Denied Special Service authorization to operate on **690 kc.**, 500 watts, 1 KW-LS, unlimited time (B3-SSA-38). Also dismissed application for construction permit (B3-P-3492) to change frequency to **690 kc.**, increase nighttime power to 1 KW, and install directional antenna for day and night use.

WBAX—John H. Stenger, Jr., Wilkes-Barre, Pa.—Granted petition for extension of effective date of temporary license to December 31, 1942.

John W. Choate, Lenore Herd Choate, E. P. Nicholson, Jr., and John Wallbrecht, Middleboro, Ky.—Denied petition to reconsider and grant application for construction permit for a new station.

WJJD—WJJD, Inc., Chicago, Ill.—Dismissed without prejudice application for construction permit since applicant has failed to file a petition indicating desire to prosecute application in conformity with Memo. Opinion of April 27, 1942.

KFMB—Worcester Broadcasting Corp., San Diego, Calif.—Denied application for Special Service Authorization (B5-SSA-33) to use frequency **1170 kc.**

WAPI—Voice of Alabama, Inc., Birmingham, Ala.—Adopted a Memorandum Opinion and Order granting in part the application of WAPI for change in frequency from **1170 kc.** to **1070 kc.**, and denied without prejudice the request for an increase in power from 5 to 50 KW. The grant was made upon the condition that the applicant file an application for modification of construction permit specifying a suitable directional antenna making use only of the two towers now in use at the station. The Commission also ordered that the applicant shall within 20 days of the date of Order notify the Commission in writing that it accepts or rejects the foregoing grant in part and denial in part of its application. In the event the applicant notifies the Commission that it accepts the foregoing grant in part and denial in part of its application, it shall within a further period of 30 days file an application for modification of construction permit satisfactory to the condition attached to the grant in part of its application regarding suitable antenna (Docket No. 6117).

WCOA—Pensacola Broadcasting Co., Pensacola, Fla.—Denied petitions requesting authority to operate with power of 10 KW on frequency **1030 kc.**, and installation of new transmitter, using directional antenna at night, and designated application (B3-P-3342) for hearing.

WOV—WODAAM Corp., New York City.—Granted renewal of license for standard and auxiliary station for the period ending October 1, 1944.

WBOW—Banks of Wabash, Inc., Terre Haute, Ind.—Granted petition for continuance of hearing on application to install new transmitter, to November 12, 1942.

WKBW-WGR—Buffalo Broadcasting Corp., Buffalo, N. Y.—Granted motion to postpone hearing date on applications for renewal of licenses for main and auxiliary transmitters of stations WKBW and WGR, to November 20.

KDNT—Harwell V. Shepard, Denton, Texas.—Granted petition to accept late appearance in re application for construction permit (Docket 6352).

WHEB—WHEB, Inc. (R. G. LeTourneau), Transferor, and the LeTourneau Foundation, Transferee, Portsmouth, N. H.—The Commission on its own motion continued the hearing on application to transfer control of station WHEB from October 2 to November 6, 1942.

APPLICATIONS FILED AT FCC

560 Kilocycles

KPQ—Wescoast Broadcasting Co., Wenatchee, Wash.—Extension of special service authorization to operate on **560 kc.**, 500 watts night, 1 KW daytime, unlimited time, using transmitter authorized by (B5-P-3150) as modified until completion of directional antenna system.

590 Kilocycles

WKZO—WKZO, Inc., Kalamazoo, Mich.—License to cover construction permit (B2-P-3281 as modified), which authorized increase in night power and changes in directional antenna system for night use.

WKZO—WKZO, Inc., Kalamazoo, Mich.—Authority to determine operating power by direct measurement of antenna power.

780 Kilocycles

WMC—Memphis Publishing Co., Memphis, Tenn.—License to cover construction permit (B3-P-2743 as modified) for increase in night power and changes in directional antenna for night use.

WMC—Memphis Publishing Co., Memphis, Tenn.—Authority to determine operating power by direct measurement of antenna power.

910 Kilocycles

WABI—Community Broadcasting Service, Bangor, Maine.—Modification of construction permit (B1-P-2349 as modified), which authorized change in frequency, increase power, new transmitter and directional antenna for night use, requesting extension of completion date from 8-30-42 to 12-30-42.

1010 Kilocycles

KLRA—Arkansas Broadcasting Co., Little Rock, Ark.—Extension of special service authorization to operate on **1010 kc.,** 5 KW night, 10 KW daytime, directional antenna night, using the transmitter as authorized by B3-P-3049 as modified, for the period 12-1-42 to 12-1-44.

1290 Kilocycles

WTOC—Savannah Broadcasting Co., Savannah, Ga.—Modification of construction permit (B3-P-2944 as modified), which authorized installation of directional antenna for night use, and increase in night power, for extension of completion date from 10-15-42 to 12-15-42.

1390 Kilocycles

KGER—Consolidated Broadcasting Corp., Ltd., Long Beach, Calif. —Modification of construction permit (B5-P-3096 as modified), which authorized increase in power, installation of new transmitter and directional antenna for night use and move of transmitter for extension of completion date from 10-12-42 to 11-12-42.

FM APPLICATIONS

W83C—WHFC, Inc., Chicago, Ill.—Modification of construction permit (B4-PH-36), which authorized construction of new high frequency broadcast station for change in location of transmitter, antenna changes, change in type of transmitter and extension of commencement and completion dates.

W49PH—Pennsylvania Broadcasting Co., Philadelphia, Pa.—License to cover construction permit (B2-PH-69 as modified), which authorized construction of new high frequency broadcast station, in part in accordance with Commission action of 8-4-42.

W75NY—Metropolitan Television, Inc., New York, N. Y.—License to cover construction permit (B1-PH-52 as modified), which authorized construction of new high frequency broadcast station in part in accordance with Commission action of 8-4-42.

MISCELLANEOUS APPLICATIONS

WCAH—Board of Education, City of Buffalo, Buffalo, N. Y.—Modification of construction permit (B1-PED-24 as modified), which authorized construction of new non-commercial educational broadcast station requesting extension of commencement and completion dates to 6 months after termination of war emergency and 1 year after termination of war emergency, respectively.

KOB—Albuquerque Broadcasting Co., Albuquerque, N. Mex.—Modification of construction permit (B5-P-2783 as modified), which authorized installation of new equipment and increase power for extension of completion date from 11-19-42 to 10-1-43.

KGCX—E. E. Krebsbach, Sidney, Mont.—Modification of license to change location of main studio from 4 miles north of Sidney, Montana, to Lot 10, Block 14 on Main St., Sidney, Montana.

KVGB—Helen Townsley, Great Bend, Kansas.—License to cover construction permit (B4-P-3509) for move of transmitter.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Marvel Laboratories, 1205 Market St., Louisville, Ky., are charged in a complaint with misrepresentation in connection with the sale of a product designated "Marvel Coal-Pep," advertised and recommended by them as being capable of increasing the heating effectiveness of coal and of reducing soot and smoke (4838).

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Adams Laboratories, Inc., 4005 Washington Blvd., St. Louis, has entered into a stipulation to discontinue representing that the medicinal preparation it sells under the name "Prunlax" is a remedy or cure for constipation, aids in toning up the liver or kidneys, and is effective in the treatment or prevention of backaches, headaches, biliousness, colds, and swollen joints; that it will renew or strengthen lost energy and keep children full of energy; that it arrests colitis or the formation of hemorrhoids or fissures; and that prune juice is the basis of the preparation. The respondent stipulates it will cease and desist from representing, through the use of the brand name "Prunlax," alone or with other words or pictorial representation, that the preparation derives its laxative properties from prunes, and agrees to stop using the word "Laboratories" in connection with its business when it does not own, control and direct a laboratory where research work is conducted in connection with the production of its product. (03053)

American Oil Co., Baltimore, engaged in selling certain petroleum products designated "Amoco Gas" and "Penn Amoco Permalube Processed Oil" has stipulated to cease representing that internal combustion engines can utilize the maximum energy of Amoco Gas; that no other motor fuels have an anti-knock rating equal to that of Amoco Gas; that its use eliminates "destructive" vibration from internal combustion engines; or that Penn Amoco Permalube Processed Oil will tend to make an old car perform like it did when new without expressly limiting such claim to any detergent action which the product may have on engine deposits. (03051)

Battle Creek Dog Food Co., trading as Miller's Dog Foods, Battle Creek, Mich., selling various dry dog food preparations designated "Miller's Kibbles," "Miller's Biscuits," "Miller's Puppy Meal," "Miller's Meaties," and "Miller's Ration," and Paul C. Staake and Carl Schoonmaker, trading as Staake and Schoonmaker, Kalamazoo, Mich., and conducting an advertising agency which disseminated advertisements for the above-named products, have stipulated to cease and desist from using the terms "meat scraps," "dehydrated meat," or any terms of similar import to describe dehydrated meat meal or any product which is not meat in fact, and from use of the expression "Meaties" in the brand name "Miller's Meaties" to represent that the product contains meat. (03052)

Hercules Liquor Products Corp., 360 Furman St., Brooklyn, rectifier and blender of bottled liquors, engaged in the sale of a product designated "Piedmont Cuba Libre," has stipulated that in the advertising or labeling of the product it will cease and desist from use of the word "Cuba" as part of the trade name for the liquor product or the word "Cuba," either alone or in connection with other words or picturization, to describe the product, the effect of which tends to convey the belief to the purchaser that the rum used in the concoction of the product is of Cuban origin or manufacture. If the word "Cuba" is used to designate a liquor product which contains or is made from rum other than Cuban rum it shall be clearly and unequivocally disclosed by some other word or words that the rum used in making the product is other than Cuban rum. (3532)

Henry Millinery Import Corp., 34 West 38th St., New York, engaged in the wholesale distribution of felt hat bodies, has stipulated to cease representing that its wool felt or other products, which are composed in whole or in part of inferior materials or which are imperfect, or defective in any way, are of first, standard or the best quality by failure to stamp on the sweatband, or elsewhere, in the absence of a sweatband (in conspicuous and legible terms which cannot be removed or obliterated without mutilating the stamped portion), a statement that the products are seconds or that they are of such other quality below standard as is the fact; selling or placing in the hands of others for sale fur felt, or other products composed in whole or in part of used or second-hand materials, under the representation that the products are new, or are composed of new materials, by failure to stamp on the sweatband, or elsewhere, in the absence of a sweatband, in conspicuous and legible terms which cannot be removed or obliterated without obliterating the stamped portion, a statement that the products are composed of second-hand or used materials; and representing in any manner that products made in whole or in part from old, used or second-hand materials are new or are composed of new material or that products which are not of first, standard or the best quality are of such quality or that they are of a quality in excess of their merit. (3533)

Prescott Drug Co., 190 South Main St., Memphis, Tenn., entered into a stipulation to cease and desist from representing that the medicinal preparation he sells under the name "Dr. Sphinx's Sarsaparilla and Iron with Iodide Potash" is effective in the treatment of bad blood, rheumatism, malaria, general rundown condition, or stomach trouble, and is a blood, liver and kidney cleanser. The respondent agrees to discontinue representing by the use of the prefix "Dr." in the brand name that the product is manufactured or offered for sale by a doctor of medicine, and to stop using the word "Sarsaparilla" to refer to any preparation which does not contain sarsaparilla in sufficient quantity to possess therapeutic value. (03054)

Sunset Art Studios, and Otto A. Juettner and Frank Schultz, all of Seattle, Wash., stipulated that in connection with the sale of photographs and picture frames they will cease and desist from:

Using the word "painting" as descriptive of colored or tinted photographs or pictures produced from a photographic plate, film, base or impression so as to imply that such pictures are oil paintings or paintings; representing that the price at which they sell their pictures is introductory, special, or reduced; representing that their pictures formerly sold for a price in excess of the usual and customary price at which they actually have been sold; selling pictures so shaped or designed that they can be framed only in odd style frames or in frames obtainable from the respondents unless prospective purchasers are definitely apprized of the fact that the frames are of an odd style, the price of which is materially in excess of that of frames of a conventional style and are obtainable only from the respondents; refusing to deliver pictures after payment has been made unless all the terms under which such delivery is withheld have been fully disclosed to and accepted by purchasers; and using the word "guaranteed" in connection with the sale of their products unless clear and unequivocal disclosure is made of exactly what is offered by way of security. (3534)

Superior Vault Co., Port Chester, N. Y., stipulated to discontinue representing that the reinforced concrete burial vaults they manufacture and sell are everlasting, permanently waterproof, absolutely resistant to condensation, or will afford permanent protection to caskets or bodies. They also agree to stop using any so-called warranty agreement that implies that their vaults are guaranteed for anv period of time greater than that which can reasonably be estimated as the time during which they will be capable of complying with the provisions contained in such agreement. (3535)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Bewley Mills—Dissemination of false advertisements concerning poultry and stock feeds sold under the brand name "Bewley's Red Anchor" is prohibited under an order issued against Bewley Mills, Fort Worth, Tex. (4739)

Heatless Permanent Wave Company—An order has been issued directing Irvin A. Willat, trading as Heatless Permanent Wave Co., 1122 Folsom St., San Francisco, to cease and desist from disseminating false advertisements concerning a method of heatless permanent waving which includes use of a curling solution found by the Commission to be unsafe when applied under some conditions and capable, in some instances, of resulting in serious and irreparable injury to health when used under the conditions prescribed in Willat's advertisements. (4663)

Kondi Co., Atlanta, Ga., has been ordered to cease and desist from misrepresentation in the sale of a dog medicine designated "Kondi Worm Specific and Conditioner." (3217)

WAR DOMINANT THEME

The relation of radio broadcasting to the war effort will be the dominant theme at the forthcoming series of District meetings. This series gets under way with a meeting at Philadelphia on Monday, October 19, and the schedule presented above will be followed closely.

These 1942 District sessions assume unusual importance because of the fact that many of the major government war agencies will be represented. The following have already advised that they will be represented:

Office of War Information
Office of Censorship
Office of Civilian Defense
The War Department
The Navy Department
The Marine Corps
The Treasury Department

In addition it is expected that representatives of Selective Service, the War Manpower Commission and the War Production Board will attend the sessions.

The representatives of each of the foregoing services and agencies will discuss problems of mutual concern to themselves and broadcasters.

Consistent with the theme of the sessions, the sales managers meeting on the second day will be devoted to a discussion of wartime radio advertising. Lewis H. Avery, newly appointed Director of the NAB Department of Broadcast Advertising, will key these discussions.

The breadth of subjects to be considered at these meetings suggests the importance of the attendance of every station manager and of his sales manager, as well as the head of his news department and possibly his engineer.

Radio has already contributed splendidly to the war effort but there is much to be learned about ways and means to improve that service. These meetings afford that opportunity.

Following is an outline of the tentative program which will be presented at each of the District meetings. Undoubtedly other subjects will be added.

Tentative Program for District Meetings

First Day

9:00 a.m.— Registration
10:00 a.m.— Registration
10:00 a.m.— 1. Call to Order by District Director
2. Announcements
3. Appointment of Committees
4. "The War Work of NAB"—Neville Miller
5. "Keeping People Informed on the War"—Carl Haverlin, Stations Relations Consultant, Office of War Information
12:30 p.m.— Luncheon (This may be put on in cooperation with some civil group at the option of the Director or one of the men from the government departments could speak at the luncheon session.)
2:00 p.m.— 6. "Keeping the Enemy Uninformed"—Gene Carr, Office of Censorship
7. "Financing the War"—Representative, Radio and Press Section, Treasury Department
8. "Radio and Army Morale"—Representative, Radio Branch, Public Relations Bureau, War Department
9. "Radio and the Men at Sea"—Representative, Public Relations Division, Navy Department
10. "Radio and the Marine Corps"—Representative, United States Marine Corps
11. "Radio's Contribution to Civilian Morale"—Representative, Office of Civilian Defense
12 The Music Situation
  a. AFM—Petrillo
  b. BMI—ASCAP—SESAC—AMP
13. Legislation
  a. Sanders Bill
  b. Tax Bill
  c. State Legislatures
14. Plug Uglies and other Magazine Articles

Second Day

"Radio Advertising in Wartime"—A Sales Managers Clinic

10:00 a.m.— 1. Call to Order by District Sales Managers Chairman
2. Announcements
3. Appointment of Resolutions Committee
Panel discussions of the following subjects will be led by Lew Avery:
4. Tying Broadcast Advertising to the War Effort—But NOT to the War.
5. Radio Leaves Such a Good Taste—Let's Keep it in Good Taste (Magazine articles and replies)
6. Recommended Standards for the Determination of Coverage Maps
7. What Radio Buyers Want to Know
8. Increased Use of Recommended Rate Card
9. Per-Inquiry and Free Time Requests
10. Building Increased Confidence in Broadcast Advertising by Reducing Errors of Performance
11. New Ideas to Maintain or Improve Present Volume of Business
  (Every Sales Manager who attends these meetings will be expected to bring and explain one idea that: Convinced an existing account to invest more of the advertising budget in radio; brought a new account to his station; introduced broadcast advertising to a type of account that had not previously used radio in his market.)
12. NAB Sales Helps
13. The Outlook for Business to Keep Radio Stations Running Full Blast to Aid the War Effort.

SALES MANAGERS' CLINICS

In this industry, it is definitely trite to say: "Faced with the gravest problems the sales managers have ever been asked to solve . . ." That's what we have been saying for years. Perhaps we have crief "wolf" that once-too-often time. But the fact remains that the sales managers have some real thinking to do to meet today's needs and problems.

Probably you've read enough about the connection of the war effort with broadcasting in general to realize that winning the war is our first objective. War is, therefore, the major topic of the one-day meeting of the sales managers to be held on the second day of the district meetings. Most of the broadcast advertising carried by all stations—great and small—is helping to promote the war effort.

But, here and there, an advertiser has taken advantage of the war to enhance the appeal for his merchandise or service. How to detect such infringements of good taste and patriotism is one of the problems that will be explored by the sales managers.

Perhaps we have thought that advertising in general—and broadcast advertising in particular—has been criticized unfairly in the past. But such criticism has doubled and quadrupled within the last few months. As you all know, one publication has sought to build what amounts to an anti-radio-advertising league.

If we are honest with ourselves—and we must be—such criticism is deserved in part; must be met in whole, if we are to progress as an advertising medium. That's just what the sales managers will do at the forthcoming district meetings.

Perhaps this is no time to plan even a "slicking-up" around the house but, based on the old adage that "there's no time like the present," the Sales Managers' Executive Committee has recommended a study of the factors that contribute to good taste in broadcast advertising, looking toward the preparation of a statement that codifies the practices and principles of good broadcasting.

Evidence so far accumulated indicates that the rate of turnover among local advertisers is undoubtedly the highest in the history of our medium. What's more, the foresighted feel that this rate may even be stepped up as we swing into 1943. How, then, can we continue to hold or increase the present volume of broadcast advertising so that the owner, the manager, the program director and the newscasters can continue to render their vital service in the leading role that broadcasting is playing in the conduct of the war. You'll hear plenty about that at the district meetings, so be sure to attend.

Now that you are thinking about it—what about the future of our business in 1943? What can we reasonably expect in the light of the past? How much of what has happened in the past has a bearing on the future? Perhaps we can all contribute to such a forecast as will kindle our enthusiasm and build hope and confidence.

But that's only part of the story of the sales managers meetings that will be held on the second day of the district meetings. You'll certainly want to attend. You have ideas and plans that the whole industry can use. Perhaps you, too, can glean something of value from the ideas of others.

Recheck that list of district meetings and plan now to be at one of them.

SPECIAL MEETING NAB BOARD

A special meeting of the NAB Board of Directors will convene at the Palmer House, Chicago, on Tuesday, October 13. This meeting will immediately follow the hearing of the arguments in the government's case against the A. F. of M. and James C. Petrillo. The case will be argued on the government's behalf by Thurman Arnold, head of the Anti-Trust Division of the Attorney General's Office and NAB will present a brief as a friend of the court.

Pay Freezing

President Roosevelt on October 3 issued his long-expected wage freezing order and appointed the War Labor Board to enforce it.

In brief, the order freezes all *wage rates* at their September 15 level, except in cases where the WLB finds increases are "necessary to correct maladjustments or inequalities, to eliminate substandards of living, to correct gross inequities, or to aid in the effective prosecution of the war."

Salaries *above* $5,000 are frozen, too, "except in instances in which an individual has been assigned to more difficult or responsible work."

We used the italics in the previous two paragraphs because it now appears that there was a mistake in drafting the order, and that *salaries below $5,000 were not frozen.*

Unless and until this mistake is corrected (which it probably will be), the order leaves the broadcasting industry practically untouched, because the bulk of broadcasting employees are paid on a salary basis (by the week, month or year) and not on an hourly ("wage rate") basis. As it stands, only the salaries of radio's top executives and performers are frozen.

We repeat, however, that this mistake probably will be rectified, and all salaries as well as wages will be frozen.

Within the next few days, the WLB will issue some general regulations as to enforcement. One of these probably will automatically allow any increases made prior to October 3, despite the September 15 freeze date. Another will permit so-called "automatic" increases. As an example, an employee hired with the understanding that he is to receive a $5 increase after 6 months service will be permitted to receive that increase.

The NAB will keep you advised.

The text of the Executive Order:

By virtue of the authority vested in me by the Constitution and the statutes, and particularly by the Act of October 2, 1942, entitled "An Act to Amend the Emergency Price Control Act of 1942, to Aid in Preventing Inflation, and for Other Purposes," as President of the United States and Commander in Chief of the Army and Navy, and in order to control so far as possible inflationary tendencies and the vast dislocations attendant thereon which threaten our military effort and our domestic economic structure, and for the more effective prosecution of the war, it is hereby ordered as follows:

TITLE I

Establishment of an Office of Economic Stabilization

1. There is established in the Office for Emergency Management of the Executive Office of the President an Office of Economic Stabilization at the head of which shall be an Economic Stabilization Director (hereinafter referred to as the Director).

2. There is established in the Office of Economic Stabilization an Economic Stabilization Board with which the Director shall advise and consult. The Board shall consist of the Secretary of the Treasury, the Secretary of Agriculture, the Secretary of Commerce, the Secretary of Labor, the Chairman of the Board of Governors of the Federal Reserve System, the Director of the Bureau of the Budget, the Price Administrator, the Chairman of the National War Labor Board, and two representatives each of labor, management, and farmers to be appointed by the President. The Director may invite for consultation the head of any other department or agency. The Director shall serve as Chairman of the Board.

3. The Director, with the approval of the President, shall formulate and develop a comprehensive national economic policy relating to the control of civilian purchasing power, prices, rents, wages, salaries, profits, rationing, subsidies, and all related matters—all for the purpose of preventing avoidable increases in the cost of living, cooperating in minimizing the unnecessary migration of labor from one business, industry, or region to another, and facilitating the prosecution of the war. To give effect to this comprehensive national economic policy the Director shall have power to issue directives on policy to the Federal departments and agencies concerned.

4. The guiding policy of the Director and of all departments and agencies of the Government shall be to stabilize

the cost of living in accordance with the Act of October 2, 1942; and it shall be the duty and responsibility of the Director and of all departments and agencies of the Government to cooperate in the execution of such administrative programs and in the development of such legislative programs as may be necessary to that end. The administration of activities related to the national economic policy shall remain with the departments and agencies now responsible for such activities, but such administration shall conform to the directives on policy issued by the Director.

TITLE II

Wage and Salary Stabilization Policy

1. No increases in wage rates, granted as a result of voluntary agreement, collective bargaining, conciliation, arbitration, or otherwise, and no decreases in wage rates, shall be authorized unless notice of such increases or decreases shall have been filed with the National War Labor Board, and unless the National War Labor Board has approved such increases or decreases.

2. The National War Labor Board shall not approve any increase in the wage rates prevailing on September 15, 1942, unless such increase is necessary to correct maladjustments or inequalities, to eliminate substandards of living, to correct gross inequities, or to aid in the effective prosecution of the war.

Provided, however, that where the National War Labor Board or the Price Administrator shall have reason to believe that a proposed wage increase will require a change in the price ceiling of the commodity or service involved, such proposed increase, if approved by the National War Labor Board, shall become effective only if also approved by the Director.

3. The National War Labor Board shall not approve a decrease in the wages for any particular work below the highest wages paid therefor between January 1, 1942 and September 15, 1942, unless to correct gross inequities and to aid in the effective prosecution of the war.

4. The National War Labor Board shall, by general regulation, make such exemptions from the provisions of this title in the case of small total wage increases or decreases as it deems necessary for the effective administration of this Order.

5. No increases in salaries now in excess of $5,000 per year (except in instances in which an individual has been assigned to more difficult or responsible work), shall be granted until otherwise determined by the Director.

6. No decrease shall be made in the salary for any particular work below the highest salary paid therefor between January 1, 1942 and September 15, 1942 unless to correct gross inequities and to aid in the effective prosecution of the war.

7. In order to correct gross inequities and to provide for greater equality in contributing to the war effort, the Director is authorized to take the necessary action, and to issue the appropriate regulations, so that, insofar as practicable, no salary shall be authorized under Title III, Section 4 to the extent that it exceeds $25,000 after the payment of taxes allocable to the sum in excess of $25,000. Provided, however, that such regulations shall make due allowance for the payment of life insurance premiums on policies heretofore issued, and required payments on fixed obligations heretofore incurred, and shall make provision to prevent undue hardships.

8. The policy of the Federal Government, as established in Executive Order No. 9017 of January 12, 1942, to encourage free collective bargaining between employers and employees is reaffirmed and continued.

9. Insofar as the provisions of Clause (1) of section 302(c) of the Emergency Price Control Act of 1942 are inconsistent with this Order, they are hereby suspended.

TITLE III

Administration of Wage and Salary Policy

1. Except as modified by this Order, the National War Labor Board shall continue to perform the powers, functions, and duties conferred upon it by Executive Order No. 9017, and the functions of said Board are hereby extended to cover all industries and all employees. The National War Labor Board shall continue to follow the procedures specified in said Executive Order.

2. The National War Labor Board shall constitute the agency of the Federal Government authorized to carry out the wage policies stated in this Order, or the directives on policy issued by the Director under this Order. The National War Labor Board is further authorized to issue such rules and regulations as may be necessary for the speedy determination of the propriety of any wage increases or decreases in accordance with this Order, and to avail itself of the services and facilities of such State and Federal departments and agencies as, in the discretion of the National War Labor Board may be of assistance to the Board.

3. No provision with respect to wages contained in any labor agreement between employers and employees (including the Shipbuilding Stabilization Agreements as amended on May 16, 1942, and the Wage Stabilization Agreement of the Building Construction Industry arrived at May 22, 1942) which is inconsistent with the policy herein enunciated or hereafter formulated by the Director shall be enforced except with the approval of the National War Labor Board within the provisions of this Order. The National War Labor Board shall permit the Shipbuilding Stabilization Committee and the Wage Adjustment Board for the Building Construction Industry, both of which are provided for in the foregoing agreements, to continue to perform their functions therein set forth, except insofar as any of them is inconsistent with the terms of this Order.

4. In order to effectuate the purposes and provisions of this Order and the Act of October 2, 1942, any wage or salary payment made in contravention thereof shall be disregarded by the Executive Departments and other governmental agencies in determining the costs or expenses of any employer for the purpose of any law or regulation, including the Emergency Price Control Act of 1942 or any maximum price regulation thereof, or for the purpose of calculating deductions under the Revenue Laws of the United States or for the purpose of determining costs or expenses under any contract made by or on behalf of the Government of the United States.

TITLE IV

Prices of Agricultural Commodities

1. The prices of agricultural commodities and of commodities manufactured or processed in whole or substantial part from any agricultural commodity shall be stabilized, so far as practicable, on the basis of levels which existed on September 15, 1942 and in compliance with the Act of October 2, 1942.

2. In establishing, maintaining or adjusting maximum prices for agricultural commodities or for commodities processed or manufactured in whole or in substantial part from any agricultural commodity, appropriate deductions shall be made from parity price or comparable price for payments made under the Soil Conservation and Domestic Allotment Act, as amended, parity payments made under the Agricultural Adjustment Act of 1938, as amended, and governmental subsidies.

3. Subject to the directives on policy of the Director, the price of agricultural commodities shall be established or maintained or adjusted jointly by the Secretary of Agriculture and the Price Administrator; and any disagreement between them shall be resolved by the Director. The price of any commodity manufactured or processed in whole or in substantial part from an agricultural commodity shall be established or maintained or adjusted by the Price Administrator, in the same administrative manner provided for under the Emergency Price Control Act of 1942.

4. The provisions of sections 3(a) and 3(c) of the Emergency Price Control Act of 1942 are hereby suspended to the extent that such provisions are inconsistent with any or all prices established under this Order for agricultural commodities, or commodities manufactured or processed in whole or in substantial part from an agricultural commodity.

TITLE V

Profits and Subsidies

1. The Price Administrator in fixing, reducing, or increasing prices, shall determine price ceilings in such a manner that profits are prevented which in his judgment are unreasonable or exorbitant.

2. The Director may direct any Federal department or agency including, but not limited to, the Department of Agriculture (including the Commodity Credit Corporation and the Surplus Marketing Administration), the Department of Commerce, the Reconstruction Finance Corporation, and other corporations organized pursuant to Section 5d of the Reconstruction Finance Corporation Act, as amended, to use its authority to subsidize and to purchase for resale, if such measures are necessary to insure the maximum necessary production and distribution of any commodity, or to maintain ceiling prices, or to prevent a price rise inconsistent with the purposes of this Order.

TITLE VI

General Provisions

1. Nothing in this Order shall be construed as affecting the present operation of the Fair Labor Standards Act, the National Labor Relations Act, the Walsh-Healey Act, the Davis-Bacon Act, or the adjustment procedure of the Railway Labor Act.

2. Salaries and wages under this Order shall include all forms of direct or indirect remuneration to an employee or officer for work or personal services performed for an employer or corporation, including but not limited to, bonuses, additional compensation, gifts, commissions, fees, and any other remuneration in any form or medium whatsoever (excluding insurance and pension benefits in a reasonable amount as determined by the Director); but for the purpose of determining wages or salaries for any period prior to September 16, 1942, such additional compensation shall be taken into account only in cases where it has been customarily paid by employers to their employees. "Salaries" as used in this Order means remuneration for personal services regularly paid on a weekly, monthly or annual basis.

3. The Director shall, so far as possible, utilize the information, data, and staff services of other Federal departments and agencies which have activities or functions related to national economic policy. All such Federal departments and agencies shall supply available information, data, and services required by the Director in discharging his responsibilities.

4. The Director shall be the agency to receive notice of any increase in the rates or charges of common carriers or other public utilities as provided in the aforesaid Act of October 2, 1942.

5. The Director may perform the functions and duties, and exercise the powers, authority, and discretion conferred upon him by this Order through such officials or agencies, and in such manner, as he may determine. The decision of the Director as to such delegation and the manner of exercise thereof shall be final.

6. The Director, if he deems it necessary, may direct that any policy formulated under this Order shall be enforced by any other department or agency under any other power or authority which may be provided by any of the laws of the United States.

7. The Director, who shall be appointed by the President, shall receive such compensation as the President shall provide, and within the limits of funds which may be made available, may employ necessary personnel and make provision for supplies, facilities and services necessary to discharge his responsibilities.

FRANKLIN D. ROOSEVELT

THE WHITE HOUSE,
October 3, 1942.

BROADCASTING NOT COVERED BY PREMIUM PAY ORDER

The broadcasting industry is not covered by President Roosevelt's Executive Order on "premium pay."

This was made clear October 3 by a statement from Secretary of Labor Frances Perkins, in which she said the order applied only to industries engaged in *manufacture* of war products.

The previous day the NAB had applied for an exemption for the broadcasting industry, following a meeting of the Wage and Hour Committee on the subject.

The principal effect of the Executive Order would have been to require those stations not now so doing to pay time and one half for holiday work.

Sales

TAX EXEMPTION OF ADVERTISING

Paul B. West, President of the Association of National Advertisers, has issued a most helpful statement regarding the recent order dealing with the question of advertising expense as an allowable item of cost on government war contracts (see NAB REPORTS, p. 580, and also p. 515).

The warning sounded by Mr. West regarding the use of this exemption as an argument for advertising is most timely. The release follows:

"The statement of Commissioner of Internal Revenue Helvering as to the deductibility of advertising expense on corporate income tax returns is a welcome amplification of Secretary Morgenthau's statement before the Joint Congressional Committee on Taxation and bears out the clarification of the subject sent out by the Association of National Advertisers with the approval of the Internal Revenue Bureau on August 28," said Mr. West.

"Now, when our nation is at war, there is no room for uncertainties and misunderstandings. Such clear and forthright statements as that of Commissioner Helvering are of inestimable aid to business in allaying fears and permitting sound planning. The statement shows a sympathetic understanding of the problems of business and a desire to be fair and cooperative. In our conferences with Bureau officials, we found their attitude to be wholly one of cooperation and it was most gratifying to have this response to our request after pointing out the need for business to have such clarification.

"Quite naturally, the Bureau is charged with upholding the law and will have no patience with any taxpayer who seeks to avoid proper payment of taxes. This is just and reasonable. Excessive advertising expenditures, as excessive expenditures of any kind, should not be deductible, especially in this war period.

"We have noted a tendency in some quarters on the part of over-zealous advertising salesmen to use the excess profits tax as an argument for the expenditure of increased sums on advertising. I do not believe that such selling reflects the judgment or the wishes of publishers or radio station owners and that this practice is very much the exception. Nevertheless it is to be deplored and discouraged as strongly as possible. To attempt to sell advertising on a false basis implies that the publication or radio station lacks merit. We are hearing from A.N.A. member advertisers about this type of solicitation and they deeply resent it. It is obviously an unsound business practice and has always been regarded so. For salesmen to try to take advantage of the situation for selfish gain not only does harm to all advertising and business but in these times is wholly unpatriotic.

"There is plenty of occasion for business to use advertising in a perfectly legitimate and justifiable way, for advertising as an essential tool has new responsibilities and new uses for serving the ends of business and of the nation in these critical times. It is heartening to hear this fact recognized by the government and it is up to all of us to see that the privilege is not abused."

"HOT FROM HOLLYWOOD"

Several member stations have written regarding the five-minute "Hot from Hollywood" transcriptions being offered by Thomas J. Valentino, Inc., 1600 Broadway, New York, N. Y. In response to an inquiry from the Department of Broadcast Advertising, Mr. Valentino reports:

"The transcriptions entitled 'Hot from Hollywood' are designed to maintain a public interest in news of Hollywood personalities. These transcriptions are being prepared on behalf of various members of the motion picture industry and consist of a good-will gesture in which is included a dramatization of scenes from forthcoming motion pictures. No advertising of any kind is included in these programs and the only mention of the title of the picture is to identify the scene which is dramatized. The distributor of the picture is in nowise mentioned."

Under the circumstances, the Department strongly advises against the use of these five-minute transcriptions on a sustaining basis. However, Mr. Valentino adds in his letter that: "These entertainment programs . . . may be broadcast by the station for local sponsors without any payment to us".

Since one of the member stations has reported that these transcriptions are definitely entertaining and of good quality, the availability of this series may offer you an opportunity to interest a local threatre or group of theatres in the use of your facilities. Similar programs have been successfully sold by other stations to women's ready-to-wear, shoe, department and similar stores.

PER-INQUIRY AND FREE TIME REQUESTS

Vanderbie and Rubens, Inc., 410 N. Michigan Ave., Chicago, Ill., is seeking per-inquiry deals in an effort to sell the Le Roy piano lessons. Many stations are carrying this account on a straight rate-card basis, so the business can be obtained that way.

Several members stations have reported letters from the "Doughboy Commemorative Committee" to observe the 25th anniversary of the serving of the first donut in World War I. Although the president of the committee insists that the activity is sponsored by a group of patriotically inclined war veterans, he admits that the sponsors of the "National Donut Week"—which oddly coincides with the commemorative activity—are co-operating. To NAB, it looks like a good opportunity to sell a local bakery on some broadcasting advertising.

WPB RATING ORDER P-133 ASSIGNS BROADCASTERS A-1-J

Assignment of preference ratings to facilitate the acquisition of equipment and supplies for the maintenance and repair of radio broadcast and commercial sound-recording facilities is provided in Preference Rating Order P-133, issued October 5 by the War Production Board.

The order may not be used for any expansion, improvement or change of design of equipment. It covers only materials needed for maintenance and repair and assigns the preference rating A-1-j to all operators of radio and communication facilities, including broadcasting, police, direction-finding and aviation facilities, as well as all commercial sound-recording studios. The rating, however, is assigned only after the operator has complied with nine conditions stipulated in section (e) of the order.

Plans are also under way to allocate materials and manufacturing facilities to make available vacuum tubes and other parts on the A-1-j preference rating. This should eliminate the necessity in most instances in filing PD-1-A applications.

Preference ratings for maintenance and repair of radio communication equipment formerly were assigned by P-129, which expired September 30. The new order replaces this one, and extends the field somewhat, since P-129 was primarily designed to cover maintenance of telephone equipment.

The order reads as follows:

PART 3037—ELECTRONIC EQUIPMENT

[Preference Rating Order P-133]

Section 3037.5 *Preference Rating Order P-133*—(a) *Definitions.* For the purpose of this order:

(1) "Operator" means any individual, partnership, association, business trust, corporation, receiver or any form of enterprise whatsoever, whether incorporated or not, the United States, and the several states thereof, and any political, corporate, administrative or other division of agency thereof, to the extent engaged in any activity listed in Schedule A, hereof.

(2) "Material" means any commodity, equipment, accessory, assembly, or product of any kind.

(3) "Maintenance" means the upkeep of an operator's buildings, structures and equipment in sound working condition; and this, without regard to whether the expenditures therefor are for any reason required to be recorded in the operator's accounting records in accounts other than maintenance and repair.

(4) "Repair" means the reconstruction or restoration without expansion, improvement or change of design of any portion of an operator's buildings, structures and equipment when such portion has been rendered unsafe or unfit for service by wear and tear or other similar causes, but not including reconstruction or restoration of any portion damaged or destroyed by fire, flood, tornado, earthquake, act of God or the public enemy; and this, without regard to whether the expenditures therefor are for any reason required to be recorded in the operator's accounting records in accounts other than maintenance and repair.

(5) "Operating supplies" means any material which is essential to and consumed directly in the operation of any of the services specified in (a) (1) above but does not include recording discs, film, other recording media, fuel, office or building supplies, or equipment of any kind.

(b) *Assignment of preference rating.* Subject to the terms of this order, preference rating of A-1-j is hereby assigned:

(1) To deliveries of material to an operator for operating supplies and for maintenance and repair.

(2) To deliveries to any supplier of material to be physically incorporated in other material required by an operator for operating supplies, maintenance or repair.

(c) *Persons entitled to apply preference rating.* The preference rating hereby assigned shall be applied where a preference rating is required to obtain material for maintenance, repair and operating supplies by:

(1) Any operator engaged in an activity in Schedule A hereof and may be applied by

(2) Any supplier, provided deliveries to an operator or another supplier are to be made by him, which are of the kind specified in paragraph (b) and have been rated pursuant to this order.

(d) *Applicability of priorities regulations.* This order and all transactions affected thereby are subject to all applicable provisions of the priorities regulations of the War Production Board, as amended from time to time.

(e) *Restrictions on inventory and use.* The preference rating hereby assigned may be applied by any operator, provided:

(1) Such rating is not used to replace in inventory more than one spare tube for each active tube socket.

(2) Such rating is not used to replace in inventory any spare parts except:

(i) Those subject to frequent failure, deterioration or other exhaustion.

(ii) Those which are so unique that failure would inevitably result in long delay in resumption of essential operations.

(3) Such rating is not used in any case to increase the value of an operator's inventory of repair parts, other than tubes, above the value of such inventory on the date of this order.

(4) Such rating is not used to replace in inventory a new part if the defective part can be repaired with a smaller consumption of raw material.

(5) The tube which has been replaced from operator's inventory or for which replacement is required has been operated to failure.

(6) The operator has returned to the manufacturer any power tube rated at 25 watts or more which has failed, unless such tube is to be reparied.

(7) Equipment which has failed has been operated within the ratings specified by the manufacturer.

(8) Such rating is not used to build up inventory of operating supplies other than tubes, in excess of requirements for a three-month period.

(9) Such operator was actively engaged in one of the activities listed on Schedule A hereof, on the date of issuance of the order, or has received specific authorization for his installation from the Director General for Operations of the War Production Board.

(f) *Application and extension of rating.* An operator or supplier, in order to apply the preference rating assigned by this Order, shall endorse the following statement on the purchase order or contract for such material signed manually or as provided in Priorities Regulation No. 7 (§ 944.27) by an official duly authorized for such purposes.

CERTIFICATION

The undersigned purchaser hereby represents to the seller and to the War Production Board that he is entitled to apply or extend the preference ratings indicated opposite the items shown on this purchase order, and that such application or extension is in accordance with Priorities Regulation No. 3, as amended, with the terms of which the undersigned is familiar.

....	....
Name of Purchaser	Address
By..	....
(Signature and title of duly authorized officer)	Date

(g) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using material under priority control and may be deprived of priorities assistance.

(P.D. Reg. 1, as amended, 6 F.R. 6680; W.P.B. Reg. 1, 7 F.R. 561; E.O. 9024, 7 F.R. 329; E.O. 9040, 7 F.R. 527; E.O. 9125, 7 F.R. 2719; sec. 2 (a), Pub. Law 671, 76th Cong., as amended by Pub. Laws 89 and 507, 77th Cong.)

Issued this 5th day of October 1942.

ERNEST KANZLER,
Director General for Operations.

SCHEDULE A

1. Radio communication, including broadcasting.
2. Sound recording for commercial purposes.
3. Radio direction finding.

WPB CURTAILS BATTERY PRODUCTION

An overall control over production of dry cell batteries and flashlights for cilivian use was ordered today by the War Production Board.

Cuts in civilian production of both batteries and flashlights in the hands of manufacturers were put under priority control.

At the same time, the order (L-71, as amended) permits smaller plants which do not have large military orders to operate at a considerably greater rate of civilian production than larger plants. The latter are for the most part operating at capacity on orders for the armed forces.

It is expected that this action will assure continued operation of the smaller plants in the industry in spite of the production cuts which have been ordered. Further steps may be taken toward this end after an opportunity to consider the effects of the present order.

Curtailment of civilian production, put on a quarterly basis, will have these results:

Only 35 per cent of the number of radio batteries produced in 1941 will be manufactured. These will be primarily for radios used on farms. Batteries for the portable type of radio are entirely eliminated as being non-essential, since most of these sets can operate on A.C. household current.

Production of flashlight batteries will be cut one-half, compared to 1941 output.

Other types of dry cell batteries will be reduced 10 per cent, although the order provides that batteries for hearing aids and railroad lanterns will be produced in greater quantity during the quarter ending December 31, 1942.

No direct restriction is placed on sales of lights in the hands of dealers and wholesalers, but the only way they can replenish their stocks is by certification that their sales have been only for A-10 or higher orders. Therefore, unless dealers and wholesalers restrict their sales to A-10 or better order, they will be unable to replace their inventories.

Use of raw materials is further restricted by the order, which originally (March 27) imposed strict control over the use of critical materials in flashlights and batteries. The amended order allows use of copper and copper base alloy for electrical connections up until October 31, if the materials had been in inventory before October 2. After October 31, no copper except in wire and brass plating will be permitted.

As a result of the production cuts and raw material restrictions, approximately 8,000 tons of zinc will be saved, about 1,000 tons of copper, and several hundred tons of steel compared to 1940 consumption. In addition, badly needed production facilities for military purposes will be made available.

RADIO BATTERIES: Class A Manufacturers will be allowed 30 per cent of their 1940 monthly production. These manufacturers include the following: General Dry Batteries, Inc., of Cleveland, Ohio; National Carbon Company, Inc., of New York, N. Y., and Ray-O-Vac Company of Madison, Wisconsin.

Class B Companies, including all other manufacturers of radio batteries in the field, will be allowed to produce batteries equal to their 1940 production.

The guiding principle behind this determination of production of batteries and portable lights was to provide for an equitable distribution of permitted production among all manufacturers. The result is expected to be that a minimum of dislocation in the battery industry will be felt because of the essential curtailment of output.

It seems obvious that radio "B" batteries commonly used in remote control amplifiers and field equipment are going to become increasingly difficult to obtain. There is also a patriotic duty to limit the use of these batteries to equipment which cannot be powered from either 6 volt storage batteries or commercial electric power supplies. Station engineers should carefully consider the advisability of providing A.C. rectifiers or 6 volt vibrator type power supplies to remote control equipment now operated from dry batteries. Such conversions will not only conserve the critical materials used in the manufacture of dry batteries but in most cases will reduce the maintenance expense on the equipment as well as insuring continued operation during the emergency.

SUPPLEMENTARY GAS RATIONS

Applicants for additional rations of gasoline are urged to arm themselves with the necessary facts about their driving requirements before asking their Local Rationing Boards for supplemental cards.

Not only must the applicant sign his statement of fact, but, if he is an employee and the supplemental ration is needed to carry on his work he must also present the affidavit or affirmation of his employer, or an authorized representative of his employer.

Under the gasoline rationing regulations, the board is authorized to grant supplemental rations only if it finds that they are "essential to life or to the pursuit of a gainful occupation and that no reasonably adequate alternative means of transportation are available." The board in granting a supplemental ration will issue an A card or whatever B card or combination of cards, are necessary to provide for the amount of the ration.

The applicant must state why his present ration is insufficient. He must support this reason with facts. Next, the applicant must state what means of public transportation are available to him.

Other questions ask the applicant to state what vehicles owned by members of his family, or by friends or business associates are available to his use, and to specify what effort has been made to "double-up" with other car owners.

Generally speaking, workers in the broadcasting industry should experinece no difficulty in getting B cards entitling them to gasoline for occupational driving based on their requirements up to 470 gallons a month. Under Section 1394.506 (k) (2) of the Gasoline Rationing Regulations, workers in the radio broadcasting industry including executives, technicians or office workers but not including salesmen are eligible to apply for preferred mileage (C cards).

TIRE RATIONING

Under Amendment 33, effective October 8, to the Revised Tire Rationing Regulations, "communications facilities" is included under List A entitling workers requiring transportation to or from communication facilities, which includes radio broadcasting, to apply for certificates to purchase new automobile tires except when public transportation facilities are readily available. Heretofore workers in the radio broadcasting industry were entitled only to recaps under List B.

MONOPOLY CASE ARGUED

Argument was had Thursday in New York on the pending motions in the cases of CBS and NBC against the FCC. The Commission's motion for summary judgment and the networks' motions for temporary injunctions were heard by the statutory three-judge court composed of Judges Learned Hand (C. J.), Goddard and Bright. No decision had been handed down when this issue went to press.

June 1 the Supreme Court ruled that the Commission's network regulations should be subjected to judicial review before they were put into effect. The Commission had contended that the network regulations amounted to nothing more than a statement of policy, and that broadcasters had no right to contest these rules in court until they were actually hurt by them,—that same network affiliate would have to put his license in jeopardy before the rules could be tested. But the Supreme Court said, no. The Commission is now seeking summary judgment in its favor, and the networks temporary injunctions pending decision on the merits of the case.

"FOUR FREEDOMS"

A copy suitable for framing of "Our Freedoms and Rights", prepared by the National Resources Planning Board, is being sent to all radio stations. This emphasizes the freedoms for which we are fighting; namely, freedom of speech and expression, freedom of worship, freedom from want and freedom from fear, and was transmitted to Congress by the President on January 14, 1942.

Rev. W. A. Burke, S.J.

Father Burke, former faculty director of Station WWL, New Orleans, and Station WEW, St. Louis, died September 18 in New Orleans after a long illness. He was 61. For many years Father Burke was interested and active in NAB affairs. He will be missed.

FEDERAL COMMUNICATIONS COMMISSION

TUBE SURVEY

FCC Chairman James Lawrence Fly said at his press conference early this week that it has not been decided if the results of the recent tube survey will be made public. If the results are given out he stated it will be in the near future.

DENNY, NEW FCC GENERAL COUNSEL

FCC today announced the appointment of Charles R. Denny, Jr., as General Counsel to succeed Telford Taylor who has been commissioned as a Major in the Army. Mr. Denny has been with the Commission since February of this year when he came over from the Department of Justice where he was chief of the Appellate Section of the Lands Division.

Mr. Denny was born in Baltimore, Md., on April 11, 1912. He has resided in Washington for several years and attended the public schools there. He was graduated from Amherst College in 1933 and from Harvard Law School in 1936. From 1936 to 1938 he was associated with the Washington law firm of Covington, Burling, Rublee, Acheson & Shorb. From 1938 to February 1942 he was in the Lands Division of the Department of Justice.

FORCE TO OWI

Arthur Force of NBC has been named editor of the radio news section, News Bureau, Office of War Information.

Mr. Force comes to OWI with fifteen years newspaper and radio news experience. He was night news editor of the National Broadcasting Company in New York City and previously worked on newspapers in New York, Newark, Detroit and Toledo.

The OWI radio news section will become the liaison agency for radio news press associations, newscasters and news commentators.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, October 12. They are subject to change.

Monday, October 12

WINK—Mid-American Broadcasting Corporation, Louisville, Ky. —Modification of C. P., **1080 kc.,** 1 KW night, 5 KW day, DA-day and night, unlimited.

Tuesday, October 13

W55NY—William G. H. Finch, New York, N. Y.—Modification of C. P., **45500 kc.,** 8,500 sq. mi., unlimited.

Wednesday, October 14

KFSD—Airfan Radio Corporation, Ltd., San Diego, Calif.—Modification of C. P., under C. P., **600 kc.,** 5 KW, unlimited.

Thursday, October 15

NEW—Larus and Brother Company, Inc., Richmond, Va.—C. P., **1646, 2090, 2190, 2830 kc.,** 40 watts, EM-A3, Sec. 4.24.

NEW—Larus and Brother Company, Inc., Richmond, Va. Transmitter location: 12 mi. SE of Richmond, Va., on James River.—C. P., **1646, 2090, 2190, 2830 kc.,** 35 watts, EM-A3, unlimited.

Friday, October 16

K51L—St. Louis University, St. Louis, Mo.—Modification of C. P., **45100 kc.,** 13,000 sq. mi., unlimited.

WJLS—Joe L. Smith, Jr., Beckley, W. Va.—C. P., **560 kc.,** 100 watts night, 250 watts day, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KAND—Navarro Broadcasting Assn., N. C. West, Pres., Corsicana, Texas.—Granted modification of license to use as main studio the present auxiliary studio at ½ mile north of Corsicana on Highway 75. (B3-ML-1140.)

WSAI—The Crosley Corp., Cincinnati, Ohio.—Granted license to cover construction permit as modified, for installation of directional antenna for night use, increase in power, and move of transmitter (B2-L-1559); granted authority to determine operating power by direct measurement of antenna power (B2-Z-1295); granted license to cover construction permit as modified, for 100 watt synchronous amplifier for daytime use (B2-L-1442); granted authority to determine operating power by direct measurement of antenna power (B2-Z-1442).

KWKW—Southern California Broadcasting Co., Pasadena, Calif.—Granted license to cover construction permit as modified, for new broadcast station (B5-L-1711); granted authority to determine operating power by direct measurement of antenna power (B5-Z-1443).

KWOS—Tribune Printing Co., Jefferson City, Mo.—Granted authority to make changes in automatic frequency control equipment (B4-F-250).

WWNY—The Brockway Company, Watertown, N. Y.—Granted modification of construction permit as modified, for installation of directional antenna for night use, change of frequency, increase power, change hours of operation and move transmitter, for extension of completion date from October 16 to December 16, 1942 (B1-MP-1642).

KXO—Valradio, Inc., El Centro, Calif.—Granted motion for continuance of hearing set for October 1, 1942, on application for modification of license to change frequency from **1490 to 1230 kc.,** and continued said hearing until November 2, 1942. (Docket No. 6365.)

WIUC—University of Illinois, Urbana, Ill.—Granted license to cover construction permit as modified, for new non-commercial educational broadcast station (B4-LED-7).

KEJM—Perkins Brothers Company (The KEJM Sioux City Journal), Portable Mobile, Area of Sioux City, Iowa.—Granted modification of relay broadcast station license to change name of licensee from Perkins Brothers Company (The Sioux City Journal) to Perkins Brothers Company (B4-MLRE-109).

W6XDU—Don Lee Broadcasting System, Portable Mobile, Area of Los Angeles, Calif.—Granted modification of construction permit which authorized the addition of aural equipment using special emission, for extension of completion date from September 1 to December 1, 1942 (B5-MPVB-86).

WINS—Hearst Radio, Inc., New York City.—Granted modification (B1-MP-1649) of construction permit (B1-P-3026) for extension of completion date to November 3, 1944. Also granted construction permit (B1-P-3511) to increase power from 1 to 5 KW, change hours of operation to unlimited time and install a new transmitter and directional antenna for day and night use and move transmitter; and granted construction permit (B1-P-3512) to increase power to 10 KW, change hours of operation to unlimited time and install a new transmitter and directional antenna for day and night use, and move transmitter. (Applications B1-P-3511 and B1-P-3512) request the use of directional antenna authorized under (B1-MP-1259). The station has agreed to surrender its 50 KW transmitter to the government for urgent war needs.

WKZO—WKZO, Inc., Kalamazoo, Mich.—Granted license (B2-L-1715) to cover construction permit (B2-P-3281) for increase in power to 5 KW, changes in directional antenna for night use and authority (B2-Z-1449) to determine operating power by direct measurement of antenna power.

KVOO—Southwestern Sales Corp., Tulsa, Okla.—Granted modification (B3-MP-1601) of construction permit (B3-P-2539) for changes in directional antenna and 60 day extension of commencement and completion dates. This grant is made contingent upon the installation of an antenna system when conditions make it feasible, which will provide proper protection to WWVA and will also produce the required effective field set forth in the Standards.

WWVA—West Virginia Broadcasting Corp., Wheeling, W. Va.—Granted modification (B2-MP-1641) of construction permit (B2-P-2540) as modified for changes in directional antenna for night-time use, contingent upon WWVA taking whatever measures are necessary to afford complete protection to KVOO when materials and engineers again become readily available.

DESIGNATED FOR HEARING

KWFT—Wichita Broadcasting Co., Wichita Falls, Texas.—Designated for hearing modification of license application (B3-ML-1057) to increase night power from 1 to 5 KW, make changes in directional antenna and use directional antenna at night only.

WCSH—Congress Square Hotel Co., Portland, Maine.—Designated for hearing application (B1-P-3490) to install a new transmitter.

WISH—Capitol Broadcasting Corp., Indianapolis, Ind.—Designated for hearing application (B4-P-3496) to increase nighttime power from 1 to 5 KW, and make changes in directional antenna for night use.

Olympic Broadcasting Corp., Bremerton, Wash.—Designated for hearing application (B5-P-3367) for new station to operate on **1540 kc.,** 500 watts, unlimited time.

WBRB—Monmouth Broadcasting Co., Red Bank, N. J.—Designated for hearing application (B1-P-3337) for construction permit to make changes in antenna system and to move main studio and transmitter site; also (B1-R-185) for renewal of license. On February 16, 1941, this station was destroyed by fire and has remained off the air since that date. Since October 1, 1941, temporary extensions of license have been granted from month to month.

LICENSE RENEWALS

Granted renewal of following relay broadcast station licenses for the period October 1, 1942, to not later than October 1, 1944:

KABF, McClatchy Broadcasting Co.; KBQA, Winona Radio Service; KDAC, KARM, The George Harm Station; KIEO, Airfan Radio Corp., Ltd.; KNEB, KNEC, Puget Sound Broadcasting Co., Inc.; KSCR, McClatchy Broadcasting Co.; KWFR, Wichita Broadcasting Co.; WADA, Charleston Broadcasting Co.; WAHJ, The Champaign News-Gazette, Inc.; WAIX, WJHL, Inc.; WALH, Piedmont Publishing Co.; WASJ, City of New York, Municipal Broadcasting System; WATB, Indianapolis Broadcasting, Inc., WAUC, Matheson Radio Co., Inc.; WAXD, The Birmingham News Co.; WAXH, Savannah Broadcasting Co.; WAXL, Jonas Weiland; WBGN, The Champaign News-Gazette, Inc.; WBLR, Columbus Broadcasting Co., Inc.; WCBJ, Lehigh Valley Broadcasting Co.; WDAC, State of Wisconsin, University of Wisconsin; WHPT, Radio Station WMFR, Inc.; WJAE, WJNO, Inc.; WJJW, Greenville Broadcasting Co.; WJWA, Birney Imes; WNYK, WNYL, WNYN, WNYO, City of New York, Municipal Broadcasting System; WQER, Georgia School of Technology; WSMA, WSMC, WSMB, Inc.

Granted renewal of following relay broadcast station license for the period October 1, 1942, to not later than July 21, 1944:

WAOB, National Broadcasting Co., Inc.

Granted extension of following relay broadcast licenses, upon a temporary basis only, pending receipt and/or determination upon applications for renewal of licenses, in no event later than November 1, 1942:

KAAN, Southern Minnesota Broadcasting Co.; KBTB, Red River Broadcasting Co., Inc.; KGBK, Helen Townsley; KGKF, KGKL, Inc.; WAEA, W. A. Patterson; WAFK, A. Frank Katzentine; WENM, The Evening News Association.

The following stations were granted renewal of licenses for the period ending February 1, 1943:

KFJB, Marshalltown, Ia.; KFXD, Nampa, Idaho; KHAS, Hastings, Neb.; KVNU, Logan, Utah; WAJR, Morgantown, W. Va.; WBOC, Salisbury, Md.; WCAT, Rapid City, S. Dak.; WDSM, Superior, Wisc.; WHBY, Appleton, Wisc.; WHOP, Hopkinsville, Ky.; WISE, Asheville, N. Car.; WJOB, Hammond, Ind.; WOLS, Florence, S. Car.; WRBL, Columbus, Ga.; WTOL, Toledo, Ohio.

The following stations were granted renewals for the period ending April 1, 1943:

KAVE, Carlsbad, N. Mex.; KVSO, Ardmore, Okla.; WCOU, Lewiston, Maine; WFTM, Fort Myers, Fla.; WINN, Louisville, Ky.; WJLS, Beckley, W. Va.; WGAC, Augusta, Ga.; WJW, Akron, Ohio; WOMT, Manitowoc, Wisc.; WPID, Petersburg, Va.; WSAY, Rochester, N. Y.

The following stations were granted renewals for the period ending June 1, 1943:

KPDN, Pampa, Texas; KROC, Rochester, Minn.; KSUB, Cedar City, Utah; KVIC, Victoria, Texas; KVOL, Lafayette, La.; KWOC, Poplar Bluff, Mo.; WAML, Laurel, Miss.; WCLS, Joliet, Ill.; WCMI, Ashland, Ky.; WDAK, West Point, Ga.; WGAA, Cedartown, Ga.; WGAU, Athens, Ga.; WINX and amplifier, Washington, D. C.; WLNH, Laconia, N. H.; WMFF, Plattsburg, N. Y.; WSAJ, Grove City, Pa.

The following stations were granted renewals for the period ending October 1, 1944:

KFGO, Boone, Ia.; KFOX, Long Beach, Calif.; KLS, Oakland, Calif.; KOL, Seattle; KVOA, Tucson, Ariz.; WKST, New Castle, Pa.

WSAR—Doughty & Welch Electric Co., Inc., Fall River, Mass.—Granted renewal of license for the period ending December 1, 1944.

MISCELLANEOUS

WAWU—The Baltimore Radio Show, Inc., Area of Baltimore, Md.—Cancelled relay broadcast station license in accordance with written request (B1-RRE-358).

KGGM—New Mexico Broadcasting Co., Albuquerque, N. Mexico; KVSF—Santa Fe, N. Mexico.—Dismissed without prejudice applications for construction permits (Docket No. 6142 and Docket 6143), since applicant has failed to file petitions indicating desire to prosecute applications in conformity with Memo. Opinion of April 27, 1942.

KFDM—Beaumont Broadcasting Corp., Beaumont, Texas.—Dismissed without prejudice application (B3-P-3153) for construction permit to operate with 5 KW, unlimited time, and install a new transmitter.

Hughes Productions, Division of Hughes Tool Co., Los Angeles, Calif. and San Mateo County, Calif.—Petition for 6-months' continuance of hearing granted for period of 60 days; hearing granted for period of 60 days; hearing now set for Oct. 7 continued to December 7, in re applications for new television stations.

WINK—Mid-American Broadcasting Corp., Louisville, Ky.—Granted motion for continuance of hearing now set for October 12 to November 13 on application for modification of construction permit (B2-MP-1589).

W55NY—William G. H. Finch, New York City.—Motion for 6-months' continuance of hearing now set for Oct. 13, granted for 60 days, and continued hearing to December 14 in re application for modification of construction permit (B1-MPH-104).

Northeastern Penna. Broadcasters, Inc., Wilkes-Barre, Pa.—Reserved decision until next week on petition for specification of issue in re further hearing on application for a new station in Wilkes-Barre.

Hennessy Broadcasting Co., Butte, Mont.; Marclay Craighead, Butte, Mont.—Granted petition to dismiss without prejudice applications for new station (B5-P-3158 and B5-P-3103).

WOKO—WOKO, Inc., Albany, N. Y.—Granted petition to dismiss without prejudice application for construction permit (B1-P-3238).

APPLICATIONS FILED AT FCC

580 Kilocycles

KMJ—McClatchy Broadcasting Co., Fresno, Calif.—License to cover construction permit (B5-P-3428) for move of transmitter.

KMJ—McClatchy Broadcasting Co., Fresno, Calif.—Authority to determine operating power by direct measurement of antenna power.

600 Kilocycles

WCAO—The Monumental Radio Co., Baltimore, Md.—License to cover construction permit (B1-P-3024 as modified), which authorized increase in power, installation of new transmitter, directional antenna for day and night use and move of transmitter.

WCAO—The Monumental Radio Co., Baltimore, Md.—Authority to determine operating power by direct measurement of antenna power.

WSIS—Piedmont Publishing Co., Winston-Salem, N. C.—Modification of construction permit (B3-P-2814 as modified), which authorized change in frequency, increase power, new transmitter, move transmitter and directional antenna, for extension of completion date from 10-22-42 to 12-22-42.

710 Kilocycles

WFTL—Ralph A. Horton, Fort Lauderdale, Fla.—Modification of construction permit (B3-P-3355 as modified), which authorized change in frequency, increase in power, installation of new transmitter, directional antenna for night use and move of transmitter, for extension of completion date from 11-5-42 to 1-5-43.

910 Kilocycles

WRNL—Richmond Radio Corp., Richmond, Va.—License to cover construction permit (B2-P-3505) for changes in directional antenna system for night use.

WRNL—Richmond Radio Corp., Richmond, Va.—Authority to determine operating power by direct measurement of antenna power.

WRNL—Richmond Radio Corp., Richmond, Va.—License to use the directional antenna system as authorized under construction permit (B2-P-3505) with auxiliary transmitter.

WRNL—Richmond Radio Corp., Richmond, Va.—Authority to determine operating power of auxiliary transmitter by direct measurement of antenna power.

940 Kilocycles

WMAZ—Southeastern Broadcasting Co., Inc., Macon, Ga.—Modification of construction permit (B3-P-3043 as modified), which authorized change in frequency, increase in power, directional antenna for day and night use and move of transmitter for extension of completion date from 10-6-42 to 11-6-42.

1000 Kilocycles

WINS—Hearst Radio, Inc., New York, N. Y.—Construction permit to increase power from 1 KW to 5 KW, change hours of operation from limited time to unlimited time, install new transmitter, directional antenna for day and night use and change location of transmitter from Paterson Plank Road, Carlstadt, N. J., to near Kingsland, N. J.

WINS—Hearst Radio, Inc., New York, N. Y.—Construction permit to increase power from 1 KW to 10 KW, change hours of operation from limited time to unlimited time, install new transmitter, directional antenna for day and night use, and change location of transmitter from Paterson Plank Road, Carlstadt, N. J., to near Kingsland, N. J.

WINS—Hearst Radio, Inc., New York, N. Y.—Modification of construction permit (B1-P-3026 as modified), which authorized increase in power from 1 KW to 50 KW, change hours of operation, installation of new transmitter, directional antenna for day and night use, and move of transmitter for extension of completion date from 11-3-42 to 11-3-44.

1110 Kilocycles

WMBI—The Moody Bible Institute of Chicago, Ill.—Authority to determine operating power by direct measurement of antenna power.

1140 Kilocycles

KGDM—E. F. Peffer, Stockton, Calif.—Modification of construction permit (B5-P-3199 as modified), which authorized change in frequency and hours of operation, increase power and installation of new transmitter and directional antenna for night use, for extension of completion date from 10-20-42 to 12-20-42.

1170 Kilocycles

KVOO—Southwestern Sales Corp., Tulsa, Okla.—Extension of special service authorization to operate unlimited time, using 25 KW night and 50 KW daytime, directional antenna night and using transmitter authorized by construction permit for the period ending 4-1-44.

1250 Kilocycles

WTMA—Atlantic Coast Broadcasting Co., Charleston, S. Car.—Construction permit to move present licensed RCA transmitter to location of main transmitter as authorized by construction permit and use same as an auxiliary with power of 250 watts.

1290 Kilocycles

KHSL—Golden Empire Broadcasting Co., Chico, Calif.—Modification of construction permit (B5-P-3100 as modified), which authorized increase in night power and directional antenna for day and night use for extension of completion date from 10-16-42 to 11-16-42.

WHIO—Miami Valley Broadcasting Corp., Dayton, Ohio.—Construction permit to install new sampling loops.

1440 Kilocycles

WSFA—Montgomery Broadcasting Co., Inc., Montgomery, Ala.—Authority to make changes in automatic frequency control equipment.

1490 Kilocycles

WSAP—Portsmouth Radio Corp., Portsmouth, Va.—Modification of construction permit (B2-P-3097) which authorized construction of new standard broadcast station for approval of studio site, change in transmitter location and antenna changes.

FM APPLICATIONS

W63NY—Marcus Loew Booking Agency, New York, N. Y.—License to cover construction permit (B1-PH-3 as modified) which authorized construction of new high frequency broadcast station, in part in accordance with Commission action of 8-4-42.

W69PH—WCAU Broadcasting Co., Philadelphia, Pa.—License to cover construction permit (B2-PH-127) which authorized construction of new high frequency broadcast station.

TELEVISION APPLICATIONS

W8XCT—The Crosley Corp., Cincinnati, Ohio.—Modification of construction permit (B2-PVB-23 as modified) which authorized construction of new television broadcast station for extension of completion date from 10-28-42 to 4-28-43.

MISCELLANEOUS APPLICATIONS

WEGR—Westinghouse Radio Stations, Inc., area of Philadelphia, Pa.—License to cover construction permit (B2-PRE-423) which authorized construction of new relay broadcast station.

WJZM—Roland Hughes, Clarksville, Tenn.—Voluntary assignment of license to William Kleeman.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Harlem Company, 30 Church St., New York, is charged in a complaint with misrepresentation. (4843)

Happy Hostess Candy Company, Inc., and Harry Rachlin, as its president, 615 South Peoria St., Chicago, are charged in a complaint issued with use of lottery methods in the sale and distribution of their products. (4842)

Hecht Company, also trading as Hecht Bros., Baltimore, operating department stores in Baltimore, Washington and New York, is charged in a complaint with misrepresentation in the sale of mattresses. (4840)

Innerclean Manufacturing Co., 846 East Sixth St., Los Angeles, and Wilbur C. Jeffries, engaged in the advertising business as W. C. Jeffries Co., 165 North LaBrea Ave., Los Angeles, are charged in a complaint with misrepresentation in the sale of a medicinal preparation (4839)

Leonard Custom Tailors Co., also trading as Leonard Custom Tailors Co., Leonard Custom Tailors and as Avon Park Clothes, Textile Building, Cincinnati, Ohio, manufacturers and distributors of men's clothing, is charged in a complaint with misrepresentation. (4845)

Richman Brothers Co., 1600 East 55th St., Cleveland, Ohio, manufacturers and distributors of men's clothing, which operate approximately 62 retail stores in 47 states throughout the country, is charged in a complaint with misrepresentation. (4844)

Van Camp Sea Food Co., Inc., Terminal Island, Calif., packer and distributor of canned fish, including tuna, is charged in a complaint with violation of the Robinson-Patman Act by making unlawful discriminations in price and in services in connection with the sale of its products. (4841)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Memorial Granite Company, Inc., Quincy, Mass., manufacturer and distributor of tombstones and monuments, has been ordered to cease and desist from misrepresentation. (4214)

Sherman Hat Company, 159 North Wabash Ave., Chicago, and Ben D. Fogel and Louis Singer, trading as B. & L. Hat Co., 612 West Lake St., Chicago, have been ordered to cease and desist from misrepresentation in the sale of hats. In each case, the Commission finds that the respondents were engaged in the business of manufacturing women's hats from felt and other materials obtained from old, worn and previously used hats and selling their products to retailers and other dealers without disclosing by markings or labels that the hats were made from old and previously used hat bodies, such practice constituting a representation that the hats were new hats manufactured entirely from new materials. (4628-4679)

R. L. Watkins Company, 170 Varick St., New York, with its principal factory at Newark, N. J., manufacturer and distributor of various cosmetics and proprietary products, including a dentifrice known as "Dr. Lyon's Tooth Powder," has been ordered to cease and desist from misrepresentation of its dentifrice product. (3596)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Alert Safety Products Corp., 879 Broadway, Newark, N. J., engaged in the sale and distribution of a product designated "Sure-Out," purportedly for use in extinguishing magnesium incendiary bombs, has stipulated to cease and desist from representing that the product has been proven to be effective in extinguishing, or will extinguish magnesium fire bombs in homes or elsewhere when in contact with combustible material; representing by the use of any statement such as "Tested By United States Governmental Agencies" or by depictions, or in any other manner, that the product has been approved, endorsed or recommended by any department or agency of the United States Government, or using statements to the effect that no dangerous gases or after odors result from use of the product. (3537)

Armor Insulating Company, 800 Forrest St., Atlanta, Ga., also trading as Defense Blackout Company, engaged in the sale and distribution of blackout material and equipment, has stipulated to cease and desist from use of the trade name "Defense Blackout Company" and from the use of the word "Defense" in any manner, the effect of which causes the belief that the corporation or its selling agency is an agency of the United States Government; and representing by use of statements, such as "Meet all the requirements of the Army, Navy and Civilian Defense," or in any other manner, that its products have been approved, endorsed or recommended by the War Department, the Navy Department, the Office of Civilian Defense, or any other department or agency of the United States Government. (3539)

Howard Wig Company, 143 West 125th St., New York, engaged in the sale and distribution of hair goods, cosmetic preparations and related products, has stipulated to cease and desist from representing that healing will be accomplished by use of Nadine Flesh Soap; that Nadinola Bleaching Cream will clear away freckles or muddy sallow skin or is capable of whitening the skin; that High-Brown Cold Cream is a skin food; that Overtons High-Brown Bleach Ointment is an effective treatment for pimples, blackheads, eczema or other skin diseases; that Aida Hair Pomade encourages the growth of hair or is a competent treatment for dandruff; that High-Brown Hair Grower will grow hair or is a competent treatment for dandruff; that Apex Hair Preparation is an effective treatment for dandruff or for thin or falling hair; or that Apex Pomade is an effective treatment for short, thin or falling hair or thin temples, or that it constitutes an adequate treatment for scalp eruptions generally. (3536)

National Automotive Fibres, Cohoes, N. Y., engaged in the manufacture and sale of milk filter discs used in the dairy industry in the straining of milk to remove particles of foreign matter, has stipulated to cease and desist from use of the word "non-cotton" as descriptive of its discs or in any way so as to imply that the fabric of which the discs are composed contains no cotton. (3538)

B. G. Pratt Co., 50 Church St., New York, selling a medicinal preparation designated "Sulfo-Bath," has stipulated to cease and desist from representing that the product is effective for the relief of nervousness, colds, insomnia, pimples, eczema, hives or poison ivy; that it has any effect on rheumatism, neuritis, sciatica, arthritis or lumbago except to the extent that it may relieve the pains of such conditions; that it is "health-giving" or provides or causes radiant health; that it will give one energy; that by use of the product sulphur will be absorbed into the system or that it will give one a healthy or beautiful complexion; that the product relieves or aids in relieving the conditions which cause dandruff, itching scalp or falling hair or that it relieves skin troubles; or that it is effective in severe cases of athlete's foot. (03058)

Standard Sales Company, 2231 First Ave., North, Birmingham, Ala., selling a preparation known as "Speedo Headache Powders," has stipulated to cease and desist from representing that the preparation will have any effect on colds in excess of such relief as it may afford for the pain and discomfort of head colds; that it will eliminate, remedy or cure head colds, minor muscular aches, simple neuralgia or jittery nerves; that it is a stimulant or stimulates; that it contains special ingredients that dissolve in a hurry, or that the preparation is safe. (03055)

Vegetable Juice & Products Co. and Vegetable Products Co., 480 East Main St., Rochester, N. Y., sellers and distributors of a product designated "ViVi-Ta Superior Wheat Germ," have stipulated to cease representing that the product will provide users with any significant amount of vitamin A or of the minerals calcium, iron, copper, magnesium or manganese; or that it can be relied upon to prevent colitis, sterility, eye cataracts, or gray hair, or to successfully treat catarrh, arthritis, neuritis, eczema, or anemia, or to stimulate the liver or pancreas, or to strengthen the heart muscles or retard old age, or to normalize calcium metabolism, or improve the condition of the sinus membranes, or the condition of the hair, nails or scalp, or to increase nerve energy, vigor, mental powers, or nerve and muscle tone, or to provide an effective aid during the period of menopause, or to exert a specific nourishing effect upon the nerves or brain; or that it will have any value in cases of constipation, lack of energy, devitalized tissues and glands and ill health except where and to the extent that such conditions may be due to a deficiency of the vitamins found in the product. (03059)

FTC CLOSES CASE

The Federal Trade Commission has closed the case growing out of its complaint against T. F. Hee, trading as The Eastern Herb Company and as T. F. Hee Herb Company, San Diego, Calif. The complaint alleged that the respondent had represented his preparation as competent treatments for several diseases and ailments.

The case is ordered closed without prejudice to the right of the Commission, should future facts so warrant, to reopen it and resume trial in accordance with its regular procedure.

NAB BOARD MEETING

As announced in last week's REPORTS a special meeting of the Board of Directors was held on Tuesday and Wednesday (13-14) in Chicago. The entire Board was present with the exception of Frank King, who was ill, and J. O. Maland who was prevented from attending on account of a death in his family.

A lengthy discussion of NAB internal matters and

(Continued on page 600)

DISTRICT MEETINGS

In addition to President Neville Miller and Broadcast Advertising Director Lew Avery from the NAB staff, acceptances have been received from the Office of Censorship, represented by Gene Carr; OWI, represented by Carl Haverlin; Office of Civilian Defense, representative to be named; the Marine Corps represented by area public relations officers; the Navy, by its area public relations

NAB BOARD MEETING

(Continued from page 599)

industry unity took place and decision was reached that the best interests of the industry will be served by the continuance of Neville Miller as president of the NAB. He was authorized to secure at the earliest possible time a proper person to serve as Director of Public Relations and to call upon a Board committee to aid him in making this selection.

The AFM situation was reviewed and the plans for the institution of cases in state courts were endorsed.

The forthcoming series of District meetings was announced and the Board pledged its support to make these meetings fully worthwhile.

DISTRICT MEETINGS

(Continued from page 599)

personnel; the Army, by Colonel Kirby, Captain Pellegrin and Robert Coulson in various sections, but present at all meetings; the Treasury Department, by Vincent Callahan or someone designated by him at various meetings.

There is still a possibility that the War Production Board and Selective Service will also be represented. These meetings offer a splendid opportunity for station managers, sales managers, news editors, engineers and program directors to confer among themselves and with government officials on subjects of vital importance.

NORRIS RESOLUTION

Neville Miller made the following comment on the radio resolution introduced in the Senate on Thursday by Senator George W. Norris, of Nebraska:

"The resolution introduced in the Senate today by Senator George W. Norris of Nebraska constitutes one of the gravest threats to freedom of speech in recent years.

"It would direct a Senate committee to determine whether a government agency should decide what the people of America should hear and what they should not hear on the radio.

"If the proposed investigation materializes, you may be sure that all the advocates of bureaucratic control of both radio and the press will be on hand to urge the enactment of a law which would put an end to the American System of Broadcasting

"In the case which led Senator Norris to introduce his resolution, the broadcasting companies involved, acting in strict accord with the National Association of Broadcasters' Code of Program Standards, refused to sell time to a consumer organization to discuss the philosopy of the consumers movement—a controversial public issue.

"This Code provides, among other things, that broadcasting stations are under an obligation to present discussion of controversial public issues without charge to the speakers, in such amount as would serve the public interest.

"Consumers' organizations frequently have been given time on the air to discuss their movement, and have been sold time to advertise their goods when they have goods for sale."

The text of the resolution:

"Whereas, the Cooperative League of the United States of America has reported in a resolution formally adopted at the 13th biennial congress of the League that the National Broadcasting Company and the Columbia Broadcasting System had unfairly and unjustly discriminated against the League by denying the League the opportunity to purchase radio time, and:

"Whereas, This report of the Cooperative League of the United States of America raises a very vital question as to the necessity for amendments to the Communications Act of 1934: Now, therefore be it

"Resolved, That the Committee on Interstate Commerce, or any duly authorized sub-committee thereof is authorized and directed to obtain such facts as the Cooperative League of the United States of America, the broadcasting companies, the Federal Communications Commission, the Department of Justice and other government agencies and other groups of persons who may have bearing on the accuracy of the charges of discrimination against cooperatives and others by the major broadcasting companies in the sale of their radio time; and on the question whether the Communications Act of 1934 should be further amended to authorize the Federal Communications Commission to prevent such discrimination or should otherwise be amended to deal with the problem of granting further authority to the said Commission by or affecting the power of said broadcasting companies. The said committee or duly authorized sub-committee is authorized and directed to secure the assistance of other government agencies in an investigation thereof be authorized and to report to the Senate the facts ascertained in the course of the investigation and the resolution herein.

"For purposes of this resolution, the Committee or any duly authorized committee thereof is authorized to hold special hearings, to set and act at such times and places during the seasons, recesses, and adjournment period of the Senate, to require and subpoena the attendance of such witnesses and production and impounding of books, papers and documents, to administer oaths and to take such testimony as at times advisable. The cost of stenographic services to report such hearings paid in accordance of 25 cents per hundred words. The expenses of the committee or any duly authorized sub-committees thereof, which shall not exceed $1,000, in addition to the cost of stenographic services to report such hearings shall be paid from the contingent fund of the Senate upon voucher approval by the Chairman."

COL. MARRINER ASKS EDUCATORS FOR MORE RADIO CLASSES

A letter urging the establishment of additional courses in the ESMWT-NAB course in the Fundamentals of Radio is being mailed this week and next to educational institutions.

It is signed by Colonel A. W. Marriner, Director of Communications, Army Air Forces, and is timed as a follow-up to similar letters written by member stations.

As an indication of the excellence of graduates of Parts I and II of Fundamentals of Radio, it was learned yesterday that two young women, after the 32 weeks of instruction, were among those engaged to teach men and women working on secret radio equipment for the fighting forces.

Stations are urged to make known to educators their willingness to cooperate in recruiting students.

Broadcasters should also see to it that new courses in their areas have enough women students or men civilians, outside of the draft, to fill the gaps left by their technicians being called to the colors.

The armed forces, which are among the heaviest users of radio, know that broadcast stations must be kept operating in spite of the inroads which they continue to make on technical personnel.

The law under which ESMWT disbursements are made governs admissions. The tendency is to limit to those required for the Enlisted Reserves of the Air Forces and Signal Corps and industry. Those required for industry, while considerable, are only a fraction of the number required by the above mentioned forces.

Men who maintain a good average in the Fundamentals of Radio will be deferred from active duty.

It is urged that this fact never be particularly stressed in any announcement which educational institutions may ask you to make when recruiting. This training, in itself, must never be permitted to develop into a fox-hole for anyone who might wish to delay military service.

On the other hand, these courses, with deferment which permits students to produce while learning, are a decided advantage to the Air Forces, Signal Corps and the Nation.

For the record, Colonel Marriner's letter to educators is reproduced in full:

"The tremendous expansion of the Army Air Forces require that a large number of additional radio men be trained. The demand is taxing existing Army communications training facilities. As was pointed out recently by General Sommervell, the armed forces must depend to an increasing extent upon educational institutions throughout the United States to furnish preinduction training.

"To assist in filling the demands of the Army Air Forces for additional communications personnel, arrangements have been completed recently whereby ESMWT institutions will train individuals in the Enlisted Reserves, in accordance with the following:

"Those eligible for enlistment must be high school graduates with at least two years of high school math.

Physical Requirements

"Must be able to pass Army physical examination. However, it is possible for those qualified for limited service only to enter in accord with the recent relaxation of physical entrance requirements for the Army.

How the Plan Operates

"Those enlisting will be permitted to take the special 16 weeks course of instruction in Fundamentals of Radio I. Those passing this first course satisfactorily may enter the class in Fundamentals of Radio, II. The maximum draft deferment permitted is 9 months. Anyone who fails to make a reasonably good showing in the course is subject to immediate induction.

"At the completion of the course the trainee is subject to call to active duty. Upon entering the Army Air Forces he will be assigned either to an Army Air Forces technical training school or will be sent directly to operational training units.

"After induction into the Army Air Forces, following the successful completion of the course in fundamentals of radio, the men may be given considerable latitude in exercising their preference for intensive training in any particular phase of communications. There is a need for radio men in the air crews and in the ground crews. Flying is optional.

How to Arrange Courses

"Arrangements to establish courses for training men enlisting in the Enlisted Reserve Corps of the Army Air Forces are made with the Office of Education through local ESMWT representatives. In instances where courses are now set up for giving instruction in the fundamentals of radio, it is not necessary to set up a new course. Instead, those desiring to enter the Enlisted Reserve Corps of the Army Air Forces may do so merely by contacting their local recruiting office. Application blanks in whatever quantity you need will be sent on your request.

"If you have any question, please write directly to me. Also I should appreciate hearing of your plans and progress. By working together we can do much towards alleviating this shortage of radio men in the armed forces."

More Radio Courses Planned in Connecticut

At the call of Franklin M. Doolittle, president, WDRC, Hartford, Conn., and Dean J. H. Lampe of the University of Connecticut, broadcasters and educators met in Hartford on September 30 to lay plans for the training of additional radio technicians.

Present courses terminate during the first part of December. An expanded teaching program to be given shortly thereafter was agreed upon. The educators are now engaged in a survey to estimate the number of students they can train up to March 1, 1943.

Those attending, in addition to Mr. Doolittle and Dean Lampe, were:

Paul H. Nelson, University of Connecticut, Storrs; T. C. McCray, WTIC, Hartford; P. W. Davis, WNBC, Hartford; Walter Haase, WDRC, Hartford; C. T. DeLaney, WTHT, Hartford; T. Hillway, Hillyer Junior College, Hartford; Alan S. Wilson, Hillyer Junior College, Hartford; H. M. Turner, Yale University, New Haven; Claude W. Fawcett, Yale University, New Haven; Forrest R. Hughes, Yale University, New Haven; Richard P. Saunders, New London Junior College, New London; John C. Moore, Jr., WNLC, New London; E. J. Frey, WBRY, Waterbury; George Keich, WICC, Bridgeport.

Teach Signal Corps Radio

Ten members of WCAU's engineering and technical staff are now serving as part-time instructors for the Signal Corps courses being conducted by Drexel Institute of Technology with the cooperation of the Army Signal Corps.

CRITICAL OCCUPATIONS

The Chairman of the Board of War Communications has transmitted to the War Manpower Commission lists of critical occupations and definitions of such positions in the standard and the international broadcasting industries and the radio communications and wire telephone industries, it was announced Monday.

This material was prepared by various technical committees of the Board of War Communications at the request of the War Manpower Commission. The committees are composed of representatives of government, labor, and industry. They are furnished to the War Manpower Commission for that agency's consideration and appropriate action in connection with the establishment of a standard list of critical occupations. It is presumed that these lists, as officially approved by WMC, will be used by draft boards in considering Selective Service policies in drafting key personnel from the communications industry.

ENLISTMENTS

Selective Service Headquarters has advised the NAB that the Army will not now receive any registrant for enlistment or commission unless his Local Board has released him, and that the Navy will not receive registrants in Class II-A, II-B or III-B unless released by the Local Board.

PAY FREEZING

Radio remains virtually untouched by the President's pay-freezing order of October 3, since salaries under $5,000 apparently are exempt (see NAB Reports, p. 589).

There are two schools of thought among government officials as to why the order left this loop hole: (1) that it was just an error and would be corrected, and (2) that it was felt "white collar" workers had not yet gotten increases in proportion to those obtained by the factory workers, and that the white collar workers should get "theirs" before their salaries were frozen.

Meantime, the War Labor Board has exempt from the order employers of not more than eight employees.

The Board also issued an order stating that employers could make individual wage adjustments as a result of:

a. Individual promotions or reclassifications
b. Individual merit increases within established rate ranges
c. Operation of an established plan of wage increases based upon length of service
d. Increased productivity under piece-work or incentive plans
e. Operation of an apprentice or trainee system.

These two orders are of no importance to radio unless and until the exemption on salaries under $5,000 is removed.

Programs for Victory

PORTSMOUTH TO PORTSMOUTH

Expressions of greeting crackled across the Atlantic on October 8 when Portsmouth, New Hampshire, saluted her namesake, Portsmouth, Hampshire, England.

The broadcast originated in the studios of Portsmouth's WHEB, and was short-waved overseas through WRUL, Boston.

Participating in the broadcast beamed to Britain were Portsmouth Mayor Stewart E. Rowe; Commander Charles M. Elder, USN (Ret), senior aide to the Commandant of the Portsmouth Navy Yard; Justin D. Hartford, publisher of the local newspaper; and Frank Patterson, president of the Rotary Club.

Prior to Mayor Rowe's opening remarks was a recorded message from Harold Butler, British Minister to the United States.

Highlight of the 15 minute program were these inspiring words, voiced by Commander Elder: "We at the Portsmouth Navy Yard are working harder, harder than ever before, to give our common arms the striking power that will carry death to the Axis—a death which even now they realize awaits."

RAZORBACK GAMES OVER KFPW

KFPW, Fort Smith, Ark., is bankrolling the University of Arkansas football games this season with war bonds getting the free commercials.

The home of the Razorbacks is Fayetteville which necessitates line charges. But Manager Pat Garner says the station is happy to assume them for such a worthy cause, "though it is a whale of expenditure for a 250 watter."

PROF. ABBOT HAS BIBLIOGRAPHY

A bibliography of "Radio Wartime Propaganda" has just been compiled by Professor Waldo Abbot of the University of Michigan, Ann Arbor. It was prepared as, "Suggested reading—speech 157, Wartime Radio Programs," which apparently is concerned with "Radio as a psychological weapon, goodwill builder, and public relations medium."

Sections are devoted to books, pamphlets and magazine articles.

OK IN SAN DIEGO AND TULSA

From Leah McMahon, program director, KFSD, San Diego, and Allan Page, assistant program director, KVOO, Tulsa, comes word of a successful Fire Prevention Week. Midwesterners riding B&O's radio equipped Capital Limited reported plenty of announcements over stations between Chicago and Washington.

WROK AND PAPERS IN DRIVE

The Rockford Register-Republic and Morning Star called on WROK to help in the promotion of the scrap salvage drive in northern Illinois.

In cooperation with the newspapers' campaign, WROK is scheduling spot announcements, special on-the-spot programs in connection with the drive, and daily salvage talks by John Rust, city editor of the Register-Republic, on the "Home Front" program. The station's civilian defense bulletins on three daily newscasts also are being turned over to the salvage round-up.

Sales

Radio Showbook Contains Directory of Programs

As part of the September and October issues of "Radio Showmanship" magazine—and now to be issued as a separate booklet—the editor of this monthly publication for radio station distribution has released a 36-page directory of syndicated, transcribed script and live talent shows. Designed for the salesman who wants a pocket-size collection of program ideas, for the program director seeking tested shows for his market, and for the advertiser who wants to survey the field of syndicated programs, "Radio Showbook" lists 380 different syndicated programs.

Indexed and cross indexed, "Radio Showbook" contains a listing by producers, in which a complete synopsis of each program is given. These same titles are also broken up into five other categories.

In the break-down by subject matter are adventure series, Christmas features, comedy strips, detective stories, domestic serials, dramatic features, fiction adaptations, historical features, music, news features, patriotic features, quiz programs, religious features, sports, etc.

In the break-down by time units, all one minute, five minute, fifteen, thirty and 60 minute shows are grouped together according to length. Shows are also broken down by audience appeal, segregating those designed especially for juvenile, feminine and masculine ears. Syndicated programs especially adapted to specific businesses also rate a separate listing, and range from aviation to used cars. The alphabetical listing gives by title all shows incorporated into the directory.

The "Radio Showbook" is published by "Radio Showmanship" magazine, 1004 Marquette, Minneapolis, Minn.

Department Store Buys Football Broadcasts

The W. W. Scales Department Store of Starksville, Miss., has bought the choice games of the Mississippi State and "Ole Miss" football schedule for 1942 for broadcasting over WCBI, Columbus, Miss.

PER-INQUIRY OFFERS

The Roycraft Company of Minneapolis, Minn., is reported to be making a per-inquiry offer in an effort to sell a new product called "Rubber Life," which is painted on tires, allegedly to make them last longer. Not only is such business unethical, but government agencies and the rubber industry have repeatedly warned that no efficacious product of this type is now known.

The Williams S L K Laboratories of Milwaukee, Wis., manufacturers of several proprietary remedies, has been reported to be offering advertising of these products on a per-inquiry basis.

Several member stations have forwarded copies of the form letter and sample continuities being sent out by Van De Mark Advertising, Inc., urging the sale of the "Foto-Color" unit of the L & M Manufacturing Co., on a per-inquiry basis. The NAB Department of Broadcast Advertising has again written this agency protesting against the offer of this business on a per-inquiry basis.

DISTRICT 15 SPECIAL MEETING

A special meeting of the 15th NAB District was held at San Francisco on October 8. District Director Arthur Westlund, KRE, reported on the September 24-25 meeting of the Board of Directors and a general discussion was held regarding the inroads of Selective Service on key radio personnel of the 15th District. The matter of employment of 15th District radio personnel by the OWI was also discussed.

It was decided that election of the Director for the term beginning in 1943 should be held at the regular forthcoming District meeting scheduled for November 16-17 in San Francisco, and a nominating committee was appointed to report to that meeting.

A general discussion regarding industry unity and NAB personnel was had and the District Director was given instructions.

The following were present:

C. L. McCarthy, KQW; Joe W. Elwood, KPO-NBC; Lindsey Spight, John Blair & Co.; Leo O. Ricketts, KFBK; Ad Friel, KLX; John Brunton, KQW; Ed Franklin, KJBS; Wilt Gunzendorfer, KSRO; Charles E. Marin, CBS; Wilfred L. Davis, KYA; S. B. Brunton, KJBS; Clyde F. Coombs, KARM; Bernard E. Cooney, KDON; Howard Walters, KDON; Bil Ryan, KGO; Ralph R. Brunton, KQW; and Art Westlund, KRE.

"MONOPOLY" SUIT ARGUED

No decision has as yet been handed down in the CBS-NBC case against the Government seeking an injunction against the operation of the Network Regulations, which were argued Tuesday in New York before the statutory three-judge Federal Court.

FEDERAL COMMUNICATIONS COMMISSION

FCC APPOINTMENT

Rosel H. Hyde has been appointed Assistant General Counsel of the FCC Legal Department, Broadcast Division. He fills the vacancy created by the resignation of Lucien Hilmer.

Hyde was born in Idaho in 1900 and was educated in the public schools of that state. He attended the Utah Agricultural College and the George Washington University Law School of this city. He is married and has three children. Hyde was a member of the legal staff of the Federal Radio Commission from July, 1928 to 1934 and has been on the staff of the FCC from that time on.

919 STATIONS

During the month of September, 1942, the Federal Communications Commission granted no permits for the construction of new stations. Operating licenses were issued to three stations, and one station was deleted. A comparative table by month follows:

	Oct. 1	Nov. 1	Dec. 1	Jan. 1	Feb. 1	Mar. 1	Apr. 1	May 1	June 1	July 1	Aug. 1	Sept. 1	Oct. 1
Operating	869	877	882	887	891	893	897	899	906	906	905	905	907
Construction	44	38	37	36	32	31	27	25	18	19	16	15	12
	913	915	919	923	923	924	924	924	924	925	921	920	919

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, Oct. 19. They are subject to change.

Monday, October 19

WLW—The Crosley Corporation, Cincinnati, Ohio.—Modification of license, **700 kc.** 50 KW day, 500 KW night, unlimited, using W8XO's trans.

Wednesday, October 21

NEW—Blue Network Company, Inc., Hollywood, California.—C. P., **31220, 35620, 37020, 39260 kcs.,** Em-A3, 25w, Sec. 4.24.

Thursday, October 22

Further Hearing

NEW—Beauford H. Jester, Individually and as Trustee for W. W. Callan, Dewitt T. Hicks, Hilton W. Howell, Wilford W. Naman, Robert C. Levy, Ross M. Sams & Davis Stribling, Waco, Texas.—C. P., **1230 kc.,** 250 watts, unlimited.

K61LA—Metro-Goldwyn-Mayer Studios, Inc., Los Angeles, California—Modification of C. P., **46,100 kcs.,** 7,000 square miles, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KPQ—Wescoast Broadcasting Co., Wenatchee, Wash.—Granted extension of special service authorization to operate on **560 kilocycles** with a daytime power of 1 kilowatt and nighttime power of 500 watts, until April 25, 1943 (B5-SSA-49).

WLAY—Muscle Shoals Broadcasting Corp., Muscle Shoals City, Ala.—Granted construction permit (B3-P-3508) to install new transmitter replacing the licensed transmitter which allegedly caught fire and was damaged beyond repair. (This action was taken in view of the condition of the licensed equipment and in consideration of the amount of operating time that has been lost due to transmitter failure.)

DESIGNATED FOR HEARING

David Ashton Brown, Marion, Ohio—Designated for hearing application for construction permit (B2-PARE-3) for a new Class II experimental (public address relay) station, using **310,000 kilocycles,** power of 1.35 watts, A3 emission.

WBNY—Roy L. Albertson, Buffalo, N. Y.—Designated for hearing application for modification of license (B1-ML-1133) to change frequency from **1400 kilocycles** to **680 kilocycles.**

LICENSE RENEWALS

Granted renewal of following station licenses for the period ending in no event later than February 1, 1943:

KBTM, Jonesboro, Ark.; KODL, The Dalles, Ore.; KSUN, Lowell, Ariz.

Granted renewal of following station licenses for the period ending in no event later than April 1, 1943:

KDLR, Devils Lake, N. Dak.; WSOC, Charlotte, N. C.

Granted renewal of following station licenses for the period ending in no event later than December 1, 1944:

WTJS, Jackson, Tenn.; WTSP, St. Petersburg, Fla.; KBWD, Brownwood, Tex.

KHUB—John P. Scripps, Watsonville, Calif.—Granted renewal of license for the period ending in no event later than June 1, 1943.

MISCELLANEOUS

KRLD—KRLD Radio Corp., Dallas, Texas.—Granted license (B3-L-1701) to cover construction permit (B3-P-3484) which authorized changes in directional antenna system. Also granted authority to determine operating power by direct measurement of antenna power (B3-Z-1429).

KGER—Consolidated Broadcasting Corp. Ltd., Long Beach, Cal.—Granted modification (B5-MP-1644) of construction permit (B5-P-3096), for extension of completion date to November 12, 1942.

WTOC—Savannah Broadcasting Co., Savannah, Ga.—Granted modification (B3-MP-1645) of construction permit (B3-P-2944), for extension of completion date to 12-15-42.

WALB—Herald Publishing Co., Albany, Ga.—On the Commission's own motion, ordered that the issues heretofore released on the application for construction permit for change in frequency from **1590** to **1550 kilocycles** and authority to make changes in the directional antenna, be supplemented by the following issue: "To determine whether the granting of this application would be consistent with the provisions of the North American Regional Broadcasting Agreement (Appendix I, Table III)." The present hearing date, November 9, 1942, is retained (Docket No. 6399).

WMAZ—Southeastern Broadcasting Co., Inc., Macon, Ga.—Granted modification of construction permit, as modified, which authorized change in frequency, increase in power, installation of directional antenna for day and night use, and move of transmitter, for extension of completion date from October 6 to November 6, 1942 (B3-MP-1651).

WAGA—Liberty Broadcasting Corp., Atlanta, Ga.—Granted license (B3-L-1713) to cover construction permit (B3-P-2938) for change in frequency to **590 kilocycles**, increase in power to 5 kilowatts, installation of new transmitter and directional antenna for night use, and move transmitter. Also granted authority to determine operating power by direct measurement of antenna power (B3-Z-1447).

WCOL—WCOL, Inc., Columbus, Ohio.—Granted authority to determine operating power by direct measurement of antenna power (B2-Z-1445).

KBTB—Red River Broadcasting Co. Inc., Duluth, Minn.—Granted construction permit (B4-PRY-289) to move transmitter of relay station from 16th St. and St. Louis Ave., to Frong St. and 63rd Ave. West, Duluth.

WDAB—Charleston Broadcasting Co., Portable-Mobile, Area of Charleston, W. Va.—Granted modification (B2-MPRY-32) of construction permit (B2-PRY-270) for new relay station, for extension of commencement and completion dates to 10-19-42 and 4-19-43 respectively.

The Associated Broadcasters, Inc., Portable-Mobile, area of San Francisco, Calif.—Granted license (B5-IRY-267) for new special relay broadcast station using already licensed equipment (of station KBSF); frequencies **1622, 2058, 2150, 2790 kc.,** 50 watts, to be operated as a special relay broadcast station with applicant's international broadcast station KWID.

R. O. Hardin and J. C. Buchanan, d/b as Nashville Broadcasting Co., Tennessee Radio Corp. (both of Nashville, Tenn.)—Adopted an order denying petitions of R. O. Hardin and J. C. Buchanan, d/b as Nashville Broadcasting Co. and Tennessee Radio Corp., requesting that their applications for construction permits for new stations be granted. The Commission further ordered that the applications be designated for further hearing upon the following issues: "1. To determine whether the granting of either of the above-entitled applications would be in conformity with the Commission's policy announced by its Memorandum Opinion of April 27, 1942; (2) To determine whether, in view of the foregoing, the granting of either of said applications would serve public interest, convenience, or necessity" (Dockets 6191 and 6193).

APPLICATIONS FILED AT FCC

590 Kilocycles

WOW—Woodmen of the World Life Insurance Society, Omaha, Nebraska.—Voluntary assignment of license from Woodmen of the World Life Insurance Society to Radio Station WOW, Inc.

610 Kilocycles

WDAF—The Kansas City Star Co., Kansas City, Mo.—Authority to determine operating power by direct measurement of antenna power.

920 Kilocycles

WMMN—Monongahela Valley Broadcasting Co., Fairmont, W. Va. —Modification of construction permit (B2-P-2913 as modified) which authorized changes in directional antenna system and increase in power for extension of completion date from 10-31-42 to 2-3-43.

1270 Kilocycles

WPDQ—Jacksonville Broadcasting Corp., Jacksonville, Fla.—License to cover construction permit (B3-P-3385 as modified) which authorized construction of new standard broadcast station.

WPDQ—Jacksonville Broadcasting Corp., Jacksonville, Fla.—Authority to determine operating power by direct measurement of antenna power.

FM APPLICATION

Capitol Broadcasting Co., Inc., Schenectady, New York.—License to cover construction permit (B1-PH-23 as modified) which authorized construction of new high frequency broadcast station amended to cover construction permit in part in accordance with Commission Action of 8-4-42.

MISCELLANEOUS APPLICATIONS

WNYE—Board of Education, City of New York, Brooklyn, New York.—Modification of construction permit (B1-PED-18 as modified) which authorized changes in equipment, frequency, power, and emission for extension of completion date from 10-20-42 to 12-1-42.

W2XEO—Capitol Broadcasting Co., Inc., Schenectady, New York. —License to cover construction permit (B1-PST-12) which requests reinstatement of construction permit (B1-PST-1) which authorized construction of new ST Broadcast Station, in part.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Jack Silverman and Associates, General Forwarding System, and Commercial Pen Co., 821 Market St., San Francisco, selling and distributing post cards intended to be used by creditors and collection agencies in obtaining information concerning debtors, are charged in a complaint with misrepresentation and unfair and deceptive acts and practices in commerce. (4846)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Chicago Technical College, 2000 South Michigan Blvd., Chicago, has been ordered to cease and desist from certain misrepresentations in connection with the sale of correspondence courses of instruction in drafting, building, and air-conditioning and refrigeration. (4089)

E. B. Moles—An order to cease and desist from misrepresenting the merits and qualities of a mechanical device designated "Gas-Miser," for use on automobile engines, has been issued against E. B. Moles, Sioux City, Iowa. Moles, who formerly conducted his business under the name of Malone & Moles, is no longer engaged in selling the device. (4557)

Zenith Radio Corporation—An order has been issued directing Zenith Radio Corp., 6001 West Dickens St., Chicago, to cease and desist from misrepresenting the qualities and characteristics of radio receiving sets it manufactures and sells.

Findings of the Commission are that the respondent has falsely represented in advertisements and radio broadcasts that its receiving sets are capable of bringing in programs broadcast from radio stations located in Europe, South America, and the Orient, every day, and that such programs will be reasonably audible and distinct at all times and under all conditions. Representations made by the respondent as to the number of tubes in its sets also were misleading, the Commission found.

Under the order, the respondent company is directed to cease and desist from representing that any of its sets will bring in broadcasts from any foreign station "every day," or are capable of providing reasonably audible and distinct reception of foreign broadcasts at all times or under all conditions; and from representing that any set contains a designated number of tubes or is of a designated tube capacity, when one or more of the tubes referred to are tubes or other devices which do not perform the recognized and customary functions of tubes in the detection, amplification, and reception of radio signals.

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Brooklyn Overall Co., 181-191 Belmont Ave., Brooklyn, engaged, among other things, in the manufacture and sale of painters' drop cloths, have stipulated to desist from use of the words "ten ounces" as descriptive of the average weight per square yard of such cloths and from use of any words conveying the belief that the material of which the cloths are made is of an average weight per square yard other than what is actually the fact. (3543)

Delano Co., Inc., and F. H. Delano, 558 East Genesee St., Syracuse, N. Y., engaged in selling a medicinal preparation designated "Delano's," have stipulated to cease and desist from representing that the preparation is a remedy or cure for rheumatism and is a tonic or alternative. (03060)

Estabrook & Eaton Co., 256 Washington St., Boston, engaged in selling "Leighton" cigarettes, has stipulated to cease representing directly or by implication that Leighton cigarettes are the only ones containing nature-ripe tobacco or that they do not irritate the throat or do not affect the nerves. (03062)

National Galleries of New York, Inc., and Randolph Fajen, also trading as Continental News-Photo Service and as Pach Studios, 45 West 57th Street, New York, engaged in the sale and distribution of photographs, have stipulated to cease and desist from use of the word "News" or any word or term of similar import in the trade name "Continental News-Photo Service" or, as part of any other trade or corporate name to designate or describe a business which principally is that of selling photographic prints to persons photographed; representing or implying in any manner to any prospective customer that they or their sales representatives or agents are news or press photographers; or representing that any photograph solicited by them is for press or publicity purpose unless such photograph is for news or press use. (3541)

Nu-Art Films, Inc., 145 West 45th St., New York, engaged in the leasing, selling and distribution of 16 millimeter motion picture films, has stipulated to cease and desist from use of the words "In His Steps" as a designation or title of a motion picture film which is not, in fact, an adequate adaptation or film version of the book entitled "In His Steps," written by Charles M. Sheldon, and from use of any other words tending to convey the belief that the film is an adaptation or film version of the book. (No. 3542)

Pach Brothers, a corporation, and Alfred Pach, its president and treasurer, also trading as Pach Studios, engaged in the sale and distribution of photographs, including miniatures designated "goldtone miniatures," have stipulated to cease and desist from representing that any miniature or photograph which has not been prepared for or displayed in an exhibition, has been prepared for exhibition purposes or displayed in an exhibition; representing that miniatures or photographs produced for, or ordered by, customers or prospective customers are made from negatives found to be "admirably adapted'" to "goldtone miniatures" for exhibition purposes or are made from negatives especially selected by reason of their outstanding merit or quality; representing that their miniatures have ever sold for $75 or any amount in excess of that for which they have actually been sold; representing as the customary or regular price of such miniatures, any price which is in excess of the price at which they have been customarily sold by them in their usual course of business and from representing that the price at which the miniatures are offered constitutes a reduced or special price, when in fact such price is the usual or customary price at which they are sold by them in their normal and usual course of business. (3540)

Taylor Drug & Seed Co., and Taylor Drug Co., Bessemer, Ala., engaged in selling a medicinial preparation designated "Taylor's Kolnox Compound," have stipulated to cease representing that the product will aid the system to maintain proper alkaline balance; that it is a cold remedy and will prevent, fight, control or rid one of colds; that it will clear the system of poisons; that it will relieve bad coughs, or have any value with respect thereto in excess of its ability to exert a slight cooling effect on the throat; that it will relieve or ease congestion; or by use of the expression "Kolnox" as part of the brand name of the preparation, or by any other words, that the preparation will cure colds. (03061)

SUPREME COURT RULES ON FTC CASE

The U. S. Supreme Court has denied the petition of Joseph Piuma for certiorari in which he sought a review of a decision of the Circuit Court of Appeals for the Ninth Circuit (San Francisco) which confirmed civil penalties of $3,250 imposed on him for violations of an order of the Federal Trade Commission.

In 1937 the Commission ordered Piuma, a manufacturing pharmacist of Los Angeles, to cease and desist from false representations of the therapeutic value of a medicinal preparation, "Glendage," sold as a gland tonic. Violations of the Commission order in 13 advertisements were noted and brought before the District Court for the Southern District of California, which imposed penalties of $250 for each violation. The ruling was appealed to the Circuit Court of Appeals for the Ninth Circuit which unanimously affirmed the judgment of the lower court. From this decision the respondent sought certiorari to the U. S. Supreme Court.

War Manpower Policy

Acting on the recommendation of the Women's Advisory Committee, Chairman Paul V. McNutt of the War Manpower Commission has issued a statement of policy calling for intensified recruitment and training of women workers on a voluntary basis in all phases of war production and essential civilian activities.

The increase in our armed forces and the expansion of the war production program necessitates the maximum utilization of our labor resources. The present number of gainfully employed workers, both men and women, is inadequate to fill even the immediate requirements of the war production program. These considerations require that substantially increased numbers of women be employed in gainful occupations in war production and essential civilian employment, especially in areas of labor scarcity. The recruitment and training of women workers must be greatly expanded and intensified. The active cooperation of Government agencies, educational institutions, management, labor, and women able to accept employment is essential.

The policy, which lays down basic national standards for the induction of women into the labor market, was approved by the Commission and also by its National Management-Labor Policy Committee.

Salient points in the policy are that management and labor organizations should remove all barriers against the employment of women in any occupations for which they are or can be fitted, and that women be admitted on a basis of equality with men to all forms of training. Due regard is to be given however, to the individual's qualifications for work, the physical requirements of occupations, and to working conditions.

Employers are asked to analyze all jobs in their plants, at once, to determine which can be filled by women and to prepare for employing the largest possible number.

Take An Inventory Now

By Major General Lewis B. Hershey, U. S. A., Director of Selective Service

Manpower is a most important strategic material of today. Every employer should make a prompt inventory, appraisal and analysis if the manpower in his own plant as he would inventory his stock pile. In order to keep production going and at the same time furnish men for the armed forces, industry should now establish an orderly replacement program.

In order to secure temporary deferments for essential men while he is training women, young men, older men, men physically handicapped or those with a high degree of dependency, the employer should know the fundamental principles in the operation of his local Selective Service Board. Certain steps should now be taken by each employer. He should know how many men on his pay roll are between the ages of 20 and 45. He should investigate the classification of every one of those men. On the basis of such an inventory he should prepare to plan ahead and train men for replacement of those who must necessarily enter the armed forces if we are to have the sort of army which can win the war.

Deferments Temporary

Deferments granted so that employers may train women or men not liable to early induction, are temporary deferments; they cannot exceed six months and in many cases may be for only thirty, sixty or ninety days. The Army today has to train a bomber pilot within a period of eight months to operate a very technical machine with an instrument board which puzzles an expert. Why, therefore, should industry insist that it assume that it can take two or three years to train men for industrial tasks not nearly so complicated?

The fundamental purpose of every deferment of a registrant is to allow an employer to train a replacement. Only in a few rare instances can an employer expect to have these temporary deferments continued for more than the six months period. These are only in cases where an abnormally long period of training is required for a replacement and the eight months needed in which a bomber pilot can be turned out now, is something to remember in this connection.

Employer's Responsibility

Employers may seek the deferment of their necessary men with or without their consent.

Here is how they go about it.

On page 3 of the Selective Service Questionnaire (Form 40) which is sent to each registrant before he is classified is the following:

> Instructions.—If your employer believes that you are a necessary man in a necessary occupation, it is his duty to fill out Form 42A requesting your deferment. You may also attach to this page any further statement by yourself which you think the local board should consider in determining your classification. Such statement will then become a part of the questionnaire.

This is on all the questionnaires distributed during the past six months. The fact that the Selective Service System now specifically mentions the filing of Form 42A as the manufacturers' duty is a clear indication of the Selective Service System view on the responsibility of each employer in this matter.

The employer can secure Form 42A at the local board and the local board will consider the employer's request when the form is properly filled out and signed.

TAKE AN INVENTORY NOW

(Continued from page 607)

If such request should be denied because the man, after consideration of the claims offered for him, is not considered to be indispensable to the company's operation, and is needed more in the armed services, the local board will advise the employer of its refusal of such an occupational deferment.

The local board does this by sending to the employer, at the same time it notifies the registrant of his classification, a Form 59.

May Make Appeal

There are ten days after Form 59 is mailed by the local board to the employer during which the employer can appeal the registrant's case.

The registrant will not be ordered to report for induction during this ten-day period.

In order to take an appeal the employer simply has to sign his name to Form 59 which he has received, and return it to the local board; or in case the Form 59 is not received from the local board, any written request will have full value to make such an appeal effective.

When Form 59 is returned by the employer the appeal procedure becomes automatic.

All necessary forms are available at the local board in the employer's immediate vicinity or at the office of the State Director of Selective Service.

If the local board and the appeal board deny the appeal for the occupational deferment of a key man, the employer may then bring the matter to the attention of the State Director at the State Selective Service Headquarters, with the request that the case be reopened or appealed by him to the President.

Definite Duty

A double duty rests upon the employer. He should personally know what his manpower situation is. He should not leave the job to a minor employee to decide who is necessary. The employer who delegates the task of filing a request for deferment to a clerk, the executive who does not make a complete inventory of his whole plant today, is negligent. Likewise, the employer who files requests for deferment of men who can be replaced by women, or others, is keeping reinforcements out of an Army which is battling for us all. The employer engaged in essential war production who has been required to greatly expand his plant and who then fails to request deferment for his key men is also negligent.

A good rule to follow: Don't ask deferments for any men who can be replaced by training another individual not likely to be eligible soon for service in the armed forces.

Make an inventory, request deferment for any man whose immediate going into the armed services would retard production of vital war material or other services essential to the war effort, or who is needed to maintain national health, safety and interest.

Only when an employee is working in a critical occupation within an essential industry should a Form 42A be filed for his temporary occupational deferment.

Make Replacements

Yes, an inventory within a man's own plant is called for; also an appraisal and analysis of the manpower in the community. There is many a man over 45, or a man physically handicapped, or a woman who can do that job that the 23-year-old boy is doing who took a 12-weeks course at a learn-quick school.

There are not more than sixty million people in this country who are capable of effective productive effort. These men and women represent our total manpower available to win the war. They must do everything that must be done in a total war; maintain transportation, communications and utility systems, maintain public services, grow food for ourselves and our allies, mine the metals and produce the raw materials, fabricate and produce the amount of consumers goods necessary to maintain even a restricted national life and the supplies, weapons and munitions of war; also most of all they must provide the men who land on strange shores in far places, the men who carry the fight to the enemy on a multitude of far-flung frontiers. The rest of the population who mine raw materials and produce weapons with which these men fight must be a self-disciplined team working in unity. The individual personal convenience, comfort or pleasure, or the convenience and ordinary leisurely replacement programs of the employer, will have to be given progressively less consideration as the war gets tougher and the casualty lists grow.

When we hear of the big armies we are going to raise, we must all remember that it takes at least five men or women to produce what they eat, use, fight with, and wear. With less than sixty million availables in this country, those figures are worth deep consideration.

SELECTIVE SERVICE SUPPLEMENT

Supplement No. 1 to the NAB Selective Service Handbook, together with facsimile letters from eight Government war agencies attesting to the importance of radio broadcasting to the war effort, were mailed to all stations yesterday. Additional copies of the letters for filing with Form 42-A with Local Boards when seeking occupational deferment of "key" men are available upon request.

Other Supplements will be forthcoming as time goes on. The pages are numbered to follow on after the last page of the Handbook, and are punched. If the Handbook is filed in a ring binder, it is suggested that the staples be removed and that the cover be slit at the crease, also the pages; this permits of expansion between the covers to give space for the supplements.

SALARY FREEZING

The FCC is sending out this week that section of its 1942 financial questionnaire dealing with employment and payrolls for the week of October 11.

The NAB urges all its members to return the questionnaire *with all possible speed,* so that the information can be compiled and be in use at the earliest possible date.

Wage figures will be of especial importance this winter for use in connection with adjustments under the President's Executive Order of October 3.

Judge Byrnes, wage stabilization chief, announced to the press on October 18 that salaries below $5,000, as

(Continued on page 610)

NAB AND RMA TO COOPERATE In Maintaining Operation of Nation's Radio Sets

IN SPITE of enlistments, draft and other influences which have taken a toll of radio servicemen, the servicing of the nation's radio sets will go on in spite of "war and pestilence".

Every broadcaster is vitally concerned with the maintenance of radio sets in the millions of homes. Regardless of how effectively we program our stations, all efforts are fruitless unless sets are in working order for listening. The matter of servicing sets, therefore, becomes of vital and immediate concern to every broadcaster, every radio family, the Army, Navy, Marine Corps, Coast Guard, Treasury, Agriculture, other agencies, as well as to industry.

That was the unanimous decision of the Radio Manufacturers Association which acted this week to implement a plan of action. While RMA President Paul Galvin and M. J. Schinke, chairmen of the RMA Service Committee, are searching for the man to organize the work within the trade there are several necessary things for broadcasters to do immediately.

What to Broadcast Now

The No. 1 Right Now Job is for broadcasters to help increase the production of individual servicemen by saving their time. This is done by telling listeners to bring in their sets. Listeners will do this willingly when somebody else besides the servicemen explain the reasons. (We're not discussing big console sets at this time.)

FOR THE PRESENT all stations are asked to broadcast one (1) announcement a day, samples by mail next week, or a short discussion of the subject woven into a women's program, commentator's, news, or other programs. Change time and audience by rotation. By holding fairly close to the information in the announcements, we will be assisting the RMA's complex job even before it is set up to carry out organization matters. The job is difficult but it can and *WILL* be done by the efforts of a combined industry.

Do not increase the amount of help now requested. The job should be done by infiltration, a sustained campaign, not an intensive drive . . . . one schedule a day on 900 stations is the suggestion for now.

Tell This to the Local Radio Trade

1. Tell them in a letter, radio servicemen, parts and set jobbers that WPB will arrange for parts and materials for repair and maintenance of receiving sets. An industry committee has completed the standardization of component parts and materials. This is on the authority of Frank McIntosh, Chief, Civilian Radio Section, Radio and Radar Branch, WPB.

This is important because many servicemen are quitting because they believe mistakenly that parts will not be available. This assurance should keep men in the business.

2. Tell them that radio servicemen are eligible for consideration for occupational deferment because radio repairmen are included in the list of essential occupations issued by Selective Service in Occupational Bulletin No. 27. (See Supplement No. 1, NAB Selective Service Handbook (now in your hands), dated October 23, 1942 and now in the mail.)

If the local radio trade is interested it might be wise to call a meeting on this subject of deferment because RMA is in no position to do so until it gets organized. The key radio jobbers in your city would undoubtedly do it when you explain the facts. It is always necessary to make out a case for the local draft board and the Supplement and the Handbook would guide the local radio men. They probably do not have access to such information. Your Handbook and Supplement will help them.

3. Impress on servicemen that they are vitally needed and are performing an important duty, essential to the war effort, by maintaining the nation's home receivers. Do not encourage the employment of radio receiver technicians as broadcast operators. It is easier to make an operator than it is a serviceman.

Keep the meeting on the beam so that broadcasters do nothing to interfere with plans which RMA will evolve to be carried out through cooperative industry effort. Broadcasters will have plenty of time to do other things in addition to those suggested today—when the time is ripe.

For additional support of radio servicemen in building a case for their local draft board a quotation by William B. Lewis, Chief, Radio Bureau, Office of War Information, who voices the government viewpoint, should be helpful. This is it:

"The maintenance of radio as an essential industry, so classified by the Manpower Commission, is of utmost importance to the prosecution of the war."

Then there is support for the servicemen's position in the statement of Elmer Davis, Office of War Information Director, who stated at a Senate Hearing:

"This office has a direct and vital concern with the maintenance of the radio coverage of this country. It is one of the most important media for the conveyance of war information in general to the people, and may become of still greater importance when there is occasion for an emergency message from the national leadership."

RMA Takes Official Action

Employment of a full-time man to handle a wartime emergency plan for the servicing of home radio sets was authorized by the board of directors of the Radio Manufacturers Association, in New York City, on October 21. The board directed President Paul Galvin, Chicago, and M. J. Schinke, Chicago, chairman, RMA service committee, to proceed immediately with the selection of an outstanding man for the post.

This work will be carried on in close cooperation with NAB.

It was the opinion of the manufacturers that if the job was to be done it had to be done right. In their opinion this called for handling through organization of manufacturing, servicing and selling personnel. With that as a premise the board voted the finances necessary to get the program under way.

What broadcasters can do now to further this work of servicing sets is outlined elsewhere in this issue of the "REPORTS".

SALARY FREEZING

(Continued from page 608)

well as those above, would be "stabilized." Control of salaries below $3,000 and those between $3,000 and $5,000 covered by collective agreements would be in the hands of the War Labor Board, while those above $3,000 not covered by union contract would be controlled by the Treasury.

When Judge Byrnes' statement is effectuated by an order, all radio salaries will be covered. The President's Executive Order of October 3 covered only hourly wage rates and salaries above $5,000.

Any broadcaster proposing to increase or decrease wages in this period should consult the NAB.

Third District Meeting

The meeting of the Third District broadcasters, the first of a series to be held in all 17 districts this fall, took place on Monday and Tuesday, October 19-20. District Director Isaac D. Levy, WCAU, called the meeting to order with some 70 broadcasters on hand.

NAB President Neville Miller gave a brief discussion of the war activities of the Association which was followed by an outline of the newly devised coordinating plan of the Office of War Information. This was presented by Douglas Meservey, assistant to William B. Lewis, Chief of the Radio Bureau of OWI, and by Carl Haverlin, Headquarters Consultant on Industry Relations for OWI.

Lt. Leon Levy, OWI coordinator for the Third District, also participated in the outline of the plan. It contemplates 12 war effort announcements a day for network affiliated stations and 16 for non-network stations, all to be one minute in length. Broadcasters are asked to enlist the cooperation of local advertisers in these campaigns. The announcements will originate from the central OWI office and the regional offices in the various areas. It was announced that the two transcribed programs now being used will be continued, namely, "Star Parade" and "This is the Enemy."

Stations are asked to set aside a strip, Monday through Friday, on which all government programs may be consolidated. Where live programs are originated by stations they are asked to contact regional OWI offices in order that fullest possible information may be available on what is being done in connection with war radio programs.

Louis B. F. Raycroft, regional director for Pennsylvania of the War Manpower Commission, spoke upon the work which is being done to make the greatest possible use of manpower. He stated they are cooperating very closely with the Selective Service and the Army and Navy to prevent the drafting or recruiting of men essential to the conduct of necessary civilian war activities.

Gene Carr, assistant to J. Harold Ryan, Radio Censor, outlined the philosophy of the Office of Censorship. He carefully reviewed the code and pointed out wherein broadcasters might avoid innocent violations.

Frank McIntosh, Head of the Radio Branch of the War Production Board, spoke upon the efforts being made to provide replacement parts for broadcast station transmitters and also upon the problem involved in servicing radio receiving sets. He stated that the War Production Board had made provision for replacement parts for receiving sets but the serious problem was lack of manpower to repair sets even though parts are available.

Mr. McIntosh stated that batteries are available only for standard sets and not for civilian portables nor are there spare parts for automobile radios.

Joseph L. Miller, NAB Director of Labor Relations, spoke on stabilization of wages and salaries and answered questions. He urged the stations to make fuller use of the NAB Labor Relations Department and to provide it with necessary information to enable it to function more effectively.

Sydney Kaye, NAB special counsel, presented NAB's point of view on the AFM situation. Samuel R. Rosenbaum, WFIL, criticized the Association's policy. (For full details see AFM Special Bulletin No. 12.)

Following this discussion, Clair R. McCollough, WGAL-WILM, moved that the meeting go on record as having complete confidence in the policy of NAB in the AFM controversy. This was seconded by Edward Clery of WIBG and was unanimously passed, Mr. Rosenbaum not voting.

The following were present: Leonard Kapner, WCAE; Edward D. Clery, WIBG; Stan Lee Broza, WCAU; C. G. Moss, WKBO; J. Nassau, WMRF; J. Gorman Walsh, WDEL; E. C. Anderson, WEST; Walter O. Miller, WGAL; Harold E. Miller, WORK; J. Robert Gulick, WORK; Clifford M. Chafey, WEEU; Robert G. Magee, WEEU; Raymond Gaul, WRAW; A. W. Chafey, WRAW; J. C. Tully, WJAC; George E. Joy, WRAK; Frank R. Smith, Jr., WWSW; Thomas W. Metzger, WRAK; David H. Rosenblum, WISR; Hal Seville, WJEJ; Howard Browing, Bigelow Thompson, Jack Maguire, Yale Merrill and Harry Kodinsky, Office of War Information; Lt. Com. J. Tenney, USNR; Lt. (jg) Ashley Halsey, Jr., USNR; 1st Lt. Thomas D. Richter, Jr., USA; Samuel R. Rosenbaum, WFIL; R. E. McDowell, WGBI; George D. Coleman, WGBI; Paul Harron, WIBG; William A. Schudt, CBS; Alexander W. Dannenbaum, WDAS; Joseph C. Burwell, WMBS; Harry C. Lewin, OWI; Ray Croft, War Manpower Commission; C. O. Langlois, Lang-Worth; Pierre Weis, Lang-Worth; C. C. J. Culmer, SESAC; Fred S. Boland, War Production Board; Leon Levy, WCAU; Isaac D. Levy, WCAU; Robert S. Kellogg, AMP; John Mayo, Associated Recording Program Service; M. M. Blink, and Gerald King, Standard Radio; Willis B. Parsons and John C. Treacy, NBC; Douglas Meservey, OWI; Charles E. Denny, WERC; J. Turner, NBC; R. W. Baker and Mrs. R. W. Baker, WITH; K. W. Husted and Elaine C. Ewing, OWI; Joseph L. Miller, Neville Miller and Lewis H. Avery, NAB; Victoria Corey, KDKA; Arthur Simon, WPEN; Herbert L. Pettey, OWI; James P. Begley, KYW; Harold Fellows, OWI; Eugene Carr, Office of Censorship; Edward J. Kroen, WKPA; B. A. McDonald, KYW; Elmer D. Free, Office of Civilian Defense; John E. Surrick, WFIL; Leslie Joy, KYW; Gordon Hawkins, Westinghouse; Leo J. Omelian, WLEU; R. B. Hudson, Rocky Mt. Radio Council, Denver, Colorado; Clari R. McCollough, WGAL; Roger Clipp, WFIL; Frank McIntosh, WPB; Carl Haverlin, BMI-OWI-NAB; Benedict Gimbel, WIP; Melvin Lahr, WKOK; Roy Thompson, WFBG; Henry N. Cocker, WTEL; Harry G. Templeton, WLS; Berton Adams, William Laughlin and E. Douglas Hibbs.

Programs for Victory

"SECOND FRONT" PROGRAM

Dr. Frederick A. Hodge, news commentator of WBEN, comes up with an idea which after consultation with OWI seemingly has some very good points. Dr. Hodge suggested that there be broadcast during the day, several announcements regarding the "second front" being right here at home.

OWI says that they feel this is a good idea and it would be advisable to use it somewhat as follows: "The second front is right here in ———— (give the name of the town)" and it goes on to observe that frequent explanation of the slogan should be announced, at least at the beginning. It suggests that the slogan should be followed with a few words to explain that offensive military action today was really fought out on the home front six months ago; that what we produce in the way of tanks and guns and planes, what sacrifices are made for the fighting forces, will have a direct bearing on the outcome of military action.

In that sense the OWI says the second front *is* right here at home. They feel that a clear public understanding of this point if brought out by the use of these announcements will have a very beneficial effect. It is passed on for such use as individual stations care to make of it.

WAR-EFFORT PROGRAMS FOR SCHOOLS

Radio Station WFIL is now serving school children in every grade from 1 to 12, in the Philadelphia Public Schools. Two patriotic, school-participation programs are presented over WFIL each Friday, in cooperation with the Philadelphia Board of Education; one program is carried by Philadelphia's elementary schools, the other by Philadelphia's high schools.

"The Quaker City Scrappers," featuring a musical character called "Filbert the Flea," consists of a series of broadcasts boosting the scrap metal drive, directed particularly to young children. In an entertaining manner, advice and instructions on getting in the scrap are presented. A group of school children appears on each broadcast, to discuss ways and means of getting more junk. A light motif is provided by the adventures of "Filbert the Flea," represented on the air by a piano monologue, with "Scrappy," champion child scrap collector of Quaker City. This broadcast is heard by an audience of 6,800 children in Philadelphia's elementary public schools. It is presented in cooperation with the Philadelphia Board of Education.

The "High School Victory Corps" program is broadcast by WFIL, cooperating with the Philadelphia Board of Education and the committee in charge of Victory Corps in Philadelphia High Schools, who prepare the program material. This program carries latest news and instructions from Victory Corps headquarters in Washington to students in all Philadelphia Public High Schools.

VACUUM TUBE REPAIRS

The Federal Telegraph Company, Inc., of 200 Mount Pleasant Avenue, Newark, New Jersey, has just announced that they will accept for repairing certain vacuum tubes of their own manufacture. The statement issued by Federal reads as follows:

"We are vitally interested in maintaining the operation of broadcasting stations and since tube materials are becoming more difficult to obtain, we have decided, where possible, to repair transmitting tubes of our manufacture. We feel confident that these tubes cannot be expected to equal the performance and reliability of new tubes, but in the present emergency will be better than no tubes at all.

"Our repair program at this point will be operated as follows:

1. We will repair or rebuild as required:

F-124A
F-125A
F-129A&B
F-307A
F-320B
F-328A
F-332C
F-337A
F-342A
F-343A
F-348A
F-363A
F-891A
F-891R
F-892A
F-892R
F-898A

2. We will determine cost of repair or rebuilding after we have had a report as to life and operating conditions and an opportunity to examine the tube at our plant.

3. Life guarantee if given will be based upon condition of the tube upon arrival at our plant.

4. The priority required will depend mainly on the requirements for new materials to effect the repair within a reasonable time.

"Since we have had no experience in this field, we feel that it is necessary to handle each tube as a separate problem until such time as we can determine average costs of repair for each tube."

For information concerning other organizations repairing vacuum tubes see page 580 of NAB Reports, October 2, 1942.

FEDERAL COMMUNICATIONS COMMISSION

FLY DISCUSSES COOPERATIVE BROADCAST RESOLUTIONS

James Lawrence Fly, FCC Chairman, at a press conference on Monday said he had not made a critical study of the complaint of the Cooperative League against the networks nor had he tried to make an exhaustive investigation of the possibility of legal action. "But it would be my judgment at this juncture that we do not have any authority to do anything about it," said Mr. Fly.

Mr. Fly called attention to the fact that the Commission had asked both networks for a statement of fact, and insofar as the Commission is concerned "that is where the matter stands at this time."

The chairman told the newsmen that the Board of War Communications Committees and the Board itself have completed their action insofar as a wartime basis of operation for the broadcasting industry is concerned. These recommendations, Mr. Fly said, have been forwarded to the FCC for its action. The chairman stated that an announcement of policy will be made shortly by the Commission. He estimated that the announcement would be coming along within a matter of a few days. "The matter has had a very thorough-going consideration," said Mr. Fly, "by most of the parties concerned. As you know the Domestic Broadcasting Committee and our Coordinating Committee have spent a considerable length of time on it, and the WPB staff have spent considerable time on it. I think we have got it in pretty good shape."

NORRIS RESOLUTION

The FCC has written to Mr. Niles Trammell, President of the National Broadcasting Company, and Mr. William Paley, President of the Columbia Broadcasting System, advising them that the Commission has received a letter from the New England Co-operative Federation, Boston, Massachusetts, stating that NBC and CBS have refused to sell radio time to the Cooperative League of the United States. Both organizations are requested to send the Commission a statement of the facts regarding the matter.

The Commission has also advised the New England Co-operative Federation that the request for a statement of the facts has been made and that the matter will be given appropriate consideration when the replies have been received.

The letter from the New England Co-operative Federation was submitted to the Commission by Senator Henry Cabot Lodge, Jr., to whom Chairman James Lawrence Fly replied under date of October 15, 1942:

"My dear Senator Lodge:

"This will reply to your memorandum of October 8, 1942, submitting for the consideration of the Commission a letter dated October 6, 1942, which you received from Savele Syrjala, Education Director of the New England Co-operative Federation, in which it is stated that the Columbia Broadcasting System and the National Broadcasting Company have refused to sell radio time to the Cooperative League of the United States for a 13-week series of Sunday afternoon broadcasts.

"The Commission has addressed letters to both the National Broadcasting Company and the Columbia Broadcasting System requesting a statement of the facts regarding this matter. As soon as the replies have been received, the matter will be given appropriate consideration by the Commission."

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, October 26. They are subject to change.

Monday, October 26

Further Hearing

WFAS—Westchester Broadcasting Corp., White Plains, N. Y.—Modification of license, **1230 kc.,** 250 watts, unlimited.

Tuesday, October 27

Further Hearing

NEW—Wilkes-Barre Broadcasting Corp., Wilkes-Barre, Penna.—C. P., **1240 kc.,** 250 watts, unlimited; request facilities of WBAX.

NEW—Central Broadcasting Co., Wilkes-Barre, Penna.—C. P., **1240 kc.,** 250 watts, unlimited; request facilities of WBAX.

NEW—Northeastern Pennsylvania Broadcasters, Inc., Wilkes-Barre, Penna.—C. P., **1240 kc.,** 250 watts, unlimited; request facilities of WBAX.

NEW—Key Broadcasters, Inc., Wilkes-Barre, Penna.—C. P., **1240 kc.,** 250 watts, unlimited; request facilities of WBAX.

Wednesday, October 28

Oral Argument Before the Commission

Report No. B-152:

WPRA—Puerto Rico Advertising Co., Inc., Mayaguez, Puerto Rico.—Renewal of license, **790 kc.,** 1 KW night, 2½ KW day, unlimited.

NEW—Puerto Rico Advertising Co., Inc., Arecibo, Puerto Rico.—C. P., **1200 kc.,** 250 watts, unlimited.

WSSJ—Puerto Rico Advertising Co., Inc., San Juan, Puerto Rico.—C. P., **1500 kc.,** 250 watts, unlimited.

NEW—Caribbean Broadcasting Association, Inc., San Juan, Puerto Rico.—C. P., **1500 kc.,** 250 watts, unlimited.

Wednesday, October 28

WAAT—Bremer Broadcasting Corp., Jersey City, N. J.—C. P., **970 kc.,** 5 KW, DA-night, unlimited.

Thursday, October 29

St. Louis University, St. Louis, Mo.—Modification of C. P. for extension of completion date, **45100 kc.,** 13,000 square miles, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KVOS—KVOS, Inc., Bellingham, Wash.—Granted modification of construction permit for extension of completion date to April 30, 1943, of construction permit to install new equipment, directional antenna, move transmitter, increase power from 250 watts to 1 KW, using directional antenna, and change frequency from **1230 kc.** to **790 kc.** (B5-MP-1582). Denied request for special service authorization to operate on the frequency **790 kc.** (B5-SSA-25).

KPAB—Mervel M. Valentine (assignor), Howard W. Davis, J. K. Beretta and W. W. McAllister, d/b as Laredo Broadcasting Co. (assignee), Laredo, Tex.—Granted consent to assignment of license for station KPAB from Mervel M. Valentine to the Laredo Broadcasting Co., for a total consideration of $14,450 (B3-AL-349). Dismissed application of Laredo Broadcasting Company for a construction permit for a new broadcast station requesting the facilities of KPAB (B3-P-3510).

WJZM—Roland Hughes (assignor), William Kleeman (assignee), Clarksville, Tenn.—Granted consent to assignment of license for station WJZM from Roland Hughes to William Kleeman, for a total consideration of $25,250 (B3-AL-353).

WMSL—Clarence H. Calhoun, Jr. (transferor), Mutual Savings Life Insurance Company (transferee), The Tennessee Valley Broadcasting Co., Inc., Decatur, Ala.—Granted consent to acquisition of control of The Tennessee Valley Broadcasting Co., Inc., Station WMSL, by Mutual Savings Life Insurance Co. through purchase of 60 shares common stock from Clarence H. Calhoun, Jr., for a total consideration of $4,000 (B3-TC-293).

DESIGNATED FOR HEARING

WEBR—WEBR, Inc., Buffalo, N. Y.—Designated for hearing application for construction permit for a booster station at North Tonawanda, N. Y., nighttime operation only, maximum power 100 watts (B1-P-3504).

WLAN—Thomas J. Watson, Endicott, N. Y.—Designated for hearing application for modification of construction permit which authorized a new standard broadcast station, for approval of transmitter site, operation without synchronous amplifier and installation of new transmitter (B1-MP-1370).

ACTION ON DOCKET CASES

The Commission announced adoption of an Order making final amended Findings of Fact and Conclusions (B-151), granting the application of Saginaw Broadcasting Company (WSAM), Saginaw, Michigan, for a modification of license to change operating assignment from 1230 kilocycles, 100 watts night, 250 watts day, specified hours, to 1400 kilocycles, 250 watts, unlimited time. (Docket No. 6127)

The Commission also announced its proposal to deny the application of West Allis Broadcasting Co., Inc., for a construction permit to establish a new standard broadcast station at West Allis, Wisconsin, to use 1480 kilocycles with 250 watts power, daytime only. In its Proposed Findings of Fact and Conclusions (B-157), the Commission concludes:

> "1. The policy announced by the Commission in the Memorandum Opinion of April 27, 1942, is based upon a recommendation of the Defense Communications Board (now Board of War Communications) and is for the purpose of conserving materials and the services of skilled persons to meet the requirements of the armed services of the United States during the present war. The policy specifically refers to the use and not to the acquisition of materials. The mere fact that the applicant has purchased or arranged to purchase all, or substantially all, of the materials necessary to construct the proposed station does not place it in a position where the application may be granted under the present policy.

"2. In view of the foregoing facts, public interest, convenience or necessity would not be served by the granting of the instant application."

FCC announced its proposal to deny the application of Louis G. Baltimore (WBRE), Wilkes-Barre, Pa., for a construction permit for a satellite station at Scranton, Pa., to operate with 100 watts power, simultaneously with Station WBRE. In its Proposed Findings of Fact and Conclusions (B-158), the Commission conclusions are substantially as quoted above in B-157.

FCC also announced its Decision and Order (B-155) granting the application of Yankee Network, Inc., Boston, Mass., for a construction permit for a high frequency (FM) broadcast station near Paxton, Mass., on Mt. Asnebumskit, with main studios in Boston, to operate on 44,300 kilocycles. This application was granted with the provision that the permit to be issued shall specify: (1) An area of 19,000 square miles within the 50 microvolt per meter contour of the projected station; and (2) the actual equipment now in use at Station W43B. (This station formerly operated as experimental station W1XOJ, and has operated under Special Service Authorization on a commercial basis as station W43B since April 1941. The granting of the instant application involves no construction.)

The Commission announced adoption of an Order making final its Findings of Fact and Conclusions (B-140), denying the application of the City of New York Municipal Broadcasting System to increase the hours of operation of Station WNYC on the frequency **830 kc.**, with its present power of 1 KW. The licensee sought to operate from 6 a. m. to 11 p. m., Eastern Standard Time, using directional antenna, instead of daytime until sunset at Minneapolis, as as present.

Commissioners Payne and Walker voted no to the above Order.

LICENSE RENEWALS

The following international broadcast stations were granted renewal of licenses for the period ending November 1, 1943:

KGEI, San Francisco; WBOS, Boston, Mass.; WCBX, WCDA, WCRC, New York City; WGEA, WGEO, Schenectady, N. Y.; WLWO, Cincinnati, Ohio, WNBI, WRCA, New York City.

WRUL—World Wide Broadcasting Corp., Boston, Mass.—Present license extended upon a temporary basis only, for the period ending December 1, 1942, pending determination upon application for renewal.

KGIW—E. L. Allen, Alamosa, Colo.—Granted renewal of license for the period ending in no event later than October 1, 1943 (B5-R-755).

WMUR—The Radio Voice of New Hampshire, Inc., Manchester, N. H.—Granted renewal of license for the period ending in no event later than June 1, 1944 (B1-R-1149).

Granted further extension of following licenses, upon a temporary basis only, pending determination upon application for renewal of license, in no event later than December 1, 1942:

KAND, Corsicana, Tex.; KBST, Big Spring, Tex.; KCMC, Texarkana, Tex.; KFBC, Cheyenne, Wyo.; KFPY, Spokane, Wash.; KFRO, Longview, Tex.; KFXM, San Bernardino, Calif.; KGEK, Sterling, Colo.; KGFW, Kearney, Nebr.; KGGF, Coffeyville, Kans.; KGKL, San Angelo, Tex.; KHBG, Okmulgee, Okla.; KID, Idaho Falls, Idaho; KIEM, Eureka, Calif.; KMAC, San Antonio, Tex.; KPLT, Paris, Tex.; KRBA, Lufkin, Tex.; KRBC, Abilene, Tex.; KSWO, Lawton, Okla.; KVGB, Great Bend, Kans.; KWFC, Hot Springs, Ark.; KWKH, Shreveport, La.; KXL, Portland, Ore.; WBBZ, Ponca City, Okla.; WBIR, Knoxville, Tenn.; WBNX, New York, N. Y.; WCAZ, Carthage, Ill.; WCBT, Roanoke Rapids, N. C.; WBRW, Welch, W. Va.; WCOC, Meridian, Miss.; WCOP, Boston, Mass.; WEDC, Chicago, Ill.; WFCI, Pawtucket, R. I.; WFHR, Wisconsin Rapids, Wisc.; WFIN, Findlay, Ohio; WFPG, Atlantic City, N. J.; WGES, Chicago, Ill.; WING, Dayton. Ohio; WJBW, New Orleans, La.; WLOF, Orlando, Fla.; WMRO, Aurora, Ill.; WNBZ, Saranac Lake, N. Y.; WNEL, San Juan, P. R.; WOCB, near Hyannis, Mass.; WPAX, Thomasville, Ga.; WSPB, Sarasota, Fla.; WTEL, Philadelphia, Pa.; WTRC, Elkhart. Ind.

W5XAU—WKY Radiophone Co., Oklahoma City, Okla.—Present license further extended upon a temporary basis for the period ending December 1, 1942, pending determination upon application for renewal.

W9XLA—KLZ Broadcasting Co., Denver, Colo.—Present license further extended upon a temporary basis for the period ending December 1, 1942, pending determination upon application for renewal.

W8XO—The Crosley Corp., near Mason, Ohio.—Present license further extended upon a temporary basis only, pending determination upon renewal, for the period ending December 1, 1942.

MISCELLANEOUS

WBBM—Columbia Broadcasting System, Inc., Chicago, Ill.—Granted authority to determine operating power by direct measurement of antenna power (B4-Z-1444).

KBON—MSB Broadcast Co., Omaha, Nebr.—Granted license to cover construction permit as modified, for new station (B4-L-1632). Granted authority to determine operating power by direct measurement of antenna power (B4-Z-1363).

WSJS—Piedmont Publishing Co., Winston-Salem, N. C.—Granted modification of construction permit as modified, which authorized change in frequency, increase power, new transmitter, move transmitter, and directional antenna for day and night use, for extension of completion date from October 22 to December 22, 1942 (B3-MP-1647).

W9XG—Purdue University, W. Lafayette, Ind.—Granted modification of construction permit, as modified, which authorized changes in equipment, frequencies, decrease in power and addition of aural channel using special emission for FM, for extension of completion date from September 24, 1942 to September 24, 1943 (B4-MPVB-88).

W9XPR—Balaban & Katz Corp., Chicago, Ill.—Granted license to cover construction permit as modified, which authorized new experimental television broadcast station; granted upon an experimental basis only, conditionally (B4-LVB-37).

W55M—The Journal Company (The Milwaukee Journal), Milwaukee, Wisc.—Granted license to cover construction permit as modified which authorized a new high frequency broadcast station (B4-LH-9).

KHSL—Golden Empire Broadcasting Co., Chico, Calif.—Granted modification of construction permit as modified, for installation of directional antenna for day and night use and increase in power, for extension of completion date from October 16 to November 16, 1942 (B5-MP-1653).

WOC—The Tri-City Broadcasting Co., Davenport, Iowa.—Granted modification of construction permit as modified, for change in frequency, increase in power, move transmitter, and install new transmitter and directional antenna for day and night use, for extension of completion date from October 19 to November 19, 1942 (B4-MP-1656).

KFSD—Airfan Radio Corp., Ltd., San Diego, Calif.—Granted petition to dismiss without prejudice application for modification of construction permit for extension of completion date (Docket No. 6245).

WJRM—Allegheny Broadcasting Corp., Elkins, W. Va.—Granted modification of construction permit, which authorized a new broadcast station, for approval of antenna and approval of studio site and transmitter site (B2-MP-1570).

WBBM—Columbia Broadcasting System, Inc., Chicago, Ill.—Granted license to cover construction permit as modified for new transmitter, changes in antenna system, and move transmitter and antenna (B4-L-1664).

KGDM—E. F. Peffer, Stockton, Calif.—Granted modification of construction permit as modified, which authorized change of frequency and hours of operation, increase power and installation of directional antenna for night use and new transmitter, for extension of completion date from October 20 to December 20, 1942 (B5-MP-1648).

WMC—Memphis Publishing Co., Memphis, Tenn.—Granted license to cover construction permit as modified, which authorized increase in power and changes in directional antenna for night use (B3-L-1716); granted authority to determine operating power by direct measurement of antenna power (B3-Z-1450).

WALB—Herald Publishing Co., Albany, Ga.—On the Commission's own motion, continued the consolidated hearing on applications for renewal of license, construction permit and assignment of license, now set for November 9, 1942, until November 19, 1942 (Docket Nos. 6398, 6399, 6400).

WFIL—WFIL Broadcasting Co., Philadelphia, Pa.—Granted petition to intervene and enlarge issues in re application of WJLS, Beckley, W. Va., in Docket No. 5972.

WDSU—WDSU, Inc., New Orleans, La.—Granted motion for order to take depositions in re application for construction permit (Docket 6331), and for renewal of license (Docket 6332).

Beauford H. Jester, Individually and as Trustee for W. W. Callan, et al., Waco, Texas.—Granted motion for permission to file deposition in re application for new station (Docket 6218).

Frontier Broadcasting Co., Area of Cheyenne, Wyo.—Granted petition for dismissal without prejudice of applications for two new relay stations (Dockets 6413 and 6414).

National Broadcasting Co.—Granted motion for dismissal without prejudice of applications for new relay broadcast stations at Addison, Ill., Area of Chicago, and three for the San Francisco area (Dockets 6411, 6412, 6423, 6424, 6425).

Blue Network Co., Inc., San Francisco, Calif.—Granted motion for dismissal without prejudice of application for new relay station (Docket 6426).

Blue Network Co., Inc., Hollywood, Calif.—Granted motion for dismissal without prejudice of application for new relay station (Docket 6385).

WDAE—Tampa Times Company, Tampa, Fla.—Granted petition to dismiss without prejudice application for construction permit (Docket 6340).

Northeastern Penna. Broadcasters, Inc., Wilkes-Barre, Pa.—Withdrew petition for specification of issues in re application for new station in Wilkes-Barre (Docket 6170).

K51L—St. Louis University, St. Louis, Mo.—Granted motion for a continuance of the hearing on application for modification of construction permit for high frequency broadcast station K51L to extend completion date from August 4, 1942, to February 4, 1943; hearing continued to October 29, 1942 (Docket No. 6386).

WLW—The Crosley Corp., Cincinnati, Ohio.—On the Commission's own motion, continued until November 26, 1942, the hearing on the application of WLW for modification of license to operate with 500 KW until local sunset, 50 KW at night, using the transmitter of experimental station W8XO (Docket No. 6341).

WHCU—Cornell University, Ithaca, N. Y.—Granted petition to dismiss without prejudice applications for construction permit to operate on **610 kc.,** 5 KW, directional antenna night, unlimited time (Docket No. 6416), and for construction permit to operate on **640 kc.,** 1 KW, directional antenna night, unlimited time. (Docket No. 6417)

John W. Choate, Leonore V. Choate, E. P. Nicholson, Jr., and John Wallbrecht, a partnership, Middlesboro, Ky.—Granted motion to dismiss without prejudice application for construction permit for new station to operate on **1230 kc.,** 250 watts, unlimited time. (Docket No. 6404)

WNYE—Board of Education, City of New York, Brooklyn, N. Y.—Granted modification of construction permit, as modified, which authorized change in equipment, frequency, power and emission for non-commercial educational station, for extension of completion date from October 20, 1942, to December 1, 1942 (B1-MPED-15).

WTNJ—WOAX, Inc., Trenton, N. J.—Granted motion for continuance of hearing to December 2, 1942, on applications of WTNJ for renewal of license and for modification of license (Dockets 5893 and 6161); City of Camden (WCAM), Camden, N. J., for renewal of license and for modification of license (Dockets 5361 and 6144); and Radio Industries Broadcast Co. (WCAP), Asbury Park, N. J., for renewal of license and for modification of license (Dockets 5778 and 6145).

WFAS—Westchester Broadcasting Corp., White Plains, N. Y.—Granted motion for continuance of hearing to November 25, 1942, on application for modification of license to operate on **1250 kc.,** 250 watts, unlimited time (Docket 6216).

APPLICATIONS FILED AT FCC

560 Kilocycles

KWTO—Ozarks Broadcasting Co., Springfield, Mo.—Modification of construction permit (B4-P-2827 as modified) which authorized change in hours of operation, move of transmitter and installation of directional antenna for night use, for extension of completion date from 11-19-42 to 5-18-43.

610 Kilocycles

KDAL—Red River Broadcasting Co., Inc., Duluth, Minn.—Construction permit to move former licensed main transmitter and antenna to Front Street and 63rd Ave., West, Duluth, Minn. (site of new main transmitter) to be used for auxiliary purposes only with power of 250 watts.

710 Kilocycles

WFTL—Ralph A. Horton, Fort Lauderdale, Fla.—Modification of construction permit (B3-P-3355 as modified) which authorized change in frequency, increase in power, installation of new transmitter, move transmitter and installation of directional antenna for night use for change in type of transmitter and change in type of frequency and phase monitors.

770 Kilocycles

WEW—The St. Louis University, St. Louis, Mo.—Special service authorization to operate unlimited time on **770 kc.,** using power of 1 KW.

1150 Kilocycles

WDEL—WDEL, Inc., Wilmington, Del.—Modification of construction permit (B1-P-2758 as modified) which authorized increase in power, installation of new transmitter and directional antenna for day and night use for extension of completion date from 10-17-42 to 11-17-42.

1260 Kilocycles

WNAC—The Yankee Network, Inc., Boston, Mass.—Modification of construction permit (B1-P-3445) which authorized increase in power, changes in equipment, and installation of directional antenna for night use for extension of commencement and completion dates from 5-10-42 and 11-10-42 to 11-10-42 and 180 days thereafter respectively.

1340 Kilocycles

KRBA—Ben T. Wilson, R. A. Corbett and Thomas W. Baker, co-partners d/b as Red Lands Broadcasting Assn., Lufkin, Texas.—Voluntary assignment of license to Darrel E. Yates.

1420 Kilocycles

WOC—The Tri-City Broadcasting Co., Davenport, Iowa.—Modification of construction permit (B4-P-2288 as modified) which authorized change in frequency, increase in power, move transmitter, install new transmitter and directional antenna for day and night use for extension of completion date from 10-19-42 to 11-19-42.

FM APPLICATION

W49FW—Westinghouse Radio Stations, Inc., Fort Wayne, Ind.—License to cover construction permit (B4-PH-63 as modified) which authorized construction of new high frequency broadcast station, in part in accordance with Commission Action of 8-4-42.

MISCELLANEOUS APPLICATIONS

NEW—Voice of Christian Youth, Detroit, Mich.—Authority to transmit programs from Wesley Methodist Church, Detroit, Mich., to Canadian Station CKLW, Windsor, Canada.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Koret, Inc., 33 East 33rd St., New York, manufacturer and distributor of ladies' handbags and other articles, is charged in a complaint with misrepresentation. (4848)

National Inheritance Service, 26 O'Farrell St., San Francisco, and O. F. Blaker, 4642 York Road, Baltimore, are charged in a complaint with misrepresentation and the use of unfair and deceptive acts and practices in commerce within the meaning of the Federal Trade Commission Act. (4849)

Perfect Manufacturing Co., doing business as the So-Lo Works, 3317 Madison Road, Cincinnati, engaged in the manufacture and sale of an adhesive cement designated "So-Luminum," is charged in a complaint with misrepresentation. (4856)

B. C. Remedy Co., Durham, N. C., engaged in the manufacture and sale of a medicinal preparation designated "BC" and "BC Headache Powders," is charged in a complaint with false advertising and misrepresentation. (4851)

Stanback Company, Ltd., Salisbury, N. C., manufacturers and distributors of a medicinal preparation designated "Stanback Headache Powders" and "Stanback," is charged in a complaint with false advertising. (4855)

Ulrici Medicine Co., Inc., and Trans-Pac Services, Inc., located, respectively, at 233 West 14th St., New York and 4-20 47th Avenue, Long Island, N. Y., are charged in a complaint with misrepresentation. (4853)

World's Medicine Co., P. O. Box 291, Indianapolis, engaged in the sale and distribution of a medicinal preparation designated, "World's Tonic," is charged in a complaint with misrepresentation and false advertising. (4847)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

L. L. Edwards, Shelbyville, Tenn., dealer in nut products and candy to jobbers and retail dealers, has been ordered to cease and desist from the use of lottery methods in the sale and distribution of his products. (4797)

Grand Rapids Factory Show Rooms, Inc., Meyer Zisblatt and Sam Zisblatt, Paterson, N. J., engaged in selling and distributing household furniture, have been ordered to cease and desist from misrepresentation of their products. (4626)

Montgomery Ward & Co., Inc., Chicago, has been ordered to cease and desist from certain misrepresentations in the sale of cosmetics. (4728)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Columbia Manufacturing Co., 22 West 32nd St., New York, engaged in the sale and distribution of billfolds and other leather goods, has stipulated to cease and desist from use of the word "Manufacturing," or other word or words of like meaning as a part of their trade name, and from use of the words "Manufacturing," "Manufacturers," "We make" or other words of like meaning so as to convey the belief that they make or manufacture the products sold by them or that they actually own or operate or control a plant or factory in which the products are manufactured. (3544)

National Educational Board, Educational Information Bureau, Educational Information Association and Club Mailers, 236 West 55th St., New York, engaged in soliciting, obtaining and disseminating so-called mailing lists consisting of lists of names of high school graduates, has stipulated to cease and desist from use of the trade names "National Educational Board," "Educational Information Bureau," or "Educational Information Association" and from use of any statement or representation implying that his business is conducted by or under the supervision or control of any national or State educational board or bureau or by any board, bureau or association of schools or colleges and from representing by use of the phrase "Approved by the New York Board of Education" or any other statement or representation, that the business conducted by him has been approved or endorsed by the New York Board of Education or by any Federal, State, or other educational bureau or department. (3545)

NAB Reports
The NATIONAL ASSOCIATION OF BROADCASTERS

1626 K STREET, N. W. WASHINGTON, D. C. Vol. 10, No. 43, October 30, 1942

RETAIL PROMOTION CAMPAIGN LAUNCHED

After six months of preliminary but exhaustive research, the Retail Promotion Committee of the National Association of Broadcasters, of which Paul W. Morency of WTIC-Hartford, Conn., is chairman, has instituted an industry-wide campaign to finance the preparation of a study that will analyze the present-day and probable future problems of department stores, and other retail establishments, in relation to the opportunity that broadcasting offers to the amelioration of those problems.

Preliminary to the exploration of this problem by the broadcasters the assistance and cooperation of the Sales Promotion Division of the National Retail Dry Goods Association was enlisted. This organization made a nationwide survey of the use of radio by retailers and the results of their experience.

The research, analysis and presentation will be developed by Sheldon R. Coons, general business counsel of New York City, who was formerly vice president and merchandise manager of Gimbel Bros., Inc., and for ten years executive vice president of Lord & Thomas, with the assistance of outstanding leaders in the various fields that have a bearing on the subject. Mr. Coons, under the direction of the committee, has conducted the preliminary research and study since his retention as counsel early in July.

The proposed plan contemplates investigation of every factor which appears likely to influence retailing during the stresses and strains of this period of wartime priorities, rationing and restrictions.

The investigation will also include an analysis of some of the factors that are likely to influence the trend and character of retailing after the war is won.

The keynote of the various plans and clinics, conducted by the Office of Price Administration in conjunction with leading representatives of retailers, has been the urgent need to reduce the costs of retail distribution to enable retailers to survive under price ceilings. This thesis is the keynote of the presentation to be prepared by Mr. Coons. In many fields of distribution, broadcast advertising, well and wisely used, has enabled manufacturers and distributors to lower the costs of distribution. In pursuit of that goal, the presentation will include a complete and factual study of the use of broadcasting adver-

RETAIL PROMOTION CAMPAIGN LAUNCHED

(Continued from page 617)

tising by various types of accounts, including recent case histories of its use in the field of retail distribution.

Among the subjects in this portion of the presentation are:

Where does radio fit into the retailers' problems?
What is the retailers' problem in the use of radio as revealed by the N.R.D.G.A. survey?
How should you buy radio time?
How should you measure a radio audience?
How can you insure your radio investment?
How do you set up a radio department in your store?
What can you expect from your radio station?

Preliminary discussions with leading retailers indicate that the answer to every single one of those questions is of vital interest right now to all retail advertisers. The plan proposed by the Retail Promotion Committee of NAB will seek the answers to all of these questions and endeavor to present the answers in an easily understood and fully authenticated fashion.

During the preliminary discussions and the preparation of the outline of the proposed plan, the Retail Promotion Committee of NAB has worked very closely with the Sales Promotion Division of the N.R.D.G.A. The final outline and purpose have received the unanimous and enthusiastic endorsement of the directors of that division of N.R.D.G.A.

In a letter today to all commercial radio stations in the United States, Chairman Morency pointed out that while the preliminary thinking and work on this plan has been conducted under the direction of NAB, participation in the plan is available to NAB member and non-member stations alike, as well as to Canadian broadcasters. Enclosed with the letter was a pledge blank and schedule of charges for participation, based on gross income of the individual stations during 1941.

During the series of NAB district meetings, which has just gotten under way, details of the proposed plan are being explained to station executives and sales managers by Lewis H. Avery, Director of the Department of Broadcast Advertising of NAB.

The details of the presentation will be perfected by Mr. Coons with the guidance of the committee when the necessary finances are assured. The campaign to secure funds will, in addition to the letters heretofore mentioned, be carried on at the District meetings. Indicative of the enthusiasm of the industry, the broadcasters of the Fourth and Fifth Districts have unanimously endorsed it and pledged their whole-hearted support.

The tentative plan of the committee as outlined by Mr. Coons contemplates a motion slide, transcribed and live talent packaged show with a trained master of ceremonies to handle the presentation. For the use of those communities and areas who do not desire outside talent there will be an adaptation that may be staged by local broadcasters without outside assistance. There will also be a desk presentation for the use of stations in dealing directly with retail establishments.

More than passing interest in the plan has been evidenced in retail circles. Not only has the Sales Promotion Division of NRDGA rendered helpful assistance in the preliminary planning, but it has pledged its cooperation to secure the attendance at the various presentations of the key personnel of department stores and other retail establishments.

With the united efforts of broadcasters throughout the nation and in the various communities and areas, it is confidently predicted that this Retail Promotion plan will contribute much to both retailers and radio stations. With the preliminary work behind it, Mr. Morency's committee is concentrating its efforts upon the financing phases of the project. A goal of $125,000 to $150,000 has been set to be raised in accordance with the following classification schedule:

Revenue Classification *	*Group Classification*	*Allocation Per Station*
Under $15,000	A	$25.00
15,000- 20,000	B	30.00
20,000- 25,000	C	35.00
25,000- 30,000	D	40.00
30,000- 35,000	E	45.00
35,000- 40,000	F	50.00
40,000- 45,000	G	55.00
45,000- 50,000	H	60.00
50,000- 55,000	I	70.00
55,000- 60,000	J	80.00
60,000- 65,000	K	90.00
65,000- 70,000	L	100.00
70,000- 80,000	M	125.00
80,000- 90,000	N	175.00
90,000- 99,000	O	250.00
100,000-200,000	P	500.00
200,000-500,000	Q	600.00
Over 500,000	R	750.00

---

* Based on 1941 income, including network billings, but less frequency and agency discounts, if any.

Pledges only are being accepted at this time. No payments are being asked until a sufficient amount has been pledged to definitely assure the successful financing of the entire plan. Reports on the progress of the campaign will be given in NAB REPORTS each week.

Here is something that deserves the considered and favorable action of every broadcaster in the nation. In addition to promising radio a larger share of the retail advertising budgets, the success of this plan would bring in to radio many advertisers of nationally distributed merchandise in the clothing field which have not heretofore used radio. From this standpoint both large and small stations stand in a position to derive direct benefits. Every station manager is asked to carefully study this plan as outlined in the letter sent out by Chairman Morency and the committee on Friday, October 30.

In addition to Chairman Morency, the Retail Promotion Committee of NAB includes: John M. Outler, Jr., WSB; Dietrich Dirks, KTRI; William C. Gillespie, KTUL; Sherman D. Gregory, WEAF; Arthur H. Hayes, WABC; Walter Johnson, WTIC.

Salaries Stabilized

Salaries as well as wages in all establishments employing eight or more persons are now "stabilized."

The effective date of stabilization of salaries under $5000 was October 27. The effective date for salaries of $5000 or more was October 3.

No blanket or general salary increases are permissible without the approval of either the War Labor Board or the Commissioner of Internal Revenue (Treasury Department).

Individual increases without the approval of either the WLB or the Commissioner of Internal Revenue are permissible, however, when the increases are made as a result of:

(1) individual promotions or reclassifications,
(2) individual merit increases within established salary ranges,
(3) operation of an established plan of salary increases based on length of service,
(4) increased productivity under incentive plans, or
(5) "such other reasons or circumstances as may be prescribed in orders, rulings, or regulations, promulgated under the authority of these regulations."

The WLB is to handle salaries under $5,000 except those of bona fide executive, administrative and professional employees. These and salaries over $5,000 are to be handled by the Commissioner of Internal Revenue. It can be assumed that the Wage and Hour definitions of executive, administrative and professional will be applied.

We suggest it would be well worth your while to read carefully the text of the order, which follows:

TITLE 32—NATIONAL DEFENSE

Chapter XVIII—Office of Economic Stabilization

Subchapter A—Office of the Director of Economic Stabilization

Part 4001—Wages and Salaries

By virtue of the authority vested in the President by the Constitution and the laws of the United States, and particularly by the Act of October 2, 1942, entitled "An Act to amend the Emergency Price Control Act of 1942, to aid in preventing inflation, and for other purposes" (Public No. 729, 77th Congress, 2d Session), the following regulations are hereby promulgated.

Sec. 4001.1. *Definitions.*—When used in these regulations, unless otherwise distinctly expressed or manifestly incompatible with the intent thereof—

(a) The term "Act" means the Act of October 2, 1942, (Public No. 729, 77th Congress) entitled "An Act to amend the Emergency Price Control Act of 1942, to aid in preventing inflation, and for other purposes".
(b) The term "Board" means the National War Labor Board created by Executive Order No. 9017, dated January 12, 1942 (7 F. R. 237).
(c) The term "Commissioner" means the Commissioner of Internal Revenue.
(d) The term "Code" means the Internal Revenue Code, as amended and supplemented.
(e) The term "salary" or "salary payments" means all forms of direct or indirect compensation which is computed on a weekly, monthly, annual or other comparable basis, except a wage basis, for personal services of an employee irrespective of when rendered, including bonuses, additional compensation, gifts, loans, commissions, fees, and any other remuneration in any form or medium whatsoever (excluding insurance and pension benefits in a reasonable amount).
(f) The term "salary rate" means the rate or other basis at which the salary for any particular work or service is computed either under the terms of a contract or agreement or in conformity with an established custom or usage.
(g) The term "wages" or "wage payments" means all forms of direct or indirect compensation which is computed on an hourly or daily basis, a piece-work basis, or other comparable basis, for personal services of an employee irrespective of when rendered, including bonuses, additional compensation, gifts, commissions, loans, fees, and any other remuneration in any form or medium whatsoever (but excluding insurance and pension benefits in a reasonable amount).
(h) The term "insurance and pension benefits in a reasonable amount" means

> (1) contributions by an employer to an employees' trust or under an annuity plan which meets the requirements of section 165(a) of the Code, and
> (2) amounts paid by an employer on account of premiums on insurance on the life of the employee which amounts are deductible by the employer under section 23(a) of the Code, except that if such amounts are includible in the gross income of the employee under the Code, the amount in respect of each employee may not exceed five per cent of the employee's annual salary or wages determined without the inclusion of insurance and pension benefits.

(i) The terms "approval by the Board" and "determination by the Board" shall, except as may be otherwise provided in the regulations or orders of the Board, include an approval or determination by an agent of the Board duly authorized to perform such act; and such approval or determination, if subsequently modified or reversed by the Board, shall nevertheless for the purposes of these regulations, be deemed to have been continuously in effect from its original date until the first day of the payroll period immediately following the reversal or modification or until such later date as the Board may direct.
(j) The terms "approval by the Commissioner" and "determination by the Commissioner" shall, except as may be otherwise provided in regulations prescribed by the Commissioner, include an approval or determination by an agent of the Commissioner duly authorized to perform such act; and such approval or determination, if subsequently modified or reversed by the Commissioner, shall nevertheless for the purpose of these regulations, be deemed to have been continuously in effect from its original date until the first day of the payroll period immediately following reversal or modification or until such later date as the Commissioner may direct.

Sect. 4001.2. *Authority of National War Labor Board*—The Board shall, subject to the provisions of sections 1, 2, 3, 4, 8, and 9 of Title II of Executive Order No. 9250, of October 3, 1942, have authority to determine whether any—

(a) Wage payments, or
(b) Salary payments to an employee totaling in amount not in excess of $5,000 per annum where such employee

> (1) in his relations with his employer is represented by a duly recognized or certified labor organization, or
> (2) is not employed in a bona fide executive, administrative or professional capacity

are made in contravention of the Act, or any rulings, orders or regulations promulgated thereunder. Any such determination by the Board, made under rulings and order issued by it, that a payment is in contravention of the Act, or any rulings, orders, or regulations promulgated thereunder, shall be conclusive upon all Executive Departments and agencies of the Government in determining the costs or expenses of any employer for the purpose of any law or regulation, either heretofore or hereafter enacted or promulgated, including the Emergency Price Control Act of 1942 or any maximum price regulation thereof, or for the purpose of calculating deductions under the revenue laws of the United States, or for the purpose of determining costs or expenses under any contract made by or on behalf of the United States. Any determination of the Board made pursuant to the authority conferred on it shall be final and shall not be subject to review by The Tax Court of the United States or by any court in any civil proceedings.

Sec. 4001.3. *Rules, Orders and Regulations of Board*—The Board may make such rulings and issue such orders or regulations as it deems necessary to enforce and otherwise carry out the provisions of these regulations.

Sec. 4001.4. *Authority of the Commissioner of Internal Revenue*—The Commissioner shall have authority to determine, under regulations to be prescribed by him with the approval of the Secretary of the Treasury, whether any salary payments other than those specified in paragraph (b) of section 4001.2 of these regulations are made in contravention of the Act, or any regulations or rulings promulgated thereunder. Any such determination by the Commissioner, made under such regulations, that a payment is in contravention of the Act, or any rulings or regulations promulgated thereunder, shall be conclusive upon all Executive Departments and agencies of the Government in determining the costs or expenses of any employer for the purpose of any law or regulations, either heretofore or hereafter enacted or promulgated, including the Emergency Price Control Act of 1942 or any maximum price regulation thereof, or for the purpose of calculating deductions under the revenue laws of the United States, or for the purpose of determining costs or expenses under any contract made by or on behalf of the United States. Any determination of the Commissioner made pursuant to the authority conferred on him shall be final and shall not be subject to review by The Tax Court of the United States or by any court in any civil proceedings. No increase in a salary rate approved by the Commissioner shall result in any substantial increase of the level of costs or shall furnish the basis either to increase price ceilings of the commodity or service involved or to resist otherwise justifiable reductions in such price ceilings.

Sec. 4001.5. *Rules and Regulations of Commissioner*—The Commissioner may prescribe such regulations with the approval of the Secretary of the Treasury, and make such rulings as he deems necessary, to enforce and otherwise carry out the provisions of these regulations.

Sec. 4001.6. *Salary Increases*—In the case of a salary rate of $5,000 or less per annum existing on the date of the approval of these regulations by the President and in the case of a salary rate of more than $5,000 per annum existing on October 3, 1942, no increase shall be made by the employer except as provided in regulations, rulings, or orders promulgated under the authority of these regulations. Except as herein provided, any increase made after such respective dates shall be considered in contravention of the Act and the regulations, rulings, or orders promulgated thereunder from the date of the payment if such increase is made prior to the approval of the Board or the Commissioner, as the case may be.

In the case, however, of an increase made in accordance with the terms of a salary agreement or salary rate schedule and as a result of

(a) individual promotions or reclassifications,
(b) individual merit increases within established salary rate ranges,
(c) operation of an established plan of salary increases based on length of service,
(d) increased productivity under incentive plans,
(e) operation of a trainee system, or
(f) such other reasons or circumstances as may be prescribed in orders, rulings, or regulations, promulgated under the authority of these regulations,

no prior approval of the Board or the Commissioner is required. No such increase shall result in any substantial increase of the level of costs or shall furnish the basis either to increase price ceilings of the commodity or service involved or to resist otherwise justifiable reductions in such price ceilings.

Sec. 4001.7. *Decreases in salaries of less than $5,000.*—In the case of a salary rate existing as of the close of October 3, 1942, under which an employee is paid a salary of less than $5,000 per annum for any particular work, no decrease shall be made by the employer below the highest salary rate paid for such work between January 1, 1942, and September 15, 1942, unless to correct gross inequities or to aid in the effective prosecution of the war. Any decrease in such salary rate after October 3, 1942, shall be considered in contravention of the Act and the regulations, rulings, or orders promulgated thereunder if such decrease is made prior to the approval of the Board or the Commissioner, as the case may be.

Sec. 4001.8. *Decreases in salaries of over $5,000.*—In the case of a salary rate existing as of the close of October 3, 1942, under which an employee is paid a salary of $5,000 or more per annum, no decrease in such rate made by the employer shall be considered in contravention of the Act and the regulations promulgated thereunder (see section 5 (b) of the Act); provided, however, that if by virtue of such decrease the new salary paid to the employee is less than $5,000 per annum, then the validity of such decrease below $5,000 shall be determined under the provisions of section 4001.7 of these regulations.

Sec. 4001.9. *Limitation on Certain Salaries.*—(a) No amount of salary (exclusive of any amounts allowable under paragraphs (b) and (c) of this section) shall be paid or authorized to be paid to or accrued to the account of any employee or received by him during the taxable year which, after reduction by the Federal income taxes on the amount of such salary, would exceed $25,000. The amount of such Federal income taxes shall be determined (1) by applying to the total amount of salary (exclusive of any amounts allowable under paragraphs (b) and (c) of this section) paid or accrued during the taxable year, undiminished by any deductions, the rates of taxes imposed by Chapter 1 of the Code (not including section 466) as if such amount of salary were the net income (after the allowance of credits applicable thereto), the surtax net income, and the Victory tax net income, respectively, and (2) without allowance of any credits against any of such taxes.

(b) In any case in which an employee establishes that his income from all sources is insufficient to meet payments customarily made to charitable, educational or other organizations described in section 23 (o) of the Code, without resulting in undue hardship, then an additional amount sufficient to meet such payments may be paid or authorized to be paid to or accrued to the account of any employee or received by him during the taxable year even though it exceeds the amount otherwise computed under paragraph (a).

(c) In any case in which an employee establishes that, after resorting to his income from all sources, he is unable, without disposing of assets at a substantial financial loss resulting in undue hardship, to meet payments for the following:

(1) Required payments (excluding accelerated payments) by the employee during the taxable year on any life insurance policies on his life which were in force on October 3, 1942,
(2) Required payments (excluding accelerated payments) made by the employee during the taxable year on any fixed obligations for which he was obligated on October 3, 1942,
(3) Federal income taxes of the employee for prior taxable years which are paid during the taxable year, not including Federal income taxes on the allowance under paragraph (a) for any prior year, an additional amount sufficient to meet such payments may be paid or authorized to be paid to or accrued to the account of any employee or received by him during the taxable year, even though it exceeds the amount otherwise computed under paragraph (a).

(d) In the case of an individual who is an employee of more than one person, the aggregate of the salaries received by such individual shall, under such circumstances as may be set forth in regulations promulgated under the authority of these regulations, be treated as if paid by a single employer.

(e) No amount of salary shall be paid or authorized to be paid to or accrued to the account of any employee or received by him after the date of approval of these regulations by the President and before January 1, 1943, if the total salary paid, authorized, accrued or received for the calendar year 1942 exceeds the amount of salary which would otherwise be allowable under paragraph (a) of this section and also exceeds the total salary paid, authorized, accrued or received for the calendar year 1941.

(f) Except as provided in paragraph (e) of this section, the provisions of this section shall be applicable to salary paid or accrued after December 31, 1942, regardless of when authorized and regardless of any contract or agreement made before or after such date.

Sec. 4001.10. *Effect of unlawful payments.*—(a) If any wage or salary payment is made in contravention of the Act or the regulations, rulings or orders promulgated thereunder, as determined by the Board or the Commissioner, as the case may be, the entire amount of such payment shall be disregarded by the Executive Departments and all other agencies of the Government in determining the costs or expenses of any employer for the purpose of any law or regulation, including the Emergency Price Control Act of 1942, or any maximum price regulation thereof, or for the purpose of calculating deductions under the revenue laws of the United States, or for the purpose of determining costs or expenses of any contract made by or on behalf of the United States. The term "law or regulations" as used herein includes any law or regulation hereafter enacted or promulgated. In the case of wages or salaries decreased in contravention of the Act or regulations, rulings or orders promulgated thereunder, the amount to be disregarded is the amount of the wage or salary paid or accrued. In the case of wages or salaries increased in contravention of the Act or regulations, rulings or orders promulgated thereunder, the amount to be disregarded is the amount of the wage or salary paid or accrued and not merely an amount representing an increase in such wage or salary. In the case of a salary in excess of the amount allowable under section 4001.9 of these regulations which is paid or accrued to an employee during his taxable year in contravention of the Act or regulations, rulings or orders promulgated thereunder, the amount to be disregarded is the full amount of such salary and not merely the amount representing the excess over the amount allowable under such section 4001.9.

(b) Payments made or received in violation of any regulations, rulings or orders promulgated under the authority of the Act are subject to the penal provisions of the Act.

Sec. 4001.11. *Exempt employers.*—The provisions of sections 4001.6, 4001.7 and 4001.8 of these regulations shall apply only in the case of an employer who employs more than eight individuals.

Sec. 4001.12. *Salary Allowances under Internal Revenue Code.*—No provision of these regulations shall preclude the Commissioner from disallowing as a deduction in computing Federal income tax any compensation paid by an employer (regardless of the number of employees and of the amount paid to any employee) in excess of a "reasonable allowance" in accordance with the provisions of section 23 (a) of the Code.

Sec. 4001.13. *Statutory Salaries and Wages.*—These regulations shall be applicable to any salary or wages paid by the United States, any State, Territory or possession, or political subdivision thereof, the District of Columbia, or any agency or instrumentality of any one or more of the foregoing, except where the amount of such salary or wages is fixed by statute.

Sec. 4001.14. *Territories and Possessions.*—The Board and the Commissioner shall have the authority to exempt from the operation of these regulations any wages or salaries paid in any Territory or possession of the United States where deemed necessary for the effective administration of the Act and these regulations.

Sec. 4001.15. *Regulations of Economic Stabilization Director.*—The Director shall have authority to issue such regulations as he deems necessary to amend or modify these regulations.

Sec. 4001.16. *Effect of Executive Order No. 9250.*—To the extent that the provisions of Executive Order No. 9250, dated October 3, 1942 (7 F. R. 7871) are inconsistent with these regulations, such provisions are hereby superseded.

James F. Byrnes,
Economic Stabilization Director.

Approved:
Franklin D. Roosevelt,
The White House.
October 27, 1942.

PLEASE ANSWER PROMPTLY

Under date of October 22, the FCC sent out that section of its 1942 financial questionnaire dealing with employees and compensation.

This information when compiled will be invaluable to any station wishing to make any general salary adjustments.

The NAB joins the FCC in urging prompt returns. It is to the advantage of every station to do so.

COST OF LIVING

The U. S. Labor Department reports that the cost of living increased 0.3 per cent from August 15 to September 15, and on the latter date was 20 per cent higher than it was in August, 1939.

WAGE-HOUR INSPECTIONS

The Wage and Hour Division has announced that hereafter it will confine its inspections to the period since October 24, 1940. Violations prior to that time will no longer be checked, but there is nothing in the Division's announcement to preclude employees from bringing suit against their employers for violations before October 24, 1940.

CLARK BILL

Senator Clark (D.-Idaho) on October 23 introduced the following bill (S. 2874) to remove the AF of M recording ban:

To prohibit certain contracts, agreements, conspiracies, and combinations which prevent the making of recordations for use by radio broadcasting stations and coin-operated phonographs.

Whereas radio broadcasting is an essential public service and is strongly affected with the national public interest; and

Whereas radio broadcasting is of great importance to the successful prosecution of the war; and

Whereas the use of recorded music by radio stations is essential to the optimum utilization of radio facilities; and

Whereas the cessation of the manufacture of phonograph records and electrical transcriptions would threaten to eliminate the source of newly recorded music: Therefore

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That any provision in the Act entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes", approved October 15, 1914, to the contrary notwithstanding, it shall be unlawful for any person or any group or organization of persons, or the officers, representatives, or members thereof, to make any contract or agreement, or to engage in any combination or conspiracy, to refuse to make or manufacture or refuse to engage in the making or manufacture of phonograph records, electrical transcriptions, or other forms of recordation, if a purpose or effect of the contract, agreement, conspiracy, or combination is to limit or curtail the supply or use of phonograph records, electrical transcriptions, or other form of recordation by radio-broadcasting stations or coin-operated phonographs: *Provided*, That no such contract, agreement, conspiracy, or combination shall be considered unlawful if it is based on a dispute concerning compensation, hours, health, safety, or conditions of employment.

SEC. 2. Any violation of the provisions of this Act shall be punishable by a fine not exceeding $5,000 or by imprisonment for not more than one year, or both.

SEC. 3. This Act shall remain in force during the continuance of the present war and for six months after termination of the war, or until such earlier time as the Congress by concurrent resolution or the President may designate.

War Problems

MANPOWER

An official of Selective Service National Headquarters, testifying before the Senate Military Affairs Committee early this week, stated the manpower problems of the nation can be expected to become critical in January or February of 1943.

As the manpower situation becomes more acute it is believed that broadcasters, along with other industries, will broaden the employment opportunities for women.

Partial tabulation of the early replies to the NAB Manpower Survey indicate an increase in the employment of women technicians and operators of more than 1200%, during the period covered by the survey. This trend clearly indicates the importance of proper selection and training of women for these and other positions in broadcast stations.

An article entitled "Do You Understand Women?" appearing in the September 1942 issue of RADIO RETAILING TODAY contains many helpful suggestions and is reprinted with the publisher's permission.

"Day by day, more and more men are giving up their peacetime pursuits to 'join the colors' and take an active part in fighting to preserve our way of life.

Yet business and industry, must go on. It must go on to provide the civil population with the necessities of life and of living.

Men must do our fighting on the battle fronts, and women must do their full share in business, in production and in taking a man's job on the home front.

Women are taking the places of more fighting men in the Army. The WAACs will make a real contribution to Army administration. The WAVES are soon to take their places in the shore establishment of the Navy.

Women are taking the places of men in industry, in manufacturing everything from zippers to airplanes, and doing a fine job.

Women have made more radio tubes and radio sets than men ever will.

Many business men still harbor some prejudices against women in some jobs, but these are fast disappearing in the light of their performance. Light work, hard work, hand work, head work, machine work, office work, all now are women's work.

Certainly, you have to train them, thoroughly and carefully. But first you have to *select* them.

Natural Aptitudes

Most women have a high degree of hand dexterity, and fine coordination of hand and eye. But some are clumsy and awkward. Most women have infinite patience, and excel at detail and repetitive work.

But many do not.

You'll run into just as much trouble putting the wrong woman on a job as you would in putting the wrong man on the same job.

Because most women have not had the experience, you must be prepared to train them to bring out the full advantage of their natural aptitudes.

In the selection of personnel there is no good reason why sex should be any more important a factor than nationality, or religion, given equal education and intelligence.

Seek Necessary Qualifications

Bear in mind when selecting women to replace men, that "beauty" is the poorest of all measures of ability. Very often, you will find, that "beauty and brains" are like "oil and water." Neatness is highly desirable in any employee.

Women must be selected for their job as workers, not as women and they must be trained, disciplined and supervised on the same basis.

It's true, of course, that the female psychology is somewhat different from that of the male. And so the methods of discipline and supervision must be adjusted accordingly.

Women should be tested and fitted to their jobs by the same standards as men.

That is, the same qualities are necessary to fit a woman for a particular job as for a man. You may find that quality more frequently in women than in men. But they may not always be present. So you must *look* for them.

Careful Supervision

Women in business expect to be treated like the workers and humans they are, with respect and impersonally. Preferences to some are quickly resented by others and in a way which can quickly cause trouble and confusion. Rules, regulations, privileges must be uniform.

Most women do not have as high a sense of safety as do men; they shortcut the safety rules, have more minor accidents, fewer really serious ones, than do men.

Thus they create the necessity for more constant and careful supervision on machine or productive work. And this supervision presents a different problem where women are involved.

They are more sensitive, more nervous than men. Sharp criticism for an error may produce hysterics which lasts for 10 minutes, "nerves" which lasts for 10 days and resentment which lasts for 10 weeks. A woman is always to be preferred to a man, as a supervisor of women.

More women are working today than ever before, and their number is fast increasing. Women have tackled every job within their physical ability, and their records of performance are outstanding, in every line of endeavor.

Getting Results

These records are uniformly better in the larger organizations than in the smaller ones. This is true because in the larger organizations women are more carefully selected, their individual abilities more accurately measured, their assignment to jobs more scientifically done, their training more thoroughly given.

And this boils down to the fact that in most jobs, the factors of intelligence, education, training, are far more important than sex in fitting a worker to a job.

Not Permanent Prospects

But women are women—for all that, and differ from men in viewpoint, and in emotional equilibrium. These factors must always be kept in mind.

Business, or industry to most women is a temporary thing. For nature has endowed women with the maternal instinct, which must look upon home, and mate, and family, as the permanent state to which they aspire. There are some exceptions, of course.

And so, in employing women, do not make the mistake of placing too much dependence upon any one, so far as certainty of continuity of service is concerned.

The Fundamentals

A woman seldom ceases looking for "her man." And this factor must be watched in business, for it can cause waste and inefficiency when "boy meets girl" in the same business, to a degree that is surprising.

To expect the impossible from women is foolish. But women have "made good" in every job they've tackled, and they will make good in yours, too, if you try them, under fair conditions and handle them with intelligence and understanding."

VACUUM TUBES

The American Radio Relay League is cooperating with the NAB Engineering Department in an effort to secure transmitting tubes from amateurs for broadcast station use. Every tube secured will in turn release a new tube for military use.

It is probable tubes of certain types which have been difficult to obtain from manufacturers will be made available in considerable quantities.

The plan will become effective upon the publication of the December issue of QST, official organ of the League. Thus amateur radio will make another worthwhile contribution to the war effort.

BWC CONSERVATION PLAN

The FCC is expected to take early action on BWC's equipment conservation plan. Details of the plan are not available. However, the BWC chairman, James Lawrence Fly, made the following statement at his press conference:

"I think I ought to stress again that whatever is done, there will not result any lessening of the coverage or radio stations due to change in the various rules in the operation of the equipment. We will have the same effective output and same coverage we have had heretofore. You see, some of the rules which we have had regulating the equipment have necessarily been very strict, and we have got to a point now where, by changing those rules and by the consequent change in method of operation, we can get more effective output, so I think we can increase the life of the equipment materially without affecting coverage at all."

PRIORITY FOR URGENT TOLL CALLS

Effective November 1, 1942, certain urgent telephone toll calls may be assigned priority by broadcasters originating the calls.

The nature of the communication and the need for prompt contact determines the priority applicable as set forth in Order Number 20, of the Board of War Communications.

An informant at BWC stated broadcast stations are considered "Preferred Callers" under section 2 of the order reading "essential services such as communications," etc.

The order is self-explanatory and should be carefully studied. Telephone companies will provide authorized subscribers with detailed instructions covering the procedure to follow in placing priority calls.

The order reads as follows:

WHEREAS, The Board of War Communications has determined that the national defense and security and the successful conduct of the war demand that certain telephone toll calls relating to the war effort or public safety be given preferred handling;

NOW, THEREFORE, By virtue of the authority vested in the Board by Executive Order No. 8964 of December 10, 1941, prescribing regulations governing the preference and priority of communications, and by virtue of the authority vested in the Board by Executive Order No. 9089 of March 6, 1942, prescribing regulations governing the use, control, supervision and closing of stations and facilities for wire communications;

IT IS HEREBY ORDERED AS FOLLOWS:

1. *Priorities*

On and after November 1, 1942, urgent toll calls placed with commercial telephone systems by the authorized persons or agencies designated in Paragraph 2 shall upon request be given priority over all other toll calls in accordance with the provisions of, and in the order set forth in subparagraph (a), (b) and (c) below:

(a) Priority 1 shall be given to calls which require *immediate* completion for war purposes or to safeguard life or property *and* which relate to one or more of the following matters:

(1) Arrangements for moving armed forces during combat operations.
(2) Extremely urgent orders to armed forces.
(3) Immediate dangers due to the presence of the enemy.
(4) Hurricane, flood, earthquake or other disaster materially affecting the war effort or public security.

Where necessary for the immediate completion of a call having Priority 1, any conversation in process (other than one having Priority 1) may be interrupted.

(b) Priority 2 shall be given to calls which require *immediate* completion for the national defense and security, the successful conduct of the war, or to safeguard life or property other than those specifically described in Paragraph 1(a).

(c) Priority 3 shall be given to calls which require *prompt* completion for the national defense and security, the successful conduct of the war, or to safeguard life or property and which involve matters of the following type:

(1) Important governmental functions.
(2) Machinery, tools or raw materials for war plants.
(3) Production of essential supplies.
(4) Maintenance of essential public services.
(5) Supply or movement of food.
(6) Civilian defense or public health safety.

2. *Preferred Callers*

The following persons and agencies are designated as authorized persons or agencies entitled to use telephone toll priorities where such call is required in the manner and for a purpose specified above.

The President of the United States, the Vice President, Cabinet officers, Members of Congress, Army, Navy, Aircraft Warning Service, Federal, State and Municipal Government Departments and Agencies, Embassies, Legations, and Commissions of the United Nations, Civilian Defense Organizations, Red Cross, State and Home Guards, essential war industries, essential services such as communications, transportation, power, water, fuel, press associations, newspapers, and health and sanitation services.

3. *Records*

A record shall be kept by all telephone carriers of all priority calls, which record shall include the priority given and whether a conversation in process was interrupted. Such record shall be kept by the telephone carrier for two years after the date of the call.

4. *Reports*

Within thirty days after the end of each calendar month, the American Telephone and Telegraph Company shall file with the Board a report for the Bell System Companies showing:

(a) the number of calls during the preceding calendar month given Priority 1, 2, and 3, and the number of calls given Priority 1 for which other calls were interrupted;

(b) periods of time required for completion of each class of priority calls.

5. *Violations*

The telephone facilities of any subscriber who wilfully obtains or attempts to obtain priority for a toll call by fraudulently designating such call as a priority call or by furnishing false information to any telephone carriers for the purpose of obtaining a priority, shall be subject to closure, removal or other appropriate governmental action.

Subject to such further order as the Board may deem appropriate.

SUPPLEMENTARY GAS RATIONS

Applicants for additional rations of gasoline are urged to arm themselves with the necessary facts about their driving requirements before asking their Local Rationing Boards for supplemental cards.

Not only must the applicant sign his statement of fact, but, if he is an employee and the supplemental ration is needed to carry on his work he must also present the affidavit or affirmation of his employer, or an authorized representative of his employer.

Under the gasoline rationing regulations, the board is authorized to grant supplemental rations only if it finds that they are "essential to life or to the pursuit of a gainful occupation and that no reasonably adequate alternative means of transportation are available". The board in granting a supplemental ration will issue a B card "tailored" to provide for the amount of the ration.

The applicant must state why his present ration is insufficient. He must support this reason with facts. Next, the applicant must state what means of public transportation are available to him.

Other questions ask the applicant to state what vehicles owned by members of his family, or by friends or business associates are available to his use, and to specify what effort has been made to "double-up" with other car owners.

Generally speaking workers in the broadcasting industry should experience no difficulty in getting B cards entitling them to gasoline for occupational driving based on their requirements up to 470 miles a month, including the gas provided under the A card.

Under Section 1394.506 (k) (2) of the Gasoline Rationing Regulations, workers in the radio broadcasting industry including executives, technicians or office workers, but not including salesmen, are eligible to apply for preferred mileage (C cards). Again, they must show the need and that no reasonably adequate alternative means of transportation are available.

SELECTIVE SERVICE

Stations desiring further deferments on men classified II-A or II-B should renew deferment requests on such registrants one month before the present deferment period elapses. Otherwise the registrant will be classified I-A and no notice will be sent to the station.

TEN PER CENT WAR BOND CAMPAIGN

The Treasury Department announces an intensive campaign to be gotten under way November 15 and to continue to January 1, to secure universal 10 per cent pay roll participation in bond purchases by salaried personnel in all branches of industry.

Under the slogan, "Top that 10% By New Years!" the campaign will be conducted on a broad front. The cooperation of radio stations is earnestly solicited by Secretary Morgenthau. While he expressed his deep and personal gratification for the splendid manner in which broadcasters have already contributed to the success of the war bond campaign, Secretary Morgenthau has urged voluntary 10 per cent payroll plans in each radio station and a campaign on the part of the stations to encourage every type and kind of commercial enterprise and industry to do likewise. This campaign is consistent with the resolution adopted by the NAB Board of Directors at its September meeting. The resolution follows:

WHEREAS, the successful prosecution of the war depends upon adequate financing, and

WHEREAS, the Treasury Department is seeking through the sale of war bonds to secure revenue to the extent of $12,000,000,000 annually from the people of the United States, and

WHEREAS, the investment in war bonds accomplishes the two-fold result of helping to finance the war and to curb inflation,

NOW, THEREFORE, BE IT RESOLVED, by the Board of Directors of the National Association of Broadcasters that we heartily recommend to the broadcasting industry the continued whole-hearted support of this war bond campaign and further recommend to station managements the desirability of immediately inaugurating among their own station personnel a campaign to secure the voluntary purchase of bonds to the extent of ten per cent of the annual salary of each employee.

MAIL CIRCULATION SPOTS

Six suggested announcements to explain to listeners the necessity for taking their radios to the serviceman instead of asking him to call were mailed to all stations this week. One announcement per day on all stations, on a rotating time schedule, was suggested until further notice.

District Meetings

DISTRICT 4

District Director G. Richard Sharto, WIS, called the opening session of the two-day meeting of the Fourth District of NAB to order in the Carolina Hotel in Pinehurst, N. C., with 81 broadcasters, government and industry representatives present. The meeting was held on Friday and Saturday, October 23-24, 1942.

At a dinner for the broadcasters and their guests on the evening of the first day, Governor J. Mellville Broughton of North Carolina paid a tribute to the achievements of broadcasting, emphasized the responsibilities of the medium in the united war effort and spoke glowingly of the future of radio after the war. He pointed out that North Carolina refused to ratify the original constitution until the first ten amendments—the so-called "Bill of Rights"—had been prepared and added. He credited this renowned "Bill of Rights" as the legal basis for the development of a free American system of broadcasting.

The Retail Promotion Committee Plan was presented on Saturday morning and unanimously endorsed by formal resolution of the Fourth District.

A resolution heartily approving the policy and activity of the NAB in its efforts to remove the "unfair, undemocratic and un-American Petrillo ban on recorded music" was unanimously approved. NAB was urged to continue an all-out effort to bring about a satisfactory solution of the music problem.

Representatives of many of the principal government war agencies were on the program. Carl Haverlin, Headquarters Consultant for Industry Relations OWI; Eugene Carr, Assistant to the Radio Censor, Office of Censorship; Frank McIntosh, Chief, Radio and Radar Section, WPB; Marvin Beers of OCD; M. A. Milman, of the Radio and Press Section of the Treasury Department, each discussed problems of mutual concern to their agencies and broadcasters:

Those in attendance were: Philip P. Allen, WLVA; Campbell Arnoux, WTAR; L. H. Avery, NAB; Bryce P. Beard, WSTP; Marvin Beers, OCD; William C. Bourne, OWI; William Bowry, WMBG; Robert E. Bradham, WTMA; Harry G. Bright, WGBR; Walter Brown, WSPA; Ollie L. Carpenter, WPTF; Eugene Carr, Office of Censorship; Madeline Chase, OCD; Howard L. Chernoff, WCHS-WPAR-WSAZ-WBLK; Mrs. Gertrude Clinton, U. S. Employment Service; Charles H. Crutchfield, WBT; Roland D. Cuddy, WBTM; Major Richard E. Daley; Clay B. Daniel, WSJS; B. H. Darrow, OCD; John H. Dodge, WRC; Don S. Elias, WWNC; Mrs. Don S. Elias, WWNC; Harold Essex, WSJS; Jack Field, WPTF; Fred Fletcher, WRAL; Elmer D. Free, OCD; R. Sanford Guyer, WBTM; Milton N. Gwaltney, WPID; Ralph S. Hatcher, WTAR; Carl Haverlin, OWI-BMI; Harold Hayes, OWI; Sheldon B. Hickox, Jr., NBC; Charles G. Hicks, WSOC; Francis M. Hipp, WIS; Ruffin Horne, WFNC; Mrs. C. C. Hudson, WBIG; Nancy Hudson, WBIG; B. Walter Huffington, WPID; Henry Hulick, WPTF; E. Z. Jones, WBBB; Ray P. Jordan, WDBJ; A. E. Joscelyn, WBT.

Herbert Kendrick, WJLS; Stanton Kettler, WMMN; John W. Kirkpatrick, WSPA; Lt. George Kirksey; C. O. Langlois, Lang-Worth; Capt. Gleason B. Lee, Manpower Branch, Service and Supply; George Ludlam, OCD; Richard H. Mason, WPTF; Ezra McIntosh, WWNC; Neville Miller, NAB; M. A. Milman, U. S. Treasury Department; R. E. Mitchell, WMBG; James H. Moore, WSLS; Paul Moyle, WFNC; John W. New, WTAR; Charles Parker, OCD; F. F. Patterson, WSTP; Royal E. Penny, WBT; I. E. Pittle, ASCAP; Graham B. Poyner, WPTF; Ray Reeve, WRAL; Edney Ridge, WBIG; J. D. Saumenig, WIS; William A. Schudt, Jr., CBS; G. Richard Shafto, WIS; Mrs. G. Richard Shafto, WIS; Alex Sherwood, Standard Radio; Carleton Smith, WRC; George W. Smith, WWVA; John E. Thayer, WWNC; Harold H. Thoms, WAYS; Jack Treacy, NBC; George W. Walker, WAIR; Roland Weeks, WCSC; Jacob F. Weintz, Tide Magazine; A. D. Willard, WJSV; and T. Doug Youngblood, WFIG.

DISTRICT 5 (FLORIDA)

The two-day meeting of the Florida section of the Fifth District of NAB was held on Sunday and Monday, October 25-26, 1942, at the George Washington Hotel in Jacksonville, Florida. District Director Frank M. King, WMBR, presided. Forty representatives of the Florida stations and a number of government department representatives attended.

The report of the war work of NAB was made by C. E. Arney, Jr., who replaced President Neville Miller, when the latter was called back to Washington for an important conference with government officials.

A formal resolution endorsing the Retail Promotion Committee plan was unanimously adopted.

A resolution heartly approving the policy and activity of the NAB in their efforts to remove the Petrillo ban on recorded music was likewise unanimously approved. NAB was urged to continue its all-out effort to bring about a proper solution of the recorded music problem.

Representatives of many of the principal government war agencies were on the program. Carl Haverlin, Headquarters Consultant for Industry Relations OWI; Eugene Carr, Assistant to the Radio Censor, Office of Censorship; Frank McIntosh, Chief, Radio and Radar Section, WPB; Marvin Beers of OCD; M. A. Milman, of the Radio and Press Section of the Treasury Department; each outlined problems of mutual concern to their agencies and broadcasters.

Those in attendance were:

J. H. Keachie and Stanley W. Goulden, RCA; W. Walter Tison, WFLA; Arthur H. Beckwith, AMP; Marvin Cox, OWI; Willett Kempton, OWI; Francis Wagner, NAS; Fred H. Ford, WWPG; Alex Campbell, Jr., WKAT; L. S. Mitchell, WDAE; Andrew W. Bennett; Bey Welling, WTOC; Harry E. Cummings, WJAX; Arch Robb, WIOD; J. Leonard Reinsch, WSB-WIOD; William N. Greer, WFTL; Tom Gilchrist, WTMC; Gilbert Freeman, WTAL; John B. Browning, WSPB; W. C. McBride, WDBO; K. S. Skelton, WDAE; Frank Taylor, Jr., WPDQ; Glenn Marshall, Jr., WMBR-WFOY; Charles Stone, WMBR; Tom Case, WSAV; Mark Johnson, WSAV; Robert R. Feagin, WPDQ; Lewis H. Avery, NAB; Charles S. Davis, WWPG; Morton A. Milman, U. S. Treasury Department; Jack Treacy, NBC Recording; C. E. Arney, Jr., NAB; Thad Holt, WAPI; Carl Haverlin, OWI-BMI; Frank King, WMBR; C. O. Langlois, Lang-Worth; Mrs. Boote, WJAX; John Hopkins, III, WJAX; Mr. Jameson, Manpower Commission; and William Bennett, OWI.

DISTRICT 5 (GEORGIA AND ALABAMA)

A two-day meeting of the Georgia-Alabama section of the Fifth NAB District opened at Atlanta on Wednesday. District Director Frank M. King, WMBR, presided. Sixty-five broadcasters, government and industry representatives registered for the sessions.

NAB President Neville Miller described the war activities of NAB. He was followed by representatives of several government departments and war agencies charged with the various phases of the war effort. These representatives reviewed the relations of their activities with problems of broadcasting.

President Miller reported in detail on the policy and activity of the Association with respect to the AFM-Petrillo matter. Following this presentation the broadcasters voted unanimous approval of the NAB stand.

The session is continuing today (Thursday) with the sales managers session, presided over by John M. Outler, Jr., WSB, Fifth District sales managers chairman and also Chairman of the NAB Sales Managers Executive Committee. Lewis H. Avery, NAB Director of Broadcast Advertising, will present a report of the many activities of his department in behalf of more and better radio advertising. He will also outline the Retail Promotion Committee's plan, mentioned elsewhere in this issue of the REPORTS.

Following is the attendance at the Atlanta meeting:

Frank M. King, WMBR; James W. Woodruff, Jr., WATL-WRBL-WGPC; Thad Holt, WAPI; Ed Norton, WAPI; Leonard Reinsch, John M. Outler, Jr., Lorin Myers, Mary Caldwell, Alwilda Lindsy, Marcus Bartlett, Beth Barnes, Charles McClure and Add Penfield, WSB; Don Ioset, T. O. McCullough, Maurice Coleman, Joe Robkin, Crenshaw Monner and Ford Stoner, WAGA; Zenas Sears, WATL; J. A. Davenport, Dan Hornsby and Bill Jones, WATL; John Fulton and Frank Gaither, WGST; R. O. Van Duzer, WALB; E. K. Cargill and Wilton Cobb, WMAZ; Charles Pittman, WBML; Alfred Lowe, WBML; John Hogan, WBML; W. R. Ringston, WRDW; J. B. Fugua, WGAC; Charles Smithgall, Jr., WGGA; W. S. Massie, WRBL; Bill Covington, and Jack Hughes, WCOV; Henry P. Johnson, WSGN; John Connolly and K. G. Marshall, WBRC; Harbin Daniel, WSAV; Weldon Herrin, WTOC; Henry East, WGPC; Hugh M. Smith, WAML; H. Wimpy, WPAX; B. M. Adams, NBC; S. W. Goulden and J. H. Keachie, RCA; Neville Miller and Lew Avery, NAB; I. T. Cohen, ASCAP; and Jack Treacy, NBC-Recording.

Lorin L. Watson, Spot Sales Inc.; C. O. Langlois, Lang-Worth; Gregg Murphy, Headley-Reed Co.; Fred Bell, Katz Agency; Charlie Coleman, Katz Agency; Lt. Harold A. Tyler, Corp. Andrew C. Petty and J. E. Pool, Army Public Relations; Willett Kempton, Regional OWI; Irving Beiman, OWI Alabama; Eugene Carr, Office of Censorship; Madelinn Chase, Regional Director OCD-Radio; A. H. Beckwith, Associated Music Publishers, Inc.

DISTRICTS 6, 12, 13 MEET

Immediately ahead of President Miller, Lew Avery and the others who are going along on the District Meeting tour are the 6th District meeting at Nashville, Friday and Saturday, October 30-31, the 12th District meeting at

Tulsa, Monday and Tuesday, November 2-3, and the 13th District meeting at Dallas on Wednesday and Thursday, November 4-5. District Directors Wooten (6), Way (12) and Tips (13) have invited all stations to be well represented.

A large attendance is anticipated at these meetings, as at those which have been already held. From Dallas the traveling party will proceed to Ogden, Utah, for the 14th District meeting, and thence on to the Pacific Coast for three meetings in that area. Complete announcements will be given in future issues of the "Reports."

PEABODY AWARDS

Five new appointments to the Advisory Board for the George Foster Peabody Radio Awards are announced by Dr. S. V. Sanford, Chancellor of the University System of Georgia and ex-officio member of the Board, as follows:

Dr. Ralph Casey, Director, School of Journalism, University of Minnesota; Joseph Henry Jackson, Literary Editor, San Francisco (Cal.) Chronicle; Mrs. Beatrice Sawyer Rossell, Director of Educational Service, The Quarrie Corporation, Chicago, Illinois; Dr. I. Keith Tyler, Director of Evaluation of School Broadcasts, Ohio State University, Columbus, Ohio; and Earl J. Glade, Chairman, NAB Code Compliance Committee, Salt Lake City.

The Peabody Radio Awards, comparable to the Pulitzer prizes in journalism, are administered jointly by the Henry W. Grady School of Journalism, The University of Georgia, and the National Association of Broadcasters. The Advisory Board, created by the regents of the University System of Georgia, is a self-perpetuating group which makes final selections for the Peabody Awards after receiving a preliminary report from a faculty committee picked by the Grady School.

Other members of the Board, whose terms continue for a year or more are: Bruce Barton, President, Batten, Barton, Durstine, and Osborne, Advertising, New York City; John H. Benson, President, American Association of Advertising Agencies, New York City; Jonathan Daniels, Editor, Raleigh (N. C.) News and Observer; Mark Ethridge, Vice President and General Manager, Louisville (Ky.) Courier-Journal and Times; Waldemar Kaempffert, Science Editor, New York Times; Alfred A. Knopf, Publisher, New York City; Mrs. Marjorie Peabody Waite, daughter of George Foster Peabody whose name the awards bear; President, "Yaddo"; and Edward Weeks, Editor, Atlantic Monthly, Boston, Massachusetts.

Meritorious public service by individual radio stations, regional and local, will this year be recognized in the George Foster Peabody radio awards.

December 15 has been set as the closing date for this year's entries. Proper forms may be secured from either the NAB offices in Washington or from Dean John E. Drewry of the Grady School. Forms have been mailed to all radio stations. Additional forms are available at the NAB.

Last year the Peabody awards went primarily to programs. The year before stations and networks were recognized. For 1942 both programs and stations are to be eligible.

The Peabody awards, as originally set up, were designed to recognize the most disinterested and meritorious public service rendered each year by the broadcasting industry, and to "perpetuate the memory of George Foster Peabody, benefactor and life trustee of the University of Georgia, and friend of educational progress everywhere."

This original purpose will be borne in mind in this year's selections, but an effort will be made to narrow the bases of measurement both in terms of stations and programs.

Awards will be made in at least six categories: 1. That program or series of programs inaugurated and broadcast during 1942 by a regional station which made an outstanding contribution to the welfare of the community the station serves. 2. That program or series of programs inaugurated and broadcast during 1942 by a local station which made an outstanding contribution to the welfare of the community the station serves. 3. Outstanding reporting of the news. 4. Outstanding entertainment in drama. 5. Outstanding entertainment in music. 6. Outstanding educational program.

The awards under reporting, drama, music and education may go to either a station or a network program.

Each entry may be accompanied by one transcription. If more are necessary to give the board members a fair understanding of the entry, special arrangements can be made. In previous years, the board has been inundated with exhibits, recordings, and other display material, much of which was quite costly and unnecessary. This year the board member would like to have the entries in a more compact and more readily handled form.

Entries may be submitted by individual stations, networks, radio editors of newspapers and magazines, listener groups, or any person or organization wishing to direct the attention of the Peabody board to a special program or programs. The board in its selections will not necessarily be restricted to entries, but may on its own initiative select a program or a station for an award. The board also reserves the right to make more or less than six awards, depending upon the entries and the circumstances at the time of the awards.

PER INQUIRY—FREE TIME

M. B. Waterman & Co., Chicago, Ill., is seeking per-inquiry business for a client on a hand-carved reproduction crucifix.

The Dixie Music Publishing Company, 1674 Broadway, New York City, is attempting to secure P-I deals for their series of song books, "Roundup of Song Hits."

The United Advertising Companies, Chicago, is still soliciting P-I business, this time for a Christmas card maker.

The United Broadcasting Company, Chicago, offers to sell a publication called "The Black Book of Poland" on a per-inquiry basis.

Free publicity is being sought by Batten, Barton, Durstine & Osborn Advertising Agency in behalf of Eatmor Cranberries; by the J. Walter Thompson Company for the New York Dress Institute; by the William R. Harshe Co., Chicago, for the game, "Battle Checkers," and by the Window Shade Institute, New York City, which, taking advantage of conditions resulting from the war, claims that the use of their cloth window shades will aid the government in fuel conservation efforts.

The definite increase in the number of these per-inquiry and free-time deals is cause for alarm. It would seem to indicate that too many broadcasters are accepting this copy, else agencies and advertisers would not continue to send it out.

The Sales Managers Division of the NAB has done everything possible to discourage this type of practice. In nearly every instance where stations have returned a P-I offer with the statement that such business is not acceptable and have quoted the agency card rates for the business, a contract at standard rates has been forthcoming. This practice can be stopped only by the united action of the industry in refusing to accept P-I deals or in carrying an undue amount of free advertising with the hope that it may produce some future business.

Stations are urged to continue to send information regarding all such deals to NAB.

FEDERAL COMMUNICATIONS COMMISSION

COOPERATION PROGRAMS

The following letters are in reply to a request by the FCC that CBS and NBC state the facts relevant to its refusal to carry the program "Let's Get Together, Neighbor," of the Cooperative League of the United States of America:

"COLUMBIA BROADCASTING SYSTEM, INC.
485 Madison Avenue
New York City

October 20, 1942.

Executive Offices
Paul W. Kesten
Vice President
and General Manager

T. J. Slowie, Secretary
Federal Communications Commission
Washington, D. C.

Dear Sir:

This will acknowledge receipt of your letter of October 14, 1942 with respect to the Cooperative League of the U. S. A. We appreciate your interest in this matter and the opportunity to present complete information on the reason which prompted us to decline to sell time to the Cooperative League of the U. S. A.

The Columbia Broadcasting System has for years sold time only for the purpose of advertising the goods or services of the sponsor (except to a political party during the actual campaign for the election of candidates). We have steadfastly declined to sell time for purposes of propaganda on one side or another of any controversial issue. The programs proposed by the Cooperative League did not offer for sale to the listener either the goods or services of the advertiser, and thus lay outside the field within which we sell our facilities. Moreover, the offered programs were clearly controversial in nature, being designed to promote a fundamental change in the present system of marketing and distribution of goods and services whereby cooperative associations would largely supplant retail stores and other common distribution establishments (see our statement on this subject of October 7, 1942 which is attached).

In August of this year, Mr. Wallace Campbell, Assistant Secretary of the Cooperative League, requested general information with respect to the mechanics of radio broadcasting and the purchasing of radio time. This information was furnished to him. Mr. Campbell did not request information with respect to the availability of any of our stations or disclose what programs he was considering.

In the early part of September, Atherton & Currier, Inc., a New York advertising agency, requested information with respect to the availability of time for broadcasts sponsored by the Cooperative League over stations WCCO and WJSV. As is our custom, we advised Atherton & Currier that we would want an opportunity to examine a copy of the proposed program material before accepting an order for broadcasts on behalf of the Cooperative League. On September 22, 1942, Atherton & Currier forwarded a copy of the script which they proposed to use for the first League broadcast. A copy of Atherton & Currier's letter of September 22, 1942, together with a copy of the script referred to therein, is enclosed.

After a careful consideration of such information as we could obtain with respect to the Cooperative League, and after an examination of the script, we came to the conclusion that in view of our long established policy not to sell time for programs devoted to public controversial issues, we could not accept an order for the Cooperative League's broadcasts. We so advised Atherton & Currier on or about September 24, 1942.

Our policy of refraining from selling time for the discussion of public controversial issues is well known by users of radio and was incorporated in the Code of the National Association of Broadcasters at its annual convention in 1939. For your information, we are enclosing an excerpt setting forth the provision of the NAB Code, together with excerpts from various prior statements on our part of that policy. This policy has, naturally, closed the door to large revenues for us. As Mr. Paley testified before the Interstate Commerce Committee of the Senate in June, 1941, we could have made tremendous sales of time to people who wanted to fight Congressional legislation such as the Public Utility Holding Company Act of 1935, and we have lost $9,000,000 in revenue because of our standards and policies.

So that you may have the benefit of some of the documentary evidence which led us to the conclusion that the Cooperative League is essentially an organization devoted to publicizing and promoting cooperatives as such and to advocating a change in our economic structure, we are enclosing various excerpts from the New York *Times*, together with excerpts from literature of the Cooperative League.

Although as stated in our release of October 7, 1942, we felt that our long established policy, as well as the NAB Code, prohibited acceptance by us of the Cooperative League's broadcasts, we naturally would accept a program sponsored by a cooperative engaged in the sale of goods which advertised the goods offered for sale. As a matter of fact, Station WCCO has in the past, carried several commercial series sponsored by the Land of Lakes Cooperative for the advertising of its butter, cheese and poultry products.

Although the point is a minor one, even if broadcasts sponsored by the Cooperative League were acceptable to us in view of our policies, we could not accept the programs as proposed since the entire content would have to be counted as commercial and, as you know, we have definite limitations on the amount of commercial copy which may be broadcast in connection with any sponsored program.

Sincerely,

(S) Paul W. Keston."

October 22, 1942.

Honorable T. J. Slowie, Secretary,
Federal Communications Commission,
Washington, D. C.

Dear Mr. Slowie:

This is in reply to your letter of October 14th, asking for information concerning the refusal of the National Broadcasting Company to sell time to The Cooperative League of the U. S. A. for the broadcasting of a program entitled "Let's Get Together Neighbor." Briefly, the facts are as follows:

The representatives of The Cooperative League of the U. S. A. approached NBC in an endeavor to purchase time over stations WTAM, Cleveland and KDKA, Pittsburgh only, and not over the NBC network. NBC is the operator of WTAM, and acts as national spot sales representative for the licensee of KDKA. The programs were to be rendered by means of electrical transcriptions.

We were advised by the League that it is "a nonprofit, nonpolitical membership organization established in 1916 and is chartered under the laws of the State of New York. It is the national federation of consumer cooperatives comprised of twenty regional and national associations with one and one-half million family patron members in 46 states. . . . The league is financed by dues of seven and one-half cents per year for each individual member of associated organizations. Special activities like radio are financed by additional contributions of members and member associations. Our bank is Amalgamated Bank New York. National offices are maintained in Chicago, New York and Washington. Purpose of league is to coordinate national activities and to promote additional business and membership in existing co-ops and to encourage the organization of neighbors to help themselves through cooperatives."

When the League approached us, the program for which they proposed to buy time was obviously designed not only to sell the cooperative movement generally, but to obtain additional members for its member cooperatives. In our opinion, the script for the first broadcast violated NBC program policies in many respects and would not have been acceptable to us for broadcasting in the form in which we received it. The particular NBC program policies which seemed to us to have been violated by the script are as follows:

> "Statements which tend to undermine an industry by attributing to its products generally faults and weaknesses true only of a few, and statements which are derogatory to an individual, an institution, a group or an industry must be avoided.
>
> "Commercial programs shall not refer to any competitor, or his products, directly or indirectly.
>
> "Statements of prices and values must be confined to specific facts. Misleading price claims or misleading comparisons tend to challenge the integrity of all advertising and must not be used."

Assuming, however, that the script might have been rewritten to comply with the above policies, still the primary purpose of the program, from the League's advice to us, was to acquire additional members for the consumer cooperatives which are members of the League. NBC has had a very long established policy which prohibits the acceptance on a commercial broadcast basis of any planned campaign that solicits or promotes membership drives. Under that policy we would not sell time for membership drives on behalf of any organizations. The counterpart of this policy is another NBC policy under which we do not sell time to promote the purchase of specific stocks, bonds, properties, etc.

Furthermore, so far as the proposed program purported to further the "cooperative movement," as opposed to other methods of distribution followed in the United States today, it was controversial in nature. NBC has long had a policy of not selling time for the broadcasting of controversial issues, except in the case of political broadcasts during campaign periods. This policy is the rule of the broadcasting industry.

In light of these obvious violations of NBC program policies, we had no alternative but to refuse the business as applied to WTAM. Under instructions from the licensee of KDKA, which advised us that the program likewise violated similar policies of that station, we declined to sell time for the program over KDKA as well.

At the time the program was turned down, we made clear to the League that we had no policy against selling time to them, or their members, subject to our policies, for the purpose of selling products or the services of particular cooperative stores. The fact of the matter is that we have often sold time to various cooperatives for the purpose of selling their various products.

Furthermore, I believe it will interest you to know that in balancing our program content, we have from time to time made sustaining time available to the proponents of the various phases of the cooperative movement, during which they discussed the merits and methods of functioning of cooperatives. In fact, we have given sustaining network time to The Cooperative League of the U. S. A. itself.

It is interesting to note that the NBC policies and those of the industry against selling time for membership campaigns and for the broadcasting of controversial subjects have stood the test of time.

On the subject of controversial issues, I quote the following from the Code of the National Association of Broadcasters:

> "Time for the presentation of controversial issues shall not be sold, except for political broadcasts. There are three fundamental reasons for this refusal to sell time for public discussions and, in its stead, providing time for it without charge. First, it is a public duty of broadcasters to bring such discussion to the radio audience regardless of the willingness of others to pay for it. Second, should time be sold for the discussion of controversial issues, it would have to be sold, in fairness, to all with the ability and desire to buy at any given time. Consequently, all possibility of regulating the amount of discusison on the air in proportion to other elements of properly balanced programming or of allotting the available periods with due regard to listener interest in the topics to be discussed would be surrendered. Third, and by far the most important, should time be sold for the discussion of controversial public issues and for the propagation of the views of individuals or groups, a powerful public forum would inevitably gravitate almost wholly into the hands of those with the greater means to buy it."

The second and third points made by the NAB Code apply equally to programs dealing with controversial issues and those designed to promote the sale of memberships.

Cordially yours,

(S) Niles Trammell.

In this connection, Representative Gehrmann (Prog.-Wis.) introduced the following resolution in the House (H. Res. 564):

Whereas the Cooperative League of the United States of America has reported in a resolution formally adopted at the Thirteenth Biennial Congress of the league that the National Broadcasting Company and the Columbia Broadcasting System had unfairly and unjustly discriminated against the league by denying the league the opportunity to purchase radio time; and

Whereas this report of the Cooperative League of the United States of America raises a very vital question as to the necessity for amendments to the Communications Act of 1934: Now, therefore, be it

Resolved, That the Committee on Interstate and Foreign Commerce, or any duly authorized subcommittee thereof, is authorized and directed to obtain such facts as the Cooperative League of the United States of America, the broadcasting companies, the Federal Communications Commission, the Department of Justice, and other Government agencies and other groups or persons may have bearing on the accuracy of the charges of discrimination against cooperatives and others by the major broadcasting companies in the sale of their radio time; and on the question whether the Federal Communications Act of 1934 should be further amended to authorize the Federal Communications Commission to prevent such discrimination, or should be otherwise amended to deal with the problem of granting further authority to the said Commission by restricting or affecting the power of said broadcasting companies. The said committee or duly authorized subcommittee is authorized and directed to secure the assistance of other Government agencies in the investigation hereby authorized and to report to the House the facts ascertained in the course of the investigation and the recommendations therein.

For the purposes of this resolution, the committee or any duly authorized subcommittee thereof is authorized to hold such hearings, to sit and act at such times and places during the sessions, recesses, and adjourned periods of the House, to require by subpena or otherwise the attendance of such witnesses and the production and impounding of books, papers, and documents, to administer oaths, and to take such testimony as it deems advisable.

BRIDGES COMPLAINS

. Senator Bridges, of New Hampshire, has sent a telegram to members of the FCC complaining about broadcasts on Station WMUR at Manchester, New Hampshire. In his wire the Senator stated:

The radio voice of New Hampshire Inc. with a principal place of business at Manchester, New Hampshire, operating Radio Station WMUR, whose principal stockholder and director at the time of incorporation and presumably still is Francis P. Murphy of Nashua, New Hampshire, a candidate for election to the United States Senate, broadcasts daily in supposedly news broadcasts political statements wholly designed to promote the candidacy of Mr. Murphy and to discredit other candidates. These broadcasts are not confined to an impartial broadcast of the news as announced. Furthermore, people over this station in the interests of Mr. Murphy's candidacy have been guilty of making numerous slanderous statements tending to degrade other candidates for political office. Freedom of speech is being daily transgressed by these grossly false utterances obviously intended to wilfully, wantonly and maliciously misinform and misguide the citizens of New Hampshire by this false propaganda. I demand in the interests of common decency for the people of New Hampshire an immediate full and complete investigation of all broadcasts issuing from this radio station and that proper steps be taken at once by the Commission to stop this false and malicious propaganda and that the Commission use its power of suspension or withdrawal of license if necessary.

October 27, 1942.

Senator H. Styles Bridges
Concord, New Hampshire

With reference to your complaint relating to Station WMUR, Commission is calling for a full statement from the station with respect to this matter and in addition is sending a representative to New Hampshire who will get in touch with you upon his arrival in Concord tomorrow.

James Lawrence Fly,
Chairman.

October 27, 1942.

Radio Voice of New Hampshire, Inc.
Manchester, New Hampshire

Commission has received a complaint from Senator Bridges with respect to certain of your broadcasts in connection with the present senatorial campaign. A copy of Senator Bridges' complaint is being forwarded to you tonight by airmail. Please furnish the Commission with a full statement with respect to this matter. Also please have a responsible officer available to discuss this matter with Commission's representative who is leaving here tonight for Manchester.

T. J. Slowie,
Secretary.

CRD/to

CHAIRMAN FLY'S PRESS CONFERENCE

It is probable that the FCC will take some action this week regarding wartime operation of broadcast stations, James Lawrence Fly, Chairman, told a press conference early this week. When asked if he thought it would be coming along soon the Chairman said:

"I would guess so. I think I ought to stress again that whatever is done there will not result in any lessening of the coverage of radio stations due to change in the various rules in the operation of the equipment. We will have the same effective output and same coverage we have had heretofore. You see, some of the rules which we have had regulating the equipment have necessarily been very strict, and we have got to a point now where by changing those rules and the consequent change in method of operation we can get a more effective output so I think we can increase the life of the equipment materially without effecting coverage at all."

Mr. Fly told the newsmen when asked about the Cooperative League situation that he doubted if the Commission can take any further steps in the present state of affairs. The Commission, he pointed out, "has no means of requiring the broadcaster to take any program regardless of its merit."

The FCC, Mr. Fly said, has cooperated with the OWI and CAA in regard to the whole matter of international broadcasting with facilities available for that broadcasting. In connection with a question as to whether or not the Commission would enter into the leasing of shortwave facilities from the networks and other owners by OWI, Mr. Fly said:

"We have been aware in general of the plans to control the facilities; also because of the problem of additional facilities, I would suppose that the contract would come before the Commission formally in view of the fact that it involves a new type of operation other than that which is covered by the existing license. In other words, it is a change in the license arrangements."

The Chairman told the newspapermen at the conference that he was sure that the Commission is sympathetic with the plans for the 22 new shortwave outlets for international broadcasting and he expressed the opinion that they should have a high order of priority. Mr. Fly, talking further on this subject said:

"At the same time I don't think any of us can say whether a given number of transmitters—whether some or all of them can be placed ahead of other very essential requirements. The requirements for transmitting facilities are very heavy and I might say very serious from a military point of view. The question for those who control the disposition of whatever amount of materials we have on hand, will be wherever those materials do the most war purpose. Now I can't form that judgment from where I sit, and I don't want to be taken as saying therefore that the order for these transmitters must go ahead of the orders for the transmitters to be used directly in the military service. That is a grave problem and it has to be appraised on the whole and on the light of one predominant requirement, that of winning the war."

BWC ORDER

The Board of War Communications has issued Order No. 23 authorizing the War Department to use, control, supervise, inspect or close facilities for wire or radio communications in Puerto Rico.

The Board's order is as follows:

WHEREAS, The Board of War Communications has determined that the National security and defense and the successful conduct of the war demand that all non-military stations and facilities for radio or wire communication in Puerto Rico shall be subject to use, control, supervision, inspection or closure by the Department of War;

NOW, THEREFORE, By virtue of the authority vested in the Board of War Communications by Executive Orders No. 8546, 8964 and 9089 of September 24, 1940, December 10, 1941, and March 6, 1942, respectively:

IT IS HEREBY ORDERED, That all non-military stations and facilities for radio or wire communication in Puerto Rico shall be subject to such use, control, supervision, inspection or closure by the Department of War in accordance with the terms of the said Executive Orders as the Secretary of War may deem necessary for the national security and defense and the successful conduct of the war;

PROVIDED, HOWEVER, That nothing herein shall apply to facilities controlled by the Department of Navy under Order No. 2 of the Board.

Subject to such further order as the Board may deem appropriate.

FCC APPOINTS DAVID

The FCC announced the appointment of Nathan H. David of Boston, as Assistant General Counsel in charge of the War Problems Division which he has headed since February of this year when he returned to the FCC after a sojourn with the Coordinator of Information as Radio Liaison Officer (From September 1941 to February 1942).

Mr. David was graduated from Yale University in 1934 and from Harvard Law School three years later. He served two years on the Board of the Harvard Law Review, the second being spent as Case Editor.

From 1937 to October 1939 Mr. David was associated with the Boston law firm of Burns & Brandon. He was first on the staff of the FCC as Assistant to the Chairman from October, 1939 to September, 1941.

The Commission also appointed Harry M. Plotkin as Chief of the Litigation and Administration Division and Donald M. Harris as Principal Attorney. Mr. Harris fills the vacancy created by the recent promotion of Rosel Hyde to Assistant General Counsel.

Mr. Plotkin was born in Athol, Mass., on May 18, 1913. He attended Harvard College where he received his A.B. Degree in 1934, and Harvard Law School where he received his LL.B. Degree in 1937. Upon graduation he engaged in law practice in Chicago for two and one-half years. He joined the Commission's legal department in January, 1940 as a member of the Litigation and Motions Section. Prior to his appointment today, Mr. Plotkin was Chief of the Litigation and Motion Section.

Donald M. Harris was graduated by Amherst in 1932 and by the Columbia University Law School in 1934. He is a member of the New York bar and was associated with the firm of Carter, Ledyard & Millburn there from 1935 to 1941. He joined the Federal Communications Commission in September, 1941.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, November 2. They are subject to change.

Monday, November 2

WIOD—Isle of Dreams Broadcasting Corporation, Miami, Fla.—C. P., **610 kc.,** 5 KW night, 10 KW day, unlimited, DA-night and day.

KXO—Valradio, Inc., El Centro, Calif.—Modification of C. P., **1230 kc.,** 100 watts, unlimited.

Friday, November 6

WHEB—R. G. LeTourneau, Transferor The LeTourneau Foundation, Transferee, Portsmouth, N. H.—Transfer of control of WHEB, Inc., **750 kc.,** 1 KW, limited time—WSB.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KEYS—Earl C. Dunn and Charles W. Rossi, a partnership, d/b as Nueces Broadcasting Co. (Assignor), Earl C. Dunn, Charles W. Rossi, H. B. Lockhart and E. C. Hughes, a partnership d/b as Nueces Broadcasting Co. (Assignee), Corpus Christi, Texas.—Granted consent to voluntary assignment of license (B3-AL-352) of station KEYS, from Earl C. Dunn and Charles W. Rossi, d/b as Nueces Broadcasting Co., to Earl C. Dunn, Charles W. Rossi, H. B. Lockhart and E. C. Hughes, d/b as Nueces Broadcasting Co., by transferring and assigning to a newly formed partnership consisting of Earl C. Dunn and Charles W. Rossi all assets, etc., of KEYS, for a total amount of $8,065.26.

WBRE—Louis G. Baltimore, Wilkes-Barre, Pa.—Approved power of attorney for the affairs of Louis G. Baltimore insofar as it relates to station WBRE, to be handled by Albert C. Baltimore, his brother. The power of attorney will terminate upon release from the Armed Services in which Louis G. Baltimore is now serving.

KFBG—Frontier Broadcasting Co., Cheyenne, Wyo.—Granted special temporary authority to operate relay broadcast station KFBR with equipment (of 15 watts power) other than that specified in station license, for the period ending midnight November 15, 1942, "to broadcast programs in connection with the new oil field discovery 30 miles northwest of Cheyenne."

W8XAL—The Crosley Corporation.—Granted application (B2-SAIB-6) for extension of special experimental authorization heretofore granted, for the period November 1, 1942, to November 1, 1943, to operate a 1 KW transmitter on frequency **6080 kc.,** using A0 and A1 emission for identification only, sharing time with station WLWO.

DESIGNATED FOR HEARING

Carl S. Ashbacker and Grant F. Ashbacker, d/b as Ludington Broadcasting Co., Ludington, Mich., and WKBZ—Ashbacker Radio Corp., Muskegon, Mich.—Designated for hearing application for construction permit (B2-P-3406) of Ludington Broadcasting Co., and application of WKBZ, Ashbacker Radio Corp., for modification of license (B2-ML-1106). The Ludington Broadcasting Co. requests authority to construct a new station at Ludington, Mich., using the frequency **1490 kc.,** 250 watts, unlimited time. This application is contingent upon the granting of the application of WKBZ to change frequency from **1490** to **1450 kc.**

Chattahoochee Broadcasting Co., Columbus, Ga.—Designated for hearing application for construction permit (B3-P-3023) for a new station to operate on **1450 kc.,** 250 watts, unlimited time.

LICENSE RENEWALS

KGFJ—Ben S. McGlashan, Los Angeles, Calif.—Granted renewal of license for the period ending February 1, 1943.

WCRW—Clinton R. White, Chicago, Ill.—Granted renewal of license for the period ending April 1, 1943.

KSEI—Radio Service Corp., Pocatello, Idaho.—Granted renewal of license for the period ending August 1, 1944.

KUOA—KUOA, Inc., Siloam Springs, Ark.—Granted renewal of license for the period ending October 1, 1944.

KTFI—Radio Broadcasting Corp., Twin Falls, Idaho.—Granted renewal of license for the period ending October 1, 1944.

WEVD—Debs Memorial Radio Fund, Inc., New York City.—Granted renewal of license for the period ending October 1, 1944, except for auxiliary.

MISCELLANEOUS

WFTL—Ralph A. Horton, Fort Lauderdale, Fla.—Granted modification (B3-MP-1652) of construction permit (B3-P-3355) for extension of completion date to 1-5-43.

WMMN—Monongahela Valley Broadcasting Co., Fairmont, W. Va.—Granted modification (B2-MP-1654) of construction permit (B2-P-2913) for extension of completion date to 2-3-43.

WPDQ—Jacksonville Broadcasting Corp., Jacksonville, Fla.—Granted license (B3-L-1721) to cover construction permit (B3-P-3385) which authorized a new station to operate on **1270 kc.,** 5 KW, unlimited time, DA-night, and for approval of studio site at Gulf Life Bldg., 125 W. Church St., Jacksonville; also authority to determine operating power by direct measurement of antenna power (B3-Z-1456).

WDAF—The Kansas City Star Co., Kansas City, Mo.—Granted authority to determine operating power by direct measurement of antenna power (B4-Z-1457).

WMBI—The Moody Bible Institute of Chicago, Chicago, Ill.—Granted authority to determine operating power by direct measurement of antenna power (B4-Z-1453).

WSFA—Montgomery Broadcasting Co., Inc., Montgomery, Ala.—Granted authority to make changes in automatic frequency control equipment (B3-P-251).

WHEB—R. G. LeTourneau, Transferor, and the LeTourneau Foundation, Transferee, Portsmouth, N. H.—Denied petition for reconsideration and grant without hearing of the application for transfer of control of WHRB, Inc., Portsmouth, N. H.

WDSU—WDSU, Inc., New Orleans, La.; WMIS, Natchez Broadcasting Co., Natchez, Miss.; WGRM, P. K. Ewing, Greenwood, Miss.—The Commission on its own motion entered an order continuing the hearing on these cases from November 17 to December 9; and further ordered that said hearing be held in New Orleans, La., to take testimony of witnesses available there, and that at the conclusion thereof said hearing be adjourned to Washington, D. C., for completion. This involves the applications of WDSU, WMIS and WGRM for renewal of licenses, and application of WDSU for construction permit to reinstate construction permit (B3-P-2923) as modified.

KIEM—Eureka Broadcasting Co., Inc., Eureka, Calif.—Denied special Service Authorization to operate with 1 KW at night (B5-SSA-42), and issued modified license for 1 KW operation at night subject to the condition that the RRS interference would not be caused to Canadian Station CJVI, in excess of 4.2 millivolt per meter contour.

WFAS—Westchester Broadcasting Corp., White Plains, N. Y.—Denied petition (Commissioner Payne dissenting) of WFAS to reconsider the Commission's action of May 19, 1942, and grant application for modification of license (Docket 6216). On May 19, 1942, the Commission denied two petitions for reconsideration and grant of the instant application.

WCLE—United Broadcasting Co., Cleveland, Ohio.—Granted motion to accept amendment to application (B2-P-2834) to request change of frequency only, and application removed from hearing docket.

WBIG—North Carolina Broadcasting Co., Inc., Greensboro, N. C. —Granted motion to accept amendment to application (B3-P-3391) for construction permit to request **640 kc.,** 5 KW, using modified directional antenna at night and using present transmitter and antenna, and removed application from hearing docket.

WMIS—Natchez Broadcasting Co., Natchez, Miss.; WGRM, P. K. Ewing, Greenwood, Miss.—Passed for one week motion to take depositions, etc., in re applications for renewal of licenses of WMIS and WGRM.

KXO—Valradio, Inc., El Centro, Calif.—Granted petition to dismiss without prejudice application for modification of license (B5-ML-1128).

WHAT—Independence Broadcasting Co., Philadelphia, Pa.—Granted petition to dismiss without prejudice application (B2-ML-1129) for modification of license.

WEBR—WEBR, Inc., Buffalo, N. Y.—Granted petition to dismiss without prejudice application (B1-P-3504) for construction permit for booster station at North Tonawanda, N. Y.

APPLICATIONS FILED AT FCC

1230 Kilocycles

KBTM—Jay P. Beard, trading as Regional Broadcasting Co., Jonesboro, Ark.—Modification of license to increase power from 100 watts night, 250 watts daytime to 250 watts day and night.

1450 Kilocycles

KDNT—Harwell V. Shepard, Denton, Texas.—Modification of license to change frequency from **1450 kc.** to **1400 kc.**

1470 Kilocycles

WSAN—Lehigh Valley Broadcasting Co., Allentown, Pa.—Modification of construction permit (B2-P-2637 as modified), which authorized increase in power, change in hours of operation, installation of new transmitter and directional antenna, for extension of completion date from 11-10-42 to 5-10-43.

FM APPLICATION

NEW—Don Lee Broadcasting System, Los Angeles, Calif.—License to cover construction permit (B5-PH-26 as modified), which authorized construction of new high frequency broadcast station, in part in accordance with Commission action of 8-4-42.

TELEVISION APPLICATION

W6XYZ—Television Productions, Inc., Los Angeles, Calif.—Modification of construction permit (B5-PVB-33 as modified), which authorized construction of new television broadcast station for change in type of transmitters, change in aural emission from A3 to special, changes in aural antenna system, increase in power from 1 KW to 2 KW for aural and 4 KW for visual and extension of completion date. Amended: to request 1 KW power for aural instead of 2 KW.

MISCELLANEOUS APPLICATION

KSEH—KSTP, Inc., St. Paul, Minn.—License to cover construction permit for new relay broadcast station (B4-PRE-419).

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Capudine Chemical Co., Raleigh, N. C., engaged in the manufacture and sale of a medicinal preparation designated "Hick's Liquid Capudine," is charged in a complaint with false advertising and misrepresentation. (4852)

Chelf Chemical Co., Richmond, Va., engaged in the manufacture and distribution of a medicinal preparation designated variously as "C.C. Compound," "C.C.C.C." and "4 C's," is charged in a complaint with false advertising and misrepresentation. (4850)

Electrovita Sales Company of Ohio, Norwalk, Ohio, sellers and distributors of mineral water designated "Elsaco Mineralized Water," is charged in a complaint with misrepresentation. (4858)

Emerson Drug Co., Baltimore, engaged in the manufacture and sale of a medicinal preparation designated "Bromo-Seltzer," is charged in a complaint with false advertising and misrepresentation. (4854)

Perfect Manufacturing Co., doing business as the So-Lo Works, 3317 Madison Road, Cincinnati, engaged in the manufacture and sale of an adhesive cement designated "So-Luminum," is charged in a complaint with misrepresentation. (4856)

Plaza Luggage & Supply Co., Inc., and Benjamin Goldstein and Abraham Goldstein, doing business as U. S. Luggage & Leather Products Co., 29 West 34th St., New York, engaged in the sale and distribution at retail of luggage, billfolds and kindred merchandise, are charged in a complaint with misrepresentation. (4857)

B. C. Remedy Co., Durham, N. C., engaged in the manufacture and sale of a medicinal preparation designated "BC" and "BC Headache Powders," are charged in a complaint with false advertising and misrepresentation. (4851)

Stanback Company, Ltd., Salisbury, N. C., manufacturers and distributors of a medicinal preparation designated "Stanback Headache Powders" and "Stanback," are charged in a complaint with false advertising. (4855)

Ulrici Medicine Co., Inc., and Trans-Pac Services, Inc., located, respectively, at 233 West 14th St., New York, and 4-20 47th Avenue, Long Island, N. Y., are charged in a complaint with misrepresentation. (4853)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

May Department Stores Co., Physicians Electric Service Corporation, and Soloman E. Mendelsohn, individually and as an officer of the corporation, all of Los Angeles, have been ordered to cease and desist from misrepresentations concerning a short-wave diathermic device advertised as "Pescor Shortwavatherm." (4683)

Master Herb Co., whose last known address was 215 West 9th St., Los Angeles, has been ordered to cease and desist from disseminating false advertisements concerning the therapeutic value of Chinese herbs. (4748)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Allied Pharmacal Co., Inc., 2108 Payne Ave., Clevland, Ohio, has entered into a stipulation to cease and desist from certain misrepresentations concerning the medicinal preparations it sells to retail druggists. The corporation conducts its business under the trade names Erie Laboratories, Inc., Avon Pharmacal Co., Victor Drug Products, Mason Pharmacal Co., Mack Pharmacal Co., Dale Drug Products, and Murray's. (3547)

Bathritis Co., 207 Michigan Ave., Chicago, selling a medicinal preparation designated "Bathritis," has stipulated to discontinue representing that the product, when used as directed in the bath, has any therapeutic effect in the treatment of rheumatism, neuralgia or other ailments, or, when used as a liniment, is effective in excess of relieving pain; that it relieves sprains, stiffness and swelling or works toward restoring normal active muscular health; that it is effective in comforting inflamed tissues; that it is effective in dispelling body odors, or that it is a new discovery. (03065)

Commodore Woolen Co., 257 Fourth Ave., New York, distributors of textile fabrics, stipulated that they will cease and desist from the use on tags or labels of the words "Harrison Tweed" as a designation for a textile fabric other than genuine Harris Tweed; and from the use of the word "Harrison" or other word suggesting "Harris," the effect of which may convey the belief that a textile fabric other than Harris Tweed is Harris Tweed. (3549)

Delettrez, Inc., 21-09 Borden Ave., Long Island, N. Y., engaged in selling a cosmetic designated "Liquid Chin Strap," has stipulated to cease and desist from representing that the product will help ward off the appearance of age or greyish surface lines; that it will heighten the arch or sweep of chin lines; that it has a therapeutic effect on the skin or contour thereof or has a physiological effect in excess of a temporary feeling of an astringent at the site of its application; or that its use will result even in the temporary disappearance of crepy skin. (03066)

Geppert Studios, 201 East Locust St., Des Moines, Iowa, entered into a stipulation to cease and desist from representing that the photographic enlargements they sell are given free when actually the prospective recipients are required to pay a consideration for them, and from failing to clearly disclose in their advertising matter that, in order to avoid delay in the delivery of an alleged "free" enlargement, the customer must assume an expense other than that indicated in the advertising.

The respondents also agree to discontinue the use of such words as "may be withdrawn soon" or the word "special" in connection with an offer so as to imply to prospective purchasers that the offer is of limited duration or is other than that customarily made by the respondents in the usual course of their business.

Martin-Lane Co., Vernon, Tex., selling animal food supplements designated "Crown Minerals and Yeast" and "Crown Range Minerals," has stipulated to cease representing that the products are rich in vitamin A and E; that they will prevent or cure other than secondary anemias or will promote higher hatchability in chickens; be effective in the prevention or cure of coccidiosis; keep down worm infestation; reduce loss of weight in hogs shipped to market; that by feeding Crown Minerals and Yeast a 100-pound gain can be made on an average three-year-old steer with less than 700 pounds of meal and corn and 400 pounds of hay, or that it is capable of causing a 15 percent or larger increase in egg production over that of other good commercial feeds or effecting a 20 percent increase in the production of livable chicks without limiting such comparison to ordinary range feeding or such method of feeding as is nutritionally inadequate. (03064)

Master Vita-Min Laboratories, 224 West Superior St., Chicago, entered into a stipulation to discontinue certain misrepresentations in connection with the sale of medicinal preparations advertised and sold under the names "Dulse-Dene," "Vita-Broth," "Garlo-Min," "Vege-Molen," "Vita-Lax," and "M-7." (3546)

Jack Roseman Co. and Jasmar Jewelry Co., 307 Fifth Ave., New York, entered into a stipulation to cease and desist from certain misrepresentations in connection with the sale of novelty jewelry. They agree to discontinue representing that their jewelry is avid-proof and to stop the use of the word "guarantee" in connection with the advertising or sale of his merchandise, unless, whenever used, unequivocal disclosure be made of the nature of the guarantee and exactly what is offered by way of security, as, for example, refund of purchase price; and from the use of such word in connection with any offer or agreement which is not a bona fide guarantee. The respondents also agree to discontinue use of the word "manufacturers" to imply that they make the jewelry they sell or that they own and operate or directly control a plant in which such merchandise is manufactured. (3548)

Security Mills, Inc., Knoxville, Tenn., sellers of dry dog food preparations in meal, cubes and kibbled biscuit form under the trade name "Security Dog Food"; and C. K. Liller, W. W. Neal and J. L. Battle, trading as Liller, Neal & Battle, Atlanta, Ga., advertising agents of the product on behalf of Security Mills, Inc., have stipulated to cease and desist from representing that Security Dog Food will give added health to dogs; that it possesses value in building resistance to infectious or other types of diseases in excess of its ability to furnish food essentials necessary to the maintenance of such resistance as is normal to the healthy animal; that it will increase the size of litters except where rations have been inadequate, or that it will provide a defense against colds, skin diseases, and other ailments except where resistance may be low due to nutritional deficiencies in diet. (03063)

Worcester Textile Co., Inc., Greystone, R. I., has entered into a stipulation to cease and desist from the use of the words "Triple Twist" as a designation for its textile fabrics, the constituent yarns of which do not consist of three distinct strands or plies; and from the use of the word "Triple" or other word connoting a number, in any manner which might convey the belief that the number of strands or plies in the yarn is other than is actually the fact.

Worcester Textile Co., Inc., also agrees that no provision of the stipulation shall be construed as relieving it of the necessity of complying with the requirements of the Wool Products Labeling Act of 1939 and the rules and regulations issued thereunder. (3550)

FTC CASE DISMISSED

The Federal Trade Commission has dismissed its complaint which had charged John L. Keenan, trading as Franklin Institute, Rochester, N. Y., with misrepresentation in the sale of correspondence courses. The respondent Keenan died September 25, 1942.

Retail Promotion Campaign

Chairman Paul Morency of the Retail Promotion Committee reports most enthusiastic response to the plan. At the six District meetings thus far held a genuine interest has been evidenced. Many questions have been asked of Lew Avery but no serious objection has yet been presented by any broadcaster. Resolutions unanimously endorsing the project have been adopted at each meeting and a considerable number of pledges have been received.

The following is a list of the signed pledges already in the hands of the Committee:

WATL—Atlanta, Ga.
WBLJ—Dalton, Ga.
WBLK—Clarksburg, W. Va.
WBML—Macon, Ga.
WBTM—Danville, Va.
WCBI—Columbus, Miss.
WCHS—Charleston, W. Va.
WCOV—Montgomery, Ala.
WDBJ—Roanoke, Va.
WDOD—Chattanooga, Tenn.
WFIG—Sumter, S. C.
WFOR—Hattiesburg, Miss.
WGGA—Gainesville, Ga.
WGPC—Albany, Ga.
WGTC—Greenville, N. C.
WHBQ—Memphis, Tenn.
WHO—Des Moines, Iowa
WHUB—Cookeville, Tenn.
WIS—Columbia, S. C.
WJPR—Greenville, Miss.
WKPT—Kingsport, Tenn.
WKZO—Kalamazoo, Mich.
WLAC—Nashville, Tenn.
WLBJ—Bowling Green, Ky.
WLVA—Lynchburg, Va.
WMBD—Peoria, Ill.
WMBR—Jacksonville, Fla.
WMC—Memphis, Tenn.
WMGA—Moultrie, Ga.
WOPI—Bristol, Tenn.
WOW—Omaha, Nebr.
WPAR—Parkersburg, W. Va.
WPAX—Thomasville, Ga.
WPTF—Raleigh, N. C.
WRBL—Columbus, Ga.
WRDW—Augusta, Ga.
WREC—Memphis, Tenn.
WSAZ—Huntington, W. Va.
WSIX—Nashville, Tenn.
WSJS—Winston-Salem, N. C.
WSLS—Roanoke, Va.
WSM—Nashville, Tenn.
WSPA—Spartanburg, S. C.
WSPD—Toledo, Ohio
WTIC—Hartford, Conn.
WTMA—Charleston, S. C.
WTMJ—Milwaukee, Wis.
WWNC—Asheville, N. C.
KANS—Wichita, Kansas
KATE—Albert Lea, Minn.
KFAC—Los Angeles, Calif.
KFEL—Denver, Colo.
KGHL—Billings, Mont.
KRE—Berkeley, Calif.
KTBS—Shreveport, La.
KTHS—Hot Springs, Ark.
KVOO—Tulsa, Okla.
KWKH—Shreveport, La.
KXRO—Aberdeen, Wash.

The following stations have promised their pledges:

WAGA—Atlanta, Ga.
WALB—Albany, Ga.
WBBB—Burlington, N. C.
WBT—Charlotte, N. C.
WCOS—Columbia, S. C.
WJLS—Beckley, W. Va.
WMAZ—Macon, Ga.
WTOC—Savannah, Ga.

The Retail Promotion Committee meets in New York, Friday, November 6, to canvass the situation and develop further plans. A full account will be given in next week's REPORTS.

District Meetings

DISTRICT 6

District Director Hoyt B. Wooten, WREC, called the two-day meeting of the Sixth District of NAB to order Friday morning (October 30) in the audience studio of WSM. To participate in the discussion of "Broadcasting in Wartime", fifty-one broadcasters, government and industry representatives were present.

The revised OWI plan for industry cooperation was presented by Douglas Meservey, Carl Haverlin and K. W. Husted of the OWI Headquarters' staff. Several OWI regional consultants and branch managers were present. Following a discussion of the OWI proposals, Eugene Carr of the Office of Censorship outlined various interpretations of the Code and urged more careful study of its provisions.

At the afternoon meeting, Major J. R. Crittenden, in charge of occupational deferment under Selective Service in the State of Tennessee, discussed various phases of the Selective Service Act and subsequent rulings that relate to broadcasting.

After a discussion of manpower and the problems created by the increasing shortage of technicians and announcers, the meeting listened to an outline of the AFM-Petrillo problem by President Miller and Mr. Haverlin. At the conclusion of this discussion, the meeting unanimously passed a resolution endorsing the NAB stand on this situation.

The second day's meeting was dvoted to a discussion of wartime radio advertising. The meeting was presided over by Joe Eggleston, WMC, Sales Managers Chairman for the Sixth District. Lew Avery led a panel discussion of a variety of topics of interest to the commercial men in radio. John M. Outler, Jr., Chairman of the Sales Managers Executive Committee also participated. Unanimous endorsement of the Radio Promotion Plan was voted.

Following is the attendance:

Burt Adams, NBC; E. A. Alburty, WHBQ; Lewis H. Avery, NAB; Claude Barrere, NBC; J. W. Birdwell, WBIR; H. K. Carpenter, WHK; Eugene Carr, Office of Censorship; Madelinn Chace, Regional Director OCD; S. A. Cisler, WGRC; Marvin Cox, Regional Director OWI; Edwin W. Craig, WSM; Jack M. Draughon, WSIX; Louis A. Draughon, WSIX; Winston S. Dustin, WSM; Eunice Eckhoff, OWI; Joe Eggleston, WMC; Elaine Ewing, OWI; Bert Ferguson, WJPR; Albert E. Gibson, WSM; James C. Hanrahan, WMPS; Carl Haverlin, BMI-OWI; K. Wallace Husted, OWI; Ewing Johnson, OWI; Kenneth K. Kellam, KTHS; George A. Kercher, Edward Petry & Co.; M. L. Medley, WHUB; Douglas W. Meservey, OWI; John

DISTRICT 12

At a luncheon meeting, following the opening session of the two-day gathering at Hotel Tulsa of the broadcasters in the Twelfth NAB District, A. V. Harris, Manager of the Tulsa branch of the USES, paid tribute to and thanked the broadcasting station executives for the cooperation and genuine help they have given the USES in the reallocation of men from non-essential to war industries.

"In my estimation," he said, "the major credit for the success of this effort belongs to the radio stations".

He added that broacasting stations in this area have given unstintingly of their time and facilities to carry appeals of the USES to the vast listening audience.

The business was called to order in Hotel Tulsa at 10:00 a. m., on Monday morning by William B. Way, KVOO, District Director. Among those who spoke at the sessions were Herb Hollister of KANS, Director-At-Large; Neville Miller, President of NAB; Carl Haverlin of the Office of War Information; Eugene Carr, of the Office of Censorship; and Lewis H. Avery of the Department of Broadcast Advertising.

Following a report by President Miller and Carl Haverlin on the policy and activity of NAB in respect to the Petrillo ban on recorded music, a resolution endorsing the stand taken by the trade association was unanimously approved.

On Tuesday the Sales Managers met in an all-day session. Clark A. Luther, KFH, Sales Managers Chairman for the Twelfth District presided. The Retail Promotion Plan was enthusiastically received and unanimously endorsed and several pledges were forthcoming and promises of more were given.

The following were present:

L. H. Avery, NAB; Ellis Atteberry, KCKN; Burt Adams, NBC; Phillip Alexander, ASCAP; Lucille Burns, KOME; Tams Bixby, Jr., KBIX; Claude Barerre, NBC; Owen Balch, KSAL; Jimmie Barry, KBIX; Hillis Bell, KVSO; Matt Bonebrake, KOCY; Gustav Brandborg; KVOO; Ken Brown, KVOO; Eugene Carr, Office of Censorship; Fred Case, KWON; Plez S. Clark, KFH; I. T. Cohen, ASCAP; Walt Dennis, KVOO; Willard Egolf, KVOO; Maxine Eddy, KGFF; Harold Grimes, KOME; B. M. Grotkop, KOME; William C. Gillespie, KTUL; Herbert Hollister, KANS; Gus Hagenah, SESAS; Howard Hamilton, KVOO; Carl Haverlin, OWI-BMI; Lillard Hill, KADA; Jack Howell, KOMA; Clark A. Luther, KFH; Eugene McNally, KVOO; David R. Milsten, KVOO-KOME; Clem Morgan, KVGB; Milton Blink, Standard Radio; Neville Miller, NAB; Allen Page, KVOO; Howard Phillips, KVOO; Albert Riesen, KVSO; Fred Schwartz, KOME; E. Fred Scraper, KFH; Larry L. Sisk, OWI; Weldon Stamps, KADA; J. W. Slates, KFPW; Joe Story, WIBW; Jack Todd, KANS; Karl Troeglen, WIBW; William B. Way, KVOO; Adelaide L. Carrell, WBBZ; John Esau, KTUL; Robert Enoch, KTOX; and Helen Lee, KTUL.

DISTRICT 13

The two-day meeting of District 13 was called to order Wednesday morning in Dallas by Martin B. Campbell of WFAA-WBAB-KGKO, acting as Chairman in the absence of District Director Kern Tips of KPRC.

Among the representatives of Government departments and agencies, who discussed the relation of the war and the war effort to broadcasting, were: Col. Royden Williamson, Chief, Public Relations Office, Eighth Service Command; Capt. C. L. Steinmetz, Signal Corps, and Lt. H. B. Decherd, Jr., Public Relations Officer, Third Army—Southern Defense Command; Lt. Louis Read and Lt. Harold Banks, Eighth Naval District; Lt. Lester W. Lindow, Public Relations Officer, Camp Wolters, Texas; Carl Haverlin, Headquarters Consultant; Larry L. Sisk, Regional Consultant; Robert Wear, Fort Worth Manager; Paul White, Dallas Manager; Maurice Gardner, Houston Manager; David R. McGuire, Jr., New Orleans Manager; Marvin McAlester, Kansas City Manager; Harrington Wimberly, Oklahoma City Manager; all of OWI, and Eugene Carr of the Office of Censorship.

Strong resolutions regarding OWI and A. F. of M.-Petrillo were unanimously passed.

The complete attendance roster follows:

M. E. Danbom, KGKB; E. P. Duffie, KGKB; James G. Ulmer, KGKB; James R. Curtis, KFRO; C. K. Beaver, KARK; Paul Godt, KARK; Jack McGrew, KPRC; C. B. Locke, KFDM; Bert Mitchell, Roosevelt Properties; George Cranston, WBAP-KGKO; Ed Lally, WBAP-KGKO; John Rosser, WTAW; G. E. Zimmerman, KARK; Jimmie Pate, Lone Star Chain; Charlie Nethery, KXYZ; T. Frank Smith, KXYZ-KRIS; George Erwin, KFJZ; Bert Horswell, KNET; A. M. Herman, WBAP-KGKO; Wes Izzard, KGNC; Harold Hough, WBAP-KGKO; Ralph Maddox, WFAA-KGKO; Ralph Nimmons, WFAA-KGKO; Harfield Weedin, WFAA-KGKO; Martin Campbell, WFAA-WBAP-KGKO; Alex Keese, WFAA-KGKO; Boyd Kelley, KRLD; Earle Fletcher, KAND; H. R. Turner, WBAP-KGKO; T. B. Lansford, KRMD; Hugh Halff, WOAI; W. L. Klein, KTSM; Jack Keasler, WOAI; Jack Mitchell, KTSA; Aubrey Escoe, KTBC; Lofton Hendrick, KRRV; Leslie Pierce, KWFT; J. W. Crocker, KRLD; Joe B. Carrigan, KWFT; Clyde Rembert, KRLD; Eugene Roth, KONO; Pete Teddlie, WRR; Chas. B. Jordan, WRR; Lewis Lacey, KTSA; Wendell Mayes, KBWD; Lewis O. Seibert, KPLT; Howard Barrett, KRBC; Eugene Carr, Office of Censorship; Harrington Wimberly, OWI; Lt. Harold Banks, PRO, Eighth Naval District; George Kercher, Edward Petry Company; Marvin McAlester, OWI; David R. McGuire, Jr., OWI; Maurice Gardner, OWI; Lt. L. W. Lindow, PRO, Camp Wolters, Texas; Larry L. Sisk, OWI; Capt. C. L. Steinmetz, Signal Corps, Third Army—Southern Defense Command; Lt. H. B. Decherd, Jr., PRO, Third Army—Southern Defense Command; Col. Royden Williamson, Chief, Public Relations Office, Eighth Service Command; Lt. Louis Read, PRO, Eighth Naval District; Wilbur Keith, Social Security Board; Herbert Denny, Standard Radio; Tom Martin, OCD; Robert Wear, OWI; Carl Haverlin, OWI; Claude

Barrere, NBC; Lew Avery, NAB; Paul White, OWI; Philip O. Alexander, ASCAP; Milton Blink, Standard Radio; I. T. Cohen, ASCAP; Burt Adams, NBC; Gus Hagenah, SESAC; and, Neville Miller, NAB.

NEXT WEEK'S MEETINGS

Immediately ahead of the travelling party, which consists of Neville Miller, Lewis H. Avery, Carl Haverlin and Eugene Carr as the permanent members, and a number of others who are attending some of the meetings, lies the 14th District meeting which has been changed from Ogden, Utah, to Denver, Colorado. This 14th District meeting will be held at the New Albany Hotel on Monday and Tuesday, November 9 and 10. District Director Ed Yocum and Sales Managers Chairman W. E. Wagstaff have made a thorough canvass of the District and a goodly attendance is assured.

From Denver the party goes to Los Angeles for a two-day meeting on Thursday and Friday, November 12 and 13. There District Director Calvin Smith, KFAC, and Sales Managers Chairman Charles Storke, KTMS, and Lawrence W. McDowell, KFOX, President of the Southern California Broadcasters Association report a lot of enthusiasm.

Programs for Victory

"Commando Corps of the Court of Honor" is the title of a highly successful war stamps and bonds sales program.

Up to October 13, as the result of this program, Jack Gelzer of WKBW-WGR, Buffalo, reports that the good work with the kids has resulted in turning over $192,000 to Uncle Sam—cash, not pledges.

Because programs which sell this kind of volume are out of the ordinary, we have asked the station for details which appear below:

Commando Corps of the Court of Honor

I. THE COMMANDO CORPS

- A. An organization of nine- to fifteen-year old boys and girls committed to the sale of United States War Bonds and Stamps.
  - 1. Original unit of ten members selected from dramatic staff, scout troops, or similar youth organization.
- B. MEMBERSHIP
  - 1. Sales of ten dollars is required for membership to prove sincerity of volunteer's enlistment.
  - 2. Recruit is officially accepted into Corps when he takes Commando Corps Oath.
  - 3. Group expands by volunteers.
  - 4. Total membership is unlimited but growth and expansion of the Corps should not be too rapid.
- C. INDUCEMENTS TO MEMBERSHIP
  - 1. Official Commando Corps Armband
    - a. Bright red felt.
    - b. Royal blue insignia—chevrons, stars, bars.
    - c. White lettering of "Commando Corps" in quarter arc above insignia. "Court of Honor" on horizontal plane below insignia. Call letters at right and left of insignia.
  - 2. Radio Broadcast (thoroughly covered under (II) Court of Honor).
- D. RANK AND SALES NECESSARY FOR PROMOTION

Rank	*Total Sales*
Corporal	$ 25
Sergeant	75
Staff Sergeant	175
2nd Lieutenant	375
1st Lieutenant	675
Captain	1,175
Major	2,000
Lt. Colonel	2,500
Colonel	3,000
Brigadier General	4,000
Major General	5,000
Lt. General	10,000
General	20,000

- E. PROMOTIONS
  - 1. Promotion of but one rank permitted each week.
  - 2. Sales are accumulative, i.e., Commando does not lose credit for sales over and above his quota necessary for next rank, but the excessive amount is credited toward next promotion.
    - a. Bond Sales are credited at cost price—not maturity value.
  - 3. An accounting of all sales is kept by one staff member to maintain an accurate record of each individual's sales.
  - 4. Variation in amounts, necessary to attain various ranks, eliminates possibility of all Corps Members progressing through the ranks as a unit. All ranks add to the glamour, incite the spirit of competition and pride.

II. THE "COURT OF HONOR" (Broadcast)

- A. TIME
  - 1. Early evening preferred
  - 2. 30 Minutes
  - 3. Once weekly
- B. TALENT
  - 1. Orchestra and Soloist
  - 2. Two or more announcers
  - 3. Army Officer to act as Commanding Officer of Commando Corps.
- C. LOCALE
  - 1. Auditorium Studio
- D. COST
  - 1. Variable

Court of Honor Routine

Effect:	Drum Roll (Fade For).
Commando:	I am a Commando of the Court of Honor. It is my duty to sell War Bonds and Stamps. It is your privilege to buy them.
Music:	Introduction to Theme:
Announcer:	The Commando Corps presents its Court of Honor!
Music:	Theme: March of the Commandos.
Announcer:	Program Introduction.
Music:	Fanfare.
Commando:	Explanation of program.
Music:	Patriotic number.
Commando:	Explanation of how to become a member of the Commando Corps.
Music:	Fanfare.
Announcer Orderly:	Preparation for Sales Reports. Military Routine. Introduction of Commanding Officer.

Commanding Officer:	Recognizes Orderly . . . Asks for Sales Reports.
Announcer Orderly:	Calls Roll for first half of Corps.
Commandos:	Reports his presence and makes individual Sales Report, followed by appropriate comment from Commanding Officer.
Music:	Patriotic number.
Announcer Orderly:	Continues Sales Reports. Reports Week's Sales and Grand Total.
Commanding Officer:	Brief talk on men or materials affected by Sale of War Stamps and Bonds.
Commando:	Appeal for support of public and tie-in description of Armband.
Music:	Patriotic number.
Announcer Orderly: Commanding Officer:	Induction of new members.
Commandos:	Each Commando identifies himself.
Announcer Orderly:	Now raise your right hands and repeat after (Commanding Officer) the Commando Oath!
Commanding Officer:	I take this oath . . . To aid My Country . . . To the best of my ability . . . To respect my rank . . . As a Commando of the Court of Honor . . . To preserve the ideals . . . On which this Court was founded . . . And to be a loyal American in thought and conduct. (Commandos repeat each line after Officer.)
Commanding Officer:	Brief address to new members.
Commando:	Lead group in pledge to the Flag.
Commando:	Star Spangled Banner.
Music:	National Anthem.
Announcer:	Next week the Commando Corps will again broadcast its Court of Honor. Listen next Saturday at seven when you will hear:
Commando:	I am a Commando of the Court of Honor. It is my duty to sell War Bonds and Stamps. It is your privilege to buy them.
Music:	March of the Commandos.
Announcer:	Sign off.
Music:	Theme up to end.

TIRE RATIONING

Passenger cars used by "executives, engineers, technicians and workers" in the communications industry (which includes radio broadcasting) are eligible for retreading and recapping of tires and for new inner tubes under the Tire Rationing Regulations issued by the Office of Price Administration. The provisions relative to retreading and recapping are found under List B (a) (3) of the regulations effective February 19, 1942, and the provisions as to new inner tubes are found under Amendment No. 4 to the regulations effective April 10, 1942.

"The eligible classes in List B are not automatically qualified to purchase retreaded or recapped tires," Mr. Henderson has said. "The regulations require anyone on List B to establish to the satisfaction of the local board that his car is used exclusively on service essential to the community and to the Nation."

Appeal from decision of a local board should be taken by letter to the State Rationing Administrator at the State capital.

The above corrects the article on Tire Rationing appearing on page 594 of NAB REPORTS of October 9, which should have read that buses used by workers in the communications industry are eligible for new tires.

SCHOOL BROADCAST CONFERENCE

The annual Chicago School Broadcast Conference is scheduled for Wednesday and Thursday, November 11 and 12. Tentatively scheduled as speakers on the two-day program are Vice President Henry Wallace and Elmer Davis, Director of the Office of War Information. Lt. Col. Edward M. Kirby, head of the Radio Branch of the War Department's Bureau of Public Relations and former NAB Director of Public Relations, will also speak, as will Thomas D. Rishworth, NBC; Leon Levine, CBS; Erik Barnouw and Allan Nevins, Columbia University; Mildred Batchelder of the American Library Association; Prof. John Frederick of Northwestern University and Nelson Olmsted, producer of "World's Greatest Stories" on NBC.

A most interesting program including panel discussion of topics of deep interest to educators and broadcasters is scheduled.

TELEPHONE PRIORITIES

The New York telephone company reports that all went smoothly the first day of priorities on long distance calls in New York City. Only 33 priority calls were made, and regular service was uninterrupted. Broadcasters are entitled to make priority calls when essential to the war effort.

COMMISSION "FREEZING"

The Treasury Department says that the *rate*, not the amount, of commissions is "frozen" under the recent salary stabilization order. The same system, presumably, would apply to bonuses based on a percentage of income, profits, etc.

PER INQUIRY AND FREE TIME

Huber and Sons, 699 Madison Ave., New York City, offer two per-inquiry deals for books, "The Modern Home Physician" and "The World's Greatest Books."

Stephen Powers Shoemaker, Halliburton Bldg., Los Angeles is attempting to sell Frederick Murphy's book, "How to Pay Taxes and Live" on a booking order at daytime rates or on a per-inquiry basis.

The Curtiss Candy Co. seeks free time to publicize their efforts to aid the scrap metal drive.

READ FORTUNE SURVEY

A survey on a radio subject appearing on page 20 of November, 1942, "Fortune" should be read by all broadcasters. It will give you the kind of a surprise you like to get.

CAPT. HARDER FROM WESTINGHOUSE

It's now Captain George A. Harder, Chemical Warfare Service, Edgewood Arsenal, Maryland.

Until next week, when he will report for active duty, Captain Harder is still on the job as advertising and publicity manager of Westinghouse Radio Stations.

SENOR MUNIZ VISITS NAB

Recent visitor at NAB headquarters was Felix Muniz, manager, WIAC, San Juan, Puerto Rico, of which Enrique Abarca is owner. WIAC is a member of the National Association of Broadcasters.

Senor Muniz said that the NAB course, Fundamentals of Radio, was being taught at the University of Puerto

Rico, days, and that another radio class was taught, nights, at Central High School, Santurce.

RADIO PLAQUE

At the Cleveland convention radio station WGAR presented the broadcasters with an attractive pin bearing the words, "Radio—In Service of Home and Nation." A replica of this pin in the form of a plaque, 12 inches in diameter, has been made. Neville Miller is carrying a copy of this with him on the tour of District meetings where it is exhibited. Any broadcaster desiring one of these plaques may secure it by addressing an order to NAB enclosing a check for $5.00. These make a splendid decoration for the lobby of a radio station or in the manager's office. We will be very glad to hear from any broadcasters interested.

OWI SHORT WAVE

The OWI and Office of the Coordinator of Inter-American Affairs announced the government has leased the short wave broadcasting facilities of five companies for the duration of the emergency. In an official statement the government agencies said:

Under the terms of the lease, the broadcasters are to continue operating their facilities, without profit, in return for which the government will pay the cost of operations. In effect, the government is buying the shortwave broadcast time from the five companies for the duration of the emergency.

The United States, for the period of the war, will use these facilities for preparing and transmitting its own short wave programs. The government has arranged to build certain of its short wave programs in collaboration with the programming staffs of the Columbia Broadcasting System and the National Broadcasting Company.

The facilities of the ten stations operated by the five companies involved in the leasing transaction will serve as a nucleus for the government's short wave expansion program which, according to present plans, calls for the construction of twenty-two additional short wave transmitters.

The purpose of the government's action is two-fold. First, it will materially improve reception of United States short wave broadcasts all over the world thereby effectively increasing the listening audience. Secondly, it will improve the quality of short wave programs by the coordination of news and other material broadcast for international consumption.

The companies which have leased their international broadcasting facilities to the government are the Columbia Broadcasting System, the Crosley Corporation, the General Electric Company, the National Broadcasting Company and Westinghouse Radio Stations, Inc.

The ten short wave stations owned by these companies are:

Columbia Broadcasting System Stations:
Location: New York
WCRC
WCBX
WCDA

Crosley Corporation Station:
Location: Cincinnati
WLWO

General Electric Company Stations:
Location: Schenectady
WGEO
WGEA

General Electric Company Station:
Location: San Francisco
KGEI

National Broadcasting Company Stations:
Location: New York
WRCA
WNBI

Westinghouse Radio Stations, Inc. Station:
Location: Boston
WBOS

Negotiations for the government were conducted jointly by the Office of War Information and the Office of the Coordinator of Inter-American Affairs. Two-thirds of the time leased from the radio companies will be used by the Overseas Division of the Office of War Information headed by Robert E. Sherwood. The remaining time will be used by the Information Department of the Office of the Coordinator of Inter-American Affairs, headed by Wallace K. Harrison, which will broadcast programs to the other American republics.

Elmer Davis, Director of the Office of War Information, in commenting on the agreement, said:

"International Radio Broadcasting is an important weapon in this war. This fact has been proved by our enemies. They use this weapon constantly and powerfully. Their ammunition is falsehood. Our ammunition is truth.

"The various shortwave broadcasters are showing a fine sense of public service in cooperation with the government in this emergency. This cooperation will continue. We expect to increase our broadcasting facilities so that the voice of America will be heard clearly by our allies and our enemies, and neutral nations everywhere.

"One of the most important aspects of our shortwave broadcasting is programs of news from home sent to our own forces in all parts of the world."

Nelson A. Rockefeller, Coordinator of Inter-American Affairs said:

"Short wave broadcasting is of great importance in the inter-American program, for it is a significant medium of communication among the allies and neighbors of the new world.

"Hemisphere cooperation can have real meaning only with the fullest participation of the people of the 21 American republics. Such participation is dependent upon wide knowledge and understanding, which can be materially fostered by improvement and expansion of short-wave broadcasting facilities.

"These new agreements, reached with the fullest cooperation of the radio industry, signal an important step forward toward the inter-American goal."

FEDERAL LEGISLATION

HOUSE RESOLUTION

H. Res. 564 (Gehrmann, R.-Wisc.) INVESTIGATION OF SALE OF RADIO TIME—To investigate alleged discrimination against cooperatives and others by major broadcasting companies in the sale of radio time. Referred to Committee on Rules.

FEDERAL COMMUNICATIONS COMMISSION

WAKEFIELD DISCUSSES ISSUES

Following is part of a speech made by Commissioner Ray C. Wakefield in San Francisco on October 30:

At the present time there are certain controversial issues in the broadcasting field to be decided by the courts and the Commission. I refer particularly to the chain broadcasting or network regulation, the radio-newspaper inquiry, and the Petrillo controversy. The network regulations were adopted over a year ago and while some of them have been placed into effect voluntarily by the networks, they are not legally binding as regulations pending the outcome of litigation testing the Commission's power to issue them. The regulations were issued after considerable complaint of network practices and after extensive hearings.

Without going into any detailed discussion of these rules, I would like to discuss them briefly and the philosophy underlying them. These rules were designed to prevent monopoly by the networks in the control of radio time, first through the ownership of too many stations, and second, through the type of affiliation contracts offered non-owned stations. In prevailing contracts, the networks would so tie up the individual stations that it would be impossible for a station to take the programs of another network even though it had free time and the program, no matter how popular or meritorious, was not being broadcast in its community. They also prohibit the broadcasting of non-network programs of local interest such, for example, as a Commonwealth Club meeting, if the network required the time, no matter how great the importance of the local broadcast. The licensee's freedom of selecting programs was curtailed and the possibility of additional networks was severely limited. In its regulations, the Commission sought to prevent stations from entering into contractual relationship with networks which made it impossible for them to fulfill their duty in the public interest, as the station licensee might determine what was the public interest for his community. Incidental to this purpose, there was the desire to stimulate or, at least, permit the growth of other networks. I must emphasize this point because of the argument commonly made by the existing networks that the Commission seeks to destroy network broadcasting. Nothing is further from the truth except perhaps another charge that those rules are some sort of forerunner of government operation of radio. I am satisfied that all of the benefits of the present network system can be retained without its handicap of monopolistic practices and that the result of the adoption of these rules will be a freer and more independent broadcasting industry. They are, in fact, just about as much a prelude to government operation as is the Sherman Anti-Trust Law.

Another issue in broadcasting which has engaged the attention of the Commission is the question of what restrictions, if any, should be placed upon the privilege of a newspaper or persons associated with newspapers to hold interests in a station license. This problem was brought to the attention of the Commission in part by the numerous applications of newspaper interests for FM stations and also by Congressional complaints of monopoly of radio. Hearings were held on this question during the summer and fall of 1941, but no decision has been made in this matter.

On the one hand the arguments are made that newspapers do not operate radio stations as independent media of public expression but rather that the newspaper-owned station tends to become an adjunct of the newspaper and a supporter of its editorial policy. Those who hold this view point out that the number of licensees of radio stations is limited by the number of available frequencies. They believe it desirable that the control of the media of public expression—the pipelines of information into the market place of thought, as described by one witness—be as diversified as possible and, therefore, they think it is better that further licenses should not be issued to newspapers. The proceeding does not contemplate the revocation of existing newspaper-held licenses.

On the other hand, it is contended that radio is in one sense a development of the work of the newspaper as a purveyor of public information and intelligence and that it is inequitable if not a violation of the principles of freedom of press to deny the right to hold licenses to the owners of newspapers. This, of course, is a very broad view of the issues and does not attempt to discuss the evidence or to indicate which view I consider the correct one since this matter is now before the Commission for decision.

The Commission's interest in the activities of the American Federation of Musicians, headed by James C. Petrillo, is twofold, namely, in the Union's action with reference to broadcasts by amateur musicians and its ban on recordings and transcriptions. One of the first matters which came to the Commission's attention was the cancellation of a broadcast by the National High School Symphony Orchestra from the Music Camp at Interlochen, Michigan, in the early summer.

Each summer the students at this camp are organized into a symphony orchestra, and a number of the country's leading symphony conductors visit the camp and assist in their training. The broadcast by the High School Symphony Orchestra scheduled over the network of the National Broadcasting Company on July 11 of this year was cancelled. The Commission received many complaints.

Inquiry of all broadcasting stations has developed the fact that there have been other instances where amateur musicians have been kept off the air or permitted to broadcast only if professional standbys were specially employed for the occasion.

With reference to recordings and electrical transcriptions, I understand that the musicians' principal objection to the use of recordings and transcriptions on the radio is that they compete with live musicians and thus decrease the opportunities that musicians have for employment in the radio broadcast field. Mr. Petrillo, in a letter to the Commission, urges that this is something more than the usual objection which labor unions have raised to technological changes which create unemployment. He says that here the situation is unusual because the very devices which compete with live musicians are made by the musicians themselves.

The efforts of musicians to prevent the use of recordings and transcriptions are not new. In 1931 the Chicago Federation of Musicians, of which Mr. Petrillo was then president, called a strike of Chicago radio musicians effective at midnight New Year's eve. The strike had for its purpose, among other things, barring broadcasting of recordings for commercial purposes. The strike was settled when the Chicago broadcasters agreed to a reduction in the working hours of musicians.

Beginning in 1936 a series of suits were filed with the view to establishing that musicians have the right to prevent the unauthorized broadcasting of their recordings. The musicians urged that if a record was made for use only on home phonographs and so labeled, it could not be used for broadcasting. This contention prevailed in the Supreme Court of Pennsylvania. However, the United States Circuit Court of Appeals for the Second Circuit, subsequently decided otherwise.

In January 1937 the Chicago Federation of Musicians announced that effective February 1st it would not permit its members to make recordings of any kind, including transcriptions, except under such restrictions and upon such conditions as the Federation's executive board should deem best calculated to end "for all time the menacing threat of canned music competition," but again there was a settlement when the networks and their affiliates who had been spending $3,500,000 yearly in wages to musicians agreed to boost the total by $2,013,000, an increase of nearly 60 percent, which provided jobs for about 1,000 more union players.

The quota agreements expired early in 1940 and another strike was threatened. However, an armistice was reached in the early part of January and while no new contracts were entered into relations were continued on the basis of the quota agreements.

In July 1940, Petrillo who had been and still is head of the Chicago Union succeeded Joseph Weber as national president of the A. F. of M. At the convention held the following year the executive board was ordered to take action against recorded music. This culminated in Petrillo's announcement at the convention held in June of this year that effective August 1 members of the A. F. of M. would stop making records except for home consumption. The musicians apparently realized, however, that in view of the decision of the Second Circuit Court there is no way of guaranteeing that once a record is made it will not be used for broadcasting purposes. Accordingly, Mr. Petrillo's letter of June 25 to the recording companies extended the ban to the making of any mechanical reproduction of music.

The jurisdiction of the FCC is extremely limited in this matter since we deal only with radio licensees. However, we are deeply interested in the effect of the ban upon radio programs as it affects the ability of stations to stay in business and render the best service. You may feel that you do not like recorded or transcribed programs. As a matter of fact, they can be very good—so good you cannot tell them from a live program. In any event, to the extent that they are necessary or desirable there should be no artificial handicap to the best possible recordings and transcriptions. The Commission's study elicited the fact that over 40 percent of the average station's total broadcast time is devoted to recorded music, and that the small non-network station depended on records for most of its program material. Much more than full time musical programs is involved as transcribed programs with only a musical background or interlude are involved as well as transcribed background for live programs.

In addition to appearing before the Senate Committee, the Commission prepared evidence in affidavit form for use by the Department of Justice in its antitrust suit to enjoin Petrillo from enforcing the order prohibiting members of the Union from making records. An injunction was refused by the Federal District Court in Chicago on October 12 on the ground that the matter was essentially a labor dispute and that under earlier decisions of the Supreme Court the Anti-Trust Law did not apply to labor unions under certain conditions. However, the Department of Justice is considering an appeal in this case, and the Senate has authorized an investigation of the situation and has made an appropriation for that purpose. New legislation may result from this investigation. In any event, I'm sure we have not heard the last of the Petrillo case.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, November 9. They are subject to change.

Thursday, November 12

WBOW—Banks of Wabash, Inc., Terre Haute, Ind.—C. P. to install new transmitter, **1230 kc.,** 250 watts, unlimited.

Friday, November 13

WINK—Mid-American Broadcasting Corporation, Louisville, Ky. —Modification of C. P., **1080 kc.,** 1 KW night, 5 KW day, unlimited, DA-day and night.

FEDERAL COMMUNICATIONS COMMISSION ACTION

MEETING POSTPONED

The regular Tuesday meeting of the FCC was postponed this week because of national elections. The meeting is slated to be held Friday of this week.

ACTION ON DOCKET CASE

The Commission has adopted an order making final its Proposed Findings of Fact and Conclusions (B-152), granting the application for renewal of license of Puerto Rico Advertising Co., Inc. (WPRA), Mayaguez, Puerto Rico (Docket No. 5929). In the same order the Commission denied the applications of Puerto Rico Advertising Co., Inc., for construction permits for new standard broadcast stations at Arecibo, Puerto Rico (Docket No. 5930), and at San Juan, Puerto Rico (Docket No. 5938), and also denied the application of Caribbean Broadcasting Association, Inc., for a construction permit for new standard broadcast station at San Juan, Puerto Rico (Docket No. 5898).

MISCELLANEOUS

WHIO—Miami Valley Broadcasting Corp., Dayton, Ohio.—Granted construction permit to install new sampling loops (B2-P-3514).

WFTL—Ralph A. Horton, Fort Lauderdale, Fla.—Granted modification of construction permit, as modified, which authorized change in frequency, increase in power, installation of new transmitter and directional antenna for night use, and move of transmitter, for change in type of transmitter, and change in type of frequency and phase monitors (B3-MP-1658).

KMJ—McClatchy Broadcasting Co., Fresno, Calif.—Granted license to cover construction permit which authorized move of transmitter (B5-L-1717); granted authority to determine operating power by direct measurement of antenna power (B5-Z-1451).

WRNL—Richmond Radio Corp., Richmond, Va.—Granted license to cover construction permit for changes in directional antenna for night use (B2-L-1719); granted authority to determine operating power by direct measurement of antenna power (B2-Z-1454). Granted license to use directional antenna as specified under construction permit (B2-L-1720); granted authority to determine operating power by direct measurement of antenna power (B2-Z-1455).

WWVA—West Virginia Broadcasting Corp., Wheeling, W. Va.—Granted license to cover construction permit as modified, for increase in power, change in hours of operation, move transmitter, installation of new transmitter and directional antenna for night use (B2-L-1712).

KGCX—E. E. Krebsbach, Sidney, Mont.—Granted license to cover construction permit for move of transmitter and studio, and make changes in antenna (B5-L-1706); granted authority to determine operating power by direct measurement of antenna power (B5-Z-1436).

WWVA—West Virginia Broadcasting Corp., Wheeling, W. Va.—Granted authority to determine operating power by direct measurement of antenna power (B2-Z-1446).

WENM—The Evening News Assn., Area of Detroit, Mich.—Granted renewal of relay broadcast station license for the period ending not later than October 1, 1944 (B2-RRY-122).

Granted further extension of following relay broadcast station licenses upon a temporary basis only, pending determination upon applications for renewal of licenses, in no event later than December 1, 1942:

KBTB, Red River Broadcasting Co., Inc.; KGBK, Helen Townsley; WAEA, W. A. Patterson; WAFK, A. Frank Katzentine.

APPLICATIONS FILED AT FCC

610 Kilocycles

KFAR—Midnight Sun Broadcasting Co., Fairbanks, Alaska.—License to cover construction permit (B-P-3436) as modified, for increase in power and new transmitter.

KFAR—Midnight Sun Broadcasting Co., Fairbanks, Alaska.—Authority to determine operating power by direct measurement of antenna power.

640 Kilocycles

WCLE—United Broadcasting Co., Cleveland, Ohio.—Construction permit (B2-P-2834) to install new transmitter and directional antenna for day and night use, change frequency from **610 kc.** to **640 kc.,** increase power from 500 watts to 50 KW, change hours of operation from daytime to unlimited time, move transmitter from Pleasant Valley Road, Village of Seven Hills, Ohio, to near Sharon Center, Ohio, Class II station. Amended: to request modification of license to change frequency from **610 kc.** to **640 kc.,** change hours of operation from daytime to limited time, and omit request for move of transmitter, directional antenna and increase in power, and new transmitter.

790 Kilocycles

WWNY—The Brockway Company, Watertown, N. Y.—License to cover construction permit (B1-P-3265) as modified, for installation of directional antenna for night use, change frequency, increase power, change hours of operation, and move transmitter.

WWNY—The Brockway Company, Watertown, N. Y.—Authority to determine operating power by direct measurement of antenna power.

820 Kilocycles

WTBO—Associated Broadcasting Corp., Cumberland, Md.—Transfer of control of licensee corporation from Aurelia S. Becker as Administratrix of the Estate of Frank V. Becker to Aurelia S. Becker (125 shares 50%).

830 Kilocycles

WNYC—City of New York, Municipal Broadcasting System, New York, N. Y.—Special Service Authorization to operate from 6 a. m. to 10 p. m., with power of 1 KW.

940 Kilocycles

WMAZ—Southeastern Broadcasting Co., Inc., Macon, Georgia.—Modification of construction permit (B3-P-3043, as modified, which authorized change in frequency, increase in power, installation of directional antenna for day and night use, and move transmitter) for extension of completion date from 11-6-42 to 1-6-43.

1240 Kilocycles

WJW—WJW, Incorporated, Cleveland, Ohio.—Modification of construction permit (B2-P-3263, as modified, which authorized installation of new transmitter and directional antenna for day and night use, increase power, change frequency, and move transmitter) to change proposed location of transmitter from on East side of Akron-Boston Mills Road, Northampton Twp., Ohio, to N.W. of intersection of Ohio State Highway No. 94 and Walling Road, Cuyahoga County, Ohio, change type of transmitter, move studio from 41 S. High St., Akron, Ohio, to 815 Superior Ave., Cleveland, Ohio, make change in directional antenna for day and night use and extend commencement and completion dates from 8-15-42 and 1-13-43 to 60 days after grant and 180 days thereafter respectively.

WSAY—Brown Radio Service & Laboratory (Gordon P. Brown, owner), Rochester, N. Y.—Modification of construction permit (B1-P-2924, which authorized change in frequency, increase in power, installation of directional antenna for day and night use and new transmitter, and move of transmitter) for extension of completion date from 11-23-42 to 5-1-43.

1290 Kilocycles

KHSL—Golden Empire Broadcasting Co., Chico, Calif.—Modification of construction permit (B5-P-3100, as modified, which authorized installation of directional antenna for day and night use, and increase night power) for extension of completion date from 11-16-42 to 12-16-42.

1300 Kilocycles

KGLO—Mason City Globe Gazette Co., Mason City, Iowa.—License to cover construction permit (B4-P-3269) as modified, for changes in directional antenna for night use, install new transmitter, and increase power.

KGLO—Mason City Globe Gazette Co., Mason City, Iowa.—Authority to determine operating power by direct measurement of antenna power.

1400 Kilocycles

KVGB—Helen Townsley, Great Bend, Kansas.—Authority to determine operating power by direct measurement of antenna power.

1590 Kilocycles

WAKR—Summit Radio Corporation, Akron, Ohio.—License to cover construction permit (B3-P-3038) as modified, for increase in power, changes in directional antenna for night use only, and install new transmitter.

WAKR—Summit Radio Corporation, Akron, Ohio.—Authority to determine operating power by direct measurement of antenna power.

FM APPLICATION

WBIG—North Carolina Broadcasting Co., Inc.—Construction permit to install new transmitter, new directional antenna system for day and night use, change frequency from **1470 kc.** to **640 kc.**, increase power from 5 KW to 50 KW, and move transmitter from near Greensboro, N. C., to north of Kearnersville, N. C. Amended: to make changes in licensed directional antenna for night use, and omit request for move of transmitter, new transmitter, and increase in power.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

American Viscose Corp., 350 Fifth Ave., New York, one of the world's largest producers of rayon yarn, is charged in a complaint with misrepresentation in the sale of its products. (4862)

Bristol-Myers Co., Rockefeller Center, New York, distributor of Ipana tooth paste; Pedlar & Ryan, Inc., and Young & Rubicam, Inc., both advertising agencies for the Bristol-Myers Co., are charged in a complaint with misrepresentation. Pedlar & Ryan, Inc., 250 Park Ave., and Young & Rubicam, Inc., 285 Madison Ave., New York, are advertising agents and have participated in the preparation and dissemination of the advertising matter to which reference is made in the complaint. (4861)

J. A. Folger & Company—Misrepresentation in the sale of coffee is alleged in two complaints, one against J. A. Folger and Company, a California corporation with offices at 101 Howard St., San Francisco, and the other against J. A. Folger & Company, a Nevada corporation, with offices at 330 West 8th St., Kansas City, Mo. (4859-4860).

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Bee-Dew Cosmetic Company—An order to cease and desist from misrepresentation in the sale of "Bee-Dew" cosmetics, recommended as hair and scalp treatments, has been issued against Vivian S. Nash, trading as Bee-Dew Cosmetic Co., 703 East Forest Ave., Detroit. (4811)

United Drug Co., Boston, has been ordered to cease and desist from selling cosmetics in packages which mislead and deceive purchasers as to the quantity of the product contained therein. (3729)

Utah Beverage and Distributing Co., Salt Lake City, Utah, selling and distributing merchandise including candies, gum, clocks, and handkerchiefs, has been ordered to cease and desist from the use of lottery methods in the distribution of their products. (4591)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Armi Mineral Water Co., 1711 Jefferson Ave., Toledo, Ohio, stipulated that he will cease and desist from misrepresentations concerning the therapeutic value of a preparation he sells under the name "Armi Mineral Water," which consists of city tap water supplemented by certain minerals in small quantities and by a relatively larger portion of sodium sulphate and through which has been conducted a current of electricity. (3553)

Beechams Pills, Inc., Bloomfield, N. J., and Atherton & Currier, Inc., New York agency which disseminates advertisements for the product, stipulated that they will cease and desist from disseminating any advertisement which fails to reveal that the product should not be used when abdominal pain, nausea, stomach sickness, or other symptoms of appendicitis are present; provided, however, that such advertisements need only contain the statement "Caution: Use only as directed," if the directions for use, wherever they appear on the label or in the labeling, contain a warning to the same effect. (03068)

Benco-Forman Sales Co., Inc., 21 Maiden Lane, New York, engaged in the sale of radios, washing machines and electrical appliances, has entered into a stipulation to cease and desist from representing that it is a distributor; that the prices at which it sells its merchandise are wholesale prices; that firms to which it introduces prospective customers sell their merchandise at wholesale prices; that it is a cooperative buying or purchasing organization; or that it is a representative of or purchasing agent for an association of cooperative buyers. (3554)

Completex Manufacturing Corp., 221 East 38th St., New York, engaged in the sale of an insecticide designated "Completex Powder," stipulated that it will discontinue representing that one application of the preparation will rid premises of infestations by roaches, ants or other insects for one year or any other length of time in excess of the time that such preparation can be depended upon to control such infestations, or that the preparation destroys the eggs of insects or can be depended upon to destroy their larvae. (3552)

Man-O-Ree Products, Greensboro, N. C., has entered into a stipulation to cease and desist from representing that the preparation he sells under the name "Man-O-Ree" is an aid to digestion; will rid the system of poisons or gases; can be relied upon to relieve gastric disturbances, heartburn, stomach disorders, nervousness, and insomnia; possesses the rebuilding qualities of a tonic, and is capable of having any deleterious effect on the digestive organs.

The respondent also agrees to discontinue use of any advertisement which fails to reveal that the preparation should not be used when abdominal pains, nausea, or other symptoms of appendicitis are present and that its frequent or continued use may result in dependence on laxatives; provided, however, that such advertisement need contain only the statement "Caution: Use only as directed," if the directions for use, wherever they appear on the label or in the labeling, contain warnings to the same effect. (03067)

Maywood Publishing Co., 1107 Broadway, New York, and E. D. Debout, Marion, Ky., entered into identical stipulations with the Federal Trade Commission to discontinue certain misrepresentations in connection with the sale of a booklet designated "Bargain Buyers' Guide," containing a classified compilation of numerous articles of merchandise together with the names of the sellers, and several pages of "unusual bargains." (3555-3556)

NAB Reports
The NATIONAL ASSOCIATION OF BROADCASTERS
1626 K STREET, N. W. WASHINGTON, D. C. Vol. 10, No. 45, November 13, 1942

Broadcast Industry on Full War Basis, December 1

The FCC, acting on proposals of the War Production Board and recommendations of the Board of War Communications, on November 6 adopted new regulations which in effect place the industry on a full wartime operating basis.

The new regulations, effective December 1, make it mandatory for all standard broadcast transmitters to reduce carrier power by one decibel. The required operating day for unlimited time stations is reduced from twelve hours to six hours daily. Stations are permitted "in an emergency, due to causes beyond the control of the licensee, when it becomes impossible to continue operating, the station may cease operation for a period not to exceed ten days, providing the Commission and Inspector in Charge shall be notified in writing immediately after the emergency develops," this clause is retained in Section 3.71 of the Rules and Regulations as revised.

Order Number 107 directs changes in the methods of determining the carrier power of transmitters. Stations using indirect power measurement are assigned new factors for determining the operating power from the plate input power. Stations using the direct measurement of power are assigned the factor of 1.26 for the determination of the antenna resistance value. The new factors, when applied, have the effect of decreasing the actual carrier power by one decibel.

In order that transmitters may be properly adjusted to secure the maximum conservation of tubes and other components the Commission has issued the "Manual on the Adjustment of Standard Broadcast Transmitters." The Manual stresses the importance of proper calibration and operation of the program limiting amplifier. Intelligent use of the "limiter" will offset the slight decrease in carrier power without resulting in objectionable compression or distortion.

The Commission's press release, copies of which were forwarded to all NAB members on November 7, mentions tests conducted by the Commission prior to the adoption of the Order. On alternate days, the carrier power of the stations used for the tests were reduced one decibel. "Listeners, aware of the tests, were unable to determine when the power was reduced and when it was not. Some of them reported improved reception during the period when the reduction was in effect." Not a single complaint was received from listeners as a result of the operation on reduced power.

Immediately upon the release of the new regulations the NAB Engineering Department contacted the manufacturers of broadcast transmitters. It was pointed out to the manufacturers that owing to the limited technical personnel available, some stations may have difficulty in properly readjusting their transmitters. It was suggested that the manufacturers make available specific instructions for the readjustment of each type transmitter in accordance with Order Number 107. Copies of the order and the manual were forwarded to the manufacturers in order that these specific instructions could be made available with a minimum of delay. Station engineers should immediately review the order and the manual so that possible difficulties can be anticipated well in advance of the effective date.

Order Number 94-A permits the voluntary reduction in hours of operation. The order also repeals Number 94 which had previously permitted a minimum daily operation of twelve hours.

The Commission did not take any action on the plan for the voluntary pooling of equipment which has been under consideration for some time.

DISTRICT 14 MEETING

Since the Fourteenth District of NAB embraces a much larger geographical area than any other district, the unusually large attendance of forty-nine broadcasters, government and industry representatives at the two-day meeting reflects the intense desire of radio stations in this district to cooperate to the fullest extent in the war effort. The opening session was called to order in Denver at 10:00 a.m. on Monday, November 8, 1942, by District Director Ed Yocum of KGHL.

During the first day, Carl Haverlin of the Office of War Information and Robert B. Hudson of the Rocky Mountain Radio Council, and Regional Consultant for OWI, presented the new plan that is designed to become operative on January 1, 1943. Following a question-and-answer period, the broadcasters unanimously endorsed the proposal.

Other speakers at the opening session were: Lt. Col. R. G. Walters, commander of Security District No. 7; Lt. Comdr. Lloyd E. Yoder, Public Relations Officer for Colorado for the Navy; Major L. G. Ruth, Public Relations Officer at Bulkley Field, Denver; and Major Howard Peterson, Chief, Radio Branch, Public Relations Bureau, Seventh Service Command.

At the luncheon meeting, Mrs. Dorothy Lewis, whose regular travels happened to coincide with the Fourteenth District meeting in Denver, spoke briefly on her meetings with listener groups across the country. She emphasized that listeners are increasingly interested and sometimes critical of the promotion of the war effort over the radio. She spoke, too, of the growing discussions among listeners of the post-war world and the part that radio will play in the readjustments after the war. Following Mrs. Lewis, Earl J. Glade of KSL voiced an impassioned plea for a more intelligent handling of the announcements and programs of the various government agencies and departments devoted to the prosecution of the war. He

DISTRICT 14 MEETING

(Continued from page 643)

stressed the critical part which broadcasting plays and can play in the war effort.

During the afternoon meeting of the first day, Eugene Carr of the Office of Censorship urged more detailed study of the Code and cited examples of good and bad judgment on the part of radio station operators in the interpretation of the Code. Following a presentation of the facts in the AFM-Petrillo problem, the broadcasters unanimously endorsed the NAB stand.

Several resolutions were adopted. One resolution suggested a network radio forum program upon which Petrillo himself, representatives of affected industries and government officials would be invited to participate. Another expressed appreciation to the Denver broadcasters for their work in connection with arrangements for the convention. A memorial resolution expressing regret at the untimely death of C. G. Phillips of KIDO, Boise, was unanimously passed. Regret at the absence of Frank Hurt of KFXD, due to illness was expressed in a resolution. Still another resolution expressed appreciation to the representatives of the various government departments who participated in the program. These included Carl Haverlin, OWI; Bob Hudson, Defense Savings Staff; Ralph Block, Office of Civilian Defense, Gene Carr, Office of Censorship; Major Howard Peterson of the Seventh Corps Area and other government and military representatives.

The second-day meeting was devoted to sales problems with W. E. Wagstaff of KDYL, District Chairman of the Sales Managers, in charge of the meeting. The morning meeting was devoted to a panel discussion of pre-arranged topics, followed by a presentation of the Retail Promotion Committee plan to increase the percentage of retail advertising budgets spent in broadcast advertising. At the luncheon meeting, Lewis H. Avery spoke on "Good Taste in Radio Advertising." The afternoon meeting was devoted to a discussion of local sales problems with emphasis on the development of new business to meet the new conditions imposed by war.

Following is a list of those in attendance:

Lewis H. Avery, NAB; Frank Bishop, KFEL; Milton Blink, Standard Radio; Ralph Block, Office of Civilian Defense; Boyd Braithwaite, KIDO; Ed J. Broman, KSL; Eugene Carr, Office of Censorship; V. W. Corbett, KVOD; T. C. Ekrem, KVOD; Henry H. Fletcher, KSEI; Ruth A. Fletcher, KSEI; S. S. Fox, KDYL; Mrs. Florence M. Gardner, KTFI; Earl J. Glade, KSL; E. J. Gough, SESAC; Wm. C. Grove, KFBC; Ralph W. Hardy, KSL; George C. Hatch, KLO-KOVO-KEUB; Donald Hathaway, KDFN; Carl Haverlin, OWI-BMI; Con Hecker, KVOD; Rex Howell, KFXJ; Robert B. Hudson, Rocky Mountain Radio Council; Mrs. Dorothy Lewis, NAB; James R. MacPherson, KOA; Neville Miller, NAB; C. C. Moore, KOA; A. J. Mosby, KGVO; Holly Moyer, KFEL; Gene O'Fallon, KFEL; R. H. Owen, KOA; Major Howard Peterson, Chief, Radio Branch, Public Relations Bureau, Seventh Service Command; Mrs. C. G. Phillips, KIDO; Jennings Pierce, NBC; G. A. Provol, KDYL; William D. Pyle, KVOD; Wally Reef, KFEL; Major L. G. Ruth, Public Relations Officer, Bulkley Field, Denver; Cecil Seavy, KFEL; C. P. Soule, KTFI-KSEI; Hugh B. Terry, KLZ; Sgt. Herb Trackman, Public Relations Office, Fort Logan, Colorado; Dan H. Vincent, KSL; Sacs Vratis, KGVO; W. E. Wagstaff, KDYL; Lt. Col. R. G. Walters, Commander, Seventh Security District; Lt. Arwin D. Way, Public Relations Office, Fort Logan, Colorado; Ed Yocum, KGHL; Lt. Comdr. Lloyd E. Yoder, Public Relations Officer, U. S. Navy.

NEW TIRE AND GAS RATIONS

The new Mileage Rationing: Tire Regulations (Ration Order 1A) and the new Mileage Rationing: Gasoline Regulations (Ration Order 5C) issued last Friday by OPA and effective November 22 put into practice the various recommendations of the President's Special Committee to study the rubber situation. These two ration orders are complementary in their operation and are designed to ration rubber and gasoline on the basis of mileage essential to actual needs.

Tires for Passenger Cars

Passenger cars are eligible for recapping, if applicant has a recappable tire carcass, otherwise for a specified grade of new tire, dependent upon total gasoline mileage ration as adjusted by the local War Price and Rationing Board at the time of application for the necessary certificate. Applicant must prove immediate need for the tire, tube or recapping service for which the application is made; that he has not abused or neglected the tire or tube which he seeks to replace or recap; that he has no excess tires for the automobile; that he has a gasoline ration currently valid under the new Mileage Rationing: Gasoline Regulations; and that he has a Tire Inspection Record, signed by an authorized tire inspector, showing that the required tire inspections have been made. The Rationing Board is required to redetermine the applicant's gasoline ration before passing upon the application. The applicant's eligibility for a tire, tube or recapping service is determined on the basis of such adjusted mileage, and not on the basis of his former allowed gasoline mileage, in accordance with the table on page 645:

Tires for Commercial Vehicles

"Sec. 1315.504. *Additional proof of need for commercial motor vehicle.* In addition to meeting all the conditions of Sec. 1315.501, an applicant for a tire, tube, or recapping service for a commercial motor vehicle must meet the following conditions:

"(a) *Certificate of War Necessity.* That he holds a currently valid Certificate of War Necessity, if required, with respect to such vehicle and that the tires have been currently inspected and passed as required by General Order ODT No. 21; and

"(b) *Importance to war effort, public health, or safety.* That the functions to be performed by the use of the tire, tube, or recapping service are essential to the war effort, the public health or the public safety. The applicant's need, standing alone, no matter how pressing, shall not be a basis for granting a certificate; and

"(c) *Comparative need.* That the issuance of the certificate to the applicant will not deprive other applicants of tires, tubes, or recapping service needed to perform functions deemed by the Board to be more essential to the war effort, public health or public safety than the functions performed by the applicant; and

"(d) *Recapping if possible.* That, if the applicant is seeking to replace a tire, it is not capable of being recapped or that it cannot be recapped for safe use at the speeds at which the applicant may reasonably be expected to operate; and

Total gasoline mileage	Kind of tire or recapping service	Kind of tube
560 or less miles per month.	Recapping service with passenger-type camelback if applicant has a recappable tire carcass; otherwise a Grade III tire.	New or used at applicant's option.
561 to 1,000 miles per month.	Recapping service with passenger-type camelback if the applicant has a recappable tire carcass; otherwise a Grade II or Grade III tire at applicant's option.	New or used at applicant's option.
1,000 miles per month or over.	Recapping service with passenger-type camelback if the applicant has a recappable tire carcass; otherwise a Grade I, Grade II or Grade III tire at applicant's option.	New or used at applicant's option.
For fleet passenger automobiles or official passenger automobiles for which interchangeable gasoline ration books have been currently issued.	Recapping service with passenger-type camelback if applicant has a recappable tire carcass; otherwise a Grade III tire.	New or used at applicant's option.

"(e) *Passenger-type tires unavailable or wasteful.* That, if application is made for a truck-type tire, a passenger-type tire of suitable size is not available, or that the use of a passenger-type tire would constitute a waste of rubber; and

"(f) *No other vehicle available.* That, if application is made with respect to a commercial motor vehicle eligible under Sec. 1315.505 (a) (List A), all other commercial motor vehicles owned or controlled by the applicant are either eligible under Sec. 1315.505 (a) (List A) or cannot practicably be used to perform the services for which a certificate is sought.

"Sec. 1315.505. *Eligibility of commercial motor vehicle*—(*a*) *List A.* A certificate for any grade or type of tire or tube, or for recapping service may be granted only for a commercial motor vehicle which meets the applicable conditions of Secs. 1315.501 and 1315.504, and which is used exclusively for one or more of the following purposes: . . .

"(9) Transporting workers (including executives, technicians, or office workers) to, from, within or between the establishments or facilities listed below, where other practicable means of transportation are not available: . . .

"(ii) Establishments or facilities of common carriers, or other carriers performing services essential to the community or to the war effort; or plants engaged in the production or distribution of light, power, electricity, gas, steam or water; or irrigation, drainage, flood control, or sanitation systems; or telephone, telegraph, radio, or other communication systems; or construction projects."

Gasoline Rationing

Under the Mileage Rationing: Gasoline Regulations, applicants for the Basic Ration (Class A coupon books) must state the serial numbers of all tires mounted (including one spare) on the vehicle for which the application is made, and the number and serial number of other passenger-type tires owned by him or by any person living in his household and related to him by blood, marriage or adoption, other than tires required to be otherwise reported.

Applications for supplemental rations are governed by Sections 1394.7703-5, which read as follows:

"Sec. 1394.7703. *Application for supplemental ration.* (a) Application for a supplemental ration may be made to a Board on or after November 12, 1942, on Form OPA R-535, by the owner or a person entitled to the use of a registered passenger automobile or registered motorcycle. A separate application shall be made for each vehicle. Application on behalf of an individual may not be signed by an agent.

"(b) An applicant shall establish the average monthly occupational mileage driven within the continental United States and required for each of the following purposes, for the three-month period beginning with the date on which such ration is required:

"(1) Driving between home and a fixed place of work in connection with the principal occupation of the applicant or principal user of the vehicle;

"(2) Driving in the course of such principal occupation;

"(3) Driving to and from or in the course of any other occupation or occupations for which the vehicle is used.

"(c) In the event that two or more passenger automobiles for which supplemental rations are desired, are owned by persons living in the same household and related to each other by blood, marriage, or adoption, all applications for supplemental rations for such vehicles shall, except for good cause shown, be submitted at the same time to the same Board. Where two or more vehicles are used in a ride-sharing arrangement of the type described in paragraph (a) of Sec. 1394.7704, a separate application for a supplemental ration shall be made for each such vehicle. Each such application shall include only the mileage driven in the vehicle for which it is made and, if such vehicles are all within the jurisdiction of one Board, all such applications must be submitted to it at the same time. If such vehicles are within the jurisdiction of different Boards, each application must be accompanied by duplicate copies of the applications for other vehicles used in such ride-sharing arrangement, and such duplicate copies shall show, if possible, the action taken by the respective Boards on the originals thereof.

"Sec. 1394.7704. *Allowance of mileage.* (a) Except as provided in paragraph (c) of this section occupational mileage shall be allowed by a Board for a purpose specified in paragraph (b) of Sec. 1394.7703 if the applicant establishes, in connection with the use of the vehicle for that purpose, either:

"(1) That a bona fide ride-sharing arrangement has been made pursuant to which at least four persons (including the operator) will regularly be carried in the vehicle for the purpose of going to and from or carrying on their occupations and that transportation is needed for such purpose: *Provided*, That each person must certify to his participation in the ride-sharing arrangement by signing the application; or

"(2) That no such ride-sharing arrangement could reasonably be made but that the vehicle carries as many persons as could reasonably be expected in the light of the circumstances in which and the purpose for which it is used; that transportation is needed for such purpose; and that no alternative means of transportation are available which would be reasonably adequate for such purpose.

"(i) An applicant may establish that four or more persons cannot regularly be carried in the vehicle for which application is made by showing: the limited capacity of the vehicle; the necessity of traveling at unusual or irregular hours; the necessity of traveling over routes not feasible for other persons who might be carried; or such other reasons as the Board may find sufficient.

"(ii) An applicant may establish the lack of reasonably adequate alternative means of transportation by showing the unavailability of other public or private means of transportation; or by showing that such alternative means, if available, are inadequate by reason of location, schedules or overcrowded conditions, by reason of physical disability of the person needing transportation, by reason of the nature of the work for which transportation is needed, or for such other reasons as the Board may find sufficient.

“(3) In the event the applicant or principal user is employed at a power generation or transmission facility, public utility, transportation or communication facility, or agricultural, extractive, industrial, military or naval establishment at which more than one hundred (100) persons are employed, the application, if made for a ration to be used for transporting such applicant or principal user to and from such place of employment, must be certified as indicated thereon by an official in charge of an organized transportation plan at such establishment.

“(4) In the event application is made for a supplemental ration in order to permit the use of the vehicle for which application is made in the pursuit of an occupation other than a gainful occupation, the application must be certified, as indicated thereon, by a responsible official of the organization, if any, for or under the direction of which the work is performed.

“(b) Upon the basis of the application and such other facts as the Board may require, the Board shall allow mileage for driving within the continental United States for any of the purposes listed in paragraph (b) of Sec. 1394.7703 for which applicant has applied, with respect to which the applicant has established the facts required by paragraph (a) hereof. The Board shall allow only that portion of the claimed mileage (in the absence of a ride-sharing arrangement) with respect to which the applicant has established the inadequacy of alternative means of transportation (in accordance with paragraph (a) (2) (ii) of this section). The Board shall then determine the total occupational mileage per month required by the applicant and allowed by it for the three-months’ period specified in paragraph (b) of Sec. 1394.7703 and shall issue a supplemental ration, in accordance with the provisions of Sec. 1394.7705, to provide such mileage: *Provided*, That the Board may not allow an average of more than 470 miles per month for any occupational mileage other than preferred mileage as defined in Sec. 1394.7706. The Board may allow an average mileage in excess of 470 miles per month only if such excess consists of such preferred mileage.

“(c) A Board having jurisdiction over an area which is adequately served by subway, elevated railroad, or railroad commutation service shall allow mileage claimed with respect to which a ride-sharing arrangement has been made only if the applicant establishes that the use of such subway, elevated railroad, or railroad commutation service would not be reasonably adequate for the purpose for which such mileage is claimed.

“(d) The Board shall deduct from the mileage it allows for a passenger automobile, in accordance with Paragraph (b) above, 150 miles per month for each additional passenger automobile (other than a fleet passenger automobile) owned by the applicant or by any person living in his household and related to him by blood, marriage or adoption, if the Board finds that such automobile is available to and adequate for the use of the applicant for the purpose for which the supplemental ration is sought. No such automobile shall be deemed available to the applicant if it is used, to a substantial extent, for an occupational purpose of another person; nor shall such automobile be deemed available to the applicant during the effective period of a supplemental ration issued to another person whose mileage allowance was reduced on account of such automobile.”

“Sec. 1394.7705. *Issuance of supplemental rations.* (a) Supplemental rations shall be issued to provide the total mileage allowed by the Board in accordance with Sec. 1394.7704.

“(1) In the case of a passenger automobile, the Board shall issue:

“(i) In the event that the mileage allowed by the Board is 470 miles per month or less: one Class B book having the valid period specified in Table I for the mileage allowed:

“(ii) In the event that the mileage allowed by the Board pursuant to paragraph (b) of Sec. 1394.7704 exceeds 470 miles per month: one or more Class C books bearing expiration dates three months from the date of issuance or November 22, 1942, whichever is later, and containing the number of coupons specified in Table II for the mileage allowed.

“(2) In the case of a motorcycle: one or more Class D books (to be marked ‘Supplemental’) bearing expiration dates three months from the date of issuance or November 22, 1942, whichever is later, and containing the number of coupons specified in Table I, if the mileage allowed is 470 miles per month or less, or specified in Table II, if the mileage allowed is in excess of 470 miles per month.

“(b) The Board shall remove and cancel all coupons in Class C or Class D books in excess of the number to be issued hereunder.

“(c) For the purpose of paragraph (a) of this section, a passenger automobile is conclusively presumed to operate 15 miles and a motorcycle 40 miles, per gallon of gasoline.

“(d) No supplemental ration shall be issued by a Board unless the applicant certifies that the registered owner, or his agent, has certified that no passenger-type tires (excluding motorcycle tires but including scrap tires) are owned by the registered owner of the vehicle or by any person living in the household of such owner and related to him by blood, marriage or adoption, other than tires reported on OPA Form R-17 or R-17 Revised or reported by a manufacturer to the War Production Board, or tires mounted (including one spare per motor vehicle) on motor vehicles or equipment; and no person shall be entitled to a supplemental ration if, at the time of issuance, the registered owner or any person living in his household and related to him by blood, marriage or adoption owns passenger-type tires (excluding motorcycle tires but including scrap tires) other than tires reported on OPA Form R-17 or R-17 Revised, or reported by a manufacturer to the War Production Board, or tires mounted (including one spare per motor vehicle) on motor vehicles or equipment.

[1] To be used only for vehicles entitled to basic rations.

In the event allowed mileage exceeds 1,110 miles, one additional coupon shall be issued for each 20 miles, or fraction thereof, of allowed mileage in excess of 1,110 miles. Additional books may be issued if necessary to provide additional coupons."

Further gasoline rations (Class C coupon books) are obtainable when the mileage is necessary for the carrying out of certain purposes; this is deemed "preferred mileage." Under Sec. 1394.7706 (o) (2) workers in the radio industry, other than salesmen, are eligible for preferred mileage. That section reads as follows:

"Sec. 1394.7706 *Preferred mileage*. The mileage driven in a passenger automobile or motorcycle by the owner or a person entitled to the use thereof, necessary for carrying out one or more of the following purposes, shall be deemed preferred mileage: * * *

"(o) By a worker, including an executive, technician or office worker (but excluding a person while engaged in promotional, merchandising, sales, landscaping or decorating activities, wholesale or retail delivery, and a member of the armed forces of the United States or military forces organized pursuant to section 61 of the National Defense Act, as amended), for travel to, from, within or between the establishments or facilities listed below, for purposes necessary to the operation or functioning of such establishment or facilities. * * *

"(2) Establishments or facilities of common carriers; or of other carriers performing services essential to the community or to the war effort; or of plants engaged in the production or distribution of light, power, electricity, gas, steam, or water; or of irrigation, drainage, flood control or sanitation systems; or of telephone, telegraph, radio or communications systems."

SALARY ADJUSTMENTS

The War Labor Board on November 6 issued a statement on its general policy toward *wage* adjustments under President Roosevelt's stabilization order of October 3.

Although this statement did not cover *salaries* specifically, it may be assumed that the Board's policy toward *salaries* under the order of October 27 will be approximately the same.

Permission to make any *general* salary (or wage) adjustments should be referred to your nearest *Wage and Hour Division* office. This office then will refer the case to the nearest regional office of the *War Labor Board*.

Individual adjustments, within certain limits, may be made without any official approval. For these limits see Sec. 4001.6 of the Order of October 27. (NAB REPORTS, p. 620.)

The text of the War Labor Board's statement:

The policy directive given the National War Labor Board by Congress and by the President is clear. Under that directive, the board will act on the presumption that wage rates prevailing on September 15, 1942, are proper. The board will grant wage increases over the level prevailing on September 15, 1942, only in exceptional cases and in accordance with the following paragraph of Executive Order No. 9250 of October 3, 1942:

"The National War Labor Board shall not approve any increases in the wage rates prevailing on September 15, 1942, unless such increase is necessary to correct maladjustments or inequalities, to eliminate substandards of living, to correst gross inequities or to aid in the effective prosecution of the war."

The National War Labor Board will examine carefully each claim for such exceptional treatment before approving any increase. In considering specific cases, the board will be guided by the following general principles. The application of these principles by regional directors will be subject to all general orders of the board and to its announced rules of procedure.

1. Maladjustments.

If a group of employes has received increases amounting to 15 per cent in their average straight-time rates over the level prevailing on January 1, 1941, the board will not grant further increases as a correction for maladjustments.

Beginning about January 1, 1941, a race between wages and prices began. Between that date and May, 1942, when the President's seven-point program to stabilize the cost of living was announced, the cost of living had risen 15 per cent as measured by the general index of the Bureau of Labor Statistics.

In the same period, very considerable but varying increases in wage rates were made. The irregularity of wage increases caused many maladjustments in the wage relationships between different plants and industries. A substantial majority of industrial workers had received more than 15 per cent increase; some had received less.

To correct these maladjustments the board will consider requests for general increases in straight-time rates up to 15 per cent above the level prevailing on January 1, 1941. This policy sets a terminal point for general wage increases. It is not applicable to individual workers or to employes in particular job classifications. It will be applied only to groups composed of all the employes in a bargaining unit, in a plant, a company, or an industry, depending upon the circumstances of each case.

Adjustment of wage rates to correct maladjustments may be made by regional directors; provided, however, that their authority in this regard will be limited to cases arising in those industries which have been specifically designated by the board, and if in the judgment of a regional director a wage adjustment for the correction of a maladjustment would act to unstabilize wages, the case shall be referred by him to a tripartite regional panel.

A list of designated industries is attached hereto and may be enlarged or modified by the board from time to time. Any proposed wage adjustments in industries not listed must be referred to the National War Labor Board at Washington for action.

2. Inequalities and gross inequalities.

The wage rate inequalities and the gross inequalities which may require adjustment under the stabilization program are those which represent manifest injustices that arise from unusual and unreasonable differences in wage rates.

Wage differentials which are established and stabilized are normal to American industry and will not be disturbed by the board.

The board itself will review cases where evidence is submitted to show that existing differences in wage rates are so discriminatory as to make their continuance a manifest injustice. Such evidence may be submitted to the regional director. If the regional director is satisfied that the evidence submitted so justifies, the claim may then be transmitted to the National War Labor Board in Washington for consideration.

3. Substandards of living.

In the President's message of April 27, 1942, and again in the executive order of Oct. 3, 1942, the word "substandard" is used with reference to the need for eliminating substandards of living. The National War Labor Board has dealt with but a very few cases in which the substandard issue has been a factor. Therefore the board is not in a position at this time to enunicate a general policy to govern the adjustment of wages to eliminate substandards of living. The board will not undertake to measure substandards of living by any fixed wage rate.

Such cases involving substandards of living as may arise will be considered by the board on their individual merits until sufficient experience has accumulated to permit the statement of a more general policy.

4. Effective prosecution of the war.

Under Executive Order 9250, the National War Labor Board may approve any increase of the wage rates prevailing on Sept. 15, 1942, if such an increase is necessary "to aid in the effective prosecution of the war." Every adjustment in Sept. 15, 1942, wage levels that the Board may make will be, in its judgment, for a more effective prosecution of the war.

The National War Labor Board will not approve wage increases for the purpose of influencing or directing the flow of manpower.

When in a particular case management and labor, in cooperation with the War Manpower Commission and other government agencies, have taken concerted action to solve a manpower need, the board will consider a request in that case to correct whatever inequalities or gross inequities may then need correction.

Programs for Victory

SCHOOLS AT WAR

WBIG, Greensboro, North Carolina, launched, on November 10, a new program "Schools at War" which will continue for one-half hour weekly through May 4.

Some 200 school children from the first grade through high school will participate in the program. And 21 public schools will be represented.

Each broadcast of the series will show practical education in concrete action.

KIDS BUY $265,000 WORTH

Last week's NAB Reports carried the account of "Commando Corps of the Court of Honor" at WKBW-WGR, Buffalo.

Jack Gelzer now reports that as of November 8 total dollar sales, not pledges, have passed the $265,000 mark.

MORE TUBES FOR HOME SETS

WPB has just authorized an increase in the manufacture of radio tubes for home receivers according to word from Frank McIntosh, Chief, Civilian Radio Section.

This constructive action was taken immediately after a field check-up revealed that some high demand tubes, in certain sections of the country, were inadequate for current needs. The increase is in line with Mr. McIntosh's statement to NAB, October 20, that WPB would make tubes and parts available in order to maintain domestic broadcasting.

The delay in restoring tube inventory to wartime proportions will be measured by the time required for fabricating the released nickel, manufacturing tubes and getting them to consumers.

Since all set failures are not due to tubes, a considerable amount of repair work will continue as usual. A "Victory" line of component parts which sharply reduces the size of required inventory is expected to be in production very soon. A meeting of parts manufacturers and WPB officials, November 17, is expected to iron out remaining details.

TOP PRIORITY IN 1943

Broadcasting will have a top priority rating of AA-1 for repairs and replacements beginning New Years Day, 1943.

This was disclosed in Washington this week when WPB announced a change in basic industrial strategy. Heretofore, Army and Navy have enjoyed the AA-1 and AA-2 priorities. The view now held by WPB is that victory also depends upon keeping the "Nation's civilian economy in a healthy condition."

Said WPB in part . . . "Communication and transportation systems, gas, oil and water lines and other services will be assured of materials to keep them performing their essential functions."

The present technique for securing materials and parts for broadcast stations remains in effect.

TRAINS WOMEN TECHNICIANS

Edward Whitlock, manager, WRNL, Richmond, is engaged in a program of training women technicians. The three, Mrs. Dorothea Brown and Mrs. Ruth Dorin have been housewives for the past ten years, while the third, Miss Terry Teal, is a recent college graduate.

For six hours each week the girls study in one of the ESMWT courses. The balance of their time is spent either at the station or the transmitter, under the tutelage of Walter Selden, WRNL Chief Engineer.

MARABLE JOINS WMBD

James Marable, formerly of the Chicago Civic Orchestra, Richard Czerwonky's University of De Paul orchestra and the American Opera Company, has now joined the string ensemble of station WMBD. Mr. Marable has studied with Walter Brauer, one of Chicago's leading cello teachers.

HOW TO BUY BLANK DISCS

Several broadcasters have made inquiries concerning Order P-133, with special reference to "5," which omits discs.

How To Do It

Blank discs for broadcasters may be purchased by either or both of the following methods:

(a) If broadcasters buy blanks direct from manufacturer, use Form PD-1A and file with WPB.

(b) If broadcasters buy blanks from a distributor, no priority is required.

UNITED CHURCH CANVASS NOV. 15

The United Church Canvass, with sixteen denominations and creeds, Christian and Jewish, has set aside the period, November 15 to December 8, to focus the attention of the Nation on the importance of church participation and to urge financial support for local community church appeals and the work among civilian population in war torn countries.

Charles E. Wilson, vice chairman WPB, is chairman of the Sponsors' Committee.

Niles Trammell, president of NBC, is chairman of the radio group.

Among those serving with Mr. Wilson are Herbert Hoover, Wendell Willkie, William Green, A. F. of L. head; James L. Kraft, president of the Kraft-Phenix Chese Corporation; Supreme Court Justice Owen J. Roberts, Mrs. Maurice L. Golden, president of the National Council of Jewish Women; Judge Florence E. Allen of Cleveland, and Charles P. Taft, Assistant Coordinator of the Federal Security Agency.

NEW BWC PUBLICATION

PROTECTION AND OPERATION OF DOMESTIC BROADCAST STATIONS IN WARTIME is the title of a new restricted publication now being mailed to all licensees of standard broadcast stations by the Board of War Communications.

This material has been in preparation for sometime by the Domestic Broadcast Committee IV, of the Board of War Communications. It is suggested that station managers and chief engineers carefully study the contents of this very important manual.

WPB ADVISORY COMMITTEE

Formation of a Radio and Radar Industry Advisory Committee has been announced by WPB, Division of Industry Advisory Committees, Ray Ellis, of the Radio and Radar Branch, is the Government Presiding Officer.

Committee members are: Max Balcom, Sylvania Electric Products, Inc., Emporium, Pennsylvania; M. Cohen, F. W. Sickles Company, Springfield, Massachusetts; W. P. Hilliard, Bendix Radio, Baltimore, Maryland; W. F. Hosford, Western Electric Mfg. Company, New York; E. E. Lewis, Radio Corporation of America, Camden, New Jersey; Percy L. Schonen, Hamilton Radio, New York; Al Wells, Wells-Gardner Company, Chicago, Illinois.

P-I DEALS

Vanderbie & Rubens, Inc., Chicago, Ill., offers a P-I deal on behalf of the Walton School of Commerce.

The Herald Advertising, San Antonio, Tex., seeks P-I business to sell "Oro-Sol Eye Drops."

The Tax Digest, New York City, attempts to break down established radio advertising practices by urging the sale of Modra's "1943 Income Tax Guide" on a per-inquiry basis.

United Advertising Companies, Chicago, Ill., now adds the National Birth Certificate Advisory Service to their long P-I list.

Washington Brothers, Washington, D. C., are offering broadcast stations the "privilege" of selling "quality merchandise" at contingent rates.

GOVERNMENT TAKES WRUL

The government has taken possession of WRUL, Boston, according to an official statement issued by Elmer Davis of OWI and James Lawrence Fly of FCC. The official statement says:

"Because of the need of having all short wave facilities available to the government before offensive action by American troops started in the European theater, the War Communications Board on Thursday of last week took possession of station WRUL, Boston, and made those facilities available to the Office of War Information.

"Fair compensation for use of these facilities will be determined in accordance with the statutory provisions which provide for government use of such facilities."

IRE FIVE-POINT WARTIME PROGRAM

To meet the wartime needs and obligations of the Institute of Radio Engineers, a 5-point war program was announced by Arthur F. Van Dyck, President of the IRE, at a meeting of the Institute, in Rochester, N. Y., on November 9.

The program follows:

1. Aid in allocation of manpower to improve the war effort.
2. Aid in standardization and simplification of parts and equipment in radio material used by the Armed Forces.
3. Broaden the scope of operations to include new applications of radio, which may be called electronics or radionics.
4. Streamline the IRE organization to operate at maximum efficiency.
5. Conduct post-war planning for radio and radionics, particularly television.

Stressing the extraordinary importance of radio in the war, Mr. Van Dyck said that to the radio engineer must go credit for developments which have greatly enhanced the communication of planes, ships, and tanks, as well as that of the infantry. He pointed to the increased utilization of radio made possible by new devices, many of which must remain military secrets until after the war.

"Radio engineers are devoting time and overtime in helping to win the war," said Mr. Van Dyck. "They will be entitled to good vacations when it is over, but even then they are not likely to get any time to rest up. The Armistice of this war will be heralded by radio loudspeakers all over the world, and will mark not only the end of the conflict but the beginning of a new period in which radio engineers will find it a vital duty to translate radio war developments to peacetime benefit as rapidly as possible."

NAB Director of Engineering, Howard S. Frazier, attended the meeting.

WAR CONTRACTORS ADVERTISING EXPENSE

Supplementing the article on the deductibility of advertising expenses on corporate income tax returns, the following release has only limited significance as it applies only to advertising expenditures by War Contractors as costs in Cost-plus-fixed-fee Contracts and such expenditures as part of overhead and management expenditures on Fixed-price Contracts.

The Procurement Policy Committee of WPB has recommended the uniform adoption of the policies set forth below in regard to expenditures for advertising by War Contractors:

Advertising Expenditures as Costs in Cost-plus-fixed-fee Contracts

As a general rule advertising is an inadmissible item of cost, on the reasoning that advertising is not required in order to do business with the Government. However, certain kinds of advertising of an industrial or institutional character, placed in trade or technical journals, not primarily with the object of selling particular products but essentially for the purpose of offering financial support to such trade or technical journals, because they are of value for the dissemination of trade and technical information for the industry are not really an advertising expense to effect sales so much as an operating expense incurred as a matter of policy for the benefit of the business and the industry.

Other Advertising Expenditures

Advertising expenditures done and paid for out of the contractor's fee on cost-plus-fixed-fee contracts, or as part of overhead and management expenditures on fixed-price contracts, are subject to review by the Price Adjustment Boards when they consider the broad question of company-wide excess profits on war business.

A reasonable expenditure for advertising shall be allowed by these boards even though a company shall be substantially or wholly engaged in war production.

The definition of "reasonable expenditure" to be followed by the Price Adjustment Boards is contained in a recent statement made by the Secretary of the Treasury as follows, "the test of whether expenditures for advertising are deductible is whether they are ordinary and necessary and bear a reasonable relation to the business activities in which the enterprise is engaged. This is not intended to exclude institutional advertising in reasonable amounts or good-will advertising calculated to influence the buying habits of the public. If such expenditures are extravagant and out of proportion to the size of the company or to the amount of its advertising budget in the past, or if they are not directed to public patronage which might reasonably be expected in the future, such payments will be disallowed as deductions."

When an industry has been substantially or wholly converted to war production, the Price Adjustment Boards will recognize that the amount of advertising expenditure necessary to maintain a trade mark or brand name of a product in the public consciousness is much smaller than that required for promotion of the same product in a normal competitive market.

919 STATIONS

During the month of October, 1942, the Federal Communications Commission granted no permits for the construction of new stations. Operating licenses were issued to two stations. A comparative table by month follows:

	Nov. 1	Dec. 1	Jan. 1	Feb. 1	Mar. 1	Apr. 1	May 1	June 1	July 1	Aug. 1	Sept. 1	Oct. 1	Nov. 1
Operating	877	882	887	891	893	897	899	906	906	905	905	907	909
Construction	38	37	36	32	31	27	25	18	19	16	15	12	10
	915	919	923	923	924	924	924	924	925	921	920	919	919

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, November 16. They are subject to change.

Thursday, November 19

WMRO—Martin R. O'Brien, Aurora, Illinois.—Modification of license, **1280 kc.**, 100 watts night, 250 watts day, unlimited.

Consolidated Hearing

WALB—Herald Publishing Company, Albany, Ga.—Renewal of license, **1590 kc.**, 1 KW, DA-night, unlimited.

WALB—Herald Publishing Company (Assignor); Albany Broadcasting Company (Assignee), Albany, Ga.—Voluntary assignment of license of Station WALB, **1590 kc.**, 1 KW, DA-night, unlimited.

WALB—Herald Publishing Company, Albany, Ga.—C. P., **1550 kc.**, 1 KW, DA-night, unlimited.

Friday, November 20

WKBW—Buffalo Broadcasting Corporation, Buffalo, N. Y.—Renewal of license (main and auxiliary), **1520 kc.**, 50 KW, unlimited, DA-day and night.

WGR—Buffalo Broadcasting Corporation, Buffalo, N. Y.—Renewal of license (main and auxiliary), **550 kc.**, 1 KW, night, 5 KW day, unlimited, DA-night.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WIAC—Enrique Abarca Sanfeliz, San Juan, Puerto Rico.—Granted modification of license (B-ML-1138) to change main studio location from San Juan to Hato Rey, Puerto Rico.

KROC—Gregory P. Gentling (deceased), Transferor; Agnes P. Gentling (executrix of estate of Gregory P. Gentling, deceased), Transferee, Rochester, Minn.—Granted consent to transfer of control (B4-TC-310) of Southern Minnesota Broadcasting Co., licensee of station KROC, from Gregory P. Gentling (deceased) to Agnes P. Gentling, his widow.

Voice of Christian Youth, Detroit, Mich.—Granted authority to transmit for broadcasting to station CKLW, Windsor, Ontario, Canada, religious programs to be originated in the sanctuary of the Wesley Methodist Church, Detroit.

W53H—The Travelers Broadcasting Service Corp., Hartford, Conn. —Granted license (B1-LH-14) to cover construction permit (B1-PH-12) for high frequency (FM) broadcast station; **45300 kc.**, 6100 square miles.

DESIGNATED FOR HEARING

The Fort Hamilton Broadcasting Co., Hamilton, Ohio.—Designated for hearing application for construction permit (B2-P-3469) for a new station to operate on **1450 kc.**, with power of 250 watts, unlimited time.

Eastern Broadcasting Co., Inc., Huntington, L. I., N. Y.—Designated for hearing application for construction permit (B1-P-3277) for a new station to operate on **1520 kc.**, 1 KW, limited to WKBW.

MISCELLANEOUS

WMIS—Natchez Broadcasting Co., Natchez, Miss.—Passed motion to take depositions in re applications of WMIS and WGRM for renewal of licenses.

WGRM—P. K. Ewing, Greenwood, Miss.—Passed motion to take depositions in re applications of WMIS and WGRM for renewal of licenses.

WGAR—The WGAR Broadcasting Co., Cleveland, Ohio.—Granted motion for order to take depositions in re application for construction permit (Docket 6309).

WGAR—The WGAR Broadcasting Co., Cleveland, Ohio.—Granted petition for leave to amend application for construction permit (to move to site originally proposed) and to reopen record for further hearing to be held December 4, in re applications of WGAR, WHBC and WADC.

KFXM—J. C. Lee and E. W. Lee (Lee Brothers Broadcasting Co.), San Bernardino, Calif.—Granted petition to amend application for construction permit (to request only a modification of license to change hours of operation to unlimited) and remove from hearing docket.

Northeastern Penna. Broadcasters, Inc., Wilkes-Barre, Pa.—Referred to the full Commission petition to hold further hearing at Wilkes-Barre, Pa., in re applications for a new station at that place.

WORK—York Broadcasting Co., York, Pa.—Granted petition to continue to December 16 the hearing now scheduled for November 16, in re application for modification of construction permit.

KWFT—Wichita Broadcasting Co., Wichita Falls, Texas.—Denied petition to discontinue further proceedings in re application for modification of license.

WBYN—WBYN-Brooklyn, Inc., Brooklyn, N. Y.—Granted motion to dismiss without prejudice application for modification of license.

WHEB—R. G. LeTourneau, Transferor; The LeTourneau Foundation, Transferee, Portsmouth, N. H.—Granted motion to dismiss without prejudice application for transfer of control of station WHEB.

WBOW—Banks of Wabash, Inc., Terre Haute, Ind.—Granted petition to dismiss application for construction permit (B4-P-3459).

KXKX—First National Television, Inc., Kansas City, Mo.—Adopted order denying as in default the application for renewal of license of station KXKX (**1590 kc.,** 1 KW, unlimited), and terminated temporary license heretofore issued pending hearing and decision on application. Applicant failed to enter an appearance for hearing on October 5. On October 7 the Commission was advised the corporation was without funds to continue operation of station.

WLW—The Crosley Corp., Cincinnati, Ohio.—The Commission on its own motion adopted an order to supplement issues in re application for modification of license (Docket 6341) for authority to operate station with 50 KW night, 500 KW local sunset, using transmitter of experimental station W8XO, on which a hearing is scheduled for November 26, 1942.

Northeastern Penna. Broadcasters, Inc., Wilkes-Barre, Pa.—Denied petition for leave to hold further hearing at Wilkes-Barre in re applications of Wilkes-Barre Broadcasting Corp., Central Broadcasting Co., Key Broadcasters, Inc., and the applicant, for a new station in that city, provided, however, that after the hearing has been concluded in Washington a further hearing for the taking of additional testimony may be adjourned by the presiding officer to Wilkes-Barre, if the following showing is made under oath, to the reasonable satisfaction of the presiding officer: (1) the name and address of each person whose testimony is desired to be taken; (2) the specific subject matter concerning which each witness is to testify and that such testimony is relevant, competent, and not unduly cumulative, and (3) the reason or reasons why each witness is unable to attend a session of the hearing in Washington.

WRET—Ralph A. Horton (Portable-Mobile), area of Ft. Lauderdale, Fla.—Granted license to cover construction permit for new relay broadcast station (B3-LRE-422).

KEUB—Eastern Utah Broadcasting Co., Price, Utah.—Granted authority to install automatic frequency control equipment (B5-F-249).

WEGR—Westinghouse Radio Stations, Inc. (Portable-Mobile), area of Philadelphia, Pa.—Granted license to cover construction permit for new relay broadcast station (B2-LRE-423).

WMAZ—Southeastern Broadcasting Co., Inc., Macon, Ga.—Granted modification of construction permit (B3-P-3043 as modified, which authorized change of frequency, increase power, directional antenna day and night, and move of transmitter) for extension of completion date to January 6, 1943 (B3-MP-1664).

APPLICATIONS FILED AT FCC

570 Kilocycles

WMAM—M and M Broadcasting Co., Marinette, Wis.—Modification of license to change hours of operation from daytime to unlimited time, with power of 100 watts night, 250 watts day.

950 Kilocycles

WAAF—Drovers Journal Publishing Co., Chicago, Ill.—Authority to determine operating power by direct measurement of antenna power.

1170 Kilocycles

WAPI—Voice of Alabama, Inc., Birmingham, Ala.—Modification of construction permit (B3-P-3098, which authorized change in frequency, increase in power, change hours of operation, and install directional antenna for night use) for approval of directional antenna system for night use.

1370 Kilocycles

WSAY—Brown Radio Service and Laboratory (Gordon P. Brown, owner), Rochester, N. Y.—Modification of construction permit (B1-P-2924), which authorized change in frequency, increase in power, installation of directional antenna, new transmitter and move of transmitter for change in transmitter location, change in type of transmitter and changes in directional antenna. Amended: re changes in directional antenna for night use.

1390 Kilocycles

KGER—Consolidated Broadcasting Corp., Ltd., Long Beach, Calif.—Modification of construction permit (B5-P-3096 as modified), which authorized installation of new equipment, increase in power, installation of directional antenna for night use, and move of transmitter for extension of completion date from 11-12-42 to 12-12-42.

1400 Kilocycles

KVRS—Wyoming Broadcasting Co., Rock Springs, Wyoming.—Transfer of control of licensee corporation from R. R. West to Marjorie Lannen McCracken (99.96%).

MISCELLANEOUS APPLICATIONS

NEW—General Electric Co., San Francisco, Calif.—Construction permit for a new special relay broadcast station to be operated on **31220, 35620, 37020, 39260 kc.,** 75 watts, A3 emission. Amended: to request change in frequencies to **30820, 33740, 35820,** and **37980 kc.**

WNYE—Board of Education, City of New York, Brooklyn, N. Y—License to cover construction permit (B1-PED-18) as modified, which authorized changes in equipment, frequency, power and emission.

WBEZ—Board of Education, City of Chicago, Chicago, Ill.—Modification of construction permit (B4-PED-22 as modified), which authorized construction of a new non-commercial educational broadcast station for extension of completion date from 12-7-42 to 3-7-43.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

International Trustees, 217 East 3d St., Des Moines, and Spiegel, Inc., 1061 West 35th St., Chicago, is charged in a complaint with operating a deceptive "trust fund" scheme to collect delinquent accounts for Spiegel, Inc., which does a mail order business in household furnishings and other merchandise. (4863)

National Lacquer Manufacturing Co., and trading as National Titanium Co., Vernon, Calif., selling and distributing paint and paint products, is charged in a complaint with misrepresentation. (4864)

Scotch Woolen Mills, Chicago, is charged in an amended and supplemental complaint with misrepresenting the nature and extent of its business and the source of the woolen cloth used in the "made-to-measure" clothing it manufactures. (940)

Valmor Products Co., Famous Products Co., and Madam Jones Co., 2241 Indiana Ave., Chicago, advertising, selling and distributing various medicinal preparations and cosmetics, is charged in a complaint with false advertising and misrepresentation. (4866)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Di-Function Co., Inc., 2233 North Main St., Fort Worth, Tex., engaged in the manufacture and sale of a preparation designated "Di-Function", advertised as a treatment for diabetes, has been ordered to cease and desist from false advertising and misrepresentation. (4666)

Electro-Health Appliance Co., Los Angeles, engaged in the rental and sale of an electrical device designated "Electro-Health Short Wave Diathermy," has been ordered to cease and desist from false advertising and misrepresentation of its product. (4501)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Kimberly Gem Co., Inc., 503 Fifth Ave., New York, engaged in selling semi-precious stones designated "Zircons," has stipulated to cease and desist from representing that Zircons will cut glass or withstand all acid tests that diamonds will; through use of the word "Kimberly" as a part of its trade name, without full and plain disclosure of the true source of its Zircons, that its Zircons were imported from Kimberley, South Africa, or that Zircons are diamonds or any kind of a diamond. (03070)

Koto Cosmetic Co., 7039 Monticello St., Pittsburgh, stipulated that in the sale of preparations designated "Koto Cleansing Cream," "Koto Vanishing Cream" and "Koto Lemon-Almond Lotion" he will cease and desist from representing that any of these products has therapeutic value for skin troubles or is effective in preventing or curing blackheads, pimples, freckles, or wrinkles. (03069)

William H. Rorer, Inc., 254 South 4th St., Philadelphia, manufacturing a product for use as a fertilizer essentially of the well-known "5-7-5" type under the name "Plant Dinner," has stipulated in connection with the advertising, sale and distribution of the product, or any other product of substantially the same composition or possessing substantially the same properties, to cease and desist from representing that it is a "perfect all-purpose nutrient"; that it will afford "all the food" needed by a plant, regardless of its kind and the character of soil in which it is rooted; that it will provide a "full course meal" for plants generally, or any other representation of similar meaning tending to convey the belief that the product contains all such elements as to assure or provide that type of food or diet which is appropriate or best suited to the particular needs of each plant treated therewith. (3557)

1626 K STREET, N. W. WASHINGTON, D. C. Vol. 10, No. 46, November 20, 1942

Petrillo Hearings Scheduled

Senator D. Worth Clark (D-Idaho), Chairman of the sub-committee of the Senate Interstate Commerce Committee, appointed pursuant to a Senate Resolution to investigate the activities of Mr. Petrillo and the American Federation of Musicians in banning recordings, announces that the hearings will get under way on Monday, December 7.

The sub-committee, in addition to Senator Clark, includes Senator McFarland (D-Arizona); Senator Tobey (R-New Hampshire); Senator Tunnell (D-Delaware); and Senator White (R-Maine).

NORRIS RESOLUTION COMMITTEE

Senator Wheeler (D-Mont), Chairman of the Senate Interstate Commerce Committee, this week appointed the following sub-committee to investigate the subject matter of the Norris Resolution (S. Res. 305,—see NAB REPORTS, October 16, p. 600): Johnson (D-Colo), Chairman; Hill D-Ala); Tunnell (D-Del); White (R-Maine); Tobey (R-N. H.); and Reed (R-Kans).

No date has yet been set for the hearings.

MANNING TABLE PLAN

As a result of conferences with Selective Service officials this week in Washington, the NAB has reached the conclusion that the Manning Table Plan (See Supplement No. 2 to NAB Selective Service Handbook, dated November 13, 1942) is not well adapted to the radio broadcasting industry generally. It is designed to expedite the orderly withdrawal from industry into the army of workers in large industrial units. Based on 608 returns from the NAB Manpower Survey, it appears that the average radio broadcast station employs only 21 persons, and that the range is from 2 employees to only 132 employees. However, any station that believes the Manning Table Plan adapted to its deferment and training program is eligible to participate under the plan, and should communicate with the appropriate regional office of the War Manpower Commission as listed in Supplement No. 2.

NAB MANPOWER SURVEY

NAB staff members have held frequent conferences with officials of National Headquarters of Selective Service. Two important ones, on Monday and Thursday of this week, pertained to the facts developed by the NAB Manpower Survey. Selective Service officials are greatly impressed by the survey, not only for the information produced in tabulation, but also by the individual questionnaires which have been submitted to Selective Service with express approval of individual stations in connection with the consideration of appeals.

The manpower questionnaire was sent to all 919 broadcast stations licensed by the Commission. To date, 667 replies have been received. This represents a 73% response. The tabulation was made commencing October 20, utilizing 615 stations. The survey shows that on October 19, 1940, the average station employed 22.482 persons. On September 15, 1942, the station average had dropped to 21.087. The employment of men by stations dropped from 18 to 16. Employment of women rose from 4.385 to 4.952. In the two-year period, all station employment decreased 6.2%; a 10.9% decrease for men and a 12.9% increase for women.

In the two-year period 26.2% of the men employed by stations were lost to the armed services. Roughly, two-thirds of those going into the armed services enlisted or were ordered to active duty in reserve capacity. About 35% were drafted.

Considerable concern has been expressed over the migration of employees within the industry to other stations, other civilian employment, as well as to the armed services. The survey shows that 69.5% of the personnel employed at October 19, 1940, had left stations between that date and September 15, 1942. This means a movement of seven of every ten employees.

On September 15, 1942, 64.4% of all persons employed by stations were in draft ages 20 to 45 years. In addition, boys of ages 18 and 19 constituted 4.3% of all employees, bringing the present percentage within draft age to 68.7%. A selective service classification of those within ages 20 to 45 years on September 15th as expressed in percentages shows men classified in 1A or 1B to be 9.0%; those in 2A or 2B, 2.3%; those holding reserve commissions or awaiting call, 1.3%; classification 3A, 67.6%; classification 3B, 1.5%; classification 4, 9.5%; and not yet classified, 8.8%.

Stations classified as essential men to their operation only 19% of their employees. In terms of average employment per station, only 4 of 21 were listed as essential. In terms of actual figures as reported in the survey, 608 stations showed total employment of 12,821 and listed as "necessary men", 2.464. Of this number, 150 were in Selective Service classification 1A, 116 were in 2A or 2B and 1,958 in 3A or 3B. Approximately 67% of the men in 3A and 3B have dependent children. Thus it can be readily seen that a request of the industry to National Selective Service for deferment of essential employees involves an exceedingly small number of registrants.

Additional survey results will be presented in next week's NAB REPORTS. It is planned within the next two weeks to complete individual station tabulations to be sent to those stations cooperating in the survey. Each station will also receive tabulations for all stations in the state in which it is located and a copy of national summaries. Each NAB District Director will be provided with three copies of the summary of each state within his District. He will be asked to

submit one copy to the State Director of Selective Service, one copy to the State Occupational Advisor of Selective Service, and retain one copy for his own files. National Selective Service headquarters has indicated that it feels it will be helpful to the State Director and to the Occupational Advisor to have this information at hand when advising local boards with respect to cases involving broadcasting personnel.

OWI RAIDING STATIONS

The following wire was received at NAB Headquarters from a New England broadcaster:

"We desire protest most vigorously against OWI procedure in sending representatives to technicians of small stations offering them high salaries and particularly draft exemptions to leave and take civil service jobs at some fifty new short wave government propaganda stations. Government is training thousands of technicians for themselves but now brazenly raids existing stations without consulting managements or considering consequences to stations. Yesterday Mr. Mack Bougere, chief technical director from New York office, interviewed our staff unknown to me and today formal letters arrived addressed to our men. We have barely enough licensed men now to keep on the air and are threatened with imminent loss of every man by draft or enlistment. We cannot train replacements unless we compel our chief engineer to drop his work teaching hundreds of enlisted men at government radio school here. Should he drop this just to train a few replacements for us? He now operates here at the station and also works eight hours daily teaching for government. How can he also train replacements for us? I consider this action of OWI as outrageous and it will put us off the air in short order. Can you take this matter up for us?"

OWI was immediately contacted. In the absence of William B. Lewis, Chief of the Radio Bureau, the matter was discussed with his assistant, Douglas Meservey. This was followed up with a letter to him signed by Neville Miller's assistant, C. E. Arney, Jr.

"Pursuant to the telephone conversation which I have just completed with you, I am sending you herewith a copy of the telegram just received.

"I wish again to emphasize the serious situation growing out of this practice. Draft officials are realizing more and more the necessity for deferment of some of these technical men in radio stations. We have every reason to believe that henceforth radio stations will not be subjected to the severe drain on manpower in the technical field which has marked the operation of the draft heretofore. With this problem solved we feel the small operators are measurably protected.

"If, however, the OWI Overseas Division is going to seek to take these men away from stations as indicated by this station operator, I can foresee a severe curtailment of domestic broadcasting. I have no hesitancy in saying to you I consider this a most serious problem.

"As a first step I think it would be highly desirable if whoever is in charge of the recruiting for the technical staff for the Overseas Division would contact the managements of the stations first to ascertain the situation which exists in the stations. There is no need to emphasize the fact that radio broadcasters have, without exception, demonstrated their very sincere desire to cooperate with the war effort, in every way, including the surrender of some of their necessary personnel. But if OWI and the government are to continue to call upon stations to perform the communications job which they are asking of it, some steps must be taken to preserve essential personnel.

"I hope you will give this early and earnest attention. We would like to be advised of what action is taken."

WPB ANNOUNCES VICTORY LINE OF REPAIR PARTS TO KEEP HOME SETS IN OPERATION

The tentative list of radio replacement parts to keep the nation's radio receivers in operation throughout the war was completed by WPB Nov. 19. This standardization of component parts is known as the Victory line, according to Frank McIntosh, Chief, Civilian Radio.

Tell the Trade About It

It is suggested that broadcast stations call the release of the Victory line information to the attention of their local radio trade, since it may be many weeks before the information reaches it through the monthly trade magazines in that industry.

The list of volume controls below will replace 2,700 types. The several types of dry electrolytic condensers will replace 357 types; the listed paper condensers will do the job formerly done by 300 types. The 200 types of transformers and chokes have been sharply reduced as indicated. Several other parts, not listed, are to be included in the Victory line of parts.

As far as tubes for home receivers are concerned, WPB has actually completed 95% of the work involved in solving this problem. In order to conserve material here it was necessary first to consume tubes on the shelves of the distributors so that a measured volume of tubes could be manufactured and handled within the limits of allowable material.

Victory line consists of

RADIO REPLACEMENT TYPES

Dry Electrolytic Condensers

Cap. Mfg.	*Rated Voltage*
25	50 volts
8	150 volts
20	150 volts

Transformers and Chokes

Power:

1. 350V @ 90 Ma. for 2.5V. Tubes— to Service 6-9 Tube Radios
2. 350V @ 120 Ma. for 2.5V. Tubes— to service 10-13 Tube Radios
3. 350V @ 70 Ma. for 6.3V. Tubes— to Service 5-7 Tube Radios
4. 350V @ 120 Ma. for 6.3V Tubes— to Service 8-11 Tube Radios
5. 350V. @ 150 Ma. for 6.3V. Tubes— to Service 12-15 Tube Radios

Output:

1. 8 Watt Universal with Various Impedances
2. 18 Watt Universal with Various Impedances

Input:

1. Small 3:1 for AC-DC and many AC Radios
2. Large Universal with Split Secondary

Driver:

1. Tapped Universal Driver with 3 Popular Ratios

Choke:

1. 50 Ma. 300 Ohm Choke for most AC-DC Radios
2. 110 Ma. 200 Ohm Choke for 7-9 Tube AC Radios
3. 150 Ma. 200 Ohm Choke for 10-13 Tube AC Radios

Volume Controls

1. Shaft
   a. All shafts to be made of steel, either round or knurled as indicated for type listed below.
   b. Round shafts to be milled with .218" flat.
   c. Length of round or knurled shafts 2⅛" beyond ⅜" bushing (2½" overall length).
   d. All shafts to be of the built-in or fixed type.
2. All universal controls are to be of the midget or junior type, approximately 1⅛" in diameter and are to be of the type that receive an adaptable switch.
3. All accessories such as nuts, washers, ground terminals, and bias resistors packed with controls in the past are to be eliminated.
4. Standardized line of untapped universal controls with fixed round shaft with flat, totaling 19 controls.

Resistance	*Taper*

DISTRICT 16 MEETING

The two-day meeting of District 16 of NAB opened in Los Angeles on Thursday morning, November 12, 1942, with District Director Calvin J. Smith of KFAC presiding. The opening day was devoted to a discussion of the problems of broadcasters during the war and to a study of the uses of broadcasting to further the war effort.

The opening day speakers included: Neville Miller, President of NAB; Robert Coleson, Western Division Radio Office of the War Department; Major John C. Winch, Marine Corps; Ralph Block, Regional Director, Ninth District, Office of Civilian Defense; Captain Gordon Snow, Selective Service Administration, Washington, D. C.; Carl Haverlin, Headquarters Consultant, and William Lewis, Chief, Radio Bureau, Office of War Information; Eugene Carr, Office of Censorship, Washington, D. C. At the close of the first day's sessions, Mr. Miller outlined the present status of the AFM-Petrillo problem and the NAB stand on the situation was unanimously endorsed by formal resolution of the broadcasters in attendance.

Luncheon on the opening day was highlighted by two talks: Mr. Miller ably outlined the war work of broadcasters to an appreciative audience that included many of the business and industrial leaders of Los Angeles; while Leo Carillo of stage and screen fame recited a pseudo-serious, highly amusing story of the early history of California. The second day was devoted to sales problems and a presentation of the Retail Promotion Committee Plan for the development of additional retail business for broadcasting stations. Toward the end of the morning meeting, Paul Barksdale d'Orr, State Regional Rationing Director, discussed the application of the gasoline rationing program to broadcasting personnel.

At the luncheon meeting on the second day, the noted orchestra leader, Kay Kyser, recounted his recent experiences in a series of performances for the armed forces. Mr. Kyser's moving appeal for an all-out offensive on the home front was enthusiastically received and applauded by an unusually large group of broadcasters and distinguished guests.

The meeting on the second day was presided over by Charles Storke of KTMS, while the discussion of sales problems was led by Lewis H. Avery of the NAB staff.

Those registered:

John L. Ackerman, KPAS; Joe Allbaugh, KFMB; Lewis Avery, National Ass'n Broadcasters; H. L. Blatterman, KFI; E. W. Buckalew, CBS; Ralph Block, Office Civilian Defense; Mark Brenneman, KFAC; Dean Banta, KERN; Frank Burke, Jr., KFVD; Matt Barr, KFI; Fox Case, KNX; Russ Clancy, Associated Press; Volney Cunningham, KFI; W. P. Casson, KFI; Robert Coleson, War Department; Eugene Carr, Office of Censorship; Merwin Dobyns, KGER; Bud Edwards, KFI; Harry Engels, BMI; Ernest Felix, KFI; Homer Griffith, KFMB; Dave Glickman, Broadcasting; Ensign George, U. S. Navy Recruiting; Richard Graham, NBC; E. J. Gough, SESAC & Treasury Department; Carl Haverlin, BMI-Office of War Information; T. P. Hunter, KGER; Duke Hancock, KGFJ; E. L. Hughes, KFWB; Cornwall Jackson, Office of War Information; Dean Jennings, Office of War Information; Jerry King, Standard Radio; Sgt. Kendall, U. S. Marine Corps; J. Livingston, Associated Program Service; Howard Langley, Office of War Information; Dick Lewis, KTAR; Sgt. Jerry McLain, U. S. Marine Corps-Phoenix, Ariz.; Wally McLain, KNX; C. P. MacGregor, C. P. MacGregor Recording Studios; Walter McCreery, Office of War Information; Don McNamara, KFI-KECA; Lawrence McDowell, KFOX; Neville Miller, NAB; George Moskovics, KNX; Chester Matson, Edward Petry & Company; Harry Maizlish, KFWB; Marshall Neal, KWKW; Van Newkirk, KHJ; Don Otis, KFAC; Murray Ostroff, KFWB; Richard Powers, ASCAP; Jennings Pierce, NBC; Howard Ray, KPRO; Dorothy Roe, KFI; Oma Rhodes, KFI; Calvin J. Smalley, KFVD; Don Thornburgh, KNX; Leo B. Tyson, Blue Network; Ken Thornton, KXO; R. O. Tinkham, KMTR; M. A. Vroman, KFXM; Jimmy Vandiveer, KFI; W. S. Wiggins, KVOE; Harry Witt, KNX; Jack Willen, Press; Sgt. Wheeler, U. S. Marine Corps; Major Winch, U. S. Marine Corps; Lee Wynne, KGER; Karl Wyler, KTSM.

MORE ABOUT P-133

Some questions have arisen from the broadcasting industry as to how Preference Rating Order P-133 operates and what materials can be secured under Preference Rating Order P-133.

A WPB informant answers these questions as follows:

First, it is desired to point out that Limitation Order L-183 has no connection with Preference Rating Order P-133. The questions most generally asked regarding the assignment of Preference Rating P-133 are questions as to just what particular items can be purchased with the rating of A-1-j assigned to the order by the operators of broadcast stations. The following can be purchased with a rating of A-1-j assigned by the stations, in accordance with the form printed in the order.

Material necessary for maintaining equipment in good working condition or for the repair or reconstruction or restoration, without expansion, improvement or change of design of any portion of an operator's buildings, structures and equipment when it has been rendered unsafe or unfit by wear and tear or other similar causes but *not* including reconstruction or restoration of any portion damaged or destroyed by fire, flood, tornado, earthquake, Act of God or the public enemy or theft or other complete demolishment or loss.

The question asked in regard to such cases as lost or stolen remote amplifiers are answered by stating that the broadcast station must apply on Form PD-1A for replacement of equipment lost to service by such means as flood, fire, etc. In this way, each individual unit needed to be completely replaced is considered on its particular merits.

The purchase of recording discs cannot be made with the assistance of a preference rating assigned under P-133. This is pointed out in the Order where it states under operating supplies that the word does not mean recording discs, film or other recording media. The purchase of recording discs, if made through regular jobbing channels, should be done without the aid of priority assistance, the jobber securing a rating to give to his manufacturer by means of application to the War Production Board on Distributors' Form, PD-1X. Should the station be accustomed to purchasing the blanks directly from the manufacturer, he must apply to the War Production Board for preference rating of A-3 on Form PD-1A.

If vacuum tubes are not available and will require a higher rating than A-1-j to secure, application must be made on a PD-1A Form to the WPB for an assignment of rating. In order to comply with the inventory requirements specified in P-133, it should be pointed out on the back of the PD-1A Application that the tubes asked for will not increase inventory above the minimum necessary spare tubes. Likewise, care should be taken to point out that all tubes above 25 watts in power will be returned to the manufacturer upon purchase of new tubes asked for as must also be done when applying an A-1-j rating under P-133.

Too much emphasis cannot be placed upon the apparent need for all station engineers to take every means possible to conserve equipment.

It may be desirable to point to a few examples:

A new air-conditioning unit cannot be purchased under P-133 as a means of conserving tube life. If you did not have the unit to operate before, you cannot purchase one now under the term "Maintenance."

New remote amplifiers cannot be purchased to take care of increased remote broadcasts by the simple assignment of A-1-j preference rating to the Order.

If an amplifier burns out a power transformer, clean the wax out of the tube sockets, clean up the chassis as best you can, replace the power transformer with one you secure under a P-133 assignment of A-1-j but DO NOT buy a new amplifier.

If the stations sell more remote broadcasts than you have fixed amplifiers to install, do not assume that a new one is necessary to "maintain" your station. If you cannot make one out of the junk-box, you will just have to carry the portable unit around more often.

And by the way, if you have portable battery operated units, you had better make up an adaptor harness to convert it to standard batteries, since under Limitation Order L-71, no more odd size batteries are being made and only standard sizes will be available when stocks are depleted.

NETS TO SUPREME COURT

The Federal statutory three-judge court in New York last Monday dismissed on the merits, and without taking evidence, the CBS and NBC suits against the Government seeking to annul the FCC's network regulations and to enjoin the Commission from enforcing them. The court continued the stay order until February 1, 1943, or until such earlier time as the Supreme Court hears the argument on the appeals which the networks have announced they will take to that court. Under the Urgent Deficiencies Act the networks have the right of direct appeal to the Supreme Court.

William S. Paley, President of CBS, issued the following statement concerning the decision:

"We will take immediate steps to bring the case before the Supreme Court, which earlier in the year reversed a prior decision of this Statutory Court on the question of jurisdiction in the same case. We believe any enforcement of the proposed FCC rules would seriously jeopardize the vital role which network broadcasting is playing in the war effort, and we will vigorously defend our right to continue the nation wide service which we are rendering.

"The text of the Statutory Court decision seems to us to be based upon a narrow legalistic interpretation of the Communications Act with which we frankly disagree, and which wholly disregards the irreparable damage which might be done to American broadcasting. We are confident that no final determination of this case can ignore the fact that our present American system of broadcasting has produced the highest level of audience approval and of public service of any country in the world."

Niles Trammell, President of NBC, made the following statement:

"Steps will be taken immediately to perfect an appeal to the United States Supreme Court."

In response to requests for a statement, Chairman James Lawrence Fly of the FCC said: "The court's decision speaks for itself. I do not think any comment from me would be appropriate."

The opinion of the court in full is printed on pp. 659.

PHILADELPHIA TRAINING PROGRAM

To fill the vacancies in the ranks of broadcast technicians in the Philadelphia radio stations caused by the draft, enlistments in the Army and Navy, and departures to war industries, the Philadelphia Local of the American Communications Association proposed a training plan which calls for the cooperation of the Philadelphia radio station managements and the Board of Education.

At a meeting held November 16, 1942, in the studios of WFIL, representatives of the three groups went over details of the plan as presented by Charles C. Smith, Chairman of the Union Committee. The plan was unanimously adopted and will be placed immediately in operation.

The plan is applicable to two classes of trainees. The first class consists of persons who already hold operator's licenses but have had no practical experience in a radio broadcast station.

The second group of trainees will be those who have not yet had the theoretical course required for obtaining an operator's license.

In respect to the first group, the Union is selecting a tested list of qualified applicants who hold licenses. These applicants will be distributed and routed by the Union through the stations in such a manner that each applicant will spend one week in succession at each of the eight Philadelphia stations, all of which have joined in approving the plan. In this manner each applicant will receive eight weeks' actual experience in every variety of station, large and small. He will receive no pay for this training period which is arranged in hours when it will not interfere with the trainee's present employment. Likewise, the training he receives in the stations will be given by Union members, who will receive no extra pay for this effort. At the end of the eight weeks period of practical experience, if the applicant is approved by the Chief Engineers of the stations and by the Union Shop Stewards in the stations, he will be eligible for employment by the managements and, if employed, will come in under the existing agreements now in force between the Union and the eight Philadelphia stations. All the stations operate under CIO Union-Shop Agreements.

In respect to the second group, applicants approved by the Union as qualified will then be accepted as students at the Dobbins Vocational School, 22nd and Lehigh Avenue, where a course as radio technicians will be given under the supervision of W. E. Brunton, Associate Director of War Production Training of Philadelphia, under the Board of Education of Philadelphia. The course will contain subjects deemed essential by the Union, the Philadelphia station managements, and the school authorities. The teachers in this special course will be experienced technicians who are now members of the Union. They will be paid modest fees by the Board of Education War Training Plan. The equipment necessary for the laboratory work in the training course will be provided by the stations where possible and supplemented by equipment purchased by the Board of Education. The necessary books will be also provided by the Board of Education but will be available for purchase by the applicants.

The entire training plan will be placed in operation promptly. The first group of licensed applicants to receive practical station experience will consist of eight trainees, one to start in each of the eight stations. They will commence work Wednesday, November 18, 1942.

The first group in the theoretical course will consist of 25 applicants. Their course will commence Monday, December 7, 1942. The theoretical course will continue for 13 weeks, the requirement being 15 hours of school work per week. These hours will be 7:00 to 10:00 p. m., five nights a week. At the end of the theoretical course, if the applicant succeeds in passing the examination for the broadcast license, the applicant will then be eligible to go on to the eight weeks practical training course conducted by the Union in the stations.

This entire procedure is being supervised by Charles C. Smith, Chairman of the Union Committee, who has interviewed all applicants and assigned them by roster among the stations.

The meeting on November 16th was attended by Mr. Smith, Chairman of the Union Committee, and the following Union Committee members:

Dick Shipp—WPEN
Paul Krantz—WIBG
Frank Pfaff—WIP
I. N. Erney—KYW
C. E. Roder—KYW

Representing the stations, were Samuel R. Rosenbaum, President of WFIL, Chairman of the Management Committee, and the following station representatives:

WCAU—George Lewis, Chief Engineer
David P. Gillett
KYW—Ernest Gager, Chief Engineer
WIP—Benedict Gimbel, Jr., President,
Clifford Harris, Chief Engineer
WHAT—Milton Laughlin, General Manager
WIBG—Edward Clery, General Manager
WPEN—Arthur Simon, General Manager
WDAS—Alexander W. Dannenbaum, Sr.

The Board of Education was represented by:

W. E. Brunton, Associate Director of War Production Training of Philadelphia
I. N. Baker, Principal of Dobbins Vocational School
L. J. Lipp, Coordinator—Dobbins Vocational School, 22nd and Lehigh Avenue

In announcing the adoption of the plan, Mr. Rosenbaum said: "This evidence of constructive forethought by the Union for the benefit of the industry is an example of the excellent and friendly relations which exist in Philadelphia between the employers and the Union. The operation of the plan requires hearty cooperation from the stations which it will receive. However, the amount of work involved from the Union Committee is far greater than the effort required from the stations. The Union is rendering a real service to the cause in which all parties are interested."

November 17, 1942.

RADIO COURSES IN PORTLAND

This is the story of the cooperation of Portland, Oregon, radio stations in promoting the training of radio technicians in accordance with the plan National Association of Broadcasters worked out with the U. S. Office of Education. Information was forwarded by Harry Spence, KXRO, Aberdeen, Washington, director of NAB District 17, as received from Chief Engineer Harold C. Singleton, KGW-KEX, Portland. Mr. Singleton supervised classes in Portland, assisting Professor Arthur Albert, Oregon State College, who was designated by Dean Dearborn to supervise this work. Last January stations in Portland and Oregon began publicizing the radio training classes.

Students Make Good

Over 300 persons responded to the announcements over Portland stations last January. Three courses of approximately 35 students each were organized to begin Part I, Fundamentals of Radio. Out of the graduates of this group were supplied a number of radio men to the armed forces. Nine went into Navy Radar work. Seven passed the FCC examination for second class radiotelephone license. One man secured a first class radiotelephone license. Many men report that they got better jobs servicing, etc., as a result of taking the training course, and a couple of women got into radio work at the conclusion of the class.

The above classes were conducted at Benson Polytechnic School where students had the use of radio shop facilities. At the end of the first course Dean Dearborn, Prof. Ben Nichols and Prof. Arthur Albert proposed that a new series of classes be organized in Portland.

Navy to the Front

At that time Engineer Singleton proposed working in close harmony with the Navy and plans were perfected with Chief Gibson, in charge of radio recruiting at the Portland Navy Recruiting office.

Emphasis on mathematics was a desired feature of the courses and Rose Singleton, who received her degree in mathematics and science, including radio, offered to assist in this part of the work. The success of this class exceeded original expectations. This program has now been expanded and has grown to be the most important of the ESMWT radio training work in Portland.

Results

Three Pre-Radar classes have been graduated. Eight Pre-Radar classes are now in progress. And in addition to these Navy classes, there is a class in Fundamentals of Radio Part I and a class in Fundamentals of Radio Part II, now in progress.

"Numerous men and women desiring to enter other services have inquired about getting our math and radio work," reported Mr. Singleton. "To accommodate these people we featured one of our recent classes as being open to anyone intending to go into radio work in the WAVES, Navy, WAAC, Signal Corps, Air Forces, Coast Guard and Marines.

"Lt. Wendt and Chief Day, stationed with the Seattle recruiting office, recently came to Portland and went over the details of the course with the idea of starting similar classes in Seattle.

"Some of the men enlisted before entering our classes and they were given 90 days in active duty status to complete the work. Others completed the course, receive their ratings and then enlist. We usually have a few in the class who have applied for commissions in the Radar Branch, and who take the course as a brush-up while waiting for their commissions.

"Lt. Comdr. DeGrave and Ensign Smith have expressed their appreciation for the cooperation in training these men for Navy Radar service."

Instructors, beside Engineer Singleton, and Rose Singleton include: Ralph Deardorff; Howard Beckendorf; Ensign Smith; Nathon Director; Jay Mangan; Mike Meihoff; Martin Lantz; George Barger; and Kenneth Aldrich, most of whom are communications engineers connected with P. T. and T. Company and the Bonneville Administration.

10 SECTIONS IN RADIO AT MANHATTAN

Brother Victor and Brother Leo, respectively President and Dean of Engineering, Manhattan College, New York City, visited NAB headquarters, yesterday, Nov. 19. Ten sections of the Fundamentals of Radio are currently being taught at Manhattan, three of which are Part II, according to these officials. First students to complete Part II were graduated in October, after 32 weeks of study, three hours per night, three nights per week. They have all been absorbed.

NAVY THANKS WESTERN STATIONS

The help in recruiting Radio Technicians which radio stations in the eleven states comprising the Navy's Western Division has extended, is acknowledged in a letter to NAB, by Lieut. A. P. Matthews, Assistant Recruiting Inspector, San Francisco.

Lieut. Matthews worked as Radio Technician Procurement Officer under direction of Captain E. B. Lapham, Recruiting Inspector. It is his purpose to secure "green" men with proper prerequisites for in-service training as Radar maintenance men.

Quoted below are several lines from Lieut. Matthews' letter which we are passing on to western broadcasters:

"I cannot sign off without taking this opportunity of personally expressing to you the cooperation *every* radio station in the Western Division—the eleven western states upon whom I called—has given. It has been swell regardless of location, size, network or independent. The personnel at our recruiting stations has taken me and many others over for fifteen-minute interviews, etc., on our Radio Technician program. And, of course, the many "free" hours, etc., certainly show that NAB is sure fighting this war along with the men in uniform."

PLEASE TELL US THE FACTS!

Letters from station managers frequently comment on the employment of students at their stations of men and women who have attended the ESMWDT-NAB course in the Fundamentals of Radio. It will be helpful to NAB in dealing with the manpower problem to receive additional information as to the value of these courses.

Elsewhere in today's Reports it is revealed that Portland, Oregon, classes produced graduates who passed first and second class radiotelephone examinations. And in October Ed Allen, manager, WIBA, Madison, Wis., wrote that two graduates of Fundamentals of Radio were working at his station. Other reports have been received from New York state. Ohio, Texas and Pennsylvania saying that the situation had been greatly improved there by these courses.

Though this is the first time NAB has actually asked for such information it will be appreciated if you will forward definite facts, like above examples, at your early convenience. Even if you have done so before, as a part of a letter, it will be helpful if you will compose a letter on this one subject alone.

"CHURCH CANVASS" COMMITTEE

The Radio Committee of United Church Canvass, headed by Niles Trammell of NBC, is made up of the following additional members:

Birt Fisher, KOMO, Seattle; John Hogan, WQXR, New York; Alfred J. McCosker, WOR, New York; William S. Paley, president, CBS; O. L. Taylor, KTSA, San Antonio; Mark Woods, president of the Blue network.

KVOO COONTZ NOW MARINE OFFICER

Edward C. Coontz, former program director of KVOO, Tulsa, was commissioned Second Lieutenant, the Marine Corps, last Saturday, November 14. This followed his successful completion of work in the Officer Candidate Class at Quantico. His address at the present time is: 2nd Lt. Edward C. Coontz, 15th R.O.C., Barracks B, Quantico, Virginia.

COST OF LIVING

The Labor Department reports that the cost of living rose one per cent from September 15 to October 15. The increase since May 15 has been 2.6 per cent.

BWC SHORT WAVE ORDER

Following is the official order of BWC in connection with the closure of international broadcast stations WRUL, WRUS, and WRUW, already announced:

WHEREAS, The Board of War Communications has determined that the national security and defense and the successful conduct of the war demand that the operation of International Radio Broadcast Stations WRUL, WRUS, and WRUW shall be subject to control by the Government of the United States;

NOW THEREFORE, By virtue of the authority vested in the Board;

IT IS HEREBY ORDERED, That International Radio Broadcast Stations WRUL, WRUS, and WRUW BE, AND THEY ARE HEREBY, DESIGNATED FOR CLOSURE and, effective immediately, ARE HEREBY CLOSED;

IT IS FURTHER ORDERED, That notwithstanding the provisions of the paragraph immediately preceding, effective immediately, the Office of War Information, on behalf of the United States of America, BE, AND IT HEREBY IS authorized to use and control the said international radio broadcast stations and any or all of their apparatus and equipment in accordance with the terms of Executive Order 8964 of December 10, 1941, and the Federal Communications Act of 1934, as amended, all in such manner and upon such further terms as the Director of the Office of War Information may deem necessary for the national security and defense and the successful conduct of the war.

Subject to such further Order as the Board may deem appropriate.

FEDERAL COMMUNICATIONS COMMISSION

FLY PRESS CONFERENCE

Chairman James Lawrence Fly, of the FCC, indicated at his press conference on Monday that this week he would send a report to Senator Wheeler, Chairman of the Senate Committee on Interstate Commerce, in the form of a letter dealing with the recent complaint of the Cooperative League. If the report is to be made public, it will be given out by the Senator.

Chairman Fly was questioned at his conference regarding the new Manning Table Plan of the War Manpower Commission. Mr. Fly said that the Commission has done nothing regarding this plan.

Discussing this particular plan and the manpower situation as it affects the broadcasters, Mr. Fly said:

"After all, that is a matter for the decision of the Selective Service and the War Manpower people. All I can do is cooperate with them—studies and investigations and recommendations and help them understand—the main job has been done here—largely by the industry, in arriving at definitions and the understanding of the jobs and functions. But we are not in a position to make the decisions. I don't mean to say the problem is not acute; of course it is acute. And that is the reason we have such a great and continuing interest in it, but the whole manpower problem in all industries is acute."

PER-INQUIRY DEALS

Director & Lane, advertising company of New York City, is asking for per-inquiry business in behalf of Arco Publishing Company's book, "Practice Tests for the Army."

The Harold Dellon Music Co., Cleveland, O., are submitting per-inquiry deals to the stations in an effort to sell their songs.

OPINION

IN UNITED STATES DISTRICT COURT, SOUTHERN DISTRICT OF NEW YORK

NATIONAL BROADCASTING COMPANY, INC., WOODMEN OF THE WORLD LIFE INSURANCE SOCIETY AND STROMBERG-CARLSON TELEPHONE MANUFACTURING COMPANY, Plaintiffs,

v.

THE UNITED STATES OF AMERICA, The FEDERAL COMMUNICATIONS COMMISSION and MUTUAL BROADCASTING SYSTEM, INC., Defendants.

CIVIL 16-178

COLUMBIA BROADCASTING SYSTEM, INC., Plaintiff,

v.

THE UNITED STATES OF AMERICA, Defendant.

FEDERAL COMMUNICATIONS COMMISSION and MUTUAL BROADCASTING SYSTEM, INC., Interveners.

CIVIL 16-179

Before: L. HAND, C.J., and GODDARD and BRIGHT, D.JJ.

On motions by the defendants for summary judgments dismissing the complaints herein in two actions to "annul" certain regulations of the Federal Communications Commission and to enjoin the Commission from enforcing them.

L. HAND, C.J.: These cases come before us a second time upon motions made by the defendants and the Mutual Broadcasting System—which has intervened—summarily to dismiss the complaints. The motions are made upon the complaints, upon certain affidavits of the counsel for the Commission, upon the Commission's report and all the proceedings and evidence before it, and—we shall assume—upon the affidavits filed by the plaintiffs on their motions for preliminary injunctions. We shall not repeat the outline of the controversy as set forth in our opinion in 44 Fed. Suppl. 688, and in that of the Supreme Court which reversed our judgments dismissing the complaints, 316 U. S. 407; but shall proceed directly to consider the points raised.

The most important of these is whether the Commission had power to pass the challenged regulations. Everyone agrees that in granting licenses under § 309 of Title 47, U. S. Code, it must distribute the available wave lengths so as to give greatest possible service, and that it must see to it that all applicants have the necessary technical ability to broadcast programs, that the stations are properly constructed and properly manned and do not interfere with other stations, and that the licensees are responsible, morally and financially. All these things and perhaps more, the Commission may regulate in discharge of its duty to promote the "public convenience, interest, or necessity." The regulations at bar have, however, nothing to do with these qualifications of a licensee; they are addressed, not to his ability to broadcast any programs which he may accept, but to his freedom to procure other programs than those to which by contract with, or by the control of. the "networks" he is limited; they touch, not how he shall broadcast, but how unrestricted he shall be in doing so. The plaintiffs say that, judged both by its history and by its language, the Act gave the Commission power to consider only the qualifications first specified, leaving outside any administrative control all arrangements by which a station secures its programs. They say that, although it is true that § 313 makes "all laws * * * relating to unlawful restraints * * * applicable to * * * interstate or foreign radio communications," and that the courts have jurisdiction in this way to annul monopolies or restrictive contracts which affect broadcasting, only courts may do so; the Commission must disregard any such considerations when deciding whether to grant or refuse a license.

Section 303 defines the Commission's powers; its original was § 4 of the Radio Act of 1927 which had eleven subdivisions, of which the first ten were the same as the first eleven of § 303 except for a new subdivision ("g") introduced into § 303. The eighth subdivison ("h") of § 4 of the Radio Act (now the ninth ("i") of § 303) gave the Commission "authority to make special regulations applicable to radio stations engaged in chain broadcasting;" and on it the Commission particularly relied. The plaintiffs answer that it was meant merely to give the Commission control over the power and wave-lengths used by stations while connected with "networks" for "chain broadcasting." It was introduced by an amendment in the Senate and originally read that the Commission should have power, "when stations are connected by wire for chain broadcasting," to "determine the power each station shall use and the wave lengths to be used during the time stations are so connected and so operated, and make all other regulations necessary in the interest of equitable radio service to the listeners in the communities or areas affected by chain broadcasting." The first clause of this amendment was indeed limited as the plaintiffs say; but the same was not true of the second clause.

"Equitable radio service to the listeners" was a comprehensive phrase; read most naturally, it should include the best possible service compatible with such burdens as it was reasonable to impose upon the "networks" and their "affiliates"—"equitable," that is, in the sense that the interests of both sides were to be weighed. The fact that the occasion for the amendment appears to have been the Senate's apprehension that the "networks" might drown out "unaffiilated" stations, by no means circumscribed the scope of these words. This amendment finally emerged from Conference and was enacted, in the broad terms we have quoted; it would be altogether unwarranted to assume that it was intended to adopt the limited clause and to abandon the general one. We may start therefore with the strong probability that even in the Radio Act of 1927 the Commission had power by virtue of this subdivision to regulate "chain broadcasting" generally in the interest of "listeners."

The amendment to § 303 of the Communications Act of 1934, that is, the interpolation of subdivision "g," confirms this interpretation. That subdivision reads as follows: "Study new uses for radio, provide for experimental uses of frequencies, and generally encourage the larger and more effective use of radio in the public interest." We can see no reason for confining the last clause to scientific or engineering problems; the purpose is apparent to give the Commission power to foster the industry in all appropriate ways. It is not clear that this was a new purpose; but if it was, it infused the powers already granted in the earlier act, broadening them in accord with the changed outlook—the power granted under subdivision "i" among the rest. The duty—for the power imposed a corresponding duty—to "encourage" the "larger" use of radio incidentally presupposed a power to prevent the frustration of the purpose so disclosed; we are not to construe the section as at war with itself. Therefore, even if § 303 stood alone, we should hold that subdivision "i" granted power to the Commission to consider the effect upon a station's choice of programs of any controls or restrictions exercised by the "networks."

However, § 303 does not stand alone. In addition to providing that all laws "relating to unlawful restraints and monopolies and to combinations, contracts, or agreements in restraint of trade" should apply to "radio communications," § 313 also took over from § 15 of the Act of 1927 the provision that in actions brought under those laws or in proceedings to enforce orders of the Federal Trade Commission, whenever "any licensee shall be found guilty of the violation of the provisions of such laws or any of them, the court, in addition to the penalties imposed by said laws, may * * * decree that the license of such licensee shall * * * be revoked." As will be observed, revocation was here made a penalty like other penalties for monopoly or restraint of trade; the courts were not to use it as a means of compelling a licensee to furnish service free from unlawful restrictions, but to punish him for his past misconduct, the discretion accorded them being exercised according to the degree of his "guilt." This was in harmony with the general scheme, for a court is not in good position to know how far a monopolistic or unfair competitive practice may interfere with "the larger and more effective use of radio in the public interest"; if any official was competent to do so, it was the Commission. Section 13 of the Radio Act of 1927 had provided that if a court revoked a license, the Commission must refuse to renew it, but it had stopped there; and, as the law then stood, it might perhaps have been argued with some show of plausibility that an applicant's monopolistic or unfair competitive practices in the past were not relevant to the grant of a license.

However that may have been, § 13 was amended in 1934 by adding a new clause, and the resulting § 311, in addition to retaining the old language forbidding the restoration of a forfeited license, contained a new one providing that the Commission is "authorized to refuse such station license" whenever the applicant had been "finally adjudged guilty" by a "Federal court of * * * attempting unlawfully to monopolize radio communication * * * or to have been using unfair methods of competition." That power was certainly not to be used as a punishment; the Commission was not to overrule the court which had decided not to impose the penalty. Such a power would have been open to serious constitutional objection. What use then was the Commission to make of an adjudication of the applicant's "guilt"? Only, we submit, by considering it as evidence that, if granted a license, he would not use it for the "public convenience, interest, or necessity," i.e. that the grant of a license would not "encourage the larger and more effective use of radio in the public interest." The necessary implication from this was that the Commission might infer from the fact that the applicant had in the past tried to monopolize radio, or had engaged in unfair methods of competition, that the disposition so manifested would continue and that if it did it would make him an unfit licensee. Thus, whatever may have been the limits of the Commission's earlier powers, manifestly after 1934 they included a consideration of how far licensees might be improperly restricted in the exploitation of their licenses.

The plaintiffs do not concede even this, as we understand it, but in any event they insist that the exercise of any such power was conditioned upon an earlier adjudication by some court. We can see no reason to suppose (although apparently the Commission does not agree) that an applicant's violation of the statutes against monopoly and unfair competition, as such and alone, ever disentitles him to a license. It is indeed evidence relevant to his fitness for the reasons we have just given; but it is such only as any past conduct may be an earnest of what is to be expected in the future, and because a repetition would be prejudicial to the public interest. We construe this clause of § 311 as going no further than to provide the Commission with an estoppel as to any facts which a court may have found; these may be taken as data for any rational inference that can be drawn from them relevant to the ultimate issue; but "guilt" as "guilt" is not the ultimate issue. Certainly that is the only effect which it is necessary to give the clause; there is not the slightest warrant for inferring that in the absence of an adjudication, the Commission may not determine what has been an applicant's past conduct, or may not consider how far, if repeated, it would interfere with the fullest use of his license. Whatever may be the mysteries enveloping an adjudication of "guilt" under the Anti-Trust laws which make that issue unfit to be entrusted as such to profane hands, the Commission is certainly peculiarly conpetent to appraise the effect upon broadcasting of restrictive or monopolistic practices, and is as competent to decide whether an applicant is likely to engage in them as it is to decide any of the other issues which come before it. The decision in *Federal Communications Commission* v. *Sanders Brothers Radio Station*, 309 U. S. 470, is irrelevant; the only question decided was whether the injury suffered by an existing station was a material factor in licensing a new station.

The plaintiffs next challenge the regulations because they lay down general conditions for the grant of licenses instead of reserving decision until the issues arise upon an application. Such a doctrine would go far to destroy the power to make any regulations at all; nor can we see the advantage of preventing a general declaration of standards which, applied in one instance, would in any event become a precedent for the future. It may perhaps be true that a party, who had no notice of the hearings before the Commission and no opportunity to present his side, would be entitled, when applying for a license, to a reconsideration of those findings upon which the regulations rested. None of the plaintiffs at bar are in that position; they were amply advised of what the Commission proposed; they were invited to attend; all but the co-plaintiff "affiliates" of the National Broadcasting Company did so, put in whatever evidence they wished and were heard before the original regulations were passed, and again at the rehearing. They at any rate were accorded all the privileges they would have had if they had intervened in an application for a license. It would be futile after the expenditure of so much time and labor to hold that the proceedings were only advisory and concluded nobody; indeed, the mere fact that the regulations are "orders" reviewable under § 402(a) would seem to preclude such a conclusion. We do not understand the Supreme Court to mean that every minatory gesture of the Commission is reviewable under that section.

The next objection is that the Commission did not really find that the forbidden practices worked against "the public convenience, interest, or necessity," but that it rested upon its supposed duty to deny the applications of all who proposed to use their licenses in violation of the Anti-Trust laws. The Commission in one passage of its report does indeed seem so to have understood the statute, though it would scarcely be fair to say that it held as much; but, be that as it may, it did not base its action upon that theory. It made specific findings in the case of each regulation that the contract or the control which it forbade was against the public interest because it took away the stations' free choice without any corresponding advantage to the industry as a whole. Each regulation was a specific exercise of power, addressed to a particular practice which interfered with the most "effective use of radio in the public interest."

The only constitutional objections which we need consider are two: that the standard set by § 303 ("public convenience, interest, or necessity") is too vague; and that the regulations invade the privilege of free speech. Although the Supreme Court has twice at least upheld the standard when applied to the construction of stations or to the allocation of wave lengths (Federal Radio Commission v. Nelson Brothers Bond & Mortgage Co., 289 U. S. 266, 285; Federal Communications Commission v. Pottsville Broadcasting Co., 309 U. S. 134, 137, 138; (semble) Panama Refining Co. v. Ryan, 293 U. S. 388, 428), the plaintiffs insist that it will not serve if used to regulate the business arrangements of a station. We are assuming that when so used it demands the widest practicable variety in the choice of programs available for broadcasting; that system which will most stimulate and liberate the ingenuity of those who purvey them to the public. There can be no doubt that, if the introductory clause of § 303 will bear that construction the test is definite enough—and indeed peculiarly adapted to the putative proficiency of the Commission in its field. Nor can we see why, when applied to the issue of the licensee's freedom from restraint, the test is not a fair gloss to be imposed upon the clause. It is impossible in a single rubric to specify all the occasions to which it will apply, and the effort at specification is usually abortive for they cannot all be foreshadowed. It is enough if the delegated power be so defined that a clue can be found in it for dealing with the several occasions which may arise. That seems to us to be the situation here.

The argument drawn from the First Amendment, as we understand it, is this. It is true that the regulations do not profess directly to control what programs the stations may broadcast; but they do so indirectly. They do this by forbidding them to make the forbidden contracts with "networks" even though they believe that these will bring them better programs than they can get in any other way; and it is not necessary for a law directly to control the substance of an utterance for it to invade the right of free speech. We agree that the regulations might be invalid though they do not prohibit programs on the basis of their contents; they do fetter the choice of the stations; absolutely free choice would include the privilege of deciding that they preferred the opportunities open to them under the "networks" contracts to those which would be otherwise available. The Commission does therefore coerce their choice and their freedom; and perhaps, if the public interest in whose name this was done were other than the interest in free speech itself, we should have a problem under the First Amendment; we might have to say whether the interest protected, however vital, could stand against the constitutional right. But that is not the case. The interests which the regulations seek to protect are the very interests which the First Amendment itself protects, i.e., the interests, first, of the "listeners," next, of any licensees who may prefer to be freer of the "networks" than they are, and last, of any future competing "networks." Whether or not the conflict between these interests and those of the "networks" and their "affiliates" has been properly composed, no question of free speech can arise.

The last question upon the merits is whether the Commission's findings are so plainly without support in the evidence as to be "arbitrary or capricious," § 402(e); that is, whether the regulations are certain not to promote the "public convenience, interest, or necessity." A majority of the Commission, after a long and painstaking investigation, has concluded that the net result will be to give a larger choice to stations without sensibly diminishing the services of "chain broadcasting," which the report highly commended. We are asked to say that there is no reasonable basis for such a conclusion; to say that no reasonable person could find in the evidence any support for it. The industry at large holds conflicting views; the plaintiffs on the one hand believe that the prohibitions will in the end destroy "chain broadcasting" altogether; the Mutual Broadcasting System and a number of other interested persons think otherwise. Each side has stated its reasons and the Commission has chosen. It was created to make such choices because Congress believed that it would acquire in its special sphere a skill which courts could not match: and it is now horn-book law that the conclusions of such tribunals are not to be disturbed except in the plainest case. That doctrine applies here with especial force just because the findings are necessarily prospective; time alone can decide their success or their failure.

The measure of our power is to say whether there was any substantial evidence that the added freedom given to stations will outweigh the reduction in the opportunities which will remain open to the "networks." We cannot say that there was no such evidence. To take the regulation which is the head and front of the Commission's offending—3.104—it indeed does limit the power of a "network" to furnish large advertisers with the time of all its "affiliates," for it must always run the risk that after its last inquiry a station may have "sold" to another "network" the time which it proposed to "buy" of that station. On the other hand, it is certainly possible that the present contracts give the "networks" so strong a hold upon the industry as to keep down competition which would prove beneficial. Upon such an issue nobody who is not steeped in the details of the business is really entitled to an opinion, and indeed even the opinions of those who are so steeped must be largely speculation. But that does not mean that the industry must be left to itself; the Commission was created precisely to say how far it was best to let things stand, and how far to intervene.

There remains only the question of precedure: whether a motion for summary judgment is proper, or whether, as the plaintiffs argue, the causes should go to trial and be heard upon evidence taken de novo. That depends upon what effect we should give to the Commission's findings. If the plaintiffs intervened in a proceeding by one of their "affiliates" for the renewal of a license, they could not compel the Commission to reconsider the findings of the report. As we have said, they had had adequate notice and full opportunity to be heard; indeed neither of the complaints alleges that they had not. Upon appeal to the Court of Appeals of the District of Columbia under § 402(b), the whole record before the Commission upon the hearings which resulted in the regulations would be part of the record, and the only issues open would be whether there was substantial support for the findings in the record, and whether the findings were "arbitrary or capricious," § 402(e). That record and those issues are before us here. The plaintiffs did not choose to wait and intervene, but adopted the alternative of an action in equity to "set aside" and "annul" the regulations as "orders." The reason that they have been allowed to proceed in this way is that the regulations inflicted a present injury upon them from which they were entitled to present relief; but the determining issues in each case are the same. Congress, having meant the validity of an order refusing a license to be determined as an appeal upon the record made before the Commission, cannot have meant to allow a larger scope of review because the Commission threatens for the same reasons to refuse all licenses.

This is confirmed by considering what use we could make of any evidence if we took it. It might go to show that the Commission had failed to give adequate notice to the plaintiff of what it proposed, or an adequate opportunity to put in their own evidence, or an adequate hearing upon all the evidence; but aside from the fact that the record is before us and does not bear out such a contention, neither complaint, as we have just said, alleges anything of the kind. On the other hand, if the evidence went to contradict or overthrow the findings, we could not bring it into hotchpot with the evidence taken by the Commission, without deciding the issues in the first instance ourselves. We have no such power; it would upset the whole underlying scheme of an expert commission, whose orders must stand or fall upon such evidence as it had before it. *Tagg Bros. & Moorhead* v. *United States*, 280 U. S. 420; *Acker* v. *United States*, 298 U. S. 426. If an aggrieved party wishes to supplement that evidence he must apply to the Commission itself, § 405.

The plaintiffs somewhat faintly invoke the doctrine of *Crowell* v. *Benson*, 285 U. S. 22, *Baltimore & Ohio Railroad Co.* v. *United States*, 298 U. S. 349, and *St. Joseph Stock Yards Co.* v. *United States*, 298 U. S. 38. Assuming that that doctrine is still law (*Railroad Commission of Texas* v. *Rowan & Nichols Oil Co.*, 310 U. S. 573; S. C. 311 U. S. 570), it does not apply. The "networks" are indubitably engaged in interstate commerce and so are their "affiliates"; it is a question of law, not of fact, whether the regulations are within the Commission's powers, and the only issue of fact, assuming it can be called such, is whether there was evidence to support the findings. Unless the distinction between what is jurisdictional and what goes to the exercise of a power is to disappear altogether, the Commission's jurisdiction did not depend upon whether they rightly estimated the "public convenience, interest, or necessity."

The complaints will be dismissed; and as there has been no trial, we need make no findings. As before, we will grant a stay, this time until February 1, 1943, or until the argument of the appeal in the Supreme Court, whichever is earlier. The same findings which we then made will serve with slight verbal changes. We are filing the judgments, the stays and findings along with this opinion.

Complaints dismissed.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, November 23. They are subject to change.

Thursday, November 26

WLW—The Crosley Corp., Cincinnati, Ohio.—Modification of license, **700 kc.,** 50 KW day, 500 KW night, unlimited, using W8XO transmitter.

Wednesday, November 25

WRDO, Inc., Augusta, Maine.—C. P., **1400 kc.,** 250 watts, unlimited.

Further Hearing

WFAS—Westchester Broadcasting Corp., White Plains, N. Y.—Modification of license, **1230 kc.,** 250 watts, unlimited.

Monday, November 23

The Voice of The Orange Empire, Inc., Ltd., Santa Ana, Calif.—C. P., **1480 kc.,** 1 KW, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KFDM—Beaumont Broadcasting Corp., Beaumont, Texas.—Granted construction permit (B3-P-3500) to install a new transmitter.

KLRA—Arkansas Broadcasting Co., Little Rock, Ark.—Granted extension of special service authorization (B3-SSA-48) for period not to exceed expiration date of construction permit, March 13, 1943.

DESIGNATED FOR HEARING

WERC—Presque Isle Broadcasting Co., Erie, Pa.—Designated for hearing modification of license application (B2-ML-1134) to change frequency from **1490** to **1330 kc.,** and reduce nighttime power to 100 watts, unlimited time.

LICENSE RENEWALS

Granted renewal of following station licenses for the period beginning December 1, 1942, and ending in no event later than December 1, 1944:

KDFN, Casper, Wyo.; KERN, Bakersfield, Calif.; KFJM, Grand Forks, N. D.; KGNO, Dodge City, Kans.; KILO, Grand Forks, N. D.; KIDO, Boise, Idaho; KLRA, Little Rock, Ark.; KSLM, Salem, Ore.; KTBS and auxiliary, Shreveport, La.; KTSM, El Paso, Tex.; KUJ, Walla Walla, Wash.; KWK, St. Louis, Mo.; KXYZ, Houston, Tex.; WAKR, Akron, Ohio; WAWZ, Zarephath, N. J.; WBCM, Bay City, Mich.; WBIG, Greensboro, N. C.; WBNS and auxiliary, Columbus, Ohio; WBRY, Waterbury, Conn.; WBYN and auxiliary, Brooklyn, N. Y.; WCSC, Charleston, S. C.;

WFBL, Syracuse, N. Y.; WGAR and auxiliary, Cleveland, Ohio; WHEC, Rochester, N. Y.; WHIS, Bluefield, W. Va.; WHP and auxiliary, Harrisburg, Pa.; WIRE and auxiliary, Indianapolis, Ind.; WKBH, La Crosse, Wisc.; WMBG and auxiliary, Richmond, Va.; WROK, Rockford, Ill.; WSAN, Allentown, Pa.; WSFA, Montgomery, Ala.; WSPD, Toledo, Ohio; WWSR, St. Albans, Vt.

Granted renewal of following station licenses for the period ending in no event later than February 1, 1943:

KGEK, Sterling, Colo.; KPHO, Phoenix, Ariz.; KYSM, Mankato, Minn.; WJNO, West Palm Beach, Fla.

Granted renewal of following station licenses for the period ending in no event later than April 1, 1943:

KFBC, Cheyenne, Wyo.; KMAC, San Antonio, Tex.; KOVO, Provo, Utah; KPFA, Helena, Mont.; WPAX, Thomasville, Ga.; WRAL, Raleigh, N. C.

Granted renewal of following station licenses for the period ending in no event later than June 1, 1943:

KAND, Corsicana, Tex.; KVOX, Moorehead, Minn.; KWLM, Willmar, Minn.; WFIG, Sumter, S. C.

KFPY—Symons Broadcasting Co., Spokane, Wash.—Granted renewal of license for the period ending not later than August 1, 1944.

WHBI—May Radio Broadcast Corp., Newark, N. J.—Granted renewal of license for the period ending not later than October 1, 1944.

WNAB—Harold Thomas, Bridgeport, Conn.—Granted renewal of license for the period beginning December 1, 1942, and ending in no event later than October 1, 1943.

KTBI—Tacoma Broadcasters, Inc., Tacoma, Wash.—Granted renewal of license for the period beginning December 1, 1942, and ending in no event later than December 1, 1943.

Granted renewal of following station licenses for the period beginning December 1, 1942, and ending in no event later than December 1, 1944:

KABR, Aberdeen, S. D.; KCMO, Kansas City, Mo.; KELA, between Centralia and Chehalis, Wash.; KGER, Long Beach, Calif.; KGNC, Amarillo, Tex.; KGNF, North Platte, Nebr.; KLPM, Minot, N. D.; KMED, Medford, Ore.; KSO, Des Moines, Iowa; WFEA and auxiliary, Manchester, N. H.; WMBD, Peoria, Ill.; WMPS, Memphis, Tenn.; WNBC and auxiliary, Hartford, Conn.; WPAB, Ponce, Puerto Rico.

WWDC—Capital Broadcasting Co., Washington, D. C.—Granted renewal of license for the period beginning December 1, 1942, and ending in no event later than October 1, 1943, for main and synchronous amplifier.

KFXM—J. C. Lee and E. W. Lee (Lee Bros. Broadcasting Co.), San Bernardino, Calif.—Granted renewal of license for the period ending in no event later than April 1, 1943.

WBIR—J. W. Birdwell, Knoxville, Tenn.—Granted renewal of license for the period ending in no event later than April 1, 1943.

WFHR—William F. Huffman, Wisconsin Rapids, Wisc.—Granted renewal of license for the period ending in no event later than June 1, 1943.

KSWO—Willard Carver and Byrne Ross, Lawton, Okla.—Granted renewal of license for the period ending in no event later than August 1, 1944.

WNEL—Juan Piza, San Juan, Puerto Rico.—Granted renewal of license for the period ending in no event later than October 1, 1944.

KFRO—Voice of Longview, Longview, Texas.—Granted renewal of license for the period ending in no event later than December 1, 1944.

MISCELLANEOUS

WMIS—Natchez Broadcasting Co., Natchez, Miss.,; WGRM, P. K. Ewing, Greenwood, Miss.—Passed for two weeks motion to take depositions in re applications for renewal of licenses.

WKBW-WGR—Buffalo Broadcasting Corp., Buffalo, N. Y.—Granted motion to postpone hearing now scheduled for November 20 to December 8, in re applications for renewal of licenses, main and auxiliary.

WTCN—Minnesota Broadcasting Corp., Minneapolis, Minn.—Granted petition to intervene in the hearing on application of WMRO, Aurora, Ill., for modification of license (B4-ML-1112).

WHKC—United Broadcasting Co., Columbus, Ohio.—Denied motion to cancel hearing now set for December 2 in re application for construction permit (B2-P-2833), and the Commission on its own motion continued said hearing to December 16.

WIOD—Isle of Dreams Broadcasting Corp.; Miami, Fla.—Granted motion to dismiss without prejudice, application for construction permit (B3-P-3463).

Raymond C. Hammett, Talladega, Ala.—Granted request for dismissal without prejudice of application for construction permit (B3-P-3365).

WINK—Mid-American Broadcasting Corp., Louisville, Ky.—Granted petition to dismiss without prejudice application (B2-MP-1589) for modification of license.

KHSL—Golden Empire Broadcasting Co., Chico, Calif.—Granted modification of construction permit (B5-P-3100, as modified, for installation of directional antenna for day and night use, and increase in power) for extension of completion date from November 16 to December 16, 1942 (B5-MP-1663).

KGER—Consolidated Broadcasting Corp., Ltd., Long Beach, Calif.—Granted modification of construction permit (B5-P-3096, as modified, for new equipment, increase in power, installation of directional antenna for night use, and move of transmitter) for extension of completion date from November 12 to December 12, 1942 (B5-MP-1666).

KGLO—Mason City Globe Gazette Co., Mason City, Iowa.—Granted license to cover construction permit (B4-P-3269) as modified, for changes in directional antenna for night use, installation of new transmitter, and increase in power (B4-L-1724); granted authority to determine operating power by direct measurement of antenna power (B4-Z-1460).

KFAR—Midnight Sun Broadcasting Co., Fairbanks, Alaska—Granted license to cover construction permit (B-P-3436) as modified, for increase in power and new transmitter (B-L-1725); granted authority to determine operating power by direct measurement of antenna power (B-Z-1462).

KOL—Seattle Broadcasting Co., Seattle, Wash.—Granted license to cover construction permit (B5-P-3030) as modified, for increase in power and installation of directional antenna for day and night use (B5-L-1700); granted authority to determine operating power by direct measurement of antenna power (B5-Z-1428).

WAKR—Summit Radio Corp., Summit, Ohio—Granted license to cover construction permit (B2-P-3038) as modified. for increase in power, changes in directional antenna for night use only, and install new transmitter (B2-L-1722); granted authority to determine operating power by direct measurement of antenna power (B2-Z-1458).

W8XCT—The Crosley Corp., Cincinnati, Ohio—Granted modification of construction permit (B2-PVB-23, as modified, for new experimental television broadcast station) for extension of completion date only, from October 28, 1942, to April 28, 1943 (B2-MPVB-89).

WALB—Albany Publishing Co., Albany, Ga.—Continued from November 19 to December 15 the consolidated hearing on applications of WALB for renewal and voluntary assignment of license and construction permit to change frequency.

WFIL—WFIL Broadcasting Co., Philadelphia, Pa.—Dismissed without prejudice application (B2-P-2894) for construction permit to install new transmitter, directional antenna and increase power to 5 KW.

WEW—St. Louis University, St. Louis, Mo.—Denied Special Service authorization (B4-SSA-51) to increase operating hours from daytime to unlimited.

WLW—The Crosley Corporation, Cincinnati, Ohio—Granted motion to continue hearing now set for November 26 to December 9, in re application for modification of license to operate with 500 kilowatts night.

KVOE—The Voice of the Orange Empire, Inc., Ltd., Santa Ana, Cal.—Granted motion for postponement of hearing now set for November 23 and continued same to January 6, 1943, in re application for construction permit (B5-P-3482). Also granted petition for order to take depositions.

WMIS—Natchez Broadcasting Co., Natchez, Miss.; WGRM, P. K. Ewing, Greenwood, Miss.—Denied motion for continuance of hearing now set for December 9 and severance from the hearing on Dockets 6331 and 6332.

KOBH—Black Hills Broadcasting Co. of Rapid City, Rapid City, S. Dak.—Granted motion for order to take depositions in re application for construction permit (B4-P-3339).

K5IL—St. Louis University, St. Louis, Mo.—Denied motion for continuance of hearing, and granted dismissal without prejudice of application (B4-MPH-109).

KWFT—Wichita Broadcasting Co., Wichita Falls, Texas—Granted petition to dismiss without prejudice application for modification of license (B3-ML-1057).

Olympic Radio Company, Hoquiam, Wash.—Granted petition to dismiss without prejudice application for construction permit (B5-PC-93A amending P5-PC-88).

Karl L. Ashbacker and Grant F. Ashbacker, d/b as Ludington Broadcasting Co., Ludington, Mich.—Granted petition to dismiss without prejudice application for construction permit (B2-P-3406).

Hughes Productions Division of Hughes Tool Co., Los Angeles, Cal.—Granted petition for continuance of hearing now set for December 7 to May 7, 1943, in re applications for new television stations in Los Angeles and San Mateo Co., Cal.

WDAF—The Kansas City Star Co., Kansas City, Mo.—Dismissed without prejudice petition for leave to intervene and enlarge issues in re application of KOBH for construction permit (B4-P-3339).

APPLICATIONS FILED AT FCC

570 Kilocycles

WNAX—WNAX Broadcasting Co., Yankton, S. Dak.—Modification of construction permit (B4-P-3288 as modified) which authorized increase in power and installation of directional antenna for night use, for extension of completion date from 12-7-42 to 6-7-43.

960 Kilocycles

WSBT—South Bend Tribune, South Bend, Ind.—Authority to determine operating power by direct measurement of antenna power.

990 Kilocycles

WIBG—Seaboard Radio Broadcasting Corp., Philadelphia, Pa.—Modification of construction permit (B2-P-3207 as modified) which authorized installation of new transmitter, directional antenna, move transmitter and studio, change hours of operation and increase power for extension of completion date from 11-30-42 to 90 days after date of grant and change in type of transmitter.

1150 Kilocycles

WDEL—WDEL, Inc., Wilmington, Del.—Modification of construction permit (B1-P-2758 as modified) which authorized increase in power, installation of new transmitter and directional antenna for extension of completion date from 11-17-42 to 12-17-42.

1170 Kilocycles

KVOO—Southwestern Sales Corp., Tulsa, Okla.—Extension of special service authorization to operate unlimited time, with power of 25 KW night and 50 KW daytime, using directional antenna for night use and transmitter as authorized by construction permit, for period ending 2-3-43.

1240 Kilocycles

WCOU—Twin City Broadcasting Co., Inc., Lewiston, Maine.—Authority to determine operating power by direct measurement of antenna power.

KFXM—J. C. and E. W. Lee (Lee Bros. Broadcasting Co.), San Bernardino, Calif.—Construction permit to install a new transmitter, directional antenna for day and night use, change frequency from **1240 kc.** to **1300 kc.**, increase power from 250 watts to 1 KW and change hours of operation from sharing time with KPPC to unlimited time. Amended: to request modification of license for change in hours of operation only.

1260 Kilocycles

WNAC—The Yankee Network, Inc., Boston, Mass.—Extension of special service authorization to operate with power of 5 KW, using directional antenna at night for the period ending 10-1-44.

1290 Kilocycles

WHKY—Catawba Valley Broadcasting Co., Inc., Hickory, N. Car.—License to cover construction permit (B3-P-3259 as modified), which authorized installation of new transmitter, directional antenna for night use, change in frequency, increase power and move of transmitter.

WHKY—Catawba Valley Broadcasting Co., Inc., Hickory, N. Car.—Authority to determine operating power by direct measurement of antenna power.

1320 Kilocycles

KDYL—Intermountain Broadcasting Corp., Salt Lake City, Utah.—Authority to determine operating power by direct measurement of antenna power for auxiliary transmitter.

1340 Kilocycles

KVIC—Radio Enterprises, Inc., Victoria, Texas.—Authority to determine operating power by direct measurement of antenna power.

1420 Kilocycles

WOC—The Tri-City Broadcasting Co., Davenport, Iowa.—Modification of construction permit (B4-P-2288 as modified), which authorized change in frequency, increase in power, move of transmitter and installation of directional antenna and new transmitter for extension of completion date from 11-19-42 to 12-4-42.

1480 Kilocycles

WRDW—Augusta Broadcasting Co., Augusta, Ga.—Modification of construction permit (B3-P-2966 as modified), which authorized change in frequency, increase in power, installation of new transmitter and directional antenna for night use, and move of transmitter for extension of completion date from 12-7-42 to 1-7-43.

1590 Kilocycles

WBRY—American Republican, Inc., Waterbury, Conn.—License to cover construction permit (B1-SSA-31), which authorized move of transmitter.

WBRY—American Republican, Inc., Waterbury, Conn.—Authority to determine operating power by direct measurement of antenna power.

FM APPLICATIONS

W39NY—City of New York, Municipal Broadcasting System, New York, N. Y.—Modification of construction permit (B1-PH-83 as modified), which authorized construction of new high frequency broadcast station for extension of completion date from 11-14-42 to 3-14-43.

W67B—Westinghouse Radio Stations, Inc., Boston, Mass.—License to cover construction permit (B1-PH-62 as modified), which authorized construction of new high frequency broadcast station, in part, in accordance with Commission action of 8-4-42.

W47NY—Muzak Radio Broadcasting Station, Inc., New York, N. Y.—License to cover construction permit (B1-PH-48 as modified), which authorized construction of new high frequency broadcast station, in part, in accordance with Commission action of 8-4-42.

TELEVISION APPLICATIONS

WPTZ—Philco Radio and Television Corp., Philadelphia, Pa.—Modification of construction permit (B2-PCT-4 as modified), which authorized construction of new television broadcast station for extension of completion date from 12-1-42 to 6-1-43.

WMJT—The Journal Co. (The Milwaukee Journal), Milwaukee, Wis.—Modification of construction permit (B4-PCT-8 as modified), which authorized construction of new commercial television station for extension of completion date from 10-27-42 to indefinitely.

MISCELLANEOUS APPLICATIONS

W9XMB—Moody Bible Institute of Chicago, Chicago, Ill.—Modification of construction permit (B4-PST-4 as modified), which authorized construction of new ST broadcast station for extension of completion date from 11-16-42 to 2-16-43.

W2XBD—General Electric Co., Schenectady, N. Y.—License to cover construction permit (B1-PST-10) which authorized construction of new ST broadcast station.

WLAB—Larus and Brother Co., Inc., Richmond, Va.—License to cover construction permit (B2-PRE-418 as modified), which authorized construction of new relay broadcast station.

WAAD—Ralph A. Horton, area of Ft. Lauderdale, Fla.—License to cover construction permit (B3-PRY-259 as modified), which authorized construction of new relay broadcast station.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Columbia Research Company—A complaint has been issued charging Julius Florsheim, trading as Columbia Research Co., 417 South Hill St., Los Angeles, with misrepresentation in the sale of envelopes and questionnaires referred to by bill collectors as "lures" and which are designed to obtain information concerning debtors. (4867)

Lee-Sons—Misrepresentation of the therapeutic value of a mineral water designated "Merlek" is alleged in a complaint issued against Michael E. Lee, Myron E. Lee and Kenneth L. Lee, trading as Lee-Sons and as Merlek, Alameda, Calif. (4868)

Liberty Chemical Company—Misrepresentation of a medicinal preparation sold under the names "Liberty Nasal Cream" and "Liberty Nose and Throat Cream" is alleged in a complaint issued against Georgie A. Coleman, trading as Liberty Chemical Co., 1813 18th St., N. W., Washington, D. C. (4869)

National Administrators, et. al.—Dan Trainor, Winona, Minn., trading as National Administrators; John A. Janssen and Lloyd L. Hill, trading as Consumer Distribution Consultants; Chicago Mail Order Co. and W. L. Schnadig and Ralph L. Arnheim as officers of the company; and Spiegel, Inc., and Modie J. Spiegel, Frederick W. Spiegel, Earl D. Weil, Edward L. Swikard, H. J. Meinig, Bernadette Saindon, and Walter A. Gatzert, individually and as officers of Spiegel, Inc., all of Chicago, are charged in a complaint with misrepresentation and unfair and deceptive acts and practices in commerce. (4870)

CEASE AND DESIST ORDER

The Commission issued the following cease and desist order last week:

General Tire & Rubber Co., Akron, Ohio, engaged in the manufacture and sale of automobile tires, has been ordered to cease and desist from certain misrepresentations concerning its products. (4608)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Benederm, Inc., selling a medicinal preparation designated "Benederm," and Fred W. Fox, advertising agent who has disseminated advertisements for the product, both of 8506 Sunset Blvd., Los Angeles, have stipulated to cease and desist from representing that the product is healing or is a remedy for or effective in the treatment of skin eruptions; or that it renders normally present fatty detritis of the skin soluble or facilitates removal of the contained carbon particles. (03071)

John K. Brater & Co., Inc., 369 Third Ave., New York, selling medicinal preparations designated "Brater's Powder" and "Brater's Asnarettes," has stipulated to cease representing that the preparations are beneficial for the underlying causes of asthma or are a remedy or cure for asthma; that their use will assure one of a quiet night or free one from tortuous breathing, and that the preparations are beneficial in many forms of hay fever. (03074)

The respondent further agrees to discontinue the dissemination of any advertisements which fail to reveal that the frequent or continued use of the preparations should be avoided, especially by elderly persons, and that their use should be discontinued if dryness of the throat, excessively rapid pulse or blurring of the vision appears; provided, however, that such advertisement need only contain the statement "Caution, Use Only as Directed," if the directions for use contain a caution or warning to the same effect.

Culver Aircraft Corporation, Wichita, Kansas, engaged in the manufacture of airplanes designated "Culver Cadet," and Russell J. Alley, Los Angeles, Calif., a distributor, have stipulated to cease and desist from use of the statement "engineered to ten G's" as descriptive of the airplane and from use of that statement or any representation of similar import, the effect of which conveys the belief that the ultimate load which such airplane is or has been designed to sustain is in excess of what is actually the fact, or which imputes to the airplane a degree of safety, when operated, that is not warranted by the designed strength. (3560)

Flexrock Co., 23d and Manning St., Philadelphia, engaged in selling household supplies, including a floor wax bearing the trade name "Flexrock Non-Slip Wax," has stipulated to cease use of the hyphenated word "non-slip" as part of or in connection with the trade name for the product, which is not proof against slipping, and use of such word or words of similar meaning to convey the belief that the product referred to when applied to a floor will prevent slipping. The respondent also agrees to desist from use of the statement "lasts from three to seven times longer than ordinary wax" as descriptive of the product and from the use of any statement implying that the product when applied to floors possesses the indicated lasting qualities when in fact it is not of such durability as to warrant the claim. (3559)

Seaboard Chemical Co., Daytona Beach, Fla., selling and distributing rat and insect poisons, including a product designated "Magic Death Rat and Mouse Exterminator," has stipulated to cease and desist from use of the words "Magic Death," "Death" or "Exterminator" as part of or in connection with the trade name of the preparation and from representing that the preparation is a competent rat or mouse exterminator; that it will kill rats or mice or that its use is effective in ridding the premises of rats or mice; or that the preparation is nationally known or nationally used. The respondent also will cease using the word "Chemical" as part of his trade name or the words "Chemical" or "Chemists" or other words of like meaning to imply that he is a manufacturing chemist or conducts or operates a chemical company or business. (3558)

Sykes Laboratories, 1024 Wolfram St., Chicago, selling and distributing a medicinal preparation designated "Ardine," has stipulated to cease representing that the product is a sure or dependable contraceptive or can be relied upon to prevent conception; or that it becomes "Dakin's Solution" when diluted in four ounces of water. (03072)

Sperry Candy Co., 133 West Pittsburgh Ave., Milwaukee, selling candy, including the Denver Sandwich Candy Bar, and A. E. Meyerhoff and Madelaine G. Meyerhoff, trading as Arthur Meyerhoff & Co., 410 North Michigan Ave., Chicago, advertising agents disseminating advertisements for the product on behalf of the Sperry Candy Co., have stipulated to cease and desist from misrepresentation in advertising premiums given with candy products. They agree to stop representing, through use of the words "Lifetime Guaranteed" or in any other manner, that certain fountain pens will last a lifetime or that the pens will be repaired or the damaged parts thereof replaced without cost; and that certain frames furnished with colorphoto miniatures are made of ivory or gold when in fact they are merely of ivory color or decorated with gold colored paint. (03073)

NAB Reports

The NATIONAL ASSOCIATION OF BROADCASTERS

1626 K STREET, N. W. WASHINGTON, D. C. Vol. 10, No. 47, November 27, 1942

OWI Disclaims Pirating

Murray Brophy, Chief of the Bureau of Communications Facilties and Deputy Director in Charge of International Broadcasting of the Overseas Branch of the Office of War Information, emphatically states that his branch of the OWI will positively not seek to employ men now associated with domestic broadcasting stations.

"The International Branch of the Office of War Information," said Mr. Brophy, "is fully aware of the tremendous importance of domestic broadcasting. Nothing we do in the international field will be allowed to impair in the slightest degree the continued efficient operation of domestic stations. I appeal to any broadcaster who learns of an employee of the International Branch soliciting men from his technical or operating staff to immediately notify me and I will summarily discharge such employee."

This statement is consistent with the utterances of Elmer Davis, OWI Director, who in his appearance before the Senate sub-committee in September, said:

"This Office has a direct and vital concern with the maintenance of the radio coverage in this country. It is one of the most important media for the conveyance of war information in general to the people, and may become of still greater importance when there is occasion for an emergency message from the national leadership. A policy which threatens the continued existence of many of these stations is injurious to the national system of communication, and may seriously hamper the work, for which this Office was established, of informing the people about the status and progress of the war effort and the war policies, activities and aims of this government."

We are sure that broadcasters will applaud the attitude expressed by Mr. Brophy. Should some over-zealous OWI employee become active in seeking technicians or other radio personnel from domestic broadcast stations, the stations are requested to immediately notify NAB Headquarters and proper action will be taken.

District Meetings

DISTRICT 15

Arthur Westlund, KRE, was reelected as district director at the District 15 meeting held November 16-17 in San Francisco.

The meeting unanimously endorsed the NAB's policy in handling the musicians' problem; commended the new OWI allocation plan, and voted to start an intense district membership campaign. In connection with this last action, the meeting voted to admit only NAB members to future sessions unless non-members are invited "for the good of the industry or the war effort."

Numerous government representatives addressed the meeting. Wilt Gunzendorfer, KSRO, presided at the sales meeting the second day.

Those registered:

Jerry Akers, KSAN; Paul R Bartlett, KFRE; Wm. H. Bates, KFRB; A. Leo Bowman, Free & Peters, Inc.; John Brunton, KQW; Ralph Brunton, KQW; S. B. Brunton, KJBS; Ed. DISTRICT 17

(Continued from page 667)

tives who attended the two-day meeting of the Seventeenth District of NAB held in Portland, Oregon, on November 19 and 20. District Director Harry R. Spence of KXRO presided.

To seek relief in one phase of the growing man-power problem, Marshall H. Pengra of KRNR introduced a resolution, petitioning the Federal Communications Commission to relax some of the regulations pertaining to restricted operators. It was adopted unanimously.

The opening day speakers included: Mr. Spence, Neville Miller, president of NAB, who outlined the war work of NAB; Ralph Block, Regional Director, Office of Civilian Defense; Major Carlton Spencer, Selective Service Administration in Oregon; Eugene Carr, Office of Censorship; Ensign Philip N. Bladine, Public Relations Officer, Navy Department, Portland, Oregon; Sgts. R. N. Vernstrom and Wm. J. Vessey, Marine Corps, Portland and Seattle, respectively.

Toward the close of the first-day meeting, Mr. Miller reviewed the AFM-Petrillo problem and explained the policy toward the problem adopted by the Board of Directors. Following this discussion the broadcasters present unanimously endorsed the NAB stand.

At luncheon on the opening day, Palmer Hoyt, Publisher of The Oregonian, spoke briefly. He was followed by Lewis H. Avery who discussed "Good Taste in Radio Advertising."

Following luncheon, Mr. Spence was unanimously reelected for a two-year term as Director for the Seventeenth District.

The morning meeting on the second day was confined to sales problems with Arthur Gerbel, Jr., of KOMO-KJR, acting as chairman, while the discussion was led by Mr. Avery. Midway of the morning meeting, the Retail Promotion Committee Plan was presented in detail and enthusiastically received. Several stations pledged their financial support to the plan.

At the luncheon meeting on the second day, Carl Haverlin, Headquarters Consultant, and Wm. B. Lewis, Chief, Radio Bureau, Office of War Information, presented the proposed OWI plan that is designed to become operative on January 1, 1943. The broadcasters unanimously endorsed the proposed plan by formal resolution. Other guests at the luncheon included: the Hon. Harris Ellsworth of KRNR, Congressman-elect; the Hon. Earl Riley, Mayor of Portland; and Major Joseph K. Carson, former Mayor of Portland.

Trommlitz, KORE; Florence Clements, OWI; Beatty Stevens, KOMO-KJR.

DISTRICT 11

"Radio is in the front line of our lives, it is the center of the home," declared Mr. Luther Weaver, business counsel and instructor in the extension service of the University of Minnesota, in a talk entitled, "How to Listen to the Radio," at the luncheon on the second day of the Eleventh District meeting of the NAB in Minneapolis. He continued by pointing out that the average listener would appreciate radio more if he had to pay for the entertainment and information it provides.

"I have heard radio criticized for its bad English yet radio has brought good English into millions of homes that never heard it before," said Mr. Weaver. "I have also heard radio criticized for the type of music it broadcasts yet radio has brought good music into homes that never heard of a symphony."

"There is so little intelligent criticism of radio," he added, "because it requires a high degree of intelligence to criticize radio adequately. If you want to listen to the radio and criticize it, then ask yourself these questions: Does the program entertain or inform entertainingly? Does the program have singleness of purpose? Does the program have beauty (or showmanship)? What can you applaud heartily? What can you condemn? What would you do if you were writing the show?"

The inspiring talk was delivered before a joint luncheon of the Radio Council for Minnesota and the broadcasters, government and industry representatives attending the meeting. More than 100 women, representing various civic and social groups, attended as members of the council. Reprints of Mr. Weaver's searching talk will soon be available to NAB members.

Following the luncheon meeting, Ed. L. Hayek, of KATE, was elected district director for the two-year term starting with the next NAB convention. Mr. Hayek has been filling the unexpired portion of the term to which Earl Gammons, of WCCO, was previously elected.

Resolutions were unanimously adopted endorsing the OWI plan. The action of the NAB in the AFM Petrillo situation and the Retail Promotion Plan. The Broadcasters also unanimously adopted a resolution endorsing the opposition of the board of directors to the use of government money for broadcast advertising.

At the opening luncheon of the two-day meeting, on November 23, Dr. Harold C. Deutsch, famed WCCO news commentator and Associate Professor of History at the University of Minnesota, analyzed the current economic and military situation of the Allied Nations and the Axis. Considered an international authority on World War I, Dr. Deutsch outlined the position of the various nations engaged in the global war at the end of 1941, traced the economic and military developments during the past 11 months and forecast some probable developments in 1943. His informal talk was accorded rapt attention by the 48 broadcasters, government and industry representatives in attendance.

The meeting was called to order at 10:00 a. m. on Monday by District Director Ed. L. Hayek, of KATE, who briefly outlined the purposes, speakers and subjects of the two-day meeting. He was immediately followed by Neville Miller, President of NAB, who reviewed the war work of NAB and the close liaison of officials of the NAB with the various government agencies and departments charged with the conduct of the war.

Among the government representatives who discussed various phases of the war effort were: Carl Haverlin, Headquarters Consultant, Radio Bureau, Office of War Information; Major Howard O. Peterson, Chief, Radio Section. Public Relations Branch, Seventh Service Command; Major Charles J. West, First Security District, Seventh Service Command; Eugene Carr, Office of Censorship; Colonel Joseph E. Nelson, Director of Selective Service for Minnesota; Lief Gilstadt, Treasury Department and Harvey W. Wertz, Regional Director, Office of Civilian Defense.

Before lunch on the opening day, Director Hayek read a letter of appreciation from Sam C. Gale, Advertising Director of General Mills, Inc., thanking the broadcasters of this district for their splendid co-operation in the Naval Aviation Cadet program. The purpose of the program was briefly outlined by John H. Sarles of Knox Reeves Advertising, Inc., and further amplified by Lts. R. G. Robertson and Wallace Mitchell, Naval Aviation Cadet, Selection Board.

Toward the close of the first day, Carl Haverlin spoke for BMI and President Miller outlined the AFM-Petrillo problem. Following this discussion, the broadcasters unanimously endorsed the NAB stand on Petrillo by formal resolution. The meeting also unaniomously endorsed the proposed OWI plan, designed to become effective January 1, 1943.

President Miller spoke informally at a banquet on the first night, outlining some of the changing conditions of broadcasting and emphasizing the obligation and opportunity that exists for broadcasters in the all-out war effort.

SALARY STABILIZATION

Here is the best explanation issued to date on what to do if you want to (or argue to) make a *general* salary increase in any classification of employees who make $5,000 or less a year. This statement came from the WLB Regional Director for Philadelphia, but it is applicable for all other regions.

It should be remembered that the WLB has authorized employers to make *individual* increases without permission under certain circumstances (NAB Reports, p. 619).

It also should be remembered that the Treasury, not the WLB, has jurisdiction over salaries of more than $5,000 and over salaries of executives, administrative and professional employees making less than $5,000 and not represented by unions.

The Philadelphia director's statement:

The War Labor Board has appointed a twelve-man labor-industry-public regional advisory board to assist in administration of the wage stabilization program in the area covering Maryland, Pennsylvania, Delaware and Virginia.

The Philadelphia regional office will deal only with requests for permission to increase wages or salaries of $5,000 or less a year. Other higher salaries are dealt with through the Collector of Internal Revenue, as are salaries below $5,000 where the employes are not represented by any union and are professional, executive or administrative workers.

Only those requests which are voluntary, on the part of employers, or arise from agreement between employers and employees will be considered in the field offices of the War Labor Board.

Final Review by WLB

All cases will be subject to final review by the War Labor Board in Washington.

Actually, the system will work in this manner: Assume you are an employer who has negotiated a wage increase with a union, or who otherwise wishes to pay higher wages. You think you should be allowed to increase your pay scale.

The first thing to do is to go to the nearest office of the wage and hour division, United States Department of Labor. There you can learn if your problem is one which must be reviewed by the War Labor Board.

If the division decides you're not obligated to obtain permission, it can give you approval to go ahead and raise your men's wages.

Subsequently, however, the regional director, reviewing the decision, may hold that the division should have held the case for review.

Then you may be allowed to continue paying the increase (if you already have granted it, relying on the division's judgment) until you have a chance to apply for permission and until formal review has been made.

Have Right to Appeal

The division may, on the other hand, have ruled that your adjustment cannot properly be made without permission of the board. In that case, if you think the division wrong, you may appeal to the regional director's office and his is the final decision in the matter.

In either event—whether the division decides that review is unnecessary and the board overrules it, or whether the division decides that review is necessary and the board upholds it, the application for formal review is the same you would have made had the division earlier held you did need permission to increase your wages and you had proceeded in the normal way.

The wage-and-hour division office you are dealing with will hand you a long document (8½ by 24½ inches) with fourteen chief questions (some of them are subdivided).

The white original copy is the control copy of the WLB; the second sheet, pink, is later returned to you; the third, green, may be passed along to the Office of Price Administration if it is involved in the case; the fourth, salmon, is kept in the regional director's office; the fifth, yellow, is kept by you.

Information Needed

Among the information you will need to supply:

1. Your name, address, number of workers affected, proposed effective date of the pay raise, and your reasons for making it.
2. Whether the application is sought by agreement between you and a labor organization representing the employes in your plant, or on the basis of an arbitrator's or referee's award, or whether you wish to make the increase spontaneously or for some other reason.
3. The nature of your business, the number of employes, the number of hours they work in a couple of picked pay-roll periods, their straight-time hourly earnings.
4. Information on all fluctuations in wages and salaries since January 1, 1941.

And you must state whether, once you are granted permission to make your upward adjustment in pay rates, you intend to use that as an excuse for asking the OPA to allow you to raise the prices of the goods you manufacture or sell.

By this time, there should be enough information on hand to justify fair consideration of your application in the light of national wage stabilization policies laid down by the WLB on November 6 as part of the effort to stabilize our whole wartime economy.

If Union Should Object

The wage and hour division will now look to see if the union with which you have dealings has indorsed the application.

It it has not, the division will determine whether the union objects. If the union objects, the whole case is referred to the conciliation service of the Department of Labor as a dispute case; if the union agrees to the raise, the division is ready to forward the application to the regional director.

A ruling by his office on whether or not he has jurisdiction will be the first step in the regional office. He will notify you if the matter isn't one for his review.

However, if he concludes that the application does require board approval, then he may ask you or the wage and hour division for more information—or he may proceed on the application as it is.

Director's Ruling Final

No matter what he does, you will have a right to appeal. On the whole, of course, you may expect the decision he now is preparing to make to stick.

If the regional director approves your application his ruling is final—subject to later review by the National Board.

If he refers the application to a labor-industry-public panel for action, the panel's decision is final, again subject to review by the national board.

If he disapproves the application, or approves a smaller increase than you asked, you have ten days in which to file an appeal petition with the regional office and he must then refer the case to a tripartite panel.

The panel's approving ruling then, too, is subject to final review in Washington.

If the panel disapproves your application, whether it is referred to it by the regional director or received on an appeal from the director's negative decision, then the board may still check the decision on its own initiative or any member of the panel may ask the board to check it in the national interest.

Meanwhile, however, suppose you have admitted you want to increase the price of your wares after you make this pay raise. The green copy of your application is scrutinized by the OPA. You probably will have received from the wage and hour division further forms to be filled out explaining to OPA your reasons.

An OPA objection to a WLB approval of the increase would throw the whole matter into the lap of the Economic Stabilization Director for final review and decision.

There are innumerable variations to this theme, but this simplification of the procedure is a representative illustration of the manner in which you must proceed if you want official sanction for raising the wages and $5,000-or-less salaries of your employes.

And if you don't bother to get that approval, you'll wake up next March to find that the entire amount of the wage or salary hiked without WLB approval can't be deducted in figuring your taxable income.

FCC QUESTIONNAIRE

All but about 100 stations have responded to the FCC's questionnaire on employment and payrolls. The Commission is anxious to compile the information from the questionnaire at the earliest possible date. This information will be invaluable to stations in wage and salary negotiations and in any proceedings before the War Labor Board. The NAB cannot urge too strongly that those stations which have not yet sent in a return do so immediately.

MANPOWER SURVEY

The NAB Manpower Survey was sent to 919 stations licensed by the FCC September 15, 1942. Analysis of the survey is based on the replies received from 615 stations by October 20th. In all, 667 replies have been received.

Comparison of the stations used in the tabulation with total stations licensed is as follows:

	Licensed	In Tabulation	Percent Return
TOTAL STATIONS	919	615	67.0
Commercial	873	589	67.5
Non-Commercial ...	34	20	59.0
Construction Permits	12	6	50.0
NAB Members	484	349	72.2
Non-Members	435	266	61.2

The sample is slightly low on clear channel stations. The approximate percentage returns are as follows:

Clear Channel	60%
Regional Channel	70
Local	70
Total	69.5

These percentage returns indicate that the sample is skewed toward small stations, and therefore the average figures presented in the survey analysis are admittedly low.

The number of persons employed by the responding radio stations on October 19, 1940, and September 15, 1942, are presented in the following table:

	October 19, 1940			September 15, 1942		
	Total	Men	Women	Total	Men	Women
TOTAL RETURNS...........	615			615		
Information Incomplete.........	12			7		
Station Not Operating..........	89			—		
RETURNS USED............	514			608		
Executive.....................	796	749	47	898	832	66
Technical:						
First Class Operators.........	2,435	2,435	—	2,329	2,326	3
Second Class Operators.......	47	47	—	168	159	9
Restricted Operators.........	18	17	1	242	219	23
Unlicensed Operators.........	281	274	7	435	385	50
Program.....................	3,994	3,295	699	4,389	3,391	998
Commercial..................	1.560	1,358	202	1,481	1,206	275
General & Administrative.......	1.555	527	1,028	1.788	549	1,239
Miscellaneous.................	873	603	270	1,091	743	348
TOTAL ALL CLASSIFICATIONS.........	11.559	9,305	2.254	12.821	9,810	3,011

It is not possible from the above table to directly compare the figures of employment because of the differing number of stations involved. In order to see what happened during the two-year period from the individual station standpoint, it is necessary to deal in averages. On October 19, 1940, the average station employed 22.5 persons. On September 15, 1942, the figure dropped to 21.1 persons.

Percentage of change based on station averages between October 19, 1940, and September 15, 1942, by job classification is as follows:

	Total	Men	Women
Executive	−4.61%	−6.2%	+19.8%
Technical:			
First Class License	−19.1	−19.2	+Infinity
Second Class License	+203.3	+187.9	+Infinity
Restricted License	+1,037.1	+990.9	+1800.0
Unlicensed	+30.7	+18.8	+ 485.7
TOTAL	−3.5	−5.8	+ 768.8
Program	−7.1	−13.0	+ 20.7
Commercial	−19.7	−24.9	+ 15.0
General & Administrative	−2.8	−11.9	+ 1.9
Miscellaneous	+5.7	+4.2	+ 9.0
TOTAL ALL CLASSIFICATIONS	−6.2%	−10.9%	+ 12.9%

The table shows that the average station is operating with less employees now than it did two years ago. Also, stations have begun to employ women to replace men. The figures also show radical changes in technical ranks. The reduction in first class license holders has been offset by the hiring of holders of second class and restricted licenses, and of unlicensed technicians.

The question immediately arises—What brings about the indicated change in employment? The analysis shows that 26.2% of the number of persons employed at October 19, 1940, were lost to the armed services during the two-year period. To the average station, this means that of the 22.5 persons employed in 1940, 4.7 persons left for the Army, Navy, Marines or Coast Guard. Those drafted represent 1.7 persons while 3 persons enlisted. In addition to these, 10.9 persons left the station to go elsewhere; to government, to other civilian employment, or *to other stations.* The total loss, then, of 15.6 persons represents 69.5% personnel loss in the two-year period.

The percentage of men lost to the Armed Services and total losses by job classification are as follows:

	Percent Men Lost To Armed Services	Percent All Employees Lost
Executive	10.1%	25.3%
Technical:		
First Class License	30.3	80.2
Second Class License	44.0	152.7
Restricted License	78.8	240.0
Unlicensed Operators	32.6	87.0
Program	29.4	73.7
Commercial	17.5	59.2
General & Administrative	22.9	55.4
Miscellaneous	22.7	82.3
TOTAL	26.2%	69.5%

In the matter of men lost, the tabulations show that local channel stations have been harder hit percentage-wise than regional stations, and clear channel stations have suffered least. The clear channel figures obtained are not representative because eight regional and two local channel stations were reported jointly with ten clear channel stations and could not be separated. Within this limitation, losses of personnel to the armed services constituted 22.1% of total clear channel station employment; 24% of regional channel station employment; and 33.9% of local channel station employment. All losses during the two-year period were 56.2% for clear, 69.9% for regional, and 96.8% of local channel station employees. In the case of local channel stations, there is indication of better than a complete turnover in first class technicians, a double turnover in second class technicians and a complete turnover in program employees. Individual returns showing losses during the two-year period three times as great as the number employed in October, 1940, were not uncommon.

Draft age men (18 to 45 years) represented 68.7% of the total number of persons employed September 15, 1942. The following table shows the percentage of men to total employment in each job classification:

	% Men 20–45 Yrs. To All Employees	% Men 18–19 Yrs. To All Employees	% Men 18–45 Yrs. To All Employees
Executive	71.5%	1.1%	72.6%
Technical:			
First Class License	95.6	3.7	99.3
Second Class License	63.8	18.5	82.3
Restricted	59.5	23.1	52.6
Unlicensed	73.4	14.3	87.7
Program	66.8	4.9	71.7
Commercial	68.9	.9	69.8
General & Administrative	22.4	2.1	24.5
Miscellaneous	42.6	3.2	45.8
TOTAL	64.4%	4.3%	68.7%

Men considered as essential to the operation of stations constituted 19.4% of all employees. The average station with 21.1 employees having 14.4 within draft age considers 4.1 persons to be essential for continued operation of the station. The percentage of persons employed within each job classification designated as essential to the station's operation is as follows:

	Percent all Employees
Executive	31.1
Technical:	
First Class License	56.4
Second Class License	15.6
Restricted	16.8
Unlicensed	13.3
Program	12.3
Commercial	12.4
General and Administrative	2.9
Miscellaneous	0.1
Total	19.4

Of the men classified as essential to the station's operation, 78% were in Selective Service Classification 3A; 7.3% in 1A or 1B; 5.1% in 4F. Of those having 3A classification, 67% have dependent children and will, under present plans, be the last called for service.

The above information supplements the NAB Manpower Survey article which appeared in the NAB REPORTS, Page 653, November 20, 1942.

SURPLUS EQUIPMENT QUESTIONNAIRE

The FCC has announced a plan to compile an inventory of all surplus communications equipment, including broadcast. Details will be found in the current issue of the *Swap Bulletin.*

The *Swap Bulletin* is now mailed separately to all stations and is addressed to the Chief Engineer. It is believed the separate mailing, directly to engineers, will expedite the exchange of surplus material for broadcast stations.

KLX ARRANGES REPAIR PHOTO

Press department of KLX, Oakland, Cal., arranged for a newspaper photo of a well known personage bringing his radio set in for repairs, according to Adriel Fried, general manager. A service spot is broadcast daily.

The following table shows the percentage of men 20 to 45 falling within each selective service classification at September 15, 1942.

	Selective Service Classifications								
	1A 1B	2A 2B	Awaiting Call	Reserve	3A	3B	No Class.	4	Total Men 20–45
Executive	2.2%	2.4%	.2%	.2%	73.0%	3.3%	16.0%	2.7%	100%
Technical:									
First Class License	8.2	5.2	.3	.5	71.0	1.9	4.3	8.6	100

CONTINUE SPOT A DAY

NOTE TO MANAGERS:

It will be appreciated if you will continue the broadcast of one radio serviceman's announcement per day until further notice.

In answer to your many inquiries the Radio Manufacturers Association has not yet located a man to handle the promotion campaign, among the trade, to insure sufficient service personnel to maintain sets throughout the emergency.

When RMA is ready, NAB will cooperate in necessary recruiting and in getting proper information to the public.

Philco Corp. and RCA officials, recently contacted, expressed the opinion that ultimate solution lay in substituting servicewomen for servicemen, but in a streamlined, factory type of operation.

Such a move would also be regarded with favor by the government because it would release the maximum number of servicemen to the armed services.

OWI RADIO MEETING

William B. Lewis, Assistant Director of the Office of War Information in charge of the Radio Bureau, announces that all radio consultants appointed to assist in functioning the regional and local broadcasting plan of OWI, have been called to a meeting in Washington on December 28-29-30. The consultants will at that time meet with the Regional Directors and the officials of the headquarters office of OWI to perfect plans for the coordination of government programs originating regionally and locally. Some 35 are expected to attend.

FREE TIME OFFER

The Progressive Circulation Company, Palmer Building, Hollywood, Cal., is sending out releases to radio stations to advertise, free of charge, two magazines, "Progress Digest" and "Our Army."

NAB PUBLICATIONS AT N. Y. MEETING

NAB publications will be used and distributed at the audio-education section meeting of the 1942 convention of the New York State Association of Elementary Principles, Hotel Syracuse, Syracuse, N. Y., late in December.

Max U. Bildersee, radio supervisor, The University of the State of New York, The State Education Department, Albany, will direct a round table during the convention.

GEN. DENIG THANKS INDUSTRY

An official note of appreciation from the Marine Corps for the assistance that broadcast stations and NAB provided, "in making our 167th Anniversary so memorable a national observance," was received Wednesday, November 25, from Brigadier General Robert L. Denig, U. S. Marine Corps, Director, Division of Public Relations.

Said General Denig, in part:

"The most potent and stimulating incentive any military force can be furnished is the knowledge that its people and country are aware and appreciative of its services. The attention given the Corps during the past several weeks will be firmly impressed on each and every Marine, whether he be in Tulagi, Trinidad, or Toledo.

"Please accept this message of earnest thanks for yourself and your association."

MRS. LEWIS COMPLETES TRIP

Mrs. Dorothy Lewis, Coordinator of Listener Activities for the NAB, has just completed a swing through 22 states, visiting 49 cities. The trip brought her into contact with about 10,000 leaders in national and state organizations, educators and students, and unorganized listeners.

The itinerary for Mrs. Lewis' next trip will be announced soon.

Under the aegis of the NAB, Mrs. Lewis held 24 conferences on "Children in Wartime." These were attended by state and local leaders of civic welfare organizations; educators and broadcasters. Radio executives displayed a fine leadership in taking the initiative in helping to solve this important wartime problem.

The subject "Radio serves the war and post-war era" was discussed at 17 conferences, based on a new plan whereby each person present takes part. In many cases it proved to be the first time the subject had been brought to the attention of listeners. Before each meeting, Mrs. Lewis gave a summary of American radio's wartime participation, covering—the propaganda front, here and abroad; the great service rendered in drives for bond and stamp sales, salvage, manpower, etc.; dramatic story of radio's service to and from the service men; the enormous personal and financial contribution of the broadcasters to the war effort; the purposes of OWI; radio's serious problems in shortages incident to the draft and priorities of materials and, finally, a forecast of the place American radio, the purest expression of our democratic form, will take in making the peace and setting up a global society in which radio must play a significant part. She found the listeners to be articulate regarding their admiration for the manner in which radio is serving the war effort.

Unanimous public opinion continues to support the broadcasters in the Petrillo issue. Numerous resolutions were passed by Radio Councils and club groups protesting his recording ban as an un-American action. The public stands ready to cooperate in any remedial plans taken by NAB toward the ultimate solution and this vexacious problem. The listeners urge immediate and constructive action.

A good many new listeners councils are in process of establishment. These will be at Toledo, Mankato, Fargo, Omaha, Des Moines, Kansas City, Wichita, Inter-Mountain Area, Missoula, Spokane, Sacramento, San Francisco, Oakland, and the suburban area of Los Angeles. Radio Councils are active in the issuance of accredited lists; making local studies, and surveys; setting up war coordinating committees to relieve pressure on local broadcasters; listening post committees on war news; Peabody Award Committees; Promotion and Publicity Committees to handle the job of reaching all participating organizations with programs about their American system of radio; and to increase newspaper cooperation and better listings; Radio Education Committees to expedite the equipment of schools, to establish radio divisions in state and local Departments of Education and to interest teachers in using radio as a teaching aid; Children's Program Committee to help to promote current local children's programs and to assist in the creation of new ones through cooperation of schools, libraries, and local little theater groups, and the expansion of the Council's open meetings to reach larger segments of the population.

Meetings were held in a number of colleges under the title "The Laymen's Place in American Radio." Mrs. Lewis spoke to 2200 freshmen at the University of Utah in a unique program of entertainment and education arranged by Earl J. Glade of KSL, chairman of the NAB Code Committee. Ed Barrett of Drake University arranged a fine conference at Des Moines with state leaders in radio on the panel. John J. Gillen, Jr., NAB 10th District Director, set up a round table discussion by students at Creighton University. Two fine conferences were held at Peabody College at Nashville, Tenn. About 50 University of Iowa students gathered for a Sunday afternoon session at WSUI. These are a few highlights in this field of activity. NAB participated in the School Broadcast Conference in Chicago with an afternoon meeting under the title "The Library Serves The Children's Programs Field." Educational Directors and librarians served on a fine panel. Recordings submitted by stations from all parts of the country, were played. The American Library Association rendered invaluable assistance and will aid the broadcasters in this important area of programs for juveniles.

Mrs. Lewis was privileged to attend two radio conferences in Canada at Winnipeg and Vancouver; the first of their kind in these provinces. Interest was high in the Radio Council plan and the contribution which they are making to the education and cultivation of the listeners. Children's entertainment and educational programs were high-lighted.

Many broadcasts were made and excellent newspaper publicity given throughout the tour. Stations and organizations continue to give excellent support for which both NAB and Mrs. Lewis express appreciation.

PEABODY AWARDS

The deadline for submitting entries for a George Foster Peabody Award for 1942 is December 15. Entry blanks are available at the NAB.

SELECTIVE SERVICE HANDBOOK

Copies of the NAB Selective Service Handbook and Supplements, and letters from Government agencies attesting the importance of radio broadcasting in support of the war effort have been sent to all State Directors of Selective Service.

FEDERAL COMMUNICATIONS COMMISSION

NETWORK LINE CHARGES

It will be suggested that the FCC should look into the line charges on network operations in its A.T.& T. investigation, James Lawrence Fly, Chairman, told newsmen at his press conference Monday. He said that the Commission should do everything that it reasonably could in terms of public interest, particularly in extending network broadcast service.

"That becomes particularly important," he said, "in the sparsely settled areas and the far-reaches of the country where little or no network service is available, and if any reduction which is made can be applied in part to meet that need I think it might be a very fortunate result."

When asked if the BWC has been giving any serious consideration to the problem of maintaining receivers, Mr. Fly said, "I don't think we have had a recent study of that problem although we did have a study within the past year, and at that time we found that we had enough receivers to meet the expected demand for a substantial time, and I think we had a comparable amount of replacement equipment. It is conceivable that some time in the very remote future we may come to the point where there is not enough material to repair the radios. However, there are enough radios to go around if properly distributed."

Mr. Fly was questioned as to whether or not FCC will permit some of the small stations to suspend operation. He said, "That is a problem which has been posed and about which nothing definite has been done. I think we would want to consider other possibilities first. That is not a very wholesome result, and in many cases the very stations that would close down are the essential stations to give information to the people who would not otherwise get it."

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, November 30. They are subject to change.

Monday, November 30

KWG—McClatchy Broadcasting Company, Stockton, Calif.—C. P., **1230 kc.**; 250 watts; unlimited.

Further Hearing

NEW—Wilkes-Barre Broadcasting Corporation, Wilkes-Barre, Pa.—C. P., **1240 kc.**; 250 watts; unlimited; Req. fac. WBAX.

NEW—Central Broadcasting Company, Wilkes-Barre, Pa.—C. P., **1240 kc.;** 250 watts; unlimited; Req. fac. WBAX.

NEW—Northeastern Pennsylvania Broadcasters, Inc., Wilkes-Barre, Pa.—C. P., **1240 kc.;** 250 watts; unlimited; Req. fac. WBAX.

NEW—Key Broadcasters, Inc., Wilkes-Barre, Pa.—C. P., **1240 kc.;** 250 watts; unlimited; Req. fac. WBAX.

Tuesday, December 1

KROY—Royal Miller, Sacramento, Calif.—C. P., **1240 kc.;** 250 watts; unlimited.

Wednesday, December 2

Further Hearing

WTNJ—WOAX, Incorporated, Trenton, N. J.—Renewal of license, **1310 kc.;** 500 watts; SH-WCAM & WCAP.

WTNJ—WOAX, Incorporated, Trenton, N. J.—Modification of license, **1310 kc.;** 500 watts; unlimited; Req. fac. WCAM & WCAP.

WCAM—City of Camden, Camden, N. J.—Renewal of license, **1310 kc.;** 500 watts; SH-WTNJ & WCAP.

WCAM—City of Camden, Camden, N. J.—Modification of license, **1310 kc.;** 500 watts; SH-WCAP; Req. fac. WTNJ.

WCAP—Radio Industries Broadcast Co., Asbury Park, N. J.—Renewal of license, **1310 kc.;** 500 watts; SH-WTNJ & WCAM.

WCAP—Radio Industries Broadcast Co., Asbury, Park, N. J.—Modification of license, **1310 kc.;** 500 watts; SH-WCAM; Req. fac. WTNJ.

Friday, December 4

Further Consolidated Hearing

WGAR—The WGAR Broadcasting Co., Cleveland, Ohio.—C. P., **1220 kc.;** 5 KW; unlimited; DA-day and night.

WHBC—The Ohio Broadcasting Co., Canton, Ohio.—C. P., **1480 kc.;** 1 KW; unlimited; DA-night.

WADC—Allen T. Simmons, Tallmadge, Ohio.—C. P., **1220 kc.;** 50 KW; unlimited; DA-day and night.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

KPAS—Pacific Coast Broadcasting Co., Pasadena, Calif.—Granted modification of construction permit for approval of directional antenna as now adjusted and for extension of completion date; granted subject to the condition that the change in antenna will protect other station assignments on the frequency **1110 kc.** in accordance with the North American Regional Broadcast Agreement. (B5-MP-1636)

WAPI—Voice of Alabama, Inc., Birmingham, Ala.—Granted modification of construction permit (B3-MP-1665) for approval of directional antenna.

KBTM—Jay P. Beard, tr/as Regional Broadcasting Co., Jonesboro, Ark.—Granted modification of license (B3-ML-1144) to increase nighttime power from 100 watts to 250 watts.

WRUL—World Wide Broadcasting Corp., Boston, Mass.—Granted further extension of license upon a temporary basis only, pending determination upon application for renewal of license, in no event later than January 1, 1943. (B1-SIB-12)

DESIGNATED FOR HEARING

KYA—Palo Alto Radio Station, Inc., San Francisco, Calif.—Designated for hearing application for modification of license (B5-ML-1127) to move the main studio from San Francisco to Palo Alto, Calif.

KJR—Fisher's Blend Station, Inc., Seattle, Wash.—Designated for hearing modification of construction permit (B5-MP-1602) for approval of transmitter site and directional antenna.

KEX—Fisher's Blend Station, Inc., Seattle, Wash.—Designated for hearing application for construction permit to install new transmitter, install directional antenna for day and night use, increase power from 5 KW to 50 KW and move transmitter locally. (B5-P-2629)

KFAB—KFAB Broadcasting Co., Lincoln, Nebr.; WBT—Columbia Broadcasting System, Inc., Charlotte, N. C.; WBBM—Columbia Broadcasting System, Inc., Chicago, Ill.; WJAG—The Norfolk Daily News, Norfolk, Nebr.—Designated for further hearing applications of (1) KFAB for construction permit to install a new transmitter and directional antenna for nighttime use, change the transmitter and studio location from Lincoln to Omaha, and change operating assignment from **780 kc.** with 10 KW power simultaneously during the daytime and sharing time at night with WBBM (operates under a Special Service Authorization simultaneously day and synchronously at night with WBBM); (2) WBT for construction permit to install a directional antenna for nighttime use and change transmitter location; (3) WBBM for modification of license to change hours of operation on **780 kc.** with 50 KW from simultaneously daytime and sharing time at night with KFAB, to unlimited time; and (4) WJAG for construction permit to install new antenna and change operating assignment from **1090 kc.**, 1 KW, limited to local sunset at WBAL and KTHS, to **780 kc.**, 1 KW, daytime only. (Dockets Nos. 5270, 5269, 5271 and 5864 respectively)

LICENSE RENEWALS

The following stations were granted renewal of licenses for the period ending December 1, 1944:

KTUL, Tulsa, Okla.; WALA, Mobile, Ala.; WCBA, Allentown, Pa.; KQV, Pittsburgh, Pa.

Licenses for the following stations were extended upon a temporary basis only pending determination upon application for renewal, for the period ending January 1, 1943:

KARM, Fresno, Calif.; KCRC, Enid, Okla.; KDTH, Dubuque, Iowa; KEVE, Everett, Wash.; KFMB, San Diego, Calif.; KGCX, North of Sydney, Mont.; KGIR, Butte, Mont.; KINY, Juneau, Alaska; KLO, Ogden, Utah; KPRO, Riverside, Calif.; WAAB and auxiliary Boston; WDBC, Escanaba, Mich.; WHK, Cleveland, Ohio; WHOM and auxiliary, Jersey City, N. J.; WOKO and auxiliary, Albany, N. Y.; WQBC, Vicksburg, Miss.; WWRL, Woodside, L. I., New York.

The licenses for the following stations were extended upon a temporary basis only, pending determination upon application for renewal, for the period ending February 1, 1943:

KBUR, Burlington, Iowa; WCRS, Greenwood, S. C.; WSYB, Rutland, Vt.

Licenses for the following stations were extended upon a temporary basis only, pending determination upon application for renewal, for the period ending January 1, 1943:

KBST, Big Springs, Texas; KCMC, Texarkana, Texas; KCRJ, Jerome, Ariz.; KGEZ, Kalispell, Mont.; KGFW, Kearney, Neb.; KGGF, Coffeyville, Kans.; KGKL, San Angelo, Texas; KHBC, Hilo, Hawaii; KHBG, Okmulgee, Okla.; KID, Idaho Falls, Idaho; KIEM, Eureka, Calif.; KPLT, Paris, Texas; KRBA, Lufkin, Texas; KRBC, Abilene, Texas; KVGB, Great Bend, Kans.; KWFC, Hot Springs, Ark.; KWKH, Shereveport, La.; KXL, Portland, Ore.; WBBZ, Ponca City, Okla.; WBNX, New York City; WBRW, Welch, W. Va.; WCAZ, Carthage, Ill.; WCBT, Roanoke Rapids, N. C.; WCOC, Meridian, Miss.; WCOP, Boston; WEDC, Chicago; WFCI, Pawtucket, R. I.; WFIN, Findlay, Ohio; WFPG, Atlantic City, N. J.; WFTC, Kinston, N. C.; WGES, Chicago; WING, Dayton; WJBW, New Orleans; WLBJ, Nr. Bowling Green, Ky.; WLOF, Orlando, Fla.; WMRO, Aurora, Ill.; WNBZ, Saranac Lake, N. Y.; WOCB, Nr. Hyannis, Mass.; WSPB, Sarasota, Fla.; WTEL, Philadelphia, Pa.; WTRC, Elkhart, Ind.

W5XAU—WKY Radiophone Co., Oklahoma City, Okla.—Present license further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending January 1, 1943.

W9XLA—KLZ Broadcasting Co., Denver, Colo.—Present license further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending January 1, 1943.

W8XO—The Crosley Corp., Nr. Mason, Ohio.—Present license further extended upon a temporary basis only, pending determination upon application for renewal, for the period ending January 1, 1943.

MISCELLANEOUS

KWTO—Ozark Broadcasting Co., Springfield, Mo.—Granted modification of construction permit as modified, for change in hours of operation, installation of directional antenna for night use, and move of transmitter, for extension of completion date from November 19, 1942, to May 18, 1943 (B4-MP-1657).

WDEL—WDEL, Inc., Wilmington, Del.—Granted modification of construction permit as modified, for increase in power, installation of new transmitter and directional antenna for day and night use, for extension of completion date from November 17, 1942, to December 17, 1942 (B1-MP-1670).

WALB—Herald Publishing Co., Albany, Ga.—Granted authority to determine operating power by direct measurement (B3-Z-1302).

W45BR—Baton Rouge Broadcasting Co., Inc., Baton Rouge, La.—Granted license to cover construction permit for new high frequency broadcast station and change studio location locally (B3-LH-2).

W69PH—WCAU Broadcasting Co., Philadelphia, Pa.—Granted license to cover construction permit for new high frequency broadcast station (B2-LH-27).

KEX—Oregonian Publishing Co., Portland, Ore.—Denied request for special service authorization to install a 10 KW transmitter, and operate with 10 KW power with present vertical antenna for the license period ending January 1, 1943. (The present assignment of KEX is **1190 kc.**, 5 KW power, unlimited time (B5-SSA-30)).

APPLICATIONS FILED AT FCC

860 Kilocycles

KTRB—KTRB Broadcasting Co., Inc., Modesto, Calif.—License to cover construction permit (B5-P-2631 as modified) which authorized increase in power, change hours of operation, install new transmitter and directional antenna for night use and move transmitter.

910 Kilocycles

WABI—Community Broadcasting Service, Bangor, Maine.—Modification of construction permit (B1-P-2349 as modified) which authorized change in frequency, increase in power, installation of new transmitter and directional antenna for night use for change in type of transmitter and extension of commencement and completion dates.

1090 Kilocycles

KTHS—Radio Broadcasting, Inc., Hot Springs National Park, Ark.—Extension of special service authorization to operate unlimited time (simultaneous with WBALO) with power of 1 KW night, 10 KW daytime for the period ending 4-1-44.

1140 Kilocycles

KGDM—E. F. Peffer, Stockton, Calif.—Modification of construction permit (B5-P-3199 as modified) which authorized change in frequency, increase in power, change in hours of operation, installation of new transmitter and directional antenna for night use, for extension of completion date from 12-20-42 to 1-20-43.

1220 Kilocycles

WGAR—The WGAR Broadcasting Co., Cleveland, Ohio.—Construction permit to make changes in equipment, change in directional antenna for day and night use, change frequency from **1480 kc.** to **1220 kc.**, increase power from 1 KW night, 5 KW daytime to 5 KW day and night. Amended to request move of transmitter to Broadview Heights Village, Ohio.

1240 Kilocycles

KICD—Iowa Great Lakes Broadcasting Co., Spencer, Iowa.—License to cover construction permit (B4-P-3178 as modified) which authorized construction of new standard broadcast station.

1290 Kilocycles

KHSL—Golden Empire Broadcasting Co., Chico, Calif.—Modification of construction permit (B5-P-3100 as modified) which authorized installation of directional antenna and increase in power for extension of completion date from 12-16-42 to 1-16-43.

1300 Kilocycles

WOOD—King-Trendle Broadcasting Corp., Grand Rapids, Mich.—Modification of construction permit (B2-P-2874 as modified) which authorized increase in power, move of transmitter and studio, installation of new transmitter and directional antenna for night use for extension of completion date from 11-23-42 to 12-23-42.

WOOD—King-Trendle Broadcasting Corp., Grand Rapids, Mich.—License to cover construction permit (B2-P-2874 as modified) which authorized increase in power, move of transmitter and studio, installation of new transmitter and directional antenna for night use.

WOOD—King-Trendle Broadcasting Corp., Grand Rapids, Mich.—Authority to determine operating power by direct measurement of antenna power.

1320 Kilocycles

WJAS—Pittsburgh Radio Supply House, Pittsburgh, Pa.—License to cover construction permit (B2-P-2947 as modified) which authorized increase in power and installation of directional antenna for night use.

WJAS—Pittsburgh Radio Supply House, Pittsburgh, Pa.—Authority to determine operating power by direct measurement of antenna power.

WATR—The WATR Co., Inc., Waterbury, Conn.—Voluntary assignment of license from The WATR Co., Inc., to Harold Thomas.

KTRB—KTRB Broadcasting Co., Inc., Modesto, Calif.—Authority to determine operating power by direct measurement of antenna power.

FM APPLICATIONS

W75P—Westinghouse Radio Stations, Inc., Pittsburgh, Pa.—License to cover construction permit (B2-PH-66 as modified) which authorized construction of new high frequency broadcast station, in part, in accordance with Commission Action of 8-4-42.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist orders should not be issued against them.

Albee Studio, 1426 G St., N. W., Washington, D. C., selling and distributing photographs, colored photographs, and enlargements and miniatures of photographs, is charged in a complaint with misrepresentation. (4871)

Purity Candy Company—Use of lottery methods in the sale of candy to ultimate purchasers is alleged in a complaint issued against Peter and James Anastasoff, trading as Purity Candy Co., 1135 North 6th St., St. Louis. (4872)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Consumer's Research Service and Consumer's Report Service, 223 West Jackson Blvd., Chicago, has been ordered to cease and desist from misrepresentation. (4734)

Sterling Sales Co., and Craftsman Sales Co., 775 West Jackson Blvd., Chicago, have been ordered to cease and desist from the use of lottery methods in the sale of novelty merchandise. (4656)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Cosby Brush & Import Co., Inc., 630 Fifth Ave., New York, engaged in the sale and distribution of combs and brushes has stipulated, in connection with the sale and distribution of products not produced in London, England, to cease and desist from use of the words "Kent of London" as a trade-mark for the products or as descriptive thereof, and from use of the word "London," either alone or in connection with the word "Kent," so as to convey the belief that the products were produced in or imported from London, England. (3562)

Federal Adjustment Bureau, 2718 East Franklin St., Richmond, Va., engaged in the sale and distribution of mimeographed, multigraphed or printed material consisting of form letters for use in collecting accounts, has stipulated to cease and desist from use of the word "Federal" as part of his trade name and from use of such word or other words of similar meaning so as to convey the belief that he is connected or associated with the Federal Government or any agency thereof. (3563)

Flock Manufacturing Co., 4th and Cambria Streets, Philadelphia, selling and distributing knitting yarns, have stipulated that, in connection with the advertising and sale of their products, they will cease and desist from use of the words "Scotch," "English," "Devonshire," "French" or "Shetland" as descriptive of yarns made in the United States of domestic wool and from use of these words in any way to imply that the products are imported from the country or places indicated; from advertising or selling products composed in whole or in part of rayon without clearly and unequivocally disclosing the fact that the products contain rayon, and, when they are composed in part of rayon, from failing to disclose each constituent fiber or material by name in the order of its predominance by weight, beginning with the largest single constituent. (3566)

H. A. Langmaid Manufacturing Co., Elmira, N. Y., packaging and distributing a powder preparation for treating hosiery and lingerie, has stipulated to discontinue use of the words "Not-A-Run" as a trade name for the preparation and from use of the words "Prevents Runs and Tears" or any similar statement conveying the belief that use of the preparation on fabrics such as silk hosiery or lingerie will eliminate the possibility of or prevent runs and tears in the fabrics so treated. The respondent also agrees to stop using the word "Manufacturing" as part of his trade name so as to convey the belief that he makes or manufactures the preparation, or owns, operates, or controls the plant or factory in which it is manufactured. (3565)

Presto Recording Corp., 242 West 55th St., New York, selling and distributing recording discs designated "Presto Discs," has stipulated in connection with the sale and distribution of its recording discs, to cease and desist from representing that the bases of the discs are composed of plate glass. (3567)

Sanitary Feather Works, Fort Worth, Texas, selling quilts and pads designated "Fetherfluff," has stipulated to cease representing that bedding sold on the market in competition with his products will be harmful to the user; that use of his commodities will cause the user to enjoy a more healthful, restful and revitalizing sleep than do competitive products; that use of his commodities is an effective treatment for rheumatism, arthritis and similar diseases or that they retain their efficiency without impairment for ten years; and that the prices at which he sells his commodities are special or reduced prices applicable for a limited time only when in fact they are the usual prices at which the commodities are sold. (3564)

Vanola Herb Tea Co., 260 East 161st St., New York, selling and distributing a medicinal preparation designated "Vanola Laxative Herb Tea," has stipulated to cease and desist from representing the preparation as an adequate treatment or effective remedy for stomach disorders, headaches, dizziness, or digestive disturbances, or that it has any therapeutic value except as a temporary laxative for the relief of constipation; from use of statements implying that the condition known as sour stomach is caused by temporary constipation or that the preparation is of any value in its treatment; and from representing that the preparation can be relied upon to make the individual healthier or that it has any effect in inducing sound sleep. (3561)

FTC CASE CLOSED

The Federal Trade Commission has ordered that the case growing out of the complaint against John A. Wathen Distillery Co., Louisville, Ky., be closed without prejudice to the right of the Commission, should future facts so warrant, to reopen it and resume trial in accordance with its regular procedure.

The complaint alleged misuse of the name Wathen. The respondent has changed its corporate name from John A. Wathen Distillery Co. to Midwest Industries, Inc.

NAB Reports
The NATIONAL ASSOCIATION OF BROADCASTERS
1626 K St., N. W. WASHINGTON Phone NAtional 2080

Neville Miller, *President* C. E. Arney, Jr., *Assistant to President*

Lewis H. Avery, *Director of Broadcast Advertising;* Howard Frazier, *Director of Engineering;* Joseph L. Miller, *Director of Labor Relations;* Paul F. Peter, *Director of Research;* Russell P. Place, *Counsel;* Arthur C. Stringer, *Director of Promotion.*

EXTENSION OF OPERATORS PERMITS REQUESTED FROM FCC

Broadcasters of District 17 started the ball rolling to secure action by the Federal Communications Commission in extending the period during which restricted operators permits will be valid.

Unanimously adopting a resolution prepared by Marshall H. Pengra, KRNR, the Washington-Oregon broadcasters put the stamp of approval upon a move to secure an extension for 6 months of the time during which restricted operators employed by stations would be permitted to serve. Strength has been gathered behind this resolution by its adoption by the District 11, 10 and 9 broadcasters.

NAB has officially transmitted the original District 17 resolution and a explanatory letter regarding it, written by Mr. Pengra, to FCC-BWC Chairman James Lawrence Fly. Howard Frazier, NAB alternate on Domestic Broadcasting Committee IV of BWC has been instructed to urge the matter before that Committee.

Sales

RETAIL PROMOTION COMMITTEE MEETS

The enlarged Retail Promotion Committee announced in Retail Promotion Bulletin No. 2, held its first meeting in Chicago coincident with the District 9 meeting. Sheldon Coons, radio and retail consultant to the committee, discussed methods of implementing the plan. Chairman Paul W. Morency reports that he and all of the members of the committee are very much gratified at the manner in which the stations have responded to the financial campaign.

"We now feel assured," said Chairman Morency, "that the necessary finances to carry out the committee plan will be forthcoming. We will hold another meeting of the full committee some time after the first of the year when the District meetings have all been completed. At that time we hope to crystalize our activity and get the retail promotion plan under way."

Following are the members of the enlarged Retail Promotion Committee:

Paul W. Morency, Chairman
WTIC, Hartford, Conn.
Robert E. Bausman
WISH, Indianapolis, Ind.
Gene L. Cagle, Texas State Network, Ft. Worth, Tex.
Dietrich Dirks
KTRI, Sioux City, Iowa
William C. Gillespie
KTUL, Tulsa, Okla.
Sherman D. Gregory
WEAF, New York, N. Y.
Kenneth K. Hackathorn
WHK-WCLE, Cleveland, O.
Arthur Hull Hayes
WABC, New York, N. Y.
Walter Johnson
WTIC, Hartford, Conn.
C. L. McCarthy
KQW, San Jose, Calif.
John M. Outler, Jr.
WSB, Atlanta, Ga.
Oliver Runchey
KOL, Seattle, Washington

OPA ON RETAIL STANDARDS

In his presentation at District Meetings, Lewis H. Avery, Director of the Department of Broadcast Advertising, is pointing out some of the problems confronting retailers under wartime economy. Some of the factors that are being emphasized are:

All retailers are going to have less to sell.

Retailers' costs are going up and their profits are coming down.

Retailers will have to cut down on many services.

Customers will need more help and advice in buying than ever before.

As a part of the presentation, broadcast advertising is urged as the best medium for retailers to tell their customers what they are trying to do for them—what their problems are—why customers should buy more efficiently and economically—why retailers are short of help—why they must cut down on many services. Because broadcasting brings the colorful, persuasive human voice into the homes of customers, this medium has been promoted as the most effective to create public sympathy and support for retailers. The retailer must keep his customers' good will if he is to survive the crisis in merchandising brought on by the war. And broadcasting is the perfect means for creating and holding good will.

The problems which all retailers face were somewhat crystallized by the order issued November 24, 1942, by Administrator Leon Henderson at the Office of Price Administration. The advance release, accompanying the order, says in part:

"Shopping in wartime America is going to mean new problems for the women of this generation, who are used to a variety of store services unknown to their mothers and grandmothers. That much is clear from the order which authorizes curtailment or elimination, without lowered ceiling prices, of a number of shopping conveniences that most people have taken for granted up to now.

"The order allows retailers to curtail non-essential delivery service. Any merchant can tell his customers to carry their own packages, whether the order is made over the counter or by telephone—provided the bundles are of reasonably carryable weight and size and do not contain items necessary in an emergency, such as drug prescriptions.

"The order also allows stores to do away with sales on approval and most returns of merchandise, and OPA recommends that they do so. The order permits them to cut out such services as "layaways," free phone service, gift wrapping after the Christmas holidays, style shows, bridge classes, exhibitions and holiday decorations.

"The measures are only part of a steadily widening picture of store economy. Deliveries already have been cut—many stores now deliver only once or twice a week. Credit has been restricted—strict controls have been placed over loans and installment buying, and shorter periods allowed for paying up charge accounts.

"As most commodities, transportation facilities and manpower are absorbed into the war effort, the situation is bound to become tighter. During 1943, no woman will be able to buy as much as she wants of anything. And this means not only radios and refrigerators, but food, clothing, drugs and other essentials. Stores will have too many customers and too few goods to sell."

Section VI of the order carries instructions of special interest to all radio station sales staffs. Here is the text of that section:

"*Special promotional expenditures.* Reduce by at least 50% of similar expenditures during 1941, the cost of purely promotional devices, examples being holiday decorations, style shows, exhibitions, etc.

"This recommendation does not apply to advertising or to promotional or educational programs directly connected with the war effort, such as sales of bonds, price control education, or education of consumers concerning necessity of wartime economies."

All of the new curtailments and restrictions clearly indicate the need for a new approach to advertising on the part of department stores and retail establishments. The need for this new approach will be coupled with the promotion of broadcast advertising by alert station managers, sales managers and salesmen. Obviously, the general public needs to be told about these curtailments and restrictions. Such educational work can be done more convincingly and effectively through broadcasting.

PER INQUIRY AND FREE TIME REQUESTS

The Robert Peterson Advertising Agency, Chicago, is asking for time on a per-inquiry basis for a Vitamin Health Food account and a Life Insurance account.

The Greeting Card Industry, New York City, is still attempting to secure free time to promote the sale of greeting cards.

Labor

SALARY STABILIZATION

The Treasury Department on December 2 issued its regulations on the stabilization of salaries above $5,000 and salaries of $5,000 or less paid to *unorganized* executive, administrative and professional employees.

The regulations also covered the enforcement of the $25,000 limit.

Increases in salaries over which the Treasury Department has control must be approved by the Commissioner of Internal Revenue before going into effect. The Treasury indicates that it will follow approximately the same general policy as previously outlined by the War Labor Board for salaries under $5,000 (see NAB Reports, p. 647).

The text of the Treasury Statement is printed on p. 684.

The War Labor Board on December 2 held that automatic cost-of-living increases provided by union agreements must not bring salaries to more than 15 per cent above their January, 1941, figure.

GRIFF WILLIAMS DECISION

The Supreme Court has refused the request of the American Federation of Musicians to review the "Griff Williams case."

In this case, the Seventh Circuit Court of Appeals held that Williams, the leader, and not the proprietor of a dance hall where Williams and his band played, was the employer of the musicians for social security tax purposes.

Williams, the court found, selected, discharged and trained the members of the band. The proprietor of the dance hall paid a contract price by check to the leader who in turn paid the orchestra members by his own checks under separate agreement with them.

The court found that the dance hall proprietor had no right of direction and control necessary to establish the employer-employee relationship between him and the orchestra members.

The facts in this case should be carefully considered in determining how it might be used as a precedent.

District Meetings

DISTRICT 10

"When that part of the world's history is written, for which you and I are responsible," declared Neville Miller, President of the NAB, at the luncheon meeting on the second day of the Tenth District meeting at the Hotel Fort Des Moines in Des Moines, Iowa, "there will be many dark pages dealing with racial hatred, religious persecution, selfishness, murder and slavery."

Petrillo Hearing in January

Senator D. Worth Clark (D-Idaho), Chairman of the sub-committee of the Senate Interstate Commerce Committee, appointed to investigate the recording ban imposed by James C. Petrillo, AFM President, announced on Tuesday that January 12 has been set as the date for the beginning of the hearings.

With the 77th Congress tottering to a close on the first of the year and many Senators absent from Washington, Chairman Clark found it impossible to secure the attendance of a majority of his committee. He thought it unwise to start the hearings so shortly before the holidays, feeling he might be confronted with the necessity for carrying them over into the next congressional session.

"But there will be many bright pages, too," he added, "more bright pages, we hope, than we now believe possible. Those bright pages will deal with the deeds of heroes, of service, of sacrifice. Our ambition and our determination is that one of those bright pages will be entitled: 'The History of Radio.'"

Earlier in his address, Mr. Miller had pointed out that radio has a tremendous job in the war effort of the United States. "This country has yet to catch the spirit which is necessary for final victory," he emphasized. "Radio's job is to build that spirit—to hold and advance the home front."

"As the struggle reaches a climax, resources of all kinds are strained to the limit and the strain is not the least on the nerves and faith of a nation. It is not for the broadcasters," added Mr. Miller, "to initiate public policies or to try to usurp or direct the functions of government, but to be the medium of enlightened inspiration and faith; to stimulate every citizen to brush aside doubt, misgiving, fatigue and indifference; to banish rumors; to carry the torch of liberty; to keep bright the fire of patriotism."

Mr. Miller's talk was delivered before thirty-one invited guests of the broadcasters, government and industry representatives, who attended the two-day meeting at the Hotel Fort Des Moines on November 27 and 28, 1942. The guests at the luncheon on the second day included representatives of the principal civic and social organizations in Iowa. Director-at-Large J. O. Maland of WHO presided at the luncheon.

The two-day meeting was called to order at 1:00 p. m. on Friday, November 27, 1942, by District Director John J. Gillin of WOW. Among the speakers on the opening day of the meeting were: Neville Miller; Lt. Col. Herbert H. Glidden, Internal Security Division, Seventh Area Warning Center; Carl Haverlin, Headquarters Consultant, Radio Bureau, Office of War Information; Eugene Carr, Office of Censorship; John Nollen, Iowa State Chairman, War Bond Sales Committee; Major Howard O. Peterson, Chief, Radio Branch, Public Relations Bureau, Seventh Service Command and Lewis H. Avery, NAB Director of Advertising, who with John M. Outler, Jr., of WSB, presented the Retail Promotion Plan.

The meeting voted its confidence in Neville Miller and unanimously adopted a resolution endorsing the NAB's A. F. of M. policy.

On the second day, the attendance was divided into two groups: the station managers attended the principal meeting, at which Brig. Gen. Charles H. Grahl, Director of Selective Service for Iowa, Howard Wertz, Director of Public Advice and Counsel, Seventh Defense Region and Lt. Dennis, Public Relations Office, Navy Department, spoke. Another meeting was presided over by Dietrich Dirks of KTRI in the absence of Sam H. Bennett of KMBC, District Chairman of the Sales Managers. At this meeting, Mr. Avery outlined some of the problems and opportunities which face broadcasters during the coming year:

Those in attendance at the Tenth District meeting included:

Anderson, Ed., WOW; Andrews, Larry, KICD; Avery, Lewis H. NAB.

Barnhart, L. D., KXEL; Beckman, Richard W., WOI; Bennett, Sam H., KMBC; Blink, Milton, Std. Radio; Bondurant, Hale, WHO; Born, L. W., KGLO; Breen, Edward, KVFD; Broxman, Pearl B., WSUI; Burke, Harry, WOW.

Carr, Eugene, Office of Censorship; Chizzini, Frank E., NBC; Conklin, Neil C., WOC; Cosby, Clarence G., KXOK; Crawford, Lois, KFGQ.

Dillon, Bob, KSO-KRNT; Dietrich, Dirks, KTRI, Du Mond, Joe, KXEL; Du Mond, Jack, KXEL.

Eighmer, F. C., KGLO; Enns, Ted, IBS; Evans, Ralph, WHO.

Fair, Harold, WHO; Falvey, Jack, KBIZ; Fitzgibbons, L. O., WOC; Flanagan, Wm. L., KSO-KRNT; Fulton, Harold W., WHO; Fitzer, Dean, WDAF.

Gaines, James M., NBC; Gillin, John J. Jr., WOW; Gedt, Gene, WHO; Gordon, K. S., KDTH; Griffin, Josephine, KFGQ.

Hagenah, Gaston M., SESAC; Haverlin, Carl, U. S. Treas.; Hoekstra, Jerry, KMOX; Hull, Dick, WOI; Hurleigh, Bob, Assoc. Press.

Jones, Merle S., KMOX.

Kaney, A. W., NBC; Kauffmann, Harry J., WDAF; Keller, Robert S., AMP; Kerrigan, Jack, WHO; Ketera, Wm., WOW; Koerper, Karl, KMBC.

Lane, C. Howard, CBS; Langlois, "Cy," Langworth; Law, Glen B., KSO-KRNT; Lawrence, Craig, IBS; Linehan, Edmund, IBS; Lottridge, Buryl, WHO; Ludlam, George, O.C.D.

McDermott, G. B., KBUR.

Macon, Don, KMBC; Maher, Marie, KBON; Maland, Joe, WHO; May, Earl E., KMA; Meltzer, Martin, ASCAP; Menzer, Carl, WSUI; Miller, Neville, NAB; Mulready, Tem, Munkef, Soren, WOW.

Nolan, L. W., KICD.

Outler, John M. Jr., WSB.

Patterson, Gerald, KSO-KRNT; Plambeck, Herb, WHO; Poynor, D. J., WMBH.

Quarton, S. D., WMT; Quentin, C. F., WMT.

Rapp, J. C., KMA; Ripper, Glenn, KMMJ.

Sanders, Charles L., WSUI; Scheer, Thomas, WHO; Searle, Don., KOIL-KFAB-KFOR; Schilling, John T., WHB; Samuels, Frank Jr., KOIL-KFAB; Shopen, F. E., KOWH; Saddler, Owen, KMA; Sexton, Morgan, KROS; Steelman, Stuart, WHO.

Von Linder, L., WMT.

Wahlstedt, John, WHB; Weber, Otto, WHO; Weeds, Weedy, WHO; Wiseman, Wm., WOW.

The guests of the broadcasters at the luncheon on the second day included:

Mr. John B. Kimberley; Mr. V. G. Lindgren; Mrs. S. E. Lincoln, PTA; Prof. Alfred Severson, National Conference of Christians and Jews; Lieut. Truman Jones, U. S. Navy; Miss Ruth Green, American Red Cross; Y2/c Jules Hack, U. S. Coast Guard; Mr. H. Chenhall, Wages and Hours Division; Mr. D. W. Crum, U. S. Employment Service; Capt. Frank Miles, Selective Service; Lt. I. J. Mirkin, U. S. Army, Camp Dodge, Iowa; Mr. W. I. Griffith, WOI; Mrs. Ione Moorhead, "Variety"; Mr. Charles I. Madison, Community Chest; Mr. E. G. Barrett, Drake; Col. Arthur Wallace, Iowa State Guard; Miss Genevieve Clayton, Camp Fire Girls; Mrs. Max Mayer, Jewish Community Center; Mrs. M. Myrton Skelley, American Legion Auxiliary; Miss Mercedes Lind, Iowa War Service, Nursing Council; Mr. J. S. Russell, AMA; Mr. Max W. Van Horn, VFW; Mr. Frank T. Dillon, YMCA; Mrs. Fred Weitz, Iowa Club Women; Mr. Forrest B. Spaulding, City Library; Hon. John McVicar, Mayor; Brigadier Enoch Hicks, Salvation Army; Mr. George Haskell, OPA, State Information Officer; Mr. N. Harold West, Boy Scouts; Mr. Addison Smith, Ruthrauf & Ryan; and Miss Scurlock, YWCA.

Leslie C. Johnson of WHBF was elected District Director at the conclusion of the two-day meeting of the Ninth District of NAB in the Palmer House, Chicago, Ill., on November 30 and December 1, 1942. Mr. Johnson's term of office begins with the end of the 1943 NAB Convention.

The meeting was called to order by District Director Edgar L. Bill of WMBD at 10:00 a. m. on Monday morning. Neville Miller, president of NAB, followed the opening remarks of District Director Bill with an outline of the war work of NAB. More than 85 broadcasters, government and industry representatives heard talks on the opening day by these delegates from various government agencies and departments, charged with the war effort:

Carl Haverlin, Headquarters Consultant, Radio Branch, OWI; Eugene Carr, Office of Censorship; Col. Irvin, and Major Earnest M. Culligan, Selective Service Administration; Eugene J. Brock and John Russell of the War Manpower Commission; Kenneth Carpenter, Treasury; Pete Peterson, Radio Branch, OWI; Lts. Holman Faust and Bruce Dennis, Public Relations Office, Navy; John N. W. Sloan, Regional Director, Office of Public Advice and Counsel, OCD; Harold Harvey, Director of Radio, Michigan Council of Defense; Miss Georgene O'Donnell, OCD; Lt. Col. Edward M. Kirby, Chief, Radio Branch, Army; Major Forster, British Embassy.

At luncheon on the opening day, John M. Outler, Jr., of WSB, Chairman of the Sales Managers Executive Committee, and Lewis H. Avery, of the Department of Broadcast Advertising, outlined the Retail Promotion Plan, with members of the Retail Promotion Committee present at the luncheon. Chairman Paul W. Morency called a meeting of the committee coincident with the Ninth District meeting to review the presentation of the plan and to study the effort to obtain subscriptions.

The first half of the meeting on the second morning was devoted to a discussion of the AFM-Petrillo problem by Neville Miller, with supporting talks by Milton Blink of Standard Radio and Cy Langlois of Lang-Worth. John Wooden of ASCAP and Bob Keller of AMP also spoke.

The latter part of the morning meeting was dedicated to a discussion of sales problems by James F. Kyler of WCLO, District Chairman of the Sales Managers Division and Mr. Avery of NAB. At the luncheon meeting on the second day, Mr. Avery discussed "Good Taste in Radio Advertising."

Resolutions unanimously endorsing the OWI plan, the NAB stand on the AFM-Petrillo situation, and the Retail Promotion Plan were adopted.

Those registered:

Ed. Allen, WIBA; Lewis H. Avery, NAB; Frank M. Baker, WJWC; R. E. Bausman, WISH; Lawrence Bendiner, OCD; Edgar L. Bill, WMBD; John Blair (John Blair & Co.); Milton Blink, Standard Radio; Hugh K. Boice, Jr., WMBD; P. H. Booton, WDZ; Walter J. Buxton, WBBM; Gene Cagle, KFJZ; Emmons C. Carlson, NBC-WMAQ; Eugene Carr, Off. of Censorship; Frank E. Chizzini, NBC; Marie E. Clifford, WHFC; William R. Cline, WJWC; Sheldon R. Coons, NAB; Maurice Corken, WHBF; Thomas R. Curran, United Press; Edgar C. Deffenbaugh, WSOY; Dietrich Dirks, KTRI; Frances J. Dixon, WENR; John A. Dyer, WAIT-WGES-WSBC; Leslie Edgley, WENR; Brad Eidmann, WAAF; Edwin G. Foreman, Jr. (The Foreman Co.), Major R. B. Forster, c/o British Embassy; James M. Gaines, NBC; S. D. Gregory, WEAF; Gaston W. Grignon, WISN; K. K. Hackathorn, WHK;

Harold M. Harvey, Michigan Council of Defense; Carl Haverlin, BMI-OWI; Arthur Hull Hayes, CBS; William S. Hedges, NBC; Jules Herbuveaux, NBC; Clair B. Hull, WDZ; Bob Burleigh (Associated Press); W. E. Hutchinson, WAAF; C. Johnson, WHBF; Walter Johnson, WTIC; Paul H. Jordan (OWI); A. W. Kaney, NBC; Robert S. Keller, AMP; Lt. Col. E. M. Kirby; Harry C. Kopf, NBC; James F. Kyler, WCLO; C. Howard Lane, CBS; "Cy" Langlois (Lang-Worth); Harry R. LePoidevin, WRJN; Emilie U. Lepthien, WBEZ; Horace Lohnes; George A. Mann (OWI); C. L. McCarthy, KQW; Joseph A. McDonald, WMAQ; A. M. McGregor, WJBC; Vincent McMahon (Press Association); Chester Miller, WJWC; Neville Miller, NAB; Frank R. Mills, WDWS; Vernon Nolte, WMBD; Georgene O'Donnell, 6th Region OCD—Radio Director; Hugh O'Malley, WISN; John M. Outler, Jr., WSB; Robert Parsons, WMBI; S. J. Paul; Walter J. Preston, WBBM; Paul Ray (John Blair & Co.); Walter C. Schafer, WDZ; Ray E. Schwartz, WOSH; Walter Schwimmer, Schwimmer & Scott; Alex Sherwood, Standard Radio; Jean Simpson, WBEZ; John Sloan, OCD; J. Kelly Smith, WBBM; Burt Squire, SESAC; James L. Stirton, WENR; Wallace Stone, Press Association, Inc.; Harry G. Templeton, WLS; Paul B. Upson, WTRC; J. L. Van Volkenburg, WBBM; Pierre Weis, Lang-Worth; John C. Wooden, ASCAP.

DISTRICT 8

"Despite the cry for more armaments and more men on the fields of battle, the greatest need is right here in the hearts of our people," declared the Hon. Henry F. Schricker, Governor of Indiana, in a talk at the luncheon meeting on the opening day of the two-day meeting of the Eighth District of NAB at the Columbia Club in Indianapolis, Ind., on December 2, 1942.

"Here," continued Governor Schricker, "radio serves with increasing distinction. But," he added, "a greater problem than ever will be presented when the war is over. Then you will have an opportunity to save the American people from themselves. When the war is over, the great time for disturbers will arrive. Then the real challenge will come. Then our enemies will try to develop dissention and suspicion among the United Nations for their own ends."

"We, as Americans, must solve our own problems," concluded Governor Schricker, and, referring to radio, "I don't know of any other agency that will have a greater opportunity to serve Americans in those trying days."

The meeting of the Eighth District of NAB was called to order by District Director John E. Fetzer of WKZO at 10:00 a. m. on December 2, 1942, in the Columbia Club. More than fifty broadcasters, government and industry representatives attended the two-day conference.

The opening day speakers included: Director Fetzer; Neville Miller, President of NAB, who outlined the war work of NAB; Carl Haverlin, Headquarters Consultant, Radio Branch, Office of War Information; Gene Pulliam of WIRE, Treasury; Ben Darrow, Regional Director, Office of Civilian Defense; Lieut. Holman Faust, Public Relations Office, Navy; Lieut. Morton, Public Relations Office, WAAC; Eugene Carr, Office of Censorship; Major R. P. Foster, British Embassy; Col. Hitchcock, Director of Selective Service for Indiana; J. Bradlay Haight, United States Employment Service.

At the conclusion of the first day's sessions President Miller outlined the NAB stand on the AFM-Petrillo problem, but the meeting was adjourned before the subject was completely explored. This discussion was continued at luncheon on the second day, following the meeting of the Sales Managers Division.

The second day's sessions were presided over by Steve Conley of WOWO as District Chairman of the Sales Managers Division. After his opening remarks, Lewis H. Avery lead the discussion of current sales problems.

The featured speaker on the second day was Miss Helen Kennedy of the Kroger Grocery and Baking Company, who outlined the long-time experience of this chain store with broadcast advertising. In the course of her talk, Miss Kennedy pointed out that the familiar serial story had proved the first successful radio vehicle for this well known advertiser. Her able defense of the daytime drama was based on both listener surveys and sales.

Following the talk by Miss Kennedy, John M. Outler, Jr., of WSB, Chairman of the Sales Managers Executive Committee, and Mr. Avery presented the retail promotion plan.

At the regular weekly luncheon of the Indianapolis Advertising Club on Thursday, Dec. 3, 1942, Mr. Avery discussed "This Thing Called Radio."

Following luncheon on the second day, the broadcasters unanimously passed resolutions endorsing the OWI plan, the NAB stand on AFM-Petrillo and the retail promotion plan.

DISTRICT 17

Additional attendance at the District 17 meeting:

Warren E. Stoffer, KWIL; Hal Byer, KWIL; Frank L. Hill, KORE; L. W. Trommlitz, KORE; Ralph E. Smith, KUIN; Lawrence L. King, KUIN; Ben E. Stone, KOOS-KLBN; Charles E. Couche, KOIN; J. F. Hiddleston, KIRO; Birt F. Fisher, KOMO-KJR; Sidney Lerman, KVAN; Florence Clements, Office of War Information; Beatty Stevens, Victory Center.

PRESIDENT'S WAR DECLARATION ADDRESS

NAB has been advised by Stephen Early, Secretary to the President, that stations are at liberty to re-broadcast the transcribed address of the President made on December 7, 1941, calling for a declaration of war, in connection with any "Pearl Harbor Day" programs.

MILEAGE RATIONING

OPA last Friday released these questions and answers to clear up certain points motorists and other gasoline users have been raising on mileage rationing, which went into effect nation-wide at 12:01 Tuesday, December 1.

1. Q. I was unable to apply for my "A" ration book at the school house registration held in my city last week. How can I get my basic ration?
   A. By applying to your local War Price and Rationing Board, but since local boards will be very busy acting on applications for transport and non-highway rations, they will not be able to receive your application for a basic "A" until December 3, unless you have good reason for consideration before that time.
2. Q. I live in an eastern town where no schoolhouse registration took place in connection with the new mileage program. How do I register my tires?
   A. By obtaining an application form from a service station or other place designated by your local War Price and Rationing Board, filling the form out and sending it to the Board.
3. Q. How soon must I do this?
   A. As soon as possible. In any event soon enough for the board to return to you by December 12 a Tire Inspection Record.
4. Q. Why December 12?
   A. Because beginning the following day, on December 13, it will be illegal to operate your car without the Tire Inspection Record, which is evidence that you have registered your tires and also disposed of any tires over five you may have for the car.
5. Q. How long do I have to dispose of my excess tires?
   A. Until December 1.

6. Q. I got my Tire Inspection Record; now what do I do with it?

A. Keep it with your car as evidence that you have registered your tires, and whenever you have your tires inspected, the inspector will initial the record to show that the inspection has been made.

7. Q. How soon must the first inspection be made?

A. By January 31.

8. Q. At the schoolhouse registration I got my "A" book, but this will not give me enough mileage. Can I get more?

A. Yes, for occupational driving if you can prove need. If the schoolhouse registrar did not give you an application form for a supplemental ration, you may get one from your local rationing board. The application, when filled out, is to be submitted to the board.

9. Q. I have already applied for a supplemental ration but have not received it. If it is not issued before December 1 what should I do for the gasoline I will need to carry on my work?

A. Your "A" book should provide you with sufficient mileage until your supplemental application is acted upon.

10. Q. I formed a car-sharing club. Still my rationing board turned down my application for a "B" book. Is this right?

A. Thousands of car-sharers are operating on "A" books alone. In order to get additional gasoline, you must prove need for more mileage than the "A" will give you, as well as meet car-sharing requirements.

11. Q. My dealer says he will not accept any coupons from me until I write some identification on the back. Is this an OPA requirement?

A. Yes.

12. Q. What identification is required?

A. This varies with types of coupons. All "A", "B", "C" and "D" coupons must have the car license number and state of registration written in ink on the back. Passenger Fleet operators using interchangeable coupon books must write or stamp the fleet name. "T" coupons must be endorsed on the back with the War Certificate number or the fleet name. "E" and "R" coupons must have the name and address of the user written on the back.

13. Q. Does this mean that I must write my license number and state on the back of every one of my "A" coupons?

A. Yes, in ink.

14. Q. What is the purpose of this requirement?

A. It will help insure against misuse of your coupon book in case it is lost or stolen. It will also provide OPA with a valuable means of tracking down thieves and "black market" operators.

15. Q. I applied for a Certificate of War Necessity for my farm truck, but have not yet received it. I am told that I can not get a ration of gasoline, without this certificate. Will I be forced to lay up my truck if my certificate does not arrive before December 1?

A. No. Your local War Price and Rationing Board is authorized to issue a temporary Transport ration in such a case.

16. Q. I have heard that to save my tires, I ought to drive under 35 miles an hour. Is this a "must"?

A. Yes. Your local War Price and Rationing Board may suspend or revoke your ration book if you exceed this speed.

PUBLIC IS BEING EDUCATED TO CARRY SETS

During the last two days, the following stations have reported participation in the plan of educating the public to bring their ailing radio sets to the radio repairman during wartime.

This kind of an educational campaign helps stations render service. To be effective, radio programs must reach people. We can't get away from that.

Every radio station in the country should carry a spot-a-day on a revolving schedule.

WPB COMPLETES TUBE PLANS

Listed below is the TENTATIVE LIST of residential radio receiver tubes whose manufacture during 1943 WPB is expected soon to authorize.

The list should prove of interest to your local radio trade because the members have not yet been apprised of the types to be produced.

A discussion meeting in Washington, December 7, may be expected to produce only slight changes in the list.

GRADUATES OF RADIO COURSE TO WJTN

A number of broadcast stations are now enjoying the benefits of their cooperation in the promotion of Radio Technician Training Courses.

That they have the inherent qualities demanded of the situation is attested by information from Simon Goldman, manager, WJTN, Jamestown, N. Y.

At the present time, WJTN has a fulltime employee who graduated from the ESMWT-NAB course this summer and who followed it up to become a first-class radiotelephone operator. The station also has a second employee on a parttime basis who is a graduate of the course.

In addition Mr. Goldman is contemplating the employment of another student—a graduate of the course—from a nearby city.

"To sum the matter up," said Mr. Goldman, "there is no question but that these courses are filling a great need, not only in the armed forces, but also at radio stations. . . ."

What Is Your Experience?

Are you employing any graduates of these courses? If you are, will you be good enough to so state to NAB and include details covering the situation with your letter.

More of the Fundamentals of Radio courses are being organized and a great many are in operation with students in training well into five figures.

All requests for such training classes originate in the field. If there is not a class in progress in your area, it is suggested that you contact the nearest engineering school. See the ESMWT Institutional Director or the Dean of Engineering. If classes are in progress, it is suggested that you investigate the personnel. Probably there are some students who would like to enter broadcasting through your station.

SUGGESTION FOR STATIONS

Former broadcaster, Jack Hanssen, now undergoing training as an officers candidate in a large middle west camp, reports that the men in his camp "don't know what's on the air or where to find the station."

"Seems to me," he wrote, "that radio stations would be rendering a real service at little cost if they would send copies of their weekly schedules to the camps in the territory they serve."

"Here at —— every division has a radio in its day room and I know the boys in our particular division would like to know when and where to listen."

WAR BRINGS CHANGES TO WHEB

Another WHEB announcer, Edwin Lilja, has gone to the war. Prior to Lilja's departure, the Portsmouth, N. H., station lost Program Director Gordon Kinney to the Office of War Information. Production Manager Bill Bradley left a few months ago, and is now in the Signal Corps.

New additions include Paul Lindsay, formerly of WCAX, Burlington, Vt., as Chief Engineer; Fred Lines, operator, new to radio, from Kittery, Maine; Ed Duffy, salesman; Carl Reed, former WLW dramatic producer, as news commentator; and Ted Bodge, part-time announcer.

WBT TOWER DAMAGED

Columbia's station in Charlotte, North Carolina, lost the top section of the antenna tower during high winds on the night of December 1.

According to reports, approximately 150 feet were destroyed. Excellent work by the station's engineers returned the WBT transmitter to the air about two hours after the accident occurred. Chief Engineer J. J. Beloungy, in New Orleans at the time, made a hasty air trip and aided by tail winds returned to Charlotte in four hours.

RADIO EDUCATION

Radio Station WMT, Cedar Rapids, Iowa, is cooperating to the fullest extent with the Board of Education of that city to help keep American education before the public.

Children of all ages, from kindergarten through the twelfth grade, have the opportunity to broadcast since there are three "shows" per week which are presented by the schools.

There is a "Pupil Discussion" on Friday afternoons where current events are discussed by a group of high school girls and boys.

Two more programs are scheduled for each Saturday afternoon. "School Newscast," a program edited by the classes in journalism, "airs" the outstanding events in the schools of eastern Iowa. Approximately one hundred schools actively participate in this project by appointing reporters who send in news each week to the School Newscast office in Cedar Rapids, Iowa. One hundred thirty-five high school reporters were guests of WMT at the close of school last spring. They were entertained at a theater party, banquet, and special broadcast. The enthusiasm of these boys and girls encouraged the radio station and the Board of Education to continue "School Newscast." This is a ten-minute program.

"The Assembly Room of the Air" is beginning its fifth year of broadcasting. Here in a twenty-minute program, outstanding projects which are being developed in the schools are presented in a unique manner. High school symphonic orchestras play; a capella choirs sing; dramas from high schools and elementary grades also have a place on this broadcast. Each show is complete with its own pupil master of ceremonies. If the kindergarten children are performing, our announcer is a brave five-year-old; if high school people are putting on the show, a boy or girl from that age level presides. The Assembly Room of the Air is informal, natural, yet filled with the vitality of youth. This is an experience of unlimited educational value.

Charles McKinley Saltzman

The FCC this week passed the following resolution on the death of Major General Charles McKinley Saltzman, a former chairman of the Commission:

WHEREAS, The honorable career of General Saltzman as an industrious public servant and an ardent developer of American communications has been brought to a close by his death, be it therefore resolved:

> That the Federal Communications Commission hereby enrolls this memorial in the permanent records of the Commission:
>
> "In memory of Major General Charles McKinley Saltzman, U. S. Army, Retired, who leaves behind him at his death on November 25, 1942, an outstanding record of service to his country. As Chief Signal Officer of the Army from 1924-28 and as a member of the Federal Radio Commission from 1929-32, serving as its Chairman from 1930-32, he guided policies beneficial to American communications. This memorial is enscribed by his successors in communications regulation in recognition of his earlier contributions."

Treasury Salary Regulations

TITLE 29—LABOR

CHAPTER VIII—Commissioner of Internal Revenue

PART 1002—Stabilization of Salaries

Treasury Department,
Office of Commissioner of Internal Revenue,
Washington, D. C.

To Collectors of Internal Revenue
and Others Concerned:

On October 27, 1942, the President approved regulations relating to wages and salaries prescribed by the Economic Stabilization Director (7 F. R. 8748) under the Act of October 2, 1942, entitled "An Act to amend the Emergency Price Control Act of 1942, to aid in preventing inflation, and for other purposes" (Public No. 729, 77th Congress, 2d Session) and Executive Order No. 9250, dated October 3, 1942 (7. F. R. 7871). Those regulations conferred on the Commissioner of Internal Revenue authority to administer the provisions thereof relating to the stabilization and limitation of certain salaries. In the exercise of the authority so conferred on the Commissioner of Internal Revenue, the following regulations relating to salaries are hereby promulgated.

TABLE OF CONTENTS

Subpart A.—Definitions

Sec. 1002.1. General terms
1002.2. Employee and employer
1002.3. Executive employees
1002.4. Administrative employees
1002.5. Professional employees
1002.6. Salary payments
1002.7. Salary rate
1002.8. Insurance and pension benefits
1002.9. Approval by Commissioner

Subpart B.—Jurisdiction of Commissioner

Sec. 1002.10 Amount of salary payment
1002.11. Conclusiveness of determination
1002.12. Geographical scope

Subpart C.—Salary Increases

Sec. 1002.13. Commissioner's approval required
1002.14. Commissioner's approval not required

Subpart D.—Salary Decreases

Sec. 1002.15. Salaries under $5,000
1002.16. Salaries over $5,000

Subpart E.—Governmental Employees

Sec. 1002.17. State and local employees

Subpart F.—Limitations on Certain Salaries

Sec. 1002.18. Basic allowance
1002.19. Charitable contributions
1002.20. Insurance premiums
1002.21. Fixed obligations
1002.22. Federal taxes
1002.23. Multiple employers
1002.24. Limitation on 1942 salaries
1002.25. Community property
1002.26. Taxable year
1002.27. Effective date

Subpart G.—Effect of Unlawful Payments

Sec. 1002.28. Amounts disregarded
1002.29. Criminal penalties
1002.30. Salary allowances under Code

Subpart H.—Exemptions

Sec. 1002.31. Exempt employers
1002.32. Statutory salaries
1002.33. Services in foreign countries
1002.34. Foreign employers

AUTHORITY: Secs. 1002.1 to 1002.34, inclusive, issued under Pub. Law 729, 77th Cong., 2d Sess.; E.O. 9250, 7 F.R. 7871; Regs. of Economic Stabilization Director, dated October 27, 1942, 7 F.R. 8748.

SUBPART A.—Definitions

Sec. 1002.1. *General terms.*—When used in these regulations, unless otherwise distinctly expressed or manifestly incompatible with the intent thereof—

(a) The term "Act" means the Act of October 2, 1942, (Public No. 729, 77th Congress) entitled "AN ACT to amend the Emergency Price Control Act of 1942, to aid in preventing inflation, and for other purposes."

(b) The term "Board" means the National War Labor Board created by Executive Order No. 9017, dated January 12, 1942 (7 F.R. 237).

(c) The term "Commissioner" means the Commissioner of Internal Revenue.

(d) The term "Code" means the Internal Revenue Code, as amended and supplemented.

(e) The term "person" has the same meaning as when used in the Code.

(f) The term "General Regulations" means regulations (relating to wages and salaries) issued by the Economic Stabilization Director, approved by the President on October 27, 1942 (7 F.R. 8748), and as amended or supplemented by subsequent regulations issued by the Economic Stabilization Director relating to wages and salaries.

(g) The term "in contravention of the Act" means in contravention of the Act of October 2, 1942 (referred to in paragraph (a) above), Executive Order No. 9250 of October 3, 1942 (7 F.R. 7871), the General Regulations, these regulations and other rulings and regulations promulgated under such Act.

Sec. 1002.2. *Employee and Employer.*—An employee, for the purposes of these regulations, is an individual who performs services for compensation where the relationship between him and the person for whom he performs the services is the legal relationship of employee and employer. An employer is any person for whom an individual performs any services, of whatever nature, as the employee of such person. The term "employer" is not limited to private persons engaged in trade or business, but includes organizations which, under section 101 of the Code, are exempt from income taxation, and also government departments and agencies. The existence of the legal relationship of employer and employee is to be ascertained in the light of the general purposes of the Act and the General Regulations.

Generally, the legal relationship of employer and employee exists when the person for whom services are performed has the right to control and direct the individual who performs the services, not only as to the result to be accomplished by the work done, but also as to the details and means by which that result is accomplished. An employee is generally subject to the will and control of the employer not only as to what shall be done but how it shall be done. In this connection it is unnecessary that the employer actually direct or control the precise manner in which the services are performed; it is sufficient that he has the right to do so. The right to discharge is also an important factor indicating that the person possessing that right is an employer.

Other factors characteristic of an employer, but not necessarily present in every case, are the furnishing of tools and the furnishing of a place to work to the individual who performs the services. In general, if an individual is subject to the control or direction of another merely as to the result to be accomplished by the work and not as to the means and methods for accomplishing the result, he is an independent contractor. An individual performing services as an independent contractor is not an employee as to such services. Physicians, lawyers, architects, contractors and others who follow an independent trade, business or profession in which they offer their services to the public are generally independent contractors and not employees. Whether the relationship of employer-employee exists will be determined upon an examination of the particular facts of each case.

If the relationship of employer and employee exists the designation or description of the relationship by the parties as anything other than that of employer and employee is immaterial. If such relationship exists, it is of no consequence that the employee is designated as a partner, co-adventurer, agent or independent contractor. The measurement, method, or designation of compensation is immaterial if the relationship of employer and employee thus in fact exists.

An officer of a corporation is an employee of the corporation but a director as such is not. A director may be an employee of the corporation, however, if he performs services for the corporation other than those required by attendance at and participation in meetings of the board of directors.

Sec. 1002.3 *Executive employees.*—An individual "employed in a bona fide executive capacity" means any employee—

(a) whose primary duty consists of the management of the establishment in which he is employed or of a customarily recognized department or sub-division thereof, and

(b) who customarily and regularly directs the work of other employees, and

(c) who has the authority to hire or fire other employees or whose suggestions and recommendations as to the hiring or firing and as to the advancement and promotion or any change of status of other employees will be given particular weight, and

(d) who customarily and regularly exercises discretionary powers, and

(e) who is compensated for his services on a salary basis at not less than $30 per week (exclusive of board, lodging, or other facilities), and

(f) whose hours of work of the same nature as that performed by employees not employed in an executive, administrative or professional capacity do not exceed 20 per cent of the total number of hours worked in the workweek by the employees under his direction; provided that this subsection (f) shall not apply in the case of an employee who is in sole charge of an independent establishment or a physically separated branch establishment.

Sec. 1002.4. *Administrative employees.*—An individual "employed in a bona fide administrative capacity" means any employee—

(a) who is compensated for his services on a salary or fee basis at a rate of not less than $200 per month (exclusive of board, lodging, or other facilities), and

(b) (1) who regularly and directly assists an employee in a bona fide executive or administrative capacity (as such terms are defined in these regulations), where such assistance is nonmanual in nature and requires the exercise of discretion and independent judgment; or

(2) who performs under only general supervision, responsible nonmanual office or field work, directly related to management policies or general business operations, along specialized or technical lines requiring special training, experience, or knowledge, and which requires the exercise of discretion and independent judgment, or

(3) whose work involves the execution under only general supervision of special nonmanual assignments and tasks directly related to management policies or general business operations involving the exercise of discretion and independent judgment; or

(4) who is engaged in transporting goods or passengers for hire and who performs, under only general supervision, responsible outside work of a specialized or technical nature requiring special training, experience, or knowledge, and whose duties require the exercise of discretion and independent judgment.

Sec. 1002.5. *Professional employees.*—Any individual "employed in a bona fide professional capacity" means any employee who is—

(a) engaged in work

(1) predominantly intellectual and varied in character as opposed to routine mental, manual, mechanical, or physical work, and

(2) requiring the consistent exercise of discretion and judgment in its performance, and

(3) of such a character that the output produced or the result accomplished cannot be standardized in relation to a given period of time, and

(4) whose hours of work of the same nature as that performed by employees not employed in an executive, administrative or professional capacity do not exceed 20 percent of the hours worked in the workweek by such employees; provided that where such non-professional work is an essential part of and necessarily incident to work of a professional nature, this subsection (4) shall not apply, and

(5) (A) requiring knowledge of an advanced type in a field of science or learning customarily acquired by a prolonged course of specialized intellectual instruction and study, as distinguished from a general academic education and from an apprenticeship, and from training in the performance of routine mental, manual, or physical processes; or

(B) predominantly original and creative in character in a recognized field of artistic endeavor as opposed to work which can be produced by a person endowed with general manual or intellectual ability and training, and the result of which depends primarily on the invention, imagination, or talent of the employee, and

(b) compensated for his services on a salary or fee basis at a rate of not less than $200 per month (exclusive of board, lodging, or other facilities); provided that this subsection (b) shall not apply in the case of an employee who is the holder of a valid license or certificate permitting the practice of law or medicine or any of their branches and who is actually engaged in the practice thereof.

Sec. 1002.6. *Salary payments.*—The terms "salary" and "salary payment" mean only such salaries over which the Commissioner has jurisdiction. (See section 1002.10 of these regulations.) These terms are not used in any restricted, narrow or technical sense, but encompass all forms of direct or indirect compensation for personal services of an employee which is computed on a weekly, monthly, annual or other basis, other than wages (as defined in the General Regulations and in orders or rulings of the Board). Bonuses, gifts, loans, commissions, fees, additional compensation and any other remuneration in any form or medium whatsoever are considered as falling within the concept of "salary" or "salary payment." Any compensation which is not regarded as wages in the commonly accepted sense of the term is salary notwithstanding that it may be computed on an hourly, daily or piecework basis.

Retainer fees paid to an individual, not otherwise an employee, are not to be considered as salary. Insurance and pension benefits in a reasonable amount (see section 1002.8) are likewise excluded from the terms "salary" and "salary payment."

Although the terms "salary" and "salary payment" do not include any compensation other than for personal services of an employee, the Commissioner is not precluded from determining, after investigation, that amounts denominated, for example, as rents or royalties are in fact salary payments subject to the controls set forth in these regulations.

All amounts paid to, authorized to be paid to, or accrued to the account of any employee during a calendar year for services rendered or to be rendered are to be included as salary for such year.

Sec. 1002.7. *Salary rate.*—The term "salary rate" means the rate or aggregate of rates or other basis at which the salary for any particular work or service is computed, either under the terms of a contract or agreement, express or implied, or in conformity with custom or usage existing in the employer's business establishment. For treatment of commissions and bonuses on a percentage basis see section 1002.14.

Sec. 1002.8. *Insurance and pension benefits.*—Compensation may include insurance and pension benefits. In determining the amount of salary of an employee, the insurance or pension benefit inuring to such employee is not measured by what he will be entitled to receive after the happening of certain contingencies, but rather in terms of the amount of contributions or premiums paid by the employer. To the extent that an insurance and pension benefit inuring to an employee is reasonable in amount, such benefit is not considered as salary as defined in section 1002.6.

Section 165(a) of the Code sets forth the conditions under which a trust forming part of a stock bonus, pension or profit-sharing plan of an employer for the exclusive benefit of his employees or their beneficiaries shall not be taxable for Federal income tax purposes. Contributions by an employer to an employees' trust or under an annuity plan, which trust or plan meets the exemption requirements of such section 165(a) (as of the date the contributions are made), shall be considered as reasonable, regardless of the amount of such contributions. On the other hand, contributions by an employer to an employees' trust which is subject to Federal income taxation because it does not meet the requirements of such section 165(a) shall be treated, for purposes of these regulations, as salary.

To the extent amounts paid by an employer on account of insurance premiums on a policy on the life of an employee are deductible by the employer in computing net income under the conditions set forth in section 23(a) of the Code (relating to deductions for ordinary and necessary business expenses), such amounts are not considered as salary. The amount of insurance premiums that will be considered as falling outside the concept of salary cannot exceed the amount of such premiums deductible by the employer for Federal income tax purposes. If, however, such insurance premiums are includible in the gross income of the employee (for whose benefit the insurance has been taken out), as well as deductible by the employer, the amount which shall not be considered as salary in respect of such employee may not exceed 5 percent of the employee's annual salary determined without the inclusion of insurance and pension benefits.

The application of the preceding paragraph may be illustrated by the following examples. An employer having 20 salaried employees takes out life insurance policies on each of such employees in favor of beneficiaries designated by them. The premiums paid for 10 of the employees are in each instance 7 per cent of the employee's annual salary (exclusive of insurance and pension benefits). As to the remaining 10 employees the premiums in each instance are 5 percent of the employee's annual salary (exclusive of insurance and pension benefits). It is assumed that with respect to each employee the premium paid would be includible in his gross income under the Code and would be deductible by the employer under section 23(a) of the Code. As to the first 10 employees 2 percent of the premiums in each instance will be considered as salary, whereas no part of the premiums will be considered as salary in the case of the second group of employees. If, however, none of the premiums were deductible in computing the net income of the employer, then the entire amount of the premium in each instance would be considered as salary to the employee involved.

Premiums paid by an employer on policies of group life insurance without cash surrender value covering the lives of his employees, or on policies of group health or accident insurance, the beneficiaries of which are designated by such employees do not constitute salary (regardless of the amount of salary otherwise received annually by such employees) if such premiums are deductible by the employer under section 23(a) of the Code.

Sec. 1002.9. *Approval by Commissioner.*—Wherever the terms "approval by the Commissioner" and "determination by the Commissioner" are used in these regulations they shall, except as otherwise provided, include an approval or determination by a regional officer of the Salary Stabilization Unit established by the Commissioner under Treasury Decision 5176, which officer is authorized to make such determination. If an approval or determination made by such regional officer is subsequently modified or reversed by the Commissioner, such approval or determination shall be deemed to have been continuously in effect from its original date until the first day of the payroll period following reversal or modification, or until such later date as the Commissioner may provide in his ruling.

To illustrate, an employer obtains the approval of a regional officer of the Salary Stabilization Unit that a proposed increase in certain salaries is permissible. The approval is given on January 2, 1943, and the salary increase is to become effective January 15, 1943. On March 15, 1943, the Commissioner determines that the salary increase was not proper and reverses the approval given by the regional officer. The Commissioner provides in his ruling that the increase in salary shall be discontinued after March 31, 1943. For purposes of these regulations, no part of the salary for the period between January 15 and March 31 shall be considered to have been in contravention of the Act.

SUBPART B.—Jurisdiction of Commissioner

Sec. 1002.10. *Amount of Salary Payment.*—The General Regulations provide that the Commissioner shall have authority to determine, under regulations to be prescribed by the Commissioner with the approval of the Secretary of the Treasury, whether salary payments are made in contravention of the Act. The Commissioner's jurisdiction is confined to—

(1) salary payments in excess of $5,000 per annum, in the case of individuals employed in any capacity whatsoever; and

(2) salary payments of $5,000 or less per annum, in the case of individuals (i) who are employed in bona fide executive, administrative or professional capacities, and (ii) who, in their relations with their employer, are not represented by duly recognized or certified labor organizations, and (iii) whose services are not within the meaning of "agricultural labor" as defined in paragraph (1) of section 4001.1 of the General Regulations.

Other salary payments are subject either to the jurisdiction of the Board or the Secretary of Agriculture, as prescribed in the General Regulations. If, for example, a salary is to be increased from $4500 per annum to $5200 per annum (and subdivision (2) is inapplicable), approval of such increase, if required, must be obtained from the Board.

Sec. 1002.11. *Conclusiveness of Determination.*—(a) Any determination by the Commissioner that a salary payment is in contravention of the Act is conclusive in every respect upon all executive departments and agencies of the Federal Government for the following purposes—

(1) determining costs or expenses of any employer for the purpose of any law or regulation, either heretofore or hereafter enacted or promulgated, including the

Emergency Price Control Act of 1942, or any maximum price regulation thereunder;

(2) calculating deductions under the revenue laws of the United States; or

(3) determining costs or expenses under any contract made by or on behalf of the United States.

(b) Any such determination of the Commissioner is final and not subject to review by The Tax Court of the United States or by any court in any civil proceedings. Nothing herein is intended, however, to deny the right of any employer or employee to contest in The Tax Court of the United States or in any court of competent jurisdiction the validity of—

(1) any provision of these regulations, on the ground such provision is not authorized by law, or

(2) any action taken or determination made under these regulations, on the ground that such action or determination is not authorized, or has not been taken or made in a manner required, by law.

(c) No increase in salary rate shall result in any substantial increase of the level of costs or furnish the basis either to increase price ceilings of the commodity or service involved or to resist otherwise justifiable reductions in such price ceilings.

Sec. 1002.12. *Geographical Scope.*—The provisions of these regulations shall not apply to salaries in any Territory or possession of the United States, except Alaska and Hawaii.

SUBPART C.—Salary Increases

Sec. 1002.13. *Commissioner's approval required.*—Section 1 of the Act provides in effect that salaries, so far as practicable, shall be stabilized at the levels which existed on September 15, 1942. In the case of a salary rate of $5,000 or less per annum existing on October 27, 1942, or established thereafter in compliance with these regulations, and in the case of a salary rate of more than $5,000 per annum existing on October 3, 1942, or established thereafter in compliance with these regulations, no increase shall be made by the employer, except as provided in section 1002.14, without prior approval of such increase by the Commissioner. Any salary increase made before the required approval of the Commissioner is obtained is from the date of such increase in contravention of the Act. (See sections 1002.28 and 1002.29 for the consequences of a salary payment made in contravention of the Act.) The Commissioner may, however, approve an increase in salary rate to be effective as of the date of the application for approval.

The burden of justifying an increase in salary rate shall in every instance be upon the employer seeking to make such increase. Increases in salary rates will not be approved unless necessary to correct maladjustments or inequalities, or to aid in the effective prosecution of the war. A promise made by an employer to his employees prior to October 3, 1942 that salaries would be increased in the future is generally to be ignored in determining whether an increase after that date should be approved. The same rule is applicable with respect to a promise made by an employer prior to October 27, 1942, in the case of employees whose salary rates are $5,000 or less per annum. A salary increase, however, may be approved, as to salaries below $5,000 per annum, if to deny such increase would be to force the continuation of a salary which is below the general level existing for the same or comparable work in the local area on September 15, 1942.

An employer who has established a new job classification, or who has begun business, after October 3, 1942, must obtain approval of the Commissioner for the payment of salaries for such job classification or in such new business; provided, however, that if the salary rates in question are not in excess of those prevailing for similar job classifications within the local area, the approval of the Commissioner is not required. An increase in a salary rate for a job classification established after October 3, 1942, shall be subject to the limitations provided in this Subpart.

A mere change in the name, organization, or financial structure of an employer, whether such employer be an individual, partnership or corporation, will not in itself be sufficient for a finding that, for the purposes of these regulations, a new business has been begun or new job classification established after such change.

Any change in a salary rate, regardless of its effective date, which results from an award or decision of an arbitrator or referee made after October 3, 1942, in the case of salaries of more than $5,000 per annum, and after October 27, 1942, in the case of salaries of $5,000 or less per annum, is subject to the provisions of these regulations notwithstanding that the agreement or order for arbitration or reference was made on or before October 3, 1942 or October 27, 1942, as the case may be.

Unless otherwise expressly exempted, any change in a salary rate, provided for in any agreement existing as of October 3, 1942 in the case of salaries of more than $5,000 per annum, or as of October 27, 1942 in the case of salaries of $5,000 or less per annum, which is to take effect at some future date or on the happening of some future event, is subject to the provisions of these regulations regardless of when the agreement was made.

Payment for overtime will constitute an increase in salary rate, and thus will require the approval of the Commissioner, unless the customary practice of the employer has been to pay for overtime, and the rate has not been changed.

Except as may be otherwise provided from time to time by the Commissioner, an application for the approval of a salary increase shall be filed by the employer with the regional office of the Salary Stabilization Unit of the Bureau of Internal Revenue in whose territorial jurisdiction the main office or principal place of business of the employer is located. Such application shall be filed on forms prescribed by the Commissioner and shall contain such information as may be required by the Commissioner.

Sec. 1002.14. *Commissioner's approval not required.*—The Commissioner's approval is not required where an increase in salary rate is made in accordance with the terms of a salary agreement or salary rate schedule in effect on October 3, 1942, or approved thereafter by the Commissioner, and is a result of—

(1) individual promotions or reclassifications,

(2) individual merit increases within established salary rate ranges,

(3) operation of an established plan of salary increases based on length of service,

(4) increased productivity under incentive plans,

(5) operation of a trainee system, or

(6) such other reasons or circumstances as may be prescribed in rulings or regulations promulgated by the Commissioner from time to time.

For purposes of this section, the term "salary agreement" or "salary rate schedule" may include a salary policy in effect on October 3, 1942, even though not evidenced by written contracts or written rate schedules. For example, a salary policy may be determined from previous payroll records or other payroll data. The existence of such policy, however, must be established to the satisfaction of the Commissioner, and the burden of proof rests upon the employer. In such cases, the employer in advance of making an increased salary rate may reduce the salary policy to writing and secure approval thereof by the Commissioner.

A bonus or other form of additional compensation which does not exceed in amount the bonus or other additional compensation to such employee for the last bonus year ending before October 3, 1942 does not require approval by the Commissioner. In addition a bonus based upon a fixed percentage of salary where the percentage has not been changed, does not require approval by the Commissioner even though the amount may be increased due to an authorized increase in salary. Any other bonus or other form of additional compensation, requires approval by the Commissioner. Where the compensation, or part thereof, is paid on a commission basis and is based upon a fixed percentage (which has not been changed) of sales made by the employee, a payment does not require approval by the Commissioner even though the amount may represent an increase due to increased sales by the employee. See, however, Subpart F of these regulations.

The provisions of this section may be illustrated as follows:

(1) The X Corporation began business in 1940. As of July 1, 1942, pursuant to a corporate resolution duly passed in January 1942, all of its salaried employees received more than $5,000 per annum. No approval of the Commissioner is required to increase the salary of an employee who is promoted in November 1942 from a salesman to general manager and who receives a salary within the salary range paid previously to individuals occupying the position of general manager.

(2) The X Corporation in December 1942 wishes to establish a new salary rate schedule raising the level of compensation of all its salaried employees. Approval by the Commissioner of such schedule is required. Assuming that such approval has been obtained, further approval by the Commissioner of any adjustment under such schedule coming within this section is not required.

(3) The Y Corporation begins business on November 1, 1942. The salaries paid by it to its employees are commensurate with salaries paid by other employers in comparable businesses in the same local area. Payment of such salaries does not require the approval of the Commissioner. Any increase in salary rates, however, requires the approval of the Commissioner.

(4) The M Corporation, which has manufactured furniture since 1925, is reorganized in November 1942 and emerges from the reorganization proceedings as the N Corporation. There is no change in the nature of the business although there is a substantial alteration in the financial structure of the company. The N Corporation is not to be treated as a new employer beginning business after October 27, 1942. Consequently, any general increase in salaries over and above those paid by the M Corporation requires the prior approval of the Commissioner.

(5) Employees of the Z Corporation have customarily received a bonus of 5 percent of their annual salary at the end of each calendar year. If, for example, one of the employees received $6,000 in 1941 but received salary of $7,000 in 1942 due to a salary increase on July 1, 1942, a bonus of $350 may be paid to him for 1942 without prior approval of the Commissioner, notwithstanding that his bonus for 1941 was only $300.

SUBPART D—Salary Decreases

Sec. 1002.15. *Salaries under $5,000*—In the case of a salary rate existing as of the close of October 3, 1942, or established thereafter in compliance with these regulations, under which an employee is paid a salary of less than $5,000 per annum for any particular work, the general rule is that no decrease can be made by the employer in such salary rate below the highest salary rate paid for such work in the local area between January 1, 1942 and September 15, 1942. A decrease is permitted, however, with the approval of the Commissioner, in order to correct a gross inequity in any case or to aid in the effective prosecution of the war. Where such decrease is permitted the salary rate may be reduced below the highest salary rate paid for the work in question between January 1, 1942 and September 15, 1942. Except as otherwise provided in this section, any decrease in such salary rate after October 3, 1942 shall be considered in contravention of the Act if it is made prior to the approval thereof by the Commissioner.

Except as may be otherwise provided from time to time by the Commissioner, an application for approval of any salary decrease shall be filed in the same manner as in the case of an application for approval of a salary increase. See section 1002.13 of these regulations.

The Commissioner's approval is not required, for example, in the following cases where salary decreases are made after October 3, 1942:

(1) The new salary rate does not fall below the highest salary rate existing between January 1, 1942 and September 15, 1942 for the particular work in question or for the same or comparable work in the local area.

(2) An employee has been demoted to a lower position than that filled by him between January 1, 1942 and September 15, 1942 and the salary rate for such lower position is not less than the highest salary rate existing for that position during the same period.

(3) An employee has been relieved of substantial duties and responsibilities.

A disparity between salaries paid by a particular employer and those paid by employers generally in the local area does not necessarily constitute justification for decrease in salary rates paid by such employer.

Sec. 1002.16. *Salaries over $5,000*—In the case of a salary rate existing as of the close of October 3, 1942, or established thereafter in compliance with these regulations, under which an employee is paid a salary of more than $5,000 per annum, the employer is permitted to make, without approval by the Commissioner, a decrease to a rate not less than $5,000 per annum. If, however, by virtue of a decrease the new salary paid to the employee is less than $5,000 per annum, then the decrease below $5,000 per annum is subject to the limitations of section 1002.15 of these regulations. To the extent that prior approval by the Commissioner of a decrease is not required under section 1002.15 or this section, such decrease shall not be considered as being in contravention of the Act.

SUBPART E—Governmental Employees

Sec. 1002.17. *State and local employees*—An adjustment in salaries (not fixed by statute, see section 1002.32) may be made by a State, or any political subdivision thereof, the District of Columbia, or any agency or instrumentality of any of the foregoing, on certification to the Commissioner that such adjustment is necessary to correct maladjustments, or to correct inequalities or gross inequities. The certification procedure shall not apply to any adjustment which would not otherwise require the Commissioner's approval or which would raise salaries beyond the prevailing level of compensation for similar services in the area or community. A certificate by the official or agency authorizing the adjustment stating the nature and amount of such adjustment, and briefly setting forth the facts meeting the foregoing requirement, will be accepted by the Commissioner as sufficient evidence of the propriety of the adjustment, subject to review by the Commissioner. Modification by the Commissioner of adjustments made by a governmental official or agency acting pursuant hereto shall not be retroactive.

In exceptional cases where such an adjustment is sought, and in all cases where the agency seeks an adjustment other than by the certification procedure, application for approval shall be filed with the appropriate regional office of the Salary Stabilization Unit.

SUBPART F—Limitations on Certain Salaries

Sec. 1002.18. *Basic allowance*—In addition to setting forth limitations on increases and decreases in salary rates, the General Regulations provide a ceiling on the amount of salary which may be paid to any employee during a calendar year. The general rule is that no amount of salary may be paid or authorized to be paid to or accrued to the account of any employee or received by him during the calendar year 1943, and in each succeeding calendar year, which, after reduction by the Federal income taxes on the amount of such salary, computed as below without regard to other income and without regard to deductions or credits, would exceed $25,000. Additional allowances of salary which may be permitted in certain circumstances are described in sections 1002.19 to 1002.22, inclusive.

The amount of Federal income taxes referred to in the preceding paragraph shall be determined—

(1) by applying to the total amount of salary (but not including any amounts allowable under sections 1002.19 to 1002.22, inclusive, of these regulations) paid or accrued during the calendar year in question, undiminished by any deductions, the rates of taxes imposed by Chapter 1 of the Code (except section 466 thereof relating to withholding) as if such total amount of salary were the net income (after the allowance of

the appropriate credit), the surtax net income, and the Victory tax net income, respectively; and

(2) without further allowance of any other credits against any of such taxes.

Assume that the rates imposed under Chapter 1 of the Code, as amended by the Revenue Act of 1942, are applicable with respect to the calendar year 1943. Under the formula described in the preceding paragraph, the basic allowance of salary for 1943 (which after reduction by the Federal income taxes would yield $25,000) is $67,200. This latter amount is the maximum amount of salary which an employee would be permitted to receive for 1943, provided he is not entitled to further allowances under sections 1002.19 to 1002.22, inclusive. If the rates of Federal income tax applicable for 1943 should be increased above those now existing in the Code for 1942, the basic allowance of salary will be an amount greater than $67,200.

The basic allowance of salary as described in this section represents an amount against which the appropriate tax rates are applied and remains the same regardless of whether the employee is married or single or of the number of his dependents, if any. It is likewise unaffected by the nature or amount of his other income (taxable or exempt) or by the extent of his deductions allowable for tax purposes generally.

For purposes of this Subpart an amount of salary, in addition to the basic allowance of salary, will be permitted for any expenses paid or incurred by an employee which are ordinary and necessary for the performance of the services for which the employee is compensated. No such additional amount, however, shall be permitted for expenses which would not be deductible in computing individual Federal income taxes.

Sec. 1002.19. *Charitable contributions.*—An amount of salary, in addition to the basic allowance of salary described in section 1002.18, will be permitted in certain circumstances to allow an employee to maintain his customary contributions to charitable, educational or other organizations described in section 23(o) of the Code. Such additional amount of salary will be permitted if the employee establishes to the satisfaction of the Commissioner that after resorting to his other income from all sources he would suffer undue hardship in maintaining his customary contributions out of the basic allowance of salary described in the preceding section.

For purposes of this section and sections 1002.20, 1002.21, and 1002.22, "income from all sources" includes income which is exempt under the Federal income tax laws.

What constitutes "undue hardship" for purposes of this section and sections 1002.20, 1002.21, and 1002.22, is dependent upon all the circumstances in each case.

Contributions may be customary within the meaning of this section even though in the particular year in question the organizations to which the contributions are made are different from those to whom contributions were made in previous years.

Sec. 1002.20. *Insurance premiums.*—An amount of salary, in addition to the basic allowance under section 1002.18 may be permitted to an employee under this section to meet certain payments during the employee's taxable year for insurance premiums. To be entitled to such extra allowance of salary the employee must establish to the satisfaction of the Commissioner that after resorting to other income from all sources (see section 1002.19) he is unable, without disposing of assets at a substantial financial loss resulting in undue hardship, to meet premium payments on policies of life insurance in force and effect on October 3, 1942 on his life.

The premium payments referred to in the preceding paragraph are those which are required to be met during the calendar year in question. No allowance for salary is permissible for payments of premiums which are due in future calendar years.

If any insurance has been permitted by an employee to lapse after October 3, 1942, no allowance for salary is permissible for payments of premiums on policies taken out after such date, even though the total annual premiums on the new policies are not in excess of the total annual premiums due on policies in effect on October 3, 1942. Renewal of policies in effect on October 3, 1942 (even though new premiums are higher) will not preclude applicability of this section to premium payments on the renewed policies. Generally, in the case of a conversion of a policy in effect on October 3, 1942 to a new policy requiring payment of higher premiums, this section is inapplicable to the annual amount by which the new premiums exceed the premiums in effect on October 3, 1942.

As used in this section, and sections 1002.21 and 1002.22, substantial financial loss is not necessarily confined to a loss suffered on disposition of assets at depressed prices substantially below cost to the employee. The present value in use or in production of income and the potential future value are factors to be considered. For the purpose of this Subpart, the provisions of the Code governing the determination of loss upon disposition of assets are not controlling.

Sec. 1002.21. *Fixed obligations.*—An amount of salary in addition to the basic allowance under section 1002.18 may be permitted to an employee under this section to make required payments during the employee's taxable year on fixed obligations. Before any amount will be allowed under this section, the employee must establish to the satisfaction of the Commissioner that after resorting to his income from all sources (see section 1002.19), he is unable, without the necessity of disposing of assets at a substantial financial loss resulting in undue hardship, to meet required payments of fixed obligations for which he was obligated on October 3, 1942. See section 1002.20.

The term "fixed obligations" as used in this section means any enforceable liability of the employee the amount of which liability was fixed and determined on October 3, 1942. In no event is an allowance for salary permissible under this section for the payment of any amount due in future years.

Sec. 1002.22. *Federal taxes.*—An amount of salary in addition to the basic allowance under section 1002.18 may be permitted to an employee, under this section, to meet payments during the employee's taxable year of certain Federal income taxes. To be entitled to such an additional allowance of salary the employee must establish to the satisfaction of the Commissioner that after resorting to his income from all sources (see section 1002.19), he is unable, without disposing of assets at a substantial financial loss resulting in undue hardship, to meet payments of certain Federal income taxes, more fully described below. See section 1002.20.

An allowance for additional salary is permissible in order to pay Federal income taxes owed by the employee himself for any prior taxable year, but is not permissible in order to pay any Federal income tax due on the basic allowance of salary under section 1002.18, except as this allowance is applicable for 1942. See section 1002.24. Thus, an amount for additional salary might be allowable in 1943 to meet the payment of the entire Federal income tax due on a salary received in 1942. In 1944 an amount for additional salary might be allowable to meet the payment of Federal income tax due on additional salary allowances permitted for 1943 under sections 1002.19, 1002.20, 1002.21 and this section for 1943; but no amount, however, would be allowable to meet the payment of the Federal income tax due on the basic allowance under section 1002.18 for 1943.

Sec. 1002.23. *Multiple employers.*—Salaries payable to an employee from more than one employer may, for purposes of Subpart F, be treated as if all such salaries were payable by a single employer, regardless of the financial or other relationship of the several employers. For example, individual A received a salary as an employee of the X Corporation and also as an employee of its subsidiary, the Y Corporation. Both the X Corporation and the Y Corporation are required to adjust their salary arrangements with such employee to conform with the provisions of these regulations. If individual B is employed by the M Corporation and the N Corporation, both of whom are owned, directly or indirectly, by the same person or persons, the M Corporation and the N Corporation must adjust their salary arrangements with B to conform with the provisions of these regulations. If individual C is employed by the R Corporation and the S Corporation and both corporations have knowledge of that fact, they must adjust their salary arrangements with C to conform with the provisions of these regulations.

Where an individual is employed by two or more employers who, under these regulations, are required to make salary arrangements in order to conform with the provisions of Subpart F, such individual and employers will be deemed to be acting in contravention of the Act and these regulations if proper salary arrangements are not made. In any event, no employee may receive any salary in excess of that allowed under Subpart F. See Section 1002.30.

Sec. 1002.24. *Limitation on 1942 salaries.*—Unless payment thereof is required under a bona fide contract in effect on October 3, 1942, no amount of salary shall be paid or authorized to be paid to or accrued to the account of any employee or received by him after October 27, 1942 and before January 1, 1943, if the total salary paid, authorized, accrued or received for the calendar year 1942 exceeds the amount of salary which would otherwise be allowable under section 1002.18 (but not under sections 1002.19 to 1002.22, inclusive) and also exceeds the total salary paid, authorized, accrued or received for the calendar year 1941. For purposes of this section, the term "bona fide contract" means a legally enforceable agreement, written or oral. Such an agreement may be evidenced by a bona fide resolution of a board of directors of a corporate employer passed on or before October 3, 1942. The amount allowable under section 1002.18 for 1942 (before reduction by any Federal income taxes) is $54,428.57.

Sec. 1002.25. *Community property.*—The limitations on salaries provided for in sections 1002.18 to 1002.24, inclusive, shall in nowise be affected by any community property law. For example, an employee resident in the State of R receives a salary in 1943 of $100,000. Under the laws of that State, $50,000 of that salary is deemed to be the property of the employee's wife. For purposes of these regulations, the employee's salary is $100,000, not $50,000.

Sec. 1002.26. *Taxable year.*—For purposes of Subparts F and G of these regulations, the term "taxable year" of an employee shall mean the calendar year during which the salary in question is paid or authorized to be paid to or accrued to the account of such employee or received by him. This rule is applicable regardless of whether the employer or employee, or both, file Federal income tax returns for a fiscal year or report income, for Federal income tax purposes, on an accrual basis or on the cash receipts and disbursements basis.

Sec. 1002.27. *Effective date.*—The provisions of this Subpart, except as provided in section 1002.24, shall be applicable to all salaries paid or accrued after December 31, 1942, irrespective of when payment or accrual of such salary was authorized and irrespective, also, of any contract or agreement made prior to or after such date.

SUBPART G.—EFFECT OF UNLAWFUL PAYMENTS

Sec. 1002.28. *Amounts disregarded.*—(a) Section 5(a) of the Act provides in effect that the President shall prescribe the extent to which any salary payment made in contravention of regulations promulgated under the Act shall be disregarded by executive departments and other governmental agencies in determining the costs or expenses of any employer for the purposes of any other law or regulation. In any case where a salary payment is determined by the Commissioner to have been made in contravention of the Act, the entire amount of such payment is to be disregarded by all executive departments and all other agencies of the Federal Government for the purposes of—

(1) determining costs or expenses of any employer for the purpose of any law or regulation, either heretofore or hereafter enacted or promulgated, including the Emergency Price Control Act of 1942, or any maximum price regulation thereof;

(2) calculating deductions under the revenue laws of the United States; or

(3) determining costs or expenses under any contract made by or on behalf of the United States.

A payment in contravention of the Act may be disregarded for more than one of the foregoing purposes.

(b) In the case of salaries decreased in contravention of the Act, the amount to be disregarded, as required by paragraph (a) of this section, is the amount of the salary actually paid or accrued by the employer at the reduced rate. Thus, if, for example, on November 1, 1942, a weekly salary rate of $100 has been unjustifiably reduced to $50 for the remainder of the calendar year 1942, the amount to be disregarded under paragraph (a) of this section is the total amount of salary paid at the weekly rate of $50.

(c) In the case of salaries increased in contravention of the Act, the amount to be disregarded, as required by paragraph (a) of this section, is the amount of the salary actually paid or accrued by the employer at the increased rate and not merely an amount representing an increase in such salary. Thus, if, for example, on November 1, 1942, a weekly salary rate of $100 is unjustifiably increased to $150 for the remainder of 1942, then the amount of salary to be disregarded for purposes of paragraph (a) of this section is the total amount paid at the weekly rate of $150. Also, if, for example, on February 1, 1943 a weekly salary rate of $100 is increased to $150 without prior required approval, but is restored to $100 on June 1, 1943, after formal disapproval by the Commissioner or regional officer, then the amount of salary to be disregarded for purposes of paragraph (a) of this section is the total amount at the weekly rate of $150. Neither in the cases described in this paragraph nor in the case described in paragraph (b) of this section are the total amounts paid at the weekly rate of $100 to be disregarded for purposes of paragraph (a) of this section. (See section 1002.31 relating to salary allowances under section 23 (a) of the Code.)

(d) In the case of a salary in excess of the amount allowable under Subpart F of these regulations which is paid to, authorized to be paid to, or accrued to the account of an employee during his taxable year (as distinguished from the taxable year of the employer) in contravention of the Act, the amount to be disregarded is the full amount of such salary and not merely the amount representing the excess over the amount allowable under such Subpart F of these regulations. Thus, if, for example, under such Subpart F an employee would be entitled to receive a total salary during his taxable year of $67,200 for services rendered in such year, but actually receives $100,000 for such services, then the entire amount of $100,000 is to be disregarded for purposes of paragraph (a) of this section.

Sec. 1002.29. *Criminal penalties*—Section 5 (a) of the Act provides in substance that no employer shall pay, and no employee shall receive, any salaries in contravention of the regulations promulgated by the President under the Act. Section 11 of the Act provides that any person, whether an employer or employee, who wilfully violates any provision of the Act or of any regulations promulgated thereunder, shall be subject, upon conviction, to a fine of not more than $1,000, or to imprisonment for not more than one year, or to both such fine and imprisonment.

Sec. 1002.30. *Salary allowances under Code.*—Under section 23 (a) of the Code reasonable allowances for salaries are allowed as deductions in computing net income. The tests which determine whether an allowance for salaries paid or accrued is reasonable within the meaning of section 23 (a) of the Code are in no wise suspended by any provision of these regulations. An employer may be exempt from the operation of these regulations yet be denied deductions for purposes of section 23 (a) of the Code with respect to the salaries paid or accrued by him. Also, a basic allowance under section 1002.18 and additional allowances under sections 1002.19 to 1002.22, inclusive, may nevertheless be disallowed in whole or in part as deductions under section 23 (a) of the Code.

SUBPART H—EXEMPTIONS

Sec. 1002.31. *Exempt employers.*—The provisions of these regulations, except those contained in Subparts F and G thereof, shall not apply in the case of an employer who employs eight or less individuals in a single business. An employer is subject to the provisions of these regulations if at the time a salary increase is to take effect he has in his employ more than eight individuals in a single business. It is not necessary that each employee be paid a salary provided all the individuals employed receive compensation for their personal services. If it is subsequently determined that the number of employees has been temporarily reduced by the employer, or that the employer has utilized any other improper device, for the sole purpose of claiming the exemption provided in the General Regulations and these regulations, then such exemption shall be deemed to have been improperly obtained and of no force or effect.

An employer may be exempt under this section notwithstanding that shortly after the effective date of a salary increase he enlarges his personnel in good faith to more than eight employees. Any further adjustment in salary will then be subject to the provisions of these regulations.

Sec. 1002.32. *Statutory salaries*—The provisions of these regulations are applicable in every respect to any salary paid by the United States, any State, Territory, or possession or political subdivision thereof, the District of Columbia, or any agency or instrumentality of any one or more of the foregoing, except where the amount of such salary is fixed by statute. The term "statute" for purposes of this section does not include a municipal ordinance or resolution enacted by a governmental unit inferior to a State, Territory, or possession. Salaries covered by the Federal Classification Act of 1923, as amended, are excluded from the operation of these regulations. Likewise, salaries, for example, of public school teachers which are paid under salary schedules fixed by a state legislature and providing for mandatory increments are excluded from the operation of these regulations. See section 1002.17.

Sec. 1002.33—*Services in foreign countries*—The provisions of these regulations shall not be applicable in the case of any individual employer, resident in the United States or any Territory or possession thereof, or of a corporate employer organized under the laws of the United States or any State, Territory or possession, with respect to salaries paid by such employers to employees for services rendered exclusively in foreign countries.

Sec. 1002.34. *Foreign employers.*—The provisions of these regulations shall not be applicable in the case of nonresident foreign employers except that if any salary is paid to an employee residing in the United States payment of such salary is subject to all the provisions of these regulations.

GUY T. HELVERING,
Commissioner of Internal Revenue.

APPROVED: December 2, 1942.

JOHN L. SULLIVAN,
Acting Secretary of the Treasury.

(Filed with the Division of the Federal Register December 2, 1942, 11:40 a.m.)

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, December 7. They are subject to change.

Tuesday, December 8

WQAM—Miami Broadcasting Company, Miami, Fla.—Modification of C. P., **560 kc.,** 1 KW night, 5 KW day, unlimited.

WKBW—Buffalo Broadcasting Corporation, Buffalo, N. Y.—Renewal of license (main and auxiliary), **1520 kc.,** 50 KW, unlimited, DA-day and night.

WGR—Buffalo Broadcasting Corporation, Buffalo, N. Y.—Renewal of license (main and auxiliary), **550 kc.,** 1 KW night, 5 KW day, unlimited, DA-night.

Wednesday, December 9

WLW—The Crosley Corporation, Cincinnati, Ohio.—Modification of license, **700 kc.,** 50 KW night, 500 KW day, unlimited, using W8XO transmitter.

Consolidated Hearing

To be held before Commissioner George Henry Payne in Federal Court Room 245, Post Office Building, New Orleans, Louisiana.

WDSU—WDSU, Incorporated, New Orleans, La.—C. P., **1280 kc.,** 5 KW, DA-day and night, unlimited.

WDSU—WDSU, Incorporated, New Orleans, La.—Renewal of license, **1280 kc.,** 1 KW night, 1 KW day, unlimited.

WMIS—Natchez Broadcasting Co., Natchez, Miss.—Renewal of license, **1490 kc.,** 250 watts, unlimited.

WGRM—P. K. Ewing, Greenwood, Miss.—Renewal of license, **1240 kc.,** 250 watts, unlimited.

Friday, December 11

WFLA—The Tribune Company, Tampa, Fla.—C. P., **970 kc.,** 5 KW, unlimited, DA-night.

Further Consolidated Hearings

WGAR—The WGAR Broadcasting Co., Cleveland, Ohio.—C. P., **1220 kc.,** 5 KW, unlimited, DA-day and night.

WHBC—The Ohio Broadcasting Co., Canton, Ohio.—C. P., **1480 kc.,** 1 KW, unlimited, DA-night.

WADC—Allen T. Simmons, Tallmadge, Ohio.—C. P., **1220 kc.,** 50 KW, unlimited, DA-day and night.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WNYC—City of New York Municipal Broadcasting System, New York City.—Granted application (Commissioners Case and Craven dissenting), for Special Service authorization to change hours of operation from limited to 6 a. m. to 10 p. m. with power of 1 KW, for the period of the license, using non-directional antenna between local sunrise and sunset and Minneapolis, and directional antenna prior to local sunrise and from local sunset at Minneapolis until 10 p. m. adjusted so as to radiate approximately 56 m/v in the direction of WCCO; the data setting forth the details of the antenna readjustments subject to approval of the Chief Engineer; also granted authority to replace portions of the phasing equipment (B1-SSA-52).

KHUB—John P. Scripps (Assignor), Luther E. Gibson (Assignee), Watsonville, Calif.—Granted consent to voluntary assignment of license (B5-AL-310) of Station KHUB from John P. Scripps to Luther E. Gibson, subject, however, to the express condition that this action is without prejudice to the application to the licensee of any report, policy, rule or regulation which may result from the proceedings under Order No. 79.

KOCY—M. C. McEldowney (Transferor), Plaza Court Broadcasting Co., John D. Thomas and C. E. Johnson (Transferees), Oklahoma City, Okla.—Granted consent to relinquishment of control of station KOCY from M. S. McEldowney to Plaza Court Broadcasting Co., John D. Thomas and C. E. Johnson, by transferee's purchase of 300 shares or 32.6 per cent of the issued and outstanding stock of licensee for a total consideration of $30,000 (B3-TC-311).

WSAN—Lehigh Valley Broadcasting Co., Allentown, Pa.—Granted modification (B2-MP-1660) of construction permit (B2-

P-2637) for extension of completion date from Nov. 10, 1942, to May 10, 1943.

WOOD-WASH—King-Trendle Broadcasting Corp., Grand Rapids, Mich.—Granted application (B2-L-1729) of WOOD for license to cover construction permit to operate with 5 KW on **1300 kc.**; also granted authority to determine operating power (B2-Z-1471). Designated for hearing application for modification of license for WASH (B2-ML-1143), to authorize operation with the new equipment authorized for station WOOD, affirming Commissioner Craven's denial for temporary authority to WASH to operate WOOD's transmitter.

DESIGNATED FOR HEARING

Head of the Lakes Broadcasting Co., Superior, Wisc.—Designated for hearing application (B4-PH-74) for new high frequency (FM) broadcast station to operate on **44500 kc.** with coverage of 2,754 square miles; hours of operation: 6 day, 5 night.

DOCKET CASE ACTIONS

The FCC has announced its Proposed Findings of Fact and Conclusions (B-164) proposing to deny without prejudice the application of Herman Radner, Dearborn, Mich., for a construction permit to establish a new standard broadcast station to use 680 kilocycles, with 250 watts power, daytime only. This action was taken in view of the fact that the proposal involves the use of materials and personnel and is in conflict with the Memorandum Opinion of April 27, 1942. (Docket No. 6220.)

The Commission announced its Proposed Findings of Fact and Conclusions (B-163) proposing to deny without prejudice the applications of Northside Broadcasting Corp. (WGRC), New Albany, Ind., for construction permit to move transmitter locally, increase power from 250 watts to 1 kilowatt, install new transmitter, change frequency from 1400 to 790 kilocycles, and install directional antenna for daytime and nighttime use; and Kingsport Broadcasting Co., Inc. (WKPT), Kingsport, Tenn., for construction permit to change frequency from 1400 to 790 kilocycles, increase power from 250 watts to 1 kilowatt, install a new transmitter, and erect a directional antenna for nighttime use. This action was likewise taken in view of the fact that the proposals involve the use of materials and personnel and are in conflict with the Memorandum Opinion of April 27, 1942. (Docket Nos. 6052 and 6249, respectively.)

Like action was announced in the Commission's Proposed Findings of Fact and Conclusions (B-162) on the applications of The Associated Broadcasters, Inc. (KSFO), San Francisco, Calif., for construction permit to install new transmitting equipment, erect a directional antenna for day and nighttime operation, change the station's transmitter location, and change operating assignment from 560 kilocycles, 5 kilowatts day and 1 kilowatt night, to 740 kilocycles with power of 50 kilowatts; and Pacific Agricultural Foundation, Ltd. (KQW), San Jose, Calif., for construction permit to install new transmitting equipment, make changes in directional antenna, and to increase operating power on 740 kilocycles from 5 to 50 kilowatts, unlimited time. (KQW presently operates under authority of a temporary license on 740 kilocycles with power of 5 kilowatts, using a directional antenna.) The Commission also concluded that the continued operation of KQW on 740 kilocycles under authority of a temporary license shall not be deemed to affect the position of any party in connection with operation on 740 kilocycles when conditions permit the construction of other facilities for operation on said frequency.

The Commission announced issuance of a Supplemental Findings of Fact and Conclusions (B-144) in re the application of Butler Broadcasting Corp., for construction permit for new standard broadcast station at Hamilton, Ohio. The Commission states in its Supplemental Proposed Findings:

"The Commission having fully considered all of the evidence in the record, and finds unnecessary the adoption of findings and conclusions on issues other than those having to do with the policy set forth in the Commission's Opinion of April 27, 1942, and hereby "vacates its Proposed Findings and Conclusions adopted February 17, 1942, and hereby makes and enters on the basis for the Commission's decision herein the following Proposed Findings and Conclusions:

(a) The granting of the application would not be consistent with the policy promulgated by the Commission in its Opinion of April 27, 1942.

(b) Public interest, convenience or necessity would not be served through a grant of the application, which should therefore be denied."

The Commission adopted an Order making final its Proposed Findings of Fact and Conclusions (B-158) denying without prejudice the application of Louis G. Baltimore (WBRE), for a construction permit for a satellite station at Scranton, Pa., to operate with 100 watts power, simultaneously with Station WBRE.

The Commission announced its Decision and Order denying the application of The Crosley Corp. (W8XO), Cincinnati, Ohio, for construction permit to increase the maximum power of Developmental Broadcast Station W8XO to 750 kilowatts. The Commission further ordered that the outstanding license for the operation of Developmental Station W8XO be terminated, in accordance with the condition therein contained, effective January 1, 1943.

MISCELLANEOUS

WAAF—Downers Journal Publishing Co., Chicago, Ill.—Granted authority to determine operating power by direct measurement of antenna power (B4-Z-1463).

KVIC—Radio Enterprises, Inc., Victoria, Texas.—Granted authority to determine operating power by direct measurement of antenna power (B3-Z-1465).

KSEH—KSTP, Inc., St. Paul, Minn.—Granted license (B4-LRE-425) to cover construction permit (B4-PRE-419) for new relay broadcast station to be used with applicant's standard station KSTP; frequencies **156750, 158400, 159300, 161100 kc.**, 50 watts.

KVGB—Helen Townsley, Great Bend, Kans.—Granted license (B4-L-1714) to cover construction permit (B4-P-3509), for move of transmitter. Also granted authority to determine operating power by direct measurement of antenna power (B4-Z-1461).

WCOD—Twin City Broadcasting Co., Inc., Lewiston, Maine.—Granted authority to determine operating power by direct measurement of antenna power (B1-Z-1468).

KEHT—The KANS Broadcasting Co., area of Wichita, Kans.—Granted renewal of relay broadcast station license for the period December 1, 1942, to December 1, 1943 (B4-RRE-377).

WERB—Pinellas Broadcasting Co., area of St. Petersburg, Fla.—Granted renewal of relay broadcast station license for the period December 1, 1942, to December 1, 1943 (B3-RRE-376).

WAFK—A. Frank Katzentine, area of Miami Beach, Fla.—Granted renewal of relay broadcast station license for the period ending October 1, 1944 (B3-RRY-242).

KBTB—Red River Broadcasting Co., Inc., Duluth, Minn.—Present relay broadcast station license further extended upon a temporary basis only, pending determination upon applications for renewal, in no event later than January 1, 1943 (B4-SRY-196).

KGBK—Helen Townsley, area of Great Bend, Kans.—Present relay broadcast station license further extended upon a temporary basis only, pending determination upon applications for renewal, in no event later than January 1, 1943 (B4-SRY-240).

WAEA—W. A. Patterson, area of Chattanooga, Tenn.—Present relay broadcast station license further extended upon a temporary basis only, pending determination upon applications for renewal, in no event later than January 1, 1943 (B3-SRY-132).

WDSU—WDSU, Inc., New Orleans, La.—Denied motion to continue hearing now set for *December 9,* in re applications of WDSU for construction permit to operate on **1280 kc.**, 5 KW, directional antenna day and night, unlimited time, and for renewal of license (Dockets 6331 and 6332); Natchez Broadcasting Co. (WMIS), Natchez, Miss., for renewal of license (Docket 6333); and P. K. Ewing (WGRM), Greenwood, Miss., for renewal of license (Docket 6334).

Beauford H. Jester, Individually and as Trustee for W. W. Callan, Dewitt T. Hicks, Hilton W. Howell, Wilford W. Naman, Robert G. Levy, Ross M. Sams and Davis Stribling, Waco, Texas.—Granted motion for extension of time within which to file proposed findings, now due November 18, in re application for construction permit for new broadcast station (Docket No. 6218).

WHKC—United Broadcasting Co., Columbus, Ohio.—Denied motion for continuance of hearing set for December 16 on application for construction permit to operate on **610 kc.,** 1 KW, directional antenna night, unlimited time (Docket 6408).

WGAR—The WGAR Broadcasting Co., Cleveland, Ohio.—Granted motion for continuance of deposition from November 25 to December 2 and hearing dates from December 4 to December 11, in re applications of WGAR for construction permit to operate on **1220 kc.,** 5 KW, unlimited, directional antenna day and night, The Ohio Broadcasting Co. (WHBC), Canton, Ohio, for construction permit to operate on **1480 kc.,** 1 KW, unlimited, directional antenna night, and Allen T. Simmons (WADC), Tallmadge, Ohio, for construction permit to operate on **1220 kc.,** 50 KW, unlimited, directional antenna day and night (Dockets 6309, 6310 and 6311 respectively).

J. C. Kaynor, Ellensburg, Wash.—Denied petition to defer action until Order 79 is decided, on application for construction permit for new station (Docket 5965).

WLW—The Crosley Corp., Cincinnati, Ohio.—Denied motion for leave to strike hearing issues 6, 7 and 8 in re application for modification of license to operate on **700 kc.,** 50 KW day, 500 KW night, unlimited time, using W8XO transmitter; on Commission's own motion granted leave to amend to application so as to specify operation with proposed daytime power only between local sunrise and local sunset; and ordered that hearing issues 6, 7 and 8 be stricken from hearing notice on application as so amended (Docket 6341).

WRDW—Augusta Broadcasting Co., Augusta, Ga.—Granted modification (B3-MP-1668) of construction permit (B3-P-2966) for extension of completion date from 12-7-42 to 1-7-43.

WNAX—WNAX Broadcasting Co., Yankton, S. Dak.—Granted modification (B4-MP-1672) of construction permit (B4-P-3288) for extension of completion date to 6-7-43.

WRDO—WRDO, Inc, Augusta, Maine.—Granted motion to postpone hearing now set for November 25, until December 18, in re application for construction permit to operate on **1400 kc.,** 250 watts, unlimited time (Docket 6419).

WDSU—WDSU, Inc., New Orleans, La.—Denied motion to continue hearing now set for December 19, in re applications of WDSU for construction permit to operate on **1280 kc.,** 5 KW, directional antenna day and night, unlimited time, and for renewal of license (Dockets 6331 and 6332); Natchez Broadcasting Co. (WMIS), Natchez, Miss., for renewal of license (Docket 6333); and P. K. Ewing (WGRM), Greenwood, Miss., for renewal of license (Docket 6334).

WMIS—Natchez Broadcasting Co., Natchez, Miss., and WGRM—P. K. Ewing, Greenwood, Miss.—Granted motion to take depositions and for waiver of Section 1.221 of the Commission's Rules of Practice and Procedure, in re Dockets 6333 and 6334 above.

WMIS—Natchez Broadcasting Co., Natchez, Miss., and WDSU—WDSU, Inc., New Orleans, La.—On the Commission's own motion, supplemented the issues in Dockets 6333 and 6332.

KWG—McClatchy Broadcasting Co., Stockton, Calif., and KROY—Royal Miller, Sacramento, Calif.—Granted petition to dismiss without prejudice applications of KWG for construction permit to operate on **1230 kc.,** 250 watts, unlimited, and of KROY for construction permit to operate on **1240 kc.,** 250 watts, unlimited (Dockets 6427 and 6428 respectively).

Olympic Broadcasting Corp., Bremerton, Wash.—Granted petition to dismiss without prejudice application for construction permit for new station (Docket 6445).

WTNJ—WOAX, Inc., Trenton, N. J.—Granted petition to continue consolidated hearing set for December 2, until December 21, on application of WTNJ, City of Camden (WCAM), Camden, N. J., and Radio Industries Broadcast Co. (WCAP), Asbury Park, N. J., for renewal of licenses and modification of licenses (Dockets 5893 and 6161; 5361 and 6144; and 5778 and 6145, respectively).

WSAY—Brown Radio Service & Lab. (Gordon P. Brown, Owner), Rochester, N. Y.—Granted modification of construction permit which authorized change in frequency, increase in power, installation of directional antenna for day and night use and new transmitter, and move of transmitter, for extension of completion date from November 23, 1942, to May 1, 1943 (B1-MP-1661).

WOOD—King Trendle Broadcasting Corp., Grand Rapids, Mich.—Granted modification of construction permit as modified, which authorized increase in power, installation of directional antenna for night use, and move of transmitter and studio, and new transmitting equipment, for extension of completion date from November 23 to December 23, 1942 (B2-MP-1674).

WOC—The Tri-City Broadcasting Co., Davenport, Iowa.—Granted modification of construction permit as modified which authorized changes in frequency, increase in power, move transmitter, and installation of directional antenna for day and night use and new transmitter, for extension of completion date from November 19 to December 4, 1942 (B4-MP-1671).

KMPC—KMPC, The Station of the Stars, Inc., Beverly Hills, Calif.—Granted license to cover construction permit as modified, which authorized increase in power, installation of directional antenna for day and night use, new transmitter, and move of transmitter (B5-L-1704). Granted authority to determine operating power by direct measurement of antenna power (B5-Z-1434).

WWNY—The Brockway Co., Watertown, N. Y.—Granted license to cover construction permit as modified, for installation of directional antenna for night use, change frequency, increase power, change hours of operation, and move transmitter (B1-L-1723). Granted authority to determine operating power by direct measurement of antenna power (B1-Z-1459).

WSBT—South Bend Tribune, South Bend, Ind.—Granted authority to determine operating power by direct measurement of antenna power (B4-Z-1469).

KGCX—E. E. Krebsbach, Sidney, Mont.—Granted modification of license to change location of main studio to Main Street, Sidney, Mont. (B5-ML-1141).

WCAO—The Monumental Radio Co., Baltimore, Md.—Granted license to cover construction permit as modified, which authorized increase in power, installation of new transmitter and directional antenna for day and night use, and move of transmitter (B1-L-1718). Granted authority to determine operating power by direct measurement of antenna power (B1-Z-1452).

WBEZ—Board of Education, City of Chicago, Ill.—Granted modification of construction permit as modified, for new non-commercial educational broadcast station, for extension of completion date from December 7, 1942, to March 7, 1943 (B4-MPED-16).

WCOA—Pensacola Broadcasting Co., Pensacola, Fla.—Granted petition for postponement of hearing now set for December 17 to January 18, 1943, in re application for construction permit (Docket 6441).

Lewis R. Gilmer, Joliet, Ill.—Granted petition to request late filing of appearance in re application for new station to communicate with ship telephone stations on Mississippi River and connecting inland waters (Docket 6451).

APPLICATIONS FILED AT FCC

600 Kilocycles

WSJS—Piedmont Publishing Co., Winston-Salem, N. Car.—License to use present licensed RCA 250-D transmitter as an auxiliary transmitter with power of 250 watts.

1130 Kilocycles

WCAR—Pontiac Broadcasting Co., Pontiac, Mich.—Special service authorization to operate from 7:00 a. m. to local sunrise during the months of December, 1942; January, February and March, 1943; with power of 250 watts.

1150 Kilocycles

WDEL—WDEL, Inc., Wilmington, Dela.—Modification of construction permit (B1-P-2758 as modified), which authorized increase in power, installation of new transmitter and directional antenna for day and night use for changes in daytime directional antenna pattern and extension of commencement and completion dates.

1240 Kilocycles

KROY—Royal Miller, Sacramento, Calif.—Voluntary assignment of license from Royal Miller to Royal Miller, Marion Miller, L. H. Penney, Gladys W. Penney and Will Thompson, Jr., doing business as Royal Miller Radio.

KICD—Iowa Great Lakes Broadcasting. Co., Spencer, Iowa.—Authority to determine operating power by direct measurement of antenna power.

1290 Kilocycles

KHSL—Golden Empire Broadcasting Co., Chico, Calif.—License to cover construction permit (B5-P-3100 as modified), which authorized increase in power and installation of directional antenna for day and night use.

KHSL—Golden Empire Broadcasting Co., Chico, Calif.—Authority to determine operating power by direct measurement of antenna power.

WTOC—Savannah Broadcasting Co., Savannah, Ga.—Modification of construction permit (B3-P-2944 as modified), which authorized installation of directional antenna for night use and increase in power for extension of completion date from 12-15-42 to 2-15-43.

FM APPLICATIONS

NEW—Everett L. Dillard, trading as K49KC, Commercial Radio Equipment Co., Kansas City, Mo.—License to cover construction permit (B4-PH-14 as modified), which authorized construction of new high frequency broadcast station, in part, in accordance with Commission action of 8-4-42.

MISCELLANEOUS APPLICATIONS

W6XDU—Don Lee Broadcasting System, Los Angeles, Calif.—Modification of construction permit (B5-PVB-83 as modified), which authorized addition of aural equipment using special emission for extension of completion date from 12-1-42 to 4-1-43.

NEW—The Crosley Corporation, Mason, Ohio.—Construction permit for a new international broadcast station to be operated on **6080, 9590, 11710, 15250, 17800** and **21650 kc.**, with power of 200 KW, A3 emission.

KBTB—Red River Broadcasting Co., Inc., Duluth, Minn.—License to cover construction permit (B4-PRY-289), which authorized move of transmitter of relay broadcast station.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINT

The Federal Trade Commission has alleged unfair competition against the following firm. The respondent will be given an opportunity to show cause why a cease and desist order should not be issued against it.

United Delivery System, 639 New York Ave., N. W., Washington, D. C., and Esther Kressin, selling and distributing post cards, envelopes, and forms intended to be used by creditors and collection agencies in obtaining information concerning debtors, are charged in a complaint with unfair and deceptive acts and practices. (4873)

CEASE AND DESIST ORDERS

No cease and desist orders were issued last week by the Commission.

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Flurene Chemicals, Ltd., Washington, D. C., entered into a stipulation to cease and desist from misrepresenting medicinal preparations designated "Flurene Nose and Throat Drops" and "Flurene Salve." (03075)

G. A. Labrador, Honolulu, T. H., stipulated that he will cease and desist from representing that the preparation he sells under the name "Curadalis" will relieve or cure all types of skin diseases and relieve tropical skin diseases which occur among sugar cane and pineapple workers, or that it has any therapeutic value in excess of relieving minor skin irritations. (03076)

Lion Uniform Co., Dayton, Ohio, stipulated to discontinue misrepresenting the fiber content of fabrics from which his Lion-Bilt uniforms are manufactured. (03077)

COMPLAINT DISMISSED BY FTC

The Federal Trade Commission has dismissed a complaint which charged a group of companies and individuals with engaging in a combination tending to restrain competition in the compressing and storing of cotton and in the interstate sale of jute or burlap bagging and steel bands used in compressing cotton.

The complaint named the following respondents:

Federal Compress & Warehouse Co., Memphis, Tenn., and its officers, R. L. Taylor, Binford Hester, E. F. Wade, and Winston E. Cheairs; Valley Credit Co., Blytheville, Ark.; Mississippi Valley Gin Co., Jackson, Miss.; Tensas Parish Gin Co., Newellton, La.; Madison Parish Gin Co., Inc., Tallulah, La.; Southern Credit Corp., Greenville, Miss.; Rainwater Credit Corp., and C. N. Rainwater, trading as C. N. Rainwater & Co., Little Rock, Ark.; J. E. Andre, Little Rock, Ark., and W. Dennis Brown and Fred Schneider, Lake Providence, La.

Bond Expense Deductible

Under date of December 9, the Commissioner of Internal Revenue has ruled that, by broadcasting information as to the necessity for the buying of War Bonds, radio stations are carrying on one of the functions for which they were organized and that the expenses incurred in connection therewith are deductible as ordinary and necessary business expenses under Section 23(a) of the Internal Revenue Code.

The Treasury, according to unconfirmed rumors, has under consideration the question of allowing the money value of radio time donated to the Government for announcements and programs in support of the war effort as a gift or contribution under the amendment to Section 23 made in the Revenue Act of 1942. Contributions or gifts to the United States for exclusively public purposes are deductible to an amount which does not exceed 5% of the taxpayer's net income. The question on which the Treasury may rule is, does a gift of radio time constitute a "contribution or gift" within the meaning of that section.

We print below the letter from the Commissioner of Internal Revenue:

TREASURY DEPARTMENT

Washington

December 9, 1942.

Office of
Commissioner of Internal Revenue

IT:P:T:2
CP

Mr. Russell P. Place, Counsel,
National Association of Broadcasters,
Normandy Building,
1626 K Street, N. W.
Washington, D. C.

Sir:

Further reference is made to your letter of July 21, 1942, regarding the deductibility for Federal income tax purposes of expenses incurred by radio stations in promoting the sale of War Bonds. You enclosed two copies of the "National Association of Broadcasters—War Service Bulletin," which you state indicates, in a general way, the kind of expenses that will be incurred by radio stations in promoting the sale of War Bonds. Plans of handling the matter by radio stations are set forth therein as follows:

"Plan 1. A station becomes an issuing agent and gets a supply of bonds. Its own employees handle the over-the-counter as well as mail order sales. An all-out promotion job is launched; listeners are urged to come in and buy or send in their checks. The station is in the bond selling business.

"Plan 2. A station does not become an issuing agent but establishes a basis of all-out cooperation with some established issuing agency or agencies. Listeners are urged to go and buy or send in their mail orders direct to these agencies.

"Plan 3. A station becomes an issuing agent and gets its bond supply.

"Some volunteer organization, like Navy Relief, etc., takes on the job of handling the over-the-counter as well as the mail order sales. Again an all-out promotion campaign is launched to get buyers to come in or write in and buy.

"Plan 4. A station steps-up its present war bond sales and agrees to receive mail orders and see that they are transmitted to an issuing agent."

You also enclosed a newspaper clipping from the "Advertising Age" of June 25, 1942, concerning the deductibility for Federal income tax purposes, of expenses incurred by newspapers in promoting the sale of War Bonds, under section 23(a) of the Internal Revenue Code.

The test of whether expenditures are deductible from gross income is whether they are ordinary and necessary expenditures directly connected with or pertaining to the taxpayer's trade or business. As indicated by the newspaper clipping submitted, the Bureau has ruled that expenses incurred by newspapers in directing public attention to the vital necessity of the successful marketing of war bonds are deductible as ordinary and necessary business expenses. Such ruling is based upon the recognition that it is the business of newspapers, among other things, to disseminate news and bring to the attention of readers matters of public interest. Newspapers in thus promoting the sale of war bonds are considered to be engaged in carrying on one of the functions for which they are organized and the expenses incurred are identified as being directly connected with the business of operating a newspaper.

It appears that the business of a radio station includes, among other things, broadcasting of news, advertising of products and dissemination of other matters of interest to the public. By broadcasting information as to the necessity of buying war bonds, radio stations are carrying on one of the functions for which they are organized and the expenses incurred in connection therewith are deductible as ordinary and necessary business expenses on the basis of the reasoning applied in the case of newspapers.

As appears from the plans above set forth, it is contemplated that in addition to broadcasting information as to the necessity of buying war bonds, radio stations may either receive mail orders for bonds and see that they are transmitted to an issuing agent or sell bonds as issuing agents, either by mail or over-the-counter, using their own employees for these purposes. Expenses incurred by radio stations in carrying on such activities may properly be considered as expenses for institutional or good will advertising, which are also deductible from gross income under section 23(a) of the Internal Revenue Code if reasonable in amount. In this connection attention is

BOND EXPENSE DEDUCTIBLE

(Continued from page 697)

called to I.T. 3564, I.R.B., 1942-28,2, which reads as follows:

> "Advice is requested as to the deductibility for Federal income tax purposes of amounts expended by business concerns for advertising which promotes the sale of United States war bonds and stamps.
>
> "The test of whether expenditures for advertising are deductible is whether they are ordinary and necessary and bear a reasonable relation to the business activities in which the enterprise is engaged. This is not intended to exclude institutional advertising in reasonable amounts or good will advertising calculated to influence the buying habits of the public. If such expenditures are extravagant and out of proportion to the size of the company or to the amount of its advertising budget in the past, or if they are not directed to public patronage which might reasonably be expected in the future, such payments will be disallowed as deductions.
>
> "The above general tests are equally applicable in determining the deductibility of amounts expended for institutional or good will advertising which promotes the sale of war bonds and stamps."

Respectfully,

(S) Guy T. Helvering,
Commissioner.

War Manpower Commission

One agency is now charged with effective mobilization and utilization of the Nation's manpower to meet both military and home front needs. This vital war function is placed in the hands of the War Manpower Commission and its Chairman, Paul V. McNutt.

Home Front Needs—As may be required by prosecution of the war, the Commission Chairman is given authority to take "all lawful and appropriate" steps to assure that:

(a) all hiring, solicitation, and recruitment of workers in any plant, occupation or area be channeled through the U. S. Employment Service;

(b) no employer retain any worker whose services are more urgently needed in another plant, occupation, or area.

Express authority is given in this respect only over employers; but powerful levers for putting workers in essential jobs exist—authority to make USES the sole hiring agency, and control over selective service.

Military Needs—Selective Service System is transferred to the Manpower Commission. Local and appeal boards are made subject to the WMC Chairman's supervision and direction. General Hershey remains as Chief of the Bureau of Selective Service.

Voluntary enlistment of male persons between the ages of 18 and 38 in the enlisted personnel of the armed forces is forbidden.

Military training programs in educational institutions are to conform to policies and regulations of the Commission Chairman.

Induction of draft registrants 38 years and older is suspended. Provision is made for conditional release from the Army of enlisted men in the same age group.

Paul V. McNutt, chairman of the War Manpower Commission, made the following statement at a press conference Monday:

"I believe that the centralization of manpower control accomplished by the President's Order is a prerequisite to an adequate attack upon the tremendous task of allocating men to the Armed Forces and to War Industry.

"Although gratified with the grant of additional authority, I am at the same time thoroughly aware of the heavy responsibility which accompanies it and I am approaching it with an attitude of humility.

"The transfer of the Selective Service System and the restrictions on voluntary enlistments will make possible a unified plan for the orderly withdrawal of men from civilian life with the least possible disturbance of essential war production. Until further integration plans are perfected, I shall expect the Selective Service Director to administer the program as heretofore. Administrative changes must necessarily be made gradually and in a way which will not interrupt the effective discharge of duties by the Director and his operating staff.

"The authorization for the regulation of hiring is clearly a necessary control in areas of critical labor shortages. Although I am determined to exercise this authority, where necessary, to prevent labor hoarding and allocate essential workers to war plants, action will be taken only in those areas and with respect to those occupations where it is essential to meeting labor requirements. Until further clarification, it should be understood that presently approved methods of recruiting and hiring may continue.

"The provision for a uniform policy for the utilization of educational institutions will enable the Commission and the Armed Services to complete plans which will eliminate the confusion and misunderstanding on the part of these institutions as to the Government's desires in this respect.

"The provisions for the legal status of the Management-Labor Policy Committee is recognition of the work of that group and will, I believe, enable it to perform its functions in a still more effective way.

"In order to discharge the added responsibilities imposed upon the Commission, certain immediate administrative and organizational changes are necessary. A number of these have already been made.

"Now that the transfer of the United States Employment Service from the Social Security Board to the War Manpower Commission has been effected, Arthur J. Altmeyer, the Chairman of the Social Security Board, who has been serving as Executive Director of the War Manpower Commission, and John J. Corson, the Director of the Bureau of Employment Security of the Social Security Board, who has been serving as Chief of the Division of Industrial and Agricultural Employment of the War Manpower Commission, have indicated their desire to devote their full time and energy to their work in the field of social security. They point out that with the transfer of the United States Employment service the need no longer exists for their serving as both War Manpower Commission and Social Security Board officials, in order to integrate the activities of these two agencies. They also stress the importance of giving attention to strengthening our social security system as a war-time necessity as well as a post-war protection. I am in full accord as to the importance of social security and must, therefore, reluctantly concur in their decision.

"I am asking Mr. Altmeyer to serve as the representative of the Federal Security Agency in the War Manpower Commission. Within a short time, a successor to Mr. Altmeyer will be appointed. In the meantime, I have designated Mr. Arthur Flemming, a member of the War Manpower Commission, to undertake the duties of the office as Acting Executive Director. Mr. Flemming has worked closely with the staff of the Commission and with the Management-Labor Policy Committee and is thoroughly familiar with the manpower program. I am confident that he will press forward with that program, in an agressive and vigorous manner, until a permanent appointment is made.

"Within a few days a full announcement of the reorganization of the Washington and field staffs of the Commission will be announced."

DRAFT RELIEF

The change in Selective Service regulations announced last weekend which suspended induction of men thirty-eight years old and over will materially aid the broadcast industry. The proportion of men in the 38-45 age group in broadcast stations is undoubtedly smaller than is found in older industries, but the relief to broadcasters will be real none-the-less.

A special analysis of the NAB Manpower Survey Question Eight, relating to "essential men," indicates the extent of the relief. In the question, the stations were asked to furnish a list of their "key" personnel, within ages 20-45, for whom they have or would file Form 42A seeking deferment as "necessary men." Six hundred stations listed some 2,488 persons as "necessary" to the operation of their stations.

Dropping the age limit to 38 removes 510 essential men, 20.5% of those so classified, from the current Selective Service lists.

The Selective Service classifications of men listed as "essential" in question eight were analyzed to reflect the change. The table below compares the percent of the 2,488 men listed in each classification:

	Old	*New*
Class 1A or 1B	7.3%	6.7%
Class 2A or 2B	4.7%	4.1%
Class 3A or 3B (With dependent children)	54.5%	41.2%
Class 3A or 3B (Without dependent children)	25.6%	22.2%
Class 4	5.0%	4.7%
Not Classified	2.9%	.6%
Men 38-45		20.5%
Total	100.0%	100.0%

Class 1 men and Class 3 men without dependent children, we may assume, are subject to early call. Of essential men, 32.9% were so classified. The age change drops the percentage to 28.9%. In numbers, of the 2,488 "essential men," 819 were in Class 1 or Class 3 without dependent children, but now after dropping out those over 38 years old, there are but 721.

For further information on the NAB Manpower Survey, see NAB REPORTS, November 27, 1942, Page 671 and, November 20, 1942, Page 653.

The state tabulations were sent to NAB District Directors for transmittal to State Directors of the Selective Service System Saturday, December 5, 1942. All stations cooperating with submissions of the information were sent a copy of the tabulation for the state in which the station is located.

NAB TO MOVE

On December 21, the NAB will move to its new headquarters at 1760 N Street, N.W.

The phone number will be unchanged—NAtional 2080.

The building which has housed the NAB for the last four years has been taken over by the RFC.

The new offices are just a few doors east of Connecticut Avenue, two blocks north of the Mayflower Hotel.

District Meetings

DISTRICT 1

Paul W. Morency of WTIC was reelected director of the First District of NAB at the close of sessions on the first day of the two-day meeting in Boston, Mass. Mr. Morency will continue in office for two more years, beginning with the end of the 1943 NAB convention.

The meeting was called to order at 10 a. m. on Wednesday, December 9, by Director Morency with 92 broadcasters, government and industry representatives in attendance. It was the largest registration in the history of meetings of the First District.

Following a review of the purpose of the meeting by Director Morency, C. E. Arney, Jr., assistant to the President, outlined the war work of NAB in the absence of President Neville Miller, who was called back to Washington following the meeting of the Second District in New York City.

During the course of the first day, the following representatives of government agencies and departments outlined the problems of the war that affect broadcasting: Carl Haverlin, Headquarters Consultant, Radio Branch, Office of War Information; Eugene Carr, Office of Censorship; Capt. Jack Harris, Radio Branch, Public Relations Bureau, Army; Lt. Commander L. R. Collier, Chief, Radio Section, Navy Public Relations Office; Capt. Wm. H. Price, District Public Relations Office, Marine Corps; James Donovan, Regional Director, Office of Civilian Defense; and George E. Shrigley, Assistant Regional Representative, USES, who spoke also for the War Manpower Commission.

At the luncheon meeting on the opening day, Neal O'Hara, widely read Boston columnist, humorist and raconteur, entertained the delegates with hilarious off-the-record observations on the life of a professional humorist.

Immediately following luncheon on the first day, Walter C. Johnson of WTIC and Lewis H. Avery of NAB outlined the retail promotion committee plan, which was enthusiastically received.

On the second day, a morning meeting for the managers was conducted simultaneously with a meeting of the sales managers, over which Kingsley F. Horton of WEEI, district chairman, presided. The managers listened to a discussion of the AFM-Petrillo problems by President Miller, who hurried from Washington to Boston to participate in the second day of the conference. At the conclusion of the morning session, the broadcasters unanimously endorsed by formal resolution the OWI allocation plan, the retail promotion committee plan and the NAB Board of Directors stand on the AFM-Petrillo situation.

At the meeting of the sales managers, Miss Linnea Nelson, time buyer for the J. Walter Thompson Company, New York office, outlined what buyers want to know. She shared the morning meeting with Dr. Robert Elder of Lever Brothers Company, who is famed for his statistical studies of broadcasting.

Luncheon on the second day featured a talk by the well-known news analyst, Irving T. McDonald, who reported on "A World At War."

The afternoon session on the second day was devoted to a further exposition of the retail promotion committee plan and to a discussion of other sales problems. This meeting was also presided over by Mr. Horton.

Those in attendance included:

Adler, Ben, RCA Mfg. Co.; Arney, C. E., Jr., NAB; Avery, Lewis, H., NAB; Armstrong, O. N., Jr., WCOP;

Atwood, Jack, WDRC; Allen, T. F., WFCI; Barrere, Claude, NBC Radio Recording; Beiber, F. E., WTHT; Berkett, Samuel, ASCAP; Bettinson, Winslow, WHEB; Blink, Milt, Standard Radio; Bloomberg, Haskell, WLLH; Bowes, F. R., WBZ; Boyle, John J., WJAR; Brackett, Q. A., WSPR; Brown, Walter, Maj., Army; Brayshaw, A. R., Press Association; Bush, W. T., WPRO; Carpenter, David, WKNE; Chandler, Vincent H., WMUR, of Censorship; Clement, Earle, WLNH; Delaney, C. G., WTHT; Decastillo, L. G., WEEI; Donahue, Robt. F. WLLH; England, Monroe B., WBRK; Feldman, Robert, WMAS; Fellows, Harold E., WEEI; Flynn, Lawrence, WMEX; Georges, Bert, WHEB; Goodwin, Harry D., WBZ; Goulden, Stanley W., RCA; Greenwood, Warren, WHAI; Guernsey, Thompson L., WLBZ; Gunther, Martin, WHEB; Hacket, Walter, Office of War Information, Boston; Harris, Jack, Capt., Army; Haverlin, Carl, OWI-BMI; Hickox, Sheldon B., Jr., NBC; Hill, E. E., WTAG; Horton, K. F., WEEI; Horter, Don, WBZ; Hurwitz, H. Y., Staff Sergeant, Marine Corps; Jackson, W. E., Westinghouse; Johnson, Walter C., WTIC; Keller, Robert S., AMP; Kelly, George F., Jr., WCSH; Kelley, Robert; Kettell, Elmer, NBC; Koster, H. W., WPRO; Krueger, H. L., WTAG; Langlois, Cy, Lang-Worth; Lasker, George, WORL; Latham, W. H., WSPR; Malo, William, WDRC; Manning, Jack, Army; Matheson, John J., WHDH; Mayo, John, AMP; Meyer, Harold H., WSR; Meyers, Milton H., WEIM; Milner, R. Howard, WBZ; Montague, P. J., WHYN; Morency, Paul W., WTIC; Morrell, Harold B., WLAW; McCray, Thomas C., WTIC; Miss McDonald, Betty, Army; Nichols, H. W., WHAI, Miss Parmer, E., WTAG; Pote, William S., WMEX; Price, Wm. H., Capt., Marine Corps; Rines, William H., WCSH; Robison, Oshley L., WORL; Rogers, Irving E., WLAW; Rosenberg, Manuel, "The Advertiser"; Sanford, Robert, WORL; Schudt, Bill, CBS; Selvin, Ben, AMP; Sherwood, Alex, Standard Radio; Shrigley, George E., War Manpower Commission, Boston; Shurtleff, David F., WFEA; Slade, George W., WBZ; Smith, Leslie F., WMUR; Spates, James, WHAI; Stanton, Mildred P., WORC; Sutherland, George, WFCI; Swan, W. Gordon, WBZ; Teskey, Warren, WEIM; Thomas, Harold, WATR; Thomas, Levon, WNAB; Thornley, Howard W., WFCI; Ward, Stanley A., Capt., Marine Corps; Weis, Pierre, Lang-Worth; Wyant, Dal, WHEB; Young, C. S., WBZ.

DISTRICT 2

The best attended meeting ever held of the Second District of NAB was called to order at 10:00 a. m. on Monday, December 7, 1942, at the Biltmore Hotel in New York City by District Director Kolin Hager of WGY. More than 125 broadcasters, government and industry representatives registered during the two-day conference.

Following the introductory remarks of Director Hager, President Neville Miller outlined the war work of NAB, with special emphasis on the problems faced by the broadcasters in the furtherance of the war effort and the war.

During the two-day meeting, talks were delivered by the following representatives of government agencies and departments directly concerned with the war: William B. Lewis, Chief, and Carl Haverlin, Headquarters Consultant, Radio Branch, Office of War Information; Lt. Col. Edward M. Kirby, Chief, Radio Branch, Public Relations Bureau, Army; Lt. Commdr. Morgan S. A. Reichner, Public Relations Office, Navy; J. K. Barnes, Office of Civilian Defense; Eugene Carr, Office of Censorship; G. Lynn Sumner, New York State War Savings Staff; Miss Adrienne Ames, The Woman's Viewpoint on War Bond Sales; and Col. Harry Wilder of WSYR, Broadcasters Train Technicians for War.

At luncheon on the opening day, John Benson, President of the American Association of Advertising Agencies, spoke on the "Solidarity of the Advertising Industry." His plea for greater cooperative effort on the part of all advertising media was thought-stimulating to the broadcasters in attendance. He was followed by Col. Lemuel Q. Stoopnagle, who disposed of his subject in the first two sentences and then proceeded to a discussion of Jokes vs. Whimsy with ample illustrations of both.

The noted news analyst, H. V. Kaltenborn, described his talk at luncheon on the second day as "Looking at the War." In the course of his tensely listened-to analysis, Mr. Kaltenborn described the development of the war since Pearl Harbor and briefly appraised the position of the United States today. In a keenly analytical discourse, following Mr. Kaltenborn, Paul West, President of the Association of National Advertisers, talked about "Facing Realities." He outlined the problems which advertisers and advertising agencies face today and recounted the work of the Advertising Council, pointing out that 64 government campaigns are now in progress.

Most of the second morning was devoted to a discussion of the AFM-Petrillo problem, led by Sidney Kaye, Counsel, and Mr. Miller. At the conclusion of that study, Charles F. Phillips of WFBL, District Chairman of the Sales Managers, and Lewis H. Avery of NAB, presented the Retail Promotion Committee Plan.

The afternoon session on the second day was devoted to a further study of the Retail Promotion Plan and to other sales problems.

At the morning meeting on the second day, the broadcasters unanimously passed resolutions endorsing the OWI Allocation Plan, the Retail Promotion Plan, the stand of the NAB Board of Directors on the AFM-Petrillo situation, and petitioning the FCC to relax regulations dealing with restricted operators.

The unusually large attendance list included:

Adams, John T., WINS; Akerberg, Herb, CBS; Allen, George, WABC; Ambrose, Warren F., Blue Network; Arney, C. E., Jr., NAB; Avery, Lewis H., NAB.

Bagley, Carol, WNEW; Barrere, Claude, NBC; Barry, Charles, WJZ, Beckwith, Arthur, AMP; Bendiner, Lawrence, 2nd Region, OCD; Bess, Herman, WNEW; Blink, Milton, Standard Radio.

Callahan, Leonard D., SESAC; Carman, H., WGBB; Carr, Eugene, Office of Censorship; Carter, Woodberry, WTRY; Chilton, Ruth, SSYR; Codel, Edward, Atlantic Coast Network; Codel, Martin, Broadcasting Magazine; Collins, J. M., ASCAP; Cook, Nathan W., WIBX.

Danzig, Jerry A., Public Relations Off., USNR; Doerr, William, Jr., WEBR; Driscoll, Richard, WBTA; Duncan, Walter, WNEW.

Egner, C. Lloyd, NBC; Erdman, F. C., ASCAP; Estes, B., WINS.

Fay, William, WHAM; Finney, C. M., Associated Music Publ.

Gantter, Raymond C., WFBL; Glick, Clifford H., WNEW; Gregory, S. D., WEAF; Gude, J. G., CBS.

Hager, Kolin, WGY; Hardke, Ruth, WSYR; Haverlin, Carl, B.M.I.; Hawkins, L. B., WNBF; Hayes, Arthur Hull, WABC; Hickox, S. B., Jr., NBC.

Jaspert, George H., WPAT; Judas, Bernice, WNEW.

Keller, Robert S., AMP; Kemble, Dorothy A., Blue Network; Kirby, Lt. Col. Edward M., PRO, War Dept.

Lambert, Bert, WNEW; Lang, Joseph, WHOM; Lee, Jack, WHAM; Levin, Harry C., O.W.I.; Lewis, Charles, 2nd Region, OCD; Long, Maury, Broadcasting Magazine; Lounsberry, I. R., WGR; Lyford, E. B., NBC.

MacDonald, Alex, WGY; Marshall, T. S., WOLF; Mason, Jay, WJTN; Mayo, John, AMP; McCloskey, E. Ray, WNBF; McNeil, John, WJZ; Middleton, B. M., WABC; Miller, Henry L., WPAT; Miller, Neville, NAB; Miller, William Burke, NBC; Moss, Kermit J., WNEW; Murphy, John T., NBC.

Novik, M. S., WNYC.

Olin, Bruff W., Jr., WKIP; Overall, John R. (Lt.), Radio Section, 3rd Naval Dist.

Paley, William, CBS; Parreca, Connie, WOV; Pettey, Herbert L., O.W.I.; Phillips, Charles F., WFBL.

Ream, J. H., CBS; Reichner. M. S. A., Lieut. Commdr., NSNR; Riple, William, WTRY; Ripley, Fred R., WSYR; Robertson, Bruce, Broadcasting Magazine; Rosenhaus, I. R., WAAT; Rowan, B. J., G. E. Co.

Schmitt, Frank M., RCA; Schudt, Bill, Jr., CBS; Seitz, Frank A., WFAS; Selvin, Ben, Associated Music Publ.; Shapiro, M. H., Radio Daily; Stewart, Elliott, WIBX; Stoopnagle, Col.

Taylor, Dale; Tompson, C. Robert, WBEN; Treacy, Jack, NBC; Trenchard, Roland, WAAT; Tompkins, M. E., B.M.I.; Turner, Oscar C., NBC; Twamley, Edgar H.

Vance, H. C., RCA-M.

Walker, Ernest; Weil, Ralph N., WOV; Weis, Pierre, Lang Worth; While, Frank K., CBS; White, Norman H., Jr., Public Relations, USMC; Wilcox, WHOM; Wilkins, D. C., WJTN; Wiig, G. O., WHEC; Wiess, Sylvia, Radio Dailey.

Adler, Ben, R.C.A.; Barnum, Jerome B., Syracuse, N. Y.; Boice, H. K., WQXR; Dale, Albert E., N.B.C.; Goulden, Stanley W., R.C.A.; Greenberg, Herman, ASCAP; Hedges, William S., N.B.C.; Lane, William T., WAGE; McKay, John, N.B.C.; Mermey, Maurice, NAB-Public Relations; Paine, John J., ASCAP; Parsons, Willis, N.B.C.; Sherwood, Alex, Standard Radio; Stanton, Frank, C.B.S.; Wood, Helen, WIBX.

Alcorn, W. C., WNBX; Black, Elizabeth, Joseph Katz Co.; Brayshaw, A. R., Press Association; Buechner, Robert, Free & Peters; Dennie, Ralph, Blue Network; Doty, Chick, Blue Network; Dundes, Jules, WABC; Eastman, Bob, Blue Network; Elbrock, Rae B., Franklin Bruck Adv. Co.; Ensell, E. Schuyler, WABC; Feltis, Hugh, Blue Network; Franco, Carlos, Young & Rubicam; Frank, Paul, Wood & Co.; Grabhorn, Murray, Blue Network; Harrison, Jerome B., WABC; Hymes, John, Lord & Thomas; Karnes, Paul H., Press Association; Kelly, James M., Radio Advertising; Kent, Alan, WJZ; Long, Maury, Broadcasting Magazine; Lyden, John M., Ted Bates Co.; Lynch, Thomas H., William Esty & Co.; Mafiecci, Lucille, J. Walter Thompson Co.; Michelson, Charles, Michelson Radio Transcriptions; Moss, Albert, Jr., Radio Advertising; Shurack, Ed, WHN; Stone, Peggy, Spot Sales; Swars, Larry, Walter P. Burns Co.; Swift, G. Richard, WABC; Thomas, Helen, Spot Broadcasting; Tolcher, Arthur, WHN; Trenner, Harry, MBS; Wallace, Donald J., McCann-Erickson; Wright, Anne, J. Walter Thompson; Young, Chet, Press Association; Young, Stanley, The Foreman Co.

DISTRICT 7

Nathan Lord of WAVE was elected to a two-year term as Director of the Seventh District of NAB at the two-day meeting in Columbus, Ohio, on December 4 and 5, 1942. Mr. Lord's term begins with the end of the 1943 NAB Convention.

The two-day conference was called to order at 10 a. m. on Friday by J. Harold Ryan of WSPD, District Director, and attended by 91 broadcasters, government and industry representatives. At the conclusion of the sessions later Saturday afternoon, it was the concensus of those present that the two-day meeting was the best ever held in the Seventh District. As one prominent broadcaster put it: "There was more useful information available to those who attended, and there was more spirited discussion among the conferees, than I have ever seen before."

Two luncheons were held on the opening day. Fifty-one members and representatives of the Ohio Association of Broadcasters met at a luncheon presided over by President Ryan of the OAB. The balance of the broadcasters, government and industry representatives attended a general luncheon presided over by President Neville Miller of the NAB.

At both luncheon meetings, Governor John W. Bricker of Ohio spoke briefly, thanking the broadcasters for the fact that, under the free American system of broadcasting, full and fair discussion of the political issues of the times are available in every nook and corner of the country. He especially stressed the impartial handling of the recent political campaign in Ohio.

During the luncheon of the OAB, the following officers were elected for the ensuing year: President, Carl Everson of WHKC; Vice-President, Robert T. Mason of WMRN; Secretary-Treasurer, Laben Smith, WCOL.

Those in attendance were the guests of the Fort Industry Company at a luncheon on the second day. Following the luncheon, Lewis H. Avery of the NAB Department of Broadcast Advertising, spoke briefly on "Good Taste in Radio Advertising."

During the two-day conference, the following representatives of war agencies and departments spoke: Carl Haverlin, Headquarters Consultant, Radio Branch, Office of War Information; Eugene Carr, Office of Censorship; Lt. Holman Faust, Radio Officer, Navy, Great Lakes, Ill.; Ben H. Darrow, Director of Radio, Fifth Region, Office of Civilian Defense; and Major R. P. Forster, British Army Staff.

Following the sales meeting on the second morning, which was presided over by W. I. Orr of WBNS, District Chairman of the Sales Managers, Mr. Miller presented the AFM-Petrillo problem, with supporting talks by Milton Blink of Standard Radio, and Cy Langlois of Lang-Worth.

At the afternoon meeting on the second day, Mr. Miller outlined the manpower problem and explored the many difficulties which radio stations currently face under the Selective Service Act and other regulations and restrictions of government.

Resolutions, unanimously endorsing the OWI Allocation Plan, the action of the NAB Board of Directors in the AFM-Petrillo situation and the Retail Promotion Plan, were passed on the second day.

Those registered:

Avery, Lewis H., NAB; Barton, Howard, WTAM; Baylor, David M., WGAR; Beavers, Wallace, WCOL; Blink, Milton; Callaway, Harry, WHAS; Camp, Harry, WGAR; Carpenter, H. K., WHK-WCLE; Carr, Eugene; Cohen, I. T.; Cox, J. F., WAVE; Darrow, Bern H.; Davis, Warren G., WCMI; Devaney, Lt. J. P., U.S.N.R.; Dodge, Fred, WKRC; Elvin, Ralph, WLOK; Everson, Carl, WHKC; Fast, H. E., WKRC; Faust, Lt. Holman; Feldman, Samuel E.; Fields, O. E., WMAN; Flanigan, Ed, WSPD; Forster, Major R. P.; Fox, Katherine, WLW-WSAI; Garfield, Lt. J. B., U.S.N.R.; George Carl E., WGAR; Haid, Allen, WHIZ; Harkathorn, K. K., WHK-WCLE; Haverlin, Carl; Heibeck, Frank, WDOK; Higgy, R. C., WOSU; Hinkle, Felix, WHBC; Hoessly, H. H., WHKC; Hover, Fred, WFIN; Hunter, C. M., WHK-WCLE; Karnes, Paul H., AP-PA; Keller, Robert S., A.M.P.; Kennett, Robert L., WHAS; Kent, Carl H., Jr., WAKR; Kerns, J. Robert, WHIZ; Lane, C. Howard, C.B.S.; Langlois, "Cy", Lang-Worth; Laux, John, WSTV; LeGate, J. M., WHIO; Levinson, H. Y., WCAR; March, L. T., WMRN; Martin, Reggie, WIZE; Mason, Robert T., WMRN; McKelvey, G. C., WSTV; Metzger, Hal, WTAM; Miller, Neville, NAB; Morrison, Robert, WMRN; Moses, John B., WHKC; Nasman, Len, WFMJ; Orr, W. I., WBNS; Outler, John M., Jr., WSB; Palmer, Fred A., WCKY; Patt, John F., WGAR; Patterson, George, WAVE; Pettegrew, C. W., WOSU; Pixley, L. A., Fort Industry Stations; Pribble, V. H., WTOM; Patt, Ralph, WPAY; Price, Jack, WBNS; Richmond, R. W., WRRN; Ryan, J. Harold, WSPD; Sherwood, E. A.; Sherwood, Alex; Smith, L. T., WCOL; Smith, Neal A., WCOL; Spencer, Lester, WHIO; Squire, Burt; Storer, Geo. B.; Thompson, W. M.; Trace, Gene, WKBN; Treacy, Jack, N.B.C.; Tyler, A. E., WCMI; Uebel, Katharine; Williamson, W. P., Jr., WKBN; Weis, Pierre, Lang-Worth; Woolley, Easton C., N.B.C.; Wilson, Bob, WADC; Williams, Tod, WSPD; Woodyard, Ronald B., WING; Beebout, George L., WFMJ; Callahan, Walter A., WSAI; Cummings, Donald S., WBNS; Davis, Walter L., WRRN; Doty, Jack, WCOL; Jones, Frank N., WCOL; Martin, Paul, WCOL; Woody, R. H., WHIO.

DISTRICT 8

The following were registered at the District 8 meeting:

J. J. Flanigan, WIBC; Ben H. Darrow, Civilian Defense, Cleveland; Miss Helen Kennedy, Radio Director, Kroger Grocery & Baking Co., Cincinnati; Rex Schepp, WIRE; C. E. Schindler, WGRC; David Wilburn, WGRC; Lt. John T. Barnett, USNR, Public Relations, Indianapolis; Lt. Holman Faust, 9th Naval District Radio Officer, Indianapolis; Gene Faughn, WFBM; C. Bruce McConnell, WISH; R. E. Bausman, WISH; I. T. Cohen, ASCAP;

Samuel E. Feldman, ASCAP; Eldon Campbell, WOWO; Steve Conley, WOWO; H. G. Wall, WIBC; Miss Blanche Young, Director of Radio, Indianapolis Public Schools; Burt Squire, SESAC; Howard Loeb, WFDF; Paul H. Karnes, Press Association; John E. Fetzer, WKZO; Eugene Carr, Office of Censorship; "Cy" Langlois, Lang-Worth; Pierre Weis, Lang-Worth; Porter Smith, WGRC; Harmon L. Stevens, WHLS; H. M. Bitner, WFBM; William F. Kiley, WFBM; Robert S. Keller, AMP; Louis P. Hutchinson, OWI; Robert LaBlonde, OWI; C. Howard Lane, CBS; Grant F. Ashbacker, WKBZ; W. C. Wester, WKBZ; Owen F. Uridge, WJR; Leo Fitzpatrick, WJR; M. H. Latour, Air Raid Warning System, Chicago; Lt. Fred A. Chastain, Air Raid Precaution Officer, Chicago; 3rd Officer Ruth W. Morton, WAAC, Fort Des Moines; Milton Blink, Standard Radio; Charles Lee Harris, WGRC; Frank O. Sharp, WFBM; Vincent McMahon, Press Association; O. J. Kelchner, WIBC; Easton C. Wooley, NBC; Neville Miller, NAB; John W. O'Harrow, WKZO; Dan Jayne, WELL; Eugene C. Pulliam, WIRE; George M. Jackson, WBOW; Jack Tracy, NBC-Thesaurus; Lewis H. Avery, NAB; Carl Haverlin, BMI-OWI; Colonel Robinson Hitchcock, State Director, Selective Service, Indianapolis.

PAMPHLET REVISED

"The Wage and Hour Act: How It Affects a Broadcasting Station," popular publication of the NAB Labor Relations Department, has been thoroughly revised in a third edition and will soon be mailed to all members.

The revised edition includes a supplementary section on salary stabilization.

BONUSES

The WLB and the Treasury have differing regulations on bonuses.

The WLB regulations concern only those employees who make $5,000 a year or less, with the exception of unorganized executive, administrative and professional employees.

The Treasury regulations concern only those employees who make more than $5,000 a year *and* unorganized executive, administrative and professional employees.

The WLB says that any bonuses of the same size or smaller as previously established, or based on *any* formula previously established need no approval to be paid.

The Treasury says that any bonuses of the same size or smaller as previously established, or *based on a percentage of the employee's salary previously established* need no approval to be paid.

VICTORY TAX

A question has been raised under the new Victory Tax as to whether the 5 percent tax should be withheld from amounts paid occasional talent in cases where the employer station has no means of knowing whether their total earnings for the year will amount to the specific exemption of $624.

The NAB understands that the Bureau of Internal Revenue will seek to apply the same rules as to the employer-employee relationship in such cases as are applied in the case of Social Security payments. Such talent are treated as employees for Social Security purposes. In the opinion of NAB tax counsel, their compensation does not fall under the heading of professional fees and therefore their compensation is subject to withholding.

While there is a specific exemption of $624 for Victory Tax purposes, the obligation to withhold is not based on ability to predict whether a total compensation in excess of $624 will be paid the employee in the taxable year. An individual might work for several employers during a year, for example, and receive less than $624 from each. Nevertheless, withholding is necessary if compensation for the pay period is at a rate in excess of $624 per year. If the employee is paid on a weekly basis, the statute requires withholding on his compensation for the week in excess of $12 (Section 466(b)(1) of the Internal Revenue Code). In the case of biweekly pay, the exempt amount is $24; semi-monthly, $26; monthly, $52; quarterly, $156; semi-annually, $312; annually, $624.

ENLISTMENT STATUS NOT CLEAR

As of December 10, the exact status of enlistments in the military forces is not sufficiently clear in detail for the issuance of a statement.

This week's mailing of recruiting announcements is being limited to a single folio which is devoted to the enlistment of WAACS.

MORE RADIO CLASSES IN CONN.

Franklin M. Doolittle, president, WDRC, Hartford, and industry representative, ESMWT-NAB Radio Technician Training program in Connecticut, has arranged for new courses in several cities.

NEW HAVEN AND WATERBURY. Classes were started during October, with completion set for early spring, 1943.

BRIDGEPORT AND STAMFORD. Fall classes started about November. Completion in spring.

HARTFORD. Present students in Radio I and II complete their work next week. New courses begin shortly after January 1, 1943. Estimated number of students for the first quarter classes of the new year are: Sixty (60) in Fundamentals of Radio I and thirty (30) in Radio II.

Dean J. H. Lampe, of the University of Connecticut, course coordinator, works closely with Mr. Doolittle.

These courses are financed with federal funds. They have proven their worth; and many graduates are employed at broadcast stations.

Similar courses may be established in every state. The initial step is to point out industry needs for these men to the ESMWT Institutional Representative of an engineering school or to the Dean of Engineering at such school. Proposals are then sent to the U. S. Office of Education, Washington, for approval.

RADIO AT STATE TEACHERS COLLEGE

Professor J. W. White, Director of the Department of Physics, State Teachers College, Platteville, Wisconsin, is teaching ESMWT-NAB "Fundamentals of Radio."

Recently NAB sent Professor White additional copies of the course outline.

CAPT. McCAHILL AT SAN DIEGO

Captain William P. McCahill, USMC, has been confirmed in his assignment as Public Relations Officer, San Diego, Cal.

Captain McCahill was formerly stationed in Washington, at Marine Corps headquarters, serving under Brigadier General Robert L. Denig. For a good many months Captain "Bill' was contact with NAB headquarters.

AMATEURS HELP BROADCASTERS

Cooperating with NAB, American Radio Relay League has appealed to its members, through its magazine, "QST," to submit lists of transmitter tubes for sale to broadcast stations.

The Swap Bulletin, dated Dec. 11, 1942, includes the first offering of such tubes from amateurs. Additional tubes will be listed as they come in. Other pages of items in the Swap Bulletin list the "Will Buys" and "Will Sells" from stations.

STATIONS AID IN SERVICE PROBLEM

Stations listed below are among those which have reported cooperation in the campaign to educate the public to bring their radio sets to servicemen for repairs. This permits servicemen to spend all of their time working; saves time they used to spend going after sets.

When the tubes and parts inventory in the hands of radio repairmen increases, we can get more aggressive. Tactics to follow through this period are those of conservation. We can attack when the parts and tubes ammunition is sufficient for needs. And this problem, as reported previously, has the attention of WPB.

Stations are urged to rotate repairmen spots on the basis of one a day. No more are required now.

KWIL, Albany, Ore.; WITH, Baltimore; KBKR, Baker; KWON, Bartlesville; KIDO, Boise; WHDF, Calumet-Houghton; KSUB, Cedar City; WSOC, Charlotte; WCHV, Charlottesville; WCPO, Cincinnati; WTAW, College Station, Texas; WCOS, Columbia; WRBL, Columbus, Ga.; WCOL, Columbus, Ohio; WHKC, Columbus, Ohio; WTBO, Cumberland; WBLJ, Dalton; WDAD, Danville, Ill.; KWLC, Decorah; WPOE, Denver; WDTH, Dubuque; WTMV, East St. Louis, Ill.; WTSM, El Paso; KORE, Eugene; KFPW, Fort Smith; KFRE, Fresno; KMJ, Fresno; KLUF, Galveston; KIUL, Garden City; KFXJ, Grand Junction; WHLN, Harlan; WJOC, Johnstown; KCKN, Kansas City, Kans.; KDCA, Kilgore; WKMO, Kokomo; WKBH, LaCrosse; KARK, Little Rock; KFOX, Long Beach; WAVE, Louisville; WKAT, Miami Beach; WCOV, Montgomery; KBIX, Muskogee; WDSU, New Orleans; WEVD, New York City; KGNF, North Platte; KOCY, Oklahoma City; WWPG, Palm Beach-Lake Worth; WDLP, Panama City; KWKW, Pasadena;WMBD, Peoria; KSEI, Pocatello; KEX, Portland, Ore.; WHED, Portsmouth; KOBH, Rapid City; WEEU, Reading; WRNL, Richmond, Va.; KONO, San Antonio; KFXM, San Bernardino; KGO, San Francisco; KSRO, Santa Rosa; KWYO, Sheridan; KWKH, Shreveport; KTBS, Shreveport; KFPY, Spokane; WIZE, Springfield, Ohio; KTUL, Tulsa; KVAN, Vancouver; WHLB, Virginia; WBRY, Waterbury; KXEL, Waterloo; WWNY, Watertown; WAYX, Waycross; WWVA, Wheeling; WNAX, Yankton.

A THOUGHT FOR THE WEEK

WINNIPEG, Dec. 9 (U.P.)—Fascism in Canada "is here to stay" unless the Canadian Government's monopoly over radio is broken, Arthur Meighen, retiring leader of the Conservative party, told its convention here today.

Mr. Meighen's attack against the government-controlled Canadian Broadcasting Corporation was based upon the corporation's refusal to broadcast convention speeches. He said that C. B. C. uses its network to broadcast its own propaganda, and added, "parliamentary government in this Dominion is but a memory."

At the opening of the convention, Conservative House Leader R. B. Hanson assailed Prime Minister W. L. Mackenzie King.

FEDERAL COMMUNICATIONS COMMISSION

FLY DISCUSSES TAXES

It has been reported (but not confirmed) that the Bureau of Internal Revenue is drawing up an amendment to the tax law whereby radio stations may deduct as business expenses the time which they devote to war bond sales and various Government announcements. FCC Chairman James Lawrence Fly, at his press conference on Monday, was asked his opinion of this and he said he thought it would be a break for the stations.

"I don't want to be taken as advocating any position on the revenue measures. That's a matter for the Bureau and Treasury rather than for me," he said.

Chairman Fly reiterated what he had said at a previous press conference that he considered the small station problem a serious matter.

"I don't say whether we are going to keep these stations on the air, but as to how. I am thinking in particular of the smaller stations and particularly the stations in the small cities where they are dependent upon local radio business which is drying up to a great extent and where they fail to get the institutional advertising that is still predominant in network and large city broadcasting business.

"It just happens that many of those stations are the most essential stations because they are the only means that the Government has of reaching the people in those communities, to say at least, the most adequate means the Government has of reaching those people, and to a certain extent the only means, and in most of the cases, at least the only radio stations which can be relied upon to reach the people and in turn the people of those communities are mighty dependent upon those stations and I should think that some way ought to be worked out to enable those stations to stay on the air and perform that very essential service to the people and the Government. I have no assurance as to how it should be done, whether by loan or by the payment of programs and through tax measures if that be possible, I don't know."

Mr. Fly in answer to the question of payment for government programs said that might be one possibility. He said that loans to the stations are possible but "I am reluctant to see the Government get any sort of stake in private broadcasting. I should think if it could be handled on some other basis it would be better, but I do think serious attention must be given to that problem promptly."

The chairman said that in his opinion the tax measures would not be comprehensive enough to take care of the problem. Mr. Fly stressed particularly at the conference that he was thinking in terms of small towns and the most pressing problem comes in the smaller town pretty well isolated which has one radio station. "I would not limit this consideration to that class," he said, "but it is acute from the standpoint of public need and from the standpoint of Government need."

FCC RULES AND REGULATIONS

The FCC has taken the following action on its rules and regulations:

Adopted Order No. 77-B, suspending from January 1, 1943, until further order of the Commission, but in no event beyond January 1, 1944, Sections 12.26, 12.66 of the Rules Governing Amateur Radio Service and Section 13.28 of the Rules Governing Commercial Radio Operators, in so far as the required showing of service in connection with renewal of license is concerned. This Order continues in effect the provisions of Order No. 77-A, issued December 3, 1941 to expire not later than January 1, 1943.

Amended Section 61.33 of its Rules and Regulations governing Tariffs, so as to require the carriers to give information in the letter of transmittal with respect to the reasons for all changes in charges or regulations and, in the case of an increase in charges, the facts upon which the carrier relies in justification thereof.

Amended Part 10 of the Rules Governing Emergency Radio Services:

(a) *Section 10.41 State and municipal police stations (frequencies below 2500 kilocycles)*—The amendment does not change the frequencies available or the method of assignment to state and municipal police stations. Power authorizations for municipal police stations operating on frequencies below 2500 kilocycles will continue to be based on the official population figures of the Department of Commerce in Accordance with the present table in Section 10.121. The maximum power normally to be assigned to state police stations operating on these frequencies will be limited to 500 watts. Authorizations for both state and municipal police stations involving the use of power in excess of that specified would be granted only on the basis of a showing of need made by the applicant.

(b) *Section 10.42—State and municipal police stations (30000 to 40000 kilocycles)*—The amendment does not alter the present allocation of frequencies or the assignment of frequencies to the various classes of stations. The amended rule normally establishes a maximum power of 250 watts. Power in excess of the 250 watt limitation may be granted only on the basis of a showing of need submitted by the applicant.

(c) *Section 10.122* permits municipal and state police stations to communicate with Government stations, stations in the War Emergency Radio Service, or with other stations which are authorized to communicate with municipal and state police stations.

(d) *Section 10.123 Coordinated service*—The amendment does not change the present licensing procedure but clarifies the agreements that must be submitted with the application for an instrument of authorization in those cases where it is proposed to render a coordinated communication service.

CODE COMMITTEE TO MEET

The NAB Code Compliance Committee will meet for a two-day session Monday and Tuesday at the Hotel Mayflower, Washington. Principal topic of discussion will be the refusal of CBS and NBC to sell time to The Cooperative League of the U. S. A. on the grounds that the league sought to buy time for the discussion of a controversial public issue. Representatives of the League and the two networks will be heard by the committee Monday afternoon.

FDR BIRTHDAY BALLS

Neville Miller has accepted the radio chairmanship for this winter's President's Birthday celebration. Basil O'Connor, president of the National Foundation for Infantile Paralysis, invited Mr. Miller to take this position which he has held during the last several winters.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, December 14. They are subject to change.

Monday, December 14

W55NY—William G. H. Finch, New York, N. Y.—Modification of C. P., **45500 kc.**, 8,500 sq. mi., unlimited.

Tuesday, December 15

KOBH—Black Hills Broadcasting Co. of Rapid City, Rapid City, S. Dak.—C. P., **610 kc.**, 5 KW, unlimited, DA-night and day.

Consolidated Hearing

WALB—Herald Publishing Co., Albany, Ga.—Renewal of license, **1590 kc.**, 1 KW, DA-night, unlimited.

WALB—Herald Publishing Co. (Assignor); Albany Herald Broadcasting Co. (Assignee); Albany, Ga.—Voluntary assignment of license station WALB, **1590 kc.**, 1 KW, DA-night, unlimited.

WALB—Herald Publishing Co., Albany, Ga.—C. P., **1550 kc.**, 1 KW, DA-night, unlimited.

Wednesday, December 16

Further Consolidated Hearing

NEW—R. O. Hardin and J. C. Buchanan, d/b as Nashville Broadcasting Co., Nashville, Tenn.—C. P., **1240 kc.**, 250 watts, unlimited; facilities WXIX when vacated.

NEW—Tennessee Radio Corporation, Nashville, Tenn.—C. P., **1240 kc.**, 250 watts, unlimited.

WORK—York Broadcasting Co., York, Penna.—Modification of C. P., **1350 kc.**, 1 KW, DA-night, unlimited.

WHKC—United Broadcasting Co., Columbus, Ohio.—C. P., **610 kc.**, 1 KW, DA-night, unlimited.

Thursday, December 17

KFAC—Los Angeles Broadcasting Co., Inc., Los Angeles, Calif.—C. P., **1330 kc.**, 5 KW, unlimited, DA-night.

Friday, December 18

WCSH—Congress Square Hotel Co., Portland, Maine.—C. P., **970 kc.**, 5 KW, unlimited, DA-night and day.

WRDO—WRDO, Incorporated, Augusta, Maine.—C. P., **1400 kc.**, 250 watts, unlimited.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATION GRANTED

W6XYZ—Television Productions, Inc., Los Angeles, Calif.—Granted modification of construction permit (B5-MPVB-87) to change type designation of the aural and visual transmitters, change aural emission, change power rating of the visual transmitter, change antenna system, and extend completion date of construction to March 15, 1943.

DESIGNATED FOR HEARING

W9XER—Midland Broadcasting Co., Kansas City, Mo.—Designated for hearing application for construction permit (B4-PEX-39) to install a new transmitter and increase power to 3 KW.

Worcester Telegram Publishing Co., Inc., Worcester, Mass.—Designated for hearing application for construction permit (B1-PH-29) for new station to operate on **46100 kc.**, with a service area of 10,000 square miles.

MISCELLANEOUS

WNYE—Board of Education, City of New York, Brooklyn, N. Y.—Granted license (B1-LED-8) to cover construction permit (B1-PED-18), which authorized changes in equipment, frequency **42100 kc.**, power 1000 watts, and special emission for FM with maximum frequency swing of **75 kc.**

W9XBB—Balaban & Katz Corp., Portable-Mobile, area of Chicago.—Granted license (B4-LVB-36) to cover construction permit (B4-PVB-78), which authorized new experimental television broadcast station; frequencies **384000-396000 kc.**, 10 watts, on an experimental basis only, conditionally.

WMIS—Natchez Broadcasting Co., Natchez, Miss.—Denied petition for review of action of the Motions Commissioner of November 18, denying the motion for continuance and severance in re their applications for renewal of licenses.

WBRY—American Republican, Inc., Waterbury, Conn.—Granted license to cover construction permit which authorized move of transmitter (B1-L-1727); granted authority to determine operating power by direct measurement of antenna power (B1-Z-1466).

WLW—The Crosley Corp., Cincinnati, Ohio.—Granted motion requesting postponement of hearing now scheduled for December 9 to January 8, 1943, in re application for modification of license.

Granted application of WJW, Inc. (WJW), Akron, Ohio, for modification of construction permit (B2-P-3263, as modified, for change in operation from 1240 to 850 kilocycles, increase power from 250 watts to 5 kilowatts, unlimited time, with directional antenna for day and night use), to change location of the transmitter from East side of Akron-Boston Mills Road, Northampton Township, to northwest of the intersection of Ohio State Highway No. 94 and Walling Road, Cuyahoga County, Ohio. The studios will also be moved as a result of the grant from Akron to Cleveland, and the type of the transmitter changed. The commencement and completion dates of the construction have been extended from August 15, 1942 and January 13, 1943, to 60 days after grant and 180 days thereafter, respectively, on the express conditions that (a) the towers associated with this station shall be marked in accordance with Section 303(q) of the Communications Act; (b) that no interference will be caused to Canadian Station CFRB, Toronto, Ontario, contrary to the provisions of North American Regional Broadcasting Agreement; (c) that the nuisance contour of CFRB shall be determined by measurements, and no construction shall take place until such measurements have been submitted and approved; and (d) subject to submission of proof of performance.

Denied the petition for rehearing filed February 9, 1942, by National Broadcasting Co., Inc., directed against the action of the Commission on January 20, 1942, granting without hearing the application B2-P-3263 of WJW to change frequency from 1240 to 850 kilocycles, increase power from 250 watts to 5 kilowatts and install directional antenna. However, the denial was without prejudice to the filing by National Broadcasting Co., Inc., of a new petition for rehearing directed against the grant to WJW as modified by the above action.

Approved a power of attorney for the affairs of licensee J. P. Beard to be handled by his wife, Veda Beard, during his service in the armed forces of the United States. J. P. Beard is the owner and licensee of Station KBTM, Jonesboro, Ark.

WIBA—Badger Broadcasting Co., Madison, Wis.—Granted petition to intervene in hearing on application of Capitol Broadcasting Corp. (WISH), Indianapolis, Ind., for construction permit to operate on **1310 kc.,** 5 KW, unlimited time, directional antenna at night (Docket 6444).

WMBD—Peoria Broadcasting Co., Peoria, Ill.—Passed for one week action on petition for leave to intervene in hearing on Delta Broadcasting Co., Inc. (WQBC), Vicksburg, Miss., for modification of license to operate on **1470 kc.,** 500 watts night, 1 KW day, unlimited (Docket 6166).

WALB—Herald Publishing Co., Albany, Ga., Albany Herald Broadcasting Co., Albany, Ga.—Denied petition to hold hearing in Albany, Ga., on applications of WALB for renewal of license and for construction permit to operate on **1550 kc.,** 1 KW, directional antenna night, unlimited time, and application of Herald Publishing Co., assignor, and Albany Herald Broadcasting Co., assignee, for voluntary assignment of license of Station WALB; said petition was denied without prejudice to the filing of a petition for the taking of depositions of additional witnesses who may be unable to attend the hearing in Washington (Dockets 6398, 6399, 6400).

WORK—York Broadcasting Co., York, Pa.—Granted petition to continue hearing now set for December 16 until January 22, 1943, in re application for modification of construction permit to operate on **1350 kc.,** 1 KW, directional antenna night, unlimited (Docket 6368)

W55NY—William G. H. Finch, New York, N. Y.—Granted motion for continuance of hearing from December 14, 1942, until January 28, 1943, in re application for modification of construction permit (Docket 6363).

KFAC—Los Angeles Broadcasting Co., Inc., Los Angeles, Calif.—Granted motion for postponement of hearing from December 17, 1942, until January 26, 1943, on application for construction permit to operate on **1330 kc.,** 5 KW, unlimited, directional antenna at night (Docket 6440).

Tennessee Radio Corp., Nashville, Tenn.—Granted petition for continuance of hearing now set for December 16, 1942, until February 15, 1943, in re applications of R. O. Hardin and J. C. Buchanan, d/b as Nashville Broadcasting Co., and Tennessee Radio Corp., for construction permits for new stations at Nashville, Tenn. (Dockets 6191 and 6193).

APPLICATIONS FILED AT FCC

570 Kilocycles

WKBN—WKBN Broadcasting Corp., Youngstown, Ohio.—Modification of construction permit (B2-P-2547 as modified, which authorized increase in power, installation of new transmitter and directional antenna for night use and change in hours of operation) for extension of completion date from 12-31-42 to 4-1-43.

600 Kilocycles

WCAO—The Monumental Radio Co., Baltimore, Md.—License to use formerly licensed RCA 1-D-B transmitter as an auxiliary with power of 500 watts night and 1 KW daytime.

WCAO—The Monumental Radio Co., Baltimore, Md.—Authority to determine operating power by direct measurement of antenna power of auxiliary transmitter.

620 Kilocycles

WLBZ—Maine Broadcasting Co., Inc., Bangor, Maine.—Modification of construction permit (B1-P-2868 as modified), which authorized increase in power, installation of new equipment and directional antenna for day and night use, for extension of completion date from 12-11-42 to 6-11-43.

680 Kilocycles

KFEQ—KFEQ, Inc., St. Joseph, Mo.—Modification of construction permit (B4-P-2477 as modified), which authorized installation of new transmitter, increase in power, change hours of operation, move transmitter and directional antenna for use day and night, for changes in directional antenna (daytime pattern only) and extension of completion date from 11-30-42 to 30 days after date of grant.

KFEQ—KFEQ, Inc., St. Joseph, Mo.—License to cover construction permit (B4-P-2477 as modified), which authorized installation of new transmitter and directional antenna for day and night use, increase power, change in hours of operation and move transmitter.

KFEQ—KFEQ, Inc., St. Joseph, Mo.—Authority to determine operating power by direct measurement of antenna power.

740 Kilocycles

KTRH—KTRH Broadcasting Co., Houston, Texas.—License to cover construction permit (B3-P-3011 as modified), which authorized change in frequency, increase in power, move of transmitter and installation of directional antenna for day and night use.

KTRH—KTRH Broadcast Co., Houston, Texas.—Authority to determine operating power by direct measurement of antenna power.

960 Kilocycles

KMA—May Broadcasting Co., Shenandoah, Iowa.—Modification of construction permit (B4-P-2599), which authorized installation of directional antenna for night use and increase in power, for extension of completion date from 12-24-42 to 2-22-43.

WSBT—The South Bend Tribune, South Bend, Ind.—License to use present licensed auxiliary transmitter as the main transmitter.

WSBT—The South Bend Tribune, South Bend, Ind.—License to use present licensed main transmitter as auxiliary transmitter.

1110 Kilocycles

WMBI—Moody Bible Institute of Chicago, Chicago, Ill.—Authority to determine operating power by direct measurement of antenna power.

1320 Kilocycles

KXYZ—Harris County Broadcast Co., Houston, Tex.—License to cover construction permit (B3-P-3016 as modified), which authorized change in frequency, increase in power, move of transmitter, installation of new transmitter and directional antenna for night use.

KXYZ—Harris County Broadcast Co., Houston, Texas.—Authority to determine operating power by direct measurement of antenna power.

1390 Kilocycles

KGER—Consolidated Broadcasting Corp., Ltd., Long Beach, Calif.—License to cover construction permit (B5-P-3096 as modified) for new equipment, increase in power, installation of directional antenna for night use and move of transmitter.

KGER—Consolidated Broadcasting Corp., Ltd., Long Beach, Calif.—Authority to determine operating power by direct measurement of antenna power.

1400 Kilocycles

KVGB—Helen Townsley, Great Bend, Kansas.—Voluntary assignment of license from Helen Townsley to KVGB, Inc.

1440 Kilocycles

WAAB—The Yankee Network, Inc., Worcester, Mass.—License to cover construction permit (B1-P-3194 as modified), which authorized move of transmitter and studio, increase in power and installation of new transmitter and directional antenna for day and night use.

WAAB—The Yankee Network, Inc., Worcester, Mass.—Authority to determine operating power by direct measurement of antenna power.

1480 Kilocycles

WRDW—Augusta Broadcasting Co., Augusta, Ga.—License to cover construction permit (B3-P-2966 as modified), which authorized change in frequency, increase in power, installation of new transmitter and directional antenna for night use and move of transmitter.

WRDW—Augusta Broadcasting Co., Augusta, Ga.—Authority to determine operating power by direct measurement of antenna power.

FM APPLICATION

W57PH—Westinghouse Radio Stations, Inc., Philadelphia, Pa.—License to cover construction permit (B2-PH-65 as modified, which authorized new high frequency broadcast station) *in part*.

TELEVISION APPLICATION

NEW—Balaban & Katz Corp., Chicago, Ill.—Construction permit for new experimental television broadcast station, using facilities of commercial television station WBKB. Frequency: Channel No. 2, **60000-66000 kc.;** power: aural, 2 KW; visual, 4 KW. Emission A5, special for FM for aural.

MISCELLANEOUS APPLICATION

KALO—Intermountain Broadcasting Corp., area of Salt Lake City, Utah.—Modification of license to increase power from 75 watts to 100 watts of relay station.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINT

The Federal Trade Commission has alleged unfair competition against the following firm. The respondent will be given an opportunity to show cause why a cease and desist order should not be issued against it.

United Inheritance Bureau, and Guardian Service Bureau, 1278 Jefferson Ave., Buffalo, N. Y., selling and distributing envelopes and form letters in the nature of questionnaires designed to be used by creditors and collection agencies in obtaining information concerning debtors, is charged in a complaint with the use of unfair and deceptive acts and practices in commerce. (4874)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Brunswick-Balke-Collender Co., 629 South Wabash Ave., Chicago, manufacturer and distributor of bowling equipment and other merchandise, has been ordered to cease and desist from unfair acts and practices in commerce having the effect of lessening competition and tending to create a monopoly in bowling pins and bowling supplies. (3604)

Marvel Laboratories, 1205 Market St., Louisville, Ky., manufacturing and selling a product designated "Marvel Coal-Pep," advertised as a treatment for coal, have been ordered to cease and desist from misrepresentation of the qualities of the product. (4838)

New York Handkerchief Manufacturing Co., 1021 West Adams St., Chicago, manufacturer and distributor of handkerchiefs, has been ordered to cease and desist from misrepresentations of its products. (4727)

Wire Rope & Strand Mfg. Assn., et al.—Fifteen manufacturers of nonpatented wire rope, together with the association of which they are, or have been, members, have been ordered to cease and desist from entering into or continuing any combination or conspiracy to fix prices for their products, which are made in many sizes varying from that used for airplane control wire to cables employed in supporting suspension bridges.

The respondent member companies manufacture and sell approximately 85 percent of all the wire rope produced in the United States, and, according to the Commission's findings, to the extent that they act collusively in the pricing and distribution of their product, they are in a position to dictate and control the prices at which it must be purchased by distributors, dealers and users, including Federal, State and municipal agencies.

Respondents named in the order are:

The Wire Rope & Strand Manufacturers Association, Inc., Washington, D. C.; American Chain and Cable Company, Inc., New York; The American Steel and Wire Company of New Jersey, Cleveland; Broderick & Bascom Rope Co., St. Louis; Columbia Steel Company, San Francisco; E. H. Edwards Company, San Francisco; A. Leschen & Sons Rope Company, St. Louis; MacWhyte Company, Kenosha, Wis.; Pacific Wire Rope Co., Los Angeles; Rochester Ropes, Inc., Jamaica, Long Island, N. Y.; John A. Roebling's Sons Co., Trenton, N. J.; Union Wire Rope Corp., Kansas City, Mo.; The Upson-Walton Company, Cleveland; Wickwire Spencer Steel Company, New York; Wire Rope Corporation of America, Inc., New Haven, Conn., and Wire Rope Manufacturing & Equipment Company, Seattle. (4443)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Burton-Dixie Corp., 2024 South Racine Ave., Chicago; also maintaining factories in Brooklyn and Lansing, Mich., and operating a large number of warehouses throughout the country, and engaged in the manufacture and sale of mattresses and other merchandise, has stipulated to cease and desist from the use, or from supplying to others for their use, advertisements or printed matter containing any statement or representation tending to convey the belief to purchasers that its products, equipped with either of the so-called "Posturite" or "Ortho-Flex" units, are of such construction, scientific or otherwise, as to insure correct posture during sleep to all who use them; and from stating or representing that insomnia and other serious disorders are caused by faulty mattresses, that faulty mattresses interfere with the functioning of the sleeper's organs or that healthful sleep is not possible on a soft mattress. (3569)

Co-Operative Breeding and Hatching Co., Shelby, Ohio, selling and distributing chicks, has stipulated to cease representing that chicks sold by them have the strain of prize-winning or champion poultry or are of "Championship" caliber unless, in direct connection with any such representation, truthful disclosure be made that such chicks are related to and of the strain of losing as well as winning contest entrants; and to discontinue use of the statements "Pay Streak AAA Mating Barred Rocks are headed by males that are sons of pedigreed sires whose dams have records of 250 to 293 eggs," "One contest pen of Pay Streak S. C. Reds established the remarkable record of 248 eggs per hen for 10 hens," and "Pay Streak has had TWO National Laying Champions, including all breeds and all contests," or any other statement or representation of like meaning, the effect of which may tend to convey an erroneous belief or impression with respect to the laying or other records of poultry. (3571)

Gramercy Chemical Co., Inc., 161 Ashland Place, Brooklyn, and Andrew Borak, trading as The Roxola Co., at the same address, both engaged in the sale and distribution of a medicinal preparation designated "Zdroj" purportedly for use as a "Herbal-Bitter Tonic," have stipulated in connection with the advertising and sale of the product to cease and desist from representing by use of the statements "helps digestion," "beneficial in digestive disorders," "recommended by doctors for digestion" or any other statement of similar import that the preparation has a favorable influence on the digestive processes; representing that the preparation constitutes a competent treatment for debilities of the stomach or liver; that it exerts a stimulating effect upon the secretory glands of the body; that it exerts a tonic effect when used as directed; or that it has any therapeutic effect except as a temporary laxative for the relief of constipation. (3570)

M. M. Kronisch, 315 Seventh Ave., New York, selling and distributing fur garments, has stipulated to cease and desist from representing that the prices at which he sells or offers to sell his merchandise to the public are wholesale prices; and from the use of any method or device—such as the acceptance of introduction cards requesting that the person introduced be sold merchandise at "wholesale prices"—the effect of which may tend to convey the belief that he sells merchandise to any preferred consumer customer or customers or to the consuming public generally at wholesale prices. (3568)

Richard Best Pencil Co., Inc., Irvington, N. J., manufacturing and selling lead pencils under the brand name "Futura," has entered into a stipulation to cease use of the statements that its pencil "lasts three times as long as the best of competitive pencils" or "actually runs 3.8 times longer than the next best." (3572)

FTC CASE CLOSED

The Federal Trade Commission has dismissed its complaint against New Century Beverage Co., 820 Pacific Ave., San Francisco.

The complaint had alleged that the respondent had misrepresented the qualities of a carbonated water produced by it.

To facilitate reply, all future correspondence should be addressed to the Association at 1760 N Street, N. W. Western Union telegrams should be addressed to the Association, WUX, Washington; telegrams over other systems, at the address above given. The telephone number is NAtional 2080.

CODE COMMITTEE, CO-OPERATIVES REACH AGREEMENT

The NAB Code Committee and officials of the Co-operative League of the U. S. A., after conferences in Washington on December 14 and 15, on Tuesday issued the following joint statement:

"We believe that the advertising of co-operatives is and has been acceptable under the Code when the programs offered are designed to sell goods, trademarks or services of co-operatives.

"It is agreed that there is no objection to commercial copy incorporated in a program sponsored by a co-operative enterprise which states that (a) any person can make purchases at co-operatives; (b) membership in co-operatives is open and voluntary; (c) co-operatives are owned by members, each of whom has one vote; (d) profits or savings are returned to member-owners. However, in making such statements no attack is to be made on any other business enterprise or system of distribution.

"The length of commercial copy and character of such program should conform to the provisions of the NAB Code.

"Any discussion of the co-operative movement as such or as an economic system is properly confined to sustaining time which may be given by stations or networks in accordance with the public interest."

The Code Committee also stated:

"In respect to any program offered by the Co-operative League of the U. S. A., we suggest that such program be presented as having been produced by the Co-operative League of the U. S. A. on behalf of specific member co-operatives engaged in the sale or distribution of goods or services."

Representing the Co-operative League of the U. S. A. at the conferences were: Murray D. Lincoln, president; E. R. Bowen, executive secretary; Wallace J. Campbell, assistant secretary; John Carson, Washington representative; Robert L. Smith, educational director of the Eastern Co-operative League. The Code Committee members in attendance were: Earl J. Glade, chairman, KSL, Salt Lake City; Grant Ashbacker, WKBZ, Muskegon, Michigan; Jan Schimek, Columbia Broadcasting System, New York; Lee B. Wailes, KYW, Philadelphia; William S. Hedges, National Broadcasting Company, New York; Neville Miller, president, National Association of Broadcasters; Russell P. Place, NAB counsel and secretary to the Code Committee.

ASTROLOGERS

The Code Committee on Tuesday considered the problem of astrologers on the air which is to some extent again plaguing the industry. Although no action was taken by the Committee, it was the sense of the meeting that stations should exercise extreme care not to allow these people access to the air on paid time in violation of Item No. 3 of the NAB Standards of Good Taste.

CRITICAL OCCUPATIONS

War Manpower Commission is in the process of revising the list of critical occupations in the communications industry appearing in Occupational Bulletin No. 27 (see NAB Selective Service Handbook, Supplement No. 1). It is believed that the list of titles in the broadcasting industry will be expanded to include critical occupations not now listed, and that the new list will be released in a matter of days.

QUESTIONS AND ANSWERS ON SELECTIVE SERVICE

Here, in question and answer form, are the major facts about Selective Service, collected by the Office of War Information from the Bureau of Selective Service of the War Manpower Commision and the Army and Navy Departments, as released last Sunday by OWI. An attempt has been made to touch on most of the many questions raised, but it should be recognized that some basic information, particularly that dealing with future plans, would be useful to the enemy and cannot be released.

All arrangements and rulings under Selective Service are made for the purpose of obtaining the men the military forces need with the least dislocation of vital industry and agriculture. They are therefore subject to the conditions of war. Changes may be necessary from time

QUESTIONS AND ANSWERS ON SELECTIVE SERVICE

(Continued from page 709)

to time. The answers given in the following pages are correct as of the date of this release. They do not constitute a binding assurance for the future.

Q. Now that voluntary recruiting by the Army and Navy has been stopped, can anyone get into the armed forces except through Selective Service?

A. No, except for women who will continue to be recruited for the WAACS, WAVES, SPARS, and Army and Navy Nurses' Corps, and a small number of civilians who may be commissioned in the armed forces. The Army and Navy may enlist specially qualified men over 38. Men who submitted applications for Army or Navy enlistment prior to December 5, 1942, may be enlisted up to December 15. In a "stopgap" move to fill the manpower needs of the Navy, Marine Corps and Coast Guard, the War Manpower Commission Tuesday authorized local draft boards to accept volunteers for the three service branches until February 1.

In granting the authorization, Manpower Chairman Paul V. McNutt instructed the boards not to allow men engaged in essential work to enlist. None of the service branches may conduct drives to step up enlistments, he said.

Under the temporary arrangement, draft boards will get credit under their quotas for all enlistments.

The prospective recruit will be required to go to his local draft board, fill out certain forms, obtain draft board approval and take the approved forms to a recruiting station. No application for enlistment may be considered unless the proper forms are presented.

In this way, McNutt hopes to prevent enlistments from interfering with the essential war operations while a permanent quota plan for all the services is being devised. This he hopes to complete by February 1.

Men who have already received notices to report for induction into the Army may not enlist in the other services.

Q. How many will be called through Selective Service this year?

A. The full answer to this is military information. The calls are made on a month-to-month basis, with the Selective Service being notified about two months in advance of the needs of the armed services. The President's recent executive order directs that the Secretaries of War and Navy shall, after consulting with the War Manpower Commission Chairman, determine the number to be selected. Official estimates have been made that the total armed forces (not including officers) will be increased from approximately 5,500,000 now to 9,700,000 by the end of 1943 (7,500,000 Army, 1,500,000 Navy, 400,000 Marines, and 300,000 Coast Guards), indicating a minimum need of 4,200,000 during 1943—an average of 350,000 a month, without reference to replacements.

Q. When will the 18- and 19-year-olds, who are being registered starting this week, be called into uniform?

A. Starting in January.

Q. How many of these young men will be called?

A. A great many had already enlisted, as of December 1, and estimates of those who may be available for early calls vary from 600,000 to 900,000.

Q. How many soldiers can we get during the next year, out of the 100,000 a month (1,200,000 a year) who attain the age of 18?

A. It is estimated that the armed forces should get 70,000 a month from this group. Those who are married and with children and those whose marriage was contracted at a time when their selection was not imminent, essential workers in industry and agriculture will not be called at once. There will also be some who cannot meet the physical qualifications. In addition, the Draft Act as amended provides for the deferment of high-school students in this group until the end of the academic year (April, May, and June in various localities) on written request. This latter provision does not apply to students in college.

Q. Will the 18- and 19-year-olds fill the quotas for the early months of 1943?

A. Not entirely.

Q. In what order will the 18- and 19-year-olds be called?

A. In accordance with their dates of birth, the older registrants will be called first. This means there will be no lotteries for this group as were held previously. Except for young men who are deferred by reason of their dependency status or because of their occupations, those persons who are nearly 20 will be called first, then those born 19 years and 10 months ago, then those born 19 years and 9 months ago, and so on down to the just-18's with later ones being liable for induction after they reach their 18th birthdays.

Q. Will the 18- and 19-year-olds be called before married men?

A. Generally, yes.

Q. Are married men being called now?

A. Yes, in some states, and they will be called generally before many months.

Q. Are married men with dependent children being called?

A. Generally, no. The calling of married men with dependent children, who have acquired dependency status in accordance with Selective Service regulations, requires specific authorization of the National Director of Selective Service and such authorization has not been issued.

Q. When will married men who are not deferred by reason of their occupation be called, and in what order?

A. Married men fall in three main categories and will be called in this order and at such times as their services are required:

1. Registrants, both married and single, with collateral dependents only. (Mother, father, etc.)
2. Registrants with dependent wives only with whom they maintain a bona fide family relationship.
3. Registrants with dependent wives and child or children and those with one or more children only, with whom they maintain a bona fide family relationship.

Two years of experience in Selective Service has shown at least 17 or more different classifications of married men for these purposes, and in determining the order of induction the local boards will use their best judgment. The recently-passed Allowance and Allotment law provides a system of payments to the family or dependents which eliminates much of the actual need for deferment, except in special or "hardship" cases.

Q. In view of the provisions made for necessary payments under the Allowance and Allotments Act, does "dependency" really mean anything in relation to deferment any more? If not, why is there still a 3-A classification?

A. Dependency is still a factor in Selective Service classification and 3-A will be continued. The Allowance and Allotments Act merely caused many wives of soldiers and persons who should be soldiers to cease to be dependents. Single men with dependents will be called first when it becomes necessary to go into the dependency (3-A) groups, then married men with wife only; then married men with a wife and child or children, or children only; but men with dependents who are not in essential industries or agriculture will be called ahead of other men with dependents.

Q. Is occupation coming to be, or has it become, the only ground for deferment, as in England?

A. No, but occupation is becoming more important in the classification of registrants. Even in England occupation is not the only ground, since hardship cases are still considered.

Q. Since the top limit for induction has been cut from 45 to 38 years of age, does Selective Service or War Manpower Commission have authority to direct the 38- to 45-year-olds into essential industries or war essential agriculture?

A. No, but they will be most useful there, and most of the job opportunities will be in those fields.

Q. Will the Army or Navy release its over-38 men back to essential industry or agriculture?

A. The Army has announced it will release these enlisted (or drafted) men, but only if they request it and if it is shown that the men are more useful to industry than to the Army and that they will be employed in agriculture or some other essential war industry on their release.

Q. How about the Navy enlistments?

A. Under the President's directives, the Navy may recruit men over 38, if they have special aptitudes or skills, and may recruit men under 18.

Q. The War Manpower Commission has announced a list of 35 essential industries and within them, lists of 3,000 jobs or occupations which are essential. Have all these lists been sent to the local Selective Service Boards, and if so, to what extent do they govern local board action?

A. Starting last April, the Selective Service System has sent out to local boards those definitions of essential industries, and occupations within each, as they were certified by a technical War Manpower Commission committee. Thirty-nine such "releases" have been sent to local boards so far, and others will be sent as the essential jobs are further defined. These lists will vary considerably from time to time. These lists are the latest available advice to the local boards. But their listings do not prohibit other deferments which may be made under the law by the local boards. Also, under the Selective Service laws, power and responsibility for the classification of each individual is placed on the local board, subject to the right of appeal, and group deferment for occupational reasons is forbidden.

Q. In these 35 essential industries will all workers now classified in Class 3-A be transferred automatically by their local Selective Service boards to Class 3-E?

A. No. Reclassification is not automatic. In the case of agriculture, however, instructions have been sent to local boards to reclassify essential workers on essential farms into 2-C and 3-C.

Q. Should a worker, or his employer, make a case for reclassification on the basis of "essential" employes in "essential" industries?

A. Such a case can best be made through "manning tables" and the replacement schedules which supplement the manning table which are now being put into effect by many war industry employers. In some plants, the case may be made for temporary deferment through the replacement schedules alone. At present deferment as an essential worker is granted only if it is shown affirmatively that a training period of at least six months is necessary before an untrained worker can attain reasonable proficiency in the job, that the job is essential in the industry, and that the worker is currently irreplaccable.

As a result of conferences with Selective Service officials, NAB believes the Manning Table Plan is not well adapted to the radio broadcasting industry generally. It is designed to expedite the orderly withdrawal from industry into the Army of workers in large industrial units. However, any station believing the Manning Table Plan to be well adapted to its deferment and training program is eligible to participate, and should communicate with the appropriate regional office of the War Manpower Commission as listed in Supplement No. 2 to NAB Selective Service Handbook.

Q. In the case of a worker in an essential industry, should the worker or employer make a case now for reclassification, or should they wait until the worker is called by the local board for examination?

A. Any application for transfer to 3-B should be made now, preferably by the employer.

Q. Will a married man with a wife only, classified 3-B because he is in an essential industry or 3-C because he is in agriculture, be called ahead of a 3-A grocery store clerk (not in one of the 35 essential industries), who has 5 children?

A. Under present instructions, local boards are not authorized to call married men with children. However, the need for workers in essential industry may become so acute that married men, even with children, in non-essential industries may have to be called ahead of those men with wives only who are engaged in essential industry, in which case the grocery clerk would come first.

Q. Can apprentices, trainers, and learners be deferred, if they are employed in the 35 essential industries or outside?

A. No, but if they are in the 35 industries, they may be deferred on the basis of the training, qualifications and skill which they have acquired, the experience they have obtained and the occupation in which they are engaged, and the use to which the employer is putting the maximum skill of the apprentice and permitting them to undertake work and supervision in the skills which they have acquired.

Q. If a wife takes a job, how does that affect her husband's draft status?

A. If the husband has been found by the local board to have an essential job in industry or agriculture, her husband's status will not be affected by her taking a job. If the Allowance and Allotment Act was not enough to affect his status, it is possible the additional income might change the status of a non-essential worker without children. In general, however, wives by going to work will tend to release some unmarried men for military service, and thus postpone the time when married men will be called in large numbers. It should be remembered also that local boards in considering dependency deferment will consider not only whether a wife is working, but equally whether she can work.

Q. What has Selective Service told local boards about married men?

A. Several instructions on dependency have been sent out, the most significant of which probably is Local Board Release 123, which authorizes local boards to consider reclassifying single men with collateral depedents (father, mother, etc.), and married men without children into class 1-A, thus making them available for call. It should be kept in mind that marriage itself is never a basis of deferment, only dependency.

Q. Will we reach a saturation point beyond which few additional soldiers will be needed?

A. Probably not during wartime. Such a point would depend upon war strategy and the progress of the war. There will undoubtedly be need for replacements, etc., as long as we are at war.

Q. Is there any difference between a "necessary" man and an "essential" man since both have been mentioned in Selective Service bulletins?

A. No. "Necessary" probably describes the situation more precisely with reference to occupational deferments, but there is no difference in usage.

Q. What happens to the non-essential type of worker in agriculture and the 35 essential industries?

A. Local boards will place them in 1-A or, if they have dependents, in 3-B, in the case of the industrial workers. In the case of farm workers, they will be placed in 3-A if not engaged in essential jobs and have dependents.

Q. Have quotas been suspended in some states because of heavy occupational deferments?

A. In one state, quotas were reduced, and in two, they were modified during the harvest season.

Q. Before Army physical requirements were relaxed, many were rejected and placed in IV-F who would not be rejected now. What is being done about them?

A. Local boards are calling in 4-F registrants constantly for reconsideration under the more liberal requirements, and many are reclassified into 1-A as a result.

Q. Why does one see so many young men still in civilian clothes?

A. Many of them have been rejected for physical disabilities, which may not be apparent. The usual rejection rate for this cause varies according to age group but averages about 30 per cent. Others are war workers, of course.

Q. What is being done by the local boards with the 38- to 45-year-olds who cannot, under the President's order, be called?

A. They will be put in new class, 4-H, and could be made available for armed service if the President should rescind this order. However, it is expected that most of them will find essential jobs in war industries.

Q. With the Navy, Marines and Coast Guard now drawing men through Selective Service for the first time, will the registrant have an opportunity to choose his service?

A. At the time he is inducted, a registrant will have an opportunity to express his preference. The needs of the services and the man's own skills and experience will be major factors in determining which branch takes him.

Q. Does the Selective Service System operate fairly?

A. The heart of the system are the 6,500 local boards representing every county in the United States and our possessions. The boards are composed of citizens and residents of these counties serving without pay, who have first-hand knowledge of local conditions and possess the confidence of their neighbors. In more than two years of Selective Service operations, these boards have sent into military training and service more than 3,000,000 men drawn from every level of society, from every race and creed.

Q. What about rumors of influence being used with local boards?

A. Lotteries have been held to guarantee that selection of men, and the order in which they should go, should be determined without reference to wealth, influence, social position or other such factors.

Q. There have been rumors of prejudice for or against various races, creeds and colors. What about them?

A. Major-General Lewis B. Hershey, Director of Selective Service, has just answered that one. He says:

"Casualty lists from the area of actual combat, which include men of all colors, race and creeds, are the best indication of all, that the Army which has been raised through Selective Service represents America at its best.

"The winners of the awards for bravery are from the North as well as the South, and from the middle West and the far West, colored as well as white, and representing every creed in the population of our great nation. The newspapers and other periodicals have told the story graphically. The qualities of bravery, courage, initiative, and patriotism in their finest sense are not the exclusive property of any race or color, of the citizens of any particular economic level, or of any section of our land."

Q. What are the current classifications of registrants and what do they mean?

A. Here are the classes, and their definitions.

1–A	Registrants available for general military service.
1–A–O	Registrants who are conscientious objectors available for noncombatant military service when found acceptable to the land or naval forces.
1–C	Registrants who have been inducted into, enlisted in, or appointed to the armed forces.
2–A	Registrants who are necessary or essential in their civilian activity.
2–B	Registrants who are necessary or essential to the war production program, excluding agriculture.
2–C	Necessary or essential men in agriculture.
3–A	Registrants with dependents, engaged in less essential industry or less essential agriculture.
3–B	Registrants with dependents, engaged in an activity necessary to the war production program.
3–C	Registrants with dependents engaged in essential agriculture.
4–A	Registrants who before induction have become 45 years of age, since they registered.
4–B	Registrants who are deferred specifically by the law itself.
4–C	Registrants who are aliens not acceptable to the armed forces or who waived their rights to become citizens to avoid military service.
4–D	Registrants who are ministers of religion or divinity students.
4–E	Registrants who are conscientious objectors available only for service in civilian work of national importance.
4-F	Registrants who are mentally, morally, or physically unacceptable to the armed forces.
4–H	Registrants who are 38 to 45 years of age. New class.

Q. How many have been registered and classified?

A.	Number
Registration—U. S. Total (as of Sept. 30, 1942)	26,151,913
Unclassified	1,948,238
Classified	24,203,675

N. Y. STATE TRAINS TECHNICIANS

Editor's Note: The following report was presented before New York state broadcasters on December 7, during the two day meeting of District 2, in New York City. Because it records an outstanding historical achievement in assisting our Nation at war, it is presented in full:

By Col. Harry C. Wilder, WSYR
Chairman, Military Committee
Second NAB District

Do we broadcasters remember Pearl Harbor? In one year in one state the all-out effort of radio stations is nothing short of amazing. I will report only on one phase of this war effort.

We sought beyond our war news and important morale functions some extra means of supporting the forces. The NAB shortly after Pearl Harbor decided that broadcasters enroll and train radio technicians for the war. The need then and now is desperate. Through the U. S. Department of Education funds were made available for instruction and equipment, but someone in each state had to organize this ambitious plan. The radio stations of New York have seen it through.

Just before the end of December 1941 I was designated to organize the colleges of this District. No time was lost. In the first week of January two meetings were held; one in Syracuse and one in New York City, at which nearly every college and university in New York and New Jersey was represented in response to our invitation. In many cases the heads of these institutions attended.

Art Stringer, secretary of the NAB War Committee, who has done a magnificent job, and Commander Lee of the Navy explained the plan and outlined the 32-week night courses. We promised that the broadcasters would recruit all they could train in these courses, would furnish instructors wherever possible, would give surplus equipment and would otherwise see this project through. Nearly every college had more applicants than could possibly be accommodated. The stations, without exception, all deserve fullest possible credit.

Courses Started in February

All of these courses were soon under way and by February 1942 in nearly every New York community with over 10,000 population, one or more of these night courses was in operation. It is to the eternal credit of our stations that hard pressed as we are for engineers to keep us on the air, we were nevertheless, able to furnish a large number of instructors. These men have worked their regular shifts and devoted long extra hours every week as war instructors. Some of these engineers were later drafted; a reflection upon American handling of manpower problems.

The two Co-Ordinators representing directly the U. S. Education Department are Dean Hollister of Cornell University and Dean Newman of the College of the City of New York. Dean Hollister and his efficient staff supervise everything north of New York City. Dean Newman has metropolitan New York and New Jersey. Early in the year it was found best for radio to function as state units. New Jersey was separated and I refer only to the training activities in New York state, with emphasis on the area north of New York City.

In the face of later heavy demands upon the colleges for many other large war training courses, they have continued these night courses. There should be no move in Washington toward cutting down this activity because all services are still short. We have the recent statements of the Army and Navy that the quality of those who have completed our fundamental courses is high. This is after all, the acid test.

Along in the summer preference was given to applicants who were acceptable to the enlisted reserve of the Signal Corps. Since then the Army Air Forces, Communication Branch, has come to us with a similar enlisted reserve plan. We have also invited the Navy to join in this reserve plan. The Signal Corps pioneered and have taken most of the acceptable enrollees. Many of our graduates, however, have joined other services.

Both Men and Women Trained

Yet we have never at any time permitted the urgent dilemma of the stations to cross up the main purpose—that we must furnish these graduates to the armed services. We have, however, included a few women as extra students, who receive the same instruction. Now the WAAC's want some of these women. Many women will be available to replace station engineers entering the services.

The stations should contact the nearest college to line up these trained women or certain men who cannot enter war service for age, physical or other reasons. We have not been selfish in this project but we have incidentally provided a small reservoir of trained people to replace depleted station ranks. For example, let's mention only one of many. Station WJTN of Jametsown, has one full time employee who graduated from one of these courses and who now has a first class license. Another graduate is a half time employee. The manager of WJTN states that these two men have been of tremendous aid in their fast depleted engineering staff and they plan to bring another nearby student in. They have kept such stations on the air.

We have insisted upon scrupulous observance of the courses as outlined by NAB because they were as required by the armed services. It is true that the stations can on their own, establish code and other technical classes and turn out many more trainees. Many high schools now operate radio courses for pupils not high school graduates. Without extensive later experience, these courses all help but can hardly meet the military needs for well rounded fundamental radio training in these "college-level subjects."

Students Complete Studies

A very large percentage now are able to finish the courses; in fact, more than expected. We must have some additional equipment and instructors without which new courses cannot be added. We now call on all stations to hunt up among amateurs and from their own surplus stocks any possible usable equipment.

The total number who have taken the upstate courses is 4,000 of which 170 are women. Because these courses in New York City were separated from upstate, we can only estimate state-wide results.

Probably one-third can be added from Greater New York to the upstate totals; there being no complete record available.

In the state about 5,200 have taken these night courses. 2,400 have completed the first half and are well along to final graduation in upstate colleges.

In addition, several other types of radio courses have been given in New York colleges, mostly by direct arrangement with the armed services. I have reason to believe that over 15,000 have in 1942 taken some radio course in state colleges, not including the public school system or commercial radio schools.

Sixty-five station engineers now teach these courses and 35 more engineers are at once available as instructors. Probably 50 engineers would volunteer as instructors if equipment were available for more classes. This apparatus bottle-neck is hard to crack, as priorities are not usually granted to colleges urgently needing apparatus to train more radio men.

Conclusion: For the first time in radio history, college radio courses have been put on a mass production basis. We know it is possible to concentrate such training in area as large as upstate New York. Most of these graduates are immediately needed in the war, but they also constitute a future trained supply for the radio industry. Whether these courses will continue another year, nobody knows. It depends on changing military policies. It is quite possible that in the future all will first be enlisted and then trained in colleges under full military supervision of the Army and Navy and without the sponsorship of broadcasters. All of these graduates will be needed to man new developments in the post-war radio age, but the single and only objective today is to produce these technicians to get the war over with. And complete victory can be speeded by extra effort by everyone on the home front, which is the challenge accepted by the New York stations.

Labor

ESCALATOR CLAUSES

The War Labor Board ruled this week that "escalator" clauses in labor contracts should not be enforced when they would bring salaries to more than 15 per cent above their January, 1941, levels.

For instance, take the case of a contract made in April, 1942, which provided that employees who had been making $30 a week for some years should receive a raise of $2.50 a week, with another $2.50 raise each six months for the duration of the contract. Under the WLB ruling, the employees could be given only $2 of the first "automatic" raise, and then could receive no more, even though they were provided by the contract.

Any adjustment would have to be approved by the WLB. The text of the order:

TITLE 29—LABOR

CHAPTER VI—NATIONAL WAR LABOR BOARD

Part 803—General Orders

(Adopted December 8, 1942)

§ 803.22—General Order No. 22. (A) No clause contained in any labor agreement, commonly known as an "escalator clause," relating to wages or salaries subject to the jurisdiction of the National War Labor Board, regardless of when the agreement was made, which provides for an adjustment in wage rates after October 3, 1942, or an adjustment in salary rates after October 27, 1942 because of changes in the cost of living, shall be enforced, where such adjustment would result in rates in excess of fifteen per cent above the average straight time hourly rates or equivalent salary rates prevailing on January 1, 1941.

(B) Adjustments within the fifteen per cent limit must be submitted for approval by the Board in the usual manner.

SICK BENEFITS

The WLB decided this week (Strand Baking Co. case) that it would not impose new or more liberal sick benefit clauses in the absence of special employment hazards.

Broadcast Advertising

1943 SALES PROMOTION CALENDAR IS AVAILABLE

Through the courtesy of Richard G. Meybohm, Manager, Sales Promotion Division of the National Retail Dry Goods Association, the 1943 Sales Promotion Calendar for Retailers and National Advertisers is being made available to broadcasting stations at $2.50 each. This is considered the most authoritative work in the field of day-by-day merchandise promotion.

With the increased emphasis which is being placed on department stores and retail establishments as sources of broadcast advertising, many radio stations will want to have a copy of this comprehensive analysis of sales promotions by months and by days.

Among the subjects covered for each month are: comments on that month's promotions; sales percentages by departments for that month; Important departments for that month; volume of the average store's total annual sales for the country as a whole that should be produced that month; and individual daily recommendations.

No better exposition exists of the problems of the retailer under wartime conditions than that contained in the Foreword to the 1943 Calendar, written by Mr. Meybohm. Here are the opening paragraphs:

"The year 1943 promises to be one of historical significance in retail sales promotion. Faced with an almost unpredictable merchandise situation caused by an ever-increasing diversion of production from civilian goods to war goods, the job of 'selling' in a period which contrasts an ebb of production against a peak of demand might not on the surface appear to be important. Yet if retail advertising and promotion be considered with its true purpose in mind—that of store promotion instead of sales promotion—it appears to become more important than ever. For probably never before has store selling been as worthy of consideration than at present.

"Certainly wartime conditions and their attendant shortages of merchandise, price and inventory control, etc., must be viewed as temporary whereas the life of the retail store may be reasonably expected to continue after Victory has been won.

"The successful store in peace time has always been that store which has been able and willing to cater to the needs and wants of people in a larger measure than competition. There seems to be no reason why this rule for success should not continue now and into our post war life.

"Normally these requirements and desires were in the main linked with merchandise which stores offered for sale. The availability of quantities sufficiently large to satisfy all demands and to profitably advertise was practically assured. Today this picture appears to be rapidly changing.

"The needs and wants of the American people have and will continue to change as the full impact of war is felt. Of necessity then sales promotion methods must also change. Large scale merchandise promotions might eventually become impractical because of the lack of quantities of specific types of merchandise. As a substitute implement to draw traffic and to keep those necessary daily contacts with customers, stores might well become centers of wartime information; their promotional activities might lean toward help in solving the customers' problems brought on by the war; to the establishment of bureaus of information; lectures, forums, instructive classes and the like. It short, stores might well serve as centers of community life."

WARTIME SHIFTS IN CONSUMER BUYING HABITS

From an Address before the
National Federation of Sales Executives

By WILLIAM H. HOWARD

Executive Vice-President
R. H. Macy and Company

Reprinted Through the Courtesy of "The Advertiser's Digest"

During the course of the recently completed tour of district meetings, many station managers and sales managers asked for copies of the "Wartime Shifts in Consumer Buying Habits" from which Lewis A. Avery quoted during the forecast of business. Through the courtesy of "The Advertiser's Digest," in which this speech was reproduced, we are able to reprint the salient points of this talk.

"The changes that are taking place in people's lives nowadays are becoming fairly obvious, and now the changes in their buying habits are beginning to make themselves felt. No one knows how far-reaching these changes will become because they are bound up with the length of the war, the extent to which rationing becomes necessary, and still further stringencies in transportation and the availability of consumer goods.

". . . We called a meeting of the publicity staff at Macy's and posed ourselves this problem: Now that we are at war, a great many changes are going to take place in the lives of individuals. Let us list on a sheet of paper all of the changes we can think of that are occurring to people. Then, we are in a position to decide what we want to do with our advertising, publicity, displays, our promotion of merchandise and the approach of our sales force.

"The list we finally enumerated was a lengthy one: it consisted of such things as:

"1. Women will have less time for normal pursuits than formerly, since they will be engaged in an increasing number of war activities. If they have less time for normal pursuits, they obviously will have less time for shopping and still less time for reading advertising.

"2. With the shortage of tires and with gasoline rationing, they will not be driving into town to shop.

"3. A certain number of families living in the suburbs will find the transportation problem too much for them and will move back into town. A certain other group of families, fearful of air raids and apprehensive about the safety of their children, will move to the suburbs, as close to transportation as they can get.

"4. There will be more home entertainment. Nearby movies will become increasingly popular. They will listen to the radio more.

"5. Women are going to be concerned with making what they have last longer because they will be doubtful about the quality of replacement goods.

". . . We must make our appeal to them (women) as brief, and informative, and to the point, as we can . . . it is equally true that they are very much interested these days in merchandise. . . . So while our story must be to the point it must also be complete; it must be more factual than it has been in the past. It must be simple, straight-forward, convincing and easy to buy from."

Doesn't that need match many of the distinctive advantages of broadcast advertising?

FREE TIME REQUESTS

The Radio Script Service of "Feature Bureau" at 50 East 42nd Street, New York City, is offering radio stations "free" monthly scripts on a Cooking Conservation Contest. Although various government agencies are alleged to be cooperating in the contest, stations have found that all scripts emphasize the importance of molasses in cooking conservation. This is no mere coincidence. Earlier this year, in response to a request for information on the purpose of the "Feature Bureau," Miss Marion Cahn wrote in part:

"The scripts as we offer them to radio programs are non-commercial in the majority of items—and in one or two items we represent associations like the doughnut industry; molasses industry . . ."

The old adage still holds true: "If you give it away, you can't sell it."

The managers of several Firestone Stores (subsidiary of Firestone Tire and Rubber Company) have approached radio stations with the suggestion that they broadcast Philharmonic records on a no-charge basis, with the understanding that the station will announce: "You are listening to a program of Philharmonic records sold exclusively by Firestone dealers and stores." Obviously, this is a commercial proposal and should be so regarded by the stations approached.

Listener Activities

CLEVELAND COUNCIL EVALUATES PROGRAMS

Mrs. J. Leon Ruddick, Chairman of the Evaluation Committee of the Radio Council of Greater Cleveland, has issued a most interesting report. In September the Cleveland Council sponsored the second regional conference on radio. As a result standards for the evaluation of children's radio programs were recommended. These standards follow:

1. Children's programs should be artistically sound. Top writers, actors and producers should be used in the creation of these programs.
2. Programs should be planned by joint committees including persons with a knowledge of children and those with a knowledge of showmanship.
3. Programs should build attitudes such as: loyalty, dependability, responsibility, integrity, tolerance, and pride.
4. Programs need, in this war era, to instill more definitely in children our democratic ideals. Definite propaganda for this purpose is desirable in our war against the totalitarian practices of the Axis Nations.
5. Children should have a wide range of programs such as the range for adults, including: variety, quiz, news, drama, and music.

In her release of December 4, Mrs. Ruddick, as Chairman of the Committee, states:

"A committee representing the Radio Council, working with the above standards in mind, submits the following list of programs which seem most nearly to measure up to the standards given. Programs were judged with children of Elementary and Junior High School ages in mind. The hours of listening agreed upon were 4 to 8 p. m. on school days, and 8:30 a. m. to 8 p. m. on Saturday and Sunday.

"Using the standards in the order of their listing, programs most nearly fitting these standards are given.

1. Let's Pretend; Saturday, a. m.; WGAR.
   Family Hour; Sunday, 5 p. m.; WGAR.
2. Story Time; Saturday, 9:45 a. m.; WGAR.
   Story Teller; Saturday, 10:45 a.m.; WHK.
   Little Doctor Hickory; Sat., 2:35 p. m.; Blue Network.
   Little Blue Play House; Saturday, 11:30 a. m.; WHK.
3. Uncle Henry's Dog Club; Sunday, 9:45 a. m.; WTAM.
   * Pan-American Holiday; Saturday, 1 p. m.; WTAM.
   ** Wings Over Jordan; Sunday, 10:30 a. m.; WGAR.
4. *** God's Country; Saturday, 11:15 a. m.; WGAR.
5. **** Kostelanetz; Sunday, 4:30 p.m.; WGAR."

The committee also recommended "Cavalcade of America" and "Men of the Sea" as worthwhile programs that dramatized the lives of heroes of all time and those in today's struggle for freedom.

---

* "Pan American Holiday" was included because it brings to children an understandable picture of our Latin American neighbors.

** "Wings Over Jordan" while directed to adults, was selected because it teaches children tolerance and an appreciation of other races.

*** "God's Country" dramatizes the various sections of our own land and it was felt that this gave valuable information and inspiration to youth.

**** The "Kostelanetz" program, by its styling, brings to youth an awareness of the best in music in both classic and popular fields.

DU PONT AWARDS

The Alfred I. duPont Annual Radio Awards was established May 1942, by Mrs. Alfred I. duPont of Jacksonville, Florida, and the Florida National Group of Banking Institutions in Florida.

Two awards of $1,000 each will be given each year.

One will go to the individual radio station in the United States which, in the opinion of a board of impartial judges, has rendered outstanding public service during the calendar year by encouraging and promoting American ideals and giving devoted service to the nation and to its community. The other award will go to the radio commentator who, in the opinion of the judges, has performed outstanding public service by aggressive, consistently excellent, and accurate gathering and reporting of news during the calendar year, and for expert and reliable interpretation of the news.

The awards for the 1942 calendar year will be announced the first week in March, 1943. In order to give the judges adequate time for consideration of all stations and commentators nominated for the awards, it will be necessary that all nominations be in by January 1, 1943. These nominations should be made by writing to W. H. Goodman, Secretary, Alfred I. DuPont Radio Awards, Trust Department The Florida National Bank, Jacksonville, Florida. Nominations should be accompanied by data supporting the claims of outstanding service made by the nominator. The decision of the Judges will of course be final and conclusive in all respects.

N. Y. SLANDER CASE

The New York Supreme Court last week in an action for slander ruled that a radio station is not liable for the extemporaneous defamatory remarks of a political candidate, provided the station had exercised "due care in the selection of the leasee of its facilities and in the inspection of the script." The ruling was made by Judge Wasservogel in the case of *Josephson* v. *WMCA*, and appears to apply to defamation in political broadcasts the "due care" rule laid down by the Supreme Court of Pennsylvania in the Summit Hotel Case.

"The fourth and fifth defenses," the court said, "plead qualified privileges under Section 315 of the Federal Communications Act. This section prohibits discrimination among qualified candidates for public office in the use of the facilities of a radio station and denies the right of censorship to the radio station. The person who uttered the defamatory matter was such a candidate. Since this statute creates certain obligations and limitations, it is proper that the owner of the radio station be given corresponding qualified privileges against liabilities for statements which it has no power to control."

In the State of New York the Court of Appeals is the court of last resort, with right of intermediate appeal to the Appellate Division of the Supreme Court. The Supreme Court is the trial court. Until affirmed by the Court of Appeals the ruling will not have the effect of binding authority in New York.

NETWORKS GRANTED REVIEW

The Supreme Court Monday granted review in the CBS-NBC cases against the Government to annul the network regulations and placed the case on the summary docket. Under the Urgent Deficiencies Act the networks have the right of direct appeal to the Supreme Court, and it was virtually a formality for the court to note probable jurisdiction and expedite hearing. Operation of the regulations was stayed by the New York court until February 1, 1943, or until argument before the Supreme Court, whichever is earlier. It is expected the cases will be reached for argument in January.

NAB ASKS TREASURY FOR OPINION ON GOVERNMENT TIME

NAB has requested the Treasury's opinion on the deductibility from gross income of the value of time given by radio stations to the Treasury, the War and Navy Departments, and other agencies of the Government for programs and announcements in support of the war effort.

Section 23(q) of the Internal Revenue Code, as amended by Section 125, the Revenue Act of 1942, provides, in part, for the deduction from gross income "in the case of a corporation (of) contributions and gifts payment of which is made within the taxable year to or for the use of (1) the United States * * * for exclusively public purposes * * * to an amount which does not exceed 5 per centum of the taxpayer's net income as computed without the benefits of this section."

PUBLIC RESPONDS TO SPOTS

Thanks to you the public is beginning to understand.

Our appreciation is expressed to the following stations for cooperation in directing listeners to bring radios to radio repairmen instead of asking that they be picked up. Other stations who are helping have been reported in previous issues of NAB REPORTS.

As a matter of fact, ODT regulations have now restricted the movement of servicemen's cars to such an extent that, generally speaking, no other course is feasible.

The short messages, which stations were asked to broadcast on a rotating schedule, are helping both industry and government. When the wartime situation is explained and understood by listeners, there is little or no resentment over the elimination of the pickup service. Removal of this "frill" enables radio repairmen to handle more sets per day and thus *partially* compensate for hundreds of servicemen in uniform.

WAKR, Akron; WROW, Augusta, Ga.; KFYR, Bismarck; WDOD, Chattanooga; WEST, Easton; KVFD, Fort Dodge; KARM, Fresno; WTIC, Hartford; WAZL, Hazelton; KMTR, Hollywood; KCMO, Kansas City, Mo.; WASK, Lafayette; WGAL, Lancaster; KOOS, Marshfield; WNYC, New York City; KBON, Omaha; WDAS, Philadelphia; KGFX, Pierre; WWSW, Pittsburgh; WTAD, Quincy; WSYR, Syracuse; KFUO, St. Louis; KTUC, Tucson; KVOA, Tucson; KUJ, Walla Walla; WDEL, Wilmington.

FRANK RECEIVES "AWARD OF MERIT"

Last summer, Nathan Frank, WCBT, Roanoke Rapids, N. C., went all out for Navy, putting both the station and himself solidly behind recruiting.

On December 10 he received the Award of Merit by the Navy Recruiting Station at Raleigh for the enlistment of 585 men. During five months, July through November, Mr. Frank, alone, interviewed 1,187 men. Of this number the 585 were enlisted and are now serving in the Navy.

FEDERAL COMMUNICATIONS COMMISSION

FLY PRESS CONFERENCE

Some progress is being made by FCC in connection with the manpower situation in the industry, Chairman James Lawrence Fly stated at a press conference this week.

The FCC staff has been in conference with the staff of the Manpower Commission, and the Chairman said, "We feel assured that the Manpower Commission will review the entire list of requirements of the industry, and when I speak of the requirements I do not think that we ought to be unduly concerned over some reports that only news and information service and those devoted to that particular service will be deemed essential."

He called attention to the fact that the broadcasting structure rests upon the foundation of commercial broadcasting and broadcast stations cannot exist for the isolated purpose of news and information "unless they be subsidized broadly."

"Of course there is always," the Chairman said, "the further factor that audiences must be built up and sustained. Without continuing the service and without attractive service, including entertainment, the audience will not be there. Audiences cannot be turned on and off like a spigot. I am sure it will be very obvious to all of us who are concerned with the continuity, stability and security of the broadcasting industry that all positions essential to those requirements will be recognized."

Mr. Fly expressed concern over the tendency "on the part of certain applicants and broadcast stations and their backers to assume that the wartime rules may be broken down." He said these rules are designed to prevent the use of materials and to preserve new materials for war purposes.

There is extreme demand for radio materials for essential war purposes, and this is thoroughly understood throughout the industry, Mr. Fly continued. Certain equipment has been taken by agreements of the owners out of the hands of some of our broadcasters, and no doubt additional materials which are available will be called for in the future.

"I think we have got to make it awfully clear here," the Chairman said, "that as long as these rules are in effect we have all got to live under them as best we can." Mr. Fly stated that he thought the question of living up to the rules had come about through the recent grant of the Commission which moves WJW. In this connection he called attention to the fact that no new material is being used in this program.

The FCC, Mr. Fly said, is still making studies and holding conferences regarding the status of small stations which may have difficulty in staying on the air due to the falling off of local business. This is particularly acute in a number of smaller towns and cities served by local stations dependent upon the business of the particular town. The Chairman expressed hope, "that some sound plan can be evolved for the relief of these stations so we can be assured of their continuing operation during the war. Perhaps not a more essential class of station in the whole broadcasting structure. Needless to say the tax measure may be of some assistance. That can hardly be demed a major alleviative."

DEMPSEY IN KOA CASE

The FCC has designated Mr. William J. Dempsey as Special Counsel for the purpose of assisting in the preparation and presentation to the Supreme Court of the case entitled "National Broadcasting Co., Inc. (KOA) v. Federal Communications Commission." This case involves the validity and interpretation of the Commission's intervention rule which was adopted while Mr. Dempsey was General Counsel of the Commission.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

The following broadcast hearings are scheduled to be heard before the Commission during the week beginning Monday, December 21. They are subject to change.

Monday, December 21

Further Hearing

WTNJ—WOAX, Incorporated, Trenton, N. J.—Renewal of license, **1310 kc.**, 500 watts, SH-WCAM and WCAP.

WTNJ—WOAX, Incorporated, Trenton, N. J.—Modification of license, **1310 kc.**, 500 watts, unlimited; request facilities of WCAM and WCAP.

WCAM—City of Camden, Camden, N. J.—Renewal of license, **1310 kc.**, 500 watts, SH-WTNJ and WCAP.

WCAM—City of Camden, Camden, N. J.—Modification of license, **1310 kc.**, 500 watts, SH-WCAP; request facilities of WTNJ.

WCAP—Radio Industries Broadcast Co., Asbury Park, N. J.—Renewal of license, **1310 kc.**, 500 watts, SH-WTNJ and WCAM.

WCAP—Radio Industries Broadcast Co., Asbury Park, N. J.—Modification of license, **1310 kc.**, 500 watts, SH-WCAM; request facilities of WTNJ.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WSAP—Portsmouth Radio Corp., Portsmouth, Va.—Granted modification of construction permit for approval of studio site, move of transmitter location and change in antenna system, on condition that applicant take care of reasonable complaints on blanketing (B2-MP-1650).

WSAY—Brown Radio Service & Lab. (Gordon P. Brown, Owner), Rochester, N. Y.—Granted modification of construction permit for change of location of transmitter, change type of transmitter and change directional antenna system for day and night use (B1-MP-1609).

WOW—Woodmen of the World Life Insurance Society (Assignor), Radio Station WOW, Inc. (Assignee), Omaha, Nebr.—Granted consent to voluntary assignment of license for Station WOW, from Woodmen of the World Life Insurance Society to Radio Station WOW, Inc. The assignor proposes to assign the license and lease all the fixed assets used in connection with Station WOW to the assignee. The lease agreement is for a term of 15 years at a monthly rental of $8,166 for the first three years and $5,680 per month for the remaining 12 years of the lease. (Commissioners Walker, Wakefield and Durr dissented.)

LICENSE RENEWALS

WDBC—Delta Broadcasting Co., Escanaba, Mich.—Granted renewal of license for the period ending in no event later than December 1, 1943.

Granted renewal of following station licenses for the period ending in no event later than December 1, 1944:

KARM, Fresno, Calif.; KDTH, Dubuque, Iowa; KLO, Ogden, Utah; KPRO, Riverside, Calif.; WWRL, Woodside, Long Island, N. Y.

WCOC—Mississippi Broadcasting Co., Inc., Meridian, Miss.—Granted renewal of license for the period ending not later than August 1, 1944.

WMRO—Martin R. O'Brien, Aurora, Ill.—Granted renewal of license for the period ending not later than October 1, 1944.

DESIGNATED FOR HEARING

KDNT—Harwell V. Shapard, Denton, Tex.—Designated for hearing application for modification of license to change frequency from **1450** to **1400 kc.** (B3-ML-1143).

WJNO—WJNO, Inc., West Palm Beach, Fla.—Designated for hearing application for construction permit to reinstate construction permit B3-P-3041, which expired September 23, 1941, for use of formerly licensed composite transmitter and install new vertical antenna as an auxiliary unit at 511 Dutra St., West Palm Beach, and specify **1230 kc.** (B3-P-3449).

WMAM—M & M Broadcasting Co., Marinette, Wisc.—Designated for hearing application for modification of license to change hours of operation from daytime to unlimited time, using power of 100 watts, 250 watts LS (B4-ML-1146).

WCOP—Massachusetts Broadcasting Corp., Boston, Mass.—Designated for hearing application for renewal of license of Station WCOP (1) to determine the qualifications of the applicant to operate station WCOP in the public interest; (2) to determine the manner and method in which applicant has heretofore operated Station WCOP, particularly with respect to but not limited to foreign language programs, including methods of selecting and investigating personnel, qualifications of personnel, sale of time, and supervision of programs; (3) to determine whether, in view of the facts shown by the examination of the foregoing issues, the continued operation of Station WCOP would serve public interest, convenience, and necessity.

The Commission has announced that it has designated for hearing an application of the Massachusetts Broadcasting Corp. for the renewal of license of Station WCOP, Boston, Mass. The station is one of several foreign language stations controlled by Arde Bulova. The bill of particulars states that the hearing has been set to determine the manner in which the applicant has heretofore operated Station WCOP, particularly with respect to foreign language programs. Testimony at the hearing will concern methods of selecting and investigating personnel, qualifications of personnel, sale of time, and supervision of programs. Following examination of the foregoing issues the Commission will determine whether continued operation of Station WCOP by the present operator would serve public interest.

The Commission has investigated Franco Gallucci, one of WCOP's announcers and its chief Italian program time-broker, who was president for many years of the Massachusetts Federation of Dopolavero, a Fascist front organization, and Ubaldo Guidi, another announcer. Guido had close contact with the Italian Consulate at Boston and was widely known throughout New England as an organizer of a Fascist group. Guido has been arrested by the FBI and has been interned since the attack on Pearl Harbor.

Italian broadcasting on the station was begun at the direction of the late Luigi Fiato, who was executive secretary of the Boston Fascio of the Fascist League of North America.

COMMISSION ORDERS

The Commission has set aside and annulled its order of January 21, 1941, revoking the license of station WDLP, of Panama City, Florida. In the same order it renewed the station license and granted the transfer of control of the Panama City Broadcasting Company to Bay County Publishers, Inc.

The Commission also annulled its order of January 21 revoking the license of Station WTMC, of Ocala. Florida. It granted license renewal to the station and granted transfer of control of the licensee corporation, Ocala Broadcasting Co., Inc., from John T. Alsop, Jr., to News-Journal Company.

Its orders in these two cases are as follows:

At a session of the Federal Communications Commission, held at its offices in Washington, D. C., on the 2nd day of December, 1942:

The Commission, having under consideration its order of January 21, 1941, revoking the license of Panama City Broadcasting Company, licensee of Station WDLP, Panama City, Florida, the evidence adduced at the hearing thereon and the proceedings of record therein; and also the application (File No. B3-TC-220) for transfer of control of the licensee corporation to Bay County Publishers, Inc.; and also the application (File No. B3-R-1053) of Panama City Broadcasting Company for renewal of license to operate Station WDLP; and the Commission finding that public interest will be served by vacating, setting aside and annulling its order of January 21, 1941, herein, and by granting the application for transfer of control and renewal of license of Panama City Broadcasting Company, licensee of Station WDLP, Panama City, Florida;

It is ordered, that the Commission's order of January 21, 1941, revoking the license of Panama City Broadcasting Company, licensee of Station WDLP, Panama City, Florida, be, and it is hereby, vacated, set aside and annulled; and

It is further ordered that the application (File No. B3-TC-220) for transfer of control of Panama City Broadcasting Company to Bay County Publishers, Inc., be, and it is hereby, granted; and

It is further ordered, that the application (File No. B3-R-1053) of Panama City Broadcasting Company for renewal of license to operate Station WDLP, be, and it is hereby, granted.

The Commission, having under consideration its order of January 21, 1941, revoking the license of Ocala Broadcasting Company, Inc., licensee of Station WTMC, Ocala, Florida, the evidence adduced at the hearing thereon and the proceedings of record therein; and also the application (File No. B3-TC-219) for transfer of control of the licensee corporation from John T. Alsop, Jr., to News-Journal Company; and also the application (File No. B3-R-1003) of Ocala Broadcasting Company, Inc., for renewal of license to operate Station WTMC; and the Commission finding that public interest will be served by vacating, setting aside and annulling its order of January 21, 1941, herein, and by granting the application for transfer of control and renewal of license of Ocala Broadcasting Company, Inc., licensee of Station WTMC, Ocala, Florida;

It is ordered, that the Commission's order of January 21, 1941, revoking the license of Ocala Broadcasting Company, Inc., licensee of Station WTMC, Ocala, Florida, be, and it is hereby, vacated, set aside and annulled; and

It is further ordered, that the application (File No. B3-TC-219) for transfer of control of the licensee corporation from John T. Alsop, Jr., to News-Journal Company, be, and it is hereby, granted; and

It is further ordered, that the application (File No. B3-R-1003) of Ocala Broadcasting Company, Inc., for renewal of license to operate Station WTMC, be, and it is hereby, granted.

DOCKET CASE

The Commission has announced its Findings of Fact, Conclusion, and Order (B-150), denying the application of Dodge City Broadcasting Co., Inc. (KGNO), Dodge City, Kans., for modification of license to increase nighttime operating power from 250 to 500 watts (Docket No. 5955).

In its conclusion, the Commission states:

"One of the issues to be determined in connection with the instant application is whether the granting thereof would tend toward a fair, efficient, and equitable distribution of radio service, as contemplated by Section 307(b) of the Communications Act of 1934, as amended. As heretofore shown, the granting of the instant application would enable KGNO to extend its present nighttime service to include an additional area of about 231 square miles and some 1,068 potential listeners who are now without primary broadcast service. This gain in service, however, would be accomplished at the expense of some 5,630 listeners who would lose service from Station KFRO, Longview, Texas. While it is clear from the evidence that some of these listeners who would be so affected have service available from KOCA, Kilgore, Texas, there has not been an adequate showing as to the number or portion thereof residing within the nighttime primary service area of this station. Since the showing in this respect is not complete, we are unable to resolve the issue heretofore stated in favor of the applicant and reach the requisite statutory conclusion that the operation proposed herein would serve public interest, convenience, or necessity."

MISCELLANEOUS

WIBG—Seaboard Radio Broadcasting Corp., Philadelphia, Pa.—Granted modification of construction permit as modified, which authorized installation of new transmitter and directional antenna for day and night use, change hours of operation, increase power, and move transmitter and studio, for change in type of transmitter and extension of completion date from November 30, 1942, to 90 days after grant (B2-MP-1667), subject to conditions.

WMBI—The Moody Bible Institute of Chicago, Ill.—Granted authority to determine operating power by direct measurement of antenna power (B4-Z-1475).

KVOO—Southwestern Sales Corp., Tulsa, Okla.—Granted extension of special service authorization to operate unlimited time with power of 25 KW, 50 KW LS, employing directional antenna at night, and using transmitter described in its construction permit B3-P-2539 (B3-SSA-54).

K37LA—Earle C. Anthony, Inc., Los Angeles, Calif.—Cancelled outstanding construction permit (B5-PH-45 and B5-MPH-66), deleted call letters, and closed the records of the Commission with respect to this station, because of inability to obtain materials.

WMBD—Peoria Broadcasting Co., Peoria, Ill.—Passed for two weeks petition for leave to intervene in the hearing on application of WQBC, Vicksburg, Miss.

WBT—Columbia Broadcasting System, Inc., Charlotte, N. C.; KFAB—KFAB Broadcasting Co., Lincoln, Neb.; WBBM—Columbia Broadcasting System, Inc., Chicago, Ill.; WJAG—The Norfolk Daily News, Norfolk, Neb.—Passed for one week petition to dismiss without prejudice applications of applicants in Dockets 5269, 5270, 5271 and 5864.

KNOE, Inc., Monroe, La.—Granted motion to dismiss without prejudice application for construction permit (B3-P-2887).

WCSH—Congress Square Hotel Co., Portland, Maine.—Granted petition to dismiss without prejudice application for construction permit (B1-P-3490).

KVAK—Carl Latenser (Assignor), Radio Enterprises, Inc. (Assignee), Atchison, Kans.—Granted motion to dismiss application for voluntary assignment of license of station KVAK (B4-AL-320).

WHKC—United Broadcasting Co., Columbus, Ohio.—Granted petition to accept amendment to application for construction permit for changes in directional antenna system.

KFAC—Los Angeles Broadcasting Co., Inc., Los Angeles, Calif.—Denied petition for reconsideration and grant of application for construction permit to increase power from 1 KW to 5 KW, move transmitter, install new transmitter, and install directional antenna for night use (B-P-3499, Docket 6440).

APPLICATIONS FILED AT FCC

710 Kilocycles

WFTL—Ralph A. Horton, Ft. Lauderdale, Fla.—Modification of construction permit (B3-P-3355 as modified, which authorized change in frequency, increase in power, new transmitter and directional antenna for night use and move of transmitter) for extension of completion date from 1-5-43 to 3-5-43.

750 Kilocycles

WHEB—WHEB, Inc., Portsmouth, N. H.—Special service authorization to operate from 7 a. m. to local sunrise during months of November, December, January and February, with power of 250 watts, for period ending 2-1-44.

820 Kilocycles

WGST—Georgia School of Technology, Atlanta, Ga.—Authority to determine operating power by direct measurement of antenna power.

860 Kilocycles

KTRB—KTRB Broadcasting Co., Inc., Modesto, Calif.—Modification of license to move main studio from McHenry & Sylvan Aves., Modesto, Calif., to Norwegian Ave., between Sunrise Ave. & Coffee Road, 1¼ mile N. of NE corner of Modesto.

940 Kilocycles

WMAZ—Southeastern Broadcasting Co., Inc., Macon, Ga.—Authority to determine operating power by direct measurement of antenna power.

1330 Kilocycles

WHAZ—Rensselaer Polytechnic Institute, Troy, N. Y.—Authority to determine operating power by direct measurement of antenna power.

TELEVISION APPLICATION

W2XCB—Columbia Broadcasting System, Inc., area New York, N. Y.—Modification of construction permit (B1-PVB-46 as modified, which authorized new television relay station) for extension of completion date only, from 1-7-43 to 7-7-43.

MISCELLANEOUS APPLICATIONS

W55M—The Journal Co. (The Milwaukee Journal), Richfield, Wis.—License for new auxiliary modulator unit (using unit formerly licensed to Station W9XAO).

KSRO—Ernest L. Finley, Santa Rosa, Calif.—Involuntary assignment of license from Ernest L. Finley, deceased to Ruth W. Finley, Executrix.

KAOY—Don Lee Broadcasting System, area Los Angeles, Calif.—License to cover construction permit (B5-PRE-297 as modified, which authorized new relay broadcast station.

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINT

The Federal Trade Commission has alleged unfair competition against the following firm. The respondent will be given an opportunity to show cause why a cease and desist order should not be issued against it.

L. & C. Hardtmuth, Inc., Bloomsbury, N. J., and Koh-I-Noor Pencil Co., Inc., 373 Fourth Ave., New York, are charged in a complaint with falsely representing that the pencils they manufacture and sell are wholly of domestic make when actually the leads therein were imported from Germany and Czechoslovakia. (4875)

STIPULATIONS

During the past week the Commission has announced the following stipulations:

Baltimore Luggage Co., 105 West Pratt St., Baltimore, stipulated to discontinue representing that any part of an article of luggage sold by them is made of wood or brass when actually such part is made of a product or products other than wood or brass; use of the word "genuine" as descriptive of split leather; selling any article of luggage made of so-called split leather or leather other than the top grain, unless tags or labels showing that such leather is split or cut from the under side of the hide and is not top grain be attached to the article so as to remain thereon until it reaches the ultimate purchaser; and making any representation which has the tendency of misleading or deceiving the purchasing public with respect to the grade, quality, origin, construction, durability, character, or finish of any article of luggage, its fittings, or the leather or other material of which it is composed. (3580)

Federal Bakery Co., Winona, Minn., selling a food product designated "Federal Prize Winner Bread," and M. H. White and H. R. Wiecking, trading as Winona Radio Service, 216 Center St., Winona, advertising agents who disseminated advertisement for the product, have stipulated to cease and desist from representing that Federal Prize Winner Bread supplies substantial amounts of the vitamins and the food minerals; that it conforms to the recommendations of the Committee on Food and Nutrition of the National Research Council; that the consumption of this bread in customary amounts will provide the daily minimum requirement of thiamin; that the bread is made with whole milk as one of its ingredients; or that more of this bread is sold in the Winona, Minnesota, market than any other bread, or that because of the presence of thiamin it will aid in the digestion of food. (03079)

Hill Brothers Co., Hudson, Mass., manufacturing and selling men's shoes, has stipulated to cease and desist from use of the words "Cross & Cross," in connection with a crown or shield, or the words "The House of McGregor's Ltd.," either alone or in connection with the words "Bespoke Bootmakers," or with any other words, picturization, or insignia customarily identified with the British Isles, as a mark, stamp or brand name for, or to otherwise purportedly describe or refer to its domestically-made products; and from use of words or combinations in any way, the effect of which conveys the belief to purchasers that the products are of British make or imported from England; from use of the words "Hand Made," or words of similar implication as purportedly descriptive of products not made by hand; and from use of any named concern, such as "Dominick & Dominick," so as to convey the belief that the products are manufactured by or in accordance with the specific order of the named concern when such is not the case. (3575)

Old Trusty Dog Food Co., Inc., Needham Heights, Mass., stipulated that in the sale of a dog food designated "Supreme Meal" it will cease and desist from representing that the United States Government has adopted general specifications for dog foods and that its product is compounded in accordance with "U. S. Government Specifications"; that its product is "scientifically balanced" or constitutes a balanced ration for dogs of all breeds and ages; that "Supreme Meal" contains blood-purifying minerals or by reason of its mineral or other content possesses blood-purifying properties, and that the product will prevent infectious diseases or insure the virility, vigor or health of dogs. The respondent company also agrees to stop making any comparison of the vitamin content of its product with the vitamin content of a dog food deficient in the vitamins indicated, the effect of which is to imply that its product contains vitamins in excess of the actual vitamin content. (3579)

Paul's Furniture Store, Westwood, N. J., Paul Gluck and Bernard Gluck, retailers of household merchandise, furniture and rugs, stipulated that they will discontinue the use of advertising which has the capacity or tendency to convey the belief to customers that the merchandise referred to in such advertising is new when actually it has been used or repossessed; that the persons referred to in the advertising are in possession of the advertised merchandise or have a salable interest in it; that the price for which the merchandise is advertised for sale is the unpaid balance due thereon or does not exceed the sum remaining unpaid by such persons; or that the advertising had been inserted or authorized by such persons. The respondents also agree to stop using the word "Oriental" to refer to rugs which are not made in an Oriental country and do not contain all of the essential characteristics and qualities of Oriental rugs; unless, if such word is used properly to designate only the pattern or design of the rugs, it shall be immediately accompanied by other words, such as "design" or "pattern," printed in equally conspicuous type, so as to clearly indicate that only the design or pattern is a likeness of an Oriental design or pattern. The respondents further stipulate that they will discontinue using the words "Oriental Reproduction" as descriptive of rugs which are not in fact reproductions of the indicated type. (3581)

Reese Chemical Co., Cleveland, Ohio, selling a medicinal preparation designated "Blu-Tabs," has stipulated to cease and desist from disseminating any advertisement which fails clearly to reveal that frequent or continued use of the preparation may cause nervousness, restlessness or sleeplessness; that individuals suffering from high blood pressure, heart disease, diabetes or thyroid trouble should not use the preparation except on competent medical advice; that it should not be used in case of lung disease or chronic cough, and that if a skin rash appears its use should be discontinued; provided, however, that such advertisement need only contain the statement: "Caution, use only as directed," if the directions for use contain a caution or warning to the same effect. (03080)

Ruckel Manufacturing Co., 547 Broadway, New York, manufacturer of comforter and blanket covers, entered into a stipulation to cease and desist from the use on labels or stationery, or in any other manner, of the term "Eighty Square" as descriptive of the fabric of which his products are made and from the use of such term or of any similar term, the effect of which tends to convey the belief that the fabric is composed of the designated number of threads or picks to the square inch when actually the thread count is other than that indicated; the term "Full Size" to imply that products so designated are of a 72-inch by 84-inch size, as the term "Full Size" is understood in the trade; and the brand "82 x 90" or any other purported size indication which is not truthfully representative of the actual dimensions of the products. (3578)

Ben Schwartzman, Inc., 150 West 28th St., New York, selling and distributing fur garments, has entered into a stipulation to cease and desist from the use in advertisements or on labels, tags, or other media, of any representation or designation of a fur which deceptively conceals the true name or nature of the fur with the tendency to mislead or deceive purchasers, and from designating or describing furs in any manner other than by the use of the correct name of the fur as the last name of its description, and when any dye, blend or process is used in simulating another fur, the true name of the fur appearing as the last word of the description shall be immediately preceded in equally conspicuous type by the word "dyed" or "blended" compounded with the name of the simulated fur, such as "Seal-dyed Coney," "Beaver-dyed Coney," and "Mouton-dyed Lamb." (3574)

Standard Corset Co., 144 Race St., Holyoke, Mass., has entered into a stipulation to cease and desist from representing that the corsets or foundations it sells will cause firm muscles, remove excess avoirdupois, reduce the hips or waist, or correct irregularities or defects of the figure; and that the front of its so-called "Armmori Belt" is fully elastic, is made to comply with the laws of nature, and is prescribed by physicians and surgeons for abdominal irregularities. (3576)

St. Lawrence Textile Mills, Inc., 1261 Broadway, New York, engaged in the sale of oil silk and rayon fabrics, stipulated to discontinue use of the word "Mills" as part of its corporate or trade name and the word "manufacturers" or other words of like meaning to imply that it manufactures the products it sells or actually owns and operates or directly controls a plant or factory in which such products are made. (3577)

CEASE AND DESIST ORDERS

The Commission issued the following cease and desist orders last week:

Joseph Cohen, 713 Otis Place, N. W., Washington, D. C., has been ordered to cease and desist from the sale and distribution of so-called press supplies, including press cards and automobile press tags represented as entitling the holder to pass through police and fire lines and to receive the courtesies and privileges extended to regular newspaper correspondents. PETER DENIES OPINIONS LAID TO HIM BY PAPER

Paul Peter, NAB Research Director, has disowned, without reservation, those opinions about small radio stations attributed to him in a recent issue of *Radio Daily.*

Mr. Peter sent the following letter to Chairman Fly of the FCC in reference to the matter:

December 14, 1942

Honorable James Lawrence Fly, Chairman
Federal Communications Commission
Washington, D. C.

Dear Mr. Fly:

I disown, without reservation, those opinions about small radio stations attributed to me in Monday's *Radio Daily.* I neither uttered the statements attributed to me, nor do they represent my views.

To the contrary, my own personal view is that the small stations are rendering a substantial service to the nation, and the importance of that service during the war period is considerably increased. One of the greatest values of the broadcasting industry to the war effort rests in its ability to reach the maximum number of people in our country. Small stations in towns of low population are the sole source of broadcasting during daylight hours to a sizeable segment of the nation's population. I have repeatedly stated it is essential that small station service be maintained.

The NAB is currently working to assist stations in the development of additional business and in the solution of their manpower problems. At this time, we are setting up a retail advertising clinic designed to promote the sale of broadcast advertising to retail business. Small stations depend largely on local merchants for their revenue, and it is logical to expect that they will have most to gain from this NAB activity.

I assure you that the views expressed in *Radio Daily* are not mine and that, on the problem of small station operation, NAB is aligned with the FCC to promote their interests.

Sincerely yours,

Paul F. Peter,
Director of Research.

NAB ASKS SELECTIVE SERVICE FOR NEW DEFERMENT PLAN

NAB has requested General Lewis B. Hershey, Director of the Selective Service System, to include the radio broadcasting industry under the plan set up for occupational deferments in critical scientific fields and other highly specialized fields. The matter is under consideration.

The plan was released as LBR 159 and at present covers only physicists. If broadcasting is included under the plan, an industry committee would be appointed and authorized to endorse all Forms 42-A which in its determination make out proper cases for occupational deferment. Local Boards would be expected to give great weight to Forms 42-A thus approved.

We print below NAB's letter to General Hershey and LBR 159:

November 19, 1942

Major General Lewis B. Hershey, Director
National Headquarters, Selective Service System
21st Street and C Street, N. W.
Washington, D. C.

Re: LBR 159,—National Committees for Critical Scientific Fields

Dear Sir:

On behalf of the National Association of Broadcasters by direction of the association's president, Mr. Neville Miller, and in the interests of the radio broadcasting industry, I respectfully request that "The National Committee on Radio Broadcasting, National Association of Broadcasters, Washington, D. C.," be authorized by you under the above-captioned Local Board Release.

Mr. Miller has designated the six Directors-at-Large of the Association, and will designate the Network Directors of the Association if they care to serve, to be the committee. The Directors-at-Large are elected by the membership of the Association annually,—two to represent large stations, two medium sized stations and two small stations. The present incumbents were elected at the Annual Convention of the NAB last May. A committee so composed will represent all segments of the industry and the various types of station operations. Because the members have been elected by the membership of the Association, we are sure the industry will have complete confidence in the integrity and judicial temperament of the committee.

(Continued on page 722)

HAPPY NEW YEAR

NAB Reports

The NATIONAL ASSOCIATION OF BROADCASTERS

NAB ASKS SELECTIVE SERVICE FOR NEW DEFERMENT PLAN

(Continued from page 721)

The committee as designated comprises: Edwin W. Craig, WSM, Nashville; J. O. Maland, WHO, Des Moines; Eugene O'Fallon, KFEL, Denver; Don S. Elias, WWNC, Asheville; Herbert Hollister, KANS, Wichita; and, James W. Woodruff, Jr., WRBL, Columbus, Georgia.

If the networks care to be represented on the committee, the Network Directors are: Paul W. Kesten, Vice President, Columbia Broadcasting System, New York City; and, Frank M. Russell, Vice President, National Broadcasting Company, Washington, D. C.

Inasmuch as the greater part of the industry's requests for occupational deferment deal with technicians requiring scientific knowledge or others in highly specialized fields, I believe the industry can be appropriately brought under the National Committee Plan.

The adaptability of the Manning Table Plan to the radio broadcasting industry has been thoroughly explored. We have concluded that our industry, chiefly composed as it is of 909 relatively small units, is not well suited to that plan. Exclusive of network employees as such, the average number of employees per radio station is estimated to be 21, with the range of employment running from two to only 132.

Based on returns from a survey we have recently completed 601 stations out of 909 in operation all over the United States and its territorial possessions have indicated that there were in their employ on September 16, 1942, only 2,464 men whom they deem to be "necessary men" in critical occupations. Of this number, 150 are in Class I-A, 116 are in Class II-A or II-B, and 1,958 in Class III-A or III-B. Approximately 67% of the men in Class III-A and III-B have dependent children. Thus it may readily be seen that the number of registrants in the radio broadcasting industry likely to be affected during the next year is exceedingly small, and that our situation is one well adapted to the National Committee Plan set forth in LBR 159, and ill adapted to the Manning Table Plan.

Your earnest consideration of this request will be greatly appreciated to the end that we may put the plan into operation at the earliest possible date.

I shall be most happy to furnish you with any additional information in this connection which you may desire.

Respectfully yours,

Russell P. Place,
Counsel.

NATIONAL HEADQUARTERS 622.21
SELECTIVE SERVICE SYSTEM
Washington, D. C.

November 7, 1942

LOCAL BOARD RELEASE NO. 159
EFFECTIVE: NOVEMBER 7, 1942

SUBJECT: NATIONAL COMMITTEES FOR CRITICAL SCIENTIFIC FIELDS

1. **Shortages in certain fields.**—In certain scientific and specialized fields there may occur, from time to time, critical shortages of persons who possess or who are in training or preparation to acquire the high degree of training, qualification, or skill necessary to engage in activities essential to war production or essential to the support of the war effort.

2. **National Committees may be authorized.**—When the War Manpower Commission has determined that there is such a critical shortage in a scientific or specialized field, the Director of Selective Service may authorize the appointment of a National Committee in that field, to assist the Selective Service System by reviewing affidavits for occupational classification.

3. **Filing Affidavit—Occupational Classification.**—When such a National Committee has been appointed for a scientific or specialized field, the employer or recognized university of college desiring occupational classification for a registrant who possesses the training, qualification, or skill in that field, or is in training or preparation therefor, may prepare Affidavit—Occupational Classification (Form 42 or 42A) in duplicate, file the copy with the local board in the usual manner, and forward the original to the National Committee.

4. **Action by the National Committee.**—When the National Committee receives a Form 42 or 42A, it will investigate the registrant. If, in its opinion, the registrant possesses the training, qualification, or skill and is a necessary man in an essential activity or a necessary man in training or preparation therefor, the National Committee is authorized to place a stamped endorsement prescribed by the Director of Selective Service on the original Form 42 or 42A and to file the form with the registrant's local board.

5. **Consideraton by local board.**—When the original Form 42 or 42A, stamped by the National Committee, is received by the local board, it shall be considered as showing that the registrant has been investigated, that in the opinion of the National Committee he possesses the training, qualification, or skill required, and that, as the case may be, he is a necessary man in an essential activity or a necessary man in training or preparation in such scientific and specialized field.

6. **Classification Advice (Form 59).**—When a Form 42 or 42A, stamped by a National Committee, has been received for a registrant and the local board, nevertheless, classifies the registrant as available for military service or for assignment to work of national importance, the local board shall notify the National Committee, as well as the employer or university or college, by mailing to the National Committee and to the employer or university or college Classification Advice (Form 59). In such case the National Committee, as well as the employer or university or college, may appeal to the board of appeal from classification of the registrant.

7. **National Committees.**—Attached is a list of National Committees for scientific and specialized fields authorized by the Director of Selective Service.

Lewis B. Hershey,
LBH/phw *Director.*
Distribution A, B, C, D, E, F

LIST OF NATIONAL COMMITTEES

Authorized by the Director of Selective Service to review affidavits for occupational classification in the scientific and specialized fields indicated:

Physicists

The National Committee on Physicists, National Roster of Scientific and Specialized Personnel, Washington, D. C.

Broadcast Advertising

BOOKS FOR THE ADVERTISING MAN

The Advertising Federation of America has just issued its 1942 bibliography entitled: "Books for the Advertising Man." This 36-page book contains 1414 listings, divided among 57 subject classifications. These range from Advertising Agencies to Window and Store Display.

There are 30 listings under Classification 39 "Radio Advertising." Each listing contains the following information: subject classification, name of author, title of book, year of publication, publication price, name of publisher and number of pages.

Periodically the Department of Broadcast Advertising receives requests for information on advertising publications. This exceedingly complete bibliography is available on the following basis: single copies, $1; 10 copies, $7.50; 25 copies, $12.50; 50 copies, $20.

If you want a copy, write to NAB. All orders will be grouped to earn the lowest possible rate and you will be notified of the cost to you before your order is actually placed with the AFA.

PER-INQUIRY REQUEST

Two months ago, a member station reported the effort of a District Circulation Representative of the Saturday Evening Post to place a subscription campaign on a P-I basis. Since two or three similar reports have been received, it seems appropriate to reprint part of a letter from the Director of Circulation for the Curtis Publishing Company:

"The reason we had our men make inquiries of this kind was because at a meeting in the Middle West, in August, some of our men told us that certain of the smaller stations throughout the Southwest had been operating on this basis. We had no definite knowledge of it, and we asked our men to make inquiry and get us information.

"We might also add that, without our knowledge or permission, a subscription representative early this year made use of several stations on the West Coast in connection with a subscription campaign on a cost-per-sale basis.

"All that we were after was information that would give us a picture of the situation. Now that we understand there is objection to such a procedure, *we have instructed our men to discontinue their inquiries along this line.*"

From other evidence, we are confident that the subscription representatives of the Curtis Publishing Company have ceased all efforts to promote the use of a radio on a per-inquiry basis.

Full credit should be given to this famous weekly for terminating all efforts along these lines when informed of the broadcasting industry attitude.

NEED COUGH SYRUP?

Several member stations have sent in the letter and suggested announcements for "Grandma's Cough Syrup" from the Herald Advertising Company of San Antonio. Part of the letter deserves reproduction:

"This is your authority to run six announcements daily, including Sunday, on your station at your lowest local monthly package rate . . .

"In return for these announcements we will ship you prepaid, each month in advance, enough Grandma's Cough Syrup, in the regular sixty cent size, to equal your package rate, figuring Grandma's Cough Syrup at the regular wholesale rate of $4.80 per dozen.

"We will run this deal with you for four months . . ."

So—if you want to go into the wholesale and maybe the retail drug business, this is your opportunity. Seriously, are we such suckers as some people seem to think?

INFANTILE PARALYSIS

Next week all stations will receive a letter from Neville Miller, NAB president, and Chairman, National Radio Division, The National Foundation for Infantile Paralysis.

The letter asks station cooperation in connection with the Foundation's annual fund raising campaign through The Celebration of the President's Birthday. The letter reads:

"As the United States enters its second year of World War II, we are just beginning to see the effects of total war upon our populace—food must be rationed, our homes are not as warm as usual, but there is one thing that cannot be rationed, and that is the health and welfare of our children. The American radio industry cannot fail the children of America. One of the greatest scourges of childhood is the threat of Infantile Paralysis—an epidemic disease which leaves cripples in its wake.

"In America, through the facilities of The National Foundation for Infantile Paralysis, cripples are rehabilitated and given every chance to lead normal lives. Hundreds of orthopedic patients are now at work on vital war equipment in our airplane, radio and other precision factories.

"To carry on the work of the National Foundation costs millions of dollars. The National Foundation must be prepared for any eventualities. I, as Chairman of the National Radio Division, earnestly solicit the cooperation of your facilities and personnel in this nationwide crusade against Infantile Paralysis.

"Within the next few weeks you will receive various types of material, both transcribed and live, from our radio division. I urge you to use this material. May I also suggest that you cooperate with the local chairman in your vicinity and help him build special Infantile Paralysis programs.

"Recent research proves that the radio audience is now larger than at any time in history. Hence radio, the world's greatest mass medium, must and will help put the 1943 fight against Infantile Paralysis over the top."

TO DEVISE TRAINING PATTERN

Under actual working conditions, the National Electronic Distributors Association is working out a pattern of minimum instruction for radio service trainees. When perfected the plan will be made available nationally. It was undertaken at the suggestion of Jerry R. Hawke, assistant director, Vocational Training for War Production Workers, and William P. Loomis, Assistant Director in Charge of Instructional Materials, Vocational Training for War Production Workers, both of the Office of Education.

The study follows conferences at NAB with George D. Barbey, Association President of Reading, Pa.

More Station Help

To conserve manpower, more stations are explaining to listeners why it will help in the wartime effort if listeners will bring their radios to radio repairmen instead of asking repairmen to call. Another group of cooperators is listed below:

WRDO — Augusta, Me.; KRE — Berkeley; WKRO — Cairo; WFAA-KGKO — Dallas; WRUF, Gainesville; WMIS—Natchez; WWL—New Orleans; KGY—Olympia; KWSC—Pullman; WFBL—Syracuse; WTNJ—Trenton.

MESSAGE FROM ADMIRAL JACOBS

Randall Jacobs, Rear Admiral, U. S. N., The Chief of Naval Personnel, has asked NAB to extend greetings to stations of the United States and to convey "the gratitude of the Navy for their deeply patriotic interest and outstanding cooperation. The broadcasting industry shares no small part of the credit for the success of Navy recruiting in fully keeping pace with the unprecedented needs of global war."

WCSC GIVES CUP

A silver cup will be awarded by Radio Station WCSC, Charleston, to the shop in the Charleston Navy Yard having the best all-round record for the first seven months of 1943.

The cup, signifying group leadership in all matters pertinent to the war effort, will be displayed at points throughout the Yard during the period of competition, and will be awarded in a ceremony next Labor Day.

J. E. McCAW NOW MAJOR IN AAF

J. E. McCaw, general manager, KELA, Centralia, Wash., has recently been promoted to Major in the Army Air Forces. Major McCaw is attached to the headquarters staff in Washington, D. C.

COST OF LIVING

The Labor Department reports that the cost of living increased 0.7 per cent between October 15 and November 15, bringing the index to 119.8 per cent of its 1935-39 average.

"NAVAL AIDE AUXILIARY"

A southern member reports that Irving Parker of "Naval Aide Auxiliary" is seeking free time to publicize exhibitions of what purports to be a captured Messerschmitt plane.

The Navy Department reports that "Naval Aide Auxiliary" has no connection with the U. S. Navy or the Navy Relief Society, and is reported to be a California corporation.

FEDERAL COMMUNICATIONS COMMISSION

FLY PRESS CONFERENCE

Progress is being made on the study by the FCC of the small stations financial situation according to James Lawrence Fly, Chairman of the Commission. Following conferences which the Commission officials had with the OWI the Chief Accountant of the FCC is preparing some figures analyzing the financial situation of the stations, and it has been tentatively planned that conferences be held to discuss the problem with the advertisers although no definite steps have been taken in that direction.

Mr. Fly told the newsmen at a press conference early this week that pending completion of the analysis being made by the accounting department, "we are somewhat impeded at the moment by not having 1942 figures." Normally the financial figures for the year would not be available to the Commission until March but Mr. Fly said that owing to the unusual situation he is having brief questions sent to all stations, and "we hope the stations will give us immediately the returns for the complete year of 1942 with the thought that the figures will not be binding."

Chairman Fly said, in announcing the abbreviated questionnaire, "The stations can use approximated figures, and in any case they will be tentative. But in order to help the stations at this juncture we really need all the information they can give us now. I think that by the middle of January we ought to have something to report. I don't mean to say that the whole matter will be settled by then but I feel optimistically that we can progress very expeditiously with it."

The Chairman told the conference that he hoped very shortly to have something on the manpower situation as it affects the broadcasting industry. The Manpower Commission representatives, he said, have been giving very intensive study to the problems of the industry and, "we have had some recent conferences." Mr. Fly said he thought there is a very good prospect that they will come off with a pretty good understanding as to the essential character of the radio business and ultimately a recognition of all the essential features of that business. "I don't want to be too optimistic about it, but I do want to say that I am optimistic on the prospect of getting favorable solution there," he said.

Mr. Fly in further discussion of the manpower situation said he thought every branch of the industry should make every effort possible to bring in new labor material, "bring in young men, for example, and train them and bring them up to responsibilities." He also expressed the opinion that older men who have the capacity should be trained. He stated that "it would be a great mistake to overlook the tremendous resources we have in the woman power generally available, and it has been discovered in broadcasting particularly that women have a very broad and great capacity." He said, still speaking of the woman power of the country, "I should think we would be derelict if we overlooked that resource."

RULES CHANGES

The Commission has announced the following action on rules and regulations dealing with international broadcast stations:

Adopted an Order suspending until further order of the Commission Subsection (f)(1), (2) and (3) of Section 4.43, Subsections (d) and (e) of Section 4.44, and Section 4.46 of the Rules and Regulations governing international broadcast stations. These particular restrictions were considered unnecessary at this time. This action was taken in order to coordinate the operation of all international broadcast stations in the interest of the Government for the conduct of psychological warfare and to insure maximum flexibility of operation.

The text of the suspended subsections and section is as follows:

Subsection (f)(1), (2) and (3) of Section 4.43:

"(f)(1) Each licensee of an international broadcast station shall make verbatim mechanical records of all international programs transmitted.

"(2) The mechanical records, and such manuscripts, transcripts, and translations of international broadcast programs as are made shall be kept by the licensee for a period of two years after the date of broadcast and shall be furnished the Commission or be available for inspection by representatives of the Commission upon request.

"(3) If the broadcast is in a language other than English the licensee shall furnish to the Commission upon request such record and scripts together with complete translations in English."

Subsections (d) and (e) of Section 4.44:

"(d) An international broadcast station will not be authorized to use more than one frequency listed in any group listed in paragraph (a) without a showing of technical necessity.

"(e) Not more than one frequency shall be used simultaneously under the same authorization and call letter designation."

Section 4.46: "A supplemental report shall be filed with and made a part of each application for renewal of license and shall include statements of the following:

(a) The number of hours operated on each frequency.

(b) A list of programs transmitted of special international interest.

(c) Outline of reports of reception and interference and conclusions with regard to propagation characteristics of the frequency assigned."

At the same time the Commission interpreted Subsections (d) and (e) of Section 4.43 as requiring a single station identification for all stations which are carrying the same program, and as requiring identification of international broadcast stations only at the beginning and end of a transmission.

FEDERAL COMMUNICATIONS COMMISSION DOCKET

HEARINGS

No hearings or oral arguments are scheduled to be heard before the Commission during the week beginning Monday, December 28.

FEDERAL COMMUNICATIONS COMMISSION ACTION

APPLICATIONS GRANTED

WTBO—Aurelia S. Becker, Administratrix for Frank V. Becker, deceased (Tranferer), Aurelia S. Becker (Transferee), Associated Broadcasting Corp. (Licensee), Cumberland, Md.—Granted consent to transfer control of Associated Broadcasting Corporation, Station WTBO, from Mrs. Aurelia S. Becker, Administratrix of the estate of her deceased husband, Frank V. Becker, to Aurelia S. Becker as an individual. There is no monetary consideration involved in this transfer of control (B1-TC-312).

WJWC—Hammond-Calumet Broadcasting Corp., Hammond, Ind.—Granted Special Service Authorization for term of license period ending April 1, 1944, to operate with 5 KW, DA-night, on frequency of **1520 kc.**

WOOD—King-Trendle Broadcasting Corp., Grand Rapids, Mich.—Granted special temporary authority to operate station WOOD unlimited time on **1300 kc.** with 5 KW power, for a period of 60 days.

WBAX—John H. Stenger, Jr., Wilkes-Barre Pa.—Granted petition for extension of effective date of Decision and Order in re application for renewal of license for period of 90 days. (Docket 5430.)

WHEC, Inc., Rochester, N. Y.—Granted construction permit (B1-PH-96) for new high frequency (FM) station, subject to Order No. 79, which contains fundamental policy in re newspaper ownership of radio station; channel **44700 kc.,** 300 square miles, subject to meeting engineering conditions.

LICENSE RENEWALS

Licenses for the following stations were further extended upon a temporary basis only, for the period ending February 1, 1943, pending determination upon application for renewal of license:

KBST, Big Spring, Texas; KCMC, Texarkana, Texas; KCRJ, Jerome, Ariz.; KFMB, San Diego; KGEZ, Kalispell, Mont.; KGFW, Kearney, Neb.; KGGF, Coffeyville, Kans.; KGKL, San Angelo, Texas; KHBC, Hilo, Hawaii; KHBG, Okmulgee, Okla.; KID, Idaho Falls, Idaho; KIEM, Eureka Calif.; KINY, Juneau, Alaska; KPLT, Paris, Texas; KRBA, Lufkin, Texas; KRBC, Abilene, Texas; KVGB, Great Bend, Kans.; KWFC, Hot Springs, Ark.; KWKH, Shreveport, La.; KXL, Portland, Ore.; WAAB and auxiliary, Boston; KBBZ, Ponca City, Okla.; WBNX, New York City; WBRW, Welch, W. Va.; WCAZ, Carthage, Ill.; WCBT, Roanoke Rapids, N. C.; WEDC, Chicago; WFCI, Pawtucket, R. I.; WFPG, Atlantic City, N. J.: WFTC, Kinston, N. C.; WGES, Chicago; WHOM, Jersey City, N. J.; WING, Dayton, Ohio; WJBW, New Orleans, La.; WLBJ, Nr. Bowling Green, Ky.; WLOF, Orlando, Fla.; WNBZ, Saranac Lake, N. Y.; WOCB, Nr. Hyannis, Mass.; WOKO and auxiliary, Albany, N. Y.; WTEL, Philadelphia; WTRC, Elkhart, Ind.; WHOM auxiliary, Jersey City.

The following stations were granted renewal of licenses for the period ending December 1, 1944:

FEDERAL TRADE COMMISSION DOCKET

Any NAB member wishing to have the full text of any of the FTC releases, printed in part below, should write to the NAB, referring to the number in parentheses at the end of each item.

COMPLAINTS

The Federal Trade Commission has alleged unfair competition against the following firms. The respondents will be given an opportunity to show cause why cease and desist order should not be issued against them.

Berlou Manufacturing Co., Marion, Ohio, compounding and selling an aqueous arsenic preparation designated "Berlou Guaranteed Mothproof," is charge in a complaint with false advertising and misrepresentation. (4876)

Book-A-Week Club, Inc., 147 West 22nd St., New York, engaged in the sale and distribution of reference books designated as Standard American Encyclopedia and the University of Knowledge Wonder Books, is charged in a complaint with misrepresentation. (4877)

Chain Institute, Inc., et al.—Eighteen manufacturers of chain and chain products, including tire chains, and their trade association, Chain Institute, Inc., Chicago, are charged in a complaint with maintaining an unlawful combination to fix prices and eliminate competition in the manufacture and sale of their products.

The complaint also is directed against the Washington firm of Shirley, Olcott & Nichols, Government contract brokers, who allegedly acted as the agent for four of the respondent manufacturers in submitting collusive and identical bids to Government agencies buying tire chains.

American Chain & Cable Co., Inc., of York, Pa., and Bridgeport, Conn., is the so-called "price leader" for the Chain Institute members, who by agreement, the complaint alleges, follow the price increases and decreases announced by the respondent American. Other respondent manufacturers named in the complaint are:

The Bridgeport Chain & Manufacturing Co., Bridgeport, Conn.; The McKay Co., Pittsburgh; Pyrene Manufacturing Co., Newark, N. J.; Hodell Chain Co., Cleveland, Ohio; St. Pierre Chain Corp., Worcester, Mass.; S. G. Taylor Chain Co., Hammond, Ind.; Cleveland Chain & Manufacturing Co., Cleveland, Ohio.; Columbus McKinnon Chain Corp., Tonawanda, N. Y.; International Chain & Manufacturing Co., York, Pa.; Nixdorff-Krein Manufacturing Co., St. Louis, Mo.; Peerless Chain Co., Winona, Minn.; Round California Chain Co., San Francisco, Calif.; J. M. Russell Manufacturing Co., Naugatuck, Conn.; Seattle Chain & Mfg. Co., Seattle, Wash.; Turner & Seymour Manufacturing Co., Torrington, Conn.; Western Chain Products Co., Chicago; and Woodhouse Chain Works, Trenton, N. J.

Officers of the Institute named in the complaint are Dennis A. Merriman, managing director; Walter S. McCann, secretary and treasurer; William D. Kirkpatrick, president; George J. Campbell, Jr., vice president; and Frank A. Bond.

The respondent members of the firm of contract brokers are Alfred P. Shirley, Floyd B. Olcott and Forrest C. Nichols, with offices in the Mills Building, Washington. (4878)

CEASE AND DESIST ORDERS

No cease and desist orders were issued by the Commission during the past week.

STIPULATION

During the past week the Commission has announced the following stipulation:

G. E. Conkey Co., 6529 Broadway Ave., Cleveland, Ohio, selling and distributing a dry dog food preparation in cube, meal and pellet form designated "Conkeys Y-O Dog Ration"; and Rogers & Smith, 20 North Wacker Drive, Chicago, an advertising agency which disseminated advertisements for the product, have entered into a stipulation in which they agree to cease and desist from using the terms "meat," "dehydrated meat," "beef," or "dehydrated beef," or any other term of similar meaning to designate or describe dehydrated meat meal or beef meal, or any product which is not beef or meat.
